Radio galaxies and quasars number-flux density relations role in cosmology, discussing object identification, population, angular sizes, etc

23 p4218 A69-42324

Observational cosmology developments with radio and X ray astronomy emphasizing existence, origin, effects and anisotropy of excess microwave background

23 p4219 A69-42327

Observational cosmology in terms of relation between red shift and apparent luminosity of galaxies /Hubble relation/

23 p4219 A69-42328

Stellar evolutionary ages and gravitational theory relations based on initial abundance ratio U 235/U 238 and present interstellar medium heavy element content

23 p4219 A69-42329

Deceleration parameter lower and upper limits for zero pressure big bang cosmological Friedmann models imposed by density parameter, Hubble constant and universe age

23 p4219 A69-42373

Density fluctuations during later stages of formation of universe, emphasizing problems of galactic cluster formation

23 p4221 A69-42390

Universe behavior in time, discussing expansion observed by red shift, closed universe with future contraction phase and unlimited expansion open model

23 p4221 A69-42391

Homogeneous axisymmetric anisotropic cosmological models, analyzing magnetic fields and initial anisotropies effect on 3K radiation and primordial He production

23 p4222 A69-42402

Absorption lines in stellar spectra and significance in cosmogony, discussing ionized Ca K line detection during delta Orionis study, K and H lines components, etc

24 p4383 A69-42999

Book on physics and evolution of galaxies covering properties, stellar content, interstellar matter, high energy particles and radio galaxies

24 p4384 A69-43167

Particle creation and quantized fields in expanding universe using covariant generalization of special relativistic free field equations, studying zero- and arbitrary-spin particles

24 p4352 A69-43193

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process

24 p4390 A69-43783

COSMONAUTS

Professional activity of cosmonauts, considering training, mental and physical qualities and engineering background

[UN PAPER 68-95716] 06 p0879 A69-17036

Statistical correlation between cardiovascular activity and respiration dynamics of cosmonauts during orbital flight, discussing heart beat and respiration rates

07 p1061 A69-18584

Astronaut selection and training in U.S. and U.S.S.R.

13 p2216 A69-28636

COSMOS SATELLITES

Satellite meteorological research in U.S.S.R., discussing Cosmos satellites instrumentation, earth thermal radiation distribution, IR and UV spectra and cloud photography

01 p0111 A69-10950

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis

02 p0240 A69-11698

Cosmos 253 rocket reentry and fragmentation over England

05 p0830 A69-16656

Onset and development of typhoons observed by Cosmos satellites using TV type IR apparatus

[UN PAPER 68-95774] 06 p0949 A69-17039

U.S.S.R. system Meteor consisting of four Cosmos satellites in polar orbits to observe cloud distribution, snow and ice field boundaries, etc

06 p1013 A69-17053

Narrow and wide angle actinometric instruments on-board Cosmos 122, 144 and 156, describing optical and data acquisition systems

06 p0929 A69-17977

M-20 digital computer program designed for calculating statistical characteristics of signals from IR TV scanning system of Cosmos 122 meteorological satellite

06 p0929 A69-17980

Digital computer algorithm for automatic processing of IR weather data transmitted by Cosmos 122 and 144 meteorological satellites

06 p0929 A69-17981

Draconic period changes of satellite 1965-11-D /Cosmos 54 rocket/ during visual observations with Interob

12 p2174 A69-26444

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum

13 p2327 A69-27693

Radiation measurements by Cosmos 122 satellite over various regions, determining radiation temperature, long wave heat flux and albedo

13 p2291 A69-27726

Radiation fields and large scale atmospheric disturbances analyzed, using radiation maps from Cosmos satellites

13 p2291 A69-27727

Analytical model of geomagnetic field constructed from Cosmos 49 data using spherical analysis

13 p2258 A69-28729

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

14 p2446 A69-29047

Global mean monthly charts for IR radiation temperature, based on Cosmos 144 satellite data

15 p2596 A69-30643

Atmospheric density and temperature variations between 200-600 km from Cosmos satellite data, noting solar activity effect

15 p2599 A69-31343

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components

22 p4003 A69-40274

COSMOS 5 SATELLITE

Molecular ion concentrations determined using flat probe collector trap on Cosmos 5 satellite at 200-300 km

20 p3519 A69-37021

COSMOS 6 SATELLITE

Radioactive debris distribution in space from 9 July 1962 thermonuclear explosion over Johnston island recorded by Cosmos 6 satellite

23 p4205 A69-41836

COSMOS 137 SATELLITE

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

22 p4007 A69-41093

COSMOS 149 SATELLITE

Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters

14 p2447 A69-29403

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth

14 p2447 A69-29404

Earth thermal emission intensity measured by two beam radiometer onboard Cosmos 149, noting discrepancy between empirical and theoretical transfer functions of atmosphere

15 p2596 A69-30651

Atmospheric radiative balance measurement on board Cosmos 149, describing design and operation of device

15 p2597 A69-30652

Cosmos 149 satellite stabilization system, discussing three axis orientation and pitch, yaw and roll stabilizations by aerodynamic and/or gyroscopic moments

17 p3047 A69-33226

COSPAR [COMMITTEE]

U COMMITTEE ON SPACE RESEARCH

COST ANALYSIS

General aviation missions in national transportation system /1968, 1975, 1980/, considering fuel taxes, overall system economics, ground facilities, etc

[AIAA PAPER 69-818] 19 p3453 A69-35624

Large area Si solar cell arrays design, considering environment, cell layout, thermal expansion, coverslides fabrication, costs, etc

19 p3253 A69-35708

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section

20 p3625 A69-37590

Remote sensing systems costs, benefits and economic evaluation

20 p3493 A69-37742

Economic effectiveness determination methods for commercial transport aircraft design analyzed quantitatively, using four engine 100-seat turboprop aircraft

21 p3855 A69-38873

Economic effectiveness of design and fabrication changes in aircraft construction industry for profitable operation of commercial transport aircraft

21 p3855 A69-38874

Fracture mechanics concepts for cost effective booster pressure vessel design and fabrication from commercial steels using boiler plate techniques and minimal NDT quality control

21 p3837 A69-39028

Space transportation cost factors, discussing payload characteristics, carrier utilization, program duration, government participation and control, carrier design, hardware costs, launch costs, etc

21 p3857 A69-39687

Reusable Crew Module, Reusable Orbital System and Reusable All Systems options for low cost space transportation system

21 p3827 A69-39693

Vehicle designs and cost analyses for launch vehicle selection to minimize costs of 40,000- 150,000 pound payload placement into orbit

21 p3827 A69-39694

Aerial surveys flight functions cost plotted against degree of performance, allowing for obtainable accuracies

22 p3863 A69-40041

Computer memory reduction through Fortran higher level language, discussing tradeoff between costs saved and additional logic hardware

[AIAA PAPER 69-963] 22 p3905 A69-40344

Aerospace programs cost analysis system, using contractors accounting records as data source

[AAS PAPER 69-465] 24 p4416 A69-42801

Adaptive cost equations in computer programs supporting launch vehicle long range planning, based on launch vehicle development usage

[AAS PAPER 69-164] 24 p4392 A69-42815

Algorithm minimizing personnel number and training costs to meet uncertain skill requirements, applying to army aviation contingency force training composition

[AAS PAPER 69-116] 24 p4271 A69-42818

Military aircraft service life problems solved by alternative replacement policies comparative present value analysis

24 p4253 A69-43058

Cost analysis in low cost launch vehicle studies emphasizing sustaining engineering and plant economics

24 p4393 A69-43120

COST ESTIMATES

Microwave applications of monolithic and hybrid semiconductor circuit technologies, considering cost and performance

01 p0039 A69-10188

Cost prediction equations used in perturbed environment of learning curves subjected to design change in industry

01 p0180 A69-10652

Structural testing in aircraft design, discussing costs, environmental conditions, test rigs and apparatus

01 p0170 A69-10864

Phased array radar cost improvement based on solid state devices and microwave integrated circuits application

01 p0048 A69-11039

Electron tubes in phased array radar systems, discussing replacement limits by solid state devices, reliability and cost reduction

01 p0048 A69-11040

Transistors vs electron tubes as microwave power sources in UHF phased array radars, noting transistor cost competitive limit

01 p0048 A69-11041

Systematic approach to standard launch vehicle based on governmental expenditure minimization while attaining mission goals

01 p0162 A69-11096

Survival of PERT/Cost technique without government impetus noting advantages for planning, monitoring and controlling technical performance objectives

01 p0180 A69-11251

Performance cost functions for reaction jet controlled system during on-off limit cycle for stable and unstable plant

02 p0278 A69-11965

Cost factors in choosing single or twin-engine layout for tactical aircraft

02 p0193 A69-12066

Aluminum plastic sandwich products production costs compatibility with conventional materials

02 p0348 A69-12749

Systems analysis application to determination of C-5 effectiveness noting loading, productivity and effectiveness analysis computer programs

[SAE PAPER 680729] 03 p0379 A69-13440

Cost analysis techniques for aircraft design and development, considering passenger capacity, flight distances and flight frequencies for various aircraft types

03 p0366 A69-13646

Airline operators economic oriented airframe maintenance problems, discussing cost accounting improvement

03 p0434 A69-13698

Maintainability and reliability affect utilization and operating costs of commercial aircraft

04 p0547 A69-14806

Cost dependent utility characteristics in mathematical model for optimum research and development resource allocation, computing optimum fund distribution with Lagrange multipliers

04 p0689 A69-14807

European launch vehicle development program, discussing economic limitations and employment possibilities

04 p0665 A69-14808

Equipment for minimum cost laboratory for thin and thick film hybrid circuits

04 p0559 A69-15198

Estimate accuracy and project selection models in industrial research, examining company data for miscellaneous, technical and commercial failure

05 p0849 A69-15981

Project management decision making, noting decision nature, cost effectiveness concepts and incentives

[ASME PAPER 68-WA/MGT-2] 05 p0850 A69-16145

Cost and schedule planning and control /CSPC/ project progress reporting technique

05 p0850 A69-16300

Teichmann cost analysis extended to include frequency dependent and diversity dependent rain losses for satellite communication, using Bayes strategy

05 p0721 A69-16580

Space vehicle trajectory optimization using computerized step by step steepest descent to minimum cost, considering cost gradient vs control

06 p1006 A69-17570

Computing optimum flight profiles by Balakrishnan epsilon method, including equations of motion constraint in cost function to be minimized

[AIAA PAPER 69-75] 06 p0868 A69-18058

Rocket transportation for upper atmospheric measurements, discussing sensors and cost effectiveness

[AIAA PAPER 69-139] 06 p1018 A69-18066

Manned orbital space stations design, purposes and applications, balancing costs against benefits

06 p1019 A69-18237

Cost estimating relationships for vertiports and airports, comparing terminal costs per passenger for each facility

[AIAA PAPER 69-208] 07 p1245 A69-19564

Reliability effect on operating costs of satellite communications system ground stations, calculating annual cost of channel with continuous time carry-over

08 p1276 A69-20586

Defense project management and discrepancies between estimates and final costs

08 p1423 A69-20628

Cost control for project management based on detailed programming

08 p1423 A69-20629

Project control cycle, cost monitoring and reporting to management

08 p1423 A69-20630

Microelectronics technology and economics, discussing semiconductor integrated, discrete component and thin film hybrid circuits and MOSFET devices

[AGARDOGRAPH-114] 08 p1291 A69-20983

Assessing cost effectiveness of reliability and quality of semiconductor products, using mathematical models

08 p1292 A69-21102

Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture

[AIAA PAPER 69-305] 09 p1478 A69-22377

Effective cost improvement of product and profit planning activity in jet engines production stressing J47 and J79 engines

[ASME PAPER 69-GT-61] 09 p1513 A69-22516

Cost-profit sharing agreement with aerospace manufacturing companies involved in Boeing 747 construction, detailing final assembly building

09 p1514 A69-22713

Incentive contracts design covering cost estimates, technical performance, realistic programs and multiple incentive arrangements

09 p1626 A69-22776

Spacecraft propulsion systems comparison and evaluation, discussing quality, schedules and costs in relation to mission requirements

11 p1965 A69-25600

Methodology for technical feasibility and economic analysis of remote sensing applications

12 p2193 A69-27013

Instructional broadcast satellites programming for time cost reduction, discussing frequency allocation, interference and ground station design

13 p2381 A69-27373

ESRO 1 project management and organization, discussing cost control, time saving, program evaluation and review system /PERT/, etc

13 p2382 A69-27750

Aircraft design cost control emphasizing engineering performance direct inclusion in design costs including tooling, testing, etc

13 p2382 A69-28094

Systems design value analysis including alternate solutions to cost effectiveness for design development and production phases

13 p2383 A69-28097

Value engineering proposal costs sustained by maintenance and overhaul industry in government contract negotiations, discussing reimbursement and proposed central agency

13 p2383 A69-28099

Deterministic economic mathematical models for optimum airline networks, considering transportation cost

14 p2540 A69-29141

Cost estimates of R and D, considering planned profit and loss following products introduction to market

14 p2541 A69-29280

Capital budgeting for R and D, discussing control of rising costs

14 p2541 A69-29281

Space flight cost analysis, relative costs of various types of transportation and need for reusable single stage to orbit vehicles

15 p2719 A69-30186

Air cushion vehicles tests for public transportation facilities noting operation costs

15 p2550 A69-30409

Cost plus award fee contracting incentive system based on after fact evaluation of performance effectiveness

15 p2720 A69-30426

Mathematical model for money expenditure on product oriented research programs, based on accumulated profits

15 p2721 A69-31068

Program stretchout in aerospace procurement, discussing costs effect in relation to incentive contracts

15 p2721 A69-31071

Cost effectiveness of DOD/military systems, discussing principles and analytical model with case study

15 p2722 A69-31125

Integrated Logistics Support (ILS) cost effectiveness, discussing management of systems elements in addition to prime equipment including computer programs, training, maintenance, etc

15 p2722 A69-31126

Equipment life cycle costs computer simulation for design and changes evaluation, including maintenance analysis example

15 p2723 A69-31138

Economics of airport use, congestion and safety, discussing differentiated pricing systems

15 p2723 A69-31241

Cost effective pressure vessel design using fracture mechanics, discussing fabrication costs, service life requirements, etc

16 p2870 A69-31740

VFW H3 Sprinter autogyro maintenance, reliability and operating costs

16 p2735 A69-32056

Proposed projects selection for independent R and D development program in business entity, measuring merits in terms of future financial returns

17 p3077 A69-34129

Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system

18 p3231 A69-34311

Development, manufacturing and logistic costs of reliability improvement in electronic equipment design

18 p3231 A69-34485

Avionic subsystems warranty costs estimates, considering reliability prediction and hardware recycling

18 p3232 A69-34506

Cost risk management procedure in defense industry contracting, including risk percent limits and identification in proposals, specifications relief, escalation clauses, etc

18 p3233 A69-34655

Market analysis program to evaluate relationship between launch vehicle jettison weight and total cost based on all projected missions

[SAWE PAPER 776]

18 p3208 A69-34872

Airframe cost element prediction and application to cost control, considering government specifications

[SAWE PAPER 731]

18 p3221 A69-34894

Closed-loop system for test, failure analysis and corrective action in avionics reliability growth, showing cost effectiveness relationship to test program

19 p3282 A69-35784

Cost model to trade off competing systems designs for space communications, navigation, operational availability and ballistic missile defense

19 p3454 A69-36007

System engineering to select hydraulics subsystem for advanced fighter aircraft by cost effectiveness analysis, noting maintainability and reliability

19 p3254 A69-36012

Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint

19 p3437 A69-36033

Availability measure defined in terms of maintenance demand rate and mean downtime for cost prediction involving various parameters

19 p3327 A69-36036

Cost and maintenance calculations for inertial navigation system (INS) based on three systems per aircraft, assuming 4000 hr/year aircraft utilization

19 p3371 A69-36734

Cost comparison of single and twin engine layouts for tactical strike/close support aircraft

19 p3248 A69-36855

Stochastic model for estimating manufacturing costs, discussing Mellin and Laplace transforms and Gram-Charlier series approximations

20 p3633 A69-36924

Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs

[AIAA PAPER 69-843]

21 p3786 A69-39373

Reliability incentive programs, considering linear and nonlinear curves for mean time before failure /MTBF/ vs incentive dollars and negative MTBF vs penalty dollars

22 p3952 A69-40024

Human factors methods importance in nonmilitary flight simulation training, discussing cost factors and skills evaluation

22 p3894 A69-41138

Bayesian estimate of individual truck maintenance costs based on optimum replacement maintenance age

23 p4241 A69-41577

Numerical control as manufacturing tool, with application to aircraft engine precision components

24 p4318 A69-42710

Fiscal requirements forecasting for space systems involving data analysis

[AAS PAPER 69-166A]

24 p4417 A69-42814

Operational and economical aspects of V/STOL air transportation reevaluated for civil aviation promotion

[AAS PAPER 69-325]

24 p4418 A69-42870

COST REDUCTION

Broadband steerable arrays design, describing Wulvenberger array with doublet aeriels yielding good radiation patterns and low cost construction

08 p1288 A69-20963

Boron and graphite fibers role in composites cost feasibility in 1970s

09 p1524 A69-22067

Flexible printed circuits manufactured by offset rotogravure printing, noting production cost economies

09 p1511 A69-22357

Electronic systems partitioning in preparation for MOS large scale integration for system performance and cost improvement

09 p1466 A69-22451

Boeing 747 aircraft, discussing weight and cost reduction, flap design, structural philosophy, powerplants, fuel system, flying controls, power systems, etc

09 p1435 A69-22714

Maintenance van loading technique for number of spares and test equipment in Minuteman weapon system for uncommissioned launch facilities at minimum cost

10 p1669 A69-22980

Howell engine hot section analyzer (HSA) developed to improve maintenance, flight safety and costs of jet aircraft engines

10 p1671 A69-23263

Semiautomatic and automatic off-line module testing machines, comparing costs for different test populations

11 p1865 A69-25076

Venus and Mars atmospheric braking entry and associated equipment, discussing potential cost savings

11 p1968 A69-25722

Reliability improvement influence on life cycle costs of high volume piece of military/commercial equipment

12 p2101 A69-25848

Materials rating method in pressure vessel applications, considering impact on design of minimum cost space launch vehicle

12 p2175 A69-26844

Efficient allocation of maintenance resources in USAF, analyzing B-52 costs and substitution of capital for labor

13 p2382 A69-28041

Galaxy C-5A aircraft Value Control Program stressing design organization, upper management authority, budgetary adjustments, etc

13 p2383 A69-28095

Weight and cost control program for Boeing 747 aircraft through combined value and weight engineering methods

13 p2383 A69-28096

U.S. Navy Numerical Value Rating System computing method of selecting lowest cost design approach to accomplish specific function

13 p2383 A69-28098

Military aircraft operating in various environments with low support costs emphasizing improved design, development and manufacturing standards

14 p2392 A69-29503

Cost effectiveness of test selection when statistical distribution of load and strength are known, presenting curves for equally dispersed normal parameters distribution

15 p2720 A69-30401

Production line requirements for MOS and IC, considering high reliability at minimum cost for space applications

15 p2627 A69-30841

Design philosophy for cost reductions on future space transportation systems, exemplifying application to booster system for earth orbital logistics

[AIAA PAPER 69-439]

16 p2882 A69-32654

Cost reduction criteria for rocket propulsion systems and components, discussing literature searches, engineering criteria, total program cost vs mission accomplished, etc

[AIAA PAPER 69-440]

16 p2883 A69-32748

Cost optimization of mixture ratio control systems for liquid propellant launch vehicles, considering open and closed loop systems

[AIAA PAPER 69-441]

16 p2870 A69-32775

Fluidic thrust reversal control system for turbojet achieving cost and weight reduction, illustrating fluidic circuit and noting circuit reliability

17 p3018 A69-33329

Life cycle maintenance costs reduction in aerospace industry by computers, describing on-line and off-line test systems

17 p2979 A69-33649

Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program

17 p3043 A69-34044

Cost optimization in converting brush type to brushless aircraft AC power systems, using analog computer to determine modifications

17 p2905 A69-34109

Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds

18 p3193 A69-34362

Composite and structured material forms combination for obtaining high performance and low cost

18 p3161 A69-34608

Cost and weight optimization for solid rocket motors using various steel casings

[SAWE PAPER 777]

18 p3208 A69-34871

Economics evaluation for operation of commercial fixed wing aircraft at aft center of gravity position, noting fuel saving from drag reduction

[SAWE PAPER 806]

18 p3091 A69-34902

Aerospace technology application to commercial avionic system for cost effectiveness in functions expansion, phase-over, installation, maintenance and operation, discussing added information functions

18 p3108 A69-35069

Rocket launch system cost role in space operations, discussing low cost expendable drop tank and Triamese reusable launch vehicle/spacecraft concepts

18 p3210 A69-35087

Ablative materials for solid rocket nozzles, discussing static firing tests, rating system, equipment design and cost reduction

19 p3357 A69-35537

Minimum cost design (MCD) of space launch vehicle, discussing material and process selection based on fracture-safe conditions

19 p3433 A69-35587

C-141 engine health monitoring program, applying results to maintenance costs reduction

[AIAA PAPER 69-775]

19 p3244 A69-35646

Low noise microwave devices performance and price, discussing transistor and tunnel diode amplifiers, traveling wave tubes and price reductions via manufacturing methods

20 p3504 A69-36913

Book on systems cost effectiveness covering methodology, system cost models, economics, etc

20 p3640 A69-37533

Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc

20 p3618 A69-38117

Tactical Satellite Communications /Tacsat/ cost reduction, discussing jamming avoidance and mitiga-

tion, communications security, capacity increase and spectrum conservation

20 p3497 A69-38315

Carbon fiber reinforced plastics application to aircraft metal components for weight reduction, low cost and high mechanical properties

21 p3750 A69-38428

Reducing cost of space transportation - AAS Conference, Washington, D.C., March 1969

21 p3856 A69-39686

Launch vehicle cost reduction by minimizing software, fabricating in commercial shops and avoiding sophistication, parts and acts of man

21 p3857 A69-39688

Cost reduction steps in reusable launch vehicle design, discussing aircraft design and development experience application

21 p3826 A69-39689

Space transportation cost saving options including booster systems, spacecraft/payload systems and support systems, discussing recovery and launching operations

21 p3857 A69-39690

Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology

21 p3827 A69-39691

Launch systems evolution, cost reduction breakthrough approach and application to future space transportation

21 p3857 A69-39692

Dual role core /Ducor/ memory system with unique core stack assembly feature to achieve cost reduction and structural integrity for severe environmental conditions

22 p3903 A69-39950

Support software costs reduction for launch vehicle systems by implementing computer techniques to provide requisite data

[AIAA PAPER 69-978] 22 p4052 A69-40358

Design and economic concepts of Lockheed L-1011 wide body trijets, discussing airport and airways congestion alleviation, passenger appeal, etc

[RAES PAPER 15] 22 p3863 A69-40494

General aviation airport application as freight consolidation terminals to reduce ground handling costs, circumvent air and ground traffic problems, etc

24 p4419 A69-43047

Cost analysis in low cost launch vehicle studies emphasizing sustaining engineering and plant economics

24 p4393 A69-43120

Aerospace fastening system requirements to lower in-place costs, extend service life and reduce weight of aircraft

24 p4325 A69-43440

COSTS

NT FREIGHT COSTS

Phase ionosonde cost, possibilities and errors

01 p0071 A69-11163

Permissible expenditures for decreasing aircraft structural weight

11 p2005 A69-25349

Relay reliability cost vs failure cost in spacecraft applications

13 p2231 A69-28044

Weighting factors relation in optimal systems integral squared error /ISE/ cost functional, characteristic coefficients and time response performance measures

14 p2534 A69-29317

Explosive welding principles, applications, materials limitations and advantages, stressing safeness and low cost

18 p3151 A69-35479

Satellite and terrestrial point-to-point communication circuit costs, considering multiple access and small antenna earth stations

19 p3456 A69-36822

COUETTE FLOW

Couette flow stability in axial magnetic field, considering time bounded perturbation energy during increasing angular velocity in radial direction

01 p0059 A69-10233

Plane Couette flow stability in heated nonlinear viscous fluid flowing between horizontal plates heated to different temperatures

02 p0235 A69-12828

Heat transfer in crossed field MHD Couette flow for incompressible fluid, assuming linear wall temperature in flow direction

03 p0476 A69-13306

Stationary, moving and pulsating electrohydrodynamic flow between parallel dielectric plates and Couette flow, noting reaction concentration near wall

03 p0419 A69-13919

Heat transfer, suction and injection in plane Couette flow analyzed for Rivlin-Ericksen fluid, using perturbation method

04 p0589 A69-14970

Secular equation for Couette flow stability in incompressible viscoelastic fluid

06 p0909 A69-17240

Monte Carlo solution of linearized Boltzmann equation in rarefied gas dynamics, noting Knudsen layer and Couette flow applications

06 p0910 A69-17345

Suction effect on temperature distribution and heat transfer in plane Couette flow and laminar flow in circular pipe

08 p1303 A69-20371

Bounds on mass and momentum transport by turbulent flow between parallel plates derived for Couette and Poiseuille flows

08 p1305 A69-20840

Transient heat transfer in formation of steady crossed fields MHD plane Couette flow for walls, giving momentum, induction and energy equations

13 p2375 A69-27791

Kolmogorov-Prandtl turbulence energy hypothesis extended from turbulent region of one dimensional flow to laminar sublayer, obtaining numerical solutions for Couette flow

13 p2250 A69-28339

Two dimensional Couette flow analysis showing stability at Reynolds number tending to infinity

14 p2428 A69-28802

Flush electrostatic probe edge effect, considering Couette flow of weakly ionized compressible gas past discontinuous wall potential

15 p2653 A69-30912

Heat transfer in rarefied gas plane Couette flow determined by BGK model and moments method of half range distribution functions

16 p2876 A69-31688

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers

16 p2821 A69-31953

Equilibrium Couette flow of ionized multicomponent ideal gas between moving catalytic plates, obtaining thermal flow formulas and thermal conductivity coefficient

19 p3240 A69-36403

Channel flows energy stability, discussing Couette and plane Poiseuille flows, velocity profiles, vorticity maxima, etc

21 p3697 A69-39675

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc

22 p3931 A69-40778

Mass injection by strong blowing across Couette-Poiseuille shear flow

24 p4301 A69-43354

COULOMB COLLISIONS

Ionized plasma radiation near plasma frequency, deriving formula for bremsstrahlung coefficient from Born approximation

02 p0286 A69-11589

Second virial coefficient of plasma at arbitrary temperature, noting small Coulomb interaction

02 p0292 A69-12639

Coulomb collision and microturbulence effect on plasma wave echo, noting echo dependence on perturbations in particle distribution

03 p0474 A69-13144

Cross sections computed for excitation and ionization of atoms and ions by electrons, using peaking approximation to evaluate Coulomb-Born matrix approximation

08 p1355 A69-20206

Loss rate of plasma from stellarator due to binary Coulomb collisions scattering particles in loss region, discussing diffusion coefficients

08 p1364 A69-20520

Thermodynamic potential of rarefied plasma from Coulomb interactions of atoms with electrons and ions

10 p1728 A69-23134

Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt

10 p1723 A69-23164

Direct Coulomb interaction matrix elements between hydrogen atoms in ground states calculated, presenting interaction potential

11 p1921 A69-24416

Ionic diffusion in topside ionosphere analyzed using multipole gas mixture diffusion formula, noting Coulomb ionic collision role

14 p2441 A69-29381

Neutrino-pair bremsstrahlung for hot degenerate electron gas during Coulomb scattering on imbedded nuclei in stellar regimes including lattice structure effects

18 p3176 A69-35004

Lower ionospheric effective electron collision number from cosmic noise recordings and radio wave absorption data obtained by vertical sounding rocket

20 p3528 A69-37679

Effective Gaunt factors for threshold excitation of positive ions by electron collisions for 23 dipole transitions in 15 isoelectronic sequences

20 p3581 A69-38175

COULOMB POTENTIAL

Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements

01 p0124 A69-10901

Holtzmark plasma microfield, discussing neglect of term comparable to dipole moment during Fourier transform development for long range Coulomb field

02 p0287 A69-11871

Perturbation methods for exchange and Coulomb energy of hydrogen molecule, calculating Hamiltonian by wave function

07 p1186 A69-19446

Separable expansion for off shell two body t matrix with Coulomb potential to solve nonrelativistic three body problem with two body interactions

08 p1354 A69-20205

Cut-off Coulomb potential transport cross sections compared with exponentially screened potential for various cut-off radii

11 p1924 A69-24309

Two center Coulomb integrals expressed in terms of center separation, noting applications to molecular calculations

14 p2471 A69-29926

Integral formulation of scattering theory extended to Coulomb interactions by expanding Green function and treating kernel singularities

14 p2489 A69-29995

Finite scattering cross section in current carriers scattering on impurities in compensated semiconductors, assuming unscreened Coulomb potentials

15 p2666 A69-30063

External magnetic force and internal Coulomb force influence on carriers in conduction or valence band of semiconductor, considering H atom spectra

16 p2826 A69-31824

Coulomb interference corrections in pion-He scattering, discussing three specific formalisms

18 p3176 A69-35008

COULOMETRY

Analytical determination of traces of metals caused by wear in aircraft liquid fuels, hydraulic fluids and lubricants, noting polarography and coulometry

03 p0435 A69-14101

COUNTDOWN

ESRO 2/IRIS satellite launching checkout, countdown and breakdown of operations

01 p0163 A69-11104

Probability of completing countdown in single malfunction encounters, considering development of industry and government guidelines

10 p1792 A69-22979

Successful launch probability analyzed as function of launch strategy from past countdown hold data

19 p3430 A69-36034

Space vehicle data system synthesizer /SVDSS/ for dynamic calibration of automatic control and checkout systems during prelaunch and countdown operations

21 p3680 A69-39633

COUNTERFLOW

Interaction between supersonic jet and counterflow of ideal compressible fluid

05 p0751 A69-16501

COUNTERMEASURES

U CHAFF

U ELECTRONIC COUNTERMEASURES

U JAMMING

COUNTERS

NT CERENKOV COUNTERS

NT ELECTRON COUNTERS

NT GEIGER COUNTERS

NT NEUTRON COUNTERS

NT PARTICLE TELESCOPES

NT PROPORTIONAL COUNTERS
 NT QUANTUM COUNTERS
 NT RADIATION COUNTERS
 NT SCINTILLATION COUNTERS
 NT SPARK CHAMBERS

Large area X ray collector, matrix detector for ionizing radiation and inflatable gas counter, considering application to X ray optics and astronomy
 05 p0794 A69-16587

Counter/discounter assembly with slow resolution time for random fine pulses, using grouped tunnel diodes
 05 p0735 A69-16702

Phase measurement using phase lock loop, voltage controlled oscillator and synchronous counter
 05 p0722 A69-16766

Count rate meter for statistical frequency of signals applied to input of trigger with Poisson distribution of pulse intervals
 11 p1884 A69-24734

Semiconductor materials and fabrication methods for surface barrier junction n-type and p-type silicon counters used in hydrogen ion flux recording
 14 p2452 A69-29810

Counter for decimal counting and numeric display applications using integrated fluid logic elements
 15 p2616 A69-31295

COUNTING

Number count formula in zero pressure model universe for extragalactic radio sources with arbitrary luminosity and evolution functions, discussing red shifts
 08 p1390 A69-20388

COUNTING CIRCUITS

Diode pump type circuit without diodes in signal path providing accurate transfer function analysis considered for spacecraft use
 [IEEE PAPER 3A-3] 07 p1134 A69-19191

Transient processes in counting circuits with tunnel diode chains, discussing operating point position for various conditions
 14 p2419 A69-28921

PCM bit synchronizer signal to noise ratio measurement by input video signal zero crossings counting
 19 p3271 A69-36248

COUPLED MODES

Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields
 01 p0062 A69-11208

Stroboscopic holography for repetitive scenes, using mode locked laser as source
 02 p0250 A69-12411

Nonlinear mode interactions in spatially inhomogeneous laser, analyzing suppression, phase locking and linear coupling among cavity modes
 02 p0258 A69-12632

Two photon fluorescence technique for display of picosecond laser pulses, discussing mode locking and ruby laser contrast ratios
 02 p0259 A69-12654

Mode locking and ultrashort pulses in giant pulses in giant pulse ruby laser with heated nitrobenzene or alpha-chloronaphthalene in resonator
 02 p0259 A69-12655

Dynamic mode locking of CW He-Ne laser by external regenerative feedback using RF beats between axial modes
 02 p0260 A69-12657

Simultaneous phase locking of longitudinal and transverse laser modes in He-Ne laser
 03 p0441 A69-14188

Hybrid Gunn domain and LSA mode operation in oversized bulk and epitaxially grown GaAs, noting large signal impedance data
 04 p0639 A69-14339

Bending-torsion mode of rotating tapered twisted turbomachine blade, analyzing coupled flexural and torsional vibrations effect on natural frequency
 [ASME PAPER 68-WA/GT-6] 05 p0838 A69-16141

Spacecraft control system and flexible structures interactions, discussing transient phenomena, limit-cycle oscillations and instabilities
 [AIAA PAPER 69-116] 06 p1019 A69-18187

Unified theory of normal mode analysis of RLC networks based on Tellegen theorem of Kirchhoff law, discussing coupled networks
 07 p1115 A69-18858

Single mode output power from 6328 Å He-Ne laser through mode coupling induced by added absorption cell containing excited Ne
 07 p1149 A69-18901

Lamb theory of mode self locking in gas lasers approximated to provide criteria for self locking
 07 p1156 A69-19413

Gas laser modes strong coupling and single mode induced by saturable absorbing medium within cavity resonator
 08 p1324 A69-20166

Gas laser frequency stabilization by coupled oppositely circularly polarized components of single cavity mode in axial magnetic field
 08 p1327 A69-21090

Frequency fluctuations in mode coupled gas laser used to determine natural emission line width
 09 p1516 A69-21670

Mode locked He-Ne laser pulses compression by multiple reflections from interferometer after application of linear electro-optic frequency sweep
 09 p1516 A69-21745

Coupling electromagnetic power to beam plasma amplifiers without use of helices and cavities, discussing modes of interaction, gap coupling and Cerenkov coupling
 09 p1463 A69-21805

Microwave resonator characteristics, deriving expressions for Q for pure or coupled electric or magnetic modes
 09 p1464 A69-22096

Mode locked laser operation, noting output and applications to optical communication, high speed photography, nonlinear optics and frequency standards
 09 p1518 A69-22123

Cut-off coupled microwave bandpass filters for use in dielectric filled waveguide systems
 09 p1466 A69-22447

Quasi-periodic coupling for broadband mode coupling application, describing normalized transferred power fluctuation along entire coupling region at various frequencies
 09 p1467 A69-22586

Longitudinal and transverse wave propagation in compressible isotropic turbulent plasma, noting mode coupling effect
 [AFRL-69-0289] 10 p1729 A69-23424

Dynamics of external loss modulation and Q switching methods of generating ultrashort pulses in mode locked laser
 10 p1703 A69-23624

Capture of parametrically coupled waves by pulses and beams of pumping radiation in case of different group velocities directions
 10 p1705 A69-23956

Radiating collinear open ended waveguides and near field coupling analyzed using simultaneous integral equations and Fourier series expansion of aperture field
 11 p1850 A69-24984

Coherence phenomena for gas laser transitions coupled by common level, noting coherent superposition
 11 p1898 A69-25045

Landau dispersion relation solutions, noting higher order Landau poles and coupling of spatial Landau modes and least damped wave
 11 p1929 A69-25265

Modal coupling in thermally stressed plates, obtaining solution for frequencies and stiffness
 11 p1990 A69-25509

Two transverse modes locking with multiple longitudinal modes in He-Ne laser, noting separate locking and alternate quenching
 12 p2104 A69-25923

Short circuit and variable frequency technique for measurement of coupling efficiency between dielectric loaded rectangular and trough waveguides, noting propagation modes
 12 p2039 A69-26374

Alternating electric field parametric effects on inhomogeneous plasma in magnetic field, obtaining electrostatic wave coupling dispersion relation by density gradients considerations
 13 p2304 A69-27298

Variational method used to determine accuracy of approximation technique for dielectric slab on sidewall of rectangular waveguide
 13 p2233 A69-28072

Instantaneous rotational impulse imparting steady motion of disk determined for coupled gyroscope
 13 p2264 A69-28527

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators
 14 p2421 A69-29542

Coupled mode theory for surface wave propagation along tapered cylindrical dielectric rod, considering radiation field effects
 14 p2422 A69-29557

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for bulk and wall temperatures, transfer coefficients and rates, etc
 15 p2716 A69-30004

Power coupling among modes in semiconductor lasers in presence of spontaneous or forced microwave modulation of population inversion
 15 p2634 A69-30875

Mode-mode coupling calculation for finite amplitude collisional drift waves demonstrating inherently nonlinear phenomena
 15 p2660 A69-30916

Steady state solutions for parametric excitations in various limits in plasmas, allowing for higher order mode coupling
 15 p2661 A69-30919

Normal modes of electrons-electromagnetic field coupled system for many valley semiconductors, calculating dielectric constant for electron gas for ellipsoidal energy surfaces
 16 p2826 A69-31821

Waveguide bends fields expressed in coupled local annular modes derived by evaluating differential scattering coefficients
 16 p2760 A69-31943

Thin film optical method generalization accounting for intermode coupling and oblique incidence in plane stratified magnetoionic medium applied to ionospheric LF and hydromagnetic propagation
 16 p2753 A69-32393

Raman scattering by coupled plasmon-cyclotron-harmonic modes in semiconducting plasmas in homogeneous static magnetic field
 16 p2824 A69-32604

Linear array composed of dual mode elements radiating into parallel plate region, obtaining scan angle compensation of element impedance
 17 p2929 A69-33875

Mode coupling effects in CW gas ring lasers, considering excitation density pulsations, traveling waves dispersion, polarization, etc
 19 p3334 A69-36046

Mathematical model of CW ring laser mode coupling in limits of low excitation
 19 p3334 A69-36047

Coupled dilatational and equivoluminal modes of free vibration for elastic prisms and polygonal plates, using Poisson ratio and wave path construction
 19 p3444 A69-36801

Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, obtaining equations for coupling modes between Alfvén and magnetosonic waves
 21 p3776 A69-38710

Hydrogen-hydrogen excitation collisions by impact parameter treatment, investigating rotation coupling influence in four state cross sections approximation
 22 p3987 A69-41007

Scanning Fabry-Perot interferometer interaction with laser source, calculating laser intensity and oscillation frequency changes for weak mode coupling
 24 p4329 A69-43756

COUPLERS

NT ANTENNA COUPLERS
 NT COUPLING CIRCUITS

Directional coupler for TEM waves composed of two waveguides and having locally dependent coupling function
 11 p1855 A69-25629

Mismatch correction in microwave power measurements based on directional coupler techniques
 12 p2038 A69-26055

Stripline microwave integrated circuits in terms of building blocks and components, discussing hybrids, backward wave coupler, balanced modulators and mixers, etc
 15 p2579 A69-31075

Equal ripple nonuniform tapered line coupler design and computed performance by evaluating cascade matrix as function of frequency
 16 p2760 A69-31944

Broadband continuously variable phase shifter with microstrip construction, describing phase rotation via stripline connected directional couplers
 16 p2763 A69-32582

COUPLES

Uniqueness formulation of concentrated load problem in linear theory of couple-stress elasticity
 02 p0338 A69-11720

COUPLING

NT COUPLES
 NT CROSS COUPLING
 NT GYROSCOPIC COUPLING
 NT MICROWAVE COUPLING
 NT OPTICAL COUPLING

NT SPIN-SPIN COUPLING
NT THERMODYNAMIC COUPLING

Exact solution for coupling effects between two waves with complex coupling function, defining region of validity for earlier perturbation theory
 01 p0027 A69-10252

Oppositely moving waves interaction during nonlinear transient process of oscillations buildup in annular solid state laser found dependent on coupling via scattering
 02 p0259 A69-12648

Multiframe platform stabilization, analyzing dynamic coupling due to possible avoidance of adjusting moment and effect of coupling on attitude control
 04 p0629 A69-14830

Composite equivalent circuits method for complex waveguide-resonator couplings based on variational principle for admittance matrices of electromagnetic volume couplings
 05 p0736 A69-16785

Vertistat H gravity gradient configuration prevents elastic deformation, permitting high pointing accuracy at synchronous altitudes
 07 p1229 A69-18351

Plasma wave coupling in absence of magnetic field in revolving system containing dielectrics and circular waveguide
 08 p1371 A69-21150

Coupling constants of fast space charge waves in three frequency parametric TWT amplifier and of stress waves in slow wave structure, using graphical methods
 11 p1844 A69-24446

Subregions method in coupled thermoelasticity, discussing numerical values for thin steel circular disk
 11 p1970 A69-24606

Fundamental concepts of nonholonomic coupling and coordinates in nonholonomic mechanics
 12 p2129 A69-25990

Pulses and sine waves coupling between parallel transmission lines obtained using Oliver elementary coupling theory
 19 p3266 A69-35768

Tunnel diode coupling with spheroidal resonant cavity, describing method of measuring elements for interpretation
 19 p3283 A69-35998

Junction lasers current-voltage characteristics, discussing coherence-pinch effect as explanation of threshold behavior
 19 p3337 A69-36531

Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations [ONERA-TP-738]
 19 p3299 A69-36649

Negative energy waves presence, showing qualitative difference on theoretically derived parametric amplification in plasmas
 20 p3582 A69-38244

Aerodynamic pitch-roll coupling in spinning vehicles, showing unsteady components complicating data reduction
 21 p3647 A69-39038

Approximate expression derived for loose coupling in turbulence theory, suggesting possible explanation for inadmissibility of Kraichnan conclusion
 21 p3696 A69-39086

Rigid and flexible coupling devices for spacecraft rendezvous, describing general operating conditions
 22 p4036 A69-40008

Capacitive coupling vs DC coupling between data input and transmitter exciter in FM telemetry system, based on pulse series Fourier analysis
 23 p4119 A69-41744

Rectangular waveguides coupled by oblique subresonant slots in common face, discussing slot orientation and geometry roles
 23 p4123 A69-41941

COUPLING CIRCUITS

Direct couplings of autonomous noisy quadrupoles used for noise matching
 01 p0043 A69-10591

Circuits with magnetic coupling, describing digital computer algorithms for assembly of loop current equations
 01 p0036 A69-10745

Low noise high power transistor oscillator using directional coupler, noting isolated port for injection phase locking
 02 p0220 A69-12452

Equivalent circuit for parallel conductor array based on array capacitance matrix
 04 p0576 A69-14756

Transistor scattering matrix parameters determination, emphasizing directional coupler errors and impedance mismatches
 04 p0582 A69-15067

Small signal coupled mode analysis including relativistic effects for studying spiraling electron beam interaction with fast wave circuits
 07 p1114 A69-18436

Frequency modulated signal envelope passage through bandpass filter of inductively coupled circuits described by differential equation
 07 p1100 A69-18555

Series operation of Gunn devices with differing threshold currents at SHF
 09 p1463 A69-21684

Quasi-periodic coupling for broadband mode coupling application, describing normalized transferred power fluctuation along entire coupling region at various frequencies
 09 p1467 A69-22586

Multiaperture waveguide directional couplers analyzed by four port equivalent circuits, discussing synthesis method for optimizing coupling directivity
 13 p2228 A69-27669

Dispersion and coupling impedance of logarithmic spiral resting on anisotropic magnetodielectric layer for microwave devices design
 13 p2235 A69-28512

Hybrid coupled low power digital microwave phase shifters design, discussing lumped element L-C and variable C shifter theories, power limitations and construction techniques
 15 p2580 A69-31076

Radar control system based on load waveform monitoring by coupled control and modulating circuits
 16 p2753 A69-32439

Lumped element circuit producing directional coupling by electric and magnetic coupling of reactance quadrupoles, discussing insufficient coverage of calculated frequency range
 16 p2763 A69-32581

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error
 19 p3282 A69-35826

CRT display system coupling interface with magnetic storage determined from algorithms and time diagrams, describing character storage and system logic design
 22 p3908 A69-40936

Dispersion and coupling impedance calculation for symmetrical or helical slow wave structures employed in traveling and backward wave tubes
 22 p3916 A69-40958

STAR /Stud and Rocker Panel/ four couple section improved by incorporating bonded tungsten electrical contacts for PbTe thermoelectric elements
 23 p4188 A69-42261

COUPLING COEFFICIENTS

Vortices coupling between superposed superconducting tin films as function of perpendicular magnetic field, primary current and temperature
 01 p0135 A69-10014

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
 02 p0306 A69-11659

Magnetoelastic coupling constant b measured by propagating microwave signals in pure and substituted YIG
 02 p0299 A69-12243

Eigenvectors utilized in flutter computation for couplings [ONERA-TP-650]
 03 p0522 A69-12878

Coupling coefficients between primary and secondary ionizing cosmic ray variations, using stratospheric observations in Siberia during IQSY
 03 p0504 A69-14224

Mutual coupling and element efficiency for infinite linear arrays of dipoles
 04 p0571 A69-14317

Reflection coefficients of edge and center elements of large periodic two dimensional antenna array, noting TEM mode parallel plate horn arrays
 04 p0572 A69-14322

Quasi-periodic coupling for broadband mode coupling application, describing normalized transferred power fluctuation along entire coupling region at various frequencies
 09 p1467 A69-22586

Low momentum muon directional coupling coefficients based on latitude survey of directional meson intensity
 09 p1583 A69-22759

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes
 10 p1770 A69-23925

Coupling coefficient and impedance for excitation of isotropic plasma column by ring of magnetic current outside plasma, noting surface wave resonance effect
 10 p1659 A69-24064

Coupling coefficients for common-base/common-base circuits of bandpass filters in two circuit selective transistor amplifier
 13 p2226 A69-27219

Numerical integration for coupling between two modes of propagation /electron and proton whistlers/
 13 p2254 A69-27981

Coupling coefficients of global and vertical fluxes of charged cosmic ray component in stratosphere measured by radiosondes
 13 p2334 A69-28690

Aerodynamic control surface/trim tab coupling coefficients in subsonic two dimensional unsteady flow using matrix method valid for motion involving harmonic oscillations
 17 p2895 A69-33597

Micropolar liquid basic flows, considering case with coupling constant relating microstructure to macroscopic flow greater than viscosity coefficient
 18 p3121 A69-34786

Dimensionless coupling constants predicted from causal relationship among strong, electromagnetic, weak and gravitational interactions in fluid region of universe
 22 p3981 A69-40416

Coupling coefficients and excitation increments determined for nonlinear interactions of surface waves in nonisothermal semibounded plasma
 22 p3990 A69-40790

COUPLINGS

Couple stresses effect on thin plate stress distribution due to pressure of rivet on one side of circular hole
 08 p1319 A69-20201

Jet fluidic differential amplifier transfer function determination, describing interconnection dynamics
 11 p1824 A69-24350

Transverse impact along flexible couplings, deriving motion equations in presence of elastoplastic deformation
 12 p2178 A69-26034

Equations of motion computerized simulation for attitude stabilization of orbiting telescope coupled to crew compartment
 13 p2261 A69-27952

Nonholonomic coupling effect on mechanical system stabilization characteristics in terms of generalized coordinates
 14 p2482 A69-28814

Gravity gradient stabilized satellite achieving best theoretical performance through Foucault current and magnetic hysteresis articulations
 17 p3048 A69-33234

COVALENT BONDS

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors
 02 p0297 A69-11881

Covalence degree of activator-ligand chemical bonds effect on spectroscopic properties of transition metals
 11 p1907 A69-25031

Dislocation mobility temperature dependence in n-type indium antimonide, noting role of covalent interatomic bonds
 12 p2143 A69-26453

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors
 18 p3182 A69-35041

COVARIANCE

Covariant statistical mechanics for equilibrium thermodynamics
 03 p0533 A69-13758

Tensor partial differential equations having spherical symmetry, examining covariant differentiation and contraction of tensors
 07 p1123 A69-18807

Computerized objective analysis of meteorological variables based on weight determination involving autocorrelations
 08 p1345 A69-20309

Error bounds for estimation error covariance matrix of fixed point smoothing and fixed interval smoothing algorithms for optimum linear estimation
 09 p1533 A69-22436

Nonsingular matrices inversion method by group partitioning applied to noise covariance matrix used in optimal prediction and control

12 p2123 A69-26754

Error bounds for covariance matrix used in optimum filtering and smoothing algorithms for control and communications systems operation

14 p2416 A69-29549

Bilinear covariant of linear differential form involving 2n independent variables used for grouping to achieve symplectic and contact transformations

16 p2804 A69-31623

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error incremental covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc

17 p2944 A69-33742

Relation between smoothed and filtered linear least squares estimates of signal process in white noise from deriving resolvent identity of covariance function

21 p3754 A69-38432

COVERINGS

Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage

19 p3253 A69-35702

Large area Si solar cell arrays design, considering environment, cell layout, thermal expansion, coverslides fabrication, costs, etc

19 p3253 A69-35708

Solar cell degradation experiments on LES 4 and 5 satellites, discussing decay values and times for Si and CdTe cells with different cover thicknesses

19 p3254 A69-35713

COWELL METHOD

U NUMERICAL INTEGRATION

CRAB NEBULA

Pulsating radio sources near Crab Nebula noting possible coincidence with nebula, pulse dispersion and interstellar electron density

04 p0659 A69-14977

Crab Nebula and Cygnus XR-1 X ray spectra shown to have differential number power law spectra and same intensity

05 p0813 A69-15846

Book on supernovae covering galactic supernovae, type II supernovae remnants, Crab Nebula, primary cosmic radiation, etc

07 p1210 A69-18379

Crab Nebula pulsar NPO527 position measurement with split beam antenna, noting proximity and similar dispersion with NPO532

07 p1221 A69-19405

Balloon observations of cosmic X ray sources in Cygnus and Crab Nebula, discussing data application to energy spectra analysis

07 p1210 A69-19716

Strong light flashes detected from fast pulsar NP 0532 in Crab Nebula, discussing time-averaged optical flux

08 p1394 A69-20622

Strong light flashes from pulsar NP 0532 in Crab Nebula, noting UVB photometric analysis of nebular brightness

08 p1394 A69-20623

Pulsar NP 0532 identified with Baade south preceding star in Crab Nebula, noting pulsed optical radiation

09 p1592 A69-21458

Crab Nebula pulsar properties including pulse shape, dispersion and strong pulse emission

09 p1592 A69-21462

Condensed supernova remnants in Crab Nebula, considering various hypotheses for radio source

09 p1592 A69-21485

Modulation collimators determining angular sizes and celestial positions of X ray sources Sco X-1 and Taurus XR-1

10 p1678 A69-23326

Crab Nebula radio emission spectrum in decimeter wavelength range indicating emission spectral index decrease from Taurus A

10 p1784 A69-23941

Optical flashes recorded from Crab Nebula M1 close to central double star with periodicity equal to radio pulses discovered earlier

11 p1962 A69-25250

Crab Nebula pulsar detection by TV camera with image intensifier at focus of astronomical telescope, detailing instrumentation and observations

11 p1962 A69-25251

Pulsed radio source near Crab Nebula studied to estimate age of longer period pulsars and frequency of pulsar-producing events in galactic history

11 p1963 A69-25252

Crab Nebula X ray pulse detection attempt during balloon flight of telescope

12 p2149 A69-26226

Crab Nebula pulsar observations confirming wavelength independence of light velocity in space

12 p2157 A69-26233

Light curve shape as function of color, changing period and polarization angle of Crab Nebula optical pulsar

12 p2172 A69-27170

Crab Nebula pulsar NP 0532 photoelectric spectrophotometry results, noting main pulse and interpulse spectral energy distributions similarity to extended synchrotron radiation

13 p2335 A69-27317

Cosmic X ray background measurements and Crab Nebula observation during sounding rocket flight

13 p2326 A69-27570

Activity center in Crab Nebula, noting symmetrical configuration

13 p2343 A69-27621

X ray pulsations in Crab Nebula at frequency closely matching radio and optical pulsations, noting energy distribution

13 p2354 A69-28465

Vela pulsar PSR 0833-45 optical observations and Crab pulsar NP 0532 linear and circular polarization measurements by telescope-photomultiplier

13 p2354 A69-28470

Crab Nebula pulsar NP 0532 simultaneous optical and radio observations, noting influence of interstellar dispersion value uncertainty

15 p2680 A69-30233

Crab Nebula lunar occultation observed by Cassegrain array of deep space communication facility, finding radio brightness distribution similar to optical

15 p2687 A69-30539

Activity in Crab Nebula from 200-inch continuum and polarization plates, discussing nature and motion of wisps

15 p2691 A69-30758

X ray energy spectrum from Crab Nebula and diffuse background on celestial sphere near galactic anticenter, noting spectral index

15 p2675 A69-30759

Pulsar NP 0532 in Crab Nebula observed by rocket and telescope showing strong pulsed X ray signal

15 p2679 A69-31529

Nanosecond optical pulses from Crab pulsar NP 0532 detection indicating negative observations

16 p2865 A69-32801

Pulsar emission and magnetic field in Crab Nebula, discussing magnetic flux amplification, gravitational to magnetic energy conversion and pulsars as pulsed signals

17 p3026 A69-32859

Pulsed hard X radiation from NP 0532, discussing slow down rate and luminous intensity

18 p3186 A69-34316

NP 0532 slow down rate, using quadratic least squares method

18 p3191 A69-34317

IR and optical measurement of Crab pulsar NP 0532, analyzing energy density per pulse and smoothness of visual data

18 p3191 A69-34318

Faraday rotation in NP 0527 and CP 0328, measuring angular velocity and mean longitudinal magnetic fields

18 p3192 A69-34319

Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorelaxation effect and pitch angle anisotropy removal

19 p3424 A69-36336

Crab Nebula radio brightness at 2.16 and 8.2 mm measured and compared to Jupiter flux density

19 p3428 A69-36875

Gamma ray flux from processes associated with high energy electrons from pulsar NP 0532, noting light polarization

20 p3588 A69-37410

Radiation emission mechanism for NP 0532 associated with Crab Nebula, discussing shock-neutral sheet interaction

20 p3604 A69-37572

Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket

20 p3590 A69-37574

Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center

20 p3607 A69-38040

Crab Nebula pulsar NP 0532 linear and circular optical polarization measurements

21 p3798 A69-38542

Galactic field augmentation by dynamo action from highly condensed objects, considering Crab Nebula field production by central body

22 p4035 A69-41207

Pulsars dispersion measure and distance relationship, particularly for Crab Nebula pulsars

23 p4220 A69-42381

Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc

24 p4375 A69-42556

Continuous electron acceleration in astrophysics, discussing Crab Nebula X ray flux and galactic and extragalactic radio source power law spectra

24 p4355 A69-42696

CRABS

Fiddler crab absorption of DDT residues from organic detritus in estuaries, discussing DDT residue entrance into diverse food chains

14 p2406 A69-28872

CRACK INITIATION

Crack initiation and propagation in Ti alloys during thermal cyclic heating, noting influence of gas saturation

01 p0094 A69-10215

Mixed boundary value problem of elastostatics for isotropic elastic cylinder containing strip crack opened by internal pressure, using auxiliary functions

01 p0167 A69-10317

Strain distribution for fracture initiation and steady state crack propagation in plane strain tension of plastic materials

01 p0169 A69-10764

Welding procedure for avoiding hydrogen cracking in high strength steels, stressing hydrogen escape from weld deposits

01 p0088 A69-11398

Kinetic theory of fracture initiation, discussing changes in relative orientation distribution of network chains

02 p0345 A69-12401

Ferroelectric domain structure to explain microcracks nucleated at twinband intersections in mechanically deformed lithium niobate

03 p0486 A69-13618

Plane strain yielding, stresses and fracture about notches and cracks in terms of flow and fracture stresses and crack tip radii

03 p0528 A69-13876

Crack propagation near arbitrary curvilinear hole, discussing hole exterior mapping and critical loads for crack initiation

04 p0674 A69-14562

Heat treatment effects on stress corrosion cracking resistance of Al-Zn-Mg alloys, using cantilever loading in aqueous solution

04 p0617 A69-14933

Crack nucleation in high strain fatigue based on plastic instability model

05 p0780 A69-16430

Spot weld strength of tungsten inert gas spot welding on Al-Mg-Si sheets greater than resistance welding, noting crack formation during inert gas welding

05 p0769 A69-16538

Crack formation and propagation in metallic materials under dynamic fatigue loading, noting dislocation during work hardening

05 p0781 A69-16542

Stress corrosion crack initiation in aluminum alloy observed by optical microscopy

06 p0944 A69-17855

Ultrahigh strength steel susceptibility to brittle fracture, describing methods of testing rupture toughness and stress intensity factor

07 p1158 A69-18402

Solder joint cracking in discrete component assemblies, discussing cracking mechanism and crack elimination methods

07 p1140 A69-19102

Surface environment effects on mode of microcrack formation during fatigue of Al single crystals, noting surface void formation mechanism

07 p1235 A69-19387

Brittle fracture criterion for small steel specimens based on interaction between stress concentration of initial crack and nearby slip band

07 p1238 A69-19694

Stress distribution around equal size holes at ends of crack for normal uniaxial tension, based on photoelastic and brittle lacquer technique
08 p1412 A69-20257

Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge
09 p1503 A69-21392

Wrought superalloys fusion welding behavior, discussing hot cracking, hot microfissuring and strain age cracking
[SAE PAPER 690102]
09 p1503 A69-21558

Mechanical properties of welds of niobium and Ni based heat resistant alloys and susceptibility to crack formation at high temperatures
09 p1504 A69-22146

Model explaining intergranular crack initiation parallel to pulling axis in samples of spun beryllium broken under pressure
10 p1708 A69-22996

Liquid crystal coatings for determining fracture initiation flaws in material structures, considering stress concentration and hysteresis heating
10 p1699 A69-23053

Debonding mechanism role in fatigue crack development in notched aluminum alloy samples using optical and electron microscopy
10 p1710 A69-23076

Fatigue behavior of plastics classified noting temperature rises, crack initiation, etc
10 p1716 A69-23394

Brittle fracture of steel analyzed using statistical model, attributing occurrence to coalescence of arrested cracks initiated at different points
10 p1803 A69-24033

Macroscopic states of stress criteria for plastic flow initial yielding, plastic flow and brittle fracture of ductile and brittle metals
11 p1975 A69-24671

Dynamic and fatigue crack propagation theories for brittle and quasi-brittle solids and plates
11 p1975 A69-24672

Inclination effect of fatigue cracks on plane strain fracture toughness of 7075-T651 Al alloy, discussing cantilever bending
12 p2177 A69-25958

Fracture mechanics of polymers and fiberglass reinforced plastics, indicating microcracking under static and cyclic loading due to resin phase brittleness and low strength
12 p2120 A69-26849

Crack growth and crack initiation in cylindrical specimens subject to low cycle strain controlled tension-compression induced fatigue, noting measurement techniques
12 p2188 A69-26914

Fatigue crack initiation and propagation correlation with substructure formation by static and alternating stresses in Al
12 p2188 A69-26915

Fracture and equilibrium position of dislocations in discrete and continuously distributed dislocations arrays including stress due to crack, energy considerations and crack initiation
13 p2358 A69-27222

High strength alloys stress corrosion cracks, analyzing tensile ligament instability from plastic flow tests of bulk /compression/ specimens
13 p2277 A69-27404

Low cycle fatigue crack initiation in Ti-6Al-4V at room and high temperatures and in aqueous salt environment
13 p2278 A69-27413

Stress corrosion crack initiation and propagation in titanium alloy
13 p2282 A69-28165

Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
13 p2365 A69-28252

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect
15 p2703 A69-30050

Crack initiation and propagation in Ti alloys during thermal cyclic heating noting influence of gas saturation
15 p2637 A69-30271

Longitudinal internal cracks in deformed Al alloys initiated by elastic stress concentration in areas of highest flow rate gradient
15 p2638 A69-30277

Plastic strains at crack tips in thin plate under concentrated forces, analyzing slip bands during initial deformation
15 p2708 A69-30659

Fatigue cracks initiation and propagation studied by surface plastic replication method, noting metallographical and continuum mechanical factors influence on low carbon steel
17 p3052 A69-32981

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation
17 p3052 A69-32984

Heat treatment effect on stress corrosion cracking of ternary Al-Zn-Mg alloys noting aging strength, solution temperature, quenching rate and alloy content
17 p2990 A69-33676

Elastic bodies brittle stability weakened by cut, developing criterion for determining critical cut length
18 p3224 A69-35314

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms
19 p3342 A69-35919

Gas turbine components life prediction, using Weibull distribution and Bayes theorem to estimate probability of crack initiation
19 p3394 A69-36004

Stress corrosion cracking in stainless steel foils correlated with stacking fault energy and ordering, emphasizing environmental forming tendencies
19 p3350 A69-36892

Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation
20 p3558 A69-36966

Fatigue crack initiation in relation to contact stresses due to fretting, studying causes of strength reduction and crack inclination to surface
20 p3563 A69-38110

Mean stresses effects on fatigue crack initiation and propagation under controlled fretting slip amplitude
20 p3563 A69-38111

Minor elements effect on cracking sensitivity of weld heat affected zone in Hastelloy alloy X, noting hot tearing and midrange cracking
22 p3967 A69-39881

Minor elements effect on weld-metal cracking resistance of wrought Ni-base heat resistant alloy by Circular Patch Test
22 p3967 A69-39882

Weldability of alloy Ni-Cr-Fe base-filler alloy combinations, noting threaded mold test and surface fissures
22 p3968 A69-39886

Metal fatigue crack nucleation at stresses below static fracture strength, determining local plastic strain under cyclic loading
22 p4041 A69-40053

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation
22 p4047 A69-41123

Fatigue tests with cylindrical samples for observation of macrocrack formation and propagation at bottom of notches, discussing kinetics of fatigue failure
23 p4225 A69-41425

Structural changes in subsurface layer and surface microgeometry factors of metal fatigue failure, explaining crack formation and propagation
24 p4395 A69-42559

Flaw determinations accuracy from measuring ultrasonic shear wave reflection peak intensities
24 p4397 A69-42756

Fatigue crack initiation mechanism as used in design to prevent fatigue failures in service
24 p4397 A69-42770

Relative slip effect on fretting fatigue strength, deriving stress initiating fatigue cracks
24 p4404 A69-43628

CRACK PROPAGATION

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
01 p0078 A69-10113

Crack initiation and propagation in Ti alloys during thermal cyclic heating, noting influence of gas saturation
01 p0094 A69-10215

Theory of fatigue crack growth crystal in metals in terms of coplanar dislocation arrays extended to oblique slip planes, discussing orientation
01 p0168 A69-10344

Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
01 p0096 A69-10612

Plastic zone generation by slots cut in tensile test specimens before and during loading, discussing redistribution
01 p0098 A69-10762

Microfacets of metal surface cracks studied for plastic deformation and atomic separation mechanisms by electron diffraction
01 p0098 A69-10763

Strain distribution for fracture initiation and steady state crack propagation in plane strain tension of plastic materials
01 p0169 A69-10764

Moisture effects on crack propagation in high strength aluminum alloys studied by fatigue tests
01 p0098 A69-10766

Crack growth in ceramics from velocity measurements on glass and sapphire as function of applied force, temperature and moisture environment
01 p0101 A69-10767

Stress-strain behavior of crazes in glassy polymers, discussing crack propagation, craze formation and failure and molecular weight effects
01 p0102 A69-10915

Substructures around fatigue cracks in fcc metals and alloys, noting relation between structural formation and crack propagation
02 p0260 A69-11826

Metal fatigue crack propagation mechanism, deriving basic laws for failure in high and low stress regions, determining material parameters
02 p0340 A69-12025

Ductile crack propagation speed relation to dynamic flow properties of metals analyzed using Dugdale crack model
02 p0343 A69-12283

Spin tests to determine brittle fracture under plane strain, using cyclic thermal stress or hydrostatic pressure to generate fatigue crack in rotor blank
03 p0524 A69-13060

Corrosion rates and stress corrosion cracking sensitivity of explosively shocked austenitic stainless steels
03 p0444 A69-13308

Porous ceramic heat shields for lifting reentry vehicles, noting crack propagation resistance and load redistribution
[SAE PAPER 680643]
03 p0453 A69-13457

Subcritical crack growth kinetics in high strength materials, suggesting growth rate control by reaction rate or diffusion
03 p0449 A69-13874

Crack propagation near arbitrary curvilinear hole, discussing hole exterior mapping and critical loads for crack initiation
04 p0674 A69-14562

Brittle fracture resistance of low carbon maraging and martensitic steels with cracks established by crack growth measurements during tensile and impact tests
04 p0615 A69-14647

Torsional elastic wave scattering from penny shaped crack, determining local dynamic stress field
04 p0678 A69-14872

Cold working considered for decreasing fatigue crack propagation rate in thin duraluminum sheets with various plastic deformations
04 p0681 A69-15170

Generation of crack propagation data on notched rotating beam specimens by interrupted stressing techniques
[ASME PAPER 68-WA/MET-3]
05 p0838 A69-16148

Griffith biaxial fracture criterion for porous brittle materials based on continuum model with random infinitely sharp cracks
[ASME PAPER 68-WA/MET-12]
05 p0838 A69-16152

Fatigue crack growth in notched samples of aluminum alloy subjected to cyclic compressive loading, noting residual tensile strength at notch root
[ASME PAPER 68-WA/MET-16]
05 p0838 A69-16154

Statistical model for tensile fracture of parallel fiber composites based on stress criterion for crack propagation
[ASME PAPER 68-WA/RP-7]
05 p0783 A69-16159

Fracture propagation in organic glasses, considering density of hyperbolic markings in polymethyl methacrylate and Dugdale model
05 p0784 A69-16429

Circular inclusion effect on stresses around line crack in sheet under tension based on elasticity theory
05 p0841 A69-16432

Elastic displacements for edge cracked plate specimens used as crack extension indicator in plane strain fracture toughness measurements
05 p0841 A69-16433

Photoelastic study of interaction between overlapping parallel cracks in tensile stress field
05 p0842 A69-16435

Plastic yield on inclined slip planes at tip of crack deformed in antiplane strain
05 p0842 A69-16436

Crack tip displacements and strains in plastically yielded region measured with replica technique
05 p0780 A69-16437

Crack formation and propagation in metallic materials under dynamic fatigue loading, noting dislocation during work hardening
05 p0781 A69-16542

Fatigue crack propagation in machine parts under cyclic loading
05 p0842 A69-16543

Device based on stroboscopic effect for observing crack propagation on rotating specimens during fatigue tests
05 p0843 A69-16665

Strain distribution at crack base measured by Fabry-Perot interferometer and photoelastic coating
06 p1020 A69-17127

Strain near fatigue crack tip in notched steel plates measured by copper electroplating method
06 p1022 A69-17198

Localized microstructural changes and fatigue crack propagation in cantilever type notched specimens of austenitic stainless steel under cyclic bending at constant load
06 p0943 A69-17237

Crack front and zone in brittle elastic body under high pressure at wall inside body
07 p1231 A69-18699

Fracture mechanics for predicting crack propagation rate in rotor spars
07 p1053 A69-18872

Crack growth during cyclic loading in elastoplastic bodies
07 p1232 A69-18992

Brittle fracture models compared with experimental stress analysis results, noting plane strain and plane stress fracture toughness
07 p1234 A69-19379

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions
07 p1235 A69-19383

Forging and heat treatment parameters effect on Ti-Al-V alloy low cycle fatigue properties, relating crack initiation and propagation rates to microstructures [ASM PAPER D8-24.4]
07 p1169 A69-19669

Prandtl brittle fracture model modified for semi-infinite crack in infinite body, discussing microscopic and macroscopic relation and crack propagation kinetics
07 p1237 A69-19682

Stresses nature at ends of brittle cracks, discrediting finiteness under certain conditions
07 p1238 A69-19691

Mathematical models of crack propagation in solids noting similarity for equilibrium crack length
07 p1238 A69-19692

Heat generation effects by plastic deformations at tip of propagating crack in quasi-brittle materials, considering elastic stress field and crack velocity
08 p1412 A69-20144

Electrochemical kinetic and mass transport model for studying stress corrosion crack propagation in Ti [ECS PAPER I47]
08 p1332 A69-20359

Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels
08 p1413 A69-20399

Translunar cracks in laminated graphite filament composites, noting effect of thermal stresses due to cooling
08 p1337 A69-20483

Crack propagation in crosslinked glassy polymers, noting effects of added elastomers molecular weight
08 p1338 A69-20492

Grain morphology and preferred orientation effects on direction and propagation of stress corrosion cracking of aluminum alloy plate
09 p1521 A69-21399

Methanol-water-chloride solutions effect on titanium alloys failure time, noting effect of changing water volume on cracking
09 p1521 A69-21400

Crystallographic fracture path of stress corrosion cracks in austenitic stainless steels using scanning electron microscopy
09 p1522 A69-21486

Polymethyl methacrylate rupture time under stress determined from short and long time strength tests, noting relation to crack propagation time
09 p1528 A69-21853

Crack propagation properties of polymethyl methacrylate during bending and tension, noting temperature and loading time effect on crack size
09 p1529 A69-21854

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain
09 p1614 A69-21883

Part-through and through-thickness fatigue crack growth observations in glassy plastics, using linear elastic fracture mechanics [SESA PAPER I348]
09 p1617 A69-22013

Ruby laser emission absorption in transparent dielectrics, noting crack formation and propagation producing opacity
09 p1520 A69-22655

Crack stability under mechanical and thermal stresses, noting critical tensile stress and thermal insulating character of crack
10 p1794 A69-22890

Model explaining intergranular crack initiation parallel to pulling axis in samples of spun beryllium broken under pressure
10 p1708 A69-22996

Aluminum alloy thin sheets with central transverse fatigue cracks subjected to increasing static loads to fracture, investigating crack tip deformation
10 p1709 A69-23056

Crack propagation velocity in titanium alloys over varying stress intensities under adverse environment
10 p1709 A69-23058

Strain fatigue mechanism of crack propagation in ductile metals, considering distribution of plastic cohesive stresses at crack tip
10 p1795 A69-23059

Crack propagation in plates and shells subjected to bending and direct loading, noting plate analysis modification for crack touching on compression side
10 p1795 A69-23061

Geometry at tip of growing fatigue crack, measuring crack propagation rate and fitting data to nucleation theory
10 p1795 A69-23062

Nonwork hardening elastic plastic material fracture criteria for antiplane strain, noting plastic zone shape effect on zone size and crack opening
10 p1795 A69-23064

Electron fractography of aluminum alloy fatigue for intermetallic particles and inclusions effects on crack growth
10 p1795 A69-23065

Fatigue crack propagation in cylindrical shells under fluctuating internal pressure, considering stress intensity factor
10 p1795 A69-23066

Micromechanism of crack propagation in brittle fracture, considering kinematics for steady state crack in plane strain and energy dissipation
10 p1796 A69-23070

Aluminum alloy crack propagation and fracture patterns as function of temperature under high strain amplitude and low strain rate
10 p1709 A69-23071

Mechanical model for investigating macrobehavior of cyclic fatigue crack propagation in plates of several metal alloys
10 p1796 A69-23072

Austenite to martensite strain induced transformation effect on energy absorption during crack propagation
10 p1709 A69-23074

Plastic crack propagation in nonstrain hardening doubly grooved bending specimens with two surface slip, discussing crack angles, crack ductilities and fatigue striations
10 p1797 A69-23077

Fatigue crack propagation and crack tip stresses measurements in tensioned cracked panels subjected to acoustic loading
10 p1797 A69-23078

Dislocation substructure near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy
10 p1797 A69-23079

Low cycle fatigue fracture behavior at high temperatures, noting fatigue crack behavior and crack density concept
10 p1797 A69-23081

Mechanical model for fatigue crack propagation assuming propagation as function of material strain cycling at crack tip
10 p1797 A69-23082

Environment influence on fatigue crack propagation mechanisms in aluminum alloys in vacuum, ambient air and distilled and sea water
10 p1710 A69-23084

Transgranular stress corrosion crack propagation in thin sheet single phase magnesium-aluminum alloy
10 p1710 A69-23086

Stress effect on laser damage crack orientation in transparent organic dielectrics, estimating gas pressure in cracks
10 p1703 A69-23621

Fatigue growth of disk shaped crack in infinite body, noting dependence on fourth power of stress intensity factor
10 p1802 A69-24028

Crack propagation through layer of viscous fibers joining orthotropic elastic half planes
10 p1803 A69-24029

Antiplane strain model for describing cracks and dislocation arrays within circular cylindrical inhomogeneity surrounded by elastic material
10 p1803 A69-24031

Mathematical theory of equilibrium cracks in stressed bodies with minimum loading for crack extension, analyzing crack tip zone and force transmission
11 p1974 A69-24668

Continuum mechanics analysis of fractures and crack extension, discussing solids elasticity, plasticity, boundary value problems, etc
11 p1974 A69-24670

Dynamic and fatigue crack propagation theories for brittle and quasi-brittle solids and plates
11 p1975 A69-24672

Three dimensional problems in crack theory for unbounded brittle body, deriving critical loads from limiting equilibrium equation
12 p2178 A69-25997

Fracture surfaces of thermally toughened glass plates using Cranz-Schardin spark camera, confirming internal front lead over front in surface layers
12 p2118 A69-26194

High speed photography of W strip fracture, considering electric current effects and electric circuit interruption by fracture
12 p2113 A69-26195

Fatigue crack propagation and fail-safe design for stiffened large Al alloy panels with crack stoppers, using residual strength analysis method
12 p2186 A69-26835

Fatigue crack propagation laws determined by material yielding at crack tips, stress intensity and exponential crack growth law
12 p2187 A69-26846

Crack growth and crack initiation in cylindrical specimens subject to low cycle strain controlled tension-compression induced fatigue, noting measurement techniques
12 p2188 A69-26914

Fatigue crack initiation and propagation correlation with substructure formation by static and alternating stresses in Al
12 p2188 A69-26915

Fatigue fracture surfaces in cast steel and Al alloys, studying fracture morphology, crack propagation rate and striation spacing with microfractographic methods
12 p2116 A69-26916

Macroscopic crack extension force, critical flaw size and minimum fracture strength calculated from microscopic quantities
13 p2275 A69-27227

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks
13 p2359 A69-27290

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages
13 p2359 A69-27291

Ambient air pressure effects on fatigue crack growth rate in strain hardened aluminum
13 p2276 A69-27393

Fatigue crack propagation in aged aluminum alloy sheets, studying specimen geometry and stress level variations effects
13 p2280 A69-27835

Stress corrosion crack initiation and propagation in titanium alloy
13 p2282 A69-28165

Fracture mechanics based on linear elasticity for evaluating crack propagation resistance, presenting plane strain fracture toughness test results for high strength alloys [ASME PAPER 69-DE-10]
14 p2461 A69-28842

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading

14 p2445 A69-28882

Oxygen content and grain structure influence on TS5 Ti alloy mechanical properties, notch and crack growth sensitivity at low temperature

15 p2637 A69-30266

Crack initiation and propagation in Ti alloys during thermal cyclic heating noting influence of gas saturation

15 p2637 A69-30271

Three dimensional problem in crack theory for brittle body, determining stress concentration and critical loads

15 p2708 A69-30658

Fatigue cracks growth rate under combined static and cyclic stresses

15 p2709 A69-30808

Fatigue crack propagation caused by cumulative damage due to strain cycling at crack tip, relating resistance to cyclic ductility

15 p2710 A69-30812

Room temperature fatigue crack propagation rates for high strength aluminum alloy in heavy water environment compared with argon and distilled water

15 p2640 A69-30815

Crack growth monitoring and recording techniques during fracture testing, using foil gauge, potential flow and acoustic pickup methods

15 p2713 A69-31109

Equilibrium cracks propagation in linear hereditary elastic media using Volterra principle

15 p2715 A69-31201

Fatigue life gage on operational aircraft providing in situ monitoring of fatigue damage prior to and during propagation of running fatigue cracks

15 p2613 A69-31271

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation

16 p2795 A69-32796

Fatigue cracks initiation and propagation studied by surface plastic replication method, noting metallographical and continuum mechanical factors influence on low carbon steel

17 p3052 A69-32981

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine

17 p2987 A69-33074

Arrest mechanisms to halt crack before gross failure, involving material toughness exploitation and subduing stress by structural configuration

17 p3060 A69-33560

Fatigue crack propagation in thin aluminum alloy plates under plane bending using microscopic surface observation and electron fractography, noting role of aging conditions

17 p3061 A69-33677

Plastic energy dissipation rate during stable crack growth in sheet under uniaxial tension

18 p3212 A69-34345

Longitudinal crack in cylindrical shell under internal pressure, calculating normal and bending stress singularity strengths against curvature/ cracklength parameter

18 p3212 A69-34346

Quasi-static crack growth in viscous bodies analyzed by continuum mechanics, rheological models and energy equation, discussing fine structure

18 p3215 A69-34570

Critical stresses and crack development near holes in compressed elastic plate

18 p3218 A69-34603

Crack analysis in stiffened vibrating plate based on dynamic stress distribution, showing high bending stresses at intersection

18 p3223 A69-35168

Fracture kinetics of biaxial oriented polymethyl methacrylate, discussing crack development and propagation as compared to unoriented polymer

18 p3162 A69-35354

High speed brittle fracture of polycarbonate resin subjected to static bending in liquid nitrogen determined from crack propagation speed of surface coating

19 p3358 A69-35776

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms

19 p3342 A69-35919

High strength titanium alloys subcritical stress corrosion crack propagation, studying stress and environment effects on cleavage mode

19 p3343 A69-35922

Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects

19 p3346 A69-36435

Homogeneous heat flux effect on limit load of isotropic plate with rectilinear through crack, noting conditions for crack propagation

19 p3441 A69-36744

Linear-elastic fracture mechanics applied to environment enhanced crack growth /stress corrosion cracking/

19 p3349 A69-36888

Crack growth in steel tested in hydrogenated condition, distilled water and in combination by acoustic emission, relating time intervals to hydrogen diffusion

19 p3350 A69-36893

Hydrogen embrittlement mechanism in steel based on modified pressure theory, discussing crack propagation mechanisms and stress corrosion cracking

19 p3350 A69-36894

Aluminum 7 percent Mg alloys stress corrosion cracking, presenting aging kinetics and depletion zone dislocations at grain boundaries

19 p3350 A69-36896

Titanium alloys stress corrosion cracking in presence of chloride, bromide and iodide under potentiostatic conditions, postulating electrochemical kinetic and mass transport model

19 p3351 A69-36901

Ti alloy stress corrosion susceptibility in salt water, alcohols and alkanes, comparing stress intensity for crack propagation in dry air

19 p3353 A69-36907

Computed and experimental displacement distribution curves compared for anisotropic material concerning creep rate enhancement by small cracks

20 p3620 A69-36965

Mean stresses effects on fatigue crack initiation and propagation under controlled fretting slip amplitude

20 p3563 A69-38111

Crack growth measured and recorded by ultrasonic monitor, describing transducer position and movement

20 p3547 A69-38312

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress

[ASM PAPER W9-13.3] 21 p3833 A69-38658

Stability of unbounded homogeneous brittle body containing circular planform crack, determining elastic stresses and critical load by macrocrack propagation theory

21 p3839 A69-39195

Wave scattering in elastic medium by discontinuity line or finite crack, noting dynamic stress intensity dependence on incident wavelength and Poisson ratio

21 p3840 A69-39293

Alpha-beta Ti-Al-V-Mo-Zr alloy with high strength, fracture toughness and crack propagation resistance, low density and adequate ductility, discussing test results

[AIME PAPER S69-3] 21 p3747 A69-39472

Stress history and corrosive environment effects on fatigue crack propagation under constant and varying stress amplitude

21 p3750 A69-39814

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time

22 p3973 A69-40743

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress

22 p4046 A69-41040

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack

22 p4046 A69-41060

Fatigue tests with cylindrical samples for observation of macrocrack formation and propagation at bottom of notches, discussing kinetics of fatigue failure

23 p4225 A69-41425

Fracture toughness and crack propagation in annealed aircraft titanium alloys tested per ASTM procedure, comparing results with high strength steels and aluminum alloys

23 p4177 A69-42165

Stress corrosion cracks propagation from fatigue precrack in Al alloy exposed to organic liquid environments

23 p4178 A69-42452

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form

24 p4395 A69-42591

Plane problem of infinite strip weakened by crack, determining crack form under uniformly distributed tensile loads applied to edges

24 p4395 A69-42592

Semiinverse method involving plane wave expansions to solve elliptical crack expansion and self similar phase transformation in anisotropic solid

24 p4397 A69-42749

Engineering components service failures involving fatigue crack propagation, analyzing causes

24 p4398 A69-42775

Model for estimating creep life of material containing wedge crack growth

24 p4399 A69-43032

Crack propagation in plate with stiffening ribs /riveted stringers/ under concentrated and tensile loads, determining rivet points displacements

24 p4406 A69-43709

CRACKING [FRACTURING]

Dynamic mechanical behavior of metal at tip of plain strain crack, discussing fracture strength relation to triaxial plastic stability

02 p0343 A69-12284

Precracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc

02 p0334 A69-12369

Surface preparation effect on stress corrosion cracking of type 310 stainless steel wires in boiling aqueous magnesium chloride solutions

03 p0444 A69-13311

Salt water stress corrosion cracks morphology in titanium alloy, discussing crack propagation, brittle nature and chloride contamination effect

[SAE PAPER 680642] 03 p0444 A69-13458

Knee in stress-strain diagram and crack formation in glass fiber reinforced plastics, discussing effect on construction load capacity

03 p0453 A69-13820

Consumable electrode vacuum melted steels, discussing ausforming and stress corrosion cracking

04 p0604 A69-14528

High temperature eddy current crack detection technique for atomic reactor components under high thermal gradients

04 p0607 A69-14972

General linear theory of isotropic cumulative failure involving phenomenological consideration of fatigue damage accumulation

[ASME PAPER 68-WA/MET-6] 05 p0838 A69-16149

Green function for computation of stress intensity factors for edge cracks in rectangular plates with arbitrary loadings

[ASME PAPER 68-WA/MET-18] 05 p0839 A69-16156

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses

[ASME PAPER 68-WA/MET-19] 05 p0839 A69-16157

Simulated crack experiment illustrating Griffith energy balance fracture criterion

05 p0842 A69-16438

Stresses and displacement around crack under various conditions using two dimensional elasticity theory, deriving complex potentials for various loading types

07 p1231 A69-18269

Brittle crack theory analyzed to justify Irwin criterion at crack ends, dismissing Kristianovich-Barenblatt assumption and solutions for elastic problems

07 p1238 A69-19689

Critical analysis of Sedov contention of infinite stress development at ends of brittle cracks

07 p1238 A69-19690

Electron fractographic study of fatigue cracks in wrought beryllium sheet, noting transgranular and intergranular modes on fracture surface

09 p1500 A69-22324

Fracture surfaces of Ti and Ti-Sn alloys for stress corrosion cracking in methanol with HCl and in aqueous chloride solutions

10 p1710 A69-23085

Plastic energy dissipation and crack surface displacement of penny shaped crack in elastoplastic material

10 p1803 A69-24030

Stress corrosion cracking of Ti-6Al-4V alloy tensile tested in anhydrous methanol by electron fractography and diffraction, noting hydrogen embrittlement

11 p1903 A69-24576

Hydrostatic pressure-cycling technique for controlled fatigue precracking of spin burst fracture toughness specimens, noting ultrasonic flaw detection 11 p1995 A69-25650

Electron fractography used in machine parts failure analysis to detect internal and surface cracks, forging defects, stress corrosion, fluid leakage sources, etc 13 p2269 A69-28182

Cleavage plane in stress corrosion cracking of alpha phase Ti-Al alloys 13 p2283 A69-28189

Crack behavior and toughness of aluminum alloy parent metal and weldments, noting temperature effect 14 p2462 A69-29003

General linear theory of isotropic cumulative failure involving phenomenological consideration of fatigue damage accumulation [ASME PAPER 68-WA/MET-6] 14 p2535 A69-29436

Stress corrosion cracking prevention by shot peening, considering aircraft industry applications 14 p2466 A69-29937

Maraging steel weldability, discussing residual stresses, hydrogen cold cracking, age hardening and hot cracking 15 p2617 A69-30098

W single crystals cleavage cracks by spark discharge, showing effective surface energy dependence on crack initiation and propagation temperatures 15 p2637 A69-30226

Stress-strain state of circular disk with diametral cracks determined by approximating limiting equilibrium equation 15 p2708 A69-30663

Initial comparisons between theory and experiment of strain fields in cracked copper plate 15 p2640 A69-30810

Plane strain and stress compared for elastoplastic cracked plate in work hardening tension 15 p2710 A69-30811

Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields 15 p2631 A69-31505

Stress corrosion cracks investigation by shear wave technique 16 p2876 A69-32334

Ti-Al base alloys brittleness and stress corrosion cracking, discussing diffusion mechanism, hydrogen mobility, dislocations, etc 17 p2987 A69-33372

Arrest mechanisms to halt crack before gross failure, involving material toughness exploitation and subduing stress by structural configuration 17 p3060 A69-33560

Fracture design for aircraft vehicles, discussing crack strength requirements and method for serviceability prediction 17 p3060 A69-33563

Prestressed beams, columns and plates nonlinear response, statistical behavior and transverse cracking under axial compression, describing strength and stiffness 17 p3060 A69-33568

Macrostructural differences between filaments of B and SiC vapor deposited onto small diameter W wire, discussing radial cracks due to dilatation 18 p3160 A69-34266

Hydrogen effect on embrittlement of Cr-Ni stainless steel from viewpoint of corrosion cracking, using reverse bending apparatus 19 p3358 A69-35774

Ti-Al alloys yield and fracture characteristics as function of high exposure temperatures, studying causes of embrittlement 19 p3344 A69-35927

Stress corrosion cracking - Conference, Columbus, Ohio, September 1967 19 p3347 A69-36883

Stress corrosion cracking research, history, engineering and education, incorporating stress corrosion data in mechanical design, terminology and nomenclature 19 p3348 A69-36884

Stress corrosion cracking of metals related to surface phenomena involving surface reaction layer ruptures or selective electrochemical dissolution along defects 19 p3349 A69-36885

Stress corrosion cracking mechanisms in liquid-solid metal combinations and solvent exposed plastics, discussing adsorption processes and cathodic polarization inhibition 19 p3349 A69-36887

Stress corrosion cracking of stainless steels and Incoloy and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments 19 p3349 A69-36890

Fracture surfaces of stress corrosion cracks in Fe-Cr-Ni alloys studied by electron microfractography, noting cleavage fracture 19 p3350 A69-36891

Stress corrosion cracking mechanism in Al alloys, discussing requisites for stress corrosion cracking 19 p3350 A69-36895

Stress corrosion cracking model for 7075 Al, correlating macroscopic yield stress and corrosion time to failure 19 p3351 A69-36897

Precipitation hardening, microstructure and dislocation influence on intergranular stress corrosion cracking /SCC/ of high strength Al alloys examined by transmission electron microscopy 19 p3351 A69-36898

Electrochemical analysis of stress corrosion cracking in Al-Zn-Mg alloy, noting oxide film growth at grain boundary 19 p3351 A69-36899

Ti and Ti alloys stress corrosion cracking, discussing metallurgical and environmental factors 19 p3351 A69-36900

Titanium alloys stress corrosion cracking /SCC/ from metallurgical-mechanical viewpoint, discussing phase transformations, dislocation arrangements, crack propagation, etc 19 p3352 A69-36902

Metallographic analysis of stress corrosion cracking of Ti alloys of Al and Sn in aqueous magnesium chloride solutions, noting cleavage process 19 p3352 A69-36903

Moisture and hydrogen role in hot chloride salt stress corrosion cracking of Ti alloys by radiotracer technique and mass spectrography 19 p3352 A69-36904

Titanium alloys hot salt stress corrosion cracking, studying effects of chlorides and surface oxides 19 p3352 A69-36905

Stress corrosion cracking of alpha Ti in liquid nitrogen tetroxide and various methanol environments, considering failure mechanisms 19 p3352 A69-36906

Singular factors affecting stress corrosion cracking resistance of Ti alloys in salt water and hot salt, finding immune single phase alloys 19 p3353 A69-36908

Alpha and alpha plus beta Ti alloys analyzed to relate phase composition and microstructure to stress corrosion cracking in NaCl solution 20 p3557 A69-36961

Crack density effects on stress-dependent creep rate in isotropic and anisotropic materials undergoing high temperature creep deformation 20 p3619 A69-36964

Design and processing tradeoffs for preventing stress corrosion cracking in Al alloy aircraft structural forgings [ASM PAPER W9-14.4] 21 p3729 A69-38657

Stress corrosion cracking of alpha and alpha-beta Ti alloys in aqueous environment at ambient temperature, noting Al content and microconstituents 21 p3743 A69-38663

Al alloys sheet, plate and weldments crack behavior and fracture toughness at cryogenic temperatures, using notched and surface flawed plane strain specimens [ASM PAPER W9-19.3] 21 p3743 A69-38669

Brittle failure models, discussing rheological properties, Griffith energy criterion properties, crack behavior in elastic and linear viscoelastic media, etc 21 p3839 A69-39194

Stress corrosion cracking prevention by selection of material, stress relief, compressive stresses introduction, protective coatings and by simulated accelerated tests 21 p3748 A69-39490

Stress corrosion cracking in aerospace situations, discussing corrective measures emphasizing fracture toughness criteria 21 p3748 A69-39491

Stress corrosion cracking of welded Al alloys in sea water solution, showing combined action of sustained stress, corrosive environment and heat treatment 21 p3748 A69-39492

C and B influence on heat affected zone hot cracking and postweld heat treatment on Ni base superalloys 22 p3967 A69-39880

Ti, Al, S and P influence on Ni alloys weldability, discussing chemical composition, susceptibility to hot cracking and ductility temperatures 22 p3967 A69-39884

Composition and thermal treatment effects on weldability of precipitation hardened Ni base alloy, analyzing heat affected zone cracking sensitivity 22 p3968 A69-39885

Nondestructive testing for fatigue cracks, considering X ray, magnetic particle, penetrant, ultrasonic and eddy current inspection techniques 23 p4234 A69-42451

Eigenfunction expansion technique to analyze three dimensional crack and wedge problems, emphasizing stress field near straight edged crack 24 p4395 A69-42641

CRACKS

NT MICROCRACKS NT SURFACE CRACKS

Plate thickness effect on bending of elastic plate with crack, investigating stress distribution 04 p0678 A69-14890

Steady state thermal stress distributions near external crack in solid, treating temperature distributions with respect to plane of crack 07 p1232 A69-19172

Fredholm equations from dual integral equations for studying penny shaped crack response to incident harmonic shear wave in elastic medium 07 p1233 A69-19175

Acoustic emission from welds in stainless steel plates used for detecting defects in single and multiple pass machine welds 08 p1318 A69-19963

Dynamic stress intensity factor for axisymmetric loading of circular crack in infinite isotropic elastic medium 08 p1413 A69-20412

Couple stresses effect on distribution of stresses in elastic solid due to crack analyzed on basis of Cosserat theory 10 p1800 A69-23242

Potential functions for three dimensional problems of elliptical crack in elastic solid 10 p1802 A69-24026

Dynamic IR inspection to detect fatigue cracks in aircraft and missile structure from distance 11 p1861 A69-24262

Mixed boundary value problem concerning expanding elastic space weakened by cracks located at same plane solved by integral transforms and Fredholm equations 11 p1973 A69-24663

Thermal stress and displacement fields in elastic solid weakened by crack outside of circular region, noting plastic zone size and energy dissipation 12 p2179 A69-26216

Symmetrical stressed state of shallow shell with crack edge loading solved in Cartesian coordinates 12 p2181 A69-26614

Elastic wave reflection and refraction around cracks, considering plane harmonic compressional and vertically-horizontally polarized shear waves 17 p3053 A69-32986

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations 18 p3212 A69-34347

Limiting equilibrium of infinite brittle body weakened by internal plane elliptical crack, determining critical loads and stresses at crack 18 p3226 A69-35379

Two dimensional stress analyzed near crack in infinite elastic sheet, considering crack shape and Young modulus 19 p3440 A69-36638

Limiting equilibrium stress state of unbounded brittle body with elliptical crack under monotonically increasing tensile or compression load, noting influence of crack curvature 19 p3441 A69-36745

Alpha Ti fatigue properties, studying internal precracking effects in alloys of various tensile strength 23 p4178 A69-42360

Time and plasticity effects on fracture determining solids strength as function of crack dimension 23 p4236 A69-42530

Orthotropic stiffness layer models for buckling of eccentrically stiffened shells of revolution with two unbonded orthotropic layers uncracked and circumferentially cracked 24 p4405 A69-43657

CRACK U VEHICLES

CRAMPS

U CONVULSIONS

CRANIUM

Single flash and rhythmic light stimuli effect on nystagmus of patients with tumoral posterior cranial fossa, recorded electroencephalographically
20 p3470 A69-37250

CRASH INJURIES

Occupant restraint systems for automobiles, aircraft and manned space vehicles, discussing cost, practicality, ease of use, acceptability and possible improvements
03 p0380 A69-13459

Impact/injury data used to estimate human tolerance to instantaneous accelerations
04 p0552 A69-14469

Business aircraft injury protection and impact survival design considerations, stressing upper torso restraint installations
[SAE PAPER 690335]
11 p1829 A69-24493

CRASH LANDING

NT DITCHING [LANDING]

Human survivability in severe light plane slow speed accidents due to stalling, turning, takeoff or approach, discussing crash load vectors and magnitude
[SAE PAPER 690336]
11 p1822 A69-24492

Large and small fixed wing airplane crashworthiness requirements, noting occupant protection in survivable crash environment and rapid safe evacuation
[SAE PAPER 690321]
11 p2004 A69-24509

Night vision requirements of Vietnam combat pilots investigated for relationship to Skyraider fatal crash during target strafing and H-34 helicopter crash landing
23 p4107 A69-41807

CRASHES

NT CRASH LANDING

NT DITCHING [LANDING]

Fragments and markings produced on aircraft aluminum by explosion as means of detecting sabotage in crashes
06 p0868 A69-17833

CRATERING

NT PROJECTILE CRATERING

Asymptotic estimate derived for size distribution function of fragments resulting from brittle impact destruction of rigid object applied to meteorites and lunar craters
03 p0512 A69-13691

Lunar crater formation studied to explain distortion in large craters or maria, discussing mass concentrations indicated by positive residuals of gravimetric map
04 p0654 A69-14632

Collapse theory of dimple craters, analogies with terrestrial sink holes and dimple craters as channels for gas escape from interior
05 p0818 A69-15589

Crater formation by gas erosion in vent of 4.3 kiloton nuclear explosion detonated at 280 ft depth in layered trachytic volcanic rocks
22 p3937 A69-40409

CRATERS

NT LUNAR CRATERS

NT METEORITE CRATERS

NT TYCHO CRATER

Martian crater density determined by comparison of statistical counts from Mariner 4 photographs
12 p2157 A69-26309

Mariner 6 TV pictures with description of craters and south polar cap, noting moon-like crater abundance, form, arrangement and crater sizes
21 p3803 A69-38981

CRAWLER TRACTORS

Crawler-Transporter at Kennedy Space Center for moving ground support equipment, Apollo/Saturn space vehicle and mobile launcher, describing design and components
21 p3690 A69-38754

CRAZING

U SURFACE CRACKS

CREEP ANALYSIS

Elastic analogue in creep stress analysis under time dependent boundary conditions and strain hardening theory
02 p0345 A69-12418

Model of creep in solids based on Markov process, discussing dislocation movement by means of thermal activation
03 p0529 A69-13942

Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis
04 p0681 A69-15200

Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries
05 p0781 A69-16500

Creep properties of EP-376 steel under slowly varying loads
05 p0782 A69-16692

Calculation of thin shell or beam structures with plasticity and isothermal creep based on linearization and local kinematic behavior
[ONERA-TP-667]
06 p1020 A69-17099

Buckling of rod with initial deflection as sinusoidal half wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep
06 p1021 A69-17182

Deformation and stresses in biaxially loaded stretched thin plate with central small hole during stress redistribution caused by creep
06 p1022 A69-17368

Digital computer simulation of nonlinear redundant structure variables including thermal influence, creep and arbitrary loads
[AIAA PAPER 69-120]
06 p1028 A69-18166

Anisotropic stress analysis of creep in theory of linear viscoelasticity
07 p1234 A69-19381

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship
07 p1235 A69-19384

Stress relaxation in structural elements, analyzing unsteady creep in case of strain hardening following power law
07 p1237 A69-19683

Dislocation climb theory of steady state creep, noting necessity of self diffusion mechanism in any high temperature creep theory
08 p1329 A69-20000

Single degree of freedom mechanical system under random excitation studied for creep effect on vibrations by harmonic analysis
09 p1617 A69-22095

Creep of high purity Nb-Mo alloys in 800-1300 C range and at 1500-13000 lb/square inch stresses, giving activation energy for creep
10 p1711 A69-23375

Stress concentration around square hole in celluloid plate subjected to creep under biaxial tension analyzed by photocreep method
12 p2178 A69-26000

Creep behavior of aluminum-alumina alloys analyzed using rupture time to determine deformation speed influence on elongation and crack formation
12 p2120 A69-26938

Creep strain rate and stress distribution of thick walled cylinders under internal pressure at elevated temperature, using variational principle
15 p2703 A69-30070

Heat resistant Fe and Cu alloys creep index affected by temperature, testing time and specimen grain size
15 p2639 A69-30569

Creep rates measurement errors at low stresses in intermediate temperature range, examining log creep rate vs log stress plot in Cr-Mo steel
15 p2639 A69-30599

Nonlinear theoretical derivation of creep equations for three dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation
16 p2803 A69-32290

Creep - Conference, Saclay, Essonne, France, June 1967
17 p2984 A69-32903

Pressurized cylindrical shell creep analysis by elastic procedure extension using computer program
17 p3067 A69-34211

Creep calculation with temperature considerations for multilayer cylinder under nonisothermal load, comparing stress-strain state of viscoelastic and elastic cylinders
18 p3225 A69-35358

Phenomenological creep theory for woven fiberglass reinforced plastic under moderate loads
18 p3226 A69-35373

Stoichiometric NiAl slip line and dislocation structures during creep at high temperatures, considering possible creep mechanisms
19 p3343 A69-35923

Thermal effects on viscoelastic structure response to applied loads, using equations for thermomechanics, linear and nonlinear thermoviscoelasticity and nonisothermal creep theorem
19 p3440 A69-36657

Primary and tertiary uniaxial creep strain rate changes based on internal stress redistribution described with mathematical model
20 p3619 A69-36941

Crack density effects on stress-dependent creep rate in isotropic and anisotropic materials undergoing high temperature creep deformation
20 p3619 A69-36964

Creep theory with anisotropic hardening during early creep stages based on analogy with plastic flow theory
21 p3839 A69-39196

Fatigue endurance determined from thermal stresses by balancing elastic strain rates, creep relaxation and mechanical cyclic loading with triangular waveform, discussing nonsteady creep
21 p3843 A69-39310

Creep long term deformation characteristics of plate and tube lead alloy model material predicted from short term room temperature creep deformation
21 p3844 A69-39320

Creep accumulation under time varying stress of Al alloy sheet, using creep recovery analysis to determine anelastic strain growth
21 p3747 A69-39323

Approximate generalized stress-strain rate relations for stationary creep analysis of thin shells compared with corresponding exact relations
22 p4041 A69-40013

Creep at 400 degree C in Ti alloy sheets in short period plastic deformation due to work hardening by stepwise drawing in extensometric device
22 p3971 A69-41032

Strain induced creep equation for hardened materials for fixed temperature and stresses range, noting application to steel and Al alloys
22 p3971 A69-41033

Dislocation structure of Al, Ni, Cu and Ag during creep, noting dependence of creep rate on stacking-fault energy
22 p3972 A69-41080

Partial differential equation for creep process in plane stressed metals, interrelating strain, rate, stress tensors, temperature and time
22 p4048 A69-41268

Model for estimating creep life of material containing wedge crack growth
24 p4399 A69-43032

CREEP BUCKLING

Elastic-plastic and creep deformation calculations of cylindrical shell, providing better estimate of critical time at higher stress levels by including plasticity
02 p0348 A69-12539

Creep buckling of circular cylindrical shells under axial compression and bending, using Al alloy test specimens
03 p0523 A69-12995

Circular cylindrical shell creep behavior and buckling under axial compression and internal pressure, using multimebrane model
[AIAA PAPER 68-108]
04 p0676 A69-14706

Creep buckling of shallow geometrically nonlinear spherical shell of linear viscoelastic material under constant external load
05 p0831 A69-15679

Creep buckling stability of shells, with emphasis on stress and strain states and critical time, considering circular cylindrical shell
08 p1411 A69-20143

Time scales for creep stress redistribution in structures subject to step loading
11 p1980 A69-24879

Buckling time of oval ring under unsteady creep based on strain hardening theory
17 p3062 A69-33716

Cylindrical shell stability under axial compression, studying buckling process and wave formation
18 p3217 A69-34597

Flanges flexural rigidity effect on load carrying capacity, failure mechanism and postbuckling behavior of webs in shear, noting permissible load
18 p3227 A69-35492

Creep buckling strength reduction of aircraft compression structure, discussing initial eccentricity and loading mode effects on supersonic aircraft operation mode
21 p3842 A69-39308

Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure
22 p4039 A69-39917

Compressed rectangular beam stability under different creep conditions, deriving relation between creep time and initial deflection
22 p4039 A69-39918

Circular cylindrical thin walled shells creep buckling under uniform axial compression 23 p4234 A69-42413

Creep buckling time of simply supported column under nonuniform temperature distribution over cross sections 24 p4400 A69-43053

CREEP DIAGRAMS

High temperature creep, discussing creep curves and activation energy 17 p2986 A69-32911

Temperature influence on mechanical properties and creep curves of fiberglass reinforced textolites compared with data from elasticity theory 23 p4179 A69-41993

CREEP PROPERTIES

NT STEADY STATE CREEP
NT TENSILE CREEP

Creep behavior of chemical vapor deposited tungsten at high temperatures by creep-rupture tests compared with powder metallurgy tungsten 01 p0097 A69-10647

Creep relaxation and kinking of aluminum-nickel whiskers at elevated temperature, noting permanent plastic deformation after heat treatment 03 p0443 A69-13119

Second phase hardened materials recovery creep rate model, showing dependence on stress level 03 p0447 A69-13615

Grain boundary sliding influence on gross mechanical behavior and stress distributions, emphasizing creep behavior 03 p0450 A69-13882

Creep stress concentration at circular hole in thin sheets under loads in own plane, discussing infinite thin plates [AIAA PAPER 68-175] 04 p0676 A69-14708

Plate bending in presence of unsteady creep and with zero stress-strain state in middle surface solved by variational method 04 p0679 A69-14923

Creep behavior of nonlinear rigid polyurethane foam under combined stress and applicability of multiple integral and modified superposition principle 04 p0680 A69-15155

Soviet handbook on elasticity, plasticity and creep theories, emphasizing stresses and strains in solid thin walled shells and plates under bending, tension and torsion 04 p0683 A69-15499

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane [ASME PAPER 68-WA/APM-8] 05 p0839 A69-16186

Stress rupture, creep and thermal stability of AT-3 titanium alloy, discussing possible applications 07 p1163 A69-18782

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship 07 p1235 A69-19384

Long life creep rupture of Type 304 stainless steel for linear, Larson-Miller and Dorn parameter curves, discussing isothermal curves and creep rate [ASM PAPER D8-9.6] 07 p1169 A69-19664

Generalized approximate method for solving problems in linear viscoelasticity theory to cover arbitrary creep and relaxation centers 08 p1412 A69-20327

Tensile and creep behavior of nickel at 600 C after oxidation at 1200 C, correlating results with structural differences caused by oxidation 08 p1333 A69-20556

Stress-strain problem of geometrically nonlinear conical shell subjected to creep, giving method for complex deformation solution 09 p1612 A69-21497

Oxidation effects on creep and fatigue properties of metals noting time and temperature roles 10 p1708 A69-22998

Negative creep in austenitic steel samples explained as possible redistribution of elements inside austenite grains at high temperatures 10 p1708 A69-22999

Biaxial stress effect on creep properties of thin walled tubes of polymethyl methacrylate at controlled temperature and humidity 10 p1717 A69-24216

Moire patterns for photoelastic strain analysis noting applications to elasticity, plasticity and creep problems 11 p1982 A69-24944

Added metal oxides solid solutions effect on creep kinetics and strain rate of zirconia samples during sintering 12 p2118 A69-26260

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane [ASME PAPER 68-WA/APM-8] 13 p2362 A69-28121

Creep stresses and displacements in conical membrane shells at small angle of attack to supersonic flow field, discussing temperature distributions 13 p2364 A69-28205

Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys 14 p2465 A69-29749

Creeping flow model of Leidenfrost boiling with moving surface, discussing vaporization time for equivalent drop film boiling on stationary surface [AICHE PAPER 20] 15 p2718 A69-31116

Aluminum alloys high temperature creep effects distinguished from effects of long period at high temperature, discussing tensile test data and deformation-time curves 16 p2800 A69-31781

Structural modifications of metals and alloys accompanying various stages of creep, interpreting equations describing time-deformation relation 17 p2985 A69-32904

Grain boundaries contribution to creep deformation, discussing ratio of grain boundary slip strain to total creep strain 17 p2985 A69-32905

Creep behavior of oriented Al bicrystals, emphasizing intergranular creep types and crystal orientation 17 p2985 A69-32906

Low temperature creep mechanisms, discussing thermal activation of dislocation slip in perfect crystals 17 p2985 A69-32909

High temperature creep, discussing creep curves and activation energy 17 p2986 A69-32911

Annealing time effects on creep properties of Ni at various temperatures after work hardening 18 p3159 A69-35445

Preliminary plastic deformations effect on dispersion hardened nimonic-80 alloy creep properties 18 p3159 A69-35446

Computed and experimental displacement distribution curves compared for anisotropic material concerning creep rate enhancement by small cracks 20 p3620 A69-36965

Analog method for determining structural creep displacement by setting up boundaries for linear elasticity and perfect plasticity 20 p3628 A69-37915

Soviet book on fundamentals of theory of plasticity and creep covering stress-strain state, bending, torsion, pressure, plane deformation, etc 20 p3630 A69-38206

Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements 20 p3630 A69-38207

Stress determination in materials with creep in presence of nonuniform temperature field 21 p3833 A69-38571

Snap through in thin shells with initial irregularities during creep, determining critical time to failure by analyzing undisturbed buckling process 21 p3838 A69-39188

Creep long term deformation characteristics of plate and tube lead alloy model material predicted from short term room temperature creep deformation 21 p3844 A69-39320

Thermal fatigue combined with mean stress, reversed mechanical stress, low cycle fatigue and static creep in stainless steel 21 p3847 A69-39813

Reinforcement effect on stress relaxation and creep in hereditary elastic materials, assuming integral shear modulus operator with exponential kernel 22 p4045 A69-40744

Rigid thermoplastic cylindrical shell creep under axisymmetrical loads, giving computer algorithm and time dependent criterion for rupture strength 22 p4045 A69-40750

Soft fiber reinforced plastics creep and recovery properties, discussing test equipment, rheological properties, polishing effects, etc 23 p4179 A69-42006

CREEP RUPTURE STRENGTH

Creep and stress rupture strength of unidirectional glass fiber reinforced plastics, using tensile tests 01 p0101 A69-10080

Creep behavior of chemical vapor deposited tungsten at high temperatures by creep-rupture tests compared with powder metallurgy tungsten 01 p0097 A69-10647

Delayed rupture strength of metals and welded joints at fixed stress level 04 p0674 A69-14541

Fully austenitic stainless steel welding electrodes for welds in cryogenic or high temperature applications, noting creep rupture test results 04 p0607 A69-15220

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening [ASME PAPER 68-WA/MET-15] 05 p0838 A69-16153

Stress rupture, creep and thermal stability of AT-3 titanium alloy, discussing possible applications 07 p1163 A69-18782

Long life creep rupture of Type 304 stainless steel for linear, Larson-Miller and Dorn parameter curves, discussing isothermal curves and creep rate [ASM PAPER D8-9.6] 07 p1169 A69-19664

Parameters interrelating time and temperature used to present creep-rupture data for Al alloys, providing direct readings of stresses [ASM PAPER D8-9.7] 07 p1169 A69-19665

Gas turbine blade materials after long term service, analyzing tensile, impact and stress rupture properties and microstructure [ASME PAPER 69-GT-12] 09 p1527 A69-22503

Hydrogen effect on temperature dependence of tensile strength and stress rupture strength of Ti alloys, considering annealing, quenching and aging 11 p1905 A69-24962

Book on stress rupture parameters including least squares approach to Larson-Miller, Dorn, Manson-Haferd, Graham-Walles, Murry, Brozzo and Chitty-Duval 13 p2360 A69-27372

Microstructural stability Fe-Ni base heat resistant alloy Pyromet 860 during long time creep-rupture testing 13 p2279 A69-27764

Short time creep rupture behavior of austenitic stainless steel at high temperature ranges, noting rupture times various stresses and data correlation [ASME PAPER 68-WA/MET-2] 14 p2464 A69-29439

Double notch creep rupture tests of Cr-Mo steels, investigating changes in notch profile, dimensions and structure [ASME PAPER 68-WA/MET-7] 14 p2464 A69-29441

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress 14 p2464 A69-29442

Austenitic alloy structure and stress rupture after boron addition 17 p2985 A69-32908

Microfractographic observations of Al, Al alloy, Nimonic 90 and austenitic steel 18/10 after creep rupture 17 p2986 A69-32910

In-process annealing and warm working temperature effects on long time creep rupture properties of Mo alloys tested in vacuum furnace 17 p2987 A69-33076

Long term creep rupture data based on short term tests in form of Larson-Miller time-temperature curves 18 p3150 A69-35422

Tensile and stress rupture strengths of diffusion bonded Ni superalloys, using spin tests of simulated hollow turbine disks 19 p3320 A69-35559

Nonlinear rotational viscoelastic membranes creep rupture and failure found dependent on function of accumulated energy and power dissipation during deformation 19 p3444 A69-36806

Multicomponent Nb alloy creep and rupture strength under loads after heat treatment, determining creep rates dependence on temperature 22 p3969 A69-40073

Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life 23 p4176 A69-41504

CREEP STRENGTH

Zr-Be-Nb alloys mechanical tensile properties above room temperature for low concentrations of Be and Nb 02 p0262 A69-11845

Metal composite materials, discussing strengthening mechanism for inclusion of high elastic coefficient and creep limit fibers in weak ductile matrices 02 p0268 A69-12750

Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc 07 p1164 A69-18791

Microstructure relationship to tensile strength and creep resistance in Zn-Ni-Ti alloy extrusions, discussing role of finely dispersed intermetallic particles
08 p1329 A69-20002

Nickel base superalloys for aircraft gas turbines, considering strengthening mechanisms for creep resistance [ASME PAPER 69-GT-7]
09 p1527 A69-22506

Beta parameter in exponential stress dependences of high temperature steady state creep rate and time to rupture of creep resistant alloys
10 p1712 A69-23719

Creep and hot working strain-rates relationships, showing work hardening and dynamic recovery relative levels dependence on plot used
13 p2278 A69-27417

Creep rate and temperature effect on creep resistance shown in direct correlation with Al-Mg alloys strength by long term high temperature tests
16 p2801 A69-31782

Preprogrammed deformation temperature influence on Ni creep strength, emphasizing smoothly changing loads effects
18 p3160 A69-35455

Creep strength of fiberglass reinforced polyester resins measured on structural components in long term tests under torsion
19 p3358 A69-35830

Creep resistance increase of Ni refractory alloy by thermovibrational treatment under stress relaxation conditions
21 p3744 A69-38869

Law of mixture governing creep strength of composite materials reinforced unidirectionally by continuous filaments, taking into account fibers and matrix viscoelastic properties
24 p4400 A69-43054

CREEP TESTS

Long term creep characteristics of metal structures from short duration relaxation tests, summarizing data on rheologically stable materials [ONERA-TP-639]
02 p0337 A69-11626

Machine for simultaneous creep and long term strength evaluation of multiple metallic specimens
04 p0584 A69-14537

Deformation dependence on strain hardening and recovery rate during transient and steady state creep
06 p0943 A69-17236

Four specimen vacuum device for simultaneous tensile creep tests at 1200 C, discussing linear and thermal expansion
07 p1116 A69-19318

Ductility as principal cause of postweld heat treated stress relaxation cracking in nickel based Waspaloy and alloy 718
08 p1318 A69-19964

Heat resistant nickel alloys static and dynamic properties at high temperature, creep- fatigue interaction, etc
09 p1523 A69-21609

Nickel alloy high temperature tests, noting coagulation of precipitated gamma prime phase, vacancies and creep rate increase
09 p1528 A69-22733

Bending creep vacuum testing device for brittle materials at high temperatures, noting load variation capability
10 p1696 A69-23851

Compressive and tensile creep of metals, discussing compressive stress, void nucleation, barreling specimen shape and platen lubrication
12 p2175 A69-25836

Accelerated structural tests under creep conditions, noting isothermal structures subjected to uniaxial and complex stress loads
12 p2186 A69-26838

Machine for measuring creep deformation of polytetrafluoroethylene under uniaxial compressive loads, discussing stress-strain relationship
14 p2469 A69-29412

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress
14 p2464 A69-29442

Creep experiments on Mg alloys, discussing dispersed phases influence on creep cavitation and grain boundaries mobility
17 p2985 A69-32907

Creep tests on polycrystalline Be and Be alloy at various temperatures and stresses
17 p2986 A69-32912

Machine for testing high temperature creep under variable tensile-compressive stress while maintaining specimen stability, noting discrepancy between creep strains in heat resistant alloy
17 p3054 A69-33044

Tensile and creep deformation of fiber reinforced composites consisting of Mg-Li alloy matrix with high strength precipitation hardening stainless steel wire
17 p2986 A69-33073

Creep rate-stress-temperature relations for powder metallurgy rhodium, discussing activation energy
17 p2991 A69-34186

Dislocation structure of pure polycrystalline nickel subjected to high temperature creep, using electron microscopy following cold working and room temperature annealing
18 p3157 A69-35254

Longitudinal modulus of interlaminar slip during creep of fiberglass reinforced plastic determined by bending tests of beams under concentrated force
18 p3163 A69-35365

Annealed Cr structural changes during creep at 900 C in air, discussing crystalline disorientation X ray studies and stress
18 p3160 A69-35453

Tensile tests on time dependent Pb and cellulose nitrate, including stress-strain curve prediction from creep test data
19 p3445 A69-36829

Supersonic aircraft and power plant structural members operating under cyclic stress at elevated temperatures tested by various methods for interaction between creep and fatigue
20 p3620 A69-37001

Creep strain rate measurement at high temperatures by inductance strain gage to determine deformations from 0.2 microns
20 p3544 A69-37815

Creep measurements in Al alloy during uniaxial tensile stresses between 200-350 C, determining deformation dependence on time and stress
21 p3744 A69-38871

Bending creep tests on fabricated Al alloy box beams under constant load and temperature using continuous deflection and strain measurement
21 p3842 A69-39309

Short period creep and relaxation in various heat resistant alloys under heat treatments and loads, determining temperature dependence of cyclic thermal instability
22 p3969 A69-40071

Creep stress analysis of circular cylindrical shells under axisymmetric loading, plotting stresses and deformations for various parameters
23 p4233 A69-42352

CRESTATRONS

CREVICES

U CRACKS

CREWS

U FLIGHT CREWS

U SPACECREWS

CRIMPING

U FOLDING

CRITERIA

Criterion for magnetic plasma stability near magnetic axis, noting parameters for deriving criterion integrand
15 p2658 A69-30265

CRITICAL FLICKER FUSION

Physiological effects of intermittent light stimulation during helicopter flight, discussing visual and electric cortical functions at critical frequency threshold of subjective fusion
13 p2211 A69-28595

CRITICAL FLOW

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate
02 p0297 A69-11994

Weightlessness effect on critical heat flow during forced motion of water in different kinds of channels
07 p1243 A69-19616

Thin spherical layer flow stability with respect to small disturbances, showing unsteady motion above critical Reynolds numbers and secondary flow features
11 p1875 A69-25486

Gas-liquid critical flows, considering compressibility, rate of momentum, mass and heat transfer, etc
13 p2376 A69-28144

CRITICAL FREQUENCIES

Lunar tidal effects on F 2 critical frequency and height maximum, evaluating variations with altitude
01 p0063 A69-10424

Sporadic E layer boundary frequencies disturbances at midlatitudes, noting solar activity effects, diurnal variations and effect of meteor fluxes
01 p0066 A69-10600

Numerical maps of sporadic E critical frequency for solar cycle maximum and minimum to estimate propagation
01 p0070 A69-11160

Tunnel diode oscillations in switching mode due to sinusoidal voltage excitation, discussing critical applied signal frequency separating switching and oscillation modes
02 p0213 A69-11535

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity
02 p0237 A69-11662

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers
02 p0238 A69-11680

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point
02 p0238 A69-11681

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency
02 p0207 A69-11684

Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle
02 p0239 A69-11685

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value
02 p0239 A69-11692

F 2 layer critical frequencies variation coefficients, analyzing variation and root-mean-square deviations in terms of geomagnetic latitude and Wolf number
03 p0422 A69-13514

Diurnal variation of variation coefficient of F 2 critical frequency for steady and unsteady primary ionizing fluxes simulated on computer
03 p0423 A69-13516

Nighttime E layer mean variations noting critical frequencies, electron density and seasonal and solar activity effects at sunset, midnight and sunrise
03 p0398 A69-13899

Ionospheric electron content and slab thickness changes during magnetic storm in June 1965 using Faraday rotation and critical frequencies
05 p0759 A69-16420

Synoptic observations of F 2 layer in magnetically conjugate regions, comparing critical frequencies
06 p0919 A69-17723

Optimum length of Fourier time series approximating diurnal F 2 critical frequency variation on planetary scale
06 p0921 A69-17746

Variation in critical E layer frequencies at large solar zenith angles
06 p0921 A69-17748

Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation
07 p1204 A69-18823

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves
09 p1486 A69-21547

Numerical decile value maps of sporadic E layer ionization critical frequency for each month of solar cycle minimum and maximum year
10 p1682 A69-23418

Luni-solar tide interpretation in F2 critical frequency based on sum and difference frequencies production by nonlinear atmospheric response to forces
10 p1685 A69-23829

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies
10 p1687 A69-23927

Correlation coefficient between changes in F 2 layer critical frequency and sporadic E layer maximum frequency
13 p2254 A69-28330

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity
13 p2256 A69-28693

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers

13 p2257 A69-28711

F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point

13 p2257 A69-28712

Ionspheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency

13 p2224 A69-28715

Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle

13 p2258 A69-28716

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value

13 p2258 A69-28723

Solar X rays intensity and spectrum effects on E layer critical frequency and D region ionospheric absorption

15 p2677 A69-31346

F 2 critical frequency data at Hawaii for clarifying total electron content data obtained by geostationary satellite measurement of Faraday signal rotation

16 p2779 A69-32196

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves

16 p2784 A69-32542

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances

16 p2784 A69-32612

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects

16 p2784 A69-32613

Latitude variations of day and night ionospheric critical frequencies, inhomogeneity and ionization, discussing generation of r type sporadic E layer in auroral zone

17 p2964 A69-33963

Magnetic declination effect on F 2 layer critical frequency diurnal variations attributed to vertical ionospheric drift due to neutral air winds

18 p3126 A69-34256

Global distribution of F 2 layer critical frequencies by expanding empirical function of diurnal variations into natural orthogonal components

20 p3521 A69-37051

Predawn F 2 layer critical frequency enhancement at Johannesburg, discussing electron density hump from corpuscular ionization increase

20 p3523 A69-37576

F 2 critical frequency meridional cross sections latitude profiles based on global network ionospheric stations observations, confirming daytime Northern Hemisphere ionization maximum

20 p3526 A69-37661

F 2 region critical frequencies obtained during winter at Northern and Southern Hemisphere stations located in auroral and polar zones, correlating changes with ionization

20 p3526 A69-37665

Seasonal anomaly of F 2 layer critical frequency in Northern and Southern Hemispheres during high and low solar activity, discussing geomagnetic effect

20 p3526 A69-37667

Alouette topside ionograms of ionospheric storms at midlatitudes indicating critical frequencies difference between F 1 and F 2 layers

20 p3532 A69-37894

Critical frequency variations of F 2 layer and M3000/F 2 with sunspot number for 19th solar cycle, noting dependence on geomagnetic latitude

21 p3715 A69-38560

Supercritical frequencies horizontal gradient ducting effects on backscatter sounding of F region magnetic field aligned irregularities

22 p3941 A69-40913

Rectangular waveguide with periodic array of infinitely thin metallic strips, studying intrinsic oscillations critical frequencies and amplitude spectrum

23 p4124 A69-42036

Diurnal variation of Pc type geomagnetic pulsations correlation with F 2 layers critical frequency diurnal variations

23 p4161 A69-42441

CRITICAL LOADING

Paradoxes associated with elastic-plastic limit load analysis of material satisfying Drucker stability postulates

02 p0337 A69-11562

Mechanical properties of free rolling contact surfaces subject to high loads, discussing effect of oil film separation and fatigue crack initiation

02 p0339 A69-11989

Critical loads in elastoplastic buckling of cylindrical shells analyzed using power series

02 p0340 A69-12058

Optimum critical impulse for snap-through of nonlinear dissipative dynamical system of one degree of freedom

[AIAA PAPER 68-143] 02 p0346 A69-12508

Direct matrix method for evaluation of critical loads and buckling modes for nonuniform flexural rigid plates having end and side constraints

03 p0522 A69-12866

Initial deviations or imperfections effects on load capacity of infinite and finite length thin circular cylindrical shells under axial compression

[ASME PAPER 68-WA/APM-22] 04 p0669 A69-14398

Elastic-plastic thin walled cylindrical shell axisymmetric behavior under radial pressure difference, noting load for collapse

[ASME PAPER 68-APM/AA] 04 p0670 A69-14404

Crack propagation near arbitrary curvilinear hole, discussing hole exterior mapping and critical loads for crack initiation

04 p0674 A69-14562

Load carrying capacity of V notched bars under axially symmetric tensile load, verifying influence of distance between two equal notches

04 p0680 A69-15169

Schaefer theory of two parameter eigenvalue problems applied to stability of twisted bars, discussing quick estimate of critical loads

04 p0682 A69-15290

NeoHookean /incompressible solid/ rectangular parallelepiped compressed between lubricated rigid plates, comparing stability bounds with predicted critical loads

04 p0682 A69-15303

Axial buckling load for thin walled circular cylindrical shell, noting design of internal mandrel for control of boundary expansion conditions

05 p0831 A69-15581

Iteration method for determination of critical buckling load for straight rods

05 p0832 A69-15689

Theoretical buckling load for single edge notched struts, discussing brittleness effects

05 p0837 A69-16064

Critical axisymmetric loads for instability in orthotropic multilayer conical shells obeying Hooke law under axial compression or external pressure

05 p0840 A69-16198

Yield point for simply supported conical shell loaded through central boss at vertex

06 p1023 A69-17375

Stress-strain response up to ultimate failure and ultimate strength of laminated composite with nonlinear orthotropic lamina

07 p1170 A69-18710

Compressive strength of boron fiber-epoxy matrix composite, noting matrix support of fibers against buckling

07 p1170 A69-18713

Low speed four-ball lubricating oil testing machine eliminating thermal effects associated with frictional heating for load carrying capacities of thin lubricant films

07 p1140 A69-18968

Large deflection behavior of shallow circular arch subjected to vertical point load by nonlinear Rayleigh-Ritz finite element method, discussing deformation path

08 p1411 A69-20140

Variational method for safety limits of perfectly plastic simply supported conical sandwich shells subjected to uniform internal pressure and obeying Mises yield criterion

08 p1416 A69-20702

Multilayer orthotropic cylindrical shells stability under distributed external load and off-center compression, analyzing subcritical deformation on critical load

09 p1613 A69-21685

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads

09 p1616 A69-21977

Multilayer pressure vessel load carrying capacity calculated, using Huber-Mises yield condition to estimate axial force influence

09 p1618 A69-22257

Validity limits of formulas for critical buckling load for oscillating continuous beams found to be elastic buckling

11 p1969 A69-24349

Statistical parameters of critical load distribution in buckling of imperfection sensitive elastic structures, noting probability of failure

11 p1969 A69-24415

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion

11 p1970 A69-24609

Optimal parameters selection for rib-reinforced cylindrical shells determined with respect to axial critical loading magnitude

11 p1985 A69-25173

Critical axial compressive load for cylindrical shells reinforced with longitudinal ribs, noting internal pressure and rib spacing effects

11 p1985 A69-25177

Rectangular aluminum alloy rods carrying capacity under compression loads applied eccentrically to rod ends

11 p1986 A69-25326

Composite shell carrying capacity under general load, studying closing shape between laminate layers, transverse contraction, supporting layers thicknesses ratio, etc

12 p2176 A69-25851

Tensile strength and failure loading evaluation for structure, discussing stresses in neighborhood of crack, crack toughness measurement and fracture mechanics

12 p2176 A69-25861

Three dimensional problems in crack theory for unbounded brittle body, deriving critical loads from limiting equilibrium equation

12 p2178 A69-25997

Dynamic programming method for upper bound on collapse load of rotationally symmetric thin cylindrical shell under ring loading

12 p2179 A69-26214

Load capacity, stiffness and flow requirement of capillary and orifice compensated oil lubricated externally pressurized rectangular thrust bearings

12 p2102 A69-26239

Critical load for anisotropic right-angled isosceles triangular plate stability with large deflections obtained from differential equation

12 p2180 A69-26270

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells

12 p2181 A69-26609

Equilibrium paths in initial postbuckling of elastic structural systems, discussing stability boundaries and relationships between imperfections and critical loads

13 p2359 A69-27261

Radial and polar load support of squeeze film gas bearing in form of sphere pulsating radially or moving along polar axis

[ASME PAPER 68-LUBS-3] 13 p2266 A69-27279

Orthotropic cylindrical shell stability under uniform axial compression and internal pressure, taking into account subcritical state duration

14 p2532 A69-28981

Rigid supporting ribs effect on annular plate critical loading, stability loss and buckling

14 p2533 A69-28983

Heterogeneous orthotropic circular cylindrical shell stability during axial critical compression

14 p2533 A69-29024

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect

15 p2703 A69-30050

Three dimensional problem in crack theory for brittle body, determining stress concentration and critical loads

15 p2708 A69-30658

Oscillating beams lateral buckling allowing for torsional stress in determining critical load

15 p2712 A69-31015

Load carrying capacity of circular plates under axisymmetric load

16 p2875 A69-32289

Critical loads and stability loss forms of annular plates flexibly clamped at edges in uniform stress field
17 p3057 A69-33197

Discrete element displacement method applied to buckling analysis of flat rectangular plates under arbitrary membrane loading, calculating critical load intensities
17 p3066 A69-34048

Critical stresses and crack development near holes in compressed elastic plate
18 p3218 A69-34603

Stability loss of shells of revolution under axial tension and radial pressure, considering shells of Gaussian curvature, calculating critical force
18 p3222 A69-34976

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading
18 p3224 A69-35319

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model
18 p3225 A69-35357

Isotropic plate critical strength measurements, evaluating role of material shear modulus
18 p3225 A69-35361

Limiting equilibrium of infinite brittle body weakened by internal plane elliptical crack, determining critical loads and stresses at crack
18 p3226 A69-35379

Variational method for computer calculation of supercritical bending of thermoelastic uniformly loaded circular plates, determining Ritz parameter influence on accuracy
19 p3434 A69-35829

Homogeneous heat flux effect on limit load of isotropic plate with rectilinear through crack, noting conditions for crack propagation
19 p3441 A69-36744

Critical buckling loads for uniform compression of clamped or simply supported parabolic and semielliptic plates
20 p3622 A69-37223

Laminated composites ultimate strength prediction based on consecutive yield procedure with step-wise reduction of strength or load-carrying capacity used as design criterion
20 p3627 A69-37773

Automated device for load carrying ability of structural elements like gas turbine blades under thermal and mechanical cyclic loads
20 p3544 A69-37816

Curved beams ultimate strength using angular velocity considerations for collapse load
20 p3629 A69-38031

Load carrying capacity of orthotropic circular cylindrical shell under uniformly distributed normal load, considering edge support conditions
20 p3629 A69-38075

Noncircular curved shell stability under axial compression, using strain energy method to determine upper and lower critical stresses
21 p3834 A69-38715

Elastic closed and truncated conical shell stability with initial deflections under dynamic critical loading
21 p3834 A69-38716

Stability of unbounded homogeneous brittle body containing circular planform crack, determining elastic stresses and critical load by macrocrack propagation theory
21 p3839 A69-39195

Galerkin method application to solve differential equation and boundary value conditions for elastic stability of bars, showing linear relation between critical loads
21 p3845 A69-39678

Serrated yielding at high temperatures from dislocation theory viewpoint, considering critical strain relation to temperature and strain rate
21 p3749 A69-39710

Cylindrical shell load carrying capacity under axial compression, considering middle surface initial distortions influence
23 p4228 A69-41899

Space frame radome model elastic buckling tests for load deflection and maximum load predictions, considering individual beam failure and complex instability
23 p4232 A69-42143

Collapse load of shallow conical shells clamped at base and loaded through finite rigid boss, using Tresca yield condition for sandwich shell
23 p4236 A69-42496

Shallow spherical sandwich shells critical buckling loads using differential pressure method
24 p4396 A69-42734

Limiting load of square plate subjected to shear and reinforced by vertical stiffener, computing membrane and bending stresses as function of flexural rigidity
24 p4399 A69-42967

FAA power spectral gust methods for computing design limit loads on commercial aircraft, noting British investigation
24 p4253 A69-43111

CRITICAL MACH NUMBER
U MACH NUMBER

CRITICAL MASS
Critical density ratio concept introduced into cosmological models for matter concentration into galaxies in expanding universe
08 p1381 A69-19794

Resonant long-period orbits around Lagrange equilateral points for critical mass ratio of main bodies
13 p2346 A69-27706

Fast neutron spectrum for subcritical section of homogeneous U 235-polyethylene thermionic critical assembly measured by pulsed source time-of-flight method
18 p3170 A69-34313

CRITICAL PATH METHOD
Civil transport aircraft power plant and auxiliary systems as sources of delays, presenting critical path analysis
17 p2898 A69-33213

CRITICAL POINT
Critical state model of type 2 superconductor taking account of critical current on magnetic field and surface sheath currents, evaluating flux penetration, hysteresis, AC losses, etc
02 p0298 A69-12030

Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field
02 p0341 A69-12256

Velocity of 1 MHz sound waves in He 4 along isotherms just above critical temperature, noting specific heat ratio for 4.5 and 5 K isotherms
06 p0957 A69-17142

Critical conditions in spherical reacting mass, noting oscillatory nature of critical parameters in truncated Arrhenius rate on basis of nontruncated form
11 p1998 A69-24480

Critical diameter of ammonium perchlorate stable detonation as function of initial temperature, water content, density and particle size
11 p1940 A69-24553

Gravitational effects on thermodynamic variable equilibrium composition of liquid-vapor binary mixtures near critical point, discussing changes in phase with altitude
11 p1999 A69-24914

Specific isochoric heat capacity of pure fluids, considering thermal equation of state, vapor pressure and boundary conditions at critical point
11 p2001 A69-25201

Thermodynamic properties of materials in critical region, discussing inhomogeneity
11 p2003 A69-25440

Heat transfer coefficients for carbon dioxide near thermodynamic critical point for flow through electrically heated duct, noting turbulent forced convection as mechanism
[ASME PAPER 68-HT-32] 13 p2373 A69-27769

Double light scattering near critical point, examining angular distribution
14 p2482 A69-28738

Light scattering in single component systems near critical point analyzed by critical phenomena classical theory and Rayleigh theory
14 p2485 A69-28995

Faraday effect for magnetic properties of chromium tribromide along various isotherms near critical point, confirming scaling laws
15 p2668 A69-30686

Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc
17 p3070 A69-33142

Existence conditions of critical points for autonomous differential equations in bounded flows
22 p3975 A69-40571

Laser produced Sb and Te vaporization near critical point, using time of flight mass spectrometer
22 p3993 A69-40719

Critical transition temperature of vanadium oxide semiconductors as function of doping element content and lattice constant, using X ray diffraction
23 p4198 A69-41564

Postbuckling analysis by equilibrium solutions of conservative system near critical point, considering stability failure in elastic structure under increasing load
24 p4396 A69-42730

Solution stability and secondary solutions growth beyond critical points investigation for Burgers equations for laminar-turbulent transition
24 p4302 A69-43360

CRITICAL PRESSURE

Critical internal pressure induced plastic instability in membrane shells of revolution determined by graphical numerical method
02 p0338 A69-11719

Hydromagnetic plasma stability in infinite electrical conductivity approximation applied to smooth closed systems, discussing ballooning instability mode
06 p0965 A69-17519

Reinforced cylindrical shell stability under external compression load by pressurized air, determining critical pressure
15 p2715 A69-31204

Correlation coefficient of light fluctuations measured in Ar plasma in positive column of glow discharge, noting ionization wave appearance at critical gas pressure
16 p2822 A69-32039

Stability of thin walled eccentrically reinforced cylindrical shell, determining eccentricity influence and critical pressure formula from considerations of Poisson ratio, reinforcement parameters, etc
18 p3216 A69-34576

Boundary conditions of orthotropic shell stability under external pressure and axial tension, analyzing critical pressure by strain energy method
18 p3222 A69-34977

Thin cylindrical pressure vessels with circular cutouts and radial branches, observing limit pressures during plastic deformation
20 p3629 A69-38027

Cylindrical shell stability during loading by uniform external pressure represented by Fourier series, determining critical pressure by solving nonlinear equations
21 p3846 A69-39715

Vapor pressure measurements on liquid fluorine from triple to critical point at one degree K intervals [NAS-NRC PAPER H-2]
22 p3998 A69-40624

Critical oxygen pressure dependence on buffer in diluted heart muscle sarcosine suspensions and effect of hemoglobin or myoglobin
23 p4080 A69-41427

Bubble flow evolution at various pressures up to critical value [ASME PAPER 69-HT-30]
24 p4411 A69-43529

CRITICAL REYNOLDS NUMBER
U REYNOLDS NUMBER

CRITICAL TEMPERATURE
Vanadium-gallide alloys critical temperature of transition into superconducting state determined by measuring cast alloy samples magnetic permeability
03 p0483 A69-13023

Critical body temperature for intracranial self stimulation in white rats
03 p0375 A69-13897

Velocity of 1 MHz sound waves in He 4 along isotherms just above critical temperature, noting specific heat ratio for 4.5 and 5 K isotherms
06 p0957 A69-17142

Film and transition boiling as functions of critical temperature, discussing role of heat transfer and vapor production
11 p1997 A69-24458

Niobium aluminide-niobium germanide alloys superconductivity and heat treatment influence on critical temperature
13 p2316 A69-27659

Superconductive tunneling measurements on thin Al films, discussing enhanced transition temperatures, energy gap dependence on temperature, electron microscope observation of crystallites, etc
16 p2825 A69-31634

P-V-T surface of fluids in critical region by dielectric measurements, presenting saturation densities of oxygen [NAS-NRC PAPER H-5]
22 p4050 A69-40623

Time dependent differential equation for order parameter in superconductors near critical temperature derived from density matrix equations
22 p3994 A69-41053

Graph analytical method for calculating heat transfer in diathermic exchangers during boiling together with critical thermal loads
24 p4408 A69-43080

CRITICAL VELOCITY

Flutter vibration in subsonic flows, analyzing critical velocity for membrane and damping destabilizing effects in nonconservative system

02 p0192 A69-12825

Critical end-on impact velocities calculated for reentering solid and granular radioisotopic fuel rods with solid and granular earth materials

04 p0630 A69-14800

Critical electron drift velocity threshold in surface wave amplification in semiconductor in magnetic field, noting partial effect of diffusion

05 p0810 A69-16648

Gyrostatic moments effects on critical angular velocities of varying and constant cross section rigidly and elastically supported hinged rotors

09 p1567 A69-21384

Angular inertia of lubricant in MHD hydrostatic thrust bearings, obtaining critical angular speed of rotor

09 p1503 A69-21443

Axial torque effect on critical speeds of continuous rotor with motion described by partial differential equations

[ASME PAPER 69-VIBR-52]

10 p1804 A69-24152

Critical speeds of multiple disk rotors with multiple supports, discussing continuous shaft sections including gyroscopic and transverse shear and rotary inertia effects

[ASME PAPER 69-VIBR-51]

10 p1804 A69-24153

Rotor shaft mounted on number of bearings and carrying masses and inertia angular precession and critical speeds, considering gyroscopic moments, rotary inertia and shear deformation

[ASME PAPER 69-VIBR-54]

10 p1805 A69-24154

Undamped rigid rotor critical speed analysis for firm and flexible foundations, discussing effect of center of gravity and rotor shapes

[ASME PAPER 69-VIBR-49]

10 p1808 A69-24184

Second approximation of asymptotic damping of disturbances in viscous heat conducting gas supersonic flow about solid of revolution at critical velocity

11 p1817 A69-24627

Rotor angular velocity and flexural strain interdependence at critical velocity

11 p1987 A69-25390

Critical rotation rates of homogeneous shaft with two bearings under tension, considering shaft mass, stretching force magnitude and console disk gyroscopic effect

13 p2269 A69-28323

Unbalance effects on rigid naval turborotor on oil film bearings in flexibly mounted housings investigated at varying critical speeds and housing stiffness

[ASME PAPER 69-DE-9]

14 p2453 A69-28839

Critical speeds of high speed turbine rotors running in friction bearings determined by varying natural frequencies of rotor and supports

18 p3147 A69-34545

Turbine disks stress-strain state, using wire strain gauge to determine residual strains, radial and tangential stresses as function of disks rpm

19 p3436 A69-35850

Nadai and Zyczkowski stress analysis for Tresca yield condition reexamined for determination of critical angular velocity of solid elastic perfectly plastic disk

23 p4235 A69-42480

CROCCO METHOD

Equations governing steady diabatic gas flows in Crocco velocity vector field, discussing changes in total pressure

21 p3695 A69-39007

CROSS CORRELATION

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes

01 p0032 A69-10887

Closed form solution for two input correlator processing gain with error function transfer characteristics and operating in Gaussian environment

03 p0403 A69-13253

Diversity antenna continuous short wave radio signal envelope distribution, autocorrelation functions, damping rate and cross correlation coefficients

03 p0394 A69-13522

Cross correlation function for two sequences of pulses arbitrarily distributed in time, noting noise stability of diversity reception systems

04 p0557 A69-14790

Multichannel HF resolution spectral analyzer of pulses reflected from ionosphere applied to dependence of cross correlation coefficient on frequency separation

06 p0897 A69-17740

Radar signal cross correlation function calculation with reference function, applying acousto-optical modulator

10 p1694 A69-23539

Drift elimination in linear system identification using binary m-sequences by crosscorrelating over two periods of output

11 p1834 A69-24547

Real time correlator in periodic signal extraction from noise background, discussing multichannel sampler as special case of cross correlation extraction

11 p1837 A69-25094

Laser emission noise and voltage noise cross correlation coefficient for CW GaAs laser diodes at 77 K, noting strong dependence on bias current

12 p2038 A69-26328

Autocorrelation and cross correlation analysis of rapid density variations in F region determined from satellite deceleration and geomagnetic data

12 p2069 A69-26436

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes

12 p2031 A69-26651

Drift correction schemes for periodic cross correlation comparison unification and extension

15 p2564 A69-30169

Universal transfer function computer based on synchronous spectrum analyzer having outputs combined in cross spectrum correlation computer to yield plot in Code form

15 p2615 A69-31282

Cross correlation methods for determining systems time domain response adapted to communications channel evaluation, discussing computer simulation of on-line testing

16 p2750 A69-31757

Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties

16 p2789 A69-31868

Radio sources interplanetary scintillations and cross correlation coefficient real time determination

17 p3038 A69-33727

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations

19 p3273 A69-36266

Quadrupole self and cross correlations of directional jet noise patterns, including frequency spectra and corrections

22 p3931 A69-40891

CROSS COUPLING

Strapdown gyros in back to back connection for reduction of component cross coupling errors

04 p0603 A69-15473

Time domain synthesis of multivariable automatic control with predetermined output signal shape, allowing for internal cross coupling effects

05 p0737 A69-15887

Multimode direction tracking with polarization tracker used simultaneously, analyzing cross coupling and conical horn/reflector antenna

06 p0888 A69-17652

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect

06 p1019 A69-18204

Trajectories of roots of two channel systems with antisymmetric cross couplings using geometrical and analytical methods, noting hodograph

21 p3686 A69-38886

CROSS RELAXATION

Finite cross relaxation rate effect on spectral distribution in CW laser oscillator output with inhomogeneous broadening, noting population inversion distribution

05 p0776 A69-16327

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients

06 p0980 A69-17458

Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio

07 p1150 A69-19049

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients

20 p3584 A69-37941

CROSS SECTIONS

Torsion of variable cross sectional thin walled bars using shell theory equations

02 p0337 A69-11559

Effective cross section of resonant cesium ions charge exchange determined by retarding field method, considering dependence on ion velocity

06 p0959 A69-16908

Potassium ion resonant charge exchange, determining relation between effective cross section and ion velocity, using retarding field method

06 p0959 A69-16909

Charge exchange cross sections in methane and ammonia, noting dissociative charge exchange role

06 p0884 A69-17114

Rereflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements

18 p3085 A69-34474

Stellar nuclear reactions at low energies studied to provide predictions of cross sections in carbon burning

20 p3612 A69-38164

Macroscopic rate coefficient relation to microscopic chemical reaction cross section, discussing microscopic reversibility and balance

23 p4113 A69-41519

CROSSED FIELD AMPLIFIERS

Permanent magnets used in conjunction with magnetrons, crossed-field amplifiers, klystrons, traveling wave tubes and microwave ferrite devices

01 p0045 A69-10713

Crossed field backward wave tubes gain with stepwise varying interaction space found greater than with constant height interaction space

13 p2237 A69-28583

Reflex klystron with closed electron flux in crossed electric and magnetic fields permitting interless frequency returning

21 p3682 A69-39128

CROSSED FIELD GUNS

Ionization and current growth in discharge in rotating plasma device with mirror shaped magnetic field

09 p1552 A69-22042

Noise fluctuations transport in convergent flow crossed field electron guns using Monte Carlo method for two dimensional computerized gun simulation

15 p2572 A69-30031

CROSSED FIELDS

Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals

01 p0031 A69-10780

Cross field plasma instability resulting in charge density irregularities shown to meet requirements for ionospheric irregularities model

01 p0073 A69-11178

Overheated semiconductor plasma instability in crossed electric and magnetic fields, deriving condition for occurrence

02 p0298 A69-12099

Tunnel diodes current voltage characteristics in crossed electric and magnetic fields, observing tunnel current decrease in GaSb

02 p0300 A69-12634

Transport phenomena in crossed electric and strong magnetic fields, developing semiclassical and quantum treatments

03 p0473 A69-12926

Heat transfer in crossed field MHD Couette flow for incompressible fluid, assuming linear wall temperature in flow direction

03 p0476 A69-13306

Dispersion equation for electron-ion and electron-hole plasma linear oscillations in crossed electric and magnetic fields

03 p0480 A69-14134

Cross field energy transfer in collisionless plasma across earth magnetospheric boundary, using computer and one dimensional sheet model simulation

06 p0916 A69-17023

Time rates for growth and damping of resistive instability in gaseous plasma in crossed electric and magnetic fields

08 p1369 A69-20886

Partially ionized plasma oscillations in crossed magnetic and electric fields, noting role of LF particle collisions

08 p1370 A69-21079

Scattering and transformation of electromagnetic waves in plasma in crossed electric and magnetic fields showing radiation spectrum maxima due to ion-acoustic oscillations propagation

08 p1277 A69-21080

Plasma conductivity tensor components in crossed fields calculated by Boltzmann kinetic equation, noting influence of magnetic field presence
09 p1546 A69-21565

Quantum oscillations of magnetization, undamped magnetoplasma waves development and sound amplification by electron drift in crossed fields observed in semimetals
09 p1556 A69-21615

Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals
10 p1653 A69-23109

Ionization front propagation rate in crossed electric and magnetic fields in Ar-Cs, Hg-Cs and Ne-Xe discharge plasmas
10 p1733 A69-23447

Instabilities in K seeded Ar plasma in crossed electric and magnetic fields and with nonequilibrium ionization, noting effects on MHD generator characteristics
10 p1734 A69-23457

Mercury cesium plasma in crossed electric and magnetic fields as working fluid of MHD generators based on Rankine cycle
10 p1636 A69-23458

Weakly ionized gas in crossed electromagnetic fields, formulating Ohm law from Ginzburg equations
11 p1925 A69-24319

Boundary layer calculation during laminar MHD channel flow under crossed magnetic and electric fields using successive approximation method
11 p1932 A69-25491

Chain mechanism of arc discharge development in crossed electric and magnetic fields explained by direct ionization of neutral particles by ions
11 p1932 A69-25540

Two beam electron flux instability in crossed magnetic and inhomogeneous electric fields using linearized hydrodynamic and Lagrangian formalism approximation
12 p2133 A69-26714

High speed photographic study of plasma luminescence front and charged particle concentration front counter to electrodynamic force in crossed electric and magnetic fields
12 p2141 A69-27130

Transient heat transfer in formation of steady crossed fields MHD plane Couette flow for walls, giving momentum, induction and energy equations
13 p2375 A69-27791

Linear approximation of electron temperature increment and electron mobility in nondegenerate polar semiconductor in crossed fields
14 p2508 A69-29662

Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas
15 p2663 A69-30980

Nonlinear theory of $E \times B$ instability for weakly ionized plasma in presence of density gradient and parallel electric field perpendicular to magnetic field
16 p2819 A69-31682

Linearized Boltzmann equation in kinetic theory for weakly ionized plasma electrons under alternating electric and circularly polarized magnetic field, noting higher harmonics generation
16 p2820 A69-31752

Electron distribution function for weakly ionized plasma under alternating electric and circularly polarized rotating magnetic field, noting cyclotron resonance
16 p2820 A69-31753

Charge density irregularities of midlatitude ionospheric E region related to cross field plasma instability noting turbulence
16 p2773 A69-31972

Polarization operator and Green function of photon for propagation of plane electromagnetic waves in constant crossed field, noting refractive indices
18 p3103 A69-35128

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics
22 p3991 A69-41022

Crossed inhomogeneous electric and magnetic fields effect on H plasma fluxes dynamic behavior, deriving plasma motion formula
24 p4358 A69-43475

Electric arc stabilization in crossed convective and magnetic fields, discussing column slanting relationship to widening near downstream electrode
[AIAA PAPER 68-709] 24 p4359 A69-43572

CROSSLINKING
NT VULCANIZING

Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures
23 p4179 A69-41715

CROSSOVERS
Correlation of overshoot with gain crossover frequency, phase crossover frequency, phase margin and velocity error constant for linear feedback control systems
02 p0225 A69-12026

Tracking system for gain and time delay parameter measurements of compensatory control crossover model
12 p2022 A69-25930

CROSSTALK
NT IONOSPHERIC CROSS MODULATION
Diffractional crosstalk in optical beam waveguide during simultaneous multibeam transmission arising from beam coupling by aperture diffraction
07 p1100 A69-18648

Compatibility requirements and considerations of range telemetry tape crossplay operations, discussing major classes
07 p1133 A69-19117

Waveform distortion resulting from adjacent channel crosstalk and from amplitude and phase nonlinearity in channel filters in DSB/SC telemetry link
07 p1083 A69-19130

Critical signal assignments optimization in electrical/electronic connectors, considering bent pins, signal cross talk, adjacency requirements and corona
19 p3284 A69-36030

CROWDING
Environmental crowding effect on individual and group behavior in rat colony, using implanted passive resonant circuits for identification and passage information
19 p3257 A69-36243

CRUCIFORM WINGS
Pressure coefficients determination on slender body surface to estimate effects of quadratic terms, considering body of revolution with thin cruciform lifting surfaces
10 p1632 A69-22911

Conical flow past cruciform wing-body and tail-body systems, considering various positions of leading edges with respect to Mach cone
15 p2548 A69-31002

High order conical motions past cruciform wing-body and tail-body systems, reducing problem to flow past cruciform wing
15 p2548 A69-31023

CRUDE OIL
Petroleum sulfides advantageous effect on oxygen consumption during combustion
07 p1202 A69-19456

Viscosity-temperature chart for hydrocarbons permitting linear extrapolations into low viscosity high temperature regions
10 p1753 A69-23975

Sediments and crude oils analyzed for fatty acids, considering abiological or bacterial origin of acids
20 p3523 A69-37538

CRUISING FLIGHT
Aircraft and engine parameters for maximum theoretical range of turbojet for given cruising speed
03 p0366 A69-12950

Optimum cruise altitude, block time and fuel relations for Convair 600/640 aircraft for various temperatures, segment distances and weight
08 p1255 A69-21007

Supersonic flight altitude stability, studying effects of velocity, lift-drag ratio, thrust law, wind direction, engine unstarts, etc
[AIAA PAPER 69-813] 19 p3366 A69-35627

Thermal control of Mars entry capsule with fiberglass honeycomb sandwich shell analyzed with and without aft thermal curtain, emphasizing cruise-flight phase
[AIAA PAPER 68-1082] 19 p3429 A69-35949

Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation
[AIAA PAPER 69-844] 21 p3822 A69-39374

In-flight test to determine variation effects in bank angle control parameters on cruise flight handling qualities, considering spiral stability
[AIAA PAPER 69-893] 21 p3648 A69-39425

Sonic boom signatures produced by diverse SST configurations during cruise, indicating aircraft length as overpressure limit factor
24 p4253 A69-43661

CRUSTS
U EARTH CRUST

U LUNAR CRUST
CRYODEPOSITS

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits
[AIAA PAPER 69-1012] 22 p3922 A69-40385

CRYOGENIC EQUIPMENT
Calibration of pressure transducers in liquid hydrogen to liquid helium temperature range using cryogenic test equipment
01 p0080 A69-10300

High pressure transfer system to deliver liquid hydrogen to testing equipment and liquid hydrogen/liquid oxygen engines
01 p0013 A69-11145

Cryogenic plants for space simulation chambers, examining processes for cooling shroud below 100 K at given temperature differences
01 p0057 A69-11154

Cryopump design suitable for attachment as replacement for diffusion or ion pumps
01 p0088 A69-11155

Resonant interaction of radiation from liquid nitrogen cooled ruby laser with ruby crystal in temperature range 4.2-100 K
04 p0611 A69-14439

Soviet papers on apparatus and machines of oxygen and cryogenic installations covering film boiling, gas vessel, thermal design, etc
04 p0686 A69-15160

Helium cryostat designed to operate under overload and vibrations and used for cooling onboard superconducting devices of Cosmos 140 satellite
04 p0585 A69-15407

He refrigerators, noting 4 K design for large scale fixed installations and 20 K small scale design for airborne applications
05 p0704 A69-15671

Thermal losses in thermal regenerators used in cryogenic refrigerators
[ASME PAPER 68-WA/PID-2] 05 p0706 A69-16163

Low temperature thermometer based on temperature dependence of frequency of F-19 nuclear magnetic resonance in antiferromagnetic manganese difluoride
06 p0927 A69-17703

InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures
10 p1696 A69-23717

Cryogenic applications including maser amplification, IR detection and superconductivity, discussing systems optimization and cost reduction
10 p1665 A69-24017

Gallium arsenide thermometer calibration in 1 to 100 K range using interpolation formula derived from p-n junction diode equation
12 p2093 A69-26484

Problem areas within cryogenic chemical and nuclear propulsion systems for space missions, noting available technology and limitations
[AIAA PAPER 67-454] 12 p2174 A69-26782

Thermal losses in thermal regenerators used in cryogenic refrigerators
[ASME PAPER 68-WA/PID-2] 13 p2203 A69-27421

Cryogenic heat exchanger design and application including vaporizers, recuperators, regenerators, reversing exchangers, nonsteady state flow and thermoelectric techniques
17 p3074 A69-33681

Forming and heat treatment process for stainless steel pressure containers using liquid N, discussing austenite-martensite transformation role
18 p3161 A69-34605

Possibility of combining individual yttrium ferrite single crystals to obtain noninteracting element for quantum paramagnetic traveling-wave amplifier operating at liquid nitrogen temperature
19 p3334 A69-35883

Adaptor for Debye-Scherrer powder camera to take high quality photographs even at liquid N temperature
19 p3313 A69-36493

Silicon junction radiation detectors applications in cryogenics, measuring junction response to beta particles at low temperatures
20 p3546 A69-38275

CRYOGENIC FLUID STORAGE
NASA LOX and liquid hydrogen barges, discussing storage tank design, acceptance testing and operating conditions
01 p0056 A69-11150

- Mass spectrometer helium leak testing of cryogenic storage vessels, noting procedures and insulation and evacuation of jacket space 02 p0252 A69-11811
- Safety planning for use of reactive cryogenics in large volume, noting FLOX and liquid fluorine 04 p0645 A69-14468
- Thermal design and test for liquefied gas vessels under unsteady insulation cooling conditions 04 p0687 A69-15162
- Electric field influence on fluid oscillation modes for Kortweg-Helmholtz force density on incompressible dielectric liquid immersed in electric field 04 p0591 A69-15504
- Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders 05 p0769 A69-16486
- Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels 05 p0785 A69-16488
- Thermal protection system optimization for storage of cryogenic propellants in space, noting vented systems [AIAA PAPER 69-27] 06 p1039 A69-18211
- Cryostat design, discussing vapor and radiation shielding, construction and insulation materials, safety features, cost considerations, etc 10 p1810 A69-24015
- Liquid helium vented and nonvented storage container design and handling techniques 10 p1810 A69-24016
- Thermal insulation for cryogenic storage in space, discussing Apollo service module conversion to cryogenic service module 12 p2175 A69-26827
- Refrigeration system for space flight use of cryogenic gas storage, suggesting mission time increase 15 p2587 A69-30395
- Back pressure control system for heat leak evaluation tests of cryogenic containers, discussing component selection and error analysis 15 p2702 A69-30397
- Aluminum nonheat-treatable alloys cryogenic vessels welding, considering TIG, pulsed arc and MIG processes with respect to plate thickness, joint and accessibility 15 p2630 A69-31210
- Physical and physiological hazards of cryogenic liquids, emphasizing fire and explosion problems associated with storage and handling 17 p3017 A69-33684
- High strength austenitic Cr-Mn-Ni steel applicability to welded pressure vessels for cryogenic fluid storage, discussing operating temperature stability, weldability, etc 23 p4175 A69-41475
- Optimal design and materials for cryogenic storage of O and H on lunar surface [AAS PAPER 69-051] 24 p4296 A69-42882
- Sprayable polyurethane foam external insulation for liquid hydrogen and oxygen storage aboard Saturn S-2 booster 24 p4337 A69-43453
- CRYOGENIC FLUIDS**
- NT FLOX
- NT LIQUID HYDROGEN
- NT LIQUID OXYGEN
- NT SOLIDIFIED GASES
- Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage 01 p0084 A69-10109
- Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes 01 p0176 A69-11146
- Bearing lubrication at low temperature, examining safety limits, working fluid in liquid or gaseous state [IME PAPER 9] 07 p1138 A69-18565
- Heat exchangers in cryogenic fluids in free and forced convection, discussing measurements in liquid H, D, Ne and N 08 p1420 A69-19914
- Heat and mass transfer between cryogenic fluid and superheated wall, analyzing experimental data 11 p1996 A69-24228
- Cryogenic liquid level temperature transducer with radiantly heated thermocouple sensitive element 17 p2975 A69-33670
- Phase equilibrium apparatus for measurement of thermodynamic properties of cryogenic fluid mixtures, including argon-methane data [NAS-NRC PAPER H-3] 22 p3947 A69-40630

- Dielectrophoretic zero gravity cryogenic liquid expulsion using lightweight high voltage ribbon electrode conduits and electrohydrodynamic bang-bang field effect 24 p4300 A69-43237
- CRYOGENIC MAGNETS**
- Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems 12 p2016 A69-26497
- Variable voltage DC power supplies for energizing cryogenically cooled and superconductive electromagnets 12 p2017 A69-26498
- Manufacturing ultrahigh purity aluminum strip for cryogenic magnets, discussing ingot preparation, rolling, chemical milling and cleaning, arc welding, annealing and sampling 19 p3318 A69-35541
- CRYOGENIC ROCKET PROPELLANTS**
- Safety planning for use of reactive cryogenics in large volume, noting FLOX and liquid fluorine 04 p0645 A69-14468
- Radioisotopic propulsion stage design with liquid hydrogen working fluid, stressing tank insulation and hydrostatic flight behavior 05 p0811 A69-15595
- Inflatable solar shields for thermal protection of space vehicles utilizing cryogen propellants 06 p1017 A69-17609
- Thermal protection system optimization for storage of cryogenic propellants in space, noting vented systems [AIAA PAPER 69-27] 06 p1039 A69-18211
- Film cooling design criteria for small rocket engines [AIAA PAPER 68-617] 09 p1570 A69-21978
- Impingement pressure analysis associated with two phase cryogenic propellant venting to space environment [AIAA PAPER 69-571] 16 p2869 A69-32753
- Slush hydrogen for spacecraft propulsion, discussing fabrication, conservation and storage 17 p3017 A69-33339
- Liquid oxygen and hydrogen rocket engine HM4 design and operation, discussing fuel, low temperatures and heat exchange 17 p3020 A69-33345
- Hydrogen fluoride corrosive effects in cryogenic propellant, emphasizing contamination by particulate matter from corrosion products 21 p3783 A69-39486
- Cryogenic core concept for flexible and economical delivery system [AIAA PAPER 68-812] 21 p3827 A69-39753
- Hydrostatic bearings analysis for high pressure cryogenic rocket engine turbopumps to predict steady state and time dependent performance, noting turbulence, inertia and compressibility 22 p3955 A69-40408
- CRYOGENIC STORAGE**
- Model describing outflow of cryogenic propellant tank pressurized by pressurizing gas, predicting pressurant mass, gas and wall temperature distribution, inlet flow rate, etc 01 p0163 A69-11147
- Spacecraft single wall cryogenic storage system, discussing cost, pressure vessel and components, thermal and performance characteristics 24 p4393 A69-43045
- CRYOGENICS**
- NT CRYOGENIC MAGNETS
- Cryogenic engineering - Conference, Brighton, England, May 1968 01 p0056 A69-11144
- Low temperature microwave thermal noise standard, discussing waveguide termination, cryogenic cooling and temperature and pressure controls 02 p0211 A69-12446
- Freeze-out characteristics of MOS varactor, noting impurity effects and compensation 05 p0806 A69-15809
- Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967 05 p0784 A69-16485
- Thermal expansion of polymers at cryogenic temperatures 07 p1172 A69-19730
- Silicon dioxide glass thermal conductivity at very low temperature 09 p1493 A69-21426
- Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping 10 p1744 A69-23179

- Cryogenic Technology - Conference, Chicago, June, 1967 10 p1810 A69-24014
- Cryogenic conductive heat transfer in solids, low temperature insulation and liquid-vapor interfaces, discussing boiling heat transfer, injection cooling and frost formation 11 p1998 A69-24461
- Specific heat of electron gas at temperatures approaching absolute zero, using method of displacements and collective variables 11 p1927 A69-24918
- Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage 12 p2191 A69-26793
- Temperature effects on fracture of various alloys, presenting strength and toughness values tested at cryogenic temperatures 17 p2990 A69-33567
- Cryogenic technology applications - Conference, Chicago, June 1968 17 p3006 A69-33679
- Radiative and conductive heat transport mechanisms at cryogenic temperature applicable to thermal energy transport minimizing technique in containment system 17 p3074 A69-33680
- Low pressure and background radiation conditions via cryogenically cooled surfaces, citing data on cryopumping under vacuum conditions for space simulation chambers 17 p3006 A69-33683
- Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes 17 p2921 A69-33685
- Temperature control below 5.2 K based on servoing He pressure above bath 18 p3136 A69-34641
- Metal alloys mechanical properties summary for cryogenic applications, considering fracture and thermal behavior, cryogenic structures fabrication and composites applicability 18 p3158 A69-35416
- Mechanical properties and weldability of austenitic steel for cryogenic applications 18 p3158 A69-35417
- Al cryogenic quenching using liquid N for slow and uniform heat removal to eliminate distortion 18 p3150 A69-35419
- Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power 19 p3332 A69-35867
- Mechanical properties of welded joints in Kh 18N9T steel at very low temperatures using austenitic-ferritic and austenitic welds 22 p3958 A69-41204
- Superconducting leads with small electrical resistance and low thermal conductance for cryogenic applications, noting manganin wires coated with Pb-Sn alloy 22 p3997 A69-41236
- DC beam experiment for determining molecule sticking coefficients of gas beams incident on Ti, Ba and Sr gettering surfaces at cryogenic temperature 23 p4151 A69-41544
- Low temperature mechanical properties of structural materials for high energy propulsion systems, using low boiling point propellants as liquid hydrogen, fluorine and oxygen 23 p4177 A69-42159
- CRYOLITE**
- Multilayer lead oxide and cryolite dielectric coatings stability to ruby laser radiation, noting breakdown coherent radiation power densities 19 p3334 A69-35886
- CRYOPUMPING**
- Liquid hydrogen circulation pump design emphasizing heat leaks 01 p0087 A69-11148
- Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile 01 p0087 A69-11149
- Molecular flow in space simulation chambers with cryowalls, noting nonuniform flux density distribution 01 p0057 A69-11153
- Cryopump design suitable for attachment as replacement for diffusion or ion pumps 01 p0088 A69-11155
- Book on vacuum system design covering getter ion pumping, cryogenic pumping, liquid nitrogen handling, residual gas analyzers, etc 07 p1180 A69-18549

Vacuum pumping methods for large space simulation chambers, discussing cryopumping, economic and operational considerations
13 p2241 A69-28078

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549]
16 p2845 A69-32759

Low pressure and background radiation conditions via cryogenically cooled surfaces, citing data on cryopumping under vacuum conditions for space simulation chambers
17 p3006 A69-33683

CRYOSORPTION
U **SORPTION**
CRYOSTATS

Helium cryostat designed to operate under overload and vibrations and used for cooling onboard superconducting devices of Cosmos 140 satellite
04 p0585 A69-15407

Onboard solid state neon cryostat for IR detector, noting resistance to missile vibration, acceleration and shock tests
06 p0906 A69-17103

Cryostat design, discussing vapor and radiation shielding, construction and insulation materials, safety features, cost considerations, etc
10 p1810 A69-24015

Gas bath cryostat to study volumetric properties of gaseous mixtures at low temperature and high pressure
17 p2975 A69-33669

Tensile cryostat for low temperature strain measurement, discussing design, insulation and vacuum sealed environment for heat leak reduction
[NAS-NRC PAPER J-3]
22 p3947 A69-40627

CRYOTRONS

Cryogenic applications including maser amplification, IR detection and superconductivity, discussing systems optimization and cost reduction
10 p1665 A69-24017

CRYSTAL DEFECTS
NT **EDGE DISLOCATIONS**
NT **FRENKEL DEFECTS**
NT **POINT DEFECTS**
NT **SCREW DISLOCATIONS**
NT **VACANCIES [CRYSTAL DEFECTS]**

Mechanical properties of lithium fluoride single crystals, taking into account equilibrium lattice defect structures
01 p0138 A69-10602

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
01 p0139 A69-10831

Electron irradiation induced damage in undoped GaSb single crystals at 77 K, noting dependence on energy and orientation
01 p0141 A69-11256

Acceptor defect levels in cadmium telluride crystals prepared under various cadmium vapor pressures, demonstrating ionization energy variation by electrical measurements
02 p0294 A69-11546

Stacking faults in Ge epitaxial layers revealed by etching reagents and X ray diffraction with photographic recording
02 p0297 A69-11880

CdSe single crystal dislocation loops and growth defects, using X ray topograms
02 p0298 A69-12048

Localized vibration modes of defects and IR absorption bands in compensated Si doped GaAs
02 p0299 A69-12402

Scanning electron beam display of space charge of defects and junction behavior of edge dislocation array in Ge and Si monocrystals
02 p0301 A69-12661

Temperature dependence of internal friction in molybdenum wire in moderate and high temperatures
03 p0446 A69-13576

Tellurium-doped gallium arsenides stacking-faults transmission electron microscopic study
03 p0486 A69-13614

Disordered chondritic pyroxenes, analyzing X ray patterns of meteoritic and synthetic crystals
03 p0516 A69-14083

Electrical properties of crystals relation to variations of electron or hole distributions, discussing inhomogeneities
04 p0641 A69-14506

Diffusion anomaly of native acceptor defect in zinc selenium telluride p-n junctions, discussing applica-

tions in triple diffusion technique of preparing p-n junction diodes
05 p0808 A69-16286

Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
05 p0809 A69-16529

Radiation defects stability in semiconductors, noting low temperature electron irradiation of Ge and effects of annealing
06 p0974 A69-16863

Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time
06 p0974 A69-16864

Disordered regions in electron irradiated silicon noting defect clusters concentration effect on electrical properties
06 p0974 A69-16866

Neutron irradiated Si transistors radiation and annealing characteristics determined for inverse configuration
06 p0975 A69-16872

Electron irradiation annealing and modification of 35 and 65 K defects in n-type Ge induced by 1 Mev electrons at low temperature
06 p0980 A69-17757

Hole concentration at deep energy levels in p-type indium antimonide single crystals containing structural defects
07 p1199 A69-18687

Lattice location of dopant elements implanted into Ge determined by carbon ion backscattering, noting substitutional concentrations above thermal equilibrium solubilities
07 p1199 A69-18903

Transient heat evolution response to reapplied stress of alloys plastically predeformed at 4.2 K attributed to thermally softened defect structures
07 p1165 A69-18906

Structural defects in annealed niobium crystals observed by optical microscopy, discussing etch pits
07 p1169 A69-19603

Failure mechanisms in semiconductors, discussing imperfections, fabrication errors and electrical, thermal and mechanical stresses
08 p1294 A69-21117

Li atoms and O interactions with electron radiation produced defects in Si studied by IR spectroscopy
09 p1554 A69-21337

Microimpurities in aluminum-yttrium garnets determined spectrographically by using gallium oxide as carrier and Teflon powder for fluorinator
10 p1747 A69-23843

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
11 p1936 A69-24698

Structural imperfections of CdSb single crystals undoped and doped with tellurium and indium noting etching techniques, grain boundaries and impurities
11 p1938 A69-25030

Optical investigation of defects in crystal lattices on stress induced birefringence basis, describing stress visualization results for Si and glass
11 p1887 A69-25199

Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation
11 p1906 A69-25685

Lattice defects in development of recombination centers on Ge semiconductor surfaces, discussing photoconductivity and field effect
12 p2142 A69-25978

Lattice defects in annealed and plastically deformed cobalt, showing increase with increasing martensite transformations
12 p2113 A69-26042

Collection of papers on crystal structure imperfections covering dislocation mobility, kinetic recrystallization and volume changes during phase transformation
12 p2142 A69-26452

Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics
13 p2316 A69-27221

CoO complex defects indicated by negative enthalpy of formation, considering isobaric electrical conductivity measurements at various temperatures and oxygen pressures
14 p2508 A69-29925

Finite scattering cross section in current carriers scattering on impurities in compensated semiconductors, assuming unscreened Coulomb potentials
15 p2666 A69-30063

Bound excitons spectra in Cu doped gallium arsenide crystals, analyzing line oscillation structure and uniaxial compression effect
16 p2824 A69-31571

Flux grown magnetic garnet crystal internal defects analyzed by etching and Lang X ray transmission topography, revealing tubular structural deviations
16 p2825 A69-31692

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed
16 p2825 A69-31708

Neutron bombardment and ionizing radiation resistance of aluminum oxide MOS devices using gate insulator fabricated by plasma anodization
17 p2935 A69-32888

Activation energy of annealing of lattice defects in Au films deposited under irradiation with Au ions
18 p3182 A69-34349

Collection of papers on defects and properties of crystalline lattice
18 p3159 A69-35447

Imperfection photoconductivity in electron irradiated Li-doped Si annealed at room temperature, noting level rearrangement in O rich material
19 p3382 A69-35696

Ti and V sesquioxides and TiO-VO solid solutions crystallography and defect chemistry over entire range of compositions
20 p3484 A69-37526

Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications
20 p3590 A69-37569

Impurities effect on domain structure of barium titanate single crystals grown from solution in KF melt determined by inner stresses
21 p3783 A69-39559

Structural defects of neutron irradiated W wire noting microstress relaxation using autoionico microscope
21 p3749 A69-39623

Doped silver carbonate defect structure and doping effect on reaction kinetics by X rays and electron paramagnetic resonance, finding new crystal structure
22 p3993 A69-40720

Seizing characteristics of metals using electrical resistance as measure of lattice imperfection density due to friction
22 p3957 A69-41111

Defect structure of ceramic Ba titanate doped with Cr ions, evaluating visible, IR and EPR spectra
22 p3996 A69-41160

IR inspection system for detecting interstitially caused alpha segregation in Ti alloy disks
24 p4318 A69-42757

Donor and acceptor impurity effect on absorption and reflection spectra of CdTe single crystals, analyzing In, Ga, S and Se
24 p4362 A69-43735

CRYSTAL DISLOCATIONS
NT **EDGE DISLOCATIONS**
NT **SCREW DISLOCATIONS**

Shear accommodation kinking at second order twin bands in critically deformed magnesium investigated for dislocation mechanism
01 p0093 A69-10063

Yield condition of polycrystalline hcp metal, considering slip characteristics of hcp crystals
01 p0094 A69-10304

Theory of fatigue crack growth crystal in metals in terms of coplanar dislocation arrays extended to oblique slip planes, discussing orientation
01 p0168 A69-10344

Elastic anisotropy and polycrystalline orientations in cold rolled titanium sheets investigated by Fourier series method, discussing Young modulus values
01 p0094 A69-10431

Motion, field momentum and field kinetic energy equations of concentrated dislocations based on Zorski field theory of defects
02 p0336 A69-11556

Diffusion process in dislocation-free doped and undoped GaAs single crystals
02 p0296 A69-11792

Lattice deformation relationship to dislocation density in vanadium carbide powders
02 p0265 A69-12001

CdSe single crystal dislocation loops and growth defects, using X ray topograms

02 p0298 A69-12048

Crystal dislocation motion in viscous media, discussing velocity stress behavior and measurements by etching and ultrasonic attenuation methods

02 p0343 A69-12285

Strain rate effect on dislocation substructure in deformed niobium single crystals, investigating relationship between mechanical properties and dislocation substructure

02 p0268 A69-12287

Dislocations effect on decomposition rates of solid solutions of InAs and Au, Ag or Cu

03 p0484 A69-13283

Electrical properties of edge and screw type dislocations in germanium, using bilateral microscopy

03 p0488 A69-13761

Model of creep in solids based on Markov process, discussing dislocation movement by means of thermal activation

03 p0529 A69-13942

Dislocation effects on intensity jumps near K edge of absorption, using interferential transmission of X rays in Ge

03 p0490 A69-13944

Impurity-dislocation interaction in Al alloy by vacancy mechanism and repeated yielding phenomenon, establishing activation energy

04 p0613 A69-14440

Internal friction temperature effects on amplitude dependence in niobium and molybdenum

04 p0614 A69-14635

Nimonic alloys high temperature annealing effect on dislocation structure stability created by thermochemical treatment, using transmission microscopy

04 p0615 A69-14636

Dislocation distributions in cold worked fcc, bcc and hcp metals, discussing dislocation structures in deformed single crystals and work hardening theories

05 p0778 A69-15754

Stress-strain rate relation under combined stress fields derived from Gilman relation between dislocation velocity and force for single dislocation

05 p0834 A69-15756

Course slip during cyclic deformation of copper single crystals, discussing strain bursts dependence on stress amplitude rate, unidirectional prestrain and orientation

05 p0779 A69-15905

Book on plastic deformation of metals in terms of dislocation theory covering single crystals, alloying solid solutions, aggregates, annealing, etc

05 p0841 A69-16369

Slip geometry in bcc metals, discussing slip-line observations by light and electron microscopy techniques

05 p0781 A69-16537

Metals study using field ion microscope for detecting dislocations, crystal boundaries and growth surfaces and surface diffusion energies

06 p0943 A69-17376

Unified methods based on dislocation theory for direct solution of problems pertaining to physical properties of metals

06 p0944 A69-17502

Growth induced dislocation effect on lifetime of minority charge carriers in silicon single crystals

06 p0980 A69-17551

Selective etching technique in study of dislocations in epitaxial layers of gallium arsenide

06 p0981 A69-17891

Dislocation redistribution during annealing and shock deformation in liquid nitrogen of chromium, molybdenum and tungsten single crystals

07 p1159 A69-18534

Grain boundaries structure in tungsten wire using auto ion microscope, showing misorientation corresponds to high density coincidence site lattices

08 p1329 A69-19943

Subgrain diameter relation to misorientation in melt-grown aluminum single crystals from etch pitting and X ray techniques, discussing critical shear stress

08 p1330 A69-20011

Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals

08 p1333 A69-20446

Dislocations effect on intermediate body centered tetragonal phase precipitation in Fe-Ni-Cr-Be alloy using transmission electron microscopy

08 p1333 A69-20447

Dislocation model of strength of elastically inhomogeneous crystalline materials based on elastic interactions between dislocations and periodic fluctuations of shear modulus

08 p1333 A69-20557

Dislocation damping measurements made on Fe-18Cr-Ni alloys, noting damping relation to nickel content and stacking fault

08 p1334 A69-20576

Dislocation channeling process in polycrystalline Nb subject to tensile deformation after neutron irradiation

09 p1521 A69-21345

Heat resistance preservation in heat resistant alloys by inhibiting dislocation motion during operation at high temperatures

09 p1525 A69-22141

Dislocations effect on magnetization process in YIG crystals, using polarization optical method

09 p1559 A69-22532

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids

10 p1796 A69-23067

Dislocation substructure near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy

10 p1797 A69-23079

Impurities effect on plastic flow stress and activation, volume as functions of strain, strain rate and temperature in molybdenum crystals

10 p1710 A69-23089

Continuum theory of dislocations and internal stresses in generalized Cosserat continuum as theoretical model for crystals

10 p1799 A69-23153

Continuum theory of dislocations and plasticity in crystals, analyzing stress fields in elastoplastic materials

10 p1799 A69-23154

Alkali halide single crystals disintegration by laser radiation differs as function of crystal physicochemical properties and band structure

10 p1745 A69-23322

Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects

10 p1747 A69-23713

Dislocations velocity in high purity aluminum single crystals determined as function of applied stress at 74 and 83 K

10 p1713 A69-23840

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

11 p1936 A69-24537

Etch pits behavior during diffusion and rediffusion of copper in low dislocation crystals of gallium arsenide, demonstrating vacancy nature

11 p1937 A69-25029

Dislocation structure and surface deformation markings correlation analyzed on fatigued Al electron microscope foils

11 p1905 A69-25184

Ni-Ti alloy intergranular deformation at constant tension within wide temperature range

12 p2113 A69-26044

Dislocation mobility temperature dependence in n-type indium antimonide, noting role of covalent interatomic bonds

12 p2143 A69-26453

Dislocations observations in fracture study of crystals, considering etching, decoration technique, X ray topography and diffraction electron microscopy

13 p2316 A69-27223

Molybdenum dislocation velocity and macrodeformation, noting thermal double kink mechanism inconsistencies and strain role in strain-rate relationship

13 p2276 A69-27392

Aluminum alloys ductile fatigue striations, considering dependence on grains crystallographic orientation and vacuum effect

13 p2278 A69-27415

Beryllium single crystals c axis compression behavior at three purity levels under hydrostatic pressures

13 p2279 A69-27760

N-type InSb single crystals with high dislocation density, investigating anisotropy of mobility, Hall effect and transverse and longitudinal magnetoresistance

14 p2503 A69-28734

Book on defects and radiation damage in metals covering collision cascades, point defects clustering and impurities behavior

14 p2503 A69-28889

Dislocation pattern in thin Mo foils deformed by hydroextrusion observed by transmission electron microscope

14 p2463 A69-29311

Beta Ti alloy initial state effect on mechanical properties and dislocation structure after cold deformation by rolling

14 p2463 A69-29313

Dislocations effect on carrier mobility and concentration in p-type and n-type InSb crystals

14 p2507 A69-29646

Diffuse Zn layers structure in GaAs single crystals, showing dislocations formation by anomalous Zn diffusion

15 p2670 A69-31048

X ray detectable preferred disorder in solids by shock loading studied in Ainsworth meteorite and in hexagonal alpha silicon dioxide

15 p2671 A69-31538

Polyethylene stainless steel lap joints and polyethylene samples yield strengths measurements at high temperature, suggesting yield mechanism based on dislocation loops

16 p2794 A69-32573

Low temperature creep mechanisms, discussing thermal activation of dislocation slip in perfect crystals

17 p2985 A69-32909

Shear stress theory of fatigue failure of ductile materials based on crystallographic orientation and probability of slip of neighboring crystals

18 p3211 A69-34344

Dislocation structure of pure polycrystalline nickel subjected to high temperature creep, using electron microscopy following cold working and room temperature annealing

18 p3157 A69-35254

Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory

18 p3160 A69-35452

Annealed Cr structural changes during creep at 900 C in air, discussing crystalline disorientation X ray studies and stress

18 p3160 A69-35453

Stoichiometric NiAl slip line and dislocation structures during creep at high temperatures, considering possible creep mechanisms

19 p3343 A69-35923

Fe crystals dislocations dynamic behavior during plastic flow development, describing stress and temperature effects on dislocations propagation and interactions

21 p3833 A69-38569

Energy levels of multicharge acceptor centers and level splitting in InSb and GaAs deformed crystals, using multizone approximation

21 p3781 A69-39067

Dislocations multiplication and rearrangement structure in thermal fatigue of Mo single crystals produced by electron beam zone melting

21 p3746 A69-39162

Dislocation structures in Nb-Ti alloys formed after annealing

21 p3747 A69-39163

Single crystals dislocation dynamics and plasticity theory, discussing current tensor, conservation equation, slip systems, etc

21 p3845 A69-39676

Al discontinuous deformation noting role of intergranular boundary surface at low temperatures

21 p3750 A69-39789

Dislocation structure of Al, Ni, Cu and Ag during creep, noting dependence of creep rate on stacking-fault energy

22 p3972 A69-41080

Hafnium microstructure and impurity concentrations before and after electron beam melting

23 p4178 A69-42361

Mechanical properties and dislocation configurations and densities of Nb single crystals measured at various strain rates

24 p4332 A69-43030

CRYSTAL FILTERS

Narrow band LC 70 MHz IF filter design method

12 p2036 A69-25915

Elastic microwaves propagation attenuation along lithium niobate crystals trigonal axis at various temperatures

15 p2665 A69-30040

CRYSTAL GROWTH

NT CZOCHRALSKI METHOD

NT EPITAXY

NT HYDROTHERMAL CRYSTAL GROWTH

Electric field control of growth rates of insulating organic crystals from vapor phase

01 p0135 A69-10140

Acceptor defect levels in cadmium telluride crystals prepared under various cadmium vapor pressures, demonstrating ionization energy variation by electrical measurements

02 p0294 A69-11546

Injection laser emission from gallium arsenide base films grown epitaxially from gas phase in moist hydrogen atmosphere

02 p0255 A69-11879

Stacking faults in Ge epitaxial layers revealed by etching reagents and X ray diffraction with photographic recording

02 p0297 A69-11880

Thallium whisker growth /compression or squeeze/ method

04 p0641 A69-14457

Molybdenum oxide crystals growth and microstructure, using X ray and electron diffraction analyses

05 p0779 A69-15831

Metals study using field ion microscope for detecting dislocations, crystal boundaries and growth surfaces and surface diffusion energies

06 p0943 A69-17376

Growth induced dislocation effect on lifetime of minority charge carriers in silicon single crystals

06 p0980 A69-17551

Anomalous size effects in galvanomagnetic properties of zinc crystal samples caused by compensation

06 p0981 A69-18232

Polycrystalline W steady state creep rate at high temperatures noting effects of stress, grain size and subgrain size

07 p1158 A69-18241

Solution regrowth method to prepare epitaxial GaAs for Gunn effect devices

07 p1197 A69-18451

Controlled solidification in Co-Ta-C system to develop pseudobinary eutectic mixture containing TaC crystals aligned parallel to growth direction [ONERA-TP-673]

07 p1167 A69-19339

Crystal growth and deformation induced recrystallization in pure aluminum

[ONERA-TP-671] 07 p1167 A69-19340

Epitaxially grown guard rings for GaAs p-n junction and Schottky barrier avalanche diodes

08 p1284 A69-20368

Whiskerizing technique for growing small beta SiC single crystals on graphite filament surfaces, noting changes in interface geometry and chemistry

08 p1341 A69-20511

Chemical processes in silicon carbide due to reactive deposition and chemical conversion, noting silicon growth mechanism involving outward diffusion

09 p1554 A69-21351

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility

09 p1557 A69-21737

Surface characterization on chemical vapor deposited tungsten, evaluating grain size effect

09 p1558 A69-21810

Lead sulfide single crystals and polycrystalline films grown studied by electron microscopy during vacuum deposition on NaCl and other substrates

10 p1743 A69-23002

PbTe single crystal films growth on KCl studied by electron microscope, observing vapor crystal mechanism without coalescence of contacting crystals

10 p1745 A69-23323

Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions

10 p1652 A69-23371

Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays

11 p1903 A69-24538

Surface-active additives effect on crystallization kinetics of silicate glasses, discussing surface tension

11 p1907 A69-25032

Thermodynamic method for determination of conditions for CdS single crystal synthesis from gas phase, analyzing equilibrium between solid and gas phases

12 p2144 A69-26585

GaAs crystallization for various deviations of melt from stoichiometric state, noting concentration supercooling at phase boundary layer

12 p2144 A69-26586

Yttrium garnet ferrite crystals grown by Czochralski method from inductor crucible exhibiting orthoferrite, iron garnet and eutectic phases along height

13 p2321 A69-28001

Ga phosphide p-n junctions formation from GaP- Ga solution, discussing electrical and luminescence properties

13 p2323 A69-28642

Tungsten emitting surfaces work functions, discussing dense crystalline planes electrolytic or pyrolytic deposit growth and surface chemical or electrolytic attack

14 p2506 A69-29268

Growth kinetics, lattice constant changes and hardness during aging of nimonic alloy from X ray diffraction diagrams

14 p2463 A69-29310

Nonuniform electrical resistivity distribution in InSb single crystals as function of growth direction

15 p2670 A69-31049

Flux grown magnetic garnet crystal internal defects analyzed by etching and Lang X ray transmission topography, revealing tubular structural deviations

16 p2825 A69-31692

Alpha alumina whiskers grown by vapor reaction examined by X ray microtopography and etching

16 p2802 A69-32341

Ta single crystal growth condition by zone melting, discussing orientation and purity relationship

16 p2803 A69-32490

Manufacturing in space based on nongravity and hard vacuum environment, considering crystal growth and refinement, perfectly shaped bodies, refractory metals ultrapurification, etc

18 p3234 A69-35066

Recrystallization limit effects on coarse grain growth in aluminum alloys extruded sections, studying roles of additives, extruding temperature and heat treatment duration

18 p3160 A69-35472

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility

20 p3584 A69-38215

Abnormal grain growth during secondary recrystallization of hydraulically extruded molybdenum as function of annealing

21 p3745 A69-38953

Fe whiskers formation and cross section determination by Fe dichloride reduction

22 p3919 A69-40233

Pyroxene crystallization in meteoritic chondrules, noting normal spherulite crystallization

22 p4033 A69-41065

Selenium distribution along GaSb single crystals during oriented crystallization determined by radiometry

23 p4198 A69-41725

Optimal CdS single crystals growth from gaseous phase achieved with 2 to 1 ratio between Cd and S concentration

23 p4199 A69-42468

Temperature gradients effects on GaAs crystals grown by Bridgman method

23 p4199 A69-42469

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites

24 p4361 A69-42993

CRYSTAL LATTICES

NT BODY CENTERED CUBIC LATTICES

NT CLOSE PACKED LATTICES

NT CUBIC LATTICES

NT FACE CENTERED CUBIC LATTICES

Hydrogen content effect on relaxation spectrum of alpha titanium, using nondestructive tests

01 p0096 A69-10614

Two dimensional structural model of micropolar continuum involving orientable points joined by extensible and flexible rods

01 p0169 A69-10810

Energy function invariants for cubic and hexagonal systems of anisotropic media with coupled stresses

01 p0169 A69-10811

Resonance energy transfer mechanism in Forster-Dexter theory of electron energy transfer by resonance interaction in condensed media, using many particle treatment

01 p0121 A69-11257

Current carrier mobility in GaTe and tin selenide semiconducting stratified lattices, noting interaction of free carriers and polarized nonpolar phonons

02 p0295 A69-11777

Temperature dependence of A and C periods of Y crystal lattice at 77 to 300 K, discussing preparation of Y films and anomalous thermal expansion

02 p0298 A69-12047

Elastic constants of point defects for bcc and fcc crystals with vacancies and interstitials calculated by Born-Huang method for nonprimitive lattices

02 p0267 A69-12186

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations

03 p0491 A69-14054

Displacement correlations and frequency spectra for mass disordered lattices, deriving cluster expansion for phonon Green function

03 p0493 A69-14241

Spectral study of crystal lattice of gallium phosphides for influence of vacancies and impurities on band formation

04 p0643 A69-15258

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon

04 p0619 A69-15392

Multiphonon orbit lattice relaxation of excited states of rare earth ions in crystals, using results to design quantum electronic devices [IEEE PAPER I-9]

05 p0774 A69-16318

P-n junctions and device structures formed by ion implantation, using Hall effect and channelling techniques to evaluate implanted layer nature

06 p0974 A69-16862

Mechanical equilibrium and stability conditions for system of interacting atoms in crystal structure

06 p0944 A69-17504

Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects

07 p1166 A69-19144

Ionic and nonionic mineral oxide powder fillers influence on stereopolymers lattices formed from phenolformaldehyde oligomers, discussing mechanical properties

08 p1335 A69-20331

Boron crystalline modification during transit through induction coupled Ar plasma producing better crystallized spheroids

08 p1372 A69-20687

Crystal lattice and orientation of precipitate responsible for hardening water quenched Ni-Cr-Nb alloy

08 p1334 A69-20852

Insertion-loss synthesis of narrow band crystal band-elimination filters, using narrow band approximation and pseudoreactance theory

08 p1300 A69-21173

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence

08 p1374 A69-21186

Ductile to brittle transition shown in tensile stress-strain curves of polycrystalline body centered cubic and hexagonal close packed materials

10 p1795 A69-23063

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids

10 p1796 A69-23067

Surface atomic structure effects on polar faces in InSb semiconductor crystal established from measurements of contact potential difference by dynamic capacitor

10 p1747 A69-23965

Diffusion constant of Ni in Ti alloys with Al, Mo and Nb, considering beta phase

11 p1902 A69-24274

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for intermetallic compounds, noting structure transformation and homogeneity

11 p1903 A69-24574

Order-disorder in alloys with several phase transition temperatures, discussing crystal lattices, interstitial alloys, atomic and magnetic ordering

11 p1936 A69-24702

Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys

11 p1904 A69-24705

Order-disorder transformations in nickel alloys under loading operations

11 p1904 A69-24706

Optical investigation of defects in crystal lattices on stress induced birefringence basis, describing stress visualization results for Si and glass

11 p1887 A69-25199

Silicon resistance strain gage sensitivity dependence on crystallographic orientation following cut-off from single crystal

11 p1887 A69-25209

- Quenched titanium-niobium alloy structure effect on superconductivity properties, using electron microscope and X rays
12 p2112 A69-26040
- Book on defects and radiation damage in metals covering collision cascades, point defects clustering and impurities behavior
14 p2503 A69-28889
- Gas-surface interaction for trapping and energy exchange, comparing continuum and discrete lattice models for solids
14 p2409 A69-29092
- Electronegativity and work function relationship from thermodynamic and quantum mechanics standpoint, describing electrons structure by spin orbitals localized around lattice sites
14 p2505 A69-29263
- Growth kinetics, lattice constant changes and hardness during aging of nimonic alloy from X ray diffraction diagrams
14 p2463 A69-29310
- Crystal structures of Ni-rich rare earth/Ni phases, including high temperature forms
15 p2637 A69-30213
- Atomic size and outer electron effect on Fe, Co and Mn polymorphism, noting change in crystal lattices
15 p2638 A69-30321
- Monograph on vanadium selenides and tellurides with NiAs structure covering existence regions, superstructures and equiatomic compounds from viewpoint of thermodynamics
15 p2667 A69-30602
- Structural formula of slowly cooled Mg and Al-Mg microwave ferrites, noting ion mobility during cooling
15 p2670 A69-31184
- CR-B binary system phase diagram including lattice parameters, temperature of peritectic decomposition and characteristics of alloys
15 p2641 A69-31185
- Lattice components of heat conductivity and chemical composition relations of magnesium alloy solid solutions
16 p2824 A69-31567
- Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing electron component of conductivity with strong transverse magnetic field
16 p2824 A69-31568
- Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon
18 p3156 A69-35020
- Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
18 p3182 A69-35047
- Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence
18 p3183 A69-35155
- Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247
- Chromium ternary systems phase diagrams and crystallographic structures, using heat treatment and X ray analysis
18 p3158 A69-35262
- Collection of papers on defects and properties of crystalline lattice
18 p3159 A69-35447
- ### CRYSTAL OPTICS
- Frequency mixing of IR signals with visible laser light in nonlinear crystals to detect IR signals
01 p0089 A69-10180
- Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients
02 p0295 A69-11779
- Polarized low temperature laser excited Raman spectra of thulium gallium garnet
02 p0256 A69-11925
- Q switched neodymium-glass laser output conversion into second optical harmonic by passing beam through double Galilean telescope with adjustable focus
03 p0438 A69-13048
- Direct amplification of ultra and hypersonic surface waves in semiconducting crystals of wurtzite group, taking into account drift effects and boundary conditions
03 p0490 A69-13925
- Resonant interaction of radiation from liquid nitrogen cooled ruby laser with ruby crystal in temperature range 4.2-100 K
04 p0611 A69-14439
- Second harmonic generation in laser crystals by Gaussian beams of finite aperture
07 p1158 A69-19756
- Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions
11 p1894 A69-24618
- Nondestructive thermal tests using liquid crystals thermal sensitivity for measurement of temperature changes and visualization of temperature gradients
11 p1892 A69-25293
- Ruby crystal optical homogeneity and relation to main laser emission characteristics, discussing optical and structural surface properties
12 p2106 A69-26322 [IEEE PAPER U-7]
- Laser-nonlinear crystal dynamical interactions, studying saturation and coherence properties of second harmonic wave generated inside laser cavity
15 p2632 A69-30026
- Electrical conductivity and optical spectra changes of strontium titanate single crystals under constant electric field action
15 p2666 A69-30043
- Parametric conversion kinetics of monochromatic light waves in nonlinear crystals, using quantized electromagnetic field to study amplification and generation
19 p3332 A69-35870
- Tau-luminescence in thin gamma-colored and uncolored ruby crystals containing Cr ions measured, discussing ions absorption spectrum changes
19 p3335 A69-36166
- ### CRYSTAL OSCILLATORS
- Dynamic characteristics of temperature control systems using crystal oscillators determined by nonlinear automatic control theory
22 p3869 A69-40254
- Space simulation tests of satellite-borne quartz crystal oscillators for tracking based on Doppler effect
22 p3927 A69-40590
- ### CRYSTAL RECTIFIERS
- Current voltage characteristics in silicon carbide diodes having negative differential resistance
10 p1663 A69-23571
- Optical rectification in crystals by excitation of nonlinear /time constant and space variable/ polarization
23 p4174 A69-41874
- ### CRYSTAL STRUCTURE
- #### NT WIDMANSTATTEN STRUCTURE
- High temperature magnetic analysis of metallurgical structure of high strength steels and composites, including phase transformation and matrix grain structure
01 p0093 A69-10111
- Cycle dependent fatigue hardening and softening of metals in terms of crystal structure and stress amplitude
01 p0165 A69-10133
- Soviet book on semiconductor compounds, production and properties covering crystal structures, phase diagrams, etc
01 p0137 A69-10353
- Crystal and molecular structure of mu-oxo-bis(chlorobis(2, 4-pentanedionato)/titanium(IV)/-chloroform solved by symbolic sign determination method and Patterson map interpretation
01 p0023 A69-10411
- Highly oriented graphite crystallites in pyrographites and composite materials, discussing preparation and anisotropy ratios in physical properties
01 p0102 A69-10978
- Soviet book on structure of thin metal films covering electron microscopic and electronographic studies, crystallization and heat treatment effects
01 p0140 A69-11106
- Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use
02 p0295 A69-11786
- Electronographic determination of ternary alloys of germanium antimony tellurides noting hexagonal laminary with cell periods
02 p0298 A69-12046
- Neutron and gamma irradiation effects on CdS crystals structure and properties, outlining electron energy level scheme
02 p0298 A69-12119
- Crystal structure of boron filaments vapor deposited on tungsten wire substrate, using X ray diffraction and transmission-electron microscopy
02 p0268 A69-12405
- Crystals and molecules diffraction in superconductive molecular jets
02 p0284 A69-12629
- Structure of /111/ single crystal Si surface after chemical-mechanical polishing and ultrahigh vacuum annealing, noting presence of Fe impurity
02 p0301 A69-12660
- Vanadium-gallide alloys critical temperature of transition into superconducting state determined by measuring cast alloy samples magnetic permeability
03 p0483 A69-13023
- Ferroelectric domain structure to explain microcracks nucleated at twinband intersections in mechanically deformed lithium niobate
03 p0486 A69-13618
- Thermodynamic analysis of refractory compounds vapor transport conditions, illustrating integral free energy diagrams
03 p0453 A69-13619
- Transitional hexagonal omega phase of Ti-Fe alloys quenched in water and tempered
03 p0451 A69-13999
- Molybdenum oxide crystals growth and microstructure, using X ray and electron diffraction analyses
05 p0779 A69-15831
- Room temperature lattice spacings of PdIn, PtIn and PtSn alloys including magnetic susceptibility
05 p0779 A69-15832
- Electron microscopy of titanium alloys noting preparation, heat treatment of samples, crystallographic structure, etc
05 p0782 A69-16807
- Structural characteristics of Ni-Mo alloys analyzed using electron microscopy and X ray diffusion scattering
05 p0782 A69-16808
- Transmission electron microscopy used to study phase transformations in Ti-Mo and Ti-V alloys, determining crystal structures
06 p0943 A69-17230
- Mechanical equilibrium and stability conditions for system of interacting atoms in crystal structure
06 p0944 A69-17504
- Optical Fourier transform applied to structural analysis of catalase crystalline media by gas laser
06 p0928 A69-17890
- Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness
06 p0981 A69-17892
- Dependence of microwave emission from n-InSb on crystalline orientations, noting anisotropy in case of rotation in perpendicular plane
07 p1198 A69-18647
- Trivalent iron doped andalusite crystals dielectric and mass properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio [IEEE PAPER C-2]
07 p1150 A69-19049
- Breakdown regularity of metals having different crystal structure, considering metal lifetime dependence on stress magnitude and test temperature
08 p1328 A69-19793
- Magnesium silicate crystal structure, discussing transformations under high pressure, crystallochemistry and implications for physics of earth mantle
08 p1267 A69-19904
- Nodal precipitation and cellular solidification substructure in commercial purity nickel, discussing supercooling, NiO and eutectic composition
08 p1332 A69-20289
- Vapor deposited tellurium thin films orientation, noting effect of characteristic spiral chain structure along c-axis
08 p1373 A69-20891
- Structural and optical properties of vacuum deposited GaP films at below 240-850 C
09 p1554 A69-21332
- Partial pole figures in vapor deposited and wrought cylindrical tungsten specimens, noting random surface produced by orientation
09 0 A69-21811
- Metals structure and mechanical properties after hydroexplosive forming analyzed by X ray diffraction
09 p1503 A69-21851
- Face effect in p- and n-type gallium antimonide single crystals doped with zinc and tellurium
09 p1558 A69-21870
- Primary silicon crystals content and grain size effect on wear of high silicon aluminum alloys
09 p1526 A69-22281
- Amorphous semiconductors, emphasizing structure and theory of liquid and amorphous states, electron energy spectra and scattering, impurities, Hall effect, etc
10 p1747 A69-23807

Carbide precipitation in stainless steels using metal foil and extraction replicas, discussing grain boundaries corrosion relation
10 p1713 A69-23820

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra
10 p1747 A69-23963

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition
10 p1714 A69-23964

Structural inhomogeneity of Ti alloys cause increased susceptibility to production of sheets, forgings and drop forgings
11 p1902 A69-24276

Thin polycrystalline film structure and formation, using electron beam instrument
11 p1936 A69-24601

Surface-active additives effect on crystallization kinetics of sital type glasses, discussing surface tension
11 p1907 A69-25032

Structure of epitaxial single crystal layers of CdS vacuum deposited on mica surface at various temperatures
11 p1939 A69-25709

Vapor phase epitaxial production of indium arsenic phosphide crystalline layers, discussing electron mobilities, electrical resistivities and doping
12 p2142 A69-25934

Ti-Nb alloy structure in heat treatment states analyzed by diffuse scattering of X ray lines and by electron microscope
12 p2112 A69-26036

Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions
12 p2113 A69-26041

Collection of papers on crystal structure imperfections covering dislocation mobility, kinetic recrystallization and volume changes during phase transformation
12 p2142 A69-26452

Magnetic domain structure in supercritical ferromagnetic films with perpendicular anisotropy
12 p2143 A69-26458

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation
12 p2114 A69-26469

Mixed state of type 2 superconductors, stressing alloying elements effects in solid solution and structural inhomogeneities
12 p2145 A69-27119

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes
13 p2276 A69-27402

Composition, gamma structure and mechanical properties of three unidirectionally solidified eutectics within Ni-Al-Cb, Ni-Al-Zr and Ni-Al-Ti systems
13 p2277 A69-27407

Precipitation influence on martensite formation kinetics and structure of Fe-Ni-Ti alloys
13 p2279 A69-27765

Grain size effect on room temperature tensile strength of alpha-titanium analyzed by tensile testing and electron transmission
13 p2280 A69-27766

Artificial aging effect on spinel structure and properties of ferrites using X ray analysis, neutron diffraction and electron microscopy
13 p2320 A69-27997

Transition zone structure and phase composition in Ti/stainless steel bimetal as function of rolling conditions and heat treatment
13 p2283 A69-28490

Magnetic properties of ferrites with garnet structure, discussing temperature effect on magnetic states of Gd, Li, Y and Lu sublattices
13 p2323 A69-28564

Microstresses and distortions in quasi-isotropic solid bodies under strain evaluated by correlation functions
14 p2531 A69-28806

Graphites wear rates and structural changes in machine parts under dynamic stresses in air or vacuum, noting pressure role
14 p2467 A69-28912

Micrographic reagent coloring grains of Mo in relation to crystalline orientation applied to refractory metal welding and diffusion studies
14 p2505 A69-29221

Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys
14 p2465 A69-29749

Crystal structures of intermediate phases in La-Co and Nd-Co systems by powder X ray diffraction technique
15 p2667 A69-30087

Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures
15 p2639 A69-30586

Ta single crystal growth condition by zone melting, discussing orientation and purity relationship
16 p2803 A69-32490

Carbon fibers fine structure graphitized at high temperatures studied by X ray diffraction and electron microscopy
16 p2803 A69-32572

Andalusite crystals as active media in paramagnetic quantum amplifiers, discussing design and performance
19 p3333 A69-35881

Fourth rank tensors analysis describing nonlinear optical effects for 32 classes of crystalline substances
19 p3334 A69-35882

Fast neutron irradiation effect in Ge crystals, using X ray diffraction and volumetric measurements
20 p3584 A69-38125

In-Te-Se system alloys structure and semiconductor properties analyzed by X rays
21 p3779 A69-38579

Impurities effect on domain structure of barium titanate single crystals grown from solution in KF melt determined by inner stresses
21 p3783 A69-39559

Structural changes in Mo single crystal under action of laser radiation of various power densities
21 p3750 A69-39842

Lamellar solids abrasiveness, effects of particle share in graphite and molybdenite samples
22 p3966 A69-39877

Photovoltaic cells electrical characteristics, discussing Cd sulfide, single crystal Si and dendritic type Si cells for spacecraft power
22 p3868 A69-40130

Doped silver carbonate defect structure and doping effect on reaction kinetics by X rays and electron paramagnetic resonance, finding new crystal structure
22 p3993 A69-40720

Aqueous hydrazine solution effect on Ti disulfide crystalline structure
23 p4112 A69-41426

Ingot dendrite arm spacing and thermomechanical treatment effects on fracture behavior and mechanical properties of Al alloy, finding ultimate and yield strengths
23 p4176 A69-41506

Ni-Nb alloys precipitates tetragonal structure as function of time and temperature using electron and X ray diffraction
24 p4331 A69-42903

Structural features and electrical resistivity of siliconated pyrolytic graphite, analyzing dependence on preparation conditions using X ray diffraction measurements
24 p4335 A69-42926

CRYSTAL SURFACES

Structure of /111/ single crystal Si surface after chemical-mechanical polishing and ultrahigh vacuum annealing, noting presence of Fe impurity
02 p0301 A69-12660

Photocurrent pinch-off effect in high resistivity thin CdS crystals for evaluating donors, acceptors and surface states
03 p0488 A69-13757

Orientation dependence of pitting and blistering in proton irradiated Al polycrystal surfaces
04 p0640 A69-14451

Grain strain measurements use in studies of high temperature creep
06 p0943 A69-17231

Chemisorption of H onto Nb /110/ surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces
06 p0980 A69-17758

Thermal faceting of tungsten single crystal surfaces in oxygen, using vibrating-capacitor work function probe with low energy electron diffraction
08 p1330 A69-20137

Interaction of nitrogen oxides and carbon dioxide on nickel crystal surface using low energy electron diffraction and mass spectrometer, discussing work function
08 p1268 A69-20138

Relative free energies of crystal zones of tungsten using field electron microscope, determining surface energy anisotropy from Wulff construction
08 p1330 A69-20139

Work function change of tungsten single crystal /100/ surface measured as time function during surface molecular gas adsorption
09 p1521 A69-21338

Temperature effect on work function minimum of cesiated tungsten single and polycrystal surfaces, using vibrating capacitor technique
09 p1558 A69-21809

Sr and La ionization on crystal surfaces of W and polycrystalline W, discussing temperature effect on oxidation and work function
12 p2142 A69-26113

Substructural patterns of epitaxial PbTe films obtained by condensation of vaporized PbTe on NaCl crystal surfaces, discussing formation kinetics and morphology
12 p2144 A69-26675

Electrooptical ADP modulator design for use with helium-neon laser, considering temperature stability and crystal faces parallelism
13 p2272 A69-28191

Substrates ultraclean surface preparation methods, examining crystal cleaving and crushing, heating, chemical cleaning, ion bombardment, etc
14 p2455 A69-29348

Field emission and field-ion microscopic adsorption studies, discerning major states in chemisorption for metal-crystal surfaces
22 p3895 A69-39898

CRYSTALLINITY

Amorphous semiconductors, emphasizing structure and theory of liquid and amorphous states, electron energy spectra and scattering, impurities, Hall effect, etc
10 p1747 A69-23807

Electrons conduction and switching in noncrystalline semiconductors, discussing localized states and thermally activated hopping
11 p1933 A69-25239

Heat conduction orientation anisotropy in linear amorphous high polymers due to uniaxial stretching, noting molecular weight distribution and temperature effects
19 p3359 A69-36443

Energy spectrum and transport mechanism for current carriers in amorphous-crystalline semiconductors, measuring thermostimulated conductivity, induced photoconductivity, optical quenching, etc
19 p3391 A69-36558

Amorphous semiconductors based on noncrystalline materials compared to crystalline materials, noting radiation damage resistance
19 p3392 A69-36660

CRYSTALLITES

U SPHERULITES

CRYSTALLIZATION

NT RECRYSTALLIZATION

Phase diagram of BiTel degenerate semiconductor crystals synthesized by heat treatment, discussing crystallization methods and physical properties
02 p0294 A69-11540

InAs-InP phase diagram taking into account equilibrium pressure of vapor over melts in preparing single crystals by controlled crystallization
03 p0483 A69-13024

Al/Zn/Mg alloys preprecipitation, discussing Guinier-Preston and critical zone sizes and reversible vacancy trap
03 p0447 A69-13613

Monograph on crystallization during polymerization, discussing categories, monomers capable of step reaction, chain reaction, nucleation crystal growth and perfection
05 p0783 A69-15967

Boron crystalline modification during transit through induction coupled Ar plasma producing better crystallized spheroids
08 p1372 A69-20687

GaAs crystallization for various deviations of melt from stoichiometric state, noting concentration supercooling at phase boundary layer
12 p2144 A69-26586

Macrostructure of steel, zinc and aluminum ingots using electromagnetic vibrations during crystallization, for stress relieving of welded structures
14 p2456 A69-29916

Monograph on GaAs injection laser electrical and optical properties during crystallization out of solution covering principle, p-n junction fabrication, I-V characteristics, doping effect, etc
17 p2982 A69-33571

Superdense stars torsional oscillations and crystallization among nuclei from comparison with melting temperature and transverse shear wave velocities of dense conventional matter

17 p3037 A69-33643

Barringerite as Fe-Ni phosphide occurring in meteorite Ollague pallasite, indicating troilite and schreibersite crystallization at high temperatures

18 p3205 A69-35433

Crystallization front topography and stratified structure of melt extracted n-type GaAs single crystals from anodic etching method

20 p3582 A69-37013

Selenium distribution along GaSb single crystals during oriented crystallization determined by radiometry

23 p4198 A69-41725

CRYSTALLOGRAPHY

Microfactors of metal surface cracks studied for plastic deformation and atomic separation mechanisms by electron diffraction

01 p0098 A69-10763

Highly oriented graphite crystallites in pyrographites and composite materials, discussing preparation and anisotropy ratios in physical properties

01 p0102 A69-10978

Elastic constants of point defects for bcc and fcc crystals with vacancies and interstitials calculated by Born-Huang method for nonprimitive lattices

02 p0267 A69-12186

Electromagnetic wave dispersion and damping in mixed molecular crystal, relating refractivity, wave absorption and concentration shift of bottom of excitation band to other parameters

03 p0484 A69-13279

Heavy titanium carbide precipitation on fatigue slip zones of stainless steel, noting rupture produced crystallographic facets

03 p0447 A69-13605

Metals study using field ion microscope for detecting dislocations, crystal boundaries and growth surfaces and surface diffusion energies

06 p0943 A69-17376

Widmanstätten angles relation to orientation of plane of section in iron meteorites

07 p1217 A69-19235

Grain morphology and preferred orientation effects on direction and propagation of stress corrosion cracking of aluminum alloy plate

09 p1521 A69-21399

Polarized light microscope for application to metallic crystallographic studies noting grain orientation, hcp grain basal pole orientation and etched fcc metals

09 p1499 A69-22302

Microstructure and crystallography of lamellar eutectic alloy of Ni and intermetallic Ni-Ti compound

10 p1707 A69-22986

Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays

11 p1903 A69-24538

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals at temperature range measured by ferromagnetic resonance techniques

12 p2144 A69-26721

Martensite transformation in Ti-Cr binary alloys by thin foil electron microscopy, noting crystallographic theory

13 p2276 A69-27369

Strain hardening experiments on single crystals of AlZn and AlAg alloys noting plastic behavior

16 p2800 A69-31776

Book on high purity beryllium metallurgy for nuclear reactor applications covering physical properties, crystallography, thermodynamics, production methods, etc

17 p2986 A69-32952

Titanium alloy martensites crystallography by electron microscope, discussing lattice parameters and spontaneous transformation

18 p3154 A69-34245

Fracture kinetics of biaxial oriented polymethyl methacrylate, discussing crack development and propagation as compared to unoriented polymer

18 p3162 A69-35354

Ti and V sesquioxides and TiO-VO solid solutions crystallography and defect chemistry over entire range of compositions

20 p3484 A69-37526

Crystallographic relations between mother gamma phase and bulk martensitic structure of Fe-Ni alloys with less than 20 percent Ni, using radioisotopes

20 p3562 A69-37781

Biocrystallography of organic form and structure emphasizing liquid crystals, polymers, epitaxy, inclu-

sion compounds, electrical properties, prelife compounds, etc

21 p3656 A69-38922

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals measured by ferromagnetic resonance techniques

21 p3781 A69-39134

High temperature single crystal X ray studies of natural Fe-rich orthopyroxene, detecting high-low clinopyroxene inversions

24 p4311 A69-43218

CRYSTALS

NT BICRYSTALS

NT CRYSTAL OSCILLATORS

NT DENDRITIC CRYSTALS

NT IONIC CRYSTALS

NT LIQUID CRYSTALS

NT METAL CRYSTALS

NT PIEZOELECTRIC CRYSTALS

NT POLYCRYSTALS

NT SINGLE CRYSTALS

NT SPHERULITES

NT WHISKERS [SINGLE CRYSTALS]

Sustained high deceleration load effects on quartz crystals during atmospheric entry studied by centrifuge test program on oscillator circuits

01 p0042 A69-10417

Voltage controlled oscillator with fixed frequency crystal oscillator, noting double mixing scheme and rejection of all discrete sidebands

01 p0042 A69-10418

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

04 p0612 A69-15375

Laser radiation influence on effectiveness of frequency doubling in KDP crystal

16 p2797 A69-32122

Analogy between Cerenkov and quasi-Cerenkov radiation in nonlinear crystal by intense laser light used to determine conditions for quasi-Cerenkov radiation

21 p3741 A69-39669

CSM

U COMMAND SERVICE MODULES

CUBIC EQUATIONS

Ultrasonic phase approximation in nonlinear symmetric free oscillations applied to systems with hardening and softening cubic nonlinearities

01 p0107 A69-11418

Resonant oscillations amplitude of nonlinearly elastic hinged cylindrical shell determined with cubic equation taking into account Hooke law, linear stresses, shell theory displacements, etc

19 p3435 A69-35843

CUBIC LATTICES

NT BODY CENTERED CUBIC LATTICES

NT FACE CENTERED CUBIC LATTICES

Energy function invariants for cubic and hexagonal systems of anisotropic media with coupled stresses

01 p0169 A69-10811

Cubic β /silicon carbide films deposition by volatilization in presence of acetylene

09 p1554 A69-21350

Optical pumping in pure Si at 77 K, noting dichroism conditions for dipolar electric transitions in cubic crystal

19 p3389 A69-36548

CULTIVATION

Cultured Chinese hamster cells responses to UV light of different wavelengths indicating photon absorbing molecules inhibition of colony development

07 p1068 A69-19492

CULTURE TECHNIQUES

Biological life support system based on continuous algae seaweed cultivation as link of closed ecological system, discussing design and performance

01 p0020 A69-11077

Cell and tissue cultivation outside living organisms, discussing applications in space biology, space medicine and food protein sources

02 p0198 A69-11501

Mineralized human wastes solutions utilization for Chlorella cultivation, noting growth rates

02 p0200 A69-11511

Escherichia coli detection and differentiation from other bacteria by direct gas chromatographic analysis of culture media

03 p0382 A69-13550

Microbial contaminants on space hardware, discussing detection and enumeration techniques

05 p0714 A69-15954

Microbiological surface sampling methods, noting role in detecting contamination on eating utensils, blankets, sheets, etc

05 p0715 A69-15982

Direct epoxy embedding of monolayer cells cultured on millipore filter and fixed, dehydrated and microscopied before immersion

10 p1649 A69-23404

Mineral nutrition elements concentration stabilization by correcting solution additions during prolonged Chlorella cultivation with medium recycling

10 p1646 A69-23578

Continuous culture device for controlled growth of Euglena gracilis

15 p2555 A69-30445

Postirradiation growth of cultured Chinese hamster cells exposed to UV light, including comparison with X irradiation

19 p3257 A69-35975

Cultured mammalian cell growth morphology studied in situ with scanning electron microscope, discussing surface morphology changes during mitotic cycle of Chang liver cells

20 p3467 A69-37100

Blue green alga Anabaena flos-aquae A-37 growth limitation by absence of K or Na from culture medium

23 p4079 A69-41386

Gradually decreasing N concentration effects on composition, tissue production and oxygen yield of unicellular algae in continuous culture

24 p4263 A69-43201

CUMULONIMBUS CLOUDS

Lightning strikes to aircraft, discussing corona discharge, electric fields and meteorological measurements during thunderstorm in cumulonimbus clouds

03 p0458 A69-13031

Charts of horizontal cross sections of radio echo foci for radio echo reflections from cumulonimbus clouds

03 p0459 A69-13288

Electric fields and conductivity in thunderclouds by parachuting rotating differential electric field mills

08 p1345 A69-19813

Convective clouds effect on large scale stratification, showing cumulus and cumulonimbus self amplifying convection as factor in tropical cyclogenesis

09 p1536 A69-22165

Cumulonimbus clouds phase structure and spatial distribution based on radar signal polarization analysis, showing high nonuniformity and variability

16 p2806 A69-32266

Cumulus and cumulonimbus clouds electrical and microphysical properties measured by instrumented aircraft

20 p3572 A69-37907

CUMULUS CLOUDS

Axisymmetric model of unsteady convective cumulus cloud produced by time dependent heat source in unsteady atmosphere

02 p0274 A69-11436

Air mass cumulus cloud growth stimulation by means of vertical updrafts capable of perforation of retaining layers

03 p0461 A69-13409

Simultaneous measurements of cumulus cloud thermal structure and concentration of water particles larger than 18 micron diameters

09 p1536 A69-21866

Convective clouds effect on large scale stratification, showing cumulus and cumulonimbus self amplifying convection as factor in tropical cyclogenesis

09 p1536 A69-22165

External wind shear influence on isolated cumulus cloud evolution based on hydrodynamic and thermodynamic equations numerical integration

15 p2648 A69-30644

Radio emission and absorption of cumulus and stratus clouds at millimeter and centimeter wavelengths, giving maximum SNR defined by brightness temperature

16 p2807 A69-32270

Atmospheric temperature and moisture fields obtained by linear equations and objectively analyzed, considering underlying sea surface energy and cumulus cloud distribution

20 p3523 A69-37351

Cumulus and cumulonimbus clouds electrical and microphysical properties measured by instrumented aircraft

20 p3572 A69-37907

CURARE

Maximum voluntary isometric muscle strength relation to endurance time in static work during partial curarization

22 p3890 A69-40213

CURIE TEMPERATURE

Posistors heat capacity investigated as temperature function, showing maximum heat balance corresponds to Curie temperature

01 p0038 A69-10098

Electro-optical device using KDP crystal for laser beam deflection at temperatures near Curie point
03 p0435 A69-12984

Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique
10 p1706 A69-24007

Spontaneous polarization onset in perovskite ferroelectrics, analyzing influence of Curie point, Jahn-Teller effect and atomic structure
22 p3995 A69-41159

Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point
22 p3996 A69-41164

CURING

Flame resistant chlorine containing polyester resins, discussing preparation, curing characteristics, physical properties and reinforced plastics application
08 p1340 A69-20505

Thermosetting resin curing behavior characterized by differential thermal analysis performed above atmospheric pressure to prevent volatilization
09 p1500 A69-22311

Electron beam radiation curing of mercaptan terminated butadiene-acrylonitrile liquid copolymers at ambient temperatures in air
09 p1512 A69-22368

Shrinkage stresses in two phase materials, analyzing stress distribution in epoxy inclusions in plasticized matrix during curing by photoelastic method
13 p2371 A69-28675

Epoxy adhesives physical chemistry, curing processes, formulation, surface application methods, testing and health hazards
14 p2468 A69-29339

Curing agents for carboxy and hydroxy functional prepolymers synthesis and evaluation including sulfonyl, acyl and ureido aziridines
[AIAA PAPER 69-436] 16 p2747 A69-32777

Polyimide resin system for glass reinforced laminates, noting processing characteristics and curing
19 p3353 A69-35505

Adhesive bonding of Al sheets for honeycomb sandwich material, using electrical conductivity to measure sheets age hardening progress during high temperature curing
19 p3321 A69-35565

CURL [VECTORS]
NT VORTICITY

Analysis of solution of Navier-Stokes equations describing two dimensional flow of viscous incompressible fluid by finite difference techniques and introduction of curl
03 p0416 A69-13652

CURRENT AMPLIFIERS
NT PHOTOMULTIPLIER TUBES

Integrated operational amplifiers for control systems, noting high stability and linearity through negative feedback
01 p0039 A69-10169

Small signal characteristics and frequency response of diode-stabilized integrated linear circuits, discussing feedback, impedance, bias- diode, etc
01 p0041 A69-10204

Transient behavior of DC measuring amplifiers with time variable feedback, using matrix method and Laplace transform
09 p1467 A69-22560

Maximum voltage and power gain of modulator-demodulator type nonresonant parametric amplifiers
11 p1849 A69-24956

Transistorized LF-HF RC filters and current amplifiers design, exhibiting polynomial type characteristics
12 p2040 A69-26488

Transistorized DC amplifier circuit with reversible and controllable transfer constant based on voltage conversion principle
13 p2235 A69-28511

CURRENT DENSITY

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter
01 p0091 A69-10883

GaAs injection lasers noting spectral function, I-V characteristics and relations among lasing wavelength, threshold current density and impurity concentration
02 p0256 A69-11993

Critical state model of type 2 superconductor taking account of critical current on magnetic field and surface sheath currents, evaluating flux penetration, hysteresis, AC losses, etc
02 p0298 A69-12030

Temperature dependence of electron beam pumped GaAs laser threshold current density and emission spectra, noting doping effects
02 p0260 A69-12683

GaAs injection laser transmission losses and threshold current density under influence of external optical coupling with spherical mirror
02 p0260 A69-12687

Minority carriers lifetime measurement in degenerate GaAs, showing dependence on current density and operating temperature
03 p0483 A69-12917

Xe gas discharge plasma resistivity dependence on current density measured in large tubular flash lamps
03 p0478 A69-13846

Substrate terminal current anomalous enhancement observed in n-channel Si MOS transistors beyond pinch-off
04 p0574 A69-14348

Argon-K plasma electrical conductivity as function of electric current density at 1400-2400 K
05 p0798 A69-15614

Transformation of differential mean and current densities and anisotropy of cosmic ray particles and photons observed in frames of reference relative to each other with isotropic flux
05 p0817 A69-16651

Relationship between microhardness of niobium and other variables characterizing superconductivity
05 p0810 A69-16805

Two section model of saturation drain conductance of MOS transistors
06 p0893 A69-17155

Passive current maxima during anodic polarization of stainless steel in sulfuric acid, using electrochemical and electron microprobes
06 p0944 A69-17853

Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces
06 p1009 A69-17966

Convergent high-perveance electron gun design for use in microwave tubes, reducing anode aperture effect on current density
07 p1101 A69-18658

GaAs lasers radiation power hysteresis manifested in generating starts and stops at different injection current levels
07 p1157 A69-19593

Plasma sheath-boundary interactions, analyzing emission, reflection and surface ionization effects on current densities and heat fluxes for cesium and argon
08 p1369 A69-20818

Oxidizer reducing and fuel oxidizing catalysts role in large current densities production at electrodes of low temperature carbon fuel cells
08 p1259 A69-21037

Voltage dependence of mobility limited electron current density in gas filled diode for collision frequency proportional to electron speed
09 p1462 A69-21326

Steady state currents effect on hydrodynamic waves propagated normal to magnetic field
09 p1547 A69-21662

Electric current spoke in MPD operation, using segmented anode and image converter methods with argon and helium propellant gases
09 p1548 A69-21962

Optimal working parameters and operational characteristics of laboratory electron gun, examining beam shape, convergence and current density distribution
09 p1464 A69-22243

Diffusion and minority carriers drift effect on current-voltage characteristics of p-n-p-n structure in high density current
10 p1742 A69-22997

Air-earth current density variations with universal time, noting hemispherical dependence of storm activity effects
10 p1682 A69-23415

Electrical conductivity, electron density and population temperature as functions of current density in Cs-Hc thermal plasma studied with non-equilibrium ionization model
10 p1732 A69-23443

Electron temperature distributions in Ar-K plasma of simulated Faraday type MHD generator for current distributions, determining current density distribution experimentally
10 p1734 A69-23453

Boundary conditions for nonlinear equations of MHD for vicinity of zero magnetic field line, considering plasma pinch and current density
10 p1739 A69-23626

Current-voltage characteristics and ionization equilibrium of low voltage arc plasma in narrow gap of thermionic converter at high current density
11 p1933 A69-25554

Emitter current density dependence on distance from center of drift transistor circular emitter, obtaining distributed base resistance in presence of arbitrary base current
11 p1853 A69-25565

High current density filaments formation in silicon p-n-n avalanche diodes caused by incremental negative resistance in static current-voltage characteristics
12 p2036 A69-25916

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter
12 p2109 A69-26647

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current density measurement
13 p2271 A69-27467

Nonconducting vanes end effects on electrical characteristics of MHD channels, analyzing current density, Joule losses and finite length vanes
13 p2306 A69-27497

Voltage drop of ignited mode related to current density in cesium diode, noting plasma zones
14 p2401 A69-29232

Nonlinear generation of sum and difference frequencies in ionized plasma current densities by nonuniform microwave fields noting electron scattering
14 p2507 A69-29350

Anisotropic scattering of current carriers in semiconductors, obtaining general expression for mobility tensor with variational principle
14 p2508 A69-29667

Josephson current density distribution in thin film superconductors, determining relation between tunneling density and magnetic field for films with/without current
15 p2667 A69-30196

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability
15 p2662 A69-30965

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response
16 p2758 A69-31616

Wide argon plasma column by axial current density measurements, confirming existence of instability and determining critical magnetic field
16 p2819 A69-31680

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power
16 p2749 A69-31703

Nonlinear generation of sum and difference frequency components in magnetoplasma current density due to alternating electric fields, electron density and temperature gradients
16 p2821 A69-32036

Optimization of electrolytic extraction process of water from H-O fuel cells through choice of current density as function of electrolyte concentration
16 p2738 A69-32414

GaAs dual diode laser structure used to give electrical control of laser threshold and permit study of optical flux and current density role
17 p2980 A69-32959

Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density
18 p3179 A69-34261

Injection lasers threshold characteristics, studying temperature and doping level effects on current density and radiation energy
19 p3337 A69-36527

Electromagnetic radiation in moving uniaxially anisotropic medium, obtaining time dependent solutions for oriented magnetic dipole current distribution density
20 p3576 A69-37578

Porous hydrophilic oxygen electrodes behavior, showing electrochemical reaction influence on shape of current density vs voltage curves
20 p3484 A69-38071

High power density spacecraft hydrogen/oxygen fuel cells with open cycle heat and product-water removal subsystems and reactant tankage
23 p4076 A69-42309

Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density
24 p4361 A69-43121

CURRENT DISTRIBUTION

Planar arrays of linear antennas above stratified medium, showing antenna impedance and current distribution expressed in terms of free space environment
01 p0042 A69-10343

Current sheath surrounding exploding copper wire in vacuum, plotting current distribution as function of time and radius
01 p0119 A69-10669

Minority carrier density and diode current obtained as Laplace transforms from analyzing differential equations, describing charge carriers in semiconductor
01 p0049 A69-11361

Fourier transformation method for current distribution and driving point admittance of coupled antennas in dissipative medium
02 p0215 A69-11946

Dipole antenna current distribution, deriving simple, accurate formula for infinite, semiinfinite and finite cases
02 p0218 A69-12330

Temperature and current distribution in avalanching silicon p-n junctions
03 p0487 A69-13637

Anisotropically conducting spiral cone current phase distribution applied to frequency independent antennas analysis, discussing spiral motion and field azimuthal dependence effects
03 p0408 A69-14133

Current distribution in scanning rectangular array with all-directional constant sidelobe and narrowest beamwidth
04 p0570 A69-14302

Current nature on infinite cylindrical antenna in compressible anisotropic lossy plasma medium, noting characteristic waves on infinite cylinder
04 p0578 A69-15215

Distribution of current carrier concentration and mobility in p-type silicon doped with phosphorus ions
04 p0643 A69-15254

Beam transmission in electron guns having single apertured control grid, studying ratio of target current to cathode current
05 p0734 A69-16566

Absolute short term current efficiency of aluminum electrolytic cell, stressing aluminum amount determination in cathode
06 p0869 A69-17233

Statistical theory of traveling wave antennas for random phase-amplitude distribution of current, discussing phase errors
06 p0898 A69-17797

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators
[AIAA PAPER 69-112] 06 p0971 A69-18140

Electromagnetic thrust equations for coaxial MPD accelerator, noting role of externally applied magnetic field
[AIAA PAPER 69-108] 06 p0972 A69-18197

Minority carrier distribution in doped semiconductors space-charge layer assuming relation between diffusion and Debye length
07 p1198 A69-18506

Diffusion current detection method applied to reverse biased volt-ampere characteristics of Ge diodes, noting surface leakage role
07 p1105 A69-19007

Surface recombination rate and retardation field effects on diffusion current in mesa diodes with low level injection
07 p1105 A69-19008

Current load distribution for optimizing MHD generator efficiency determined by variational method, noting dependence on relative length
07 p1058 A69-19012

Current and voltage distribution in electromagnetic compressor channel with solid electrodes of finite resistance, noting error analysis
07 p1059 A69-19029

Cylindrical antenna in uniaxial resonant plasmas, calculating current distribution and input admittance on basis of Wiener-Hopf technique
07 p1107 A69-19227

Long transmitting dipole antenna, studying current and charge distributions by Wiener-Hopf technique
08 p1281 A69-20019

Current distribution of long thin cylindrical antenna driven at arbitrary point along length
08 p1282 A69-20043

Magnetic field distribution and resistance of homogeneous type 2 superconductor cylinder at transition under effect of axial current
08 p1371 A69-20202

Radiation field patterns of linear antennas immersed in weakly ionized plasma evaluated for propagation constants of current distribution
08 p1285 A69-20551

Converging solutions for imaginary admittance and current distribution in linear cylindrical antennas
08 p1295 A69-21165

Electron drainage currents from dilute streaming plasmas to positively biased silicon and cadmium sulfide solar cell arrays
[AIAA PAPER 69-262] 09 p1436 A69-21726

Inhomogeneity distribution of carrier concentration and electrovoltaic effect in GaAs devices analyzed by scanning electron microscope
09 p1557 A69-21746

Ionization and current growth in discharge in rotating plasma device with mirror shaped magnetic field
09 p1552 A69-22042

Formation and acceleration of luminescent current layer in Z pinch discharge, noting density and electron mean free path in cold gas
09 p1552 A69-22397

Horizontal VLF cylindrical transmission antenna current distribution calculated with allowance for ground reaction, showing exponential decrease with distance
09 p1467 A69-22581

O shaped magnetic systems using unsaturated steel magnetic circuit to produce strong uniform magnetic fields for MHD machines
10 p1636 A69-23102

Current distribution and impedance of insulated cylindrical antenna embedded in dielectric cylinder immersed in compressible electron plasma
10 p1663 A69-23423

Two dimensional radiation from apertures in conducting cylinders of arbitrary cross section, solving current distribution, admittances and radiation patterns
11 p1836 A69-24985

Electric field vertical and radial components for time harmonic electric line sources with piecewise sinusoidal current distribution
11 p1836 A69-24995

Forward and reverse current-voltage characteristics and reverse biased capacitance for nZnSe-pGe emitter base diodes of heterojunction transistors
11 p1851 A69-25114

Current distribution on elements of circular arrays of tangential dipoles, discussing large odd component in zeroth order approximation
11 p1853 A69-25318

Current and voltage distribution around normal shock in MHD duct using conformal transformation, considering continuous and segmented electrode boundary conditions
11 p1931 A69-25359

Faraday type MHD energy converters in nonequilibrium conduction mode, analyzing two dimensional current and potential distributions in plane normal to magnetic field
11 p1826 A69-25397

Dielectric coated finite cylindrical antennas, using numerical and Wiener-Hopf methods to obtain input admittance and current distribution
12 p2041 A69-26604

Solar quiet currents in three dimensional ionosphere, considering ionospheric conductivity and horizontal layer equations
12 p2074 A69-26955

Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma
13 p2310 A69-28029

Current distribution in MHD duct with permeable electrodes with tensor conductivity, obtaining Riemann-Hilbert heterogeneous boundary value problem solution by finding electric field
13 p2310 A69-28030

Current distribution along linear antenna array taking into account interaction between neighboring elements and effect on antenna radiation characteristics
13 p2236 A69-28572

Thermionic converters with matrix circuit connections, considering current flow patterns in matrices to evaluate electrical failure spreading
14 p2400 A69-29225

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes
14 p2402 A69-29246

Inhomogeneous distribution of nonequilibrium current carrier concentrations in semiconductors with electrons and holes of different lifetimes, noting instability
15 p2665 A69-30041

Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas
15 p2663 A69-30980

Wind effects on ionospheric electric currents, using equivalent circuits to study tidal modes and current patterns
16 p2775 A69-32087

Current distribution and scattering cross section of missile with plume/ionized trail/ of tapered conductivity due to plane wave electromagnetic excitation
17 p2921 A69-33671

Steady state performance of multistrand superconducting compound conductors in current sharing state, using heat measurement from metal surface to He bath
17 p3016 A69-33786

Penumbra current distribution in plane electromagnetic waves diffraction by conducting cylinder, obtaining transient solution for impulsive excitation, discussing time harmonic problem
18 p3100 A69-34232

Equatorial electrojet current distribution determined using equivalent circuit method and magnetic force model, noting electron density profile influence on current density
18 p3130 A69-35186

Current distribution and input impedance of cylindrical antenna enclosed in uniaxial crystal and oriented along optical axis from thin antenna theory
19 p3285 A69-36878

High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
21 p3709 A69-38503

Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices
21 p3776 A69-38708

Transient current change with minor change in voltage with double injection of electrons and holes in CdS single crystals, obtaining time dependence
21 p3780 A69-38833

MHD energy converters electric fields and current distributions, analyzing MHD flow problems
21 p3777 A69-39480

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
21 p3684 A69-39619

Two dimensional analysis of junction transistor electrical behavior, analyzing DC and AC crowding effects, conduction and impedance of base and collector
22 p3911 A69-40011

Random function output current obtained in phototube and scintillation detector including amplitude distribution, time measurements and pulse shape discrimination
22 p3947 A69-40670

ELF atmospheric excitation, discussing cloud to ground and intracloud lightning discharges Fourier integration and current moment spectrum
23 p4115 A69-41562

CURRENT REGULATORS

Chemical phenomena during explosions of wires in various gaseous atmospheres, using apparatus with electronic crowbar for current flow regulation
01 p0081 A69-10680

Hydrogen and basic electrolyte cold cells, studying control systems for reactants supply, current, reaction by-products, etc
16 p2738 A69-32410

CURRENT SHEETS

Steady one dimensional motion of current sheets in plasma accelerators, noting condition of zero initial conductivity
01 p0133 A69-11220

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency
[AIAA PAPER 69-113] 06 p0971 A69-18123

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators
[AIAA PAPER 69-112] 06 p0971 A69-18140

Pressure distribution in propagating current sheet structure in dynamic Z pinch discharge in argon, evaluating particle density, velocity and temperature profiles
[AIAA PAPER 69-264] 09 p1564 A69-21243

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing [AIAA PAPER 69-265] 09 p1566 A69-21258

Modified first order theory of magnetosphere boundary shape incorporating effects of neutral sheet currents of extended geomagnetic tail 09 p1488 A69-21661

Electron and ion density distributions in propagating current sheet in Z pinch discharge in argon obtained by microwave reflection interferometer 16 p2816 A69-31639

Electromagnetic noise in current sheet in geomagnetic tail, discussing effects on distribution function [AFRL-69-0395] 16 p2781 A69-32317

Wave damping in current sheet in geomagnetic tail by radiating energy from sheet sides by electrostatic waves [AFRL-69-0396] 16 p2781 A69-32318

Shock and current sheet separation in magnetic shock tubes, determining electron temperature behind shock and within current layer 20 p3511 A69-38241

Dungey reconnection model of magnetosphere with dayside current sheet and pseudotrapping region compared with dayside observations of precipitation regions 21 p3711 A69-38511

Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices 21 p3776 A69-38708

Collisional shocks in inverse pinch MHD shock producing device, discussing position in current sheet and effect on conductivity and diffusion 21 p3776 A69-38709

CURTISS-WRIGHT MILITARY AIRCRAFT
U MILITARY AIRCRAFT

CURVATURE

Asymptotic behavior of curvature and conformal curvature tensors on asymptotically flat space-time 01 p0116 A69-10393

Transverse curvature effect on skin friction and heat transfer in laminar flows past slender circular cylinders 02 p0232 A69-12210

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space 02 p0272 A69-12221

Curved bodies substitution in unsteady hypersonic flow past slender sharp nosed bodies within framework of plane sections 02 p0191 A69-12576

Yaw parameter and curvature effects on accuracy of hot-wire anemometer, noting King law 03 p0426 A69-12845

Magnetic lines curvature behind pseudostationary hydromagnetic shock determined, assuming parallel magnetic field and velocity vectors 04 p0638 A69-15092

Two dimensional incompressible laminar boundary layer on curved wall for potential velocity inversely proportional to distance along origin [ASME PAPER 68-WA/FE-20] 05 p0749 A69-16096

Power law taperings for minimizing peak to trough deflection of cross section of strip bent longitudinally into cylindrical surface 06 p1023 A69-17374

Potential barrier curvature influence in aluminum trioxide tunnel junctions, noting ionic space-charge effect on shape 07 p1196 A69-18243

Reflected radio wave amplitude distributions related to distributions of curvature at reflector 07 p1086 A69-19225

Transverse magnetic field and shock strength effects on curvature ratio of attached shock waves and wedge 10 p1728 A69-23238

Buoyancy in turbulent shear flow, rotation or streamline curvature effects and meteorological parameters, drawing formal exact algebraic analogy 11 p1870 A69-24894

Electromagnetic field in idealized medium of uniformly curved gas lens for light beam waveguide, describing lens radius effects on incident beam spot 13 p2270 A69-27181

Flow and temperature boundary layers on longitudinally curved walls, giving higher approximation exact solutions 15 p2591 A69-30933

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement

matrix analyses, discussing local subelement, natural modes, cross sectional resultants, etc 16 p2872 A69-32025

Wall curvature effect on hydrodynamic stability of laminar incompressible boundary layer with respect to perturbing Tollmien-Schlichting waves 19 p3299 A69-36587

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space 23 p4182 A69-41972

Transverse curvature effect on laminar free convection heat transfer from vertical isothermal cylinders [ASME PAPER 69-HT-G] 24 p4410 A69-43522

CURVE FITTING

Waveforms analyzer for mixtures of exponentially damped sine waves, noting application to interferometer curves in plasma wave propagation 17 p2970 A69-32852

Least squares method of smoothing curves or surfaces involving orthogonal base functions, discussing matrices conditioning and structure eigenmodes 18 p3218 A69-34642

Geodetic satellite measurements employing curve fitting approach using least squares analysis to resolve atmospheric refraction and shimmer problem 18 p3104 A69-35202

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability [AIAA PAPER 69-950] 22 p3975 A69-40332

CURVED BEAMS

Elastoplastic stress-strain state of asymmetric profile thin walled beam under mobile load 05 p0841 A69-16205

Natural mode structural analysis matrix methods for small displacements, discussing curved local subbeam in space and circular arch 11 p1969 A69-24374

Strains in elastoplastic curved beam under bending obtained from approximating stress-strain diagram by parabola 17 p3056 A69-33192

Acoustic and internal dampings in freely supported uniform beams of circular and rectangular section, showing frequency dependence and vacuum effect 20 p3620 A69-37062

Curved beams ultimate strength using angular velocity considerations for collapse load 20 p3629 A69-38031

Torsion analysis of curvilinear rectangular prismatic beam reinforced by off-center circular rod, using conformal mapping 22 p4049 A69-41279

Elastic curve shape effects on volume of minimum weight uniformly strong beam under combined longitudinal and transverse bending 23 p4225 A69-41421

CURVED PANELS

Shot impact shaping of parts made of monolithic panels, relating curvature of profile to parameters of process 03 p0433 A69-12963

Natural vibrations of cylindrical panels analyzed on basis of Lamé parameters, shell equations and energy method 04 p0674 A69-14592

Simply supported isotropic cylindrical panel stability under axial compression, obtaining asymptotic series expansion for upper critical stress 08 p1419 A69-21182

Linear theory of cylindrical panel buckling and circumferential restraint along straight edges under lateral pressure, using Donnell equations 09 p1621 A69-22782

Stiffness matrix for doubly curved shallow shell element with rectangular plane projection applied to circular cantilevered cylinder and barrel vault 10 p1802 A69-23892

Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation 11 p1867 A69-24375

Similarity solutions for incompressible, steady hydrodynamic and thermal boundary layers on longitudinally curved walls, allowing for displacement and curvature effects 12 p2060 A69-25761

Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes 12 p2190 A69-26781

Elastic directed curves dynamic theory, considering Hamilton principle, mass conservation and behavior of action density function under rigid body variations 13 p2360 A69-27321

Nonlinear Galerkin analysis of curved plate flutter, using shallow shell/von Karman equations and quasi-steady aerodynamic theory 13 p2364 A69-28207

Aerodynamic characteristics of plane inviscid fluid jets expanding over curvilinear surface, deriving force equations for surfaces in jet and rocket engines 19 p3296 A69-35815

Thin curved panels postbuckling behavior under axial compression, basing study on thin shell finite deformation theory and Galerkin method 20 p3629 A69-38112

Stiffness matrix for curved membrane shell, outlining discrete element representation of cylinders with widely spaced circumferential stiffeners 21 p3842 A69-39305

Curved shell elements in shell and plate analysis, discussing quadratic and cubic elements for space structures design 21 p3845 A69-39329

Curvature and temperature distribution in nonrotating long solid cylinders under solar radiation in interplanetary space 22 p4043 A69-40546

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending 22 p4046 A69-40969

CURVED SURFACES
U CONTOURS
U SHAPES
U SURFACES

CURVES [GEOMETRY]
NT CYCLOIDS
NT S CURVES

Incompressible fluid steady motion in curved tube investigated by Fourier series, solving coupled nonlinear equations numerically 01 p0058 A69-10142

Numerical evaluation of curvilinear integrals and areas, using digital computer 01 p0106 A69-10867

Color index and mean light curves constructed for Cepheid Variables 08 p1395 A69-20635

Iterative method for least square polynomial curve fitting with abscissas and ordinates subject to error 08 p1343 A69-20827

Curve fitting for optimum redundancy reduction on sampled data, describing polygonal and approximate-polygonal techniques 09 p1533 A69-22458

Conformal mapping of regions with corners and large curvatures of boundary curves onto unit circle with digital computer, considering airfoil 10 p1724 A69-22880

CUSPS [MATHEMATICS]
NT DOUBLE CUSPS

Plasma stability criterion for universal mode, discussing cusp curvature stability 01 p0127 A69-10279

Optimum magnetic field axial component and plasma gun discharge voltage for high velocity plasma injection into symmetrical cusp field 05 p0805 A69-16655

Cusp magnetic field stabilizing superimposition on toroidal plasma discharge in polytron machine, noting role of Hall acceleration mechanism 06 p0965 A69-17514

Plasma lifetime in spherical multipole magnetic field trap compared to cusp trap 08 p1360 A69-20082

Electron and ion mobility in multiple cusp magnetic fields related to Polytron experiment 14 p2499 A69-29852

CUT-OFF

Cut-off frequency relation to geometry for dielectric ridge waveguide 05 p0777 A69-16579

Silicon resistance strain gage sensitivity dependence on crystallographic orientation following cut-off from single crystal 11 p1887 A69-25209

Taylor instability nonlinear oscillations, obtaining uniform solutions for wavenumbers near and larger than cut-off 21 p3693 A69-38703

CUT-OUTS
U OPENINGS

CUTTERS

CUTTERS

Screw-nut feeder and adjuster systems with compensation for clearance and wear of cutting tools, determining efficiency for conversion of rotary to translational motion

23 p4168 A69-41414

CUTTING

NT METAL CUTTING
NT MILLING [MACHINING]
NT SHEARING
NT SPARK MACHINING

Machine cutting tool for cutting and splicing endless magnetic tape 30 microns thick, noting film safety feature and nonmagnetic steel scissors

08 p1321 A69-20876

Ceramic substrate cutting with carbon dioxide laser by scribing perforation pattern,

10 p1699 A69-23302

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates

15 p2635 A69-31037

Thin film carbon resistors cutting with carbon dioxide gas laser, considering cylindrical bodies and aging properties

15 p2635 A69-31038

CV-990 AIRCRAFT

Radar cross section of missile and aircraft configurations, comparing theoretical and experimental results for Convair 990 static test model

03 p0384 A69-12911

Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners

06 p0883 A69-17841

CW RADAR

U CONTINUOUS WAVE RADAR

CYANIDES

NT CYANOGEN
NT HYDROGEN CYANIDES

Excited cyanide molecules concentration in arc discharge determined from spectral bands absolute intensities during electron transition

15 p2654 A69-30080

Polycrystalline ammonium cyanide IR absorption spectrum as function of temperature, discussing ammonium ion hydrogen bonding to C or N atoms

24 p4280 A69-43809

CYANO COMPOUNDS

NT ISOCYANATES

Methyl 2-cyanoacrylate adhesive bonding characteristics, noting importance of film thickness

09 p1529 A69-22316

Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethane, obtaining optical constants by Kramer-Kronig method

18 p3183 A69-35477

CYANOGEN

Cyanogen band absorption in nuclei of elliptical and spiral galaxies derived from photoelectric measurements indicating rich metal content in central cores

12 p2153 A69-25803

Cyanogen molecules increase attributed to nova shell compression from analyzing absorption spectrum of DQ Herculis 1934 after brightness maximum

15 p2688 A69-30558

Coupled equations for determining cross sections for rotational transitions in CN induced by low energy electron impact

21 p3773 A69-38476

CYANOPHYTA

U BLUE GREEN ALGAE

CYBERNETICS

Book on applications of information theory to dynamical systems with random initial conditions and cybernetic systems consisting of communication systems with feedback

04 p0580 A69-14520

Systems science and cybernetics - IEEE Conference, San Francisco, October 1968

05 p0741 A69-15801

Flexible vehicle control, using cybernetic model for system design and response [AIAA PAPER 69-115]

06 p1018 A69-18088

Cybernetic problems in bionics - Conference, Dayton, May 1966

07 p1069 A69-18380

Cybernetic structural model for learning and mentation comprehending symbol systems, languages, homeostatic mechanisms, etc

07 p1070 A69-18385

Adaptation process of management systems from point of view of control system philosophy [AIAA PAPER 68-807]

08 p1422 A69-20197

Cybernetic theory application to automatic spacecraft, discussing control problems in Mariner 4 and Surveyor 7 missions and attitude stabilization system

08 p1409 A69-20583

Book on neurocybernetics and neurobionics covering mathematical and physiological models, artificial neurons, image recognition theories, biological control systems, etc

19 p3263 A69-36747

Mathematical model for information processing of biological memory as cybernetic system

23 p4110 A69-41982

Cybernetic approach to memory, proposing model characterized by hierarchical structural order and sequence to study physiological rhythms

23 p4110 A69-41983

CYCLES

NT ACTIVITY CYCLES [BIOLOGY]

NT BRAYTON CYCLE

NT RANKINE CYCLE

NT SOLAR CYCLES

NT STIRLING CYCLE

NT STRESS CYCLES

NT SUNSPOT CYCLE

NT THERMODYNAMIC CYCLES

NT WORK-REST CYCLE

Periodic cycles in linear closed loop integral pulse FM systems, discussing existence conditions, periodic formulae and stability criterion

05 p0737 A69-15865

Oscillation cycle of atmospheric circulation, analyzing solar activity effects on lunar and solar semidiurnal tides and transition from zonal to meridional circulation

12 p2070 A69-26692

CYCLIC ACCELERATORS

U BETATRONS

U SYNCHROCYCLOTRONS

U SYNCHROTRONS

CYCLIC HYDROCARBONS

Oxygen addition to fuel stream effect on formation of soot and polycyclic aromatic hydrocarbons in ethane-air and ethylene-air diffusion flames

02 p0205 A69-12318

Photolytic conversion of allene to cyclopropylidene, discussing cyclononadiene in vapor phase and resulting product

02 p0205 A69-12721

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method

07 p1171 A69-18932

Ion pairing effects of cyclooctatetraene anion radical, studying electron spin resonance spectra temperature dependence

10 p1651 A69-22938

Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules

10 p1781 A69-23679

Analytical, IR absorption and polarographic analysis of cyclic niobium V/ and tantalum V/ esters

11 p1832 A69-24575

Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories

17 p2917 A69-34184

Mono and bicyclic hydrocarbons effect on jet fuels combustion properties, considering burnup factor, deposit and smoke production levels

18 p3184 A69-35382

Chemical bond nature and properties in cyclic compounds of carbon and graphite, presenting bond energy computation method

21 p3752 A69-39153

CYCLIC LOADS

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading

01 p0078 A69-10113

Low cycle fatigue life of aluminum alloy in reversed biaxial bending

01 p0093 A69-10116

Yield curve softening in hard Al subject to cyclic torsional loading, noting deformation resistance, surface hardness and yield strength

04 p0671 A69-14411

Inelastic strain measurement in metals during cyclic loads by impact tester

04 p0674 A69-14539

Glued metal joints under cyclic loading evaluated by change in short term strength as function of time at stress levels

04 p0605 A69-14540

Repeated loading influence on microstrain region, noting decrease in size with each cycle

05 p0836 A69-15876

Coupled heat equation to calculate transient and steady state temperature distributions in viscoelastic solids under cyclic deformations

05 p0836 A69-15878

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]

05 p0838 A69-16151

Fatigue crack propagation in machine parts under cyclic loading

05 p0842 A69-16543

Polycarbonate surface stiffness increase associated with fatigue induced by repetition of loads

06 p0946 A69-17206

Fatigue life in nonstationary cyclic loading above endurance limit, describing methods of shortened fatigue tests for fatigue life

07 p1231 A69-18403

Static endurance of aircraft structural elements under single and multiple loading, based on real alloys and crystalline materials theories

07 p1231 A69-18554

Crack growth during cyclic loading in elastoplastic bodies

07 p1232 A69-18992

Chromium steel /E1961/ susceptibility to structural damage under cyclic loads by nondestructive inspection of magnetic hysteresis and eddy current losses

07 p1141 A69-19316

Impact cyclic loading fatigue tests of smooth and notched duralumin, discussing increased impact strength resulting from initial underloading

07 p1167 A69-19317

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions

07 p1235 A69-19383

Aircraft reliability under cyclic loads in flight taking into account stress fluctuations

08 p1322 A69-21106

Heat resistant nickel alloys static and dynamic properties at high temperature, creep-fatigue interaction, etc

09 p1523 A69-21609

Governing equations for bending of fixed isotropic circular sandwich plate subjected to eccentric concentrated load

09 p1615 A69-21926

Low cycle fatigue fracture behavior at high temperatures, noting fatigue crack behavior and crack density concept

10 p1797 A69-23081

Progressive accelerated fatigue testing for reliability in determining fatigue limits

10 p1800 A69-23349

Metal fatigue at elevated temperatures concerning viscosity, energy loss and stress, strain and temperature cycling

10 p1803 A69-24043

Damped steady state response of elastic foundation beam subjected to cyclic moving loads to determine load movement frequencies for natural frequency excitation [ASME PAPER 69-VIBR-13]

10 p1806 A69-24166

Incremental collapse of shells under cyclic loadings in terms of generalized variables, finding interaction surfaces of load multipliers

11 p1980 A69-24820

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Zero Gaussian curvature rib reinforced shells free oscillations reduced to nonreinforced shell forced oscillations under cyclic loads

12 p2177 A69-25996

Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect

12 p2181 A69-26612

Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructural changes

12 p2116 A69-26912

Tension-compression fatigued alpha Ti twin formation contribution to fatigue damage during cyclic loading

12 p2116 A69-26913

Crack growth and crack initiation in cylindrical specimens subject to low cycle strain controlled ten-

sion-compression induced fatigue, noting measurement techniques
12 p2188 A69-26914

Low cycle fatigue crack initiation in Ti-6Al-4V at room and high temperatures and in aqueous salt environment
13 p2278 A69-27413

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
14 p2445 A69-28882

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]
14 p2535 A69-29438

Repeated static stress limit of internal pressure vessels, emphasizing effect of redistribution of stresses and strains
15 p2712 A69-30973

Load carrying capacity of thin steel plates fatigued by cyclic shear buckling
17 p3052 A69-32980

Fatigue fracture due to heat generation in polycarbonate subjected to pulsating tensile load, presenting temperature change per unit stress increase
18 p3163 A69-35498

Ronay effect in reversed cyclic torsion or tension in thin cylindrical viscoelastic tube showing creep under sustained load
20 p3625 A69-37596

Automated device for load carrying ability of structural elements like gas turbine blades under thermal and mechanical cyclic loads
20 p3544 A69-37816

Fatigue endurance determined from thermal stresses by balancing elastic strain rates, creep relaxation and mechanical cyclic loading with triangular waveform, discussing nonsteady creep
21 p3843 A69-39310

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties, derived from fatigue tests
22 p4047 A69-41064

Static and cyclic tensile fatigue of alumina by ring test method, measuring time to failure
24 p4334 A69-43343

CYCLING
U CYCLES

CYCLOHEXANE
Stabilized low temperature ignition of cyclohexane using vertical flow reactor
02 p0304 A69-12314

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant [ECS PAPER 330]
15 p2562 A69-31540

CYCLOIDS
Spherical trajectories control by star height maintenance, analyzing resulting cycloid and cartographic representations
23 p4186 A69-42023

CYCLONES
NT HURRICANES
NT TYPHOONS

Spiral structure of cloudiness in occluded cyclones studied by mathematical model based on meteorological satellite photographs [UN PAPER 68-95429]
01 p0109 A69-10505

European cyclonic system developmental phases determined from characteristic structural features of satellite cloud pictures [UN PAPER 68-95711]
06 p0950 A69-17070

Horizontal ozone distribution at high cyclones and anticyclones in middle stratosphere
08 p1308 A69-20261

Air flow distribution and wind velocities in cyclones constructed from Cosmos 122 TV cloud images
11 p1912 A69-24825

Vertical air flow asymmetrical distribution ascribed to cyclone motion and thermal inhomogeneity by studying spiral cloud configurations in cyclone area
11 p1912 A69-24829

Papers on experimental and theoretical research on atmospheric circulations, jetstream and cyclonic disturbances
17 p2999 A69-33757

Cyclonic vortices production by horizontal convergence in rotating water bowl as function of bottom surface inclination, modeling cyclogenesis in jet stream entropy field
17 p3000 A69-33760

Numerical weather prediction using four level primitive atmospheric model for studying frontogenetic processes in deepening cyclone
19 p3303 A69-36408

CYCLOTETRAMETHYLENE TETRANITRAMINE
U HMX

CYCLOTETRAMETHYLENE TRINITRAMINE
U RDX

CYCLOTRON FREQUENCY
Cyclotron drift instabilities of low pressure plasma containing charged impurities
03 p0478 A69-13834

Power flow in cyclotron and plasma modes propagating in waveguide filled with cold collisionless axially magnetized plasma
06 p0897 A69-17760

Epithermal microwave radiation from plasma produced by PIG Reflex in magnetic field with mirror geometry, discussing radiation at harmonics of electron cyclotron frequency
08 p1370 A69-21019

Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap
10 p1728 A69-23130

Electromagnetic wave transmission through anisotropic plasma, discussing incident wave field strength effects near cyclotron frequency
10 p1728 A69-23167

Cyclotron harmonic waves /CHW/ nonlinear decay instability and parametric amplification, considering applicability to practical amplifiers
12 p2135 A69-26314

Spatial harmonics of harmonic frequency instabilities of cyclotron half frequency in system of two symmetrical electron beams confined by magnetic field
13 p2314 A69-28364

Electromagnetic field eigenvalues along conductive circular cylinder in magnetoionic medium, assuming lossless medium and field frequency not equal to cyclotron frequency
16 p2754 A69-32568

Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment
17 p3014 A69-33829

PPi bursts interpreted as proton beams cyclotron instability in geomagnetic field
20 p3521 A69-37039

Pearl type geomagnetic micropulsation development by studying Alfvén waves cyclotron instability in plasma with hot protons anisotropic distribution
23 p4206 A69-41850

RF impedance probe used for ionospheric composition measurements, describing antenna operation in ion-electron cyclotron frequency range
24 p4308 A69-43008

CYCLOTRON RADIATION
Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves
01 p0127 A69-10335

Solar radio emission slowly varying component theory, discussing main characteristics of cyclotron and bremsstrahlung radiations of thermal electrons
02 p0314 A69-11636

Electron cyclotron instability and HF ionization in beam-plasma experiment using electron beam guided by magnetic field through He gas
05 p0798 A69-15612

Nonlinear interaction between cyclotron harmonic waves, demonstrating synchronism conditions for traveling wave parametric amplification and passive mode conversion
07 p1189 A69-18439

Solar type 4 bursts characteristics accounted for by cyclotron mechanism, assuming models of spot magnetic field configuration and electron density distribution
07 p1205 A69-18959

Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles
08 p1277 A69-21077

Cyclotron waves interaction when propagating in solid state plasma in magnetic field, determining amplification zones and factors
08 p1374 A69-21078

Jupiter model /cyclotron/ of pulsar radiation generation
09 p1608 A69-22761

Plasma-cyclotron interaction wave coupling mechanism in symmetrical double beam system in uniform magnetic field leading to unstable wave excitation along beam
17 p3015 A69-33831

Electromagnetic and cyclotron waves interaction across opaque boundary in moving plasma in one dimensional approximation
18 p3181 A69-35027

Pulsar CP 0328 radiation mechanism, considering relativistic effects of rapid rotation
22 p4035 A69-41206

Proton cyclotron echoes on ionograms obtained from topside ionosphere by Alouette 2 satellite
24 p4310 A69-43189

CYCLOTRON RESONANCE
Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
02 p0292 A69-12554

Region of plasma electron capture during cyclotron electron resonance in magnetic trap with mirrors
03 p0478 A69-13849

Packet of finite amplitude VLF whistler waves, examining cyclotron resonance interaction with high energy electrons and development in magnetosphere
06 p0917 A69-17378

Cyclotron instability of outer radiation belt protons, taking into account data on spatial distribution and ion composition of exospheric plasma
06 p0919 A69-17721

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser [IEEE PAPER C-6]
07 p1150 A69-19051

Cyclotron- and bounce-resonance scattering of electrons trapped in geomagnetic field for pitch-angle scattering, noting whistler mode disturbances
07 p1208 A69-19367

Ion cyclotron resonance acceleration and higher harmonic acceleration in axially nonuniformly magnetized plasma under influence of RF electric field
08 p1360 A69-20079

Nonadiabatic and stochastic mechanisms for cyclotron resonance trapping and heating in magnetic mirror geometries
08 p1364 A69-20518

Electron cyclotron resonance absorption of injected radiation magnetic mirror, noting effect of RF heating on plasma electron distribution
08 p1364 A69-20519

Resonant interaction between traveling charge with superimposed magnetic field and Alfvén wave in plasma cylinder, showing cyclotron orbit variations
09 p1551 A69-22035

Small signal and saturation characteristics for X band cyclotron resonance oscillator, discussing device design and configuration
09 p1470 A69-22786

Electron cyclotron resonance measurement in n-type indium antimonide using far IR emission from HCN and water vapor lasers, noting magnetic field strength effects
13 p2270 A69-27200

Electric field frequency effect on cyclotron resonance during gas discharge, establishing causes of discrepancy between theory and experiments
13 p2315 A69-28577

Cyclotron resonance of minority carriers measured in p-type InSb, giving temperature dependences of absorption derivative and field ratio to line half width
15 p2667 A69-30068

Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution
15 p2658 A69-30251

Electron distribution function for weakly ionized plasma under alternating electric and circularly polarized rotating magnetic field, noting cyclotron resonance
16 p2820 A69-31753

Ion structure of keto and enol and McLafferty rearrangements determined by ion cyclotron resonance spectroscopy
19 p3265 A69-36288

Acetonitrile ion-molecule chemistry using ion cyclotron resonance, discussing reaction of vibrationally excited methyl ions from electron impact
19 p3265 A69-36290

Relative gas phase acidities of carbon acids determined using ion cyclotron resonance spectroscopy
19 p3265 A69-36291

Ion cyclotron double resonance technique to identify collision-induced ion fragmentation pathways illustrated with p-chloroethylbenzene
19 p3265 A69-36292

Ion-molecule reaction rate constants measurement by ion cyclotron resonance, assuming no ion and neutral gas molecules collisions

20 p3579 A69-37495

Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction

20 p3496 A69-37892

CYCLOTRONS

NT MICROTURNS

NT SYNCHROCYCLOTRONS

Magnetoquantum-electric effect, analyzing center motion of cyclotron orbit during photon and phonon absorption and current quantity

16 p2826 A69-31823

CYGNUS CONSTELLATION

IR radiation of NML Cygnus with O/C ratio close to unity ascribed to circumstellar shell of graphite particles

03 p0513 A69-13775

Crab Nebula and Cygnus XR-1 X ray spectra shown to have differential number power law spectra and same intensity

05 p0813 A69-15846

Celestial X ray sources astronomy, discussing emission mechanism in 2 to 100 kev range and balloon observations in Cygnus and Taurus constellations

05 p0817 A69-16715

Identification of emission lines from 3200 to 7000 Å in Eta Carinae spectrum, noting P Cygni-like absorption lines

06 p1002 A69-17263

Radio spectra of supernova remnants Cygnus Loop and IC443, noting possible radiation from shell source

06 p1003 A69-17322

Balloon observations of cosmic X ray sources in Cygnus and Crab Nebula, discussing data application to energy spectra analysis

07 p1210 A69-19716

Radio observations of gamma Cygni source in Cygnus X complex showing nonthermal nature of source, noting weak but significant polarization

08 p1387 A69-20090

Galactic neutral hydrogen structure in region of Cygnus observed with parabolic antenna and frequency-switched radiometer

08 p1388 A69-20243

Spectroscopic evidence for mass loss from CH Cygni based on observations of chromospheric lines of high dispersion spectrograms

08 p1396 A69-20651

Narrow band photometry of variable stars and X ray source Cyg X-2, considering continuum variations with time

09 p1591 A69-21451

Hydrogen alpha emission nebulae catalog in western half of Cygnus X region, obtaining interstellar absorption from nebular distances determination

09 p1596 A69-22053

IR spectrum of NML Cygnus star with Michelson interferometer, noting CO bands and IR excess

09 p1602 A69-22229

Spectrographic observations indicating temperature range within individual filaments of Cygnus Loop, noting agreement with stratified models

09 p1607 A69-22430

Preliminary observations of Tau-A, Cas-A and Cyg-A with multiple-element interferometer

10 p1777 A69-23397

Spectroscopic observations of optical object identified with X ray source Cygnus X-2 noting radial velocity in absorption and emission lines

10 p1785 A69-24097

Spectrum of IR object NML Cygnus, discussing model based on circumstellar IR emission

10 p1785 A69-24101

Hydroxyl microwave emission sources in Cygnus not connected with continuum emission

11 p1964 A69-25403

UBV observations of stars P and 36 Cygni including short period variations and secular changes in brightness

12 p2172 A69-27159

Photoelectric scanning of CH Cygni spectrum calibrated and compared with 45 Arctis, discussing high dispersion, excess blue and UV continua, H beta emission, etc

13 p2338 A69-27557

Spectrophotometry of variable star SS Cyg, analyzing energy distribution in continuum, UV gradient and Balmer jump

13 p2351 A69-27868

P Cyg star HD 190603 atmospheric parameters from spectrograms analyzed by curve of growth method, in-

cluding ionization and excitation temperatures and electron density

14 p2519 A69-29357

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus

15 p2683 A69-30514

Photoelectric /UBV/ photometry of Cepheids in Cygnus and Monoceros noting sequence stars near Nova Cyg 1948

15 p2692 A69-30772

Energetic gamma ray emission from Cygnus A and X-1, describing high altitude balloon telescope observation and gamma ray emulsion process

15 p2676 A69-30888

RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus

16 p2864 A69-32571

Spectroscopic study of P Cygni showing ionization temperature, Balmer decrement agreement with calculated value and chemical composition

16 p2864 A69-32595

Spectrophotometry of F stars 42 Cyg and nu Her atmospheres, analyzing microturbulence, excitation and ionization temperatures, electron pressures and abundances

16 p2864 A69-32596

Radio emission from Cygnus X-2 reporting on observations at 4.5 cm wavelength

16 p2865 A69-32804

MH alpha 328116 /Cygnus/ spectrum noting three Fe IV lines

16 p2866 A69-32815

Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground

17 p3037 A69-33664

NbO presence uncertainty in S type stars due to close coincidences with ZrO bandheads, noting 6484 and 6591 lines in R Cygni spectrogram

19 p3403 A69-35964

Forbidden emission transition probabilities in high excitation symbiotic stars, novae, Cygni stars and peculiar binaries

19 p3423 A69-36227

Radio emission intensity of Cas-A and Cyg-A at 30-60 cm, giving spectral indices

19 p3428 A69-36876

Balloon-borne proportional counters to measure X rays intensity and spectral distribution from Taurus X-1 and Cygnus X-1

20 p3593 A69-38153

IR spectrum of NML Cygnus star using rapid scanning Michelson interferometer, estimating temperature from CO bands

21 p3800 A69-38678

Photoelectric observation of EM Cygni eclipsing binary and old nova

22 p4015 A69-40151

P Cygni spectroscopy indicating existence and atmospheric structure of accelerating envelope about star, computing line profiles

22 p4023 A69-40471

Photoelectric observations of eclipsing binary 32 Cygni during 1968 eclipse using standard UVB color filters, tabulating results of UVB photometry

22 p4032 A69-40946

Absorption features of 21 cm neutral hydrogen line in part of Cygnus X and of W 49, showing equal velocity contour diagrams from right ascension scans

22 p4034 A69-41200

Photometric data for variable stars in Lyra and Cygnus including eclipsing variables

23 p4215 A69-42009

Photometric data for long period variable stars in Cygnus obtained from plates of various observatories

23 p4215 A69-42010

P Cygni characteristics and spectrum analysis, describing absorption lines, line widths, atmospheric composition, light variations, etc

24 p4391 A69-43803

CYLINDERS

Stress fields in Hertzian contact of parallel cylinders composed of anisotropic materials and transversely isotropic spherical bodies

08 p1414 A69-20524

Conformal transformation reducing transverse thermal resistance of cylinder of revolution to thermal resistance of semiinfinite medium

12 p2190 A69-26292

Shock detachment distance for flow around cylinders and spheres determined by microphotometric

tracing of negatives of photographs of forward stagnation streamlines

17 p2949 A69-32962

Forces on stationary cylinder under sinusoidal flow, considering symmetrically located vortex pairs and flowfield

[ASME PAPER 69-FE-13] 21 p3643 A69-38601

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures

21 p3848 A69-38706

Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude

21 p3837 A69-39089

Thermal stresses and displacements in long isotropic hollow cylinder heated on part of outer curved surface, analyzing temperature distribution

21 p3838 A69-39166

Flow structure in wake behind cylinder in plane channel, discussing circulation zone variation and velocity and turbulence distribution at various channel cross sections

21 p3698 A69-39850

CYLINDRICAL AFTERBODIES

U AFTERBODIES

CYLINDRICAL ANTENNAS

Fourier transform solution for cylindrical antennas of arbitrary length, discussing simplification and applications to solid antennas and antenna in conducting media

03 p0405 A69-13624

Current nature on infinite cylindrical antenna in compressible anisotropic lossy plasma medium, noting characteristic waves on infinite cylinder

04 p0578 A69-15215

Input admittance of cylindrical dipole antenna immersed in cold isotropic lossless plasma medium and insulated by ion sheath or unit permittivity dielectric

04 p0580 A69-15490

Numerical values for cylindrical antenna admittance in uniaxial plasma, considering plasma compressibility and vacuum sheath

06 p0965 A69-17513

Cylindrical antenna in uniaxial resonant plasmas, calculating current distribution and input admittance on basis of Wiener-Hopf technique

07 p1107 A69-19227

Current distribution of long thin cylindrical antenna driven at arbitrary point along length

08 p1282 A69-20043

Cylindrical antenna input impedance in isotropic plasma, assuming weak three dimensional plasma diffusion

08 p1285 A69-20428

Converging solutions for imaginary admittance and current distribution in linear cylindrical antennas

08 p1295 A69-21165

Current distribution and impedance of insulated cylindrical antenna embedded in dielectric cylinder immersed in compressible electron plasma

10 p1663 A69-23423

Radiation fields induced by constant current in elliptic ring, discussing analysis results applicability to elliptic capacitive antennas and annular slot

11 p1850 A69-24981

Two dimensional radiation from apertures in conducting cylinders of arbitrary cross section, solving current distribution, admittances and radiation patterns

11 p1836 A69-24985

Radiation pattern of axial slot on circular conducting cylinder based on wedge diffraction and creeping wave theory

11 p1836 A69-24993

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

11 p1994 A69-25534

Electric field penetration into homogeneous plasma at frequencies near Langmuir frequency and current at surface of thin cylindrical antenna in plasma

11 p1853 A69-25551

Radiation pattern of circular cylindrical dielectric rod antenna excited in mixed magnetic and electric modes, discussing mode transducer

12 p2035 A69-25900

Dielectric coated finite cylindrical antennas, using numerical and Wiener-Hopf methods to obtain input admittance and current distribution

12 p2041 A69-26604

Subtraction procedure for feedpoint singularity in current on axially symmetric antenna with slice generator

12 p2041 A69-26864

Field patterns for wave radiation from electric dipole immersed in anisotropic plasma column excited by longitudinal DC magnetic field

12 p2034 A69-27103

Admittance of radiating elements in circular array with longitudinal slots on conducting cylinder, taking into account element interactions

13 p2234 A69-28505

Current distribution and input impedance of cylindrical antenna enclosed in uniaxial crystal and oriented along optical axis from thin antenna theory

19 p3285 A69-36878

Admittance of infinite cylindrical antennas driven from coaxial line

20 p3507 A69-37846

VHF cavity backed cylindrical gap antenna input tuning impedance and equatorial radiation patterns controlled by cavity adjustments

22 p3914 A69-40698

Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory

22 p3914 A69-40703

Synthesis of antenna arrays of longitudinal passive slot radiators on metallic cylinder excited by single active slot, including experimental patterns

23 p4138 A69-41936

Solid cylindrical antenna current and admittance calculation, considering reflection coefficient and multiple reflection phenomena at antenna ends

23 p4142 A69-42336

CYLINDRICAL BODIES

NT ROTATING CYLINDERS

Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars

01 p0148 A69-10124

Axisymmetric transient thermoelastic problem for transversely anisotropic hollow cylinder, examining boundary value problems

01 p0166 A69-10302

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves

02 p0189 A69-12182

Reflection of plane electromagnetic wave from impedance cylinder in vacuum, using ray expansion method

02 p0217 A69-12262

Cylindrical afterbodies at free stream Mach 2 with hot argon gas ejection, discussing flow rate influence on base pressure

02 p0190 A69-12533

Permittivity measurements by measuring impedance on thin cylinders in rectangular waveguide or in cavity formed by coaxial transmission line

02 p0222 A69-12756

Scattering from thin conducting sheet obstacle on cylindrical surface

03 p0399 A69-14253

Heat transfer and drag of cylinders with cavities at hypersonic speeds measured by platinum film thermometer and strain gauge balance in gun tunnel [DVL-850]

04 p0543 A69-14822

Heat diffusion in cylinder with heat sources creating axisymmetric temperature distribution, using Gauss hypergeometric function and Meijer G-function

04 p0687 A69-15188

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow

05 p0745 A69-15780

Quantitative analysis of nonsteady temperature field in long cylinder for sudden heating of semiinfinite axisymmetric lateral surface

05 p0845 A69-15797

Free convective heat transfer of cylinder in rarefied gas yielding Nusselt number as function of Grashof, Prandtl and Knudsen numbers

05 p0846 A69-15904

MHD flow of compressible conducting fluid around cylindrical body with quasi-aligned magnetic field and velocity

07 p1194 A69-19350

Scattering and diffraction of plane electromagnetic wave incident on conducting cylinder coated with moving anisotropic medium

07 p1086 A69-19469

Wake deformation for horizontal and vertical cylinders present in wake of hovering rotor, using flow visualization technique [AIAA PAPER 69-228]

07 p1051 A69-19551

Natural convective oscillatory three dimensional flow in cylindrical annuli, describing inception, amplitude, period and wavelength

09 p1481 A69-21902

Diffraction problem on cylindrical bodies of arbitrary shape reduced to integral equations by using Green functions for free spaces

09 p1459 A69-22634

Heat transfer coefficients for free convection from single horizontal cylinder to fluids computed from empirical correlation

09 p1625 A69-22693

Solid cylindrical body entrainment by viscous incompressible fluid flow in tube under constant pressure gradients and absence of gravitational force

10 p1678 A69-23366

Surface currents, scattered field and scattering cross section for perfectly conducting cylinder found by reducing two dimensional problem to solving coupled differential equations

10 p1657 A69-23860

Axisymmetric problems in thermoviscous plasticity, discussing stress-strain state of annular disks and thick walled cylinders made of rate sensitive materials

10 p1802 A69-24025

Analog simulation of cylinder wake potential for hypersonic motion in collisionless plasma

11 p1926 A69-24756

Optimum cooling of homogeneous isotropic cylindrical body with constraints on magnitude of thermoelastic stresses

11 p1976 A69-24772

Steady heat flow in cylindrical bodies with curvilinear rectangular cross sections, solving equation in form of Fourier series according to trigonometric functions

11 p2000 A69-24974

Sandwich electrode for direction and magnitude measurement of velocity gradients at wall for flow around cylinder at high Reynolds numbers

11 p1872 A69-25132

Finite difference solutions for time dependent equations of motion for steady flow around cylinder at large Reynolds numbers

11 p1872 A69-25133

Flexible cylinder vibration in nominally axial flow, discussing length, mass, flexural rigidity and diameter variation effects on vibration amplitude

11 p1984 A69-25166

Skin friction drag coefficient for right circular cylinder calculation coefficient on basis of Blasius solution for flow

11 p1819 A69-25384

Supersonic and hypersonic flow of rarefied gas around blunt cylinders at various angles of attack, noting pressure distribution on model surface

11 p1821 A69-25478

Channel wall effect on gain of apparent mass of cylindrical and elliptical bodies floating in channel and subject to vertical impact

11 p1875 A69-25487

Elastic waves propagation in micropolar cylinder, treating longitudinal and torsional monochromatic waves in Cosserat medium

11 p1995 A69-25606

Two and three dimensional quasi-static problems in coupled thermoelasticity, obtaining solutions for space containing cylindrical cavity and for solid cylinder

12 p2177 A69-25993

Large plastic deformation of two metallic cylindrical flat ended missiles in mutual longitudinal impact

12 p2179 A69-26217

Specularly vs diffusely reflecting cylinders for cavity type sources of approximately black body radiant energy, noting ray tracing of cones

12 p2130 A69-26245

Laminar compressible subsonic boundary layer flow on symmetrical cylinder bounded by circular arcs noting zero/nonzero angle of attack

12 p2062 A69-26272

Longitudinal and transverse frequencies of cylindrical metallic rod with spherical tip for sliding motion with dry friction

12 p2102 A69-26290

Cylindrical satellite drag rotating about transverse axis in earth magnetic field, including aerodynamic and magnetic moments

12 p2174 A69-26443

Resonance line radiation transfer in finite homogeneous cylinders of various shapes and optical thicknesses using Monte Carlo method

12 p2191 A69-26970

Couple stresses effect on dynamic stress concentrations, considering elastic compressional wave diffraction by cylindrical discontinuity

13 p2369 A69-28351

High temperature thermal resistance stability of multilayer cylindrical elements for thermionic converters determined by layer strain rate

14 p2539 A69-29218

Coupled mode theory for surface wave propagation along tapered cylindrical dielectric rod, considering radiation field effects

14 p2422 A69-29557

Electromagnetic field TM and TE modes uncoupling during oblique incidence scattering from radially inhomogeneous cylinders

15 p2565 A69-30170

Injected gas flow nonisothermicity and transversity effects on friction, heat transfer and flow parameters at cylindrical tube inlet

15 p2592 A69-30986

Thin film carbon resistors cutting with carbon dioxide gas laser, considering cylindrical bodies and aging properties

15 p2635 A69-31038

Integral representation of p-analytic functions of complex variable, applying axisymmetric boundary value problems of elasticity theory for cylindrical surfaces and paraboloid of revolution

15 p2714 A69-31191

Scattering of line focused electromagnetic waves by infinite cylinders obtained by modification of plane wave theory

15 p2664 A69-31478

Scattering of time harmonic linearly polarized plane electromagnetic wave by uniformly axially moving cylinder, analyzing first order velocity effects

16 p2748 A69-31579

Two term expansion for Nusselt number for laminar natural convection about isothermal horizontal cylinder in fluid with vanishingly small Prandtl number

17 p3068 A69-33014

Kinetic inductance measurements in linear circular and rectangular cylindrical superconductors, giving inductance temperature dependence for wires and both thick and thin films

17 p3016 A69-33783

Plane shock wave propagation around cylinders of various radii recorded with shadowgrams and Mach-Zehnder interferograms, discussing wave diffraction mechanics

18 p3120 A69-34472

Collocation method applied to solving contact thermoelasticity problem for short thick walled hollow cylinder attached to thin elastic shell in axisymmetric temperature field

18 p3217 A69-34595

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow

18 p3123 A69-35032

Self excited vibration of flowing medium and infinite cylindrical duct wall in primary magnetic field, discussing vibration stability and critical speeds

18 p3226 A69-35462

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection

19 p3298 A69-36385

Gravitational stability of infinite conducting fluid cylinder in axial magnetic field and surrounded by fluid of different density

19 p3380 A69-36483

Combustible mixtures flow past bodies, discussing equation for shock polar for exothermal discontinuities at subsonic and supersonic velocities

19 p3241 A69-36780

HF backscattering characteristics of infinite conducting cylinder with radially inhomogeneous plasma sheath, using Bessel functions, geometrical optics and graphs

20 p3494 A69-37843

Fourier heat equations functional corrections for determining temperatures of plate and cylinder heated simultaneously by radiation and convection

21 p3848 A69-38641

Karman vortex street formation indicated by smoke visualization method study of laminar wake behind single cylinder

21 p3644 A69-38687

Simultaneous equations for natural convection from horizontal cylinder at moderate Grashof numbers, using iteration digital computer method for boundary values

21 p3851 A69-38975

Cylindrically shaped projectiles low velocity impact upon horizontal surface of dry commercial Ottawa sand mass, estimating penetration for soft landing
21 p3839 A69-39231

Dynamic stress concentrations and rigid body response of cylinder imbedded in elastic medium subjected to compressional wave
21 p3840 A69-39300

Fracture strength of glass fiber-reinforced cylinders made by unidirectional filament winding predicted by analyzing three dimensional stress distributions
21 p3846 A69-39795

Transient temperature response of cylindrical composite energy storage devices with thermal conductivity, density and specific heat independent of temperature
22 p3868 A69-40132

Curvature and temperature distribution in nonrotating long solid cylinders under solar radiation in interplanetary space
22 p4043 A69-40546

Satellite aerodynamic characteristics, considering orbital position and attitude of cylindrical body and separate plate
22 p4037 A69-41102

Unsteady thermal conductivity calculated by approximate analytical method in simple shape bodies/infinite plate, long cylinder, sphere/ cooled or heated by thermal radiation
23 p4238 A69-41333

Contact stability of hollow cylinder compressed between parallel planes measured optically, compared to approximation of elasticity theory
23 p4162 A69-41416

Uncoupled torsional vibrations of simply supported open cylindrical tubes analyzed by approximation equations, considering free edge boundary conditions
23 p4233 A69-42347

Chaplygin equation applied to eddy flow past semicylindrical surface, discussing stagnation points and boundary value problems
24 p4245 A69-43477

Transverse curvature effect on laminar free convection heat transfer from vertical isothermal cylinders [ASME PAPER 69-HT-G]
24 p4410 A69-43522

Cylindrical models in hypersonic rarefied flow, determining drag data by free flight technique
24 p4249 A69-43677

Free convection flows about inclined infinite cylinders with isothermal surfaces
24 p4416 A69-43687

CYLINDRICAL CHAMBERS

Thermal conduction of chambers for selective and nonselective film detectors at low obturation frequencies
03 p0432 A69-14216

Vortex incompressible flow in thin cylindrical chamber, analyzing outer and inner region and interface tangential velocity, shear and static pressures
10 p1679 A69-23557

Elliptic cylindrical chambers optimum design for optical pumping of solid state lasers, discussing transfer efficiency and approximation by circular cylindrical chambers
10 p1706 A69-24010

Ideal mode conversion and transmission by circular aperture of cylindrically symmetric cavity
11 p1899 A69-25056

Deformations of thick walled cylinder with internal surface subjected to uniform pressure and externally connected to rigid chamber, calculating solid rocket booster charge
11 p1942 A69-25347

Linear inductive MHD converters, reducing effects of losses due to finite length of converter by cylindrical construction
13 p2207 A69-27505

Turbulent jets of gases in general stream of air spreading in cylindrical chamber, discussing distributions of gas dynamic parameters
13 p2200 A69-28501

CYLINDRICAL SHELLS

Circular, cylindrical thin walled shell dynamic response to moving shock solved by Flugge equations in series form
01 p0164 A69-10057

Strength analysis of cylindrical shells with rib and ring reinforcement under compression loads using network method
01 p0164 A69-10083

Flexible finite cylindrical shell undergoing arbitrary temporal and spatial motion, determining fluid/aerodynamic/forces acting on shell
01 p0005 A69-10229

Thin cylindrical shell deformation and stress under concentrated radial loading, analyzing singularity at load point
01 p0166 A69-10301

Hollow finite cylinder stress-strain analysis under normal loads on end faces solved by four partial differential equations
01 p0168 A69-10359

Detonation wave structure in solid cylindrical shell explosive, noting attainment of steady state structure
02 p0349 A69-11526

Three dimensional elastic theory using parametric expansion method developed for cylindrical translation shell profiles
02 p0338 A69-11718

Complex revolution vessels and multilobed structures analyzed by electronic computers, considering doubly stressed state of shells and bending moments from external forces
02 p0339 A69-11894

Boundary value problem solution for arbitrary nonshallow cylindrical shells by small parameter method, assuming arbitrary geometry and hinged rectilinear edges
02 p0339 A69-11960

Critical loads in elastoplastic buckling of cylindrical shells analyzed using power series
02 p0340 A69-12058

Plane strain plastic stress waves radial propagation from center of hollow cylinder subject to dynamic pressure load
02 p0344 A69-12292

Orthotropic stiffened multilayer circular cylindrical shells buckling under axial compression, lateral pressure, etc
02 p0346 A69-12510

Finite length cylindrical shell dynamic response to uniform radial impulse, noting simple harmonic motion and flexural mode excitation instability [AIAA PAPER 68-144]
02 p0347 A69-12517

Elastic-plastic and creep deformation calculations of cylindrical shell, providing better estimate of critical time at higher stress levels by including plasticity
02 p0348 A69-12539

Imperfection sensitivity of axially compressed stringer stiffened cylinder analysis via shell equations formulation using finite differences
02 p0348 A69-12542

Stress state of circular cylindrical shell subjected to uniform inward radial line load along generator solved by closed form particular integral, discussing convergence
02 p0349 A69-12797

Stresses in circular cylindrical shell subjected to local heating
03 p0523 A69-12952

Helicoidally symmetrical stress in cylindrical thin shells
03 p0529 A69-14056

Stress diffusion from axially loaded stiffeners into cylindrical elastic shells
03 p0530 A69-14065

Compressed cylindrical shell stability analyzed on basis of axisymmetric equilibrium form, noting dependence on mechanical characteristics and geometry
04 p0667 A69-14265

Initial deviations or imperfections effects on load capacity of infinite and finite length thin cylindrical shells under axial compression [ASME PAPER 68-WA/APM-22]
04 p0669 A69-14398

Elastic-plastic thin walled cylindrical shell axisymmetric behavior under radial pressure difference, noting load for collapse [ASME PAPER 68-APM/AA]
04 p0670 A69-14404

Impulse buckling threshold for elastic-plastic cylinder with elastic core after development of unstable motion
04 p0671 A69-14414

Circular cylindrical isotropic shell deformation rate under dynamic axial load described by second order linear differential equation
04 p0673 A69-14499

Natural vibrations of cylindrical panels analyzed on basis of Lamé parameters, shell equations and energy method
04 p0674 A69-14592

Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells
04 p0675 A69-14704

Circular cylindrical shell creep behavior and buckling under axial compression and internal pressure, using multimembrane model [AIAA PAPER 68-108]
04 p0676 A69-14706

Buckling equations for orthotropic cylindrical shells with eccentric spiral stiffeners derived through variation method of total potential
04 p0676 A69-14710

Nonlinear boundary value problem of elastokinetics solved by step-by-step integration to study thin walled shells stability under axial impact [DVL-853]
04 p0677 A69-14836

Postbuckling equilibrium calculation for pressure loaded thin walled cylinders of finite length, using Donnell nonlinear shell theory
04 p0677 A69-14837

Stability of circular cylindrical viscoelastic and elastic shells with local effects due to radial load on circumference or thermally induced tangential stress
04 p0680 A69-14928

Smooth cylindrical shell stability under axial compression noting effects of scale factor, initial defects, initial stresses and deflections in welded seam, etc
04 p0680 A69-14929

Temperature distribution and thermal stresses in liquid filled cylindrical shell
04 p0682 A69-15413

Axial buckling load for thin walled circular cylindrical shell, noting design of internal mandrel for control of boundary expansion conditions
05 p0831 A69-15581

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse reinforcement ribs, initial defects and under large strains
05 p0832 A69-15691

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress
05 p0832 A69-15692

Stresses in cylindrical shell with elastic core loaded on curved surface solved, using elasticity theory for core and membrane solutions for shell
05 p0835 A69-15871

Stability of thin cylindrical shells of medium length with one or both ends rigidly clamped
05 p0840 A69-16199

Resonant frequencies for beam type bending oscillations of thin walled rib-reinforced circular cylindrical shell freely supported at outermost ribs
05 p0841 A69-16204

Annular stress in rib reinforced cylindrical shells under axial compression load and internal pressure, using successive approximation
05 p0841 A69-16208

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation
05 p0843 A69-16681

Stability of three layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear
05 p0843 A69-16683

Free vibration of thin laminated orthotropic cylindrical shells
06 p1020 A69-17145

Steady state frequency response of conical and cylindrical shells under lateral excitation
06 p1021 A69-17147

Dynamic response of semiinfinite cylindrical shells to traveling load
06 p1021 A69-17148

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method
06 p1021 A69-17180

Axisymmetric form of stability loss of cylindrical shell under effect of axial load suddenly applied along generatrix, considering inertia forces and obtaining differential equations
06 p1021 A69-17181

Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions
06 p1022 A69-17186

Bending general instability of stiffened shallow orthotropic cylindrical shells, noting buckling stress and application to shell design for various loadings
06 p1022 A69-17369

Thin circular cylindrical shells steady creep behavior under combined lateral and axial pressures, using Tresca criterion and associated flow rule
06 p1023 A69-17506

Small bending stiffness effect on inflated torus and cylindrical shells under radial load for determining large space structure stiffness
06 p1024 A69-17607

Fiberglass reinforced plastic bottoms design for integration with cylindrical shells, discussing design, shapes and boundary value problems
06 p1025 A69-17685

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method [AIAA PAPER 69-92]
06 p1027 A69-18060

Radial vibrations of thin cylindrical shells subjected to thermal loadings, discussing temperature distributions, thermal stresses and natural frequencies [AIAA PAPER 69-59]
06 p1028 A69-18143

Initially imperfect axially compressed cylindrical shells strength using variational principle, shell theory and deformation theory of plasticity [AIAA PAPER 69-91]
06 p1028 A69-18181

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations [AIAA PAPER 69-93]
06 p1029 A69-18194

Elastic stability of three dimensionally reinforced composite cylindrical shells [AIAA PAPER 69-122]
06 p1029 A69-18216

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects
07 p1232 A69-18718

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in compressible gas
07 p1119 A69-18738

Circular cylindrical spinning shells vibrations by gyroscopically induced inertia loads, formulating equations of motion based on shallow shell theory
07 p1236 A69-19459

Buckling of long cylinders with homogeneous random axisymmetric geometric imperfections under axial compression, using truncated hierarchy technique
07 p1236 A69-19473

Stability of cylindrical shell reinforced by circular ribs under combined action of external pressure and axial forces, using characteristic equation
07 p1238 A69-19687

Stability of cylindrical shells under concentrated annular loads using finite difference method, discussing critical loads, moments and errors
07 p1238 A69-19688

Stability of finitely deformed thin cylindrical shell of rubberlike material, showing bending resistance and thickness effects
08 p1413 A69-20414

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values
08 p1416 A69-20722

Cylindrically deformed fiber reinforced material, obtaining kinematics and constitutive equations
08 p1418 A69-21002

Axisymmetric elastoplastic bending theory for cylindrical shell by applying Saint Venant plasticity conditions, determining stress distribution
08 p1419 A69-21179

Two layer cylindrical shells stability under external pressure, assuming nonuniform shell rigidity
08 p1419 A69-21180

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters
09 p1611 A69-21352

Coaxial cylindrical shells oscillation frequencies with interspace filled with incompressible liquid determined as functions of liquid level and interspace width
09 p1612 A69-21483

Elastoplastic response of intersecting hemispheric/cylindrical shell structures compared with plastic deformation predictions
09 p1615 A69-21922

Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions from Flugge shell equation [AIAA PAPER 69-447]
09 p1616 A69-21938

Bond shear effects on dynamic behavior of two layered cylindrical shell, identifying bond stiffness parameters [AIAA PAPER 68-354]
09 p1616 A69-21941

Buckling of cylindrical and conical sandwich shells with fiberglass/epoxy facings and aluminum honeycomb cores [AIAA PAPER 68-294]
09 p1616 A69-21942

Buckling of eccentrically stiffened thin circular cylindrical shell under uniform combined axial compression and torsion loads with lateral pressure
09 p1616 A69-21955

Buckling capabilities of inflation rigidized wire film and shell film cylinders in axial compression and bending
09 p1617 A69-21997

Pressure on unsteadily oscillating cylindrical shell in external or internal supersonic flow derived from asymptotic theory
09 p1618 A69-22256

Vibration natural frequencies and mode shapes in cylindrical shells clamped at both ends, using fundamental differential equation under dynamic surface loading
09 p1618 A69-22274

Thermal shock stresses in flat plates, solids and hollow cylinders, noting geometry, wall thickness, heat transfer characteristics and material properties effects [ASME PAPER 69-GT-107]
09 p1619 A69-22523

Torsional vibrations of unstiffened cylindrical tubes analysis by differential equations and applications to free-free rectangular cross section
09 p1620 A69-22769

Crack propagation in plates and shells subjected to bending and direct loading, noting plate analysis modification for crack touching on compression side
10 p1795 A69-23061

Fatigue crack propagation in cylindrical shells under fluctuating internal pressure, considering stress intensity factor
10 p1795 A69-23066

Proton flux density at axial point of thin cylindrical and slab shell shields bombarded by isotropic inverse power law spectrum of protons in space
10 p1723 A69-23165

Torsional vibrations of composite elastic orthotropic cylinders, including cylindrical shells and isotropic composite cylinder
10 p1800 A69-23243

Axisymmetric free edge buckling of semiinfinite heterogenous orthotropic cylindrical shells in axial compression, noting stability condition
10 p1802 A69-23889

Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-fluid interaction [ASME PAPER 69-VIBR-4]
10 p1805 A69-24162

Thin plastic shell theory based on static and geometrical relations for shallow and circular cylindrical shells
11 p1978 A69-24807

Postbuckling behavior and subsequent imperfection sensitivity of thin walled cylinders subjected to torsion, considering perturbation
11 p1979 A69-24814

Stiffener geometry and spacing effects on buckling of axially compressed cylindrical and conical shells
11 p1979 A69-24815

Semiinfinite circular cylindrical shell buckling under axial load, computing forces, moments and displacements by thin shell equation
11 p1979 A69-24818

Thermal stresses in longitudinally reinforced cylindrical shell, combining moment and semimomentless shell theories to obtain numerical results
11 p1981 A69-24942

Stress analysis of reinforced cylindrical shells under external loading, using Vlasov semimomentless theory
11 p1982 A69-24949

Three dimensional theory of elasticity for finite hollow cylinder under axisymmetric deformation, considering stress and pressure distribution over surface
11 p1983 A69-25022

Heat generation in thin viscoelastic cylindrical shell with relaxation and resonance dispersion during torsional vibration
11 p2000 A69-25168

Stress concentration around curvilinear holes in three layer spherical and cylindrical isotropic shells with hard and soft fillers under external loads
11 p1984 A69-25171

Optimal parameters selection for rib-reinforced cylindrical shells determined with respect to axial critical loading magnitude
11 p1985 A69-25173

Critical axial compressive load for cylindrical shells reinforced with longitudinal ribs, noting internal pressure and rib spacing effects
11 p1985 A69-25177

Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers
11 p1987 A69-25380

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth, top impedance and ullage pressure by Donnell theory
11 p1989 A69-25499

Cylindrical shells spectral response to random acoustic pressure excitation, noting natural modes and inner air column effects
11 p1990 A69-25506

Two dimensional elastic stress wave propagation in thick multilayered cylindrical shells for nonuniform external pressure distribution
11 p1991 A69-25511

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings
11 p1992 A69-25520

Free vibration of discretely stiffened cylindrical shells with arbitrary end conditions programmed for digital computer, considering flexure, extension, torsion and nonsymmetric stiffener cross section
11 p1992 A69-25521

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions
12 p2177 A69-25881

Method for preparation of vitreous materials in hollow cylindrical form, considering chemical homogeneity, porosity and geometrical shape
12 p2101 A69-25936

Dynamic programming method for upper bound on collapse load of rotationally symmetric thin cylindrical shell under ring loading
12 p2179 A69-26214

Thermal stresses in hollow finite circular cylinder having smooth rigid insulating cover on curved surfaces and temperature distribution on plane ends
12 p2180 A69-26268

Hollow circular viscoelastic cylinder axisymmetric plain strain problem, considering displacement, traction and mixed boundary conditions, noting applicability to rocket solid fuel core
12 p2181 A69-26396

Natural frequencies of ring-stiffened thin walled cylindrical shell determined by partial differential equations of motion, allowing for eccentricity
12 p2184 A69-26810

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces
12 p2185 A69-26821

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations
12 p2186 A69-26841

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression
12 p2187 A69-26843

Monograph on shell calculations by linear three dimensional elasticity theory, relating displacements and stresses
12 p2188 A69-26902

Minimum volume face sheet design of circular cylindrical sandwich shell obeying Mises yield criterion for loads transverse to lateral surface and axisymmetric
12 p2189 A69-27117

Stress distributions in two normally intersecting cylindrical shells subjected to internal pressure, using Donnell and Flugge equations
13 p2359 A69-27255

Thin cylindrical shell vibration with three supports analyzed by minimizing Lagrangian of vibration, obtaining frequencies and modes
13 p2359 A69-27257

Dynamic response of imperfect circular cylinder to constant velocity load, noting applicability of Hoff nonlinear equation for dynamic buckling of columns
13 p2359 A69-27260

Finite element displacement method extension to include geometric nonlinearity applied to arbitrary plate element, shallow cylindrical shell and shallow hyperbolic paraboloid
13 p2361 A69-27441

Torsional oscillation of cylindrical shell of non-homogeneous material under periodic shearing force
13 p2361 A69-27462

Imperfection surface effect on buckling load of circular cylindrical shell under axial compression, locating limit points of postbuckled states
13 p2362 A69-28122

Membrane and bending stresses around elliptic hole in thin circular cylindrical shell, considering axial tension [NAL-TN-13]
13 p2362 A69-28123

Elastoplastic cylindrical shell instability determination under axial compression applied to inelastic solids 13 p2363 A69-28124

Donnell small displacement equations for arbitrary open noncircular cylindrical shells under arbitrary normal pressure loadings 13 p2365 A69-28248

Stressed state of cylindrical circular shell clamped at edges and subjected to concentrated radial forces 13 p2368 A69-28322

Infinite cylindrical shell stability under circular load solved by linearization about bending moment stress state and Galerkin method 14 p2531 A69-28808

Stress concentration around holes in thin shells, including analysis of stress-strain state in cylindrical and spherical shells 14 p2532 A69-28977

Axisymmetric thermoelastic vibrations of infinite and finite cylindrical shells, determining natural frequencies and stress wave propagation 14 p2532 A69-28979

Thermoelastic stress-strain state of infinite circular cylindrical shell with elasticity modulus temperature dependence expressed by exponential function 14 p2532 A69-28980

Orthotropic cylindrical shell stability under uniform axial compression and internal pressure, taking into account subcritical state duration 14 p2532 A69-28981

Heterogeneous orthotropic circular cylindrical shell stability during axial critical compression 14 p2533 A69-29024

Buckling of ring stiffened cylinders subject to axial compression, considering prebuckling lateral wall displacements 14 p2534 A69-29030

Zero-moment cylindrical meshed shell equilibrium equations, discussing solution methods and difference analog 14 p2536 A69-29473

Flexural vibrations of unstiffened doubly symmetric cylindrical tubes, obtaining natural frequencies of simply supported rectangular tube 15 p2703 A69-30210

Oscillations of freely supported cylindrical shell of arbitrary cross section with breaks along generatrix, determining eigenvalue of infinite matrix with normal determinant 15 p2707 A69-30581

Plane monochromatic and pulsed electromagnetic waves penetration into metal cylindrical shells, deriving equations for electromagnetic field in interior 15 p2569 A69-30950

Bending surface of shells under crosswise load analyzed by moire method, considering rotating cylindrical surfaces 15 p2713 A69-31056

Cylindrical shell bending subjected to internal pressure and force uniformly distributed on round section solved by numerical integration of differential equations 15 p2653 A69-31195

Laminar thin orthotropic cylindrical shells natural and forced oscillations and dynamic deflection coefficient 15 p2715 A69-31202

Reinforced cylindrical shell stability under external compression load by pressurized air, determining critical pressure 15 p2715 A69-31204

Rotatory cylindrical shells supported at corners under symmetric load, determining deformation in arbitrary locations by moire method 15 p2715 A69-31546

Approximate analytic solution to transient response of infinitely long cylindrical shell surrounded by viscoelastic medium, discussing composite and elastic shells [AIAA PAPER 68-351] 16 p2871 A69-31877

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations 16 p2872 A69-31905

Buckling load of cylindrical shell with inclined stiffeners, using method for stability of thin walled cylinder under transverse end load at free end 16 p2872 A69-31912

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 16 p2873 A69-32131

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem [AIAA PAPER 68-318] 16 p2874 A69-32158

Cylindrical shell aeroelastic dynamic stability subjected to supersonic flow field, considering geometric imperfections, edge constraint and prestability deformation [AIAA PAPER 68-285] 16 p2874 A69-32159

Oscillations and stability of cylindrical shell in gas flow taking into account inertia forces 16 p2875 A69-32287

Stresses in perforated ribbed cylindrical shell subjected to internal pressure using brittle coating, electrical strain gages, photoelasticity and micrometers 16 p2876 A69-32784

Reradiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations 16 p2741 A69-32799

Supersonic flutter in square panels and cylindrical shells, measuring critical dynamic pressure 17 p3051 A69-32923

Damped vibrations of elastic open cylindrical shell under arbitrary loading, obtaining mean square of bending from correlation theory 17 p3054 A69-33094

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method 17 p3055 A69-33131

Nonlinear flexural vibrations excitation in cylindrical shell by longitudinal harmonic load, discussing solution of partial differential equations of motion 17 p3064 A69-33920

Cylindrical aluminum shell dynamic stability, analyzing steady state parametric oscillations, mode shape, frequency, amplitude and damping 17 p3065 A69-33929

Pressurized cylindrical shell creep analysis by elastic procedure extension using computer program 17 p3067 A69-34211

Longitudinal crack in cylindrical shell under internal pressure, calculating normal and bending stress singularity strengths against curvature/cracklength parameter 18 p3212 A69-34346

Cylindrical and conical panels dynamic responses to time varying load distributions, using trigonometric series coupled with finite difference methods [ASME PAPER 69-APM-22] 18 p3214 A69-34396

Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting inextensibility constraint and equations of motion roles [ASME PAPER 69-APM-26] 18 p3214 A69-34399

Resonance effects in finite hollow cylinder immersed in ideal compressible fluid and exposed to compression wave 18 p3215 A69-34567

Cylindrical shell stability under axial compression, studying buckling process and wave formation 18 p3217 A69-34597

Thin walled cylindrical shells deflections under axial impact load, assuming deformations resembling cylindrical surface bending 18 p3217 A69-34599

Stress and displacement waves propagation in thin walled elastic cylindrical shell under compressive axisymmetric force based on momentless theory 18 p3218 A69-34600

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves 18 p3218 A69-34624

Axisymmetric deformation of cylindrical wound fiberglass reinforced plastic shell analyzed by methods of rigid normals and nonlinearly elastic fiber system 18 p3222 A69-34974

Nonlinear axisymmetric oscillations and motion stability of cylindrical wound elastic glassfiber shell under time dependent uniform internal pressure 18 p3222 A69-34975

Boundary conditions of orthotropic shell stability under external pressure and axial tension, analyzing critical pressure by strain energy method 18 p3222 A69-34977

Constrained elastoplastic torsion of closed thin walled cylindrical shells, analyzing tangential and normal stress by using equilibrium equations 18 p3222 A69-34978

Dynamic instability regions of parametric resonance of cylindrical shells with curved generating lines under axial and radial pressure 18 p3223 A69-34979

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading 18 p3224 A69-35319

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model 18 p3225 A69-35357

Microstresses in hollow-fiber reinforced cylindrical shell under longitudinal shear stress, determining modulus of elasticity and optimum component ratios 18 p3225 A69-35369

Cylindrical reinforced steel shells stability under external pressure 18 p3225 A69-35371

Stress-strain state of open cylindrical shells with arbitrary cross section determined for clamped-clamped, clamped-free and free-free supported shells 18 p3225 A69-35372

Plane LF oscillations of eccentric cylinder under harmonic pressure applied to lateral surfaces, noting natural oscillations 18 p3226 A69-35380

Asymptotic solution of supersonic linearized nonisentropic flow of viscous and heat conducting gas with internal heat sources past cylindrical shell, deriving surface pressure 18 p3089 A69-35460

Asymptotic theory of pressure on cylindrical shell subjected to unsteady oscillations in external and internal linearized supersonic flow using Laplace and Fourier transforms 18 p3089 A69-35461

Resonant oscillations amplitude of nonlinearly elastic hinged cylindrical shell determined with cubic equation taking into account Hooke law, linear stresses, shell theory displacements, etc 19 p3435 A69-35843

Natural frequencies and mode shapes of vibration of cylindrical shells orthogonally stiffened with rings and stringers [AIAA PAPER 68-349] 19 p3437 A69-35948

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc 19 p3437 A69-36201

Closed form solutions for rigid viscoplastic cylindrical shell under dynamic loading based on constitutive equations for rate sensitive plastic material 19 p3439 A69-36478

Equilibrium equations for longitudinally hinged nonshallow cylindrical shells transformed into coupled equations with constant coefficients 19 p3439 A69-36581

Stress analysis of cylindrical shell-end closure junction for optimum pressure vessel configuration prediction for nuclear reactor applications 19 p3447 A69-36861

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design 20 p3621 A69-37064

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient 20 p3621 A69-37076

Thermal stress concentration near elliptical hole in thin walled liquid filled cylindrical shell in presence of temperature gradient across shell cross section 20 p3622 A69-37325

Free vibrational characteristics of thin walled circular cylindrical shells with layers of anisotropic elastic material laminated about middle surface 20 p3627 A69-37767

Axisymmetric vibrations of thin drums consisting of circular cylindrical shell and two circular end plates 20 p3629 A69-38114

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress [ASM PAPER W9-13.3] 21 p3833 A69-38658

Steady state temperature fields and thermal stresses determined in finite cylindrical shell by optimal parameters of reinforcing circular rib 21 p3834 A69-38714

Asymmetrical oscillations of cylindrical shell with elastic bottom containing liquid, discussing liquid level influence on natural oscillation frequencies 21 p3834 A69-38718

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations 21 p3834 A69-38719

Natural oscillations of free surface liquid and elastic bottom of cylindrical cavity determined by integrodifferential equations based on liquid level
21 p3693 A69-38720

Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method
21 p3835 A69-38723

Circular cylindrical freely supported shell moment state stability, solving critical parameters by infinite matrix eigenvalues determination
21 p3835 A69-38724

Optimal control of vibrations of liquid in cylindrical container with vertical generatrix and flat bottom, using dynamic programming
21 p3694 A69-38849

Free vibration of thin cylindrical shells with thickness discontinuity, considering natural frequencies and mode shapes dependence on thick/thin ratio
21 p3836 A69-38984

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure
21 p3837 A69-39088

Dynamic behavior of infinitely long cylindrical shells of ideally rigid plastic materials strengthened with ring ribs, determining distribution of moments and displacements
21 p3837 A69-39156

Buckling stability of thin cylindrical shell under torsion, allowing for finite displacements due to shear in initial stress-strain state
21 p3838 A69-39187

Stability of free and clamped spherical and circular cylindrical shells subjected to uniform or nonuniform heating, discussing effects of temperature stresses
21 p3838 A69-39190

Stiffness matrix for curved membrane shell, outlining discrete element representation of cylinders with widely spaced circumferential stiffeners
21 p3842 A69-39305

Computer program for stress analysis of cylindrical pressure vessel with flat-end closures by thin shell theory
21 p3842 A69-39306

Cylindrical shell stability during loading by uniform external pressure represented by Fourier series, determining critical pressure by solving nonlinear equations
21 p3846 A69-39715

Cylindrical shells vibrations using Lagrangian based on Flügge system of stress-strain relations
22 p4039 A69-39924

Intersection plane stresses in internally pressurized cylindrical shells joined over elliptic face
22 p4040 A69-39978

Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure
22 p4042 A69-40171

Nonlinear stability for closed thin walled orthotropic cylindrical shell subjected to uniform external pressure, using Bubnov-Galerkin method for approximate solution
22 p4042 A69-40454

Axisymmetric vibrations of semiinfinite cylindrical shell constructed of fiber reinforced composite layers, obtaining frequency equation from equations of motions
22 p4044 A69-40559

Rigid thermoplastic cylindrical shell creep under axisymmetrical loads, giving computer algorithm and time dependent criterion for rupture strength
22 p4045 A69-40750

Cylindrical shells bending by finite element/cylindrical strips/ method, considering shells of arbitrary shape and variable thickness
22 p4046 A69-40968

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending
22 p4046 A69-40969

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
22 p4046 A69-41040

Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components
22 p4046 A69-41041

Prebuckling deformation influence on compressive buckling load for orthotropic cylindrical shells with elasticity principal axes in axial and circumferential directions
22 p4047 A69-41182

Closed circular cylindrical shell stability and oscillations under ring-shaped axial load, defining stress-strain state by radial displacements and force function
22 p4049 A69-41280

Nonlinear differential equations for large deflections of multisandwich shells of arbitrary shape built of stiff and weak elastic layers, considering cylindrical shells
23 p4226 A69-41572

Statics of axisymmetric deformation of cylindrical and conical shells of revolution of moderate thickness under uniformly and nonuniformly distributed loads
23 p4226 A69-41705

Rib cross sections distribution for cylindrical shell under concentrated longitudinal forces obtainable by designing for minimum strain energy
23 p4228 A69-41988

Cylindrical shell load carrying capacity under axial compression, considering middle surface initial distortions influence
23 p4228 A69-41989

Discrete rib effect on buckling resistance of cylindrical shell under combined external and axial compression loads, using Laplace transforms
23 p4229 A69-41990

Stability of orthotropic cylindrical shells reinforced at edges by elastic ribs, analyzing axisymmetric buckling, natural oscillations and rigidity characteristics
23 p4229 A69-41992

Algorithm for stress analysis of structurally orthotropic conical and cylindrical shells, resolving first order differential equations
23 p4229 A69-42000

Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001

Creep stress analysis of circular cylindrical shells under axisymmetric loading, plotting stresses and deformations for various parameters
23 p4233 A69-42352

Circular cylindrical thin walled shells creep buckling under uniform axial compression
23 p4234 A69-42413

Dynamic response of anisotropic elastic cylindrical and spherical shells determined by application of Hankel transforms, considering time dependence of loads
23 p4235 A69-42481

Hot gas flow through multilayer cylindrical shells, calculating temperature fields in walls
24 p4407 A69-42588

Local stress distribution in cylindrical shells at concentrated load area solved by shallow shell theory
24 p4395 A69-42593

Cylindrical shell with supersonic nozzle end, describing axisymmetric oscillations forced by burning filler in gas stream
24 p4300 A69-43073

Transverse acoustic wave excitation of elastic circular cylindrical sandwich shell submerged in infinite fluid medium, describing simultaneous equations development for modal response
[ASME PAPER 69-APMW-17]
24 p4401 A69-43100

Flexural vibrations of rectangular cross sectioned rings, solving characteristic value problem for finite circular cylindrical shell
24 p4404 A69-43629

Circular cylindrical photoelastic shells buckling modes under axial compression using high speed isoclinic photography, discussing shallow shell equations applicability to early stages
24 p4404 A69-43652

Plastic inhomogeneity effects on yield stress of isotropic spherical shell and long cylindrical tube under internal pressure
24 p4405 A69-43672

CYLINDRICAL TANKS

Unsteady transient flow of viscous fluid in suddenly rotating open pot, taking into account effect of bottom in determination of velocity profile
03 p0414 A69-13019

Axisymmetric vibration modes of cylindrical-hemispherical membrane tank partly filled with liquid
[AIAA PAPER 67-75]
09 p1482 A69-21940

Rigid top mass effect on longitudinal response of model vehicle propellant tank, determining natural frequencies and forced asymmetric response
09 p1616 A69-21979

Planar ribbon winding for buildup control of material near polar openings of filament wound vessels, discussing ribbon width and density
09 p1507 A69-22328

Natural frequencies and mode shapes for longitudinal oscillations of liquid filled elastic circular cylindrical tank with flexible inverted conical bulkhead
[ASME PAPER 69-VIBR-11]
10 p1806 A69-24165

Unsteady heating of fuel mixture in vertical cylindrical container with Arrhenius heat source, discussing heat conduction equations and wall temperature effects
11 p2001 A69-25192

Liquid draining motion from transversely moving cylindrical tank in time varying gravity field with outlet pipe at bottom, discussing flow rate and free surface
[AIAA PAPER 69-679]
17 p2953 A69-33440

Fracture mechanics applied to cylindrical pressure vessels containing longitudinal defects for fracture behavior prediction from fracture toughness or stress intensity factor
19 p3439 A69-36439

Thin cylindrical pressure vessels with circular cutouts and radial branches, observing limit pressures during plastic deformation
20 p3629 A69-38027

Circular baffle mounted above flat-bottomed cylindrical tank outlet, discussing effect on remaining tank fluid volume and flow behavior under low gravity conditions
21 p3696 A69-39232

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects
[AIAA PAPER 69-1004]
22 p3921 A69-40378

CYLINDRICAL WAVES

Diffraction of cylindrical and plane waves in system of two parallel circular cylinders, using equivalent circuit method
02 p0217 A69-12261

Diffraction of cylindrical waves at half plane in cold anisotropic plasma, using Fresnel integrals
02 p0293 A69-12842

Propagation of longitudinal transverse loading and unloading waves /with cylindrical symmetry/ in non-homogeneous elastic/viscoplastic medium, accounting for plastic dilatational strains
03 p0528 A69-13929

Cylindrical wave approximation modified to include axial effects, discussing time histories of deflection and applicability range
04 p0671 A69-14410

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction
04 p0574 A69-14459

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces
07 p1195 A69-19747

Cylindrical electromagnetic waves diffraction at impedance wedge in anisotropic cold plasma, using Maxwell equation and double contour integral
09 p1545 A69-21505

Analytical method for perturbations by spherical and cylindrical shock waves flowing toward common center
10 p1677 A69-22899

Converging cylindrical shock waves produced by discharging condenser bank into single turn coil surrounding gas container /theta pinch discharge/
10 p1678 A69-22933

Propagation of extensional cylindrical waves in elastic plates with free boundaries, considering plane stress and Lamb dispersion
11 p1969 A69-24414

Diffraction theory of schlieren photometric slot and wire methods for cylindrical light wave of even order, discussing Fresnel diffraction for spherical wave
12 p2088 A69-26180

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction
14 p2418 A69-28830

Cylindrical wave propagation in thermoelastic incompressible isotropic solids, considering cases of zero and nonzero coefficient of thermic dilation
15 p2707 A69-30626

Uniform approximation mathematical theory applied to wave propagation problems, considering cylindrical waves and rainbows and glory scattering
15 p2653 A69-31165

Scattering by cylindrical post of complex permittivity /plasma/ in rectangular waveguide, calculating reflection, transmission and absorption coefficients by computer
16 p2756 A69-31578

Fluid-shell interactions, using piston theory and cylindrical-wave approximations

18 p3223 A69-35174

Gas motion behind cylindrical shock wave created by piston motion in gravitating medium

19 p3298 A69-36386

Perturbation solution in power and asymptotic series for initial collapse phases of impulsively generated converging cylindrical and spherical shock waves in perfect gas

21 p3692 A69-38688

CYLINDROIDS

U CYLINDRICAL BODIES

CYSTEAMINE

Transverse acceleration overstrain effect on mice sensitivity to cystamine

17 p2909 A69-33386

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation

22 p3877 A69-40285

CYSTEINE

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species

13 p2216 A69-28620

CYTOCHROMES

Electron transport of Halobacterium cutirubrum, discussing spectrophotometric identification of cytochromes

07 p1068 A69-19481

Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH

20 p3484 A69-37101

CYTOGENESIS

Survival rates of continuously cultivated Chlorella plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

22 p3876 A69-40275

CYTOLOGY

Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights

01 p0016 A69-10948

Cytological analysis of Tradescantia paludosa microspores for space flight influence onboard Cosmos 110

01 p0018 A69-11317

Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia

02 p0198 A69-11502

Axial units with basal plates in spermatozoa of Chlorella greenlandica negatively stained with phosphotungstic acid, showing doublet microtubules

07 p1066 A69-19263

Hypoxic hypoxia effect on catecholamine content and cytochemical changes in hypothalamus of cat exposed to simulated altitude, using Euler method

14 p2407 A69-29297

Oxygen physiological and biochemical effects on Pseudomonas saccharophila, discussing sucrose uptake, lipid synthesis and polysaccharide formation

15 p2556 A69-31045

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role

17 p2907 A69-32942

Mitochondrion-endoplasmic reticulum connection in hepatocytes, discussing possible protein molecule transfer

23 p4083 A69-41455

CYTOPLASM

Bioadhesive investigation in echinoderms extended to class Holothuroidea, using electron microscope with correlative light microscopy for tube feet of sea cucumbers

05 p0708 A69-15984

Cytoplasmic and ciliary connections between inner and outer segments of mammalian visual receptors

22 p3881 A69-40857

Cytoplasmic protein synthesis mechanism using rats heart-lung preparation with precise hemodynamic parameters control, noting variance with change in cardiac work level

23 p4083 A69-41456

CZECHOSLOVAKIA

Petrology of Czechoslovak moldavites, tabulating properties, mapping locations and distribution

23 p4210 A69-41350

Aero L-39 low wing cantilever monoplane jet trainer developed in Czechoslovakia

24 p4251 A69-42797

Czechoslovak L-400 high wing short range STOL transport aircraft powered turboprop engines, discussing passenger and cargo version

24 p4251 A69-42799

CZOCZRALSKI METHOD

Yttrium garnet ferrite crystals grown by Czochralski method from inductor crucible exhibiting orthoferrite, iron garnet and eutectic phases along height

13 p3231 A69-28001

D

D LINES

Automatic remotely operated sodium D line reversal temperature measuring apparatus, analyzing systematic errors

06 p1035 A69-17932

H alpha, H beta and D sub 3 /helium/ emission photographs of active prominence of July 9, 1966 using monochromatic filters for characteristic emissions from hydrogen and helium

10 p1764 A69-23738

Solar flares associated with intensive sodium D lines emission observed photoelectrically with telescope in unperturbed region, analyzing possibilities of comets solar origin

15 p2674 A69-30506

Number and mass of sodium atoms in comet Ikeya-Seki 1965f head calculated from spectral observations, ascribing D lines to resonance scattering of photospheric radiation

15 p2685 A69-30526

Solar Mg b and Na D line spectra, computing profiles for Doppler cores of lines for multilevel model atoms and selected chromospheric parameter ranges

15 p2693 A69-30779

H alpha/D3 intensity ratio variations in peripheral regions of prominences may be due to dynamic conditions of material emitting radiations

17 p3029 A69-33051

Interferometric photoelectric scans of interstellar Na D-lines in stellar spectra using Pepsios spectrometer

20 p3611 A69-38148

Sodium D line profiles in interstellar clouds, determining absorbers velocity distributions

20 p3611 A69-38149

Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency

21 p3796 A69-38479

Total solar eclipse of 5 February 1962 observed for spectrophotometry of flash spectrum, finding abnormal intensity gradients of H alpha and D3 lines

24 p4388 A69-43636

D REGION

Electron production rate and density created by galactic and solar cosmic rays in lower D region, considering ionization for PCA

01 p0063 A69-10426

D region composition at and shortly after sunrise, noting negative ion factor changes, ionization source and quasi-equilibrium conditions

01 p0066 A69-10597

LF continuous wave rocket propagation in D region presented in terms of electron density profiles

01 p0076 A69-11232

Sunrise effects in lower D region by solar eclipse, discussing anomaly in ionospheric absorption due to negative ion factor or recombination coefficient

02 p0246 A69-12767

Narrowing of ionospheric absorption anomaly in D region during solar eclipses in long and medium wave ranges due to recombination equation variability

02 p0246 A69-12770

Solar X ray control of D layer based on Explorer 33 data, computing electron production rates due to typical X ray flux

03 p0500 A69-13224

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers

03 p0394 A69-13378

Solar X ray source identification using D layer ionization behavior during eclipse

04 p0650 A69-15533

Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter

day

05 p0758 A69-16411

Ionospheric D layer electron concentration profile from radio wave absorption frequency dependence

06 p0920 A69-17729

Irregularities producing partial radio wave reflection from midlatitude D region attributed to insufficient distribution

07 p1078 A69-18914

D region electron density vertical profiles measured using partially reflected echoes from lower ionosphere

08 p1307 A69-20189

D region electron concentrations and collision frequencies obtained from high power wave interactions experiment, presenting average winter collision frequency model

09 p1489 A69-21702

Diurnal variation of D region electron production rates, discussing Lyman alpha ionization of nitric oxide

09 p1577 A69-21717

Corpuscular radiation contributions to D layer ionization determined from intensity measurements

09 p1577 A69-21770

Rocket sounding data on ionospheric currents at mid and low latitudes, showing absence in D and above E region

10 p1686 A69-23909

Long wave propagation at 164 kHz in India during 1966 and 1967, determining D region recombination coefficient and long wave absorption diurnal variation

10 p1659 A69-24065

Iono-index about hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions

12 p2148 A69-26107

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers

14 p2410 A69-28829

Vapor phase reaction sequence to explain water cluster ions in D region

14 p2434 A69-28940

Ion chemistry of D and E regions to be studied during years of solar maximum in framework of IQSY/IUCSTP

14 p2439 A69-29111

British and Soviet D region electron density distributions from same VLF and LF propagation data

14 p2439 A69-29112

Semimonthly lunar variation in D region absorption, discussing phase reversal of lunar tides between equatorial and high latitudes

14 p2439 A69-29113

Rocket sounding measurements of ionospheric D region electron density profile during 20 May 1966 solar eclipse, discussing D region ionization source

14 p2439 A69-29116

D region ionizable constituent density /presumably nitric oxide/ measured, using blunt probe to detect changes in conductivity produced by Lyman alpha ionizing radiation

15 p2598 A69-31316

Solar X rays intensity and spectrum effects on e layer critical frequency and D region ionospheric absorption

15 p2677 A69-31346

Ground based partial reflection and cross modulation or wave interaction techniques compared for studying D region electron densities

15 p2606 A69-31537

Lower auroral ionosphere rocket measurements of electrons, positive ions and energy particles, deriving height variation of ion pair production and ion-ion recombination

16 p2778 A69-32187

LF ground based absorption results compared with rocket measured D region electron density profiles

16 p2778 A69-32188

Ionosphere D region low field conductivity in presence of high field disturbing signal, assuming inelastic electron-neutral particle collisions

16 p2850 A69-32190

Atmospheric absorption calculations, noting direct D layer reflection effects on lower HF oblique propagation

16 p2752 A69-32389

D-1 SATELLITE

French satellites structure, power and communications systems, stabilization and detector groups

02 p0333 A69-11917

D1A satellite Doppler observations, noting effect of observation grouping on ground stations mutual position

21 p3701 A69-38336

Nocturnal D region conductivity enhancement relation to X radiation from Scorpius XR-1 and other sources, calculating ion production rate
17 p3024 A69-33378

Lower ionospheric electron concentration and collision frequency measurements by Nike-Apache rockets, suggesting geomagnetic anomaly in D region
18 p3127 A69-34798

D region electron densities from multifrequency absorption measurements by proton spectra analysis, noting cubic approximation
18 p3127 A69-34799

Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover
18 p3127 A69-34800

Positive ion concentration in D region, using spherical stationary electrostatic probe in weakly ionized collision dominated gas
18 p3128 A69-34804

Ionospheric radio propagation, considering D and F region theory and ionospheric disturbances
19 p3303 A69-36428

Ionosphere characteristics in terms of airglow, describing daytime F/D layers formation model provided by photoionization, loss processes and ambipolar diffusion
21 p3712 A69-38517

Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods
21 p3672 A69-38558

Identification, position and temperature of solar X ray sources derived from D layer ionization radio absorption behavior during eclipses and lunar reflection
22 p4004 A69-40308

Lunar semimonthly variations in noon values of D region absorption at Singapore, noting opposite phases of lunar tides in D and F regions
22 p4035 A69-41211

Density model for free oscillations of earth, noting dependence on core radius and S wave velocity at top and bottom of D layer
23 p4158 A69-42117

DACRON [TRADEMARK]
Mission sequential environment effects on Dacron parachute material mechanical properties
[AIAA PAPER 69-1018] 22 p3923 A69-40390

DAEMO [DATA ANALYSIS]
U DATA PROCESSING
U DATA REDUCTION
U DATA TRANSMISSION

DAMAGE
NT IMPACT DAMAGE
NT METEORITIC DAMAGE
NT PROTON DAMAGE
NT RADIATION DAMAGE
NT RAIN IMPACT DAMAGE
Cumulative damage theories application to fatigue data for high strength materials, discussing stress levels
04 p0668 A69-14379

Aircraft accident prevention and damage control
06 p0878 A69-16961

Sonic boom damage legal claims, discussing causal relationship validity and claims processing
14 p2541 A69-29155

Sonic boom damage to structures from supersonic aircraft overflights using inductive and deductive approaches
15 p2585 A69-30370

Legal, social and physical effects of supersonic flight, discussing damage claims validity and recovery resulting from breaking of sound barrier
17 p3075 A69-32841

DAMPERS
Pendulum motion about stationary axis of solid body containing damper, ascribing instability to center of gravity shift with respect to cavity
18 p3135 A69-34557

DAMPING
NT ELASTIC DAMPING
NT LANDAU DAMPING
NT VIBRATION DAMPING
NT VISCOUS DAMPING
Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design
04 p0630 A69-14295

Circular plate elastic stability under unidirectional compression, using Rayleigh-Ritz- Timoshenko method to determine buckling load
04 p0683 A69-15515

Shock wave damping at large distances from body situated in ideal gas three dimensional flow
04 p0591 A69-15535

Stability of Al-Mg alloy spherical shells under uniform external pressure beyond elastic limit
05 p0843 A69-16693

Ballistic deviations of gyropendulum vertical damped by astatic gyroscope
06 p0927 A69-17687

Eddy current damping systems for gravity gradient stabilized satellites, discussing electromagnetic torque and various parametric relationships
07 p1228 A69-18341

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient
09 p1609 A69-21761

Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression
09 p1615 A69-21921

Laminar hypersonic roll damping derivatives for 10 degree half angle cone at zero angle of attack for environmental flow conditions of hypersonic wind tunnel
09 p1430 A69-21958

Mathieu equation with square law damping effect on first order instability range
10 p1724 A69-22920

Piezoelectric transducer theory, discussing acoustically matched sandwich type damper and calculating frequency characteristics
10 p1697 A69-24074

Damping of solid state laser relaxation oscillations in power output due to diffusion of excitation
10 p1706 A69-24079

Response and stability of self sustained two degrees of freedom system with nonlinear damping, noting harmonic oscillations
[ASME PAPER 69-VIBR-24] 10 p1806 A69-24171

Bilinear hysteretic system undergoing random vibration, substantiating linearization analysis with analog computer simulation and comparing lifetime to linear system
[ASME PAPER 69-VIBR-25] 10 p1806 A69-24173

Structural damping coefficient of metals determined from complex Young modulus with transmissibility, using mass loaded cantilever beam experiment
[ASME PAPER 69-VIBR-36] 10 p1807 A69-24175

Damping accuracy sensitivity to circuit element tolerances in polynomial filters
11 p1850 A69-24970

Confidence limits determined for damping parameter of complex stationary Gaussian Markov process
11 p1910 A69-25700

Pi 2 micropulsations at African low latitude stations, considering damping effect on ionospheric micropulsation transmission signal dispersion and SNR
12 p2074 A69-26959

Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures
15 p2639 A69-30586

Transient behavior of finite damped cantilever beam and circular plate analyzed by direct finite element method, noting applicability to dynamic problems
15 p2710 A69-30868

Aircraft neutral stability empirical and mathematical aspects, considering control stabilization, damping and phugoid motion
15 p2551 A69-31012

Weakly damped transverse and thermal waves development and propagation in viscous heat conducting incompressible fluid under temperature and gravitational fields
15 p2718 A69-31168

Electronic-ultrasonic amplifiers with external electron stream and longitudinal or surface wave studied for damping influence, deriving dispersion equation
16 p2761 A69-32061

Liapunov functions applications in motion stability theory problems, considering dynamic systems, periodic orbits, optimum damping and control
16 p2804 A69-32248

Asymptotic solutions to second order differential equations with slowly varying parameters and large resistance applied to mathematical pendulum damped swinging motion
16 p2804 A69-32253

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests
[AIAA PAPER 69-531] 16 p2833 A69-32691

Elastic stability of warped rods, using small oscillations method for varying end conditions and torsional-moment vector behavior
17 p3057 A69-33196

Damping of gravity gradient stabilized satellites by hysteresis of materials, friction of viscous fluids, magnetic hysteresis and Foucault currents
17 p3047 A69-33230

Gravity gradient satellite stabilization and magnetic hysteresis damping systems, outlining energy dissipation device involving torques
17 p3047 A69-33231

Damping properties of multilayer coatings for aircraft structures analyzed on duralumin samples subjected to bending at room, elevated and low temperatures
17 p2993 A69-33941

Inertial characteristics determination error influence of solid body on damping system parameters
18 p3171 A69-34562

Adjoint system for determining equilibrium stability of elastic continuum subjected to follower type surface tractions
19 p3446 A69-36835

Damped linear system asymptotic stability inferred from dynamical equation structure, considering matrix eigenvalues and Thomson-Tait-Chetaev stability theorem
20 p3623 A69-37531

Damping effects on elastic systems stability under nonconservative forces, correlating stability and quasi-stability regions
22 p4040 A69-39981

Real shear modulus and mechanical damping characteristics of cured adhesives measured for temperature effect, using torsion pendulum apparatus
24 p4338 A69-43460

DAMPING IN PITCH

U PITCH [INCLINATION]

DAMPING IN ROLL

U ROLL

DAMPING IN YAW

U YAW

DAMPING TESTS

Spadocyte slide rule for damping determination from vibration decay traces, noting use in flight flutter tests
01 p0087 A69-11029

Damping properties of glass fiber reinforced plastics measured by flexural vibrations
03 p0454 A69-13824

Magnetic sample-and-hold damping using geomagnetic field for libration damping of gravity gradient stabilized satellite in near synchronous equatorial orbit
07 p1227 A69-18337

Friction damping properties of deployed structures vibrating in weightless state compared to damping in space for true determination
12 p2183 A69-26792

Vibrations attenuation by viscoelastic sandwich shear damping, discussing examples of aircraft equipment racks, gyro and airborne circuit board mountings
15 p2622 A69-30705

Damping constant of sandwich samples with foam plastic filler subjected to torsional and flexural vibrations determined for aircraft design applications
17 p2993 A69-33942

Acoustic and internal dampings in freely supported uniform beams of circular and rectangular section, showing frequency dependence and vacuum effect
20 p3620 A69-37062

DAMPNESS

U MOISTURE CONTENT

DANGER

U HAZARDS

DARK ADAPTATION

Detection time to light point source noting response to dark, star field and glare source backgrounds
06 p0881 A69-17215

Dark adaptation mechanisms studied from light intensity recovery after experimental flash, using electroretinography methods
10 p1647 A69-23588

Darkness adaptation, observing relationship between left and right eye
16 p2745 A69-32448

Subjective and objective thresholds of darkness adaptation in human subjects grouped from infancy to adulthood, using same variable intensity light source equipment
22 p3881 A69-40861

DARKENING

Photographic layers darkening process, using widely spaced or single giant pulses of ruby laser
13 p2260 A69-27612

- Limb darkening on earth night side observed by Aerobee rocket, with explanation based on atmospheric opacity in water vapor and carbon dioxide bands
17 p2960 A69-33167
- Martian seasonal darkening attributed to windblown dust
24 p4389 A69-43742

DART TURBOPROP ENGINES

U TURBOPROP ENGINES

DASSAULT AIRCRAFT

- Dassault Mercure short haul jumbo jet, discussing production costs and market potential
15 p2550 A69-30317
- Dassault Mercure high speed twin turbojet aircraft, discussing capacity, range, propulsion, profitability threshold, etc
15 p2550 A69-30318
- Short haul transport aircraft development, discussing twin jet Mercure aircraft with low operation cost and Category III weather conditions landing
24 p4250 A69-42565

DATA

NT CONTROL DATA [COMPUTERS]

- Atmospheric turbulence flight tests random data analysis to stimulate power spectra and transfer functions
05 p0767 A69-16756

DATA ACQUISITION

- Satellite automatic picture transmission application to meteorological and hydrological problems including wind estimates, atmospheric stability and cloud distributions
[UN PAPER 68-95300] 01 p0108 A69-10462
- Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology
[UN PAPER 68-95333] 01 p0064 A69-10487
- Orbiting satellite global all-weather oceanographic data acquisition to complement higher resolution data from ships, buoys and aircraft remote sensors
[UN PAPER 68-95878] 01 p0064 A69-10491
- Aerospace research applications in agriculture and forestry, discussing information acquisition for worldwide coverage
[UN PAPER 68-95393] 01 p0065 A69-10504
- Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
01 p0152 A69-10587
- Ministriations in frequency graphs as evidence of standing waves in electrically exploded iron wires
01 p0118 A69-10661
- Sporadic E layer structure observed by rocket borne probes relation to ground based radio techniques, showing agreement between plasma and blanketing frequencies
01 p0070 A69-11161
- Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
02 p0214 A69-11612
- Selenodetic data results and calculations of moon visible physical surface do not agree
02 p0314 A69-11643
- Solar and galactic cosmic rays measurement data to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
02 p0306 A69-11658
- Data acquisition program for Apollo crew motion disturbances experiment consisting of ground simulations and orbital experiment establishing mathematical model of human body
02 p0201 A69-11759
- Meteorological satellites for atmospheric data collection applicable to weather forecasting and synoptic analysis
02 p0277 A69-12778
- Aircraft high level cloud data to estimate vertical distribution of cirriform clouds and tropical tropopause levels on airline routes
03 p0458 A69-13032
- Agricultural remote sensing information system composed of data acquisition, processing and information extraction and interpretation phases, providing knowledge of earth resources
03 p0400 A69-13195
- Preliminary orbit determination, based on data collected during single pass by sensor, permitting preliminary orbital elements and data variance estimation
03 p0518 A69-14249
- Explosive detonated in external electric field to obtain data on gas state behind shock wave
04 p0634 A69-14430

- Observation data on source distribution of atmospheric with respect to distance from observation point
04 p0593 A69-15103
- Analog to digital converter parameters, considering selection of conversion technique
05 p0726 A69-16760
- Aircraft gas turbine component pressure data storage and scanning
05 p0726 A69-16768
- International 28-station global instrumentation ground support network for space tracking and data acquisition
[UN PAPER 68-95912] 06 p1043 A69-17059
- Eole program to further data acquisition for climatology and weather forecasting
[UN PAPER 68-95831] 06 p0950 A69-17073
- Anna 1-B geodetic satellite design, instruments and data acquisition
[UN PAPER 68-96195] 06 p0917 A69-17082
- Narrow and wide angle actinometric instruments on-board Cosmos 122, 144 and 156, describing optical and data acquisition systems
06 p0929 A69-17977
- Ground, aircraft and spacecraft actinometric data compared for clear sky
06 p0951 A69-17982
- Composite solid propellants ignition response measured by imbedded hot wires indicating distributed reaction
[WSCI PAPER 68-36] 07 p1201 A69-18354
- Constant level sounding balloon systems providing global data on atmospheric circulation, discussing icing problems and average life improvement
07 p1053 A69-18955
- Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
07 p1081 A69-19101
- High reliability magnetic tape recorders for satellite, aircraft and drone applications
07 p1133 A69-19104
- Telemetry aortic blood pressure and heart rate from dogs under various physical activities and emotional stress
07 p1071 A69-19133
- Sensor data acquisition and processing and required levels of navigation integration for increasing air space capacity
07 p1177 A69-19211
- Secondary acquisition systems analysis by semiMarkov process model, defining minimum average acquisition time
08 p1270 A69-19852
- Meridional flow, angular momentum and energy flux in atmosphere calculated from IGY data
08 p1346 A69-20312
- Spacecraft applications of Langmuir probes, obtaining data from current-voltage characteristics for electron/ion concentrations, ion mass spectra and charged particle energy distribution
08 p1316 A69-20474
- Project control cycle, cost monitoring and reporting to management
08 p1423 A69-20630
- Optimum gathering of information for linear automatic control system with distributed parameters in presence of random input disturbance
09 p1471 A69-21437
- Pilot balloon and radiosonde measurements for p as function of wind direction, velocity and stability, discussing variation with air layers
09 p1535 A69-21516
- Scientific data acquisition and interpretation effects on electric spacecraft plasmas and field directions, noting electron interchange reactions effect
[AIAA PAPER 69-276] 09 p1568 A69-21727
- Asynchronous on-line digital data acquisition system with immediate access to on-site numerical real time printout for rocket engine performance tests
[AIAA PAPER 69-323] 09 p1478 A69-22381
- Clinical report on Apollo 7 and 8 mission medical data, discussing preflight preventive medical activities, inflight treatment, radiation levels, etc
09 p1446 A69-22542
- Symptom pattern observation technique for flight data analysis, discussing in-flight symptoms and SPOT chart in aircraft maintenance
10 p1669 A69-22982
- Airborne integrated data acquisition and analysis systems to determine aircraft technical performance
10 p1660 A69-23264

- Computer controlled data acquisition and control system /DACS/ for wind tunnel applications, describing system and programs
10 p1673 A69-23286
- Mississippi Test Facility /MTF/ hardware data acquisition system error analysis from extensive simulated static firing tests
10 p1673 A69-23287
- Data requirements and acquisition for detection and description of tides and gravity waves in upper atmosphere
10 p1685 A69-23833
- Solar flares theories, discussing data acquisition by space research and solar radio astronomy
11 p1946 A69-24516
- Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
11 p1847 A69-24719
- Radiation measurements quality by wide angle receivers of Cosmos 122 satellite analyzed, showing agreement with data by other methods
11 p1912 A69-24830
- Airborne computer controlled data acquisition system for real time fault detection and isolation in avionics
11 p1843 A69-25082
- Integrated management information system /IMIS/, discussing logistics, reliability and quality assurance disciplines
11 p2005 A69-25304
- Dynamic stall data for helicopter rotor blade analyses obtained by oscillatory tests in pitch and in vertical translation at full scale Reynolds number
11 p1819 A69-25374
- Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes
12 p2158 A69-26342
- EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system
12 p2023 A69-26553
- Variational statistics applied to hourly meteorological data for predicting airport runways icing conditions time and duration
12 p2127 A69-26900
- Geographic and cartographic mapping applications of remote sensor data from orbital heights, discussing hardware, instrumentation, NASA role in data selection, etc
12 p2192 A69-26984
- Information collection by remote sensing and related economic principles, presenting mathematical formulation of linear programming model
12 p2193 A69-26988
- Radar remote sensing for terrain data acquisition
12 p2098 A69-27005
- Remote sensing of urban environments for metropolitan information systems noting photographic, thermal IR, radar and microwave applications
12 p2193 A69-27012
- Methodology for technical feasibility and economic analysis of remote sensing applications
12 p2193 A69-27013
- Computer program for obtaining information from stationary time series using Chree method of superposed epochs for processing unlimited data and epochs
13 p2225 A69-27617
- Lunar surface light scattering data cataloged for various phase angles from photometric observations of lunar features brightness
13 p2344 A69-27648
- Turbulence measurement, considering handling and storage of data
13 p2263 A69-28148
- Polishing-etching cell permitting continuous sample surface observation for use with inverted stage microscopes
13 p2281 A69-28156
- Solar and galactic cosmic rays measurement data used to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
13 p2333 A69-28689
- Solar radio emission data during IGY covering solar terrestrial disturbances, broadband bursts, solar indices, etc
14 p2513 A69-29321
- Pressure, temperature, vibrations and structural stresses data acquisition system for aeronautical applications
14 p2450 A69-29686
- Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures
14 p2523 A69-29704

Airglow research, discussing emission features, observation methods and instruments, ground station network, etc
15 p2594 A69-30020

Aerospace structures modal vibration tests data acquisition including multishake excitation methods
15 p2585 A69-30358

Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
15 p2691 A69-30757

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Systematic error pattern in raw data obtained during tracking ROSE balloons by two radar systems, estimating range resolver error
15 p2649 A69-30897

Doppler tracking data from Lunar Orbiter missions for studying lunar gravity anomalies, plotting acceleration on lunar surface Mercator projection
15 p2697 A69-31313

Electronic equipment for data acquisition in extraterrestrial experiments including low noise charge amplifiers, discriminator, pulse lengthener, linear gate and logarithmic amplifier
16 p2759 A69-31857

F 2 critical frequency data at Hawaii for clarifying total electron content data obtained by geostationary satellite measurement of Faraday signal rotation
16 p2779 A69-32196

Ozone probe network data by Brewer-Mast electrochemical instruments, discussing vertical ozone distribution near Zurich
16 p2787 A69-32635

Neutron and photon transport properties in liquid hydrogen obtained from measuring radiation environment in propellant tank mockup suspended above NERVA reactor
[AIAA PAPER 69-475] 16 p2810 A69-32716

Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results
17 p3001 A69-33221

Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
17 p2919 A69-33371

Ionospheric data acquisition and utilization for improved radio communications, considering contact between engineers and physicists, ionosondes, data reliability for prediction, etc
17 p2961 A69-33402

Ground simulations data of jet lift V/STOL compared with visual flight results, studying hover, lateral quick start and stop maneuver
[AHS PAPER 362] 17 p2946 A69-33519

Ballistic missile and aircraft operational effectiveness, discussing data collection, reliability, availability and capability surveillance by computer
18 p3145 A69-34500

Flight failure analysis, discussing methods and restrictions due to hardware unavailability, minimum data, urgency and publicity
18 p3145 A69-34502

Eyewitness data concerning bright bolide observed over Dzhaus /Uzbek SSR/, tabulating estimations for occurrence time, light duration, color, sound and trajectory azimuths
18 p3196 A69-34536

Ground data operations system for large astronomical satellite comprising UHF telemetry, PCM telecommand and processing and display equipment
18 p3117 A69-34794

Calculator for obtaining moments of inertia data to determine control power for vehicle orientation and to avoid control systems over design
[SAWE PAPER 792] 18 p3118 A69-34865

STAN integral weight and balance system providing aircrews with takeoff gross weight and CG data
[SAWE PAPER 755] 18 p3136 A69-34882

Oceanographic sensing satellite systems, discussing applications, data requirements, sensors, booster and earth coverage capabilities
18 p3210 A69-35091

Long term creep rupture data based on short term tests in form of Larson-Miller time-temperature curves
18 p3150 A69-35422

Wind profile data measured by AN/FPS-16 radar/superpressure balloon system, noting error sources
18 p3139 A69-35428

Digital data acquisition system with ultrahigh sampling rate for Ames electric arc shock tunnel, describing

ing analog to digital conversion, data storage, system performance, etc
19 p3293 A69-35744

High speed analog to digital multiple channel wide-band data acquisition system designed for short pulse Doppler radar and probe measurements
19 p3307 A69-35745

PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project
19 p3270 A69-36242

Stored program data processor used as PCM telemetry data acquisition system for postApollo applications, considering format and bit rate changes
19 p3274 A69-36280

Onboard data processing and acquisition for aircraft and spacecraft problems based on integrated data management approach, discussing readout and display
19 p3280 A69-36315

Optimum aerological network design, discussing atmospheric model, numerical analysis, data acquisition, weather forecasts, rms measurement error, etc
19 p3364 A69-36505

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials
19 p3427 A69-36627

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves
20 p3519 A69-37022

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity
20 p3587 A69-37036

Pulsars pulse profiles data collected and interpreted with attempt to infer origin
20 p3597 A69-37335

Electronic data collection for climatological stations, describing acquisition and processing of various identification signals and meteorological parameters
20 p3538 A69-37428

Data acquisition amount estimation technique for vertical panoramic sounding of ionosphere
20 p3492 A69-37692

Data acquisition and processing ionograms from Alouette satellites telemetered sweep frequency top-side sounding data
20 p3503 A69-37860

Numerical and analog data acquisition system /CARINA/ for processing rocket, balloon and satellite data, describing distributor characteristics, control console, etc
20 p3511 A69-37914

Cosmic ray propagation from experimental data on cosmic ray nuclei
21 p3789 A69-38816

Satellite synoptic meteorological data collection systems, discussing configurations, global location requirements and digital code platforms position determination
[AIAA PAPER 68-1095] 21 p3819 A69-39029

Ariel 3 satellite management structure, responsibilities and orbit, stabilization, launch window, data acquisition and processing
21 p3856 A69-39255

Quasi-stellar objects identification, distribution, emission lines interpretation, energy distribution, absorption spectra, radio properties, etc
21 p3811 A69-39515

Residuals from earth based coherent two way radio Doppler data from Lunar Orbiter three orders of magnitude larger than observations from spacecraft
[AAS PAPER 68-131] 21 p3828 A69-39766

Heart electrical activity time sequence estimation based on multiple dipole binary model, deriving algorithm
21 p3668 A69-39865

Instruments for obtaining auxiliary data in aerial triangulation, describing stratoscope, profile recorder, radar altimeter, horizon camera, etc
22 p3944 A69-40042

Scattered light photoelasticity dual observation method, describing automatic data collecting and interpreting system
22 p3945 A69-40079

Support software costs reduction for launch vehicle systems by implementing computer techniques to provide requisite data
[AIAA PAPER 69-978] 22 p4052 A69-40358

Handbook on geochemistry, Volume 2/1, covering geophysics, cosmochemistry, etc
22 p3897 A69-40890

Aerial remote sensing data for earth resources program including agricultural, geothermal/ geological tests, hydrological, water pollution and soil and flood water control observations
22 p3949 A69-40994

Data acquisition techniques and devices in electronic data processing
22 p3908 A69-41251

Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers
23 p4120 A69-41755

Magnetic activity effect on electron density in topside ionospheres determined from Alouette 1 data statistical analysis
23 p4156 A69-41856

Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
23 p4231 A69-42133

Modular data acquisition and processing system, describing input unit, checkpoint selection scanner, analog-digital converter, limit indicator, etc
23 p4167 A69-42459

Central nervous, cardiovascular and metabolic data of Macaca nemestrina during simulated Biosatellite flight, testing data acquisitions systems
24 p4260 A69-42703

Aerospace programs cost analysis system, using contractors accounting records as data source
[AAS PAPER 69-465] 24 p4416 A69-42801

Radiation hard device specifications, comparing data with environmental considerations
24 p4287 A69-43204

DATA CONVERTERS
NT ANALOG TO DIGITAL CONVERTERS
NT DIGITAL TO ANALOG CONVERTERS

Computer oriented telemetry data processing systems designed to condition raw telemetry data for further processing by other systems
05 p0727 A69-16770

Solid state synchro data interfaces for angular information, noting synchro to digital and digital to synchro conversion techniques and synchro repeaters
11 p1842 A69-24543

Solid state programmable avionics converter for signal processing, information conversion and aircraft control
14 p2405 A69-29687

Automatic conversion receiver of meteorological radar data, examining reception amplitude sensitivity and frequency characteristics
16 p2791 A69-32280

Computer aided data interpretation system converting ionograms to vertical electron density profiles
20 p3504 A69-37866

Real time FM-to-digital converter for measuring periods of demodulated FM/FM data, discussing systems design
22 p3903 A69-39923

Nonlinear encoding for picture transmission using nonlinear analog to digital converter
23 p4119 A69-41747

DATA CORRELATION
NT SIGNAL ANALYSIS

Daily insolation observations at Blue Hill, Massachusetts, correlated by month with observations of temperature, snow cover, winds, sunshine, sky cover, pressure and precipitation
01 p0066 A69-10862

Entry phase flight data of Missions AS-202, Apollo 4 and 6 compared with wind tunnel aerodynamics data
[AIAA PAPER 68-1143] 03 p0519 A69-13556

Gas turbine exhaust silencer performance correlated in laboratory and in service
[ASME PAPER 68-WA/GT-9] 05 p0812 A69-16144

Laboratory measurement data of low light level TV performance converted to anticipated real world performance data
07 p1132 A69-18948

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data
09 p1495 A69-21764

Two dimensional signal analog correlation in noise background using optical spatial filtering Fraunhofer hologram and input as functions
09 p1499 A69-22276

Statistical method for determining accuracy of airfield weather reports on takeoff and landing conditions, visibility and cloud ceiling, correlating forecasts and actual conditions
11 p1913 A69-25205

Mars photographic and radar data correlation indicating smoothness of dark areas and roughness of desert areas

11 p1964 A69-25406

Description and automated research of correlation /DARC/ for establishing quantitative relationships between topology and properties of chemical substance

12 p2026 A69-26361

Mass transfer cooling data correlation for estimating mass injection effect on slender cone drag

13 p2199 A69-28224

Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence

13 p2380 A69-28461

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift

14 p2435 A69-29043

Experimental and theoretical data correlation on low voltage arc in thermionic converters using cesium vapor, describing discharge plasma by solving differential equation system

14 p2404 A69-29254

Fast folding algorithm for detection and correlation of digital data with weak noisy pulse trains of differing periods

14 p2416 A69-29548

Calculated and experimental surface wear damage data correlated for materials under friction conditions

15 p2618 A69-30106

Stellar scintillation spectra for different zenith distances, correlating data with meteorological conditions at time of observation

15 p2647 A69-30165

Subtractor performance for processing correlated random signals with different spectral widths in signal delay time indicator, discussing errors

15 p2572 A69-30346

Air densities from satellite obtained orbital data, comparing accuracy of values and methods of analysis

15 p2600 A69-31349

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances

16 p2784 A69-32612

Fracture toughness of structural steels, discussing evaluation methods for brittle fracture resistance, toughness values and ratings correlation, etc

17 p2989 A69-33554

Initial phases of ionospheric and magnetic storms compared from data, noting good correlation due to ionospheric fields influence

17 p2967 A69-33988

Constant pressure adiabatic turbulent boundary layer characteristics measurements correlated in incompressible reference frame, using modified Mager compressibility transformation

17 p2958 A69-34051

Meteor dynamical and photometrical analyses compared quantitatively, determining mass loss value from fragmentation model

17 p3045 A69-34223

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model

18 p3125 A69-34231

Correlation between disturbances in troposphere and in geomagnetic field observed after widespread high winds and magnetic storms, using superposed epoch method

18 p3127 A69-34648

Satellite observation data association, estimating consistency of radar object with orbiting prediction, using computer program including Monte Carlo run

18 p3103 A69-35098

Molybdenum disulfide dry film lubricant wear theory and test correlation problems, considering sintering self propagation due to chemical effect of environment

19 p3323 A69-35580

C-5A aircraft model high subsonic speed tests, correlating data from three transonic wind tunnels [AIAA PAPER 69-794]

19 p3237 A69-35636

Supersonic transport aviation fuel thermal stability measurement data correlated with data deduced from heat transfer measurements

19 p3393 A69-36210

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects

19 p3427 A69-36628

High altitude CAT regions length distribution determined from level flight path sampling data correlation

20 p3570 A69-37168

Free flight telemetered base pressure test data correlation for high Mach numbers, noting facilities and instrumentation

20 p3458 A69-37196

Correlation analysis accuracy using Fischer transformation in processing recorded data of small scale ionospheric inhomogeneities

20 p3503 A69-37688

Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo

20 p3613 A69-38248

Model compounds and polymers solubility parameters correlated with refractive index data

21 p3751 A69-38552

Ionosphere drift measurements in LF range, noting relationship between correlation and similar-fade analyses for velocity data

21 p3714 A69-38557

VOR/DME information augmentation by air data /airspeed/ for positional accuracy improvement, describing error sources, optimum data filter and system sensitivity and performance [AIAA PAPER 69-841]

21 p3762 A69-39372

Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters

21 p3718 A69-39747

Meaningful comparisons between single stimulus EEG records and average evoked potential

22 p3890 A69-40163

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

22 p4007 A69-41093

Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber

23 p4057 A69-41372

Disagreement between Mariner 2 and IMP 1 data concerning interrelation between solar wind velocity and geomagnetism ascribed to instrumental errors and changes in magnetospheric properties

23 p4205 A69-41848

Digital analysis of surface wave observations, discussing moving window, multiple filter, multicomponent recording, time variable filtration and cross correlation techniques

23 p4157 A69-42018

Ionospheric F region equatorial anomaly in electron density showing high correlation with equatorial electrojet range and poor correlation with Fugene range

23 p4160 A69-42432

Random signal behavior in hybrid correlator with analog and sampling channels, noting SNR expression and weak signal detection

24 p4283 A69-43139

Electrical and optical properties correlation of air in fog, discussing droplets distribution with regard to dimensions

24 p4347 A69-43506

Single frequency microwave solar bursts correlation with flares and associated active regions based on spectral grouping

24 p4372 A69-43616

Solar activity long term forecasts determined from comparison between Mount Wilson magnetic field synoptic chart latitude zones and sunspot groups

24 p4374 A69-43625

Pressure distribution correlation over blunted slender cone at various angles of attack by tangent cone method, describing hypersonic wind tunnel tests

24 p4249 A69-43681

DATA LINKS

Path length and path length rate variations in synchronous satellite communications link

04 p0561 A69-15448

Measurement methods at IF and baseband sections of microwave links, calculating noise superimposed on each swept measurement curve

05 p0722 A69-16728

Bit error probability for noncoherent binary FSK link involving Rician interfering signal

07 p1080 A69-19095

Technical characteristics of spacecraft telemetering, tracking and telecommand systems, stressing links between earth stations and spacecraft

09 p1451 A69-21291

Radio frequency signal transmission between orbiting spacecraft and vehicle entering VM-10 model atmosphere, examining near wake approximations and plasma-electromagnetic interaction

09 p1455 A69-22002

Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability

10 p1652 A69-22984

Telemetry data channel gain and phase correction with frequency response calibration technique using digital filtering

10 p1654 A69-23291

Data relay satellite concept, discussing orbits, communications between widely separated earth stations, and satellite tracking, telemetry and commanding

11 p1839 A69-25295

Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control

11 p1839 A69-25296

Technological feasibility of satellite based global data relay service for small users

12 p2028 A69-25949

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming

12 p2046 A69-26060

Space Ground Link Subsystem as S-band communication link within Air Force Satellite Control Facility including unified telemetry, tracking and command systems

14 p2427 A69-28879

Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation

14 p2449 A69-29561

Wideband PM communication system with synchronous reception and automatic control of reception bandwidth, providing improvement in noise stability

15 p2564 A69-30147

Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping

15 p2680 A69-30188

Telemetry transmitter-receiver RF links quality determination, emphasizing nonlinear effects measurement by notch noise tests

19 p3270 A69-36239

Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding

19 p3273 A69-36267

Representation theory of signal detection in non-Gaussian noise environments applied for improved near optimum system performance [IEEE PAPER 69-TP-10-COM]

19 p3277 A69-36488

Digital telemetry link coding as English language analogy, developing block code scheme combining bit, word and block error detection and correction methods

23 p4119 A69-41745

S band antenna systems for missiles, designed in various types to obtain RF telemetry links reliability by sharing effort between airborne and ground station equipment

23 p4137 A69-41753

Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S-band experiment

23 p4121 A69-41759

HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube

23 p4121 A69-41768

EHF earth-satellite link communication channel emphasizing down link, discussing weather models, atmospheric absorption and temperature, channel coherence bandwidth, etc

23 p4129 A69-42506

Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data

23 p4131 A69-42522

DATA PROCESSING

NT BATCH PROCESSING

NT CENSORED DATA [MATHEMATICS]

NT CENTRAL ELECTRONIC MANAGEMENT SYSTEM

NT COMPUTER GRAPHICS

NT KARHUNEN-LOEVE EXPANSION

NT SIGNAL ANALYSIS

NT SIGNAL PROCESSING

NT VOICE DATA PROCESSING

Digital computer system for storing, processing and displaying TV pictures

01 p0077 A69-10024

CRT method of processing contoured data from hemispheric and global numerical models simulating general atmospheric circulation

01 p0109 A69-10539

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors

01 p0161 A69-10569

Automatic heteroatomic plotting of high resolution mass spectral data, presenting relative intensity vs elemental composition in bar form

01 p0024 A69-10905

Probabilistic Information Processing System using men and machines to perform diagnostic information processing and to guide decision making

01 p0037 A69-10954

Data analysis methods for integrated data processing system for onboard in-flight checkout for launch vehicle evaluation [AIAA PAPER 67-911]

01 p0037 A69-11024

Structure oriented parallel algorithms for matrix operations, noting applicability to real time calculations for discrete Kalman filter and control problems

02 p0224 A69-11743

Satellite digital video data analyzed by two dimensional filter computer technique, discussing biomedical applications

02 p0213 A69-12155

Adaptive multiplex telemetry use in scientific satellite data management

02 p0212 A69-12817

Agricultural remote sensing information system composed of data acquisition, processing and information extraction and interpretation phases, providing knowledge of earth resources

03 p0400 A69-13195

Radiation sensor PCM data processing by computer to detect radiation level using data decorrelation, data normalization and threshold test

03 p0400 A69-13313

Visual observations data on noctilucent clouds /1963-1967/

04 p0595 A69-15307

Information processing - AFIPS Conference, San Francisco, December 1968

04 p0564 A69-15334

Lockheed hybrid computer system, describing features implemented by modifying and augmenting digital batch processing system

04 p0567 A69-15349

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers [AIAA PAPER 67-644]

04 p0586 A69-15502

Statistical relations for best value, standard deviation and confidence limits for engineering data, noting weighted least squares polynomial for fitting [ASME PAPER 68-WA/PTC-1]

05 p0768 A69-16192

Computer use evaluation, discussing standards for automatic data processing /ADP/ investment and operations

05 p0850 A69-16299

Program to study interactive graphic display console systems use for solving mechanical design problems involving plate cam and follower mechanisms

05 p0724 A69-16384

Automatic processing of electrocardiograms recorded during space flight by computer

05 p0715 A69-16524

Synchronous extractor for simultaneous extraction and association of primary and secondary radar videos in civil system, discussing automatic identification process

05 p0721 A69-16592

Atmospheric turbulence flight tests random data analysis to stimulate power spectra and transfer functions

05 p0767 A69-16756

Integrated automatic data processing system /NEC-TAR/ performance and operation

05 p0726 A69-16765

Computer oriented telemetry data processing systems designed to condition raw telemetry data for further processing by other systems

05 p0727 A69-16770

Data handling during ESRO satellite testing and launching, describing checkout equipment and programming of satellite computers

05 p0727 A69-16771

Air Force Eastern Test Range data processing systems perform real time operations during in-flight phases of ballistic missiles and orbiting vehicles

05 p0727 A69-16772

Data on muons indicating temperature effect diurnal maximum and pressure corrected daily variation

06 p0924 A69-17294

Radio spectrum and cosmic ray electron data evaluated concerning conditions in Galaxy, deducing mean magnetic fields

06 p0991 A69-17309

Automatic data processing method for analyzing multiply connected elastoplastic shells of revolution

06 p1025 A69-17614

Digital computer algorithm for automatic processing of IR weather data transmitted by Cosmos 122 and 144 meteorological satellites

06 p0929 A69-17981

Automation of meteorological fields analysis using computer

07 p1175 A69-18677

Data transition tracking in digital communication systems by decision directed phase tracking loops

07 p1082 A69-19108

High speed sampling for dynamic data analysis, considering random and transient vibrations

07 p1232 A69-19139

NERVA transfer functions evaluation by computer data processing, using Fourier algorithm [IEEE PAPER 2B-2]

07 p1179 A69-19187

Sensor data acquisition and processing and required levels of navigation integration for increasing air space capacity

07 p1177 A69-19211

Atomic and electronic collisions experimental study techniques, noting three data logging systems

07 p1187 A69-19662

Object restoration, discussing data processing method for single variable functions with small signal to noise ratios

07 p1137 A69-19721

Optical processing of planetary radar data for range Doppler image generation

08 p1270 A69-19816

Decision oriented automatic data processing systems design, noting quantity and quality of upward directed information to management

08 p1423 A69-20733

Delta modulation for analog to PCM encoding due to tapped binary shift register and up-down counter

09 p1455 A69-21844

Rapidly varying phase error effect on system performance in data detection process due to RF carrier tracking loop

09 p1456 A69-22459

Automatic flight control system /AOOSY/ for German Azur satellite

09 p1459 A69-22563

Airborne integrated in-flight data system to record and evaluate various engine parameters of operating jet engines

10 p1660 A69-23262

Airborne integrated data acquisition and analysis systems to determine aircraft technical performance

10 p1660 A69-23264

Flight test telemetry data processing system designed for C-5

10 p1660 A69-23269

Ground station integrated flight test data system with interactive data input terminals, on-line assembly and responsive program development

10 p1633 A69-23271

Automatic computer processing of physiological data during space flights, discussing choice of computers and computer programs

10 p1649 A69-23509

Suboptimum decision feedback communications systems incorporating simple digital processing compared with optimum Wald scheme

10 p1656 A69-23534

Civil aviation statistical data and airport planning

10 p1634 A69-23601

Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task

10 p1650 A69-23880

Processing of data obtained in continuous tracking of space objects using computer algorithms

10 p1791 A69-24193

Interplanetary magnetic field near Venus, analyzing data by magnetometer onboard Venera 4

10 p1791 A69-24199

Computer processed pictures including transformation of graphical material, picture generation from data or abstract rules, discussing procedures, instrumentation, color and applications

11 p1842 A69-24588

Soviet collection of articles on satellite data interpretation and use for meteorological services

11 p1911 A69-24824

Computer program for processing actinometric data transmitted from Cosmos 122 satellite

11 p1913 A69-24831

Physical data representation by approximation formulas for computer processing, considering polynomials, rational and spline functions and error curves

11 p1842 A69-24904

Polyharmonic predictive and self tunable filters synthesis based on signal periodic components detection, noting role in information transmission and processing systems

11 p1849 A69-24966

Data compression, redundancy reduction and applications to space flight technology

12 p0207 A69-25876

Optical data processing techniques and phase contrast method variations for statistics of surface roughness

12 p0209 A69-25910

Human operators instrument-monitoring behavior noting optimal control, information processing, physical limitations, etc

12 p0202 A69-25929

Parallel processing in system of computers with identical output, including probability graph for algorithm

13 p2224 A69-27426

Cosmic ray observation data automatic recording, presenting coding system for reading into computer

13 p2327 A69-27609

Automatic recording and data processing for ionospheric radiosonde observations from ground stations, giving block diagrams and subsystems

13 p2225 A69-27610

Computer program for obtaining information from stationary time series using Chree method of superposed epochs for processing unlimited data and epochs

13 p2225 A69-27617

Algebraic and sequential coding-decoding method for data communication rates up to capacity of discrete memoryless channel, discussing error probabilities

13 p2219 A69-27664

Satellite and aerological ground station data combined to determine geopotential fields and wind velocity fields for inadequately serviced areas

13 p2292 A69-27732

Ground station network and facilities for control of and acquisition and processing data from ESRO 1 satellite

13 p2220 A69-27751

Automatic processing and error analysis of horizontal, vertical, static and geostrophic wind data by U.S.S.R. Hydrometeorological Service

13 p2292 A69-27839

Turbulence measurement, considering handling and storage of data

13 p2263 A69-28148

Riometric data processing method for radio wave absorption measurement, considering nighttime cosmic radio emission intensity

14 p2436 A69-29056

Monograph on reduction of satellite data using fixed stars covering ALGOL programming for computing satellite direction from photographic model

14 p2446 A69-29286

H alpha line emission preceding auroral breakup by data analysis of Antarctica Meinel-type patrol spectrograph, noting magnetic activity role

14 p2441 A69-29386

Computer based data handling and display for relating remote sensor signals to ground truth information derived from aerial photographs

14 p2416 A69-29534

Computer uses for air traffic control in Germany including flight plans and weather report data processing

15 p2650 A69-30230

Automated shear difference analysis of three dimensional photoelastic model stress distribution by stress-freezing and slicing technique

15 p2609 A69-30680

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors

15 p2702 A69-30739

Statistical data concerning noctilucent clouds formation during IQSY, noting tendency to form along geographic longitudes and day and night existence

15 p2598 A69-31255

Doppler measurements in semidiurnal geodesy, processing data from Transit satellites collected at various Mediterranean ground stations

15 p2602 A69-31382

Airborne digital computer and display devices role in navigation management, discussing data processing and hybrid navigation systems

16 p2809 A69-32260

Data processing methods and equipment at Niemeck Observatory used for astronomical yearbook computations and geomagnetic requirements

16 p2767 A69-32463

Mascons implications in selenodetic data analysis conducted at U.S. space centers

17 p3028 A69-32922

On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages

17 p2932 A69-33106

Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results

17 p3001 A69-33221

Data inaccuracy used for calculating forecasts of reliability analyzed by Monte Carlo simulation

17 p2937 A69-33389

Flight recorder program determining combat operating environments of CH-46D helicopters analyzed and compared with aircraft design criteria [AHS PAPER 375]

17 p3059 A69-33513

E layer inhomogeneities analysis concerning drift, chaotic processes, statistical parameters and reliability of data processing

17 p2962 A69-33896

Associative processor applied to interceptor radar system, noting processing time independence from target number and compatibility with real time systems

17 p2931 A69-34071

Beam control of optically fed two axis airborne electronically scanned phased arrays by on-array and off-array processing

17 p2942 A69-34085

Post Attack Command and Control System - Airborne Data Automation /PACCS-ADA/, describing components, operation, etc

17 p2977 A69-34116

Saturn software configuration accounting and reporting system for document change and information retrieval

18 p3105 A69-34269

Book on operational meteorological information processing by computers, discussing synoptic and aerological data, automatic data processing in operational numerical forecasting, etc

18 p3105 A69-34332

Lunar gravimetric data reprocessed to present in usable and readable form, plotting acceleration on Mercator projection of lunar surface

18 p3194 A69-34413

Mass spectroscopic structural analysis of organic compounds, discussing computer application to data recording, processing and evaluation

18 p3099 A69-34553

Computer quadratic method of evaluating ray propagation data for estimating inhomogeneous media properties

18 p3172 A69-34667

Automatic processing of electrocardiography recorded during space flight by computer

18 p3098 A69-34743

Ground data operations system for large astronomical satellite comprising UHF telemetry, PCM telecommand and processing and display equipment

18 p3117 A69-34794

Time sharing remote computer station allowing on-spot data processing and output answers, formulating best-fit equation representing statistical data [SAWE PAPER 799]

18 p3107 A69-34860

Automated handling of mass properties data, describing data stored, central bank, report outputs, system logic, etc

[SAWE PAPER 811]

18 p3221 A69-34899

Space vehicle checkout, launch control and data monitoring by general purpose ground system providing flexible stimuli generation, measurement acquisition, computation and information display

18 p3118 A69-35064

V/STOL wind tunnel data at low forward speeds, discussing test limit dependence on model size, downwash angle and tunnel geometry

18 p3119 A69-35229

Time/frequency technology using time-ordered reporting digital data for air traffic control to avoid airborne collision

[AIAA PAPER 69-795]

19 p3367 A69-35635

Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering [AAS PAPER 68-144]

19 p3402 A69-35939

Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding

19 p3273 A69-36267

Automated computer network analyzing electrocardiograms, using telephone lines for bidirectional communications between cardiac data acquisition stations and computer center

19 p3262 A69-36273

Onboard data processing and acquisition for aircraft and spacecraft problems based on integrated data management approach, discussing readout and display

19 p3280 A69-36315

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method with application to Keplerian orbit elements

19 p3370 A69-36614

Italian cross radio telescope noting added phase shifters to N-S arm, transistorized receiving system and modified data processing

19 p3295 A69-36643

Two procedures for processing statistical data concerning Gaussian processes made exchangeable by manageable formula

19 p3361 A69-36646

Pulsars pulse profiles data collected and interpreted with attempt to infer origin

20 p3597 A69-37335

Data handling system design for large astronomical satellite /LAS/, discussing spacecraft configuration, basic aims, program functions, subsystems, signal flow, flight repair, etc

20 p3501 A69-37390

Electronic data collection for climatological stations, describing acquisition and processing of various identification signals and meteorological parameters

20 p3538 A69-37428

Astronomical data collection and evaluation, discussing digital distance measurement, photoelectric photometry, servocontrols and electronic computers suited for Schmidt telescope output

20 p3539 A69-37525

Radar data optical spatial-domain processor providing azimuth processing in range channels without range compression capability, reviewing coherent optical channels properties

20 p3489 A69-37636

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions

20 p3490 A69-37648

Small scale inhomogeneities motions in E and sporadic E layers, processing data with method of full correlation analysis and statistical method

20 p3528 A69-37683

Correlation analysis accuracy using Fischer transformation in processing recorded data of small scale ionospheric inhomogeneities

20 p3503 A69-37688

Ionogram processing procedure, discussing presence of vertically moving ionospheric disturbances

20 p3529 A69-37691

Electronic computer for processing observational data from pilot balloons, utilizing algorithms of values in programming for accuracy and time saving

20 p3572 A69-37700

Human optical system as remote sensor consisting of transducing, data transmission and processing subsystems, defining perception function and describing visual aids

20 p3483 A69-37745

Data acquisition and processing ionograms from Alouette satellites telemetered sweep frequency top-side sounding data

20 p3503 A69-37860

Alouette 2 ionograms secondary resonances data indicating day-night effect in relative frequency of occurrence

20 p3496 A69-37889

Radar digital processing and display system for air traffic control with IC central processor and discrete data transmission over telephone lines from remote sites

21 p3760 A69-38328

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites

21 p3721 A69-38630

Information processing with coherent light, discussing holographic interferometry, contour

mapping, three dimensional pictures, holographic coding, etc

21 p3722 A69-38797

Handling-qualities rating data evaluation for low computation cost information, noting reliability estimation

21 p3664 A69-38968

Communications, instrumentation and data handling for manned planetary missions, discussing data rate limitations

21 p3674 A69-39018

Residual analysis prior to statistical tests on experimental data

21 p3755 A69-39120

Numerical procedure for structural systems analysis, discussing computer application to hydrodynamic, electric, magnetic, thermodynamic, elastostatic and elastodynamic problems [AIAA PAPER 67-955]

21 p3839 A69-39216

Computer programs for design data, examining program complexity, reliability and availability, design data sheets, etc

21 p3732 A69-39304

Digital data analysis systems role in experimentation and R and D

21 p3843 A69-39315

Photoelastic data analysis for stress separations, discussing shear slope and Tesar methods

21 p3843 A69-39316

Biomedical electrical signals analysis by optical data processing, discussing conversion, SNR and filtering techniques

21 p3666 A69-39440

Discrete filters for optimal processing of down-linked satellite data, considering inverse filter development by Kalman filtering techniques

21 p3677 A69-39462

NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies

21 p3856 A69-39581

Scattered light photoelasticity dual observation method, describing automatic data collecting and interpreting system

22 p3945 A69-40079

Digital systems for acoustical or vibrational measurements reception and evaluation

22 p3945 A69-40168

Programmatic constraints on onboard processing of data collected by payload sensors [AIAA PAPER 69-942]

22 p3904 A69-40325

Machine independent telemetry oriented language /MITOL/ to develop computer programs for real time and postflight telemetry data processing

22 p3905 A69-40340

Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center

22 p3919 A69-40352

Meteorological data real time processing for automatic weather analysis and prognosis, program used and computer output charts

22 p3977 A69-40732

Adaptive control system synthesis for reducing computation labor for controlled inertialess plant, reproducing probability density function to describe unknown parameters

22 p3918 A69-40739

Data evaluation, measurement accuracy and statistical procedure, using silicates chemical analysis

22 p3897 A69-40984

Data acquisition techniques and devices in electronic data processing

22 p3908 A69-41251

Frequency response transient vibration testing of standing man, discussing data analysis procedure, test stand, and Welch correction for instrument dynamics

23 p4101 A69-41494

Airline economics long term trends requiring management tools for cost control, operations simulation and monitoring, computer use and information data processing [SAE PAPER 690414]

23 p4241 A69-41641

Geomagnetic field spherical analysis from angular data and extrapolated values of time variable field coefficient

23 p4157 A69-41866

PCM telemetry system for transferring information from many remote sources to single local processing point

24 p4281 A69-42620

Spacecraft central data system for deep space solar probe data management

24 p4284 A69-42621

Fiscal requirements forecasting for space systems involving data analysis
[AAS PAPER 69-166A] 24 p4417 A69-42814

Personnel training and selection systems, applying information processing models to diagnostic testing in job classification for performance improvement
24 p4274 A69-43020

Mathematical method of processing test data air-frame panels subjected to repeated static loads to obtain lifetime equations and statistical characteristics
24 p4400 A69-43086

Mariner 6 and 7 TV data, discussing implications for Mars present state, past history and biological status
24 p4384 A69-43195

Sensory information processing model for tactile perception using array of airjet and piezoelectric stimulators applicable to display design and nervous system investigation
24 p4276 A69-43273

DATA PROCESSING EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

NT ANALOG COMPUTERS

NT COMPUTERS

NT DIGITAL COMPUTERS

NT HYBRID COMPUTERS

NT IBM 360 COMPUTER

NT PRINTERS [DATA PROCESSING]

NT SEQUENTIAL COMPUTERS

NT SITE DATA PROCESSORS

NT UNIVAC COMPUTERS

Automatic devices to count bacterial colonies Petri dishes consisting of culture plate scanner and data processor
02 p1201 A69-11773

Digital data processing equipment for space flight PCM telemetry
03 p0393 A69-13290

On-line ground flight test data processing system
05 p0725 A69-16757

OMEGA 4 100-k Hz ground station telemetry system for acquiring and processing outputs up to 23 FM and two TDM signals applied simultaneously from instrumentation recorder
07 p1105 A69-19103

Telemetry monitor systems for high speed rotating equipment, discussing data recording, transmission, decoding, thin-thick film microtechniques, etc
10 p1692 A69-23249

Data processing system for satellite telemetry signals, describing hardware construction and operation, data readout, etc
11 p1840 A69-25426

Vignetting effect on impulse response of general coherent optical Fourier processor, noting time varying character and input position sensitivity
12 p2036 A69-25912

Optical surface wave propagation on thin dielectric film waveguides, noting applications to integrated optical data processors
13 p2229 A69-27676

Data processing for scientific rocket research, considering pulse counters, multiplexers, converters and programmers
16 p2755 A69-31858

Automatic meteorological radar data processing system incorporating MRL-1 radar and low speed digital computer
16 p2791 A69-32279

Automatic conversion receiver of meteorological radar data, examining reception amplitude sensitivity and frequency characteristics
16 p2791 A69-32280

Data processing methods and equipment at Niemegk Observatory used for astronomical yearbook computations and geomagnetic requirements
16 p2767 A69-32463

Sampled data system with built-in data processing for observation of fine grain characteristics of pulsed signals used in radar systems
17 p2934 A69-34076

Electronic data processing facilitating engineering design development work, including computer programming
18 p3106 A69-34838

DYDRA data logger for dynamic measurements of pressure distributions on harmonically excited wind tunnel models, noting use as general transfer function analyzer
19 p3293 A69-35746

Earth orbit estimation by manual stadimeter, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties
19 p3369 A69-35793

Eurocontrol Experimental Data Processor for automation in air traffic control, discussing system size configuration and environment
19 p3280 A69-36654

Secondary radar IFF/SIF /Identification Friend or Foe-Selective Identification Feature/ system, describing ground and onboard radar and data processing equipment
19 p3278 A69-36702

Onboard data processor design for Swedish satellite to study spatial and temporal variations of auroral particles
20 p3501 A69-37387

Numerical and analog data acquisition system /CARINA/ for processing rocket, balloon and satellite data, describing distributor characteristics, control console, etc
20 p3511 A69-37914

Flexible circuitry for reliable spaceborne data processing equipment electronic packaging
22 p3903 A69-39951

Closed Loop Ionogram Processor /CLIP/ on-line computer processing system for ionospheric data [AIAA PAPER 69-952] 22 p3904 A69-40334

Fail-soft operation in array processor with cellular redundancy, discussing cellular autonomy, long life and ultrareliability [AIAA PAPER 69-965] 22 p3906 A69-40346

Digital data systems fault detection and isolation, describing diagnostic programs and hardware [AIAA PAPER 69-967] 22 p3906 A69-40348

Modular data acquisition and processing system, describing input unit, checkpoint selection scanner, analog-digital converter, limit indicator, etc
23 p4167 A69-42459

Linear electrical analogs for two dimensional optical data processing systems, discussing diffraction field model, quadratic phase filters, thin lenses, photographic film applications, etc
24 p4286 A69-42619

DATA PROCESSING TERMINALS

Man-computer interactive Terminal Interface System /ITIS/ compatible for programming graphics, character scopes and typewriter using FORTRAN [AIAA PAPER 69-955] 22 p3905 A69-40337

IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis
23 p4133 A69-41764

DATA READOUT SYSTEMS

U DISPLAY DEVICES

DATA RECORDERS

Digital adaptive recording system /DARS/ 12 channel flight recorder
05 p0766 A69-16754

Sonic boom simulation methods using shock tube, booth type simulators, ballistic ranges and explosives, discussing unmanned data recorder as monitoring device
15 p2585 A69-30371

DATA RECORDING

Multibeam recording technique producing speckle-free images in redundant holograms of transparencies

01 p0082 A69-10850

Shock and vibration data recording, discussing transducer selection, accelerometer mounting, conditioning electronics and recording devices

01 p0083 A69-11050

Microstructure analysis and relationship between microvariations and macroscopic events, using magnetic variations recordings of IGY network

01 p0069 A69-11126

Electron concentration in ionospheric outer regions determined from coherent frequencies recorded on-board OGO-A

01 p0147 A69-11323

Automatic recording of neutral atom temperature and free electron density of partially ionized gas by Fabry-Perot interferometer

03 p0428 A69-13111

Photorecording techniques for command and control systems requirements, discussing association with large screen computer generated CRT projection display equipment

06 p0928 A69-17923

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph

07 p1217 A69-19241

IR beam profiles of carbon dioxide laser permanently recorded on foamed polystyrene

07 p1156 A69-19305

Magnetic tape recording of ultrasonic test information with oscilloscope used for playback
07 p1117 A69-19697

Magnetic tape recorder/reproducer for FM analog test data
10 p1691 A69-23233

Flight data recorders history and regulations, discussing parameters and design of systems
10 p1691 A69-23247

Maintenance recording systems for aircraft fleet, discussing operations objectives and research, data collection and implementation using systems engineering
10 p1671 A69-23261

Airborne integrated in-flight data system to record and evaluate various engine parameters of operating jet engines
10 p1660 A69-23262

Cosmic ray observation data automatic recording, presenting coding system for reading into computer
13 p2327 A69-27609

Automatic recording and data processing for ionospheric radiosonde observations from ground stations, giving block diagrams and subsystems
13 p2225 A69-27610

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose
14 p2446 A69-29047

Computer analysis of EEG recording, presenting model studies under rest and performance conditions
15 p2560 A69-31232

On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
17 p2932 A69-33106

Onboard flight data recorder as integrated system for investigating aircraft accidents, describing German LEADS 200 model
17 p2974 A69-33429

X ray data in 44-60, 8-16 and 1-8 A bands telemetered by Solrad 9 satellite
20 p3588 A69-37473

Rocket measurement data of auroral particle precipitation classified in substorm phases of quiet and breakup period, breakup and postbreakup events and morning events
21 p3707 A69-38489

DATA REDUCTION

Data compression methods noting block and circuit diagrams

01 p0031 A69-10735

Data analysis methods for integrated data processing system for onboard in-flight checkout for launch vehicle evaluation

[AIAA PAPER 67-911] 01 p0037 A69-11024

Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use

02 p0295 A69-11786

Multichannel digital data compression simulation, discussing algorithms, buffer queue control, identification coding and system performance measurements

02 p0213 A69-12814

Adaptive multiplex telemetry use in scientific satellite data management

02 p0212 A69-12817

Adaptive compression system for predicting and encoding video data for transmission in noiseless channel

03 p0427 A69-12869

Radar cross section data interpretation, discussing calibration, unwanted signals, averaging, scattering matrix and power spectra

03 p0385 A69-12913

Channel identification coding for data compressors, deriving optimum code word length for bit compression ratio and overflow identification scheme

03 p0391 A69-13219

Stored program control for polynomial data compression in telemetry application

03 p0400 A69-13220

Visual observations data on noctilucent clouds /1963-1967/

04 p0595 A69-15307

Statistical relations for best value, standard deviation and confidence limits for engineering data, noting weighted least squares polynomial for fitting [ASME PAPER 68-WA/PTC-1]

05 p0768 A69-16192

Pattern classification algorithms classified according to type of input information required

05 p0725 A69-16571

Flight test data reduction on time sharing general purpose computer, noting hardware link between airborne equipment and computer 05 p0726 A69-16758

Integrated automatic data processing system /NEC-TAR/ performance and operation 05 p0726 A69-16765

Meteorological satellites data for quantitative weather forecasts, discussing error effects due to data treatment in adiabatic approximation 06 p0949 A69-17032

Satellite actinometric data computerized reduction in U.S.S.R., examining computer program features [UN PAPER 68-95763] 06 p0916 A69-17038

Processing TV cloud data monitored by Molniya 1 and Meteor meteorological satellites, discussing computer interpretation of TV photographs [UN PAPER 68-95759] 06 p0950 A69-17060

Averaging procedures to represent highly time variable actual hydrometeorological fields by less variable equivalent fields 06 p0952 A69-17989

Pattern recognition method dependent on preselection of good variables, discussing SELFIC and relationship to Karhunen-Loeve expansion and factor analysis 07 p1088 A69-18386

Data compression techniques compared for use in communications systems to minimize required number of samples and bits per sample 07 p1077 A69-18758

Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing 07 p1124 A69-18838

High speed sampling for dynamic data analysis, considering random and transient vibrations 07 p1232 A69-19139

Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers 08 p1276 A69-20592

Curve fitting for optimum redundancy reduction on sampled data, describing polygonal and approximate polygonal techniques 09 p1533 A69-22458

Data interpretation, discussing correlation describing effectiveness of independent variable and table giving values directly from sample size, t , z , F and chi square values 10 p1669 A69-23040

Test facility automation, discussing pretest preparations, test operations, data reduction and system planning 10 p1671 A69-23260

Airborne integrated data acquisition and analysis systems to determine aircraft technical performance 10 p1660 A69-23264

Computer implemented analysis of aeroelastic stability for elapsed data reduction time, discussing frequency modes and digital filters 10 p1634 A69-23274

Sample data reduction methods combined in special purpose computer for measuring ablation in reentry vehicle heat shields 10 p1660 A69-23290

Antenna for lunar occultation observations at 81.5 MHz, detailing experimental procedure and data reduction 10 p1779 A69-23606

Pattern classification algorithms classified according to type of input information required 11 p1843 A69-25445

Data compression, redundancy reduction and applications to space flight technology 12 p2027 A69-25876

Extrapolation and interpolation for data compression including polynomial concept 12 p2027 A69-25877

Power spectral analysis feasibility for data reduction for medical interpretation of changes in pulmonary impedance pneumograph in remote monitoring 12 p2024 A69-26558

Data analysis techniques for discrimination and identification of terrain surfaces from radar scatterometry information 12 p2099 A69-27010

Venus carbon dioxide spectral band analysis methods, discussing spectral lines and rotational temperatures obtained 13 p2344 A69-27649

Design and efficiency for signal-time compressors of spectral analyzers using electron beam tubes with charge storage 15 p2576 A69-30351

Scintillation index determination, discussing data reduction methods, standard test records, calibration at stations with modest equipment and simulation on digital computer 16 p2751 A69-32105

Mascons implications in selenodetic data analysis conducted at U.S. space centers 17 p3028 A69-32922

Flight recorder program determining combat operating environments of CH-46D helicopters analyzed and compared with aircraft design criteria [AHS PAPER 375] 17 p3059 A69-33513

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction 18 p3133 A69-34335

NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing 18 p3133 A69-34336

Computer graphics technique for reducing photographic data from optical device to replace time consuming visual methods 18 p3134 A69-34373

Mass spectroscopic structural analysis of organic compounds, discussing computer application to data recording, processing and evaluation 18 p3099 A69-34553

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes 18 p3196 A69-34631

Thermoelectrical leg product specification /TELPS/ apparatus and data reduction technique for determining temperature dependent thermoelectric properties of material 18 p3093 A69-34783

Data compression using orthogonal functions, design curves for given functions, signal characteristics and error avoidance 18 p3103 A69-35060

Secor data reduction to correct tropospheric refractive effects of radio ranging on earth satellites using tropospheric model 18 p3104 A69-35200

Holographic velocimetry data reduction applicable to flow field holograms, using singlet interference pattern for spherical and plane wave illumination 19 p3305 A69-35730

Quantitative density data from schlieren measurements by photomultiplier technique for axisymmetric flow outside diffraction bands 19 p3306 A69-35741

Buffer storage for telemetry nonstationary video data compression, analyzing requirements, predictor algorithm and variable aperture control using simulation 19 p3272 A69-36260

Digital data compression system transmission error statistical analysis, emphasizing addressing schemes effect on compression ratio 19 p3272 A69-36261

Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications 19 p3272 A69-36262

Precompression automatic wild point rejection from sampled telemetry data for data compressors evaluated by digital computer simulation 19 p3273 A69-36263

Maximum rms error comparison of redundancy reduction techniques, emphasizing limiting slope technique and worst case interpolation error 19 p3273 A69-36264

Spacecraft onboard processor for digital filtration and data compression, discussing prototype design, construction, sample memory, weight memory, arithmetic unit and programmer 20 p3500 A69-37383

Topside ionogram reduction for ionospheric electron density determination, using geomagnetic strength at all heights, iteration and change of variables 20 p3529 A69-37864

Brightness distribution over source, discussing regularization algorithms for radio astronomical data reduction from crossed telescope 20 p3606 A69-38033

Mean importance variations of sunspot groups in various latitude intervals, reducing data statistically with dispersion analysis and autocorrelation method 20 p3616 A69-38303

Residual analysis prior to statistical tests on experimental data 21 p3755 A69-39120

Digital data analysis systems role in experimentation and R and D 21 p3843 A69-39315

Closed Loop Ionogram Processor /CLIP/ on-line computer processing system for ionospheric data [AIAA PAPER 69-952] 22 p3904 A69-40334

Data compression and transmission technique for real time system to monitor manned space missions, noting Apollo telemetry data [AIAA PAPER 69-970] 22 p3906 A69-40350

Data evaluation, measurement accuracy and statistical procedure, using silicates chemical analysis 22 p3897 A69-40984

Integrated adaptive data transmission system accepting analog inputs through information compressing sampler or digital inputs by sampling 23 p4121 A69-41760

IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis 23 p4133 A69-41764

Sound evoked DC changes on intact skull of adult humans using data from AgCl electrodes, investigating intensity function, analyzing data by computer 23 p4098 A69-42101

Brayton-B generator for 2-10 kwe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis 23 p4071 A69-42278

Data compression from standpoint of epsilon entropy theory, considering precise measure of channel capacity necessary to describe data source 23 p4134 A69-42526

Automatic analysis and classification of images stored on 35-mm film using CRT flying spot scanner with computer control and memory 24 p4286 A69-42744

Lunar gravitational field data from Lunar Orbiter spacecraft reprocessed, discussing mascon effects on moon structure and evolution theories 24 p4379 A69-42785

On-board digital filtering applied to spectral estimation and data compression, discussing theory, techniques, computerized implementation and prototype design [AIAA PAPER 69-969] 24 p4285 A69-43510

DATA RETRIEVAL

NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR [UN PAPER 68-95317] 06 p1043 A69-17068

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions 09 p1459 A69-22593

Associative holographic memories, discussing recall systems, logic circuits, etc 10 p1697 A69-23868

DATA SAMPLING

Validation study of pilots visual sampling behavior, using queueing model based on instrument and eye movement data from Link trainer mission flights 02 p2002 A69-11954

Optimum control of fourth order digital control system 03 p0408 A69-12916

Sampled data delay-lock loop for synchronizing pulsed envelope RF signals, using digital circuitry 03 p0390 A69-13216

Iterative method of determining orthogonalized bases for representation of sampled data signals 03 p0391 A69-13231

Analog sampled data simulator using field effect transistors and single value of holding capacitor for covering sample frequency variation 03 p0405 A69-13600

Book on qualitative theory of sampled data systems 04 p0630 A69-14563

Dynamics of single loop nonlinear sampled data systems with integrator, deriving equations of periodic motions and stability conditions by means of point transformations 04 p0583 A69-15135

Digital filter transfer functions design by sampled data transformation, noting role of analog filters 04 p0584 A69-15461

Special purpose computer for implementing programmable digital filter used in sampled data control systems 04 p0569 A69-15462

Bit reduction in digital transfer functions with LF poles in sampled data systems using zero order hold function

04 p0584 A69-15464

Data sampling and statistical verification in large scale sterilization procedures, discussing biological indicator /bacillus stearothermophilus/ and incubation time

05 p0714 A69-15952

Minimum sensitivity deadbeat sampled data control system design by frequency domain technique, using two controllers [ASME PAPER 68-WA/AUT-15]

05 p0738 A69-16177

Monograph on nonlinear sampled data systems covering Liapunov method, discrete systems, finite difference, flow graphs, Laplace transformations, etc

05 p0739 A69-16544

Time averages for estimating probability distribution, density and moments of random functions applied to deterministic signals, considering sampling frequency dependence

05 p0722 A69-16729

Pulse amplitude measurements comparison by sampling signal at given time and pulse peak detection, considering SNR

05 p0722 A69-16730

Digital computer optimization of representation of sampled data signals on orthogonal basis, using iterative method

06 p0901 A69-17363

Data compression techniques compared for use in communications systems to minimize required number of samples and bits per sample

07 p1077 A69-18758

Signal multiplexing within linear algebra framework permitting use of orthonormality in receiver construction without orthonormal functions generation in multiplexer

07 p1078 A69-18830

Presampling filtering, discussing effects on rms interpolation error for sampled data systems

07 p1083 A69-19129

High speed sampling for dynamic data analysis, considering random and transient vibrations

07 p1232 A69-19139

Sampled data regulator for maintenance of constant alveolar carbon dioxide during steady state and transient ventilatory responses to hypoxic stimulation

07 p1072 A69-19480

Image degradation in holograms undersampled with respect to space-bandwidth product, noting signal to noise ratio and resolution

08 p1312 A69-20078

Multiloop control plant described by Jacobian transfer matrix to control spectral characteristics of random processes

08 p1296 A69-20233

Curve fitting for optimum redundancy reduction on sampled data, describing polygonal and approximate polygonal techniques

09 p1533 A69-22458

Analog to digital conversion for data sampling systems including scanning, distributors, multiplexing, automatic ranging, noise reduction and data storage techniques

10 p1660 A69-23232

Sample data reduction methods combined in special purpose computer for measuring ablation in reentry vehicle heat shields

10 p1660 A69-23290

Digital sampled data spectra conditioning, deriving linear functions for low pass, bandpass and band rejection numerical filters and spectrum shaping

10 p1654 A69-23292

Monte Carlo digital computer simulations, considering sample sizes and confidence intervals in multinomial output

10 p1661 A69-23853

Programmed search and gradient search methods for determination of sampling intervals in synthesis of sampled data models of human operators

10 p1650 A69-23881

Solid state sampling circuit for low pulse repetition frequencies to improve signal to noise ratio, noting ratio of holding to learning time

11 p1849 A69-24900

Adaptive optimal estimation of sampled stochastic process with finite state unknown parameters, using separation technique

11 p1858 A69-24935

Sampled data multichannel telemetry using pseudorandom sequences generated by linear shift registers

12 p0208 A69-25925

Feedback design for monotonically stabilized linear sampled data control system

12 p2045 A69-25961

Sampled data time optimal control of linear multivariable system based on determination of system state variables control time and minimum sampling intervals

12 p2050 A69-26088

Asymptotic sampling error in closed loop hybrid systems, noting dependence on sampling period and execution time

12 p2053 A69-26508

Remote sensing and forest survey sampling designs, discussing nonstereo stratification, conventional photography and IR or radar imagery

12 p2097 A69-26991

Passive adaptive sampled data control system with conditional feedback, discussing transfer function role and minimization of external disturbances and internal parameter variations effects

13 p2238 A69-27394

Lunar topography harmonic analysis, noting sample point density and evenness variations effects on estimated coefficients

13 p2344 A69-27647

Microwave measurement methods, discussing uses of digital computers and sampling techniques

13 p2223 A69-28605

Relay sampled data phase plane trajectories periodic motions increased with increase of system duty factor

14 p2425 A69-28898

PCM oscillator synchronization system stability, considering sampled model by digital nature of equipment

15 p2565 A69-30171

Error analysis of one bit autocorrelation method of spectral estimation, noting decrease in spectral variance with increased sampling rate

16 p2752 A69-32390

Sampled data system with built-in data processing for observation of fine grain characteristics of pulsed signals used in radar systems

17 p2934 A69-34076

Digital data acquisition system with ultrahigh sampling rate for Ames electric arc shock tunnel, describing analog to digital conversion, data storage, system performance, etc

19 p3293 A69-35744

Precompression automatic wild point rejection from sampled telemetry data for data compressors evaluated by digital computer simulation

19 p3273 A69-36263

Fast Fourier Transform connection with circulant and permutation matrices for case with discrete time sample number equal to discrete frequency samples

23 p4182 A69-41761

Flexible format generator for manned spacecraft data management system designed with memory for data sampling formats, emphasizing software counters and power strobing

23 p4133 A69-41762

Stochastic approximation applied to sampled data system parameters including sampling interval

24 p4295 A69-43319

DATA SMOOTHING

Error and sensitivity analysis of on-line algorithms for fixed point linear smoothing

01 p0050 A69-10238

Scaled and translated composite curve technique for reducing calibration data for spectrograph film system response characteristics

01 p0082 A69-10839

Algorithms for error analysis, optimum filtering sensitivity and fixed interval smoothing solutions to linear estimation problems

02 p0224 A69-11961

Maximum likelihood smoother using measurements containing correlated noise for application to continuous linear dynamic systems such as inertial navigation

06 p0956 A69-17938

Least squares local smoothing by polynomials of noisy data in n dimensions

08 p1344 A69-20830

Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations

09 p1487 A69-21553

Smoothing data stability by least squares method, noting applicability to computer processing at random sequences

09 p1532 A69-21754

Error bounds for estimation error covariance matrix of fixed point smoothing and fixed interval smoothing algorithms for optimum linear estimation

09 p1533 A69-22436

Lumped linear system state estimation with optimal linear smoothing instead of filtering, noting smoothing lag and variance

12 p2122 A69-26524

Smoothing problem for linear discrete time system, converting problem to special case of standard linear filtering problem

12 p2122 A69-26525

Error bounds for covariance matrix used in optimum filtering and smoothing algorithms for control and communications systems operation

14 p2416 A69-29549

Artificial earth satellites positional observations by graphical smoothing on azimuth and altitude, discussing advantages for space geodesy

15 p2594 A69-30029

Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations

16 p2784 A69-32548

Astronomical and geophysical observations, selecting degree of smoothing via Whittaker method for curve construction

17 p3028 A69-32877

Least squares method of smoothing curves or surfaces involving orthogonal base functions, discussing matrices conditioning and structure eigenmodes

18 p3218 A69-34642

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability [AIAA PAPER 69-950]

22 p3975 A69-40332

Kalman-Bucy filtering technique for estimation of initial conditions and smoothing in linear dynamic systems, noting rectilinear motion of randomly accelerated spacecraft

23 p4132 A69-42546

DATA STORAGE

Digital computer system for storing, processing and displaying TV pictures

01 p0077 A69-10024

Output p-channel MOS transistor selection tree for display and information storage systems

01 p0039 A69-10173

Representation for computer storage of contour map data for searching problem involving determination of aircraft ground track

01 p0036 A69-10704

Human factors evaluation of computer based information storage and retrieval system using questionnaire and interview techniques

02 p0204 A69-12220

Lithium niobate single crystals for holographic storage, noting use for optical information storage, processing and display devices

03 p0432 A69-14184

Stored program computer for small scientific spacecraft, noting program and data memory capacities

04 p0569 A69-15472

Electrostatic storage display tube characteristics, construction, applications and reliability

07 p1101 A69-18655

Holography principles to design high capacity high speed storage devices, using photochrome recording medium

07 p1133 A69-19158

Statistical theory and dynamic programming to synthesize optimal pulsed control systems having restrictions on control device storage capacity

09 p1476 A69-22673

Large capacity holographic memory design based on page organization concept, considering lens parameters and hologram size

11 p1886 A69-25041

Multiple information storage in sampled hologram in space division multiplexing holography, constructing hologram with sound waves and reconstructing images with laser light

12 p2079 A69-25921

Holographic storage of three dimensional measurement information using model formed by stacking plates

13 p2260 A69-27739

Lower bound determination of automaton memory elements, describing coding procedure and algorithm for machine states

13 p2239 A69-28554

Microwave tunnel diode switch design noting applications to information storage

15 p2574 A69-30132

Information storage of multichannel analyzer of continuous and pulsed processes

17 p2939 A69-33900

- Dynamic Automated Reporting Technique /DART/ system for on-line conversational information storage and retrieval for use in large programs management 18 p3107 A69-35095
- Spacecraft data storage requirements, discussing use of servo-driven tape recorders in data processing systems 18 p3107 A69-35096
- Binary storage system operation during binary quantization of signal, applying results to storage efficiency improvement 19 p3278 A69-36597
- Recording devices for storing bandwidth data in time sequence, studying design parameters using light beam recorder implemented with CRT for read-in process 20 p3540 A69-37640
- Ariel 3 satellite shape and systems including heat balance, data storage and compatibility problems 21 p3820 A69-39256
- DATA SYSTEMS**
- Scientific and technical information flow sources, showing DOD user need within defense industry and importance of local work environment 02 p0204 A69-12219
- Onboard SDP-3 computer data system core for IMP spacecraft, considering payload 03 p0400 A69-13243
- Multimode digital radar control paths and operating communication, discussing radar data, triggers, real time data and error localization 05 p0718 A69-15750
- Simulation in design of automated flight test data system 05 p0743 A69-16759
- Data handling equipment for Ariel 3 and future satellites emphasizing manufacturing of PFM and PCM systems 05 p0726 A69-16769
- Data handling during ESRO satellite testing and launching, describing checkout equipment and programming of satellite computers 05 p0727 A69-16771
- Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials 08 p1278 A69-20420
- Centralized control with variable step interrogation of control points 08 p1298 A69-20422
- Analog to digital conversion for data sampling systems including scanning, distributors, multiplexing, automatic ranging, noise reduction and data storage techniques 10 p1660 A69-23232
- Ground station integrated flight test data system with interactive data input terminals, on-line assembly and responsive program development 10 p1633 A69-23271
- Gas turbine engine development data system based on test stands subsystems and central computer 10 p1660 A69-23284
- Turbulence measurement, considering handling and storage of data 13 p2263 A69-28148
- Deep space data return, discussing system function, design, operational interfaces and interplanetary spacecraft data compression methods 14 p2517 A69-29096
- Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials 14 p2418 A69-29658
- Air data system consisting of aerodynamic and thermodynamic sensors and computer calculating flight parameters for automatic flight control 18 p3169 A69-34854
- PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project 19 p3270 A69-36242
- Temperature program generation for test chambers, verifying temperature programmers and readout, verification and recording systems 22 p3954 A69-40038
- Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing 23 p4132 A69-41735
- Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components 23 p4133 A69-41739

- Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation 23 p4133 A69-41769
- Spacecraft central data system for deep space solar probe data management 24 p4284 A69-42621
- Satellite data management systems design, considering user-designer cooperation aspects for space programs [AAS PAPER 69-366] 24 p4417 A69-42806
- Stochastic approximation applied to sampled data system parameters including sampling interval 24 p4295 A69-43319

DATA TRANSMISSION

- NT AUTOMATIC PICTURE TRANSMISSION
- NT CHANNELS [DATA TRANSMISSION]
- Transistorized feedback amplifier for data transmission over high voltage lines in conveyed wave systems 01 p0038 A69-10074
- Hybrid digital transmission systems, discussing joint optimization of analog and digital repeaters and information rate of coaxial cable systems 01 p0027 A69-10248
- Regenerative digital transmission system error, representing memory of binary regenerative channel with Markov model 01 p0027 A69-10249
- Quantizing noise effect on reconstructed analog signal at reception terminal of digital data transmission system 01 p0027 A69-10250
- Transversal filters for equalization of data channels with pulse amplitude modulation, discussing pulse equalizability and convergence criteria for iterative search routine 01 p0027 A69-10251
- Optimal rank algorithm construction for signal detection in noise investigated for use in information transmission systems 01 p0027 A69-10374
- International experimentation with U.S. communications satellites, noting design variations with participants and restraints information exchange [UN PAPER 68-95421] 01 p0108 A69-10474
- NASA Technology Utilization Program, discussing information dissemination [UN PAPER 68-95313] 01 p0179 A69-10512
- Data compression methods noting block and circuit diagrams 01 p0031 A69-10735
- Reliability of binary message in Gaussian noise impaired by amplitude limiting in case of evaluation by integration 01 p0031 A69-10736
- Radio systems for discrete information transmission, emphasizing phase difference modulation, wideband, universal and adaptive systems 01 p0031 A69-10778
- Book on probabilistic information theory-discrete and memoryless models covering information transmission, digitalized sources, generating functions, decoding error, systematic codes and sequential decoding 01 p0037 A69-11030
- Two dimensional representation of Venus entry probe target data for determining probe capability to provide real time data transmission to earth 02 p0331 A69-12820
- Synchronization in coded communication systems, considering phase lock loop and square wave correlation function 03 p0383 A69-12871
- Digital transmission at 35 GHz, noting atmospheric and rainfall effect on terrestrial millimeter wave propagation 03 p0389 A69-13192
- Noncoherent binary communication detector for slow selective fading channel with additive quasi-stationary noise based on mathematical procedure of non-parametric classification 03 p0390 A69-13215
- WEFAX /Weather Facsimile/ experiment to explore operational feasibility of direct meteorological data transmission via satellite relay from central station to remote stations 03 p0411 A69-13240
- Delay line bandwidth reduction for video or digital information, noting radar tracking application 03 p0392 A69-13251
- Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions 03 p0394 A69-13398

- Ghost project for gathering weather data by balloons and transmission of data to central data processing stations by satellite 03 p0520 A69-13621
- Point to point millimeter wave communication system design, discussing propagation and data transmission 03 p0405 A69-13723
- Optimum gain control for diversity receivers used for radar and digital data transmission through fading media 03 p0410 A69-13833
- Optimum conditions for signal analysis determined for symmetrical binary communications channel with unknown signal phase 04 p0556 A69-14492
- Book on information coding and transmission and error detection and correction 04 p0558 A69-15066
- Data transmission on common communication circuits, noting circuit characteristics, limitations on performance and future digital service 04 p0559 A69-15207
- Modems for high data transmission rates on available voice bandwidth channels, noting point to point and multipoint polled networks and signal to noise ratio 04 p0564 A69-15208
- Digital communications between aircraft and flow control computers on ground to avoid runway saturation and automating routing functions 05 p0721 A69-16722
- Satellite and space communications and data transmission systems, emphasizing improvements in amount and rate of information for future requirements 06 p0886 A69-17045
- Communication satellites application to domestic live TV, telephone and data communication and long distance telecommunication in Canada [UN PAPER 68-95501] 06 p0887 A69-17075
- Typewriter keyboard computer system with CRT display having closed circuit TV link contents of file to add, delete or change information 06 p0891 A69-17204
- Laser displays for information transfer to provide improved computer driven read-out techniques, noting real image and holographic displays 06 p0928 A69-17924
- Digital computer algorithm for automatic processing of IR weather data transmitted by Cosmos 122 and 144 meteorological satellites 06 p0929 A69-17981
- Sensitivity problems in receiving microwave signals from communications satellite at deep space distances, considering noise factors 07 p1077 A69-18669
- Block coding systems performance in digital PCM data transmission through N-ary discrete channels in white Gaussian noise presence, discussing SNR upper bounds 07 p1080 A69-19096
- Bit probability of PCM/FM for receiver with IF bandwidth equal to or greater than data rate, limiter-discriminator detection and postdetection filter 07 p1082 A69-19106
- High data rate coherent telemetry systems synthesis, discussing multiphase modulation and demodulation to achieve bandwidth requirements 07 p1083 A69-19123
- Diode pump type circuit without diodes in signal path providing accurate transfer function analysis considered for spacecraft use [IEEE PAPER 3A-3] 07 p1134 A69-19191
- Laser modulation at optical and near IR frequencies, discussing beam characteristics changes and information transmission 07 p1158 A69-19742
- Data transmission techniques for aerospace and industrial applications, discussing radio link 08 p1271 A69-19906
- Digital information transmission error characteristics determining error distribution over time and relation to distribution function of intervals between errors 09 p1454 A69-21795
- Orbiting Data Relay Network communications system provides continuous wideband communication between ground and earth orbiting spacecraft via synchronous satellite repeaters [AIAA PAPER 68-432] 09 p1455 A69-21989
- Rapidly varying phase error effect on system performance in data detection process due to RF carrier tracking loop 09 p1456 A69-22459

- Optimum time interval for constant data transmission rate during single pass of satellite over ground station
09 p1457 A69-22462
- Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence
10 p1672 A69-23283
- Simultaneous transmission of information signals and pseudonoise synchronization waveforms in common bandwidth
[IEEE PAPER 67-TP-1173-COM]
10 p1655 A69-23532
- Reliability behavior of information transmission between transmitter-receiver pair in network of erasure channels without decoding and recoding at nodes
10 p1657 A69-23865
- Digital data transmission techniques and complex instrumentation systems design noting control, identification, synchronism and error reduction
11 p1834 A69-24545
- Statistical characteristics of photocurrent pulse amplitudes during cathode exposure to gas laser outputs
11 p1834 A69-24611
- Polyharmonic predictive and self tunable filters synthesis based on signal periodic components detection, noting role in information transmission and processing systems
11 p1849 A69-24966
- Atmospheric interference effects on optical PCM signal, analyzing absorption, beam bending, scintillation and correlation with visibility and weather
11 p1888 A69-25308
- Laser radiation transmission in atmosphere examined for information transmission applications
11 p1841 A69-25638
- Pure inertial navigation system support by supplying additional or redundant navigational information, considering space flight applications and earth related problems
12 p2128 A69-25873
- Extrapolation and interpolation for data compression including polynomial concept
12 p2027 A69-25877
- Shift registers with binary switching elements for shaping signal spectrum in data transmission systems without phase distortions
12 p2040 A69-26486
- Meteorological application of ATS observations in form of time lapse movies of weather in motion, describing camera and data flow
[AIAA PAPER 68-1094]
12 p2174 A69-26804
- Algebraic and sequential coding-decoding method for data communication rates up to capacity of discrete memoryless channel, discussing error probabilities
13 p2219 A69-27664
- Coherent signal addition in systems with multibeam channels and incomplete beam separation, deriving expressions for signal shape effect on noise rejection
13 p2223 A69-28551
- Deep space data return, discussing system function, design, operational interfaces and interplanetary spacecraft data compression methods
14 p2517 A69-29096
- Optimum time for telemetry data transmission by system using feedback combined with error correcting codes
14 p2412 A69-29428
- Electromagnetic waves as data carriers for earth resources and technology satellite sensors
15 p2607 A69-30231
- ESRO Aurorae satellite telecommunication system, detailing information nature, PCM telemetry and remote control system standard
15 p2702 A69-31084
- AZUR research satellite HF communications system, describing telemetry transmitter, command receiver and data transmission
16 p2759 A69-31854
- Electrophysiological /electrospnchnogram/ medical data transmission via satellite from France to U.S. for real time computer processing
16 p2746 A69-32070
- Tacan navigation system developments including data transmission, links to airborne computers and air traffic control transponders
17 p3003 A69-34101
- Data compression using orthogonal functions, design curves for given functions, signal characteristics and error avoidance
18 p3103 A69-35060
- Discrete information transmission synchronization in communication systems concerning optimal signal detection, HF, phase and coded synchronization, etc
18 p3104 A69-35264
- Time/frequency technology using time-ordered reporting digital data for air traffic control to avoid airborne collision
[AIAA PAPER 69-795]
19 p3367 A69-35635
- Buffer storage for telemetry nonstationary video data compression, analyzing requirements, predictor algorithm and variable aperture control using simulation
19 p3272 A69-36260
- Digital data compression system transmission error statistical analysis, emphasizing addressing schemes effect on compression ratio
19 p3272 A69-36261
- Automated computer network analyzing electrocardiograms, using telephone lines for bidirectional communications between cardiac data acquisition stations and computer center
19 p3262 A69-36273
- Digital data transmission by pulse code modulation considered for minimum mean square error
19 p3274 A69-36282
- Antenna high noise temperature reduction in single channel combined transmission and reception of tracking and communication data
19 p3275 A69-36328
- Radio wave information transmission, discussing propagation in various media, antenna arrays, diffraction, scattering, plasmas, guided waves and periodic structures
19 p3276 A69-36431
- Information theory, circuit optimization and computer aided design in radio wave information transmission
19 p3286 A69-36432
- TV picture and newspaper pages simultaneous transmission via earth satellite /Orbit/ system, measuring SNR and crosstalk
19 p3277 A69-36567
- Optical information rates for photocount detection systems based on coherent field model, considering binary channels with or without Gaussian noise
20 p3485 A69-36923
- Time division multiplexing of asynchronous digital signals from independent sources in continuous or bit stuffing mode, evaluating reliability and efficiencies
20 p3493 A69-37715
- Human optical system as remote sensor consisting of transducing, data transmission and processing subsystems, defining perception function and describing visual aids
20 p3483 A69-37745
- FM data transmission distortion noise and error rate compared with AM and phase step modulation, noting role of bandwidth
20 p3496 A69-37905
- Technical communication patterns in R and D laboratories, discussing effects of work structure, social relations, etc
20 p3640 A69-38019
- Noiseless feedback schemes for digital and analog transmission over additive white Gaussian noise channels
21 p3671 A69-38405
- Geostationary satellite orbit used for communication satellites, noting ultimate limit of channels as related to separation angles between satellites
21 p3673 A69-38757
- Data transmission of variables in deterministic networks
21 p3673 A69-38775
- Eye chart determination and layout for digital transmission system by computer simulation
21 p3678 A69-38776
- EEG with combined multichannel radiotelemetry and telephone for onward data transmission
21 p3664 A69-38978
- Data compression and transmission technique for real time system to monitor manned space missions, noting Apollo telemetry data
[AIAA PAPER 69-970]
22 p3906 A69-40350
- Booster digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device
[AIAA PAPER 69-988]
22 p3978 A69-40368
- Monograph on laser communication system in IR for industrial environments
22 p3900 A69-40617
- Airline management service to cockpit team for safe operation providing safety information sources and transmission channels and undesirable trend detection and correction
22 p4054 A69-41149
- Information transfer capacity of afferent and efferent cell system and fiber tracts of human cerebellum numerically defined with regard to cybernetics
23 p4084 A69-41467
- Loran C system for master station time and frequency dissemination, discussing application, coverage, timing accuracy and restrictions
23 p4116 A69-41601
- Communication satellite technology application to overlay network linking nationwide data machines for business mail service with virtually instantaneous delivery at low cost
23 p4117 A69-41669
- Capacitive coupling vs DC coupling between data input and transmitter exciter in FM telemetry system, based on pulse series Fourier analysis
23 p4119 A69-41744
- Stored program decommutation techniques involving small core storage elements insertion into data path between decommutator equipment and computer
23 p4133 A69-41749
- Integrated adaptive data transmission system accepting analog inputs through information compressing sampler or digital inputs by sampling
23 p4121 A69-41760
- EKG data telemetry from personnel to receiver located within same closed metallic chamber, discussing FM/AM and FM/FM systems
23 p4103 A69-41766
- HF data transmission system unaffected by high energy electromagnetic fields using GaAs IR emitting diode, glass fiber optic light guide and photomultiplier tube
23 p4121 A69-41768
- M-ary noncoherent signal structures requiring less transmission bandwidth than conventional FSK, deriving SNR
23 p4122 A69-41773
- Deep space communication capability projection, considering data volume and rate, channel frequency, large apertures, data enhancement and system losses
23 p4129 A69-42507
- PCM telemetry system for transferring information from many remote sources to single local processing point
24 p4281 A69-42620
- Hybrid display for data visual display using electroluminescent and thermochromic technologies for wide range of ambient illumination
24 p4313 A69-42899
- Analog feedback system for digital data transmission, describing feedback channel, error rate and SNR effects
24 p4289 A69-42977
- On-board digital filtering applied to spectral estimation and data compression, discussing theory, techniques, computerized implementation and prototype design
[AIAA PAPER 69-969]
24 p4285 A69-43510
- Hologram electronic transmission, obtaining required bandwidth reduction by differential recording of image and scene diffraction pattern
24 p4317 A69-43761

U TIME MEASUREMENT

DAWN CHORUS

Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance
09 p1485 A69-21536

Solar flare effect on polar chorus variation determined by comparing Antarctica VLF data with low latitude magnetograms
14 p2514 A69-29385

Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
16 p2774 A69-31981

Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance
16 p2783 A69-32531

DAYGLOW

Rocket observations of visible and UV dayglow, using electron density and temperature measurements for emission rates of various excitation mechanisms
12 p2076 A69-27108

Weak emissions in near IR daytime airglow using rocket-borne spectrometers
16 p2776 A69-32094

Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
17 p3037 A69-33664

Equilibrium velocity distributions of F region photoelectrons produced by solar ionizing radiation, discussing dayglow as impact result
20 p3591 A69-38061

Semiempirical electron impact cross sections and energy loss functions applied to dayglow and auroral intensities calculation, discussing atomic and aeronomic implications
21 p3713 A69-38527

Dayglow O I λ 1304 and 1356 A radiations photoelectron excitation rates theoretical calculation and experimental data on altitude dependence characteristics
22 p3939 A69-40517

Forbidden O I 5577 A dayglow emission equatorial measurements with rocket photometer, discussing altitude profiles and excitation mechanism
24 p4314 A69-43005

DAYTIME

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values
02 p0239 A69-11682

X ray airglow in daytime sky, suggesting origin in atmospheric N and O K alpha lines due to fluorescent excitation by solar X rays
02 p0307 A69-12022

Dayglow determination from aerosol spectrum obtained through data of brightness and polarization of day sky
07 p1211 A69-18545

Atomic N and NO daytime upper atmosphere density profiles, discussing production and loss mechanisms
08 p1307 A69-20185

Daytime sky radiation measurements by high altitude vehicles with spectrophotometer noting spectral radiance, luminance, polarization, albedo and near IR
08 p1317 A69-21071

Quasi-trapped particle currents having discontinuities on daytime and nighttime sides of earth
09 p1577 A69-21767

Daytime clear sky light polarization in UV and visible spectral regions calculated with considerations for aerosol components polarization effect
09 p1491 A69-22708

Frequent periodic variations existence in daytime ozone content associated with solar activity
12 p2070 A69-26693

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values
13 p2257 A69-28713

Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles
15 p2603 A69-31402

Daylight sky spectral radiance in ruby laser spectral range as functions of scattering angle, height over horizon of observed point and sun altitude
21 p3734 A69-38397

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres
21 p3716 A69-39116

Ground to satellite laser ranging experiments for daylight satellite range measurements
23 p4174 A69-42193

Daylight observations of Comet Ikeya-Seki 1965-f at perihelion passage, discussing resulting emission line spectra within comet head
23 p4221 A69-42386

DC 3 AIRCRAFT

DC 3 tail wheeled single skin piston aircraft conversion into first class luxury passenger aircraft for short haul service
20 p3460 A69-36918

DC 8 AIRCRAFT

Flight evaluation of direct lift control on DC-8 super 63 jet transport
06 p0867 A69-17666

DC [CURRENT]

U DIRECT CURRENT

DC 10 AIRCRAFT

Douglas DC-10 medium range aircraft, discussing engine placement, passenger and cargo capacity, construction data, etc
11 p1823 A69-25211

DC 10 aircraft reliability program, discussing passenger attractiveness, dispatch reliability, maintenance cost, flight safety and computer simulation for reliability engineering
19 p3248 A69-36027

DC 10 wing design, wind tunnel models, structural and systems testing, production and marketing [AIAA PAPER 69-830]
19 p3248 A69-36296

Safety standards for DC 10 aircraft, considering cockpit design, hydraulic, electric power, autoland and

direct lift control systems, structural safety and crash worthiness
22 p3867 A69-41133

DC-10 aircraft CF6 engine thrust reverser and spoiler design features impacting operational characteristics, maintainability, noise reduction, structural concept, control and actuation system [SAE PAPER 690411]
23 p4200 A69-41639

Douglas DC-10 aircraft design programs and methods stressing power plant reliability, maintainability and costs [SAE PAPER 690391]
23 p4201 A69-41664

DEACCLIMATIZATION

U ACCLIMATIZATION

DEACTIVATION

Slow proton irradiation of ribonuclease thin layers, determining differential inactivation cross section for various proton energies
03 p0371 A69-13482

Inactivation of T4 bacteriophage by tritium decay incorporated into DNA and phage protein
07 p1068 A69-19491

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions
08 p1358 A69-21010

Deactivation rate constants of carbon dioxide vibrationally excited by high temperature collision with carbon dioxide or nitrogen molecules, describing laser apparatus and reaction cells
20 p3578 A69-36937

DEAD RECKONING

Most probable position /MPP/ choosing methods accuracy, investigating relative effects of dead reckoning /DR/ and celestial lines of position /LOP/ errors
07 p1177 A69-19214

Navigation equations, discussing earth geometry, coordinates, gravity, dead reckoning and radio computations with regard to LORAN
18 p3169 A69-34845

U CHECKOUT

DEBYE-HUCKEL THEORY

Debye potential for effective interaction between electron and proton of hydrogen atom in partially ionized plasma
08 p1365 A69-20746

DEBYE LENGTH

Rarefied plasma flow interactions with conductors having cross sections equal to Debye radius, noting production of self consistent electrostatic potential
01 p0134 A69-11307

Gaussian type microfield formation in plasma by placing constraints on plasma particles displacements
02 p0285 A69-11568

Plasma transport properties derived from Boltzmann equation using Debye shielded Lande potential to represent collisions, noting viscosity and thermal conductivity
09 p1553 A69-22539

Late type stars with emission peak wavelength approximating graphite Debye frequency induced by graphite impurity atoms
14 p2521 A69-29586

DEBYE-SCHERER METHOD

Adaptor for Debye-Scherer powder camera to take high quality photographs even at liquid N temperature
19 p3313 A69-36493

Shocked Bamle enstatite transformed to disordered enstatite, noting Debye-Scherer patterns similarity
21 p3792 A69-38321

DEBYE TEMPERATURE

U SPECIFIC HEAT

DECAMETRIC WAVES

Decameter wideband directional antenna system for investigation of ionosphere by retrodiffusion method
03 p0402 A69-12860

Meter and decameter solar radio bursts and sudden cosmic noise observed at Ahmedabad, India
03 p0518 A69-14259

Non-Lo controlled fifth source of Jupiter decametric radiation from/near visible planetary disk
05 p0813 A69-15604

Europa control of decametric emission from Jupiter
05 p0813 A69-15605

Flux density spectral dependence disagreement with power law for synchronous radiation mechanism for radio sources in 12.6 to 25 MHz interval
06 p1004 A69-17538

Groups of drifting lanes of emission in fine structure of dynamic spectra of Jupiter decasecond decametric radiation bursts
06 p1008 A69-17958

Milky Way local spiral arm 10 MHz absorption, noting interstellar absorption effect and evidence for cool electron gas
08 p1383 A69-19900

Decametric radio spectra from 0053 to 0200 UT during July 7, 1966 solar proton flare, discussing Type 4 phase
10 p1765 A69-23751

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery
13 p2343 A69-27622

Decametric radio astronomy at frequencies from 10 to 40 MHz on wideband telescopes, discussing spectral types of discrete radiation sources
15 p2682 A69-30501

Decameter waves Doppler shift shown inversely proportional to wave frequency from electron density variation caused by acoustic wave propagation in ionosphere
16 p2755 A69-32610

Jupiter decametric radio source analysis suggesting two component model of rotation at both constant and variable rotational periods
18 p3202 A69-35212

DECARBOXYLATION

Optically active alanine synthesis from oxaloacetic acid by hydrogenolytic asymmetric transamination, noting role of decarboxylation
12 p2026 A69-25780

DECARBURIZATION

Reducing decarburization of titanium carbide in argon plasma by carbon containing atmosphere, obtaining stable spheroidal particles
05 p0767 A69-15976

- DECAY RATES**
NT ELECTRON DECAY RATE
 Solar microwave type 4 bursts spectra and decay rate time variations 04 p0648 A69-14364
 Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 07 p1119 A69-18705
 Thermal disturbance radiative decay time in carbon dioxide at low pressures and for nonzero vibrational relaxation times 07 p1215 A69-18843
 Plasma decay coefficient, charge recombination coefficient and electron scattering in cooling electron gas of quasi-steady cesium discharge plasma under high pressure 10 p1733 A69-23448
 Excess velocity and temperature decay laws in axisymmetric jet in transverse flow obtained via jet momentum and heat conservation equations 10 p1679 A69-23568
 Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments 12 p2133 A69-26298
 Mode locked lasers for measuring fast radiative decay in fluorescent systems 12 p2105 A69-26310
 Beam-foil technique for measuring radiative lifetimes of excited electronic states in ionic species of O, including transition probabilities 13 p2301 A69-27452
 Cesium ions decay time in thermionic converter operating in gas kinetic mode by pulse ionization, noting dependence on interelectrode potential distribution 14 p2403 A69-29252
 Radiative decay of polyatomic molecules, applying Green function form for transition probability to decay of manifold of closely spaced coupled levels 14 p2488 A69-29924
 Magnetic field effect on neutron beta decay rate, considering calculations applicability to elementary particle production 15 p2690 A69-30694
 Carrier lifetime in p-n-n diodes, discussing error of forward pulsed diode method by Wilson and alternative model 16 p2757 A69-31615
 Solar Ca chromospheric plage decay curves obtained from area measurements, showing similarity and exponential mean curve 16 p2859 A69-32222
 Chemical species flux decay in turbulent boundary layer with catalytic wall, obtaining solution of conservation equation by using shear stress distribution [AIAA PAPER 69-709] 17 p2955 A69-33480
 Mean life of D energy level in N IV, discussing Be I isoelectronic sequence 17 p3009 A69-34187
 Mean lives of 1s super 2 2p super 2 super 1D level in F VI and O V measured by beam foil technique 17 p3009 A69-34188
 Shock waves attenuation through multiple reflections at ends and interactions with expansion wave in shock tube by pressure transducer, noting exponential decay 18 p3121 A69-34475
 Pressure dependence of trapped spontaneous decay of resonant radiation carbon dioxide 18 p3179 A69-35478
 Solar cell degradation experiments on LES 4 and 5 satellites, discussing decay values and times for Si and CdTe cells with different cover thicknesses 19 p3254 A69-35713
 Wind shear effects on radar echo decay constant for finite meteor trail, considering roles of trail length and electron density variations 19 p3276 A69-36482
 Unquantized field calculations extended to include atomic field effect on atom, predicting spontaneous decay rate from excited state and light frequency time dependence 21 p3769 A69-38578
 Afterglow decay rates of Zn II laser lines in spontaneous emission measured, indicating thermal energy charge exchange excitation and CW oscillation 21 p3735 A69-38598
 Exponential decay and mean lives of lowest P levels in N V measured with beam foil source, noting agreement with theories taking configuration interaction into account 21 p3774 A69-38760
 Upper and lower bounds for growth or decay rate of solutions of parabolic differential equations for indefinitely increasing time 21 p3757 A69-39565
 Final period of decay for viscoelastic fluid in homogeneous isotropic turbulence, deriving expressions for double correlation function and energy decay 22 p3928 A69-39891
 Radio wave reflection from irregularly ionized meteor trains, discussing decay time scatter and electron line density 22 p3899 A69-39969
 Argon laser lower operating level decay probabilities, using spectrum analysis to study role of radiative decay 22 p3965 A69-40965
DECCA NAVIGATION
 TV transmission antenna radiation patterns measured with helicopter flown equipment and Decca navigation equipment 08 p1274 A69-20130
DECELERATION
NT SPIN REDUCTION
 Sustained high deceleration load effects on quartz crystals during atmospheric entry studied by centrifuge test program on oscillator circuits 01 p0042 A69-10417
 Particles behavior after separation from meteor, considering deceleration for separation altitudes and initial velocities 02 p0314 A69-11645
 Deceleration control system for aerobraking and skipout to orbit at Mars [AIAA PAPER 68-1146] 03 p0520 A69-13564
 Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles [AIAA PAPER 68-1147] 03 p0521 A69-13670
 Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters for protecting hard landing planetary payloads 04 p0683 A69-15508
 Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field 05 p0801 A69-15781
 Abrupt deceleration effects on monkey heart rate, noting occurrence of relative bradycardia 06 p0876 A69-18031
 Prolonged iterative accelerations and decelerations on vestibular apparatus, discussing nystagmus measurement attempt and centrifugation tests on guinea pigs 13 p2211 A69-28592
 Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field 18 p3181 A69-35033
 Finite electrical conductivity effect on sun angular momentum loss due to solar wind 18 p3189 A69-35398
 NASA planetary entry parachute program for rocket launched and balloon deployment tests [AIAA PAPER 68-934] 19 p3247 A69-35952
 Impact limiter system design for Mars landing vehicle noting balsa wood or phenolic honeycomb construction [AIAA PAPER 68-161] 21 p3820 A69-39228
 Deceleration control system for aerobraking and skipout to orbit at Mars [AIAA PAPER 68-1146] 21 p3828 A69-39761
 Aerodynamic deceleration systems for space missions, considering deployment of subsonic parachute and inflatable configuration following atmospheric entry [AIAA PAPER 68-1081] 22 p4036 A69-40542
 Deceleration parameter lower and upper limits for zero pressure big bang cosmological Friedmann models imposed by density parameter, Hubble constant and universe age 23 p4219 A69-42373
DECELERATORS
U BRAKES [FOR ARRESTING MOTION]
DECIMALS
 Mechanical vibration effects on human operation of various decimal input devices 17 p2916 A69-34010
DECISION ELEMENTS
U LOGICAL ELEMENTS
DECISION MAKING
 Probabilistic Information Processing System using men and machines to perform diagnostic information processing and to guide decision making 01 p0037 A69-10954
 Cost factors in choosing single or twin-engine layout for tactical aircraft 02 p0193 A69-12066
 Dynamic programming application to synthesis of unequally spaced symmetrical antenna arrays 02 p0219 A69-12338
 Project management in complex research, discussing incentive contracting decision model and resources allocation 02 p0356 A69-12476
 Cost dependent utility characteristics in mathematical model for optimum research and development resource allocation, computing optimum fund distribution with Lagrange multipliers 04 p0689 A69-14807
 Performance, operational, economic and management selection criteria for choosing rocket engine for particular vehicle and mission, noting rocket engine propellants 04 p0647 A69-15296
 Estimate accuracy and project selection models in industrial research, examining company data for miscellaneous, technical and commercial failure 05 p0849 A69-15981
 Project management decision making, noting decision nature, cost effectiveness concepts and incentives [ASME PAPER 68-WA/MGT-2] 05 p0850 A69-16145
 Computer use evaluation, discussing standards for automatic data processing /ADP/ investment and operations 05 p0850 A69-16299
 Bayes estimator in decision directed adaptive detection problem, noting allowance for decision errors 05 p0740 A69-16583
 Data handling by groups in perception type pattern recognition and decision making problems based on algorithm involving second degree polynomials 08 p1278 A69-20420
 Decision oriented automatic data processing systems design, noting quantity and quality of upward directed information to management 08 p1423 A69-20733
 U.S. Army Materiel Command R and D planning structure and technical planning processes influence on decisions improvement 08 p1423 A69-21153
 Search theory application to planetary exploration overall strategy for improving landing site decisions 09 p1595 A69-21994
 Operational research applications to management problems, discussing specific airlines operations cases 11 p1822 A69-24377
 Probability matrix for n order transition independent of decision taking method, applying fundamental matrices to analysis of mean number of false targets 14 p2410 A69-28836
 Data handling by groups in perception type pattern recognition and decision making problems based on algorithm involving second degree polynomials 14 p2418 A69-29658
 CAB decisions regarding subsidy reduction, carrier mergers, and dense route certification requiring improved clarity and timeliness 16 p2882 A69-32336
 Ergonomy and aviation medicine, discussing biotechnological aspects of information in man machine systems and observation tasks 17 p2915 A69-33770
 Aerospace R and D marketing decisions, considering capability identification, business opportunities, strategies and independent program funding 17 p3077 A69-34127
 Proposed projects selection for independent R and D development program in business entity, measuring merits in terms of future financial returns 17 p3077 A69-34129
 Reliability management simulation exercise training technique for government personnel, discussing decision making in development, production, testing and field usage of systems 18 p3117 A69-34487
 Operations research methods applied to systems effectiveness study, using key decision models with optimized alternatives 18 p3145 A69-34503
 Mathematical index model based on weighted factor analysis to facilitate management and technical decisions concerning achievement of numerous tasks with fixed funds 18 p3232 A69-34504
 Mathematical basis for human operators purposeful behavior in complex systems control situation requiring decision reaching 19 p3260 A69-35895

STOL aircraft to serve traffic needs of northeast corridor, discussing decision making regarding size, type, cost, speed and strip-length
20 p3462 A69-37352

Human operator decision making in vehicle manual control, considering success likelihood and possible outcome costs based on signal detection model
20 p3482 A69-37720

Structure and scoring method for judging alternatives in contract selection
20 p3640 A69-38023

Multiple cues in paired comparisons, discussing mathematical model of psychological process in information extraction and combination
21 p3664 A69-38970

Book on law making in International Civil Aviation Organization covering membership problems, air navigation and transport safety, settling of disputes, etc
23 p4240 A69-41297

Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation
23 p4133 A69-41769

Man-machine /semiautomatic/ control for optimal decision making, discussing automatic control disadvantages and limitations, multilevel system hierarchical structures, three level models, etc
23 p4112 A69-42443

Lunar landing decision, analyzing American space policy making process with aid of Huntington model [AAS PAPER 69-500]
24 p4418 A69-42853

Decision process model for man-machine decision task structuring by system designers
24 p4274 A69-43018

Optimal rule for decision to stop or continue observation of random variables after observing sequence of variables with continuous distribution function
24 p4341 A69-43235

DECISION THEORY

NT STATISTICAL DECISION THEORY

Optimal distribution of search effort for moving target location, suggesting Markovian decision models
01 p0104 A69-10653

Planetary quarantine and biological search strategy, discussing Voyager-Mars mission configuration, sterilization, back contamination and decisions
01 p0021 A69-11090

Optimal design of vibration tests based on decision theory [SAE PAPER 680753]
03 p0525 A69-13436

Finite state finite-action-space Markovian decision process, discussing optimal policies set in discrete dynamic programming
04 p0624 A69-14951

Nonparametric ranking procedures /based on order statistics/ guaranteeing preassigned probability for selection from random samples populations as good as control
08 p1342 A69-20172

Analytical synthesis of dynamic plant model to insure desired output in response to cyclic action
11 p1861 A69-25714

Error bounds for orthogonal signals in additive white Gaussian noise channels for class of generalized decision strategies permitting variable-size list decoding
12 p2029 A69-26204

Risk taking under uncertainty in individual and group decisions, analyzing gambling and group discussion situations
23 p4091 A69-42016

Electromagnetic compatibility /EMC/ quantification in system effectiveness by decision analysis technique, constructing conceptual model
23 p4145 A69-42227

DECLINATION

Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
09 p1486 A69-21538

Bright fundamental stars right ascensions observed in Chile, discussing instruments, declination range, systematic errors, etc
10 p1777 A69-23388

Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
16 p2783 A69-32533

Bright and faint stars absolute declinations compared in vertical circle systems used in Golosevo and Pul'kovo catalogs
17 p3027 A69-32872

Declination measurements of sources in 4C Catalogue by Arcicco 1000 ft radio telescope
22 p4014 A69-40128

DECODERS

Fluidic display systems, discussing thermochromic modules and decoder with miniature components
01 p0078 A69-10155

Digital phase locked loops synthesis for fading and sequential phase estimation in decoder using digital computation
03 p0388 A69-13178

ELDO satellite command decoder performance in presence of noise, evaluating PDM bit decoder bit error probability and false command probability
11 p1834 A69-24563

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations
19 p3273 A69-36266

Satellite communication system high speed sequential decoder design, discussing parameters, simulation and test results on satellite channels
23 p4131 A69-42523

Distribution system for TV driving signals proposed for single synchronized system for all TV centers, describing decoder circuits
24 p4282 A69-42745

DECODING

Trunk and tree searching properties of Fano sequential decoding algorithms
06 p0902 A69-17400

L-step orthogonalization of Bose-Chaudhuri-Hocquenghem codes
06 p0903 A69-17532

Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding
06 p0890 A69-17862

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes
06 p0904 A69-17865

Majority logic decoding of Euclidean or projective geometry codes in two steps
06 p0891 A69-17867

Linear shift register synthesis algorithm found to coincide with Berlekamp iterative algorithm for decoding BCH codes
09 p1470 A69-21317

Infinite tree code ensemble upper bound on moments derived for sequential decoding governed by Fano algorithm
09 p1471 A69-21318

Decoding procedure for error locating binary code indicating location of single subblock containing errors in code word, employing feedback shift registers
11 p1857 A69-24549

Algebraic and sequential coding-decoding method for data communication rates up to capacity of discrete memoryless channel, discussing error probabilities
13 p2219 A69-27664

Group code decoding, discussing equivalent transformations of reference matrix and reduction of equipment losses
13 p2225 A69-28537

Algebraic decoding techniques, discussing channel models, errors correction, hardware and software, etc
23 p4119 A69-41746

DECOMMUTATORS

Stored program decommutation techniques involving small core storage elements insertion into data path between decommutator equipment and computer
23 p4133 A69-41749

DECOMPOSITION

NT GLYCOLYSIS
NT PHOTODECOMPOSITION
NT PHOTODISSOCIATION
NT PHOTOLYSIS
NT PROPELLANT DECOMPOSITION
NT RADIIOLYSIS

Dislocations effect on decomposition rates of solid solutions of InAs and Au, Ag or Cu
03 p0484 A69-13283

Wet oxidation process for management of organic waste products in closed ecologies of long term multimanned space missions [SAE PAPER 680714]
03 p0380 A69-13443

Hydrazine decomposition in glow discharge, analyzing emission spectra and threshold level of decomposition by gas chromatography
04 p0646 A69-14860

Titanium vanadium martensite decomposition kinetics during heating, showing shearing process and dependence on temperature during quenching
07 p1163 A69-18778

Spinodal decomposition effect on Al-Zn alloy mechanical properties noting strengthening, brittleness and work hardening capacity
09 p1522 A69-21501

Structure of spinodal decomposition in Al-Zn alloys by X ray diffraction noting anisotropy, periodicity and stability
09 p1522 A69-21502

Microstructure for spinodal decomposition in Al-Zn alloys noting Zn precipitation, fracture mechanics, dislocations and transmission electron microscopy results
09 p1522 A69-21503

Aluminum additive effects on copper-titanium alloy decomposition, discussing Guinier complexes, heterogeneous nucleation, plastic deformation and low temperature aging
11 p1905 A69-24922

DECOMPRESSION

U PRESSURE REDUCTION

DECOMPRESSION SICKNESS

Changes in organism during sudden decompression, analyzing pressure equalization, dissolved gases transformation and body fluids vaporization
01 p0020 A69-10753

Neurological impairment in baboons exposed to prolonged decompression simulating high altitude aircraft cabin structural failure, noting neuropathological examination results
07 p1067 A69-19426

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training
13 p2212 A69-28622

Drug action on decompression sickness in rats compared with action on nitrogen narcosis and oxygen toxicity
17 p2913 A69-33172

Gangrene and caisson disease due to diving accidents, discussing emergency treatment with hyperbaric oxygen
17 p2911 A69-33775

Barotrauma during hyperbaric oxygenation at flight descent or reentry into caisson, including ear trauma symptoms and use of paracetamol
17 p2911 A69-33776

EEG monitoring during decompression illness /bends/ treatment by hyperbaric procedure using small multichannel telemetry pack
19 p3261 A69-36268

Bubble size and blood perfusion effect on gas bubbles absorption in tissues, noting decompression sickness
21 p3651 A69-38389

Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912

Decompression research on inert gas transport in body, discussing solubility factors in decompression damage
21 p3655 A69-38913

Decompression gas emboli detection while moving in flow streams of arteries and veins using ultrasonic Doppler shift principle and square-wave electromagnetic flow meter
21 p3663 A69-38914

Ultrasonic Doppler flowmeter for detection of circulating gas emboli of animal blood vessels during decompression
21 p3663 A69-38915

Intravascular gas emboli literature critique covering early nonclinical decompression experiments, clinical use of intravenous gas emboli, etc
21 p3655 A69-38916

Decompression sickness prevention in guinea pigs by heparin and papaverine combination nebulized in carbogen, discussing nitrogen elimination enhancement
21 p3655 A69-38917

Platelet role in decompression sickness pathology from experiments upon rats subjected to decompression after injection of antiplatelet serum
21 p3655 A69-38918

Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation
22 p3890 A69-40212

Decompression sickness in simulated zoom flights, discussing bubble formation probability and instantaneous surface tension effect on bends resistance
23 p4077 A69-41292

Altitude decompression sickness in aviation, discussing physiological mechanisms underlying syndrome and treatment of conditions
24 p4269 A69-43412

Decompression disease symptoms from standpoint of gas bubbles formation in blood vessels, examining factors preventing air metabolism
24 p4269 A69-43414

DECONDITIONING
Space research centrifuge counteracting null gravity physiological deconditioning, discussing linear and angular accelerations sensitivity and deconditioning effect on reentry task performance
18 p3114 A69-34368

DECONTAMINATION
U SPACECRAFT STERILIZATION

DECOUPLING
Decoupling techniques for antennas on aerospace vehicles, noting effects on far field radiation pattern and antenna gain
05 p0729 A69-15977
Decoupling by state variable feedback and determination of inverse extended to linear time varying multivariable system
09 p1472 A69-21680
Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming
11 p1888 A69-25310
Exact solutions for two state potential curve crossing in subexcitation molecular collisions in terms of various decoupling schemes
12 p2131 A69-25983
Multivariable control system decoupling by appropriate choice of decoupling network structure and location in system
12 p2048 A69-26074
Complete observability in linear time invariant systems decoupled via state-variable feedback, deriving sufficient conditions
12 p2053 A69-26514
HF electromagnetic decoupling pressure gage, using transducer with solid state strain gages as sensing elements
15 p2611 A69-31029
Decoupling structures, deriving expressions for infinitely long grooves self and mutual impedance
23 p4138 A69-41938
General purpose computer program for synthesis of multivariable systems decoupled by state feedback
24 p4294 A69-43307
Time-invariant multivariable linear systems, discussing structure theorem for controllable systems and application to decoupling problem
24 p4294 A69-43314

DEDUCTION
FORTRAN Deductive System to find solutions to theorem proving problems, discussing computer implementation
01 p0037 A69-10806

DEEP SPACE
NT INTERPLANETARY SPACE
NT INTERSTELLAR SPACE
Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
02 p0324 A69-12303
Mars and Venus probes antenna problems in environments of near earth space, deep space and nonearth planetary atmospheres
02 p0223 A69-12811
Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions
03 p0394 A69-13398
Manned spacecraft systems design optimization for extended space missions replacement modules
05 p0830 A69-16380
Controllability of deep space electromagnetic wave propagation in nonvacuum by calculating optimum values of control parametric functions
06 p0888 A69-17622
Cepheid stars as distance indicators in extragalactic space, using periodicity-luminosity relation
08 p1408 A69-21147
Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability
10 p1652 A69-22984
Hardware limitations on communications, instrumentation and data handling for manned deep space missions
13 p2219 A69-27666
Relativistic electron confinement within geomagnetic tail neutral sheet measured by Pioneer 7 deep space probe, confirming kinetic energy observations of IMP 1 satellite
14 p2433 A69-28934

Deep space data return, discussing system function, design, operational interfaces and interplanetary spacecraft data compression methods
14 p2517 A69-29096
Earth sensor for spin stabilized spacecraft to maintain specific orientation with earth, discussing use of blue and red filters
15 p2609 A69-30593
Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902]
21 p3761 A69-39348
Deep space communication capability projection, considering data volume and rate, channel frequency, large apertures, data enhancement and system losses
23 p4129 A69-42507
Spacecraft central data system for deep space solar probe data management
24 p4284 A69-42621

DEEP SPACE INSTRUMENTATION FACILITY
Deep space tracking network development, discussing capabilities and operational quality assurance
07 p1078 A69-18831
Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna
15 p2700 A69-31419
Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes
17 p2921 A69-33685

DEEP SPACE NETWORK
Deep space tracking network development, discussing capabilities and operational quality assurance
07 p1078 A69-18831
Deep space network system for radio navigation of Mariner mission in 1969, discussing objectives, spacecraft, tracking and data system, mission accuracy, etc
16 p2749 A69-31725
Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering
[AAS PAPER 68-144]
19 p3402 A69-35939

DEFECTS
NT AUDITORY DEFECTS
NT CRYSTAL DEFECTS
NT CRYSTAL DISLOCATIONS
NT EDGE DISLOCATIONS
NT FRENKEL DEFECTS
NT INCLUSIONS
NT POINT DEFECTS
NT SCREW DISLOCATIONS
NT SPEECH DEFECTS
NT SURFACE DEFECTS
NT VACANCIES [CRYSTAL DEFECTS]
Defect localization in complex plants applied to damage cause determination and economic criteria
05 p0767 A69-15765
Weld-nugget formation in resistance spot welding, using high-speed photography on model section of spot weld
05 p0769 A69-16539
Weld defects, discussing criteria for rejection, harmful and harmless defects, welding process and procedures and weld vs base metal defects
07 p1143 A69-19696
Welding defects, processes, inspection and personnel training problems
10 p1700 A69-23372
Analytic investigation of spectrum of electrical signals induced by spherical defects in ferroprobe sensors
10 p1675 A69-24072
Flow detection inaccuracies in shadow method due to interference effects when using Babinet principle
10 p1675 A69-24075
Weld defects effects on static and fatigue properties of weldments prediction, including tests of titanium-aluminum-vanadium joints
11 p1892 A69-24932
Standard reference radiographs for weld defects on steel sheets and plates
18 p3150 A69-35425
Echo amplitude measurements in ultrasonic testing to estimate flaw sizes and difficulties from artificial reflecting targets
19 p3323 A69-35578
Weld defect data analysis in relation to aerospace structure performance, emphasizing effect on fatigue behavior and acceptance standard
[SBAC PAPER 17]
20 p3550 A69-37450

Three dimensional X ray pictures of flaws shape and location in various materials
20 p3551 A69-38311
Ultrasonic method for detecting strength defects in filament wound materials
21 p3733 A69-39798
Grains with high defect concentration in circumstellar and interstellar space from energetic particles and photons bombardment, discussing lifetime and optical properties
22 p4023 A69-40472
Nondestructive testing techniques for flaw and defect detection, discussing radiography, ultrasonics, penetrants, thermal and magnetic methods, etc
23 p4169 A69-41529
Stress analysis in design techniques taking into account failure of flawed structures, discussing fracture mechanics
24 p4398 A69-42773

DEFENSE COMMUNICATIONS SATELLITE SYSTEM
Communication subsystem design of Defense Communication Satellite Program /DCSP/ for background information, noting repeater with toroidal pattern antenna
23 p4131 A69-42537

DEFENSE COMMUNICATIONS SYSTEM [DCS]
Satellite communication requirements for UK defense establishment, describing SKYNET system
08 p1272 A69-19957

DEFENSE INDUSTRY
Scientific and technical information flow sources, showing DOD user need within defense industry and importance of local work environment
02 p0204 A69-12219
Internationalized defense marketing, suggesting formation of international consortia of industrial companies to design and produce defense systems
14 p2540 A69-28933
Defense integrated management engineering system at California Naval Air Rework Facility
15 p2588 A69-30427
Cost risk management procedure in defense industry contracting, including risk percent limits and identification in proposals, specifications relief, escalation clauses, etc
18 p3233 A69-34655

DEFLAGRATION
Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation
01 p0141 A69-10678
Inflammable gas mixtures and deflagrations noting self ignition temperature, flame propagation, flame front structure and flame stability
06 p1031 A69-17417
Deflagration of solid and hybrid propellants in steady state for missile and rocket propulsion applications
06 p0982 A69-17422
Spherical deflagration and detonation waves in diluted stoichiometric hydrogen-oxygen mixtures in hemispherical combustion chamber
06 p1034 A69-17927
Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant
[AIAA PAPER 69-144]
06 p0983 A69-18162
Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile
[AIAA PAPER 69-142]
09 p1560 A69-21900
Limiting pressure for deflagration related to initial solid temperature of single crystals and pressed pellets of ammonium perchlorate
13 p3234 A69-27364
Steady deflagration of homogeneous monopropellant in condensed phase, considering nonequilibrium surface condition for mass decomposition rate
[WSCI PAPER 69-6]
16 p2830 A69-32347
Construction of single headed spin detonation polar as confluence of shock and deflagration waves by two dimensional hodograph
19 p3451 A69-36368
Adiabatic model deflagration limits for steady linear monopropellant burning at Lewis number of unity and one step gas phase reaction
24 p4415 A69-43670

DEFLATING
U INFLATABLE STRUCTURES
U PRESSURE REDUCTION

DEFLECTION

- Interlayer slip in layered wood beams with nail joints analyzed in terms of small deflection theory
01 p0169 A69-10638
- Integral equation solution for plate with internal support
03 p0528 A69-13799
- Conically bent plate cross section distortion analysis employing von Karman large deflection theory, noting effect of tapering
[ASME PAPER 68-APM/Y] 04 p0670 A69-14402
- Large finite deflections of clamped thin elastic circular plate subject to transverse concentrated load at center solved by power series
04 p0675 A69-14596
- Circular cylindrical shell creep behavior and buckling under axial compression and internal pressure, using multimembrane model
[AIAA PAPER 68-108] 04 p0676 A69-14706
- Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
05 p0834 A69-15783
- Finite elastic-plastic deflections of orthotropic shells of revolution, deriving exact geometrical relations and equilibrium equations
05 p0842 A69-16642
- Antisymmetric cross ply and angle ply laminated plates deflection under transverse loading with coupling between bending and middle-plane extension
07 p1231 A69-18711
- Large deflection behavior of shallow circular arch subjected to vertical point load by nonlinear Rayleigh-Ritz finite element method, discussing deformation path
08 p1411 A69-20140
- Finite element analysis of large deflections in thin elastic plates subjected to transverse loading, including nonlinear geometric effects
09 p1615 A69-21924
- Large deflections and associated moments in circular ring of linearly viscoelastic material subjected to small strains
09 p1615 A69-21925
- Holographic scanning technique for laser beam deflection, noting two and three dimensional raster scanning
11 p1885 A69-24847
- Shallow hyperbolic paraboloidal shell with large deflections, analyzing nonlinear behavior with numerical method based on integral equations
12 p1885 A69-26820
- Linear plate theory deficiency for large plate deflections, considering approximation of nonlinear behavior permitting changes in form without additional terms
12 p1885 A69-26822
- Rectangular plate buckling analyzed by finite element method with deflection function
13 p2364 A69-28225
- Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations
14 p2533 A69-28988
- Postbuckling of rectangular plates with exponential variation in thickness, analyzing large deflection equations using dynamic relaxation method
15 p2704 A69-30291
- Finite element and iteration method for large deflection of rectangular plate, considering stiffness matrix for bending
15 p2706 A69-30435
- Unsteady oscillations after rupture in thin homogeneous isotropic elastic plate, assuming deflection amplitude smaller than thickness
16 p2873 A69-32033
- Deflection effect on flow and mixing process in flames covering enclosed turbulent diffusion flames in combustion chamber
17 p3068 A69-32966
- Large deflections of thin nonlinearly elastic ring under external pressure, using two layer model
17 p3062 A69-33715
- Strain displacement and compatibility equations of finite symmetrical deflections of thin shells of revolution
[ASME PAPER 69-APM-14] 18 p3214 A69-34391
- Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
18 p3223 A69-35035
- Von Karman equations for large deflection of simply supported square plates solved using dynamic relaxation method, recommending optimum mesh spacing
20 p3619 A69-36938

- Natural frequency of thin plate subject to cylindrical bending, analyzing panel flutter by three mode approximation for large buckling deflection
22 p4045 A69-40821
- Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle- surface stress conditions
24 p4400 A69-43056
- Large deflections of circular air mat plates consisting of inflatable structures of two membranes connected by inextensible cords network
24 p4405 A69-43688

DEFLECTORS

- Analytical design of SH-3 helicopter engine inlet ice deflector shield interior surfaces, defining potential flow pattern and moisture droplet trajectories
01 p0011 A69-11064
- Electro-optical device using KDP crystal for laser beam deflection at temperatures near Curie point
03 p0435 A69-12984
- Laser pulse deflection by acoustooptical system consisting of ultrasonic cell and oscillator
11 p1840 A69-25423

DEFOCUSING

- Experimental equipment and procedure to investigate defocusing of electron beam directly in cavity beam hole of TWT amplifier
03 p0407 A69-13975
- Parabolic antenna beam scanning by defocusing, calculating relationship between reflector and beam tilt angles
07 p1089 A69-18248
- Traveling wave amplifiers beam defocusing by RF circuits and space charge fields under large signal operating conditions, discussing magnetic field strength
07 p1094 A69-18424
- Laser beam absorption induced index changes associated with thermal blooming observed in iodine doped carbon tetrachloride, using Mach-Zehnder interferometer
07 p1149 A69-18899
- Image enhancement by coherent optical system without spatial filter, noting improved defocused transparencies
14 p2450 A69-29641
- Focused Gaussian laser beam expansion due to thermal changes in refractive index of air, noting focused spot area increase with pulse energy
19 p3330 A69-35601

DEFORMATION

- NT AXIAL STRAIN
- NT ELASTIC BENDING
- NT ELASTIC BUCKLING
- NT ELASTIC DEFORMATION
- NT PLASTIC DEFORMATION
- NT STATIC DEFORMATION
- NT TENSILE DEFORMATION
- NT WAVE FRONT DEFORMATION
- Streak interferometry method for measuring transient deformation data on metallic solid surfaces
01 p0078 A69-10117
- Deformation temperature and reduction effects on structure and properties of cylindrical specimens of various titanium alloys
02 p0266 A69-12124
- General theory of constitutive equations for rational mechanics of deformation and flow
02 p0341 A69-12251
- Free flight impact tests showing deformation curve for aluminum and copper single crystals representable as 1/4 power law
02 p0344 A69-12288
- Stress concentration near arbitrary hole, assuming small deformations and physical nonlinearities
04 p0667 A69-14268
- X ray diffraction studies of deformation effects on bcc niobium alloys in terms of particle size, strain, faulting probability and dislocation density
04 p0618 A69-15202
- Shear strength of grossly deformed solids noting extrusion and opposed anvils techniques
04 p0631 A69-15465
- Deformation dependence on strain hardening and recovery rate during transient and steady state creep
06 p0943 A69-17236
- Power law taperings for minimizing peak to trough deflection of cross section of strip bent longitudinally into cylindrical surface
06 p1023 A69-17374
- Fatigue damage of metals under cyclic stressing, noting deformation modes dependence on stress amplitude and material type
07 p1166 A69-19215

- Axially loaded viscoelastic constrained bar instability for large deformation
07 p1235 A69-19440

- Ductile fracture behavior of two phase stainless steel examined by straining smoothed and notched tensile and Charpy impact specimens
08 p1333 A69-20574

- Second order tensor describing deformation of particles of continuum determined by functional, noting invariance restrictions
08 p1416 A69-20690

- Relativistic kinematics analog model for deformable continua, introducing deformation gradient and tensors
08 p1416 A69-20693

- Time and temperature dependence of Mo and W deformation structure variation and primary recrystallization from metallographic investigations using electron microscopy
08 p1334 A69-21058

- Nonlinear Lagrange equations and iterative solutions for studying strain state of mechanical structures on basis of very small displacements
10 p1793 A69-22888

- Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure
11 p1980 A69-24821

- Deformations and stresses in pressure vessel with elliptical cross section under uniform internal pressure, noting radial deflection and membrane, bending and skin stress
11 p1983 A69-25023

- Back stress role in strain rate equation for high temperature deformation and study of structure and applied stress effects
11 p1987 A69-25388

- Thin deformable body motion in disturbed potential flow of ideal incompressible fluid
11 p1876 A69-25488

- Plane surface finite area deformation tensors in continuum mechanics permitting separation of volume and shape changes in constitutive equations
11 p1994 A69-25603

- Thin ring-strut structure resting on elastic foundation, analyzing deformation taking warping effects into account, noting applicability to engine design
12 p184 A69-26812

- Fiber axis distribution resulting from mechanical working deformation of matrix containing initially randomly oriented fibers
12 p188 A69-26933

- Relativistic kinematics of continuum motion by invariant derivatives of deformation measures, discussing rigid body motion in Born sense
12 p189 A69-27116

- Maximum principle for infinitesimal deformations of convex surface with nonnegative Gaussian curvature, noting application to rotation and displacement diagrams
13 p2361 A69-27741

- Deformation functions for finite beam analysis allowing continuity at nodes and accurate eigenvalues
15 p2710 A69-30869

- Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids
16 p2813 A69-32789

- Grain boundaries contribution to creep deformation, discussing ratio of grain boundary slip strain to total creep strain
17 p2985 A69-32905

- Unstable metal deformation, discussing volume displacement in necking leading to fracture, homogeneous total deformation and torsion
17 p3053 A69-32987

- Bag type deformation of incompressible viscous convective and nonevaporating droplets immersed in Stokes or potential flow pressure distributions, including Weber number
[AIAA PAPER 69-669] 17 p2954 A69-33456

- Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates
[ASME PAPER 69-APM-10] 18 p3213 A69-34386

- Deformation studies of high melting point metals and alloys at high temperatures in vacuum, noting crack formation resistance and annealing time variations
18 p3155 A69-34651

- Deformation detection by stress wave analysis technique /SWAT/, noting pressure vessel applications
18 p3223 A69-35080

- Second harmonic generation in media with center of inversion following deformation by laser beam or static pressure
19 p3332 A69-35872

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites
19 p3418 A69-36135

Dynamic recrystallization in Ni and Ni-Fe alloys during torsional high temperature deformation
19 p3344 A69-36147

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties, emphasizing effect of primary structure
19 p3328 A69-36152

Homogeneous deformations of space and Cauchy problem for homogeneous free molecular motions, considering velocity fields and accelerations
19 p3444 A69-36803

Equations of deformation for elastoviscoplastic bodies with different properties under loading and unloading conditions
19 p3445 A69-36812

Yield strength, deformation modes and fracture characteristics of Ti-Al alloys, examining strength and fracture characteristics as function of structure and chemical composition
20 p3557 A69-36959

Rheology application to description, explanation and measurement of materials properties during deformation
20 p3561 A69-37599

Transverse shear deformation effect on bending of laminated rectangular plates, obtaining solutions for bending deflections, flexural vibration frequencies and buckling loads
20 p3627 A69-37770

Sheet metals deformation behavior during punch stretching and hydraulic bulging, noting effects of lubrication, stress-strain relation, anisotropy and microcracks
20 p3551 A69-38115

Metal deformation dynamics at elevated temperatures, discussing closed loop electrohydraulic testing machine for stress relaxation and strain rate sensitivity
21 p3689 A69-38595

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, rarefaction coefficient for air between jets, etc
21 p3696 A69-39095

Deformation of circular cylindrical shell of varying thickness, obtaining differential equation solutions through multiple scales method
21 p3837 A69-39159

Inertial motion of body produced by revolving uniformly deformed configuration, showing constant semiaxes without kinetic energy losses
21 p3772 A69-39620

Deformation of thin walled spherical shell reinforced with equatorial hoop by concentric equal forces
21 p3846 A69-39714

Meteorite impact hypothesis supported by autotchthonous and mixed breccias, shattercones and microscopic shock deformation evidence in central uplift rocks at La Malbaie structure
22 p4021 A69-40410

Deflections of heated circular plates with or without concentric circular hole and with different boundary conditions and temperature distributions
23 p4234 A69-42412

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form
24 p4395 A69-42591

Soviet book on resistance of materials to deformation and fracture in complex stress states covering elasticity, mechanical theories of limiting stress state, experimental verification, etc
24 p4402 A69-43233

Holo-diagram device for making and evaluating holograms for small deformations measurement in large machine tool parts
24 p4317 A69-43760

DEFORMETERS

Fatigue gauge for plastic deformation based on plastic strain rates, cycles, temperature, etc
07 p1135 A69-19216

DEGASSING

NT DEOXYGENATION

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing [AIAA PAPER 69-265]
09 p1566 A69-21258

Venus atmosphere carbon dioxide content origin from interior degassing during molten phase, using atmospheric model
16 p2857 A69-32098

DEGENERATION

Dirichlet problem of linear degenerate second order differential elliptic systems with independent variables
12 p2123 A69-26729

Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics
19 p3382 A69-36049

DEGENERATIVE FEEDBACK
U NEGATIVE FEEDBACK

DEGRADATION

NT THERMAL DEGRADATION

Aircraft flight testing for determining airframe, engine and pilot degradation, examining flutter, handling characteristics, water ballast, propulsion, etc
01 p0054 A69-10292

Brewster angle window degradation of high power ionized argon gas lasers [IEEE PAPER L-4]
05 p0775 A69-16322

Ionizing radiation-initiated degradation of deoxyribonucleic acid in bacteria, noting role of defective prophage
07 p1068 A69-19494

Continuous-channel electron multipliers degradation in spacecraft environment simulation laboratory equipment
14 p2449 A69-29565

Solar cell degradation experiments on LES 4 and 5 satellites, discussing decay values and times for Si and CdTe cells with different cover thicknesses
19 p3254 A69-35713

Solar cells arrays degradation in Intelsat spacecraft at synchronous altitude, noting shielding gaps and low energy proton influence
23 p4072 A69-42287

DEGREES OF FREEDOM

Computer solution of six degrees of freedom flight equations, discussing advantages of using flight path axes for translational equations of motion
02 p0212 A69-11998

Summed and differential types of higher order oscillations in vibratory systems with multiple degrees of freedom under parametric excitation
02 p0346 A69-12422

Optimum critical impulse for snap-through of nonlinear dissipative dynamical system of one degree of freedom [AIAA PAPER 68-143]
02 p0346 A69-12508

Equilibrium of rotational degrees of freedom in gases undergoing relaxation, noting excitation, relaxation time, kinetics, transfer effects and measurements for hydrogen
02 p0284 A69-12667

Single degree of freedom structural damping estimations from viscous and hysteretic energy dissipation data
03 p0523 A69-12947

Matrix-harmonic method of vibration study extended to include autonomous vibrations of single degree of freedom machines
03 p0468 A69-13861

Symmetric structure stability with first and second order imperfections, analyzing discrete system with n degrees of freedom
03 p0529 A69-14062

Multidegree of freedom systems for modeling optimum design of cantilever and simply supported beams for sudden loading
04 p0674 A69-14590

Compatible triangular plate elements for normal and in-plane displacements, discussing nine degree of freedom element, strain energy, simply supported and clamped plates
04 p0677 A69-14742

Linear mechanical systems idealized by single degree of freedom system with viscous damping subjected to combined deterministic and random excitation
04 p0680 A69-14968

Self balancing single degree of freedom free fall space environment simulator, discussing coincidence of mass and rotation centers
04 p0586 A69-15468

Perturbed nonlinear systems with many degrees of freedom, analyzing resonant oscillatory and rotary motions
04 p0631 A69-15536

Models of continuous media with internal degrees of freedom based on Lagrangian variational principle
05 p0793 A69-15775

Response of single and multidegree of freedom systems to nonstationary random excitation, analyzing spectral density function of pressure field close to jet engine
05 p0844 A69-16763

Dynamic stability of systems with distributed parameters subjected to parametric loading, considering parametrically excited systems with infinite degrees of freedom
07 p1231 A69-18502

Analytic autonomous Hamiltonian differential equations with two degrees of freedom admitting unstable equilibrium point
07 p1215 A69-18732

Structural damping coefficient for free vibrations of one degree freedom general systems motion
09 p1617 A69-22076

Multiparameter optimum damping for harmonically excited linear stable strictly dissipative n degrees of freedom system, locating multivariable saddle points [ASME PAPER 69-VIBR-42]
10 p1807 A69-24180

Entropy minimization in feature extraction by dimensionality reduction with linear transformation of pattern vectors, noting recognition time and storage space savings
11 p1909 A69-25291

Periodic solutions of quasi-linear self contained system with several degrees of freedom in case of commensurate frequencies, showing coordinates functions breakdown
11 p1920 A69-25749

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem
12 p2155 A69-25883

Synthesis of multivariable control systems at minimal integral square quality functional
12 p2046 A69-26061

Digital computer analysis of multivariable control system in frequency domain, using operational array technique programming method
12 p2046 A69-26064

Digital computer simulation of multidimensional stationary or nonstationary Gauss-Markov random processes with specified autocorrelation function, discussing time step choice
12 p2122 A69-26523

Potential error source in VTOL aircraft dynamics analysis suggested by dual function of symbol used in perturbation equations of motion
12 p2014 A69-26776

Energy transfer mechanisms between translational, rotational, vibrational, chemical and electronic degrees of freedom in hypersonic shock wave in high temperature air
12 p2063 A69-26969

Spacecraft attitude control and stabilization by three degree of freedom control moment gyro with controllable gyro spin angular velocity
13 p2355 A69-27445

Dynamic stability of two degrees of freedom circulatory systems with bilinear hysteresis damping
13 p2363 A69-28127

Autonomous canonical system with two degrees of freedom, determining equilibrium position stability in resonance case, calculating earth satellite rotational stability
14 p2482 A69-28813

Perturbed molecular distribution in translational and internal degrees of freedom in dilute chemically reacting gases with low ion concentrations
14 p2410 A69-29988

Theory, function generator routine and testing for six node 18 degree of freedom triangular element for plate bending
15 p2706 A69-30430

Finite element analysis of flat rectangular orthotropic multilayer stiffened panels, proposing six degrees of freedom model
15 p2708 A69-30668

Oscillations analysis in quasi-linear autonomous system with two degrees of freedom, using point mapping for case of resonance
15 p2653 A69-31193

Nonlinear vibrations of mechanical two degrees of freedom system during resonance described using Krylov-Bogoliubov method to obtain differential equations solutions
16 p2875 A69-32255

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency
16 p2813 A69-32285

Amplitude maxima for nonstationary oscillations of dynamic system with multiple degrees of freedom
16 p2876 A69-32296

Isolated symmetric doubly asymptotic solutions existence in neighborhood of symmetric periodic solutions

tions of nonautonomous canonical system with one degree of freedom near resonance
17 p2996 A69-33619

Nonlinear differential equations describing one degree of freedom systems oscillations, allowing for dry friction and internal friction in elastic element
17 p3007 A69-33913

Oscillations of nonlinear dissipative mechanical system with two degrees of freedom, possessing structural damping at joints between moving masses and base
17 p3064 A69-33915

Single freedom vibratory system response to imposed displacement harmonic excitation, analyzing response in terms of constrained system modes
17 p3067 A69-34139

Random excitations effects on vibrating nonlinear single degree of freedom system, statistically estimating resonance mode probability
18 p3171 A69-34554

Models of continuous media with internal degrees of freedom based on Lagrangian variational principle
18 p3173 A69-35028

One degree of freedom systems nonlinear oscillations differential equations periodic solutions by successive approximations, obtaining proof for convergence
18 p3174 A69-35311

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766] 19 p3433 A69-35657

Free oscillation period of nonlinear oscillators with one degree of freedom, discussing approximation method
19 p3373 A69-36310

Self rotary motions of nearly conservative systems with one degree of freedom, deriving periodic solution of equation for phase trajectories
19 p3374 A69-36466

Liquid filled rigid bodies motion stability defined and solved for system with infinite number of degrees of freedom
19 p3301 A69-36810

Relative displacement spectra analysis illustrating shock spectra errors, comparing real system response with simple single degree of freedom system response
20 p3548 A69-37301

Degrees of freedom requirements in hinge couplings of multibody satellites, examining main body attitude control
21 p3820 A69-39233

Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources
[AIAA PAPER 69-848] 21 p3762 A69-39378

Dynamic systems stability with two degrees of freedom, determining second order time dependent integrals valid near periodic orbit
22 p4013 A69-40123

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium
23 p4238 A69-41435

Motion equations of quasi-linear nonautonomous systems with many degrees of freedom, obtaining periodic solutions by asymptotic integration
23 p4183 A69-42477

DEHUMIDIFICATION

Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss
09 p1446 A69-22543

DEHYDRATION

Hypohydration effects on isometric muscular strength, noting decreasing trends in maximal strength
05 p0708 A69-15983

Vacuum, radiation and freeze drying effects on survival rate of microorganisms, noting influence of protective materials on extent of damage
07 p1064 A69-18943

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months
13 p2212 A69-28624

Bedrest as analog of weightlessness, evaluating role of extravascular dehydration in postrecumbency orthostatism
17 p2909 A69-33179

Renal calculus incidence among aircrews of long and short haul airlines, considering effects of dry cabin environment and dehydration
23 p4108 A69-41826

DEHYDROGENATION

Lithium aluminum hydride thermal decomposition using isothermal kinetics and differential thermal and thermogravimetric analyses, noting decomposition in four stages
02 p0304 A69-11898

Anoxia effect on succinic dehydrogenase and lactic dehydrogenase activities in digestive glands and organs sensitive to oxygen tension changes
22 p3887 A69-41193

Amino acid sequence of dogfish lactic dehydrogenase, isolating acylated amino-terminal peptide and arginine residues, indicating four polypeptide chain composition
24 p4280 A69-43051

DEICERS

Icing of airframes, discussing ice formation, deicing methods and protection of aircraft
02 p0192 A69-11889

Etching, spray etching and photo-resist methods for producing CrNi steel heating elements for propeller deicing
12 p2102 A69-26370

DEICING

Anti-icing system for business jets, noting activation prior to encountering visible moisture
06 p0868 A69-17669

Anticing for all-weather operation of business jets, discussing atmospheric conditions, ice formations, prevention and removal systems
[SAE PAPER 690333] 11 p1822 A69-24500

DEICING SYSTEMS

U DEICERS

DEIMOS

Deimos and Phobos mutual secular perturbations from calculated masses and orbital elements, using canonical systems of equations
10 p1780 A69-23615

DEIONIZATION

Metal ionic reactions with weak chemical bond breaking and three body reactions forming molecular ions without bond breaking, discussing sporadic E deionization
01 p0071 A69-11168

Ion pair annihilation average rate by single aerosol particle action in lower ionosphere noctilucent clouds
14 p2434 A69-28941

DEKATRONS

U COUNTERS

DELAY

Single frequency oscillations in stochastic quasi-linear differential equations with delay
01 p0170 A69-10825

Uniqueness theorem and successive approximations for delay functional differential equations, noting scalar problems
24 p4341 A69-43236

DELAY CIRCUITS

Wide range linear delay circuit with compensated bootstrap circuit generating linear ramp waveform and regenerative Schmitt trigger comparator
01 p0041 A69-10241

Variable time delay achievement in fluid logic circuits based on Coanda effect devices
02 p0196 A69-12085

Miniaturized adding sample and hold device with adjustable delay applied to digital filters
04 p0574 A69-14350

Soviet book on impulse generators in transistors covering multivibrators and pulse generators with timer circuits, crystal controlled frequency and delayed feedback
04 p0578 A69-15053

FET sample and hold circuit using error corrective feedback
08 p1298 A69-20837

Ultrahigh speed systems and logic circuits specifications implementation into electrical design, discussing circuit selection, line propagation delays, noise margins and temperature effects
[AGARDOGRAPH-114] 08 p1298 A69-20985

Modified scheme for simulation of delay with transient period independent of amount of delay, considering polynomial input
12 p2120 A69-25922

Spatial harmonic spectrum and tangential field distributions in microwave devices showing separation of higher harmonics through delay structure
13 p2236 A69-28576

Microwave dispersion systems, using waveguide loaded with dielectric material to obtain group linear frequency delay characteristic
14 p2412 A69-29395

Periodic ladder type design delay equalizer for linear delay characteristics in millimeter waveguide systems
23 p4135 A69-41361

DELAY LINES

NT ACOUSTIC DELAY LINES

Ultrasonic diffraction delay line operation interpretation as radar chirp signal correlator
01 p0026 A69-10072

Transistor distributed amplifier theory, noting effect of collector line and base line delay difference on gain and transient responses
01 p0041 A69-10203

Synthesis of infinite and finite Wiener optimal networks or equalizers using delay lines with feedforward and/or feedback taps
01 p0029 A69-10554

Fourier synthesis procedure optimized to design of large time bandwidth product dispersive filters employing nondispersive tapped delay lines
03 p0403 A69-13217

Delay line bandwidth reduction for video or digital information, noting radar tracking application
03 p0392 A69-13251

Pulse compression by optical correlation techniques, discussing laser beam control by diffraction grating in ultrasonic delay line
03 p0397 A69-13732

Recirculator with sign variable feedback coefficient for delay line passband increase
04 p0575 A69-14464

Nonsteady coordinates of linear delay system determined from observable linear combination of phase coordinates
04 p0583 A69-15094

Multiple beam waveguide and optical delay line capacity increase by transmitting Gaussian beams clearly resolved at receiver
04 p0579 A69-15446

Adaptation in nonstationary environment formulated for tapped delay line filters with adjustable time varying gains
05 p0737 A69-15806

Coupled cavity short slit delay lines in high power traveling wave tubes
07 p1095 A69-18428

Transversal equalizer circuit consisting of delay line and variable sampler and reinsertion coupler for microwave frequencies
07 p1102 A69-18671

Anti-interference TV circuit using delay lines applied to radar systems, discussing false alarm probability and detection probabilities
08 p1271 A69-19919

Variable phase shifters and delay lines, discussing mechanical and electronic adjustments
08 p1290 A69-20978

Surface wave reflection from free ends of ideally conducting rods forming semiinfinite grid to study rod delay systems and wave-duct antennas
11 p1833 A69-24438

Stability boundaries of discrete circuits employing delay lines with forward and feedback links, deriving equations
22 p3918 A69-40957

Delay line MTI receivers performance calculation accuracy, discussing error for general and restricted number of pulses from single and double cancellation at IF
23 p4117 A69-41605

Discrete delay line measuring FM noise, discussing special case of narrow band cavity resonator method
23 p4137 A69-41606

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects
24 p4291 A69-43271

DELAY LINES [COMPUTER STORAGE]

Failure test algorithm for sequential units with delay lines of control digital computers, detecting replacement of output terminals by sensitive paths
20 p3502 A69-37394

DELIVERY

Gliding cargo airdrop system including automatic homing and manual control
[AIAA PAPER 68-958] 24 p4254 A69-43723

DELTA DART AIRCRAFT

U F-106 AIRCRAFT

DELTA FUNCTION

Delta functions use in extending domain of Laplacian operator in quantum mechanics
07 p1174 A69-19495

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
09 p1471 A69-21327

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function
09 p1614 A69-21886

State variables with delta functions for electrical network with discontinuously variable components, discussing application to parametron
19 p3287 A69-36763

Stress analysis fundamental equation for variable thickness plate under concentrated load, using two dimensional Dirac delta function
22 p4041 A69-40144

DELTA MODULATION

Delta modulation for analog to PCM encoding due to tapped binary shift register and up-down counter
09 p1455 A69-21844

Delta modulated control system model for determining oscillation modes at sampling instants
13 p2221 A69-27962

Adaptive signal pattern dependent feedback delta modulation for improved signal/quantization-noise ratio
15 p2565 A69-30177

DELTA WINGS

Idealized delta wing free-free oscillations determination by deriving equations of motion for flexibility and rigidity and formulating boundary value problems
01 p0172 A69-11358

Hypersonic flow distribution and separation types over highly swept delta wings with trailing edge flaps at Mach 6
[AIAA PAPER 68-97] 02 p0189 A69-12522

Hypersonic flow past delta wings with attached shock wave, analysis leads to determination of closed flow pattern
02 p0191 A69-12577

Hypersonic perfect gas flow past delta wing with blunt edges at small angles of attack, noting constant drag coefficient
02 p0191 A69-12584

Aerodynamic characteristics of delta wings for supersonic flow at large angles of attack, showing sweep-back angle influence on drag coefficient
02 p0191 A69-12585

Vortex breakdown effect on aerodynamic coefficients of small aspect ratio delta wings during yawing
04 p0543 A69-14821

Thickness effects on flow past sweptback wings in supersonic flight noting influence of oscillatory motion
[ASME PAPER 68-FE-31] 05 p0698 A69-16078

Delta wing head wave at zero angle of attack in steady supersonic flow during transition from subsonic to supersonic leading edges
[DVL-871] 06 p0858 A69-17242

Mach number effects on pattern of vortex flow past delta wing and circular cones at various Reynolds numbers
06 p0858 A69-17339

Leeward side of delta wing with sharp leading edges at hypersonic speeds, noting Prandtl-Meyer expansion
[AIAA PAPER 68-675] 09 p1431 A69-21992

Delta wing in three dimensional supersonic flow analyzed by method of characteristics, discussing leading edge problems
11 p1820 A69-25425

Concorde design problems due to kinetic heating, aerodynamic characteristics, structure, equipment, modified delta wing planform, etc
12 p2012 A69-26358

Optimum surface for thick delta wing in hypersonic flow obtained by variational method, assuming closed leading and trailing edges
16 p2731 A69-31559

Wall pressure and heat flux distribution in hypersonic flow on delta wings at variable angle of attack for low Reynolds numbers
16 p2731 A69-31605

Leading edge flap angle and planform effects on low speed vortex patterns of flat plate double delta wings, measuring aerodynamic forces
17 p2890 A69-33246

Supersonic and hypersonic flow of inviscid ideal gas over conical delta wings using three dimensional method of characteristics
[AIAA PAPER 69-646] 17 p2893 A69-33486

Leading edge vortices and shock detachment flow over delta wings, discussing drag reduction due to lift
17 p2896 A69-34025

Skin friction drag formula for tapered and delta wings with allowance for coefficient variation and Reynolds number dependence on chord length
17 p2896 A69-34037

Vortex breakdown on slender sharp edged and modified delta wings with varying sweep angles investigated in wind tunnel using schlieren system for flow visualization
[AIAA PAPER 69-778] 19 p3237 A69-35644

Magnetic suspension system used as dynamic balance for wind tunnel models, discussing delta wing test results
19 p3292 A69-35738

Series expansion for exponent of singularity of Laplace equation for flow near apex of plane delta wing
19 p3240 A69-36590

Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures
19 p3241 A69-36779

Conical delta wings in supersonic-moderate hypersonic flow, studying yaw effects on pressure distribution behind shock wave
20 p3459 A69-37593

Gust absorber system configuration flight tests and analysis, emphasizing application to delta wing aircraft
[ONERA-TP-698] 20 p3462 A69-37753

Mach 8 flow field effects and forces on small delta tail surfaces mounted on body of revolution at various angles of attack
[AIAA PAPER 68-891] 22 p3859 A69-40539

DEMAGNETIZATION

Wall streaming, creeping and parade motion in Ni-Fe films excited by hard axis pulses
[IEEE PAPER 11.8] 01 p0138 A69-10717

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization
13 p2357 A69-28476

DEMAND [ECONOMICS]

Elasticity of demand theory applied to fare changes effect on passenger volume, noting interdependence of aircraft size and fare formulation
04 p0689 A69-14805

Economic planning of satellite earth station equipment in relation to expected traffic demand, emphasizing specifications for communication via Intelsat 2 and 3 satellites
07 p1117 A69-19347

Intercity travel demands simulation by linear graph model applied to Windsor-Montreal corridor
[AAS PAPER 69-382] 24 p4417 A69-42805

Demand curves for VTOL intercity transportation, discussing conventional helicopters, compound helicopters, tilt rotor, tilt wing, stored rotor and fan or jet lift
24 p4254 A69-43721

DEMODULATION

Optimum demodulation of PAM-FM signal for case of minimum mean square error as performance criterion
03 p0392 A69-13250

Nonlinear demodulation of amplitude modulated wave propagating in plasma
04 p0559 A69-15210

Tape flutter and additive noise time base errors in coherent demodulation of suppressed carrier AM multiplex
07 p1082 A69-19119

High data rate coherent telemetry systems synthesis, discussing multiphase modulation and demodulation to achieve bandwidth requirements
07 p1083 A69-19123

Soviet book on statistical theory of discrete signal demodulation, covering demodulator analysis and synthesis methods
09 p1455 A69-21933

ELDO satellite command decoder performance in presence of noise, evaluating PDM bit decoder bit error probability and false command probability
11 p1834 A69-24563

Probabilistic analysis of code message distortion due to pulse noise in modulation systems and comparison between linear and quadratic detections
17 p2919 A69-33145

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR
23 p4122 A69-41771

DEMODULATORS

NT FREQUENCY COMPRESSION DEMODULATORS
NT PHASE DEMODULATORS

NT PHASE LOCK DEMODULATORS

Dynamic tracking filter analysis and capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system
01 p0034 A69-11140

Frequency feedback receiver capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system
01 p0034 A69-11141

Phase locked loop demodulators for binary PSK signals compared with and without decision directed feedback in presence of CW interference
03 p0409 A69-13201

Digital detection of angle modulated signals including zero crossing detectors, digital phase locked loops, differentiation and arcsine demodulator
03 p0391 A69-13230

Modems for high data transmission rates on available voice bandwidth channels, noting point to point and multipoint polled networks and signal to noise ratio
04 p0564 A69-15208

Signal/noise performance of frequency locked loop FM threshold extension demodulator compared to phase locked loop demodulator and conventional FM discriminator
06 p0886 A69-16934

Expected number of spikes of phase locked loop demodulators, extending determination method to FM discriminator threshold and maximum likelihood estimator
07 p1082 A69-19107

Frequency feed forward open loop technique for lowering threshold and linearity of FM demodulators
07 p1106 A69-19128

Frequency modulation feedback demodulator design procedure for satellite communications, noting importance of nonideal implementation
09 p1457 A69-22464

Injection locked oscillator FM demodulator, analyzing signal distortion, intermodulation noise, differential gain and differential phase
11 p1845 A69-24565

Trigger demodulator theory, design and circuits
14 p2419 A69-28907

DENDRITIC CRYSTALS

Dendrite formation and solidification relationship in highly alloyed materials from quantitative determination of controlling factors for segregation
01 p0098 A69-10899

Directional solidification and composite structures, discussing structure changes effect on mechanical properties
03 p0449 A69-13877

Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays
11 p1903 A69-24538

Abrasion and corrosion resistant Cr-Co-B cast alloys in aggressive media, concluding resistance is due to chromium boride and fine dendritic structure
19 p3347 A69-36742

DENSIFICATION

Silica glass hardness relationship to pressure induced densification at low temperatures
03 p0453 A69-13616

DENSITOMETERS

Atmospheric density measurement above 50 km by aerodynamic and atmosphere excitation probes, emphasizing beta ray, bremsstrahlung and molecular fluorescence densitometers
15 p2615 A69-31284

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molskin chamber, densitometer, sphere and paddlewheel satellites
19 p3377 A69-36182

Gilson cuvette densitometer used for blood flow measurement in canine forelimb and human forearm and hand during constant intrabrachial arterial dye infusion
23 p4077 A69-41294

DENSITY [MASS/VOLUME]

NT ATMOSPHERIC DENSITY

NT GAS DENSITY

NT SPACE DENSITY

Anomalous gravitational geopotential as function of mass, discussing density anomalies in spherical shells for harmonics as obtained from satellite observations
02 p0244 A69-12178

Temperature dependence of viscosity and density in molten thallium sulfide, noting structural changes absence in short range order
04 p0643 A69-14998

- Hydrogen absorption coefficients, giving number densities in hydrogen gas or plasma for wide range of temperature and pressure
07 p1184 A69-19165
- Specific gravity data for olivine-pyroxene and enstatite chondrites, aerolites, siderites, amphoterites, pallasites and Butler meteorites
08 p1389 A69-20262
- Surface density of carbon foils measured accurately by determining trapped carbon dioxide pressure after burning in pure oxygen
10 p1746 A69-23663
- Denser material beneath lunar maria revealed by precise tracking of lunar orbiting spacecraft, discussing geology and evolution
11 p1953 A69-24339
- Planetary mantles thermal and nonthermal convection model, solving sphere density variations and radial velocity components due to internal time-independent motions
13 p2344 A69-27644
- Aircraft preliminary design weight and volume characteristics relation to aircraft density [SAWE PAPER 813]
18 p3221 A69-34897
- Diameter density and atmosphere of Neptune revised based on star eclipse, noting altitude and temperature
18 p3205 A69-35438
- Cosmic matter density and velocity in expanding universe with negative curvature within Einstein-Friedman theory
20 p3599 A69-37472
- DENSITY [NUMBER/VOLUME]**
- NT ELECTRON DENSITY [CONCENTRATION]
NT ELECTRON DENSITY PROFILES
NT ELECTRON DISTRIBUTION
NT ION DENSITY [CONCENTRATION]
NT IONOSPHERIC ELECTRON DENSITY
NT IONOSPHERIC ION DENSITY
NT MAGNETOSPHERIC ELECTRON DENSITY
NT MAGNETOSPHERIC PROTON DENSITY
NT METEOROID CONCENTRATION
NT PACKING DENSITY
NT PARTICLE DENSITY [CONCENTRATION]
NT PLASMA DENSITY
NT PROTON DENSITY [CONCENTRATION]
NT SPACE DENSITY
- Impurity concentration measurement for alloyed region of tunnel diode by determining Fermi level position
02 p0301 A69-12685
- Hole density/Zn concentration ratio in Zn doped solution grown p-type GaP, noting anomalous electrical properties
09 p1557 A69-21750
- Impurity concentrations in expansion tube flow, measuring radiation intensities [AIAA PAPER 68-371]
09 p1477 A69-21961
- Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
11 p1957 A69-24403
- Minority carrier density in base region of uniform base transistor at arbitrary injection level, using two dimensional model
11 p1845 A69-24569
- Density ratios of H ions to H atoms in ground state calculated as function of quasi-neutral plasma electron density
16 p2820 A69-31770
- Atmospheric gas constituents number densities determined as function of altitude by correlating laser beam scattering and absorption data
16 p2781 A69-32387
- Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
24 p4391 A69-43793
- DENSITY [RATE/AREA]**
U FLUX DENSITY
- DENSITY DISTRIBUTION**
- Density gradient measurement method for plasma column with propagation and electric field perpendicular to external magnetic field
01 p0128 A69-10390
- Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions
01 p0065 A69-10575
- Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes
01 p0032 A69-10887

- Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements
01 p0147 A69-11227
- Magnetospheric plasma distribution determination based on analysis of structured elements in micropulsations
01 p0076 A69-11229
- Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations
02 p0206 A69-11605
- Longitudinal distribution of cycle sunspots in initial phase of solar activity from Greenwich Observatory data
02 p0314 A69-11647
- Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes
02 p0290 A69-12403
- Critical values of laser formed solid angle determined in plasma diagnostics of scattering spectrum density distribution
02 p0251 A69-12416
- Chemical reaction fluctuations and oxygen electron attachment omission effects on density fluctuations in turbulent wakes, noting electron density fluctuation, bimodal model, etc
02 p0233 A69-12538
- Earth atmosphere air density and temperature profiles from drag acceleration measurements in falling sphere experiment
02 p0251 A69-12809
- Ideal gas spectra and density fluctuations correlations calculated during Markovian and nonMarkovian wandering of particles
03 p0477 A69-13414
- Nonlinear cross sectional space charge density distribution in electron beam of traveling wave tube
03 p0407 A69-13984
- Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
04 p0654 A69-14631
- Lunar surface formation, emphasizing density variations and mass concentrations
04 p0654 A69-14633
- Mathematical density-depth model proposed for lunar outermost layer compared to Matveev model, noting Surveyor estimates
04 p0655 A69-14659
- Lunar intermare crater density variations data tabulation, presenting quantitative and qualitative estimates
04 p0656 A69-14671
- Rarefied flow past sphere, analyzing collisionless flowfield structure and development as density increases
04 p0542 A69-14731
- Stability of nondissipative stratified rotating flows with constant density to axisymmetric disturbances
04 p0588 A69-14740
- Delay between solar activity and density changes in upper atmosphere using Harris-Priester model
04 p0594 A69-15121
- Probability density distribution of time shifts in binary signal fronts caused by fading, applying results to FM signal reception
05 p0719 A69-16087
- Nonsteady expansion of gas into vacuum in analysis of asymptotic solutions of Sedov
05 p0751 A69-16676
- Static problem of electric field intensity and space charge density distribution in semiconductor with hot electrons and holes
06 p0978 A69-16989
- Numerical calculation of density profiles of shock waves in expansion flows
06 p0908 A69-17021
- Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect
07 p1050 A69-18753
- Evening twilight nitric oxide density profile in gamma bands deduced from rocket measurements
07 p1125 A69-18842
- Shock waves internal structure in perfect monatomic gases, discussing density distribution in shock layer experimental measurement
07 p1120 A69-18930
- Atomic N and NO daytime upper atmosphere density profiles, discussing production and loss mechanisms
08 p1307 A69-20185
- Multibeam Fabry-Perot interferometers for aerodynamics measurements of rarefied gas flows,

- determining density distribution, shape, structure and detachment of shock waves
08 p1314 A69-20385
- Models for lunar density distribution consistent with available data on lunar physical properties
08 p1393 A69-20579
- Monograph on shock wave structure in binary gas mixtures covering gas kinetics and shock tube measurements of heavy component density distribution
08 p1304 A69-20711
- Upper atmosphere density variations and multiplicative factor necessary for adjustment of density variations of reference models
08 p1397 A69-20761
- Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems
09 p1589 A69-21368
- Dispersion equation to describe spectrum of LF density perturbations by pumping plane electromagnetic wave in transparent homogeneous plasma or fluid media
09 p1453 A69-21570
- Density inversion in convective zone of stellar photospheres occurring in Eridani atmospheric model under certain conditions
09 p1595 A69-21843
- Optimal working parameters and operational characteristics of laboratory electron gun, examining beam shape, convergence and current density distribution
09 p1464 A69-22243
- Radiation fields of Lyman alpha to Lyman 10 calculated for model planetary nebulas with constant and exponential density distributions in spherical symmetry
09 p1604 A69-22407
- Relativistically corrected Vlasov equation solved as approximate solution of exact relativistic equations of motion for low density media
10 p1724 A69-22924
- Invariant finite amplitude spherical shock wave propagation in medium with inversely radial density
10 p1778 A69-23405
- Atmospheric density analyzed on basis of photographic observations of meteors, comparing vertical profile with CIRA profile
10 p1688 A69-23936
- Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference
11 p1955 A69-24386
- Infinite diameter detonation velocity vs loading density curve for ammonium perchlorate, finding quadratic mean error
11 p1940 A69-24486
- Perturbation theory applied to emitting density matrix in nonlinear polarization of resonance media, considering gas laser in coaxial magnetic field
11 p1895 A69-24630
- Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations
11 p1835 A69-24712
- Diffusive flow with isopycnic lateral boundaries in porous medium and density distribution of diffusive motion, noting exact solution equivalence to previous solution
11 p1869 A69-24887
- External modulated currents induced electromagnetic field effect on density distribution of bounded plasma, discussing fluctuations in various configurations
11 p1927 A69-24910
- Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow
11 p1961 A69-25106
- Molecular O and total number densities between 70 and 120 km determined with rocket measurements of atmospheric absorption of solar UV and X rays
12 p2065 A69-26106
- Pulsed laser holography used in conjunction with schlieren three dimensional system for observing gas density gradients at different test positions
12 p2088 A69-26179
- Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations
12 p2011 A69-26191
- Density distribution vs thickness in sprayed ZrC, NbC and aluminum oxide coatings obtained by plasma jet
12 p2118 A69-26258

Autocorrelation and cross correlation analysis of rapid density variations in F region determined from satellite deceleration and geomagnetic data
12 p2069 A69-26436

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes
12 p2031 A69-26651

Kinetic equation solved for radiation propagation in atmosphere, considering neutron density variations and spatial distribution
12 p2149 A69-26683

Isotropic 3 K black body radiation implications for hot cosmological model, formation of galaxies, existence of supdense bodies and density nonuniformity during prestellar stage
12 p2167 A69-27047

Bhatnagar-Gross-Krook model for plane shock structure, considering moment and least squares methods and shock density gradient error analysis
12 p2063 A69-27112

Magnetic curvature effect on collisionless plasma density gradient drift instabilities, covering mean ion larmor radius and Alfvén modes
13 p2305 A69-27375

Cosmic ray propagation theory for steady streaming along magnetic field and down cosmic ray density gradient, noting MHD wave generation by anisotropy
13 p2326 A69-27569

Isotropic and anisotropic dust cosmological models density perturbation growth, considering angular momentum conservation in expanding universe
13 p2343 A69-27619

Galactic force law from observed stellar velocity and space density distribution
13 p2348 A69-27802

Dissipative drift instability due to electron density gradient and dissipative mechanism /neutral-electron and ion-electron collisions/ in plasma in constant magnetic field
13 p2308 A69-27979

Flux, density and pressure variations with position in vacuum system /nonuniform gas distribution/, discussing causes and consequences
13 p2299 A69-28019

Spatial density distribution and local values of attenuation of pulsed reflex discharge plasma determined from measured attenuation of microwave beam
13 p2312 A69-28112

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence
[AIAA PAPER 69-379] 13 p2283 A69-28309

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization fluctuations
14 p2435 A69-29049

Ionospheric horizontal discontinuities of electron density distribution parameters effect on penetration frequency, skip distances and arrival angles
14 p2436 A69-29057

British and Soviet D region electron density distributions from same VLF and LF propagation data
14 p2439 A69-29112

Plasma potential and density distribution in near-electrode plasma sheath of thermionic converter
14 p2491 A69-29257

Density distribution in axisymmetrical gravitating systems with ellipsoidal velocity distribution function, using integral equation of state for effective radii of cylindrical configurations
14 p2486 A69-29465

Transport coefficient density expansions obtained from time correlation functions in moderately dense gas with short range repulsive intermolecular forces
14 p2540 A69-29469

Quasi-distribution function differential equation for laser field with nonMarkoffian character derived from density matrix master equation
14 p2486 A69-29633

Luminescent material density distribution in comet Arend-Roland 1956h head determined from observed brightness variation with distance
14 p2524 A69-29711

Density fluctuations effect on fully ionized plasma electrical conductivity in large or zero frequency external electric fields
14 p2502 A69-29990

Airborne Doppler radar, estimating velocity distribution and density of pulse signals reflected from air and ground targets
15 p2567 A69-30349

Spiral density waves formation in galaxy model with differentially rotating and nonrotating subsystems based on collective interactions
15 p2688 A69-30550

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions
15 p2597 A69-30745

Combined distribution density of elevations and slopes for illuminated areas of stable statistically homogeneous random surface exposed to parallel rays beam
15 p2569 A69-30948

Air density at various heights determined from analysis of satellite low perigee orbits, discussing periodic density variations and correlation with daily geomagnetic index
15 p2599 A69-31348

Lateral density distribution of muon component in central region of extensive air showers, using Lodz analyzer
15 p2677 A69-31481

Ground level muon density of extensive air showers related to threshold energy and zenith angle for primary particles
15 p2678 A69-31483

Frequency of multiple muons from extensive air showers as function of zenith angle, noting mean transverse momentum and density spectrum
15 p2678 A69-31484

Multiple muon showers penetrating deep underground, discussing radial extent and occurrence frequency against multiplicity spectrum
15 p2678 A69-31485

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response
16 p2758 A69-31616

Steady state density profile dependence on electron density dependence of net volume ionization rate by analyzing ambipolar diffusion in RF excited magnetized plasmas
16 p2818 A69-31672

Density and density fluctuations in hypersonic turbulent boundary layer on shock tunnel nozzle wall measured using electron beam probe
16 p2770 A69-31907

Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data
16 p2770 A69-31908

Near free molecule heat transfer and density distribution between concentric spheres using BGK model equation and Knudsen iteration technique
16 p2877 A69-31921

Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane
16 p2850 A69-32304

Atomic nitrogen and nitric oxide density in upper atmosphere during nighttime calculated, allowing for atomic and molecular diffusion
16 p2785 A69-32622

Luminous particles volumetric concentration calculation based on limiting surface density to determine bulk density in cometary head
17 p3032 A69-33189

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams
[AIAA PAPER 69-683] 17 p2956 A69-33492

Supdense stars torsional oscillations and crystallization among nuclei from comparison with melting temperature and transverse shear wave velocities of dense conventional matter
17 p3037 A69-33643

Neptune radius, density and atmosphere deduced from observations during occultation of BD minus 17 degrees 4388 by Neptune
17 p3041 A69-33816

Quasars and intergalactic hydrogen density, using Schmidt law of increase in number density of quasars to construct plausible models
18 p3190 A69-34288

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems
18 p3198 A69-34757

Buoyant plumes and thermals defined as vertical motions produced under gravity by density or temperature contrast between incompressible source fluid and environment
18 p3122 A69-34917

Fluctuations evolution in density perturbations analyzed to obtain free fall and free expansion universe

models, showing no difference between expanding and static Newtonian universes
18 p3203 A69-35347

Laminar flow of viscous compressible fluid with density dependent on temperature, calculating steady state Navier-Stokes equations using vector function
19 p3297 A69-35852

Density profiles in far field of reaction control system plumes in vacuum obtained by method eliminating difficulties encountered by continuum method
19 p3238 A69-35954

Inelastic collisions and radiation effects on transport properties and shock structure in high temperature gases, obtaining density and temperature profiles
19 p3448 A69-36149

Surface tension of simple liquids consisting of interacting spherical particles, considering density variation in liquid-vapor phase transition zone
19 p3452 A69-36725

Fluidic feedback oscillator performance from fluid density effects analysis including supply jet, feedback line dynamics and load and control port impedances [ASME PAPER 69-FLCS-39]
20 p3465 A69-37984

Galaxy NGC 3593 with large amounts of interstellar dust, calculating galactic mass and central density
20 p3610 A69-38143

Fe-Ni unmelted and unablated micrometeorites number at earth surface calculated, using space density of interplanetary particles and micrometeoritic theory
20 p3614 A69-38251

Ammonia inversion radiation in Sgr B2 region, observing distribution of density, velocity and rotational excitation
21 p3799 A69-38647

Universal dependence of density fluctuations on specific entropy derived from equation describing material composed of neutral particles and equal number of charged and antiparticles
21 p3771 A69-38995

Density field surrounding leaking circular hatch of spacecraft treated as free molecular flow from annulus, superposing far field of effusive orifice flow
21 p3695 A69-39035

Gaussian type densities estimated by representing unknown density in terms of convolution expansion of Gaussian probability density and arbitrary distribution, discussing convergence rates
21 p3756 A69-39499

Parallel shear flow equilibrium in inviscid nonheat-conducting incompressible fluid with density varying as function of vertical coordinate
21 p3697 A69-39743

Small particle holography technique extended for dynamic properties of particle fields, determining velocity and density field, size distribution, flow structure and diffusion rate
21 p3726 A69-39776

Coherent MHD waves propagation in presence of plasma density fluctuations, applying perturbation technique to solve stochastic wave equation
22 p3990 A69-40529

Projected surface density upper limit of neutral atomic H between M31 and M33 galaxies, noting brightness temperature between NGC 4631 and 4656
22 p4024 A69-40578

Heat conduction equation applied to thermospheric heating in auroral zone to account for local temperature and density variations, introducing horizontal transport mechanisms
22 p3941 A69-40717

Fluidic proportional level control and density control systems, discussing advantages of low initial and maintenance cost, long life and temperature, shock, radiation resistance, etc
22 p3870 A69-41241

Density model for free oscillations of earth, noting dependence on core radius and S wave velocity at top and bottom of D layer
23 p4158 A69-42117

Density fluctuations during later stages of formation of universe, emphasizing problems of galactic cluster formation
23 p4221 A69-42390

Energy density distribution in power spectra of turbulence in long wave region in free atmosphere
24 p4346 A69-43155

Thermal conductivities /K/ of rock forming minerals reveals K as linear function of density for constant mean atomic weight
24 p4310 A69-43216

Gas dynamic functions of axisymmetric supersonic gas flows determined using flow density distribution optical measurements
24 p4247 A69-43496

Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference

24 p4390 A69-43776

DENSITY MEASUREMENT

NT X RAY DENSITY MEASUREMENT

Density gradient measurement method for plasma column with propagation and electric field perpendicular to external magnetic field

01 p0128 A69-10390

Dense plasmas produced by explosions of wires and mercury filaments, discussing plasma conductivities

01 p0128 A69-10391

End holes and glass tube effects in TM 010 mode measurements of average electron number density in cylindrical plasmas

01 p0131 A69-10812

Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes

02 p0290 A69-12403

Boundary layer local densities in high temperature gas flows obtained by measuring monochromatic soft X rays attenuation in layer

02 p0233 A69-12489

Impurity concentration measurement for alloyed region of tunnel diode by determining Fermi level position

02 p0301 A69-12685

Earth atmosphere air density and temperature profiles from drag acceleration measurements in falling sphere experiment

02 p0251 A69-12809

Average plasma electron density measurement by feedback oscillator to determine dielectric constant

03 p0473 A69-13103

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground

03 p0459 A69-13273

Lunar surface layer density measured radiometrically with scattered gamma rays by Luna 13

03 p0430 A69-13425

Plasma density spatial distribution determined from HF electromagnetic wave phase shifts without assuming axisymmetry

03 p0480 A69-14138

Time resolved electron number density and electron temperature in decaying plasma using laser interferometer

03 p0432 A69-14187

Electromagnetic phase measurement for determining integrated air density near earth surface

04 p0598 A69-14910

Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments

05 p0755 A69-16268

Rocket-borne Rayleigh scattering instrumentation to measure atmospheric density, discussing instrumentation and flight results

06 p0927 A69-17698

Coupled cavity carbon dioxide laser interferometer with feedback for measurement of transient plasma density in theta pinch, noting sensitivity

06 p0935 A69-17706

Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation [IEEE PAPER 2A-7]

07 p1133 A69-19185

Whistlers and VLF emissions from ground based and satellite measurements, applying results to electron density mapping and ion detection

07 p1127 A69-19354

He concentration measurement in transient He-air mixture by spectroscopic analysis of fluorescence excited by high energy electron beam

08 p1312 A69-19860

Atmospheric sodium measured at night by tuned laser radar, giving average column number density

09 p1484 A69-21464

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics

09 p1609 A69-21775

Atmospheric density profile from satellite measurements of light wave phase and refraction angles, discussing ionospheric, water vapor and diffraction effects on errors

09 p1490 A69-21862

A-430

Electron density fluctuations in turbulent wakes of hypersonic projectiles in ballistic ranges, discussing use of cylindrical Langmuir probe for direct measurement

09 p1496 A69-21934

Refraction errors in plasma density measurement by microwave interferometry

09 p1496 A69-22031

Laser radar atmospheric applications, noting particulate matter mapping, backscatter density profiles and use of lidar

09 p1521 A69-22795

Gage for measurement of density variation between expansion chamber and driver gas of valve driven shock tube

10 p1673 A69-23342

HI cloud densities near fronts of H II regions by gasdynamic calculations based on observational data for electron density, temperature and particle velocity

10 p1782 A69-23683

Flux densities and spectral indices of radio sources in 3C and 3 CR catalogs, noting measurements at 86 MHz frequency

11 p1951 A69-24237

Quantitative schlieren technique for one dimensional recording of light refraction in density gradients of high speed flow fields

12 p2088 A69-26181

Upper atmosphere density variations investigation using Eurobs system, correlating density to geomagnetic activity and 10.7 cm solar radio emission

12 p2069 A69-26437

Electron concentration in polar ionosphere measured by coherent scattering method

12 p2071 A69-26703

Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement

12 p2100 A69-27177

Ionization sensors and detectors classification and dynamic calibration for pressure measurement

13 p2262 A69-28083

Multichannel optical interference fluid manometer, using laser light source for fringe pattern photographic record

13 p2263 A69-28190

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density [AIAA PAPER 69-328]

13 p2200 A69-28263

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347]

13 p2263 A69-28282

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground

14 p2472 A69-28781

Noon electron densities between 65-90 km from measurements of differential absorption of partial reflections, discussing seasonal variations at midlatitudes

14 p2439 A69-29110

Air densities from satellite obtained orbital data, comparing accuracy of values and methods of analysis

15 p2600 A69-31349

Wintertime short term density variability in upper atmosphere obtained from rocket measurements

15 p2601 A69-31374

Atmospheric density measurements by triaxial accelerometer system, ionization gauges and orbital decay of OV1-15 satellite

15 p2602 A69-31384

Low altitude atmospheric density satellite OV1-16 measurements, showing agreement between onboard accelerometer and orbital drag data

15 p2602 A69-31385

Kinetic theory and gas-surface interactions for upper atmospheric density measurements by mass spectrometers, pressure gages and satellite drag, detailing adsorption effect

16 p2776 A69-32089

Atmospheric density at 130-160 km measured from satellite 1968-59B orbit, noting agreement with CIRA 1965

16 p2776 A69-32095

Electron density measurement method in plasma or vacuum based on refraction index in optical frequency range using laser interferometer mismatch as criterion

16 p2798 A69-32583

Air density measurement at high altitudes by falling instrumented sphere ejected by missile in upper atmosphere

17 p2971 A69-32898

Nitrogen density measurements up to 4000 atm and 1000 C, examining possible error sources

17 p3073 A69-33393

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm

18 p3190 A69-34287

Lunar surface bulk density determined from laboratory and spacecraft measurements of static bearing capacity as functions of depth and solids percentage

18 p3193 A69-34366

Low density plasma electrical conductivity determined by temperature and electron density measurements, using Ohm law

18 p3181 A69-35072

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements

18 p3153 A69-35307

Quantitative density data from schlieren measurements by photomultiplier technique for axisymmetric flow outside diffraction bands

19 p3306 A69-35741

Pluto mass and density accuracy, questioning values derived from Neptune observations

19 p3403 A69-35969

Ar-Kr integral collision cross sections based on density measurements of Ar beam passed through liquid nitrogen cooled Kr filled scattering chamber

19 p3378 A69-36185

Jet and Mach disk density measured by fluorescence electron beam technique, calculating Mach disk thickness from density profiles

19 p3239 A69-36396

Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times

20 p3535 A69-38100

Earth atmospheric density measurement by microwave radio occultation techniques, transmitting coherent radio signal to repeater spacecraft from master station

21 p3705 A69-38375

Chemical composition and lechatelierite size frequency influence on moldavites bulk density, using data to elucidate origin

23 p4210 A69-41348

Near wake electron density distribution for reentry configuration models in shock tunnel with minimum flow interference [AIAA PAPER 68-161]

24 p4248 A69-43643

DENTISTRY

Rat dental pulp hemorrhages following acute hypoxia from exposure to decompression chambers, atmospheric pressure variations or high acceleration

21 p3661 A69-39276

Fighter pilot teeth loss prevention and curative treatments, describing various suitable dentures

21 p3661 A69-39277

DEOXIDIZING

Sintered molybdenum deoxidation effect with C, B and Si, analyzing hardness, tensile strength and ductility

02 p0265 A69-12002

Spray cleaning and deoxidizing of Al surfaces for structural bonding using sulfuric acid-sodium dichromate deoxidizer, noting tests with proprietary solutions

19 p3321 A69-35564

Cleaning, deoxidizing and chromating process effects on chromate coated Al, using salt spray corrosion tests

19 p3321 A69-35570

Aluminothermic reduction of Ti and Ni oxides for obtaining Ti-Ni-Al system

22 p3969 A69-40070

DEOXYGENATION

Nitrosoazomethine derivatives deoxygenation for generation of azomethine nitrenes, discussing preparation by oxidation and dehydrogenation of secondary amidoximes

10 p1651 A69-23305

Nonmetallic inclusions formation mechanism after reducing iron by Al, Zr and Ti, noting oxygen/ reducing agent ratio role

22 p3969 A69-40069

DEOXYRIBONUCLEIC ACID

UV induced excited-state properties of DNA using optical emission and electron spin resonance methods

03 p0372 A69-13488

Radiation structural and transcription damage to deoxyribonucleic acid (DNA), noting postirradiation repair on molecular level

03 p0372 A69-13489

Inactivation of T4 bacteriophage by tritium decay incorporated into DNA and phage protein

07 p1068 A69-19491

Ionizing radiation-initiated degradation of deoxyribonucleic acid in bacteria, noting role of defective prophage
07 p1068 A69-19494

Degree of organization in bacterial cell, discussing pool size and DNA synthesis
07 p1069 A69-19505

Inhibition of gamma ray induced DNA degradation by infection with bacteriophage
07 p1069 A69-19709

DNA replication in vivo as function of temperature sensitive polynucleotide ligase mutant Th, tsA80 in strand synthesis
10 p1647 A69-24188

Defective bacteriophage PBSh in *Bacillus subtilis* after mitomycin C treatment, showing DNA synthesis and marker frequency change
15 p2555 A69-30446

Biological effects of radioactivity and X rays irradiation of whole body and cells, considering DNA degradation
19 p3257 A69-35978

Deoxyribonucleic acid conformations in spinach leaf chloroplasts by electron microscopy
20 p3479 A69-38001

Intraperitoneal high polymer DNA administration normalizing effect on DNA and RNA contents in liver, spleen and intestinal mucosa of white rats exposed to X rays
21 p3657 A69-39050

NonDarwinian evolution of protein and DNA, comparing expectations of evolution models for protein and amino acid changes
22 p3871 A69-40060

DNA polymerase from *Escherichia coli*, discussing physical and chemical properties of enzyme and polypeptide chain consistency
22 p3898 A69-41070

Chemical modifications effects on *Escherichia coli*, DNA polymerase, including Hg atom addition to sulfhydryl group of enzyme
22 p3898 A69-41071

Properties, relative magnitudes and relationship of pyrophosphate exchange reactions catalyzed by DNA polymerase from *Escherichia coli*
22 p3898 A69-41072

Exonuclease function of DNA polymerase from *Escherichia coli*, discussing hydrolysis of polydeoxyribonucleotides and resistancy of oligonucleotides
22 p3898 A69-41073

Deoxyribonucleoside triphosphate substrate binding to *Escherichia coli* DNA polymerase, conducting equilibrium dialysis
22 p3898 A69-41074

DNA and d(A-T) oligomers enzyme binding to DNA polymerase by sucrose density gradient centrifugation
22 p3898 A69-41075

Bacteriophage desoxyribonucleic acid (DNA) degradation by gamma irradiation in vitro by Co 60, discussing breaks, cross links and molecular weight
23 p4079 A69-41402

DNA interaction with ribosomes enhancing amino acid incorporation into cell-free protein synthesizing system extracted from *Chlorella pyrenoidosa*
23 p4080 A69-41430

Thin films of infectious DNA of bacteriophage bombarded by slow protons, determining differential inactivation cross sections
23 p4081 A69-41431

DNA denaturation without variance from pH 7.0 by adding NaOH observed with viscosity measurements, obtaining similar results with hydrochloric acid
24 p4263 A69-43225

DEPENDENCE
U SPATIAL DEPENDENCIES
U TIME DEPENDENCE

DEPENDENT VARIABLES
Finite element method for exact solution of more general problems with one independent variable and extension to many dependent variables
04 p0676 A69-14741

Iterated logarithm law proved for class of stationary series extended to systems of dependent random variables with complete couplings
11 p1910 A69-25699

DEPLETION
Voltage dependence of depletion layer width, maximum electric field and capacitance of Gaussian diffused plane, cylindrical and spherical p-n junctions
07 p1196 A69-18242

DEPLOYMENT
Deployable appendages of OGO attitude controlled spacecraft design
06 p1017 A69-17606

Flight tests of deployment of 20 ft diam ribbon parachute at high dynamic pressures and supersonic speeds
11 p1823 A69-25383

Parachute deployment load control by use of line ties from rocket sled tests
11 p1823 A69-25386

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3821 A69-39350

DEPOLARIZATION
Nonequilibrium carriers during semiconductor depolarization, noting microwave oscillation energy absorption in silicon and zinc sulfide crystals
01 p0138 A69-10434

Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion
06 p0962 A69-17817

Cometary magnetic fields by measuring depolarization of molecular resonance fluorescence
09 p1603 A69-22234

Turbulence induced depolarization of linearly polarized He-Ne laser beam at 6328 A traversing atmosphere near ground level
11 p1896 A69-24842

Book on depolarization of electromagnetic waves covering interface reflection and diffraction, scattered waves, anisotropic media, random scattering, Fresnel coefficients, Brewster angle, etc
14 p2412 A69-29315

Depolarization degree of angel echo signals measured by radar station, indicating insects and other foreign particles in atmosphere as reflection sources
16 p2779 A69-32274

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm
18 p3190 A69-34287

Depolarization of extragalactic radio sources at low Galactic latitudes attributed to ionized hydrogen produced by B2 star tunneling through interstellar hydrogen cloud
18 p3194 A69-34425

Electromagnetic wave scattering and depolarization by horizontally weakly inhomogeneous medium, using small perturbation method
18 p3101 A69-34788

Wavelength dependence of total and depolarized backscatter laser light cross section for rough metallic surfaces
18 p3172 A69-35011

DEPOLARIZERS
U DEPOLARIZATION

DEPOSITION
NT ANODIZING
NT ELECTRODEPOSITION
NT ELECTROPLATING
NT VACUUM DEPOSITION
NT VAPOR DEPOSITION

Silicon carbide deposition from liquid organic compounds using film boiling applied on heated tungsten wire substrate
02 p0252 A69-11804

Deposit formation in empty wing tanks due to autoxidative degradation of hydrocarbon fuel, noting results of environment simulation tests
[SAE PAPER 680733] 03 p0366 A69-13439

Accretion rate of cosmic dust estimation from cosmogenic aluminum-26
03 p0514 A69-13935

Bulk weld filler metals, discussing granular compositions, electrodes and iron, nickel and cobalt base deposits
11 p1891 A69-24931

Tungsten emitting surfaces work functions, discussing dense crystalline planes electrolytic or pyrolytic deposit growth and surface chemical or electrolytic attack
14 p2506 A69-29268

Coating deposition theory on high temperature materials, discussing interfacial energy and wetting properties of molten metal drop on solid base material surface
20 p3560 A69-37358

Silicate glass impurity droplet formations on alumina single crystals polished surfaces analyzed by electron microprobe as function of high temperature
23 p4176 A69-41597

DEPOSITS
U CRYCULI
U CRYCODEPOSITS

DEPRESSANTS
U CENTRAL NERVOUS SYSTEM DEPRESSANTS

DEPRESSURIZATION
U PRESSURE REDUCTION

DEPRIVATION
U SENSORY DEPRIVATION
U SLEEP DEPRIVATION

DEPTH MEASUREMENT
Depth distortions in binocular visual fields from misleading size cues
21 p3653 A69-38900

DEPTH PERCEPTION
U SPACE PERCEPTION

DERIVATION CALCULUS
U DIFFERENTIAL CALCULUS

DESCENT
NT PARACHUTE DESCENT

Approximation formula for calculating descent speed and lift-drag ratio
10 p1633 A69-22873

Barotrauma during hyperbaric oxygenation at flight descent or reentry into caisson, including ear trauma symptoms and use of paracetesis
17 p2911 A69-33776

Mathematical model for ascent and descent of high altitude tethered balloon, developing computer program and deriving differential equations of motion
[AIAA PAPER 68-942] 24 p4254 A69-43722

DESCENT TRAJECTORIES
NT REENTRY TRAJECTORIES

Constant thrust deceleration formula for gravity turn soft landing maneuvers expressed in elementary and trigonometric functions of initial conditions for descent
02 p0335 A69-12531

Angle of attack effect on motion throughout entry of spinning descending vehicle, noting effects of transverse angular velocity and spin rate
04 p0666 A69-15522

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements
13 p2355 A69-27683

Kalman filter based on calculus of variations, evaluating object trajectory during vertical atmospheric descent
19 p3307 A69-35794

Apollo lunar module landing radar, discussing descent phases, operating modes, assemblies and Surveyor radar
19 p3267 A69-35797

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass
19 p3431 A69-36616

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data
19 p3432 A69-36633

Spacecraft descent trajectory optimization during atmospheric reentry, proposing algorithm for continuous trajectory determination
21 p3766 A69-39647

Spacecraft atmospheric entry descent trajectory optimization by stochastic procedure, requiring onboard digital computer to realize optimal algorithms
21 p3767 A69-39648

Spacecraft trajectory control algorithm for hypersonic reentry, describing onboard equipment role and simulation results
21 p3767 A69-39649

LM descent engine behavior upon contact with lunar surface simulated, basing test condition on statistical trajectory analysis indicating fire until touchdown possibility
[AIAA PAPER 69-1020] 22 p3923 A69-40391

Steep descent landing systems developmental phases for VTOL aircraft, discussing noise abatement, approach angle and descent rates
22 p3978 A69-40674

DESENSITIZING
Receivers EMC, discussing single parameter to evaluate system susceptibility to desensitization, cross modulation and intermodulation
23 p4142 A69-42232

DESERT ADAPTATION
Soil, moisture and other requirements for microorganism survival in simulated Martian environment
01 p0018 A69-11091

Heart rate and bodily fluid changes in aestivating desert anurans, discussing weight loss and metabolism reduction
11 p1827 A69-24923

DESIGN

Part selection, source control and application program for reliability of equipment design, noting derating
22 p3953 A69-40031

DESIGN OF EXPERIMENTS
U EXPERIMENTAL DESIGN

DESORPTION

Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
09 p1558 A69-21808

Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibration region
12 p2132 A69-26114

Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen
12 p2026 A69-26115

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant
[ECS PAPER 330]
15 p2562 A69-31540

Yttrium desorption from W wire by strong electric field, noting electron work function or temperature increase effects on desorption field
17 p3015 A69-33631

Equilibrium absorption and desorption rates of carbon dioxide-argon mixtures from silica gel measured as function of temperature using gas dynamics method
21 p3848 A69-38707

Cations desorption from O, H and N films adsorbed at graphite surface under electron bombardment, studying desorption cross sections discrepancies
22 p3972 A69-39957

Desorption of hydrogen and methane from Al, Mg and Mb under room temperature tensile deformation in ultrahigh vacuum
23 p4176 A69-41541

DESPINNING

U SPIN REDUCTION

DESTRUCTION

Spacecraft sterilization by destructive heating with thermite or high velocity entry friction before entering planet atmosphere
15 p2560 A69-31472

DESTRUCTIVE TESTS

Pressure vessels burst tests for investigating alloys, fabrication processes and biaxial loading effects, noting vessel configurations and test temperatures
10 p1714 A69-23974

Composite polymers thermophysical properties at thermal destruction temperatures, noting increased heating rate effect on kinetic curves
18 p3161 A69-34696

Reliability testing as complex element of reliability engineering noting nondestructive, destructive and selective demonstration testing, stress-time correlations, risk levels optimization, etc
22 p3952 A69-40022

DESYNCHRONIZED SLEEP

U RAPID EYE MOVEMENT STATE

DETACHMENT

Detached lunar compression wave, noting positive evidence from solar wind flux and direction measurements near lunar wake
05 p0824 A69-16251

Electron detachment cross sections for negative atomic and molecular O ions with incident energies between 3 and 100 eV
09 p1542 A69-21625

Shock wave detachment distance in front of spheres and cylinders in hypersonic flow, using magnetic shock tubes and Mach 5 and 18 wind tunnels
22 p3931 A69-40710

DETECTION

U AIRCRAFT DETECTION
U CORRELATION DETECTION
U ERROR DETECTION CODES
U RADAR DETECTION
U SIGNAL DETECTION
U TARGET RECOGNITION

DETECTORS

Book on laser communication system design covering modulation and detection methods
08 p1277 A69-20884

Detection of metastable He, H, Ne, Ar, Kr, Xe and molecular nitrogen with continuous channel electron multipliers
22 p3917 A69-41235

DETERGENTS

Spacecraft sterilization by hydrogen peroxide solutions mixed with selected anion active detergents
05 p0713 A69-15943

DETERMINANTS

Specialized mathematical machine for expanding matrix determinants and solving combinatorial problems, discussing symbolic circuit
09 p1460 A69-21782

DETERMINATION

U MEASUREMENT

DETONABLE GAS MIXTURES

One dimensional unsteady flows of combustible gas mixture with finite chemical reaction rates, considering piston motion, igniting shock wave propagation and point explosion
06 p0909 A69-17325

Nonequilibrium supersonic flow calculation of detonating mixture past blunt bodies applied to flow of hydrogen-oxygen mixture past sphere
06 p0859 A69-17343

Inflammable gas mixtures and deflagrations noting self ignition temperature, flame propagation, flame front structure and flame stability
06 p1031 A69-17417

Detonations in gases and solids, discussing limits, speed, initiation by deflagration, chemical factors, dimensional effects, etc
06 p1032 A69-17424

Gas dynamics, thermodynamics, chemical properties, energy and products of hydrocarbon-air detonations in tubes under standard atmospheric conditions
[WSCI PAPER 68-26]
07 p1241 A69-18369

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas
07 p1119 A69-18705

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity
08 p1420 A69-19882

Flame front instability in air-propane mixtures established by motion picture study
08 p1421 A69-20344

Gas pressure variations behind autonomous stable detonation fronts in propane-O mixtures, noting effect of diameter tubes and initial pressures
08 p1421 A69-20757

Laser induced breakdown spark ignition of detonable and nondetonable chemically reactive gas mixtures, noting blast waves
[AIAA PAPER 68-146]
09 p1622 A69-21951

Transverse wave spacing in self sustaining detonations in H-O mixtures, noting evidence against acoustic theory and for characteristic chemical dimension
09 p1622 A69-21953

Steady flames transition into spherical detonation in various gas mixtures using high speed photography in sealed volumes
10 p1810 A69-23897

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model
19 p3449 A69-36353

Coordinate perturbation and second order solution for early collapse phases of cylindrical or spherical detonation wave in equimolar acetylene-oxygen mixture
19 p3449 A69-36354

Detonation in unbounded gas mixture starting from spherical flame, discussing stability of gasdynamic discontinuities and cellular structure
19 p3450 A69-36358

Stored energy release in exploding wire circuit during divergent detonation wave ignition in propane-oxygen mixture in circular sector
19 p3451 A69-36365

Transverse and longitudinal velocity components of detonation waves in stoichiometric hydrogen-oxygen propagating in fundamental mode in square section tube
19 p3451 A69-36367

Combustible mixtures flow past bodies, discussing equation for shock polar for exothermal discontinuities at subsonic and supersonic velocities
19 p3241 A69-36780

Fire hazard in closed chamber associated with intestinal hydrogen and methane formed by space diets, comparing Gemini-type and bland diets
20 p3482 A69-37622

Schlieren framing photography used for studying shock wave hydrodynamic structure and ignition dynamics during expansion into detonable gas region
21 p3849 A69-38803

Perfluorocyclobutane-oxygen mixture combustion, measuring burning velocities and adiabatic equilibrium flame temperatures
21 p3852 A69-39594

Hydrogen-air combustion in supersonic flow past sphere determined with allowance for chemical reactions nonequilibrium rates at high pressure and temperature
24 p4408 A69-43488

DETONATION

Detonation generation in granular explosive subject to different shock wave intensities due to variable impact velocity
02 p0349 A69-11527

Initiation of detonation by incident shock waves in hydrogen-oxygen-argon mixtures
02 p0304 A69-12313

Mass velocity of detonation products of hydrogen-oxygen mixtures measured by simultaneously recording internal resistance and induced voltage in ionized medium
02 p0354 A69-12628

Detonation capacity of mixture of ammonium perchlorate base and polymethyl methacrylate and polystyrene, noting critical particle size dependence on composition
02 p0305 A69-12674

Prevention of and protection against accidental explosion of munitions, fuels and other hazardous mixtures - Conference, New York, October 1966
04 p0644 A69-14467

Deficiencies in two hazard classification system for detonating and fire producing materials from analysis of chemical industry accident fatality statistics
04 p0645 A69-14471

Wedge shaped charge technique for evaluation of detonation hazards of liquid explosives
04 p0646 A69-14479

Detonation characteristics of gaseous explosives using equations of state for real gases, noting compressibility effect in mixture of hydrocarbons, O and N
05 p0848 A69-16337

Detonations in gases and solids, discussing limits, speed, initiation by deflagration, chemical factors, dimensional effects, etc
06 p1032 A69-17424

One dimensional lattice model for heterogeneous explosive detonation, discussing hot spots, grain burning ignition time, ignition site types and RDX detonation
[WSCI PAPER 68-30]
07 p1240 A69-18357

Steady flames transition into spherical detonation in various gas mixtures using high speed photography in sealed volumes
10 p1810 A69-23897

Critical diameter of ammonium perchlorate stable detonation as function of initial temperature, water content, density and particle size
11 p1940 A69-24553

Unsteady gas dynamics of explosions and detonation theory, noting applications to rocket propulsion systems performance
11 p1876 A69-25595

Initiation distance and time of detonation with weak ignition sources related to temperature, tube diameter, mixture composition and pressure
19 p3451 A69-36364

Cylindrical concentric detonation front and stability mechanism space-time measurement
20 p3632 A69-37215

Shock front reaction and detonation initiation in low density ammonium perchlorate
21 p3784 A69-39590

DETONATION WAVES

Detonation wave structure in solid cylindrical shell explosive, noting attainment of steady state structure
02 p0349 A69-11526

Detonation wave initiation in gaseous media, noting transition process for flames accelerating to detonation and explosions behind reflected shock wave
02 p0350 A69-11530

Propagation of detonation wave in tube containing single stream of diethylcyclohexane droplets dispersed in gaseous oxygen
03 p0415 A69-13139

Boundary conditions in oblique reaction waves in supersonic flow, adding or subtracting heat by chemical reaction
05 p0697 A69-15828

Asymptotic theory concerning nonsimilar structure of blast wave with expanding interface applied to hypersonic perfect gas flow
06 p0860 A69-17636

Spherical deflagration and detonation waves in diluted stoichiometric hydrogen-oxygen mixtures in hemispherical combustion chamber
06 p1034 A69-17927

Electromagnetic field induced energy and momentum changes effects on pressure, temperature and particle velocity of flows behind propagating gaseous detonation waves
[AIAA PAPER 69-44] 06 p0970 A69-18084

Electric signals by shock and detonation waves, describing detection technique
[WSCIPAPER 68-44] 07 p1240 A69-18360

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas
07 p1119 A69-18705

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity
08 p1420 A69-19882

Gas pressure variations behind autonomous stable detonation fronts in propane-O mixtures, noting effect of diameter tubes and initial pressures
08 p1421 A69-20757

Unsteady flow parameters for reaction products behind spherical detonation wave in gas mixtures based on Taylor solution
08 p1421 A69-20765

High velocity gas stream induced shattering of liquid drops, disintegration rate and breakup time
[AIAA PAPER 68-83] 09 p1482 A69-21947

Infinite diameter detonation velocity vs loading density curve for ammonium perchlorate, finding quadratic mean error
11 p1940 A69-24486

Solution of confluence in three dimensional shock and detonation polars for spinning detonation
11 p2002 A69-25353

Gasdynamic stability of detonation shock wave in case of arbitrary heat evolution kinetics using detonation model
12 p2062 A69-26672

Transverse wave spacings for self sustaining detonations in oxygen and diluents mixtures with hydrogen, methane, acetylene or ethylene fuel, noting dilution
13 p2378 A69-28217

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Compression waves observed ahead of luminous discharge plasma below Mach 12-15 in electric shock tube, describing shock structure by blast wave theory
16 p2768 A69-31664

Small disturbances and effect on processes of fast combustion of inflammable compressible mixture
16 p2837 A69-32137

Two phase detonations of fuel in liquid layer on shock tube wall with gaseous oxidizer, presenting one dimensional approximation for film detonation propagation
16 p2879 A69-32151

Wave motion nonsteadiness influence on detonation front thickness using quasi-steady kinetic model of induction process, discussing agreement with experimental observations
17 p2952 A69-33403

Gas and small particle diffusion in turbulent boundary layer of blast wave propagating over land or water, assuming logarithmic vertical velocity profile
[AIAA PAPER 69-672] 17 p2953 A69-33439

Shock tube with cylindrical explosive to implode glass wall and produce high velocity glass particle jet, studying jet velocity and behavior and test gas pressure effects
18 p3116 A69-34460

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model
19 p3449 A69-36353

Coordinate perturbation and second order solution for early collapse phases of cylindrical or spherical detonation wave in equimolar acetylene- oxygen mixture
19 p3449 A69-36354

Detonation in unbounded gas mixture starting from spherical flame, discussing stability of gasdynamic discontinuities and cellular structure
19 p3450 A69-36358

Continuous explosion laser study of stationary detonation waves to determine conditions leading to partial population inversion and critical population density
19 p3336 A69-36360

Stored energy release in exploding wire circuit during divergent detonation wave ignition in propane-oxygen mixture in circular sector
19 p3451 A69-36365

Transverse and longitudinal velocity components of detonation waves in stoichiometric hydrogen-oxygen propagating in fundamental mode in square section tube
19 p3451 A69-36367

Construction of single headed spin detonation polar as confluence of shock and deflagration waves by two dimensional hodograph
19 p3451 A69-36368

Shock and detonation waves refraction due to small disturbances in medium, noting causes of wave cellular structure
19 p3451 A69-36369

Detonation wave in gaseous media, current theories on wave initiation, structure and propagation
19 p3452 A69-36370

Finite chemical reaction rate detonation wave interaction with rarefaction wave, noting mixture activation energy and heating power influence
19 p3298 A69-36384

Electromagnetic effects on pressure, temperature and particle velocity in flow behind propagating gaseous detonation waves based on one dimensional flow field model
20 p3514 A69-37190

Electromagnetic piston produced shock wave interaction with detonation wave, producing overdriven detonations
20 p3631 A69-37209

Shock wave effect on ionization of detonation waves in propane-O mixtures producing stable high velocity plasma, measured by double probe method
21 p3853 A69-39745

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
22 p3929 A69-40112

Detonation velocity variation in nitromethane with initial pressure, discussing relationships
22 p4051 A69-40713

Reaction zone following overdriven detonation wave propagating into mixtures of fluorine oxide and hydrogen molecules showing HF laser emission
22 p4052 A69-41188

Detonation driven shocks of high Mach number obtained in improved membrane shock tube by heating and compressing driver gas
23 p4198 A69-41545

Detonation wave instability and damping in gas containing liquid or solid inflammable aerosol, considering atomized propellants
23 p4240 A69-42339

DETONATORS

Exploding wire detonators noting dependence of threshold burst current on bridgwire length and diameter, explosive surface, density, etc
01 p0119 A69-10672

Exploding wire detonators without primary explosive, discussing high precision fabrication, safety aspects and firing circuit
01 p0120 A69-10676

Electrical devices for detonation initiation in pyrotechnic equipment for space applications, tabulating characteristics
10 p1749 A69-23006

Detonating fuses for separation of missile and rocket stages, noting separation ease, aftereffects, priming capability and fabrication
10 p1752 A69-23023

Detonation system for exploding missile warheads, discussing trigger detonation and safety release elements
17 p3050 A69-33698

DEUTERIUM

IR and Raman spectra of solid and matrix isolated methylamine and deuterium derivatives, locating a mine twisting vibration in solid phase IR spectra
01 p0023 A69-10287

Deuterium gas ionization over high pressure range under action of short pulse Q switched neodymium glass laser, noting breakdown wave existence
02 p0255 A69-11545

Intensity of visible and UV light from beam of positive deuterium molecular ions excited by passage through thin C foil
03 p0471 A69-13166

Molecular jets obtained by charge exchange of triatomic ion beams consisting of hydrogen, deuterium and nitrogen, noting formation, energy level, etc
05 p0797 A69-16339

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions
08 p1358 A69-21010

Deuterium escape in Venus upper atmosphere to explain anomalous Lyman-alpha glow observed by Mariner 5
09 p1594 A69-21696

Pd-D resistivity variation with D concentration at room and liquid He temperatures, discussing structural resistivity
10 p1745 A69-23357

D/H ratio in Venus exosphere, discussing isotopic fractionation mechanisms and Lyman alpha data from Mariner 5
11 p1962 A69-25145

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method
20 p3578 A69-36934

Primordial He 3 and deuterium production from magnetic effects during nucleosynthesis epoch of big bang cosmologies
22 p4035 A69-41210

DEUTERIUM COMPOUNDS

NT HEAVY WATER

HI and DI reaction into HD and 2I, noting need for rotational or vibrational excitation in addition to translational energy of collision
01 p0123 A69-10686

Deuterated diazomethane prepared by base catalyzed reaction of hydrazine with chloroform
06 p0885 A69-17885

IR and Raman spectra of gas and liquid phase methylhydrazine and deuterated methylhydrazines, discussing vibrational motions, H bonding and thermodynamic functions
10 p1752 A69-23528

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium
12 p2104 A69-25986

DEUTERIUM OXIDES

U HEAVY WATER

DEUTERIUM PLASMA

Target production device for deuterium plasma clouds in vacuum with Q switched neodymium laser
01 p0090 A69-10222

Deuterium plasma evolution and creation modes obtained by short pulse laser discharge in gases, discussing detonation and phase wave ionization mechanisms
02 p0288 A69-12040

Deuterium plasma heating by means of high power focused pulsed laser beam, noting initial energy of laser and pulse duration
05 p0769 A69-15583

Magnetic field confinement of plasma produced by focusing Q switched laser output on solid deuterium pellet
05 p0798 A69-15585

Ultrahigh speed holographic interferometry for studying plasmas produced by focused laser beam, noting electron density evolution in deuterium plasma
05 p0760 A69-15587

X rays detection from laser produced deuterium plasma through calibrated absorbers, presenting electron temperatures
06 p0964 A69-17479

Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface
[IEEE PAPER O-11] 07 p1153 A69-19072

Deuterium plasma jets passage through pulsed magnetic field by means of thermal and diamagnetic probes, noting magnetic field strength effect
13 p2311 A69-28107

Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature
13 p2273 A69-28366

DEUTERON IRRADIATION

Deuteron microbeam for simulating biological effects of ionization by heavy cosmic ray particles
03 p0373 A69-13493

Heavy cosmic ray particles effect in manned space flight, noting results of deuteron microbeam experiment

03 p0373 A69-13494

Proton and deuteron energy used to study solid state chemical reactions effects on meteorites composition and properties, obtaining hydroxyl ions and hydrocarbons

19 p3414 A69-36114

DEUTERONS

Absolute cross sections for coincidence detection of deuteron breakup by 42 Mev alpha particles, showing He 5 and Li 5 final state interaction peaks

03 p0472 A69-13469

Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation

08 p1378 A69-20066

Low velocity heavy mass particle detection in sea level cosmic radiation, assuming deuterons

16 p2846 A69-31600

Elastic scattering cross sections of negative pions by deuterons compared with Glauber model calculations

17 p3007 A69-32885

DEVELOPERS [PHOTOGRAPHY]

U PHOTOGRAPHIC DEVELOPERS

DEVITRIFICATION

U CRYSTALLIZATION

DEW

Dew /or frost/ point determination method for low temperature humidity measurement

09 p1502 A69-22691

DEWAR SYSTEMS

U CRYOGENIC EQUIPMENT

DH 121 AIRCRAFT

Trident 2E aspect ratio, wing area, high lift devices, fuel capacity, range improvement, etc

13 p2202 A69-27971

Trident 2E and 3B structural design and fail-safe tests, noting difference in fuselage length

13 p2202 A69-27972

Trident 2E aircraft, discussing fuel system, electric power installation, hydraulic system, air conditioning, pressurization and flying controls

13 p2202 A69-27973

Spey 512 turbofan and RB.162 booster turbojet engines for Trident 2E and 3B power plant

13 p2325 A69-27975

Trident category 3 automatic landing, discussing triplex pitch and roll control, duplex rudder, autothrottle and azimuth paravision display

13 p2296 A69-27976

DIABATIC PROCESSES

U HEAT TRANSFER

DIADEME SATELLITE

Laser measurements for DIADEME satellites tracking to reconstruct actual trajectory in semidynamic geodesy

15 p2600 A69-31365

Doppler shift measurements at two coherent frequencies from Diademe satellites to determine ionospheric electron content, discussing accuracy and parameters defining satellite passage

16 p2785 A69-32615

Diademe satellites stabilization system to measure station-to-satellite distance by laser pulse, discussing reflector, magnet for attitude control, damping device, etc

17 p3046 A69-33224

French space geodesy since Space Age, detailing Diapason and Diademe satellites program, techniques and results

17 p2961 A69-33382

DIAGNOSIS

Clinical problems during interplanetary flights, stressing need for diagnostic algorithms and automated medical equipment

02 p0202 A69-12121

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

05 p0710 A69-16523

Beta adrenergic blockade in differential diagnosis of cardiovascular changes produced by stress induced catecholamine liberation and organic disease

17 p2909 A69-33184

High temperature effects on physiological functions of man noting cardiovascular system and heart performance, body heat exchange and blood and urine composition

18 p3096 A69-34742

Wireless telemetry system design for physiological signals in human diagnosis, discouraging casual use of wireless transmission

19 p3261 A69-36269

Ultrasound-echo-encephalography in diagnosis of posttraumatic intracranial hemorrhage of skull and brain trauma, noting neuroradiological techniques

21 p3652 A69-38790

Surface electromyography (EMG)/frequency analysis of normal and pathological muscle or nerve contraction as diagnostic tool for industrial physician

21 p3664 A69-38920

Arrhythmia diagnosis instruction aided by cardiac pacemaker digital simulation, discussing clinical electrocardiograms generation mechanisms

21 p3667 A69-39606

Brain atrophy clinical diagnosis aided by biochemical analyses, including age frequencies and symptoms to control incidence among aviation personnel

23 p4089 A69-41816

Frequency analysis of second heart sound splitting in patients with coronary artery disease assessed clinically and by phonocardiography

24 p4261 A69-42726

Heart murmurs frequency analysis on patients to improve detection of aortic insufficiency in presence of mitral stenosis

24 p4279 A69-43800

DIAGRAMS

NT CIRCUIT DIAGRAMS

NT CREEP DIAGRAMS

NT FEYNMAN DIAGRAMS

NT HERTZSPRUNG-RUSSELL DIAGRAM

NT NYQUIST DIAGRAM

NT PHASE DIAGRAMS

NT S-N DIAGRAMS

Serial BCD binary coder design, using Karnaugh diagrams to minimize synchronous and asynchronous counter stages

09 p1467 A69-22579

Skiagrams results of retinoscopic measurements of eye peripheral refraction of pilots, attempting correlation between skiagram type and central refraction

24 p4267 A69-43399

DIALYSIS

U ELECTRODIALYSIS

DIAMAGNETISM

Quantum theory of electrical birefringence of noninteracting diamagnetic molecules /Kerr effect/ subjected to static electric field and polarized plane wave

02 p0279 A69-11538

Orientation of diamagnetic ground state Pb 207 atoms with nonzero orbital angular momentum by means of optical pumping and determination of nuclear moment

07 p1156 A69-19399

Pfirsch-Schluter factor calculation for stationary toroidal plasma diffusion enhancement due to current along magnetic field over diffusion over that associated with diamagnetic current

11 p1925 A69-24312

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons

11 p1936 A69-24640

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system

14 p2489 A69-28910

Electron temperature and concentration in plasma determined by measuring diamagnetic signal and IR radiation intensity, emphasizing usefulness in plasmoid head portion

14 p2496 A69-29785

Plasma cluster interaction with axially symmetric magnetic field, deriving plasma diamagnetic current, inductance and resistance from measured coil flux dependence on distance

16 p2823 A69-32365

Equilibrium state of diamagnetic plasma configuration in inhomogeneous magnetic fields with complex potential near neutral point, noting solar flares and magnetic traps

19 p3380 A69-36467

DIAMANT LAUNCH VEHICLE

Solid, liquid and advanced propulsion techniques in France, discussing Diamant program and Europa booster

02 p0334 A69-11919

Electrohydraulic guidance of second stage of Diamant rocket used for orbiting satellites employing thrust vector orientation

04 p0551 A69-15183

Automatic quantitative checkout equipment for telemetry circuit of Diamant satellite booster before launching

16 p2750 A69-31727

DIAMETERS

Neptune mean diameter determination by photometric observations of stellar occultation by planet

01 p0150 A69-10386

Venus diameter determination from optical measurements, noting cloud layer height and height of suspended particles in upper atmosphere

05 p0818 A69-15621

Elastic limit of lunar outer layer determined from analysis of lunar crater dimensions variations as functions of diameter

07 p1212 A69-18600

Laser beam diffraction method for measurement of apparent filament diameters, emphasizing high modulus carbon filaments

08 p1316 A69-20499

Half intensity angular diameter upper limit of Seyfert galaxy NGC 4151 nucleus, considering nonthermal continuum

09 p1602 A69-22227

Stellar diameter interferometric measurements, discussing double slit arrangement and illumination in focal plane

13 p2334 A69-27305

Pitot tubes diameter effect on pressure gradients during measurement through shock wave

16 p2771 A69-31927

Stellar diameters in galactic cluster stars determined using original and modified spectrophotometric method compared with spectral types BOV-FOV

16 p2858 A69-32210

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics

17 p3009 A69-32825

Control knob optimum diameter for minimum operation time, noting frictional resistance

21 p3664 A69-38969

Tube diameter effects on shock front propagation, observing front formation process with schlieren method

24 p4297 A69-43630

DIAMINES

Synthesis of N-/trimethylsilylalkyl/ diamines and N-/trimethylsilylalkyl-/N-/2-mercaptoethyl/ diamines, determining structure by IR spectra

15 p2561 A69-30414

DIAMOND WINGS

U LOW ASPECT RATIO WINGS

U SWEPT WINGS

DIAMONDS

NT METEORITIC DIAMONDS

Diamond dust as major component of interstellar dust to explain observed properties

05 p0828 A69-16662

X ray emission from powdered graphite, diamond and titanium carbides

06 p0946 A69-17545

Electron momentum density in diamond, graphite and carbon black from Compton profile measurement by X ray scattering vector

06 p0982 A69-18233

Optical constants of bulk diamonds compared with interstellar extinction, calculating extinction curves for diamond particles from Mie theory

12 p2157 A69-26230

Photocurrents and recombination luminescence in n-type diamonds subjected to UV, Ti 204 and X ray irradiation indicating local electron centers formation

19 p3383 A69-36167

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient

22 p3958 A69-41170

DIAPHRAGMS

Incremental and corresponding total strain theories of plasticity used to analyze hydrostatic bulging of circular diaphragm

08 p1418 A69-20826

DIAPHRAGMS [MECHANICS]

Shadowgraph cinematography technique for testing attenuating influence of symmetrical diaphragm system on shock wave

12 p2088 A69-26184

Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions

19 p3295 A69-36471

Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
20 p3538 A69-37227

Pressure transducers using heterode strain sensors evaporated directly onto pressure diaphragm
22 p3950 A69-41222

DIASTOLE

Abnormally slow ultrasound diastolic slope detected by mitral valve motion study in patients with clinically pure mitral insufficiency
24 p4261 A69-42727

DIATOMIC GASES

Hypersonic flow of nonequilibrium diatomic gas on and near wedge, studying shock curvature variations
01 p0005 A69-10161

Vibrational relaxation of diatomic gases behind shock waves, with variable heat bath temperature extended to constant enthalpy and constant total enthalpy conditions
01 p0061 A69-11204

Diatomic dissociating gas free atoms virial coefficient used to study thermodynamic properties and transport coefficients of gases
02 p0283 A69-11574

Numerical solution for excitation of oscillations in diatomic molecules during atom-molecule collisions at high temperatures, determining intermolecular interaction forces
02 p0284 A69-12485

Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line
02 p0284 A69-12551

Parameter changes of diatomic gas behind direct shock wave with simultaneous oscillatory and dissociative relaxation
03 p0418 A69-13835

Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules
06 p0960 A69-17110

Vibrational excitation in diatomic gas mixtures by translation to vibration energy conversion in simple collisions and by vibrational energy exchange between components
06 p0962 A69-17821

Sonic transmission of diatomic nitrogen during nozzle flow, presenting density dependence of natural oscillation energies and temperature
10 p1632 A69-22912

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom/molecule collisions, deriving kinetic equations for energy level changes
13 p2302 A69-27797

Adsorption of N, H, O and CO on thick vapor deposited Be films at room temperature
13 p2322 A69-28017

Diatomic hydrogen abundance evolution in uniform medium, discussing photodissociation effects and galactic evolution
15 p2680 A69-30205

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region
15 p2548 A69-31065

Half maximum temperature of diatomic gases determined by extending relation between specific heat and molecular dissociation to diatomic molecules [DVL-899]
15 p2656 A69-31102

Absorption spectrum of diatomic oxygen excited by AC silent discharge photographed with vacuum spectrograph, associating lines with Schumann-Runge band
20 p3581 A69-38276

Diatomic-monatomic oxygen collision cross section determined from rotational line width in diatomic oxygen Schumann-Runge emission spectra
22 p3983 A69-40099

Dissociational nonequilibrium transonic flow near nozzle throat analyzed for diatomic gas with equilibrium vibrational energy, using perturbation method
22 p3861 A69-41177

Nonequilibrium boundary layer of dissociated diatomic gas over catalytic flat plate in hot hypersonic uniform flow
22 p3934 A69-41181

DIATOMIC MOLECULES

Photosphere models comparison based on theoretical rotational temperatures of various diatomic molecular free radicals, using faint lines method
03 p0512 A69-13694

Potential energy functions based on electronegativities instead of spectroscopic parameters for Li and K molecules
03 p0472 A69-13805

Photodissociation and photoionization of diatomic molecules at high temperatures with calculation of absorption cross sections
03 p0473 A69-14147

Nonequilibrium dissociation effects on constant pressure laminar mixing for diatomic molecules and atoms, analyzing concentration and temperature of free shear layer
04 p0588 A69-14733

Separation of center of mass and rotational coordinates from N electron diatomic Schroedinger equation
04 p0554 A69-14861

Polarization of diatomic molecular line radiation excited by electron impact
06 p0961 A69-17140

SH above photosphere in solar atmosphere, discussing dissociation equilibrium of diatomic molecules and possible abundances
06 p1002 A69-17317

Rotational inelastic transitions in atom-diatom collisions, discussing restricted distorted-wave approximation, transition probabilities, impact parameters, inelastic and glory quenching, etc
07 p1185 A69-19302

Electron impact cross sections for diatomic molecule ionization and excitation from modified Gryzinski theory, discussing results from molecular models
09 p1542 A69-22249

Emission-absorption intensity ratio temperature measurements of diatomic molecules under thermal nonequilibrium conditions, considering rotational population distribution during vibration temperature measurement
09 p1623 A69-22255

Temperature effect on pulsed laser action on electron transitions in diatomic molecules for rotational relaxation, discussing excitation mechanisms
09 p1520 A69-22654

Rotational excitation and scattering cross sections for rigid diatomic molecules reduced to yield distorted wave approximation, resulting in inelastic transition probabilities
10 p1726 A69-23524

Direct nonresonance excitation of rotational and vibrational states of diatomic molecular ions by electrons in Born-Coulomb approximation
10 p1726 A69-23627

Interstellar molecular hydrogen and CH photodissociation, discussing molecular formation rates in interstellar medium
10 p1781 A69-23672

Electrons resonance scattering by diatomic molecules from elastic and inelastic channel measurements in transmission
11 p1921 A69-24418

Translational-vibrational energy transfer value between atom and diatomic molecule determined using steric factor with repulsive interaction potential
12 p2134 A69-25988

Vibrational energy exchange between diatomic molecules by IR emission of CO fundamental behind shock waves
13 p2301 A69-27361

Dissociation equilibrium of diatomic molecules in solar atmosphere, comparing concentration above photosphere to MgH
14 p2528 A69-29963

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part II
15 p2656 A69-31157

Diatom heavy particle collisions with emphasis on epithermal energy range, discussing elastic scattering and inelastic processes
16 p2815 A69-32259

Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile
18 p3177 A69-35239

Forbidden transitions in diatomic molecules with nonzero spin and zero orbital angular momentum, stressing application in outer planets and M stars hydrogen spectra
19 p3421 A69-36213

Photodissociation of diatomic hydrogen by solar radiation for Venus atmosphere investigation, considering H atoms production rate by Stecher-Williams process
20 p3609 A69-38102

Coupled equations for determining cross sections for rotational transitions in CN induced by low energy electron impact
21 p3773 A69-38476

Diatom molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation
21 p3775 A69-39665

High temperature pyrolysis of simple organic molecules in shock tube, considering diatomic C formation and decay rate
23 p4113 A69-41693

Positively charged diatomic hydrogen molecules in interstellar extinction and photodissociation cross section in terms of formation mechanisms
24 p4375 A69-42610

DIBORANE

Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation
14 p2410 A69-29282

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane [AIAA PAPER 69-505]
16 p2845 A69-32762

DICARBOXYLIC ACIDS

Normal, isoprenoid, dicarboxylic, keto and various aromatic acids isolated from controlled stepwise degradation of Green River kerogen by successive chromic acid oxidations
15 p2606 A69-31533

DICHLORODIPHENYLTRICHLOROETHANE

Fiddler crab absorption of DDT residues from organic detritus in estuaries, discussing DDT residue entrance into diverse food chains
14 p2406 A69-28872

DICHOTOMIES

Federal Government systems politics and budgeting, noting dichotomies, time dependence, taxonomy, etc
10 p1811 A69-23352

Dichotomy of Venus in eastern and western elongations, determining time of occurrence by graphical method
18 p3203 A69-35336

DICHOISM

Optical pumping in pure Si at 77 K, noting dichroism conditions for dipolar electric transitions in cubic crystal
19 p3389 A69-36548

DICHROMATES
U CHROMATES

DICKE RADIOMETERS

Performance characteristics of 300 GHz Dicke type superheterodyne radiometer receiver for measuring atmospheric attenuation of electromagnetic waves
02 p0209 A69-12336

Galactic H 2 regions radio observation using Cassegrain antenna and Dicke radiometer
06 p1008 A69-17696

Brans-Dicke scalar-tensor theory, showing radiative Riemann tensor existence in absence of usual spin-2 gravitational waves
07 p1216 A69-18894

DICTIONARIES

Geophysics international dictionary, Volume 1 /A-J/ covering seismology, geomagnetism, aeronomy, oceanography, geodesy, gravity, marine geophysics, meteorology, earth origin and evolution
19 p3303 A69-36511

Geophysics international dictionary, Volume 2 /K-Z/ covering seismology, geomagnetism, aeronomy, oceanography, geodesy, gravity, marine geophysics, meteorology, earth origin and evolution
19 p3304 A69-36512

DIELECTRIC MATERIALS
U DIELECTRICS

DIELECTRIC PERMEABILITY

Exciton spectrum for limiting case of large radius leading to Wannier-Mott equation with static dielectric permeability
03 p0486 A69-13416

Relative dielectric constant and permeability of inhomogeneously filled rectangular waveguide filling medium expanded into trigonometric series to calculate cut-off frequencies and field patterns
15 p2577 A69-30627

Magnetoplasma with Maxwellian velocity distribution, investigating quantitatively longitudinal dielectric function
22 p3988 A69-40066

DIELECTRIC POLARIZATION

Semiconductor nonlinear electron polarizability, using model to obtain correct order of magnitudes

03 p0483 A69-13035

Transparent dielectrics destruction by laser radiation noting stress development in medium

08 p1324 A69-19947

Rectangular waveguide with inhomogeneity represented by half space dielectric filling with boundary causing polarization, obtaining reflection elimination or minimization reflection

23 p4125 A69-42047

DIELECTRIC PROPERTIES

Phase constant of rectangular waveguide containing longitudinal dielectric slab of arbitrary cross section calculated using orthonormal waveguide functions with separated curl and potential fields

01 p0042 A69-10437

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies

01 p0139 A69-10889

Reflection elimination for single dielectric film on solid laser material substrate, calculating reflectance as function of frequency

02 p0256 A69-11926

Permittivity measurements by measuring impedance on thin cylinders in rectangular waveguide or in cavity formed by coaxial transmission line

02 p0222 A69-12756

Electromagnetic wave propagation in nonlinear media with permittivity dependent on modulus of magnetic field

03 p0396 A69-13707

Stray fields and domain dynamics in Gunn effect semiconductors covered with dielectric sheets

03 p0491 A69-13988

Radio waves diffraction around earth with atmospheric dielectric constant having linearly quadratic height dependence

03 p0399 A69-14130

Second dielectric virial coefficient of rare gases derived by cluster method

04 p0632 A69-14865

Permittivity and loss tangent of unsaturated styrene polyester copolymers at various temperatures and frequencies

[ONERA-TP-662]

04 p0621 A69-15114

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light

05 p0806 A69-15694

Nonlinear optics, discussing frequency mixing, induced changes in dielectric constant and parametric amplification in microwave region of spectrum

05 p0772 A69-16229

Surface waveguide composed of inhomogeneous dielectric thin film used as low loss transmission line

05 p0731 A69-16294

Inhomogeneous dielectric filling to simulate curvature in model earth-ionosphere waveguide

05 p0732 A69-16346

Ultrasound propagation amplification coefficient in high permittivity semiconductors with electric field based electron-phonon interaction

05 p0809 A69-16372

Cut-off frequency relation to geometry for dielectric ridge waveguide

05 p0777 A69-16579

Electron plasma interaction with transverse EM wave propagating along magnetic field, calculating permittivity, density, field strength and applied frequency

05 p0805 A69-16699

Approximate method for wave equation with dielectric variation in propagation direction

06 p1030 A69-17116

Dielectric constant of liquid metals emphasizing Green function techniques for Wick theorem, Feynman diagrams, Dyson equation and diagrams in impulse space

07 p1196 A69-18298

Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio

[IEEE PAPER C-2]

07 p1150 A69-19049

Lunar depth profiles of conductivity, dielectric constant and magnetic permeability from radar, radiothermic and magnetic measurements, discussing lunar models

07 p1216 A69-19221

Radome materials with superior dielectric and temperature characteristics for constructing high tolerance microwave multiband radome

07 p1109 A69-19514

Radome performance dependence on dielectric permittivity determined by digital program and simple design criterion

07 p1110 A69-19519

Statistical radomes design, analyzing dielectric constant and wall thickness tolerances effects on amplitude and phase of transmitted wave

07 p1111 A69-19531

Radome materials design and performance for guided weapons systems, describing research conducted in UK

07 p1112 A69-19540

Dielectric constant and loss angles measurement in Ku band used for onboard radars

07 p1112 A69-19544

Resonance conditions in dielectric sheathed or plug loaded phase arrays of waveguides

08 p1281 A69-20034

Temperature effect on phase stability and electrical length of braided coaxial cables, considering dielectric constant and mechanical length

08 p1283 A69-20225

Electromagnetic fields and magnetic and dielectric constants in fiberglass reinforced polymers determined by treating polymers as ideal dielectrics

08 p1336 A69-20336

Thin films of niobium oxide vapor-deposited on silicon and quartz substrates, discussing optical and dielectric measurements, dispersion and absorption coefficient

[ECS PAPER 17]

08 p1372 A69-20365

Radiation spectrum in nonrelativistic fully ionized gas in thermal equilibrium, obtaining dispersion relation for transverse electromagnetic waves and dielectric constant

08 p1357 A69-20748

Kinetic theory of electromagnetic wave propagation in infinite laminated plasma with different dielectrics, determining attenuation

09 p1550 A69-22023

Dielectric relaxation for analysis of defect structure, microstructure, surface behavior, structural changes kinetics and environmental effects in insulators and semiconductors

09 p1559 A69-22307

Micromin alumina substrates design data, determining dielectric constant, impedance vs line width and wavelength vs frequency

09 p1460 A69-22792

Polarized electromagnetic waves phase shift during total reflection from stratified dielectric region found dependent on transition zone width in addition to permittivity

10 p1657 A69-23862

Conductivity and permittivity for ion and electron resonance region of ionospheric plasma model calculated in quasi-hydrodynamic approximation

10 p1686 A69-23908

Attenuation losses on curved dielectric waveguide in X band

11 p1856 A69-25633

Surface dielectric constant and microwave opacity of Venus atmosphere as function of wavelength determined by radar observations

12 p2153 A69-25805

Dielectric properties of high loss nonmagnetic microwave materials used for waveguide absorbers and anechoic chamber linings

12 p2079 A69-26047

Dielectric loss tangents measurements combining coherent optical resonator with microwave techniques, noting application at mm wavelengths

12 p2080 A69-26057

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production

12 p2145 A69-26723

Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium

12 p2110 A69-26908

Microwave propagation in coupled pairs of microstrip transmission lines for integrated circuit design, discussing dielectric Green function

13 p2229 A69-27672

Interacting carriers acoustoelectric waves in semiconductors with high dielectric constant, analyzing dispersion equation

13 p2317 A69-27878

Dielectric constant, loss and breakdown of electrical insulation materials, discussing atomic and molecular models and effects of polarizations, environment and manufacturing procedures

13 p2230 A69-27983

Dielectric properties measurement of plastics for electrical insulation, stressing techniques for complex dielectric constants in various frequency ranges

13 p2285 A69-27984

Polymeric insulation materials, discussing intrinsic properties dependence on temperature and atmosphere, stressing effect on aging

13 p2285 A69-27985

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials

13 p2285 A69-27986

Resistivity, capacitance and dielectric loss measurements for diode reactive sputtering grown AlN films and film sandwich structures of Ta, Au and Al films

13 p2322 A69-28013

Transmission type E saki diode amplifier with stabilizing dielectric loaded rectangular waveguide

13 p2233 A69-28067

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

13 p2315 A69-28451

Dielectric constants of nonconducting composite suspensions of spheres and parallel cylinders in terms of filler particles, matrix and volume fraction

13 p2287 A69-28677

Dielectric constant of liquid hydrogen and hydrogen-helium mixtures measured with resonance method

14 p2487 A69-29668

Relative dielectric constant and permeability of inhomogeneously filled rectangular waveguide filling medium expanded into trigonometric series to calculate cut-off frequencies and field patterns

15 p2577 A69-30627

Lunar radio emission linear polarization radial dependence at 0.8-cm wavelength using radio telescope, determining dielectric constant of emitting layer

15 p2697 A69-31251

Equivalent dielectric tensor for warm drifting electron plasma using model

16 p2820 A69-31701

Normal modes of electrons-electromagnetic field coupled system for many valley semiconductors, calculating dielectric constant for electron gas for ellipsoidal energy surfaces

16 p2826 A69-31821

Photodielectric tape camera with optical images stored on tape in form of charge pattern

16 p2792 A69-32558

Dielectric breakdown thresholds and cavitation in organic liquids observed during Q switched and pulsed ruby radiation

17 p2979 A69-32826

Faraday effect and permittivity of hydrogen plasma measured simultaneously, determining electron density and collision frequency

17 p2919 A69-33394

Asymptotic solutions for vector fields and propagation constants of axial modes in circular cylindrical waveguides, noting changes in dielectric constant

17 p2921 A69-33673

Superconducting cavities for resolving optically induced changes in dielectric constant of CdS at 4.2 K

17 p3016 A69-33782

Thin metal antenna average current and effective impedance in randomly inhomogeneous medium, discussing cases of strong and weak permittivity fluctuations

17 p2927 A69-33858

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies

18 p3182 A69-34720

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant using perturbation theory and integrating energy conservation law

18 p3173 A69-35127

Ablation heat shields, emphasizing dielectric low cost fabrication and application to entry vehicles

19 p3318 A69-35538

Dielectric response of semiinfinite metal surface to external point charge in linearized Fermi-Thomas approximation, discussing potential in metal and vacuum

20 p3583 A69-37498

Dielectric recombination in plasma, considering role in populating highly excited levels

20 p3580 A69-38016

Transient effects of nuclear radiation bursts on dielectric properties of refractory low loss ceramics at L, S and X bands

20 p3584 A69-38065

Free space to dielectric waveguide millimeter wavelength ratio as function of frequency, discussing equipment and procedure
21 p3674 A69-39130

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production
21 p3781 A69-39136

Dispersion relations for surface plasma oscillations in normal metals for single and multiple films taking into account retardation effects, noting dielectric function
22 p3992 A69-40419

Airborne electromagnetic systems measuring complex dielectric constant in earth crust for mineral and water resources exploration
[RAES PAPER 8]
22 p3946 A69-40481

Electrical conductivity of uppermost lunar surface layers, indicating dry powdered rocks with frequency independent dielectric loss tangent
22 p4023 A69-40570

Saturated liquid oxygen dielectric constant measurements to calculate polarizability
[NAS-NRC PAPER D-3]
22 p3998 A69-40620

Natural frequencies of N open dielectric waveguides system, obtaining fields expressions and dispersion equation for propagation constants
22 p3901 A69-40954

Dielectric constant and IR spectra of Ba titanate single crystals doped with hydroxyl, showing dependence on temperature and crystal thickness
22 p3995 A69-41157

Waveguide-resonance investigation of temperature dependence of dielectric constant and paraelectric dispersion of Ba and Sr titanate single crystals at millimeter wavelengths
22 p3995 A69-41158

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature
22 p3996 A69-41163

Dielectric polarization of barium titanate and barium strontium titanate in pulsed fields in paraelectric phase, analyzing coefficient B in free energy function and equilibrium state
22 p3996 A69-41165

Electric properties and domain structure changes of polycrystalline Ba titanate and other ferroelectrics characterized by high dielectric nonlinearity
22 p3996 A69-41166

Polycrystalline ferroelectrics dielectric dispersion region in decimeter-centimeter wavelength range using waveguide resonance method employing wideband strip line
22 p3997 A69-41167

Plasma dielectric constant and RF wave energy and power absorption in anomalous dispersion region, noting plasma permittivity inverse relation to absorption band frequency
23 p4195 A69-41385

Variational principle for analyzing dispersion properties of closed regular waveguide with traveling wave-modulated dielectric constant
23 p4123 A69-41943

Dielectric materials permittivity determined by measuring amplitude ratios of reflected and transmitted plane electromagnetic waves
23 p4123 A69-41950

Guiding center Vlasov equation derived dielectric tensor of collisionless plasma, obtaining dispersion relation of Alfvén waves in warm plasma
23 p4197 A69-42416

Teflon dielectric properties evaluated during fast laser beam heating, noting presence of C by microwave measurement
24 p4336 A69-43266

Measurement technique using dielectric waveguides for studying microwave fields influence on and energy imparted to body tissue
24 p4279 A69-43705

DIELECTRICS

NT RADOME MATERIALS

Dielectric surface coatings effect on transmission and loss properties of silicon-microstrip microwave transmission lines
01 p0041 A69-10201

First normal modes characteristics and lateral wave in weak dielectric layer applicable to microwave propagation
01 p0033 A69-10975

Thermodielectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403]
02 p0250 A69-12392

Silicon dioxide dielectric isolation for high speed low power circuits, noting saturation resistance and transient characteristics
02 p0221 A69-12470

Charge accumulation elimination on dielectric electrodynamic channel walls, comparing resistive wall channel to high internal impedance generator
02 p0291 A69-12506

Dielectric dispersion in inhomogeneous dielectrics and semiconductors, discussing three layered equivalent circuit
02 p0301 A69-12837

Mode theory of backscattered radar cross section of elongated dielectric bodies capable of sustaining traveling wave
03 p0384 A69-12907

Radar cross section enhancement effect of corner reflectors, multiple reflectors and dielectric lenses
03 p0384 A69-12909

Cathode sputtering and thermal evaporation in vacuum used for preparing thin dielectric coatings on mirrors of optical resonators containing nonlinear crystals
03 p0438 A69-13049

Diffusion in conduction process in dielectric fluids, discussing space charge limited current-voltage characteristics
03 p0415 A69-13140

Electric or magnetic dipole antenna radiated electromagnetic field for antenna orientation perpendicular to striations of periodically stratified dielectric medium
03 p0398 A69-13802

Strain effects on transverse electromagnetic modes of anisotropic dielectric waveguides at p-n junctions
03 p0406 A69-13830

Stationary, moving and pulsating electrohydrodynamic flow between parallel dielectric plates and Couette flow, noting reaction concentration near wall
03 p0419 A69-13919

Electrodynamic generator for direct conversion of moving dielectric medium potential or thermal energy to electric power
03 p0369 A69-14153

Circuit properties of microwave dielectric resonators, discussing mode identification, resonant frequencies, coupling control, loaded Q, frequency tuning and periodic arrays
04 p0575 A69-14750

Rear gain control of dielectric rod antenna in airborne Doppler system with choke at feed point
04 p0576 A69-14770

Dielectric waveguide propagation, impedance and attenuation characteristics and insertion loss and launching efficiency of mode transducer
04 p0577 A69-14971

Shock wave produced polarization effects in dielectrics, noting reflected shock waves and experimental results for polymethyl methacrylate and carbon tetrachloride
04 p0589 A69-14988

Surface wave stability for horizontal layer of incompressible dielectric fluid in electric field, noting viscosity effect
04 p0638 A69-15193

Dielectric sheath effect on far zone radiation characteristics of aperture bounded by perfectly conducting ground plane
04 p0579 A69-15450

Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency
05 p0736 A69-16783

Glow discharge technique for dielectric layer deposition between metal interconnection patterns in multilayer integrated circuits, noting adhesion and feedthrough problems
06 p0931 A69-17201

Deviation of dispersion equations for all modes existing in E-plane slabs of dielectrically loaded rectangular waveguides
06 p0888 A69-17486

Homogeneous fused silica and quartz reinforced resins as dielectric materials for reentry vehicle antenna windows
07 p1090 A69-18400

C band waveguide window for average power transmission featuring relatively small biconcave dielectric disk
07 p1096 A69-18435

Dielectrics refill and decal air isolation for silicon integrated circuit components
07 p1100 A69-18618

Specialization of field equations and boundary conditions of elastic dielectric for special case of rigid dielectric, using Lagrange multipliers
07 p1200 A69-19174

Argon plasma characteristics calculated from 8 mm interferometer data, interpreting transmission coefficients of dielectric film with permittivity gradient
07 p1194 A69-19324

Complex transmission and reflection coefficients of dielectric film with permittivity gradient computed by modified Runga-Kutta method, noting plasma diagnostics application
07 p1194 A69-19334

Glass/resin laminates behavior at high temperature
07 p1136 A69-19515

Phase shift and losses in wave propagation in dielectric environment, defining power transmission coefficient and insertion phase shift
07 p1087 A69-19518

Aberration of dielectric patches and rings attached to radome surface described by insertion phase
07 p1111 A69-19530

Radome axis error due to phase /dielectrics/ and metallic obstacles
07 p1112 A69-19542

Dielectric surface loading on GaAs for suppressing traveling high field domain mode oscillations
08 p1371 A69-19911

Mode designation and propagation characteristics of dielectric tube waveguide, noting practicability at higher microwave frequencies
08 p1284 A69-20296

Population inversion in semiconductors obtained by applying electric field through dielectric sphere /field effect/
08 p1374 A69-21082

Fluctuation voltage mean square value at polar dielectric capacitor terminals determined by applying stochastic properties of Poisson point processes to statistical model
08 p1295 A69-21151

Frequency shift and Q change of microwave cavity caused by lossy dielectrics and plasmas, examining perturbing volume requirements for conductor behavior
09 p1544 A69-21323

Magnetic field plane radiation patterns for tapered dielectric rod antennas computed by Schelkunoff principle, noting taper angle effect on lobes
09 p1464 A69-22097

Cut-off coupled microwave bandpass filters for use in dielectric filled waveguide systems
09 p1466 A69-22447

Ruby laser emission absorption in transparent dielectrics, noting crack formation and propagation producing opacity
09 p1520 A69-22655

FET memory element charge storage two layer model for thin film dielectrics noting charge/discharge times
10 p1742 A69-22947

Long and short duration pulses interactions with nonlinear dielectric, calculating frequency variations and spectral transformations
10 p1658 A69-23953

Electromagnetic wave propagation along longitudinally magnetized plasma column surrounded by isotropic dielectric medium, without making quasi-static assumption
10 p1658 A69-24061

Radio wave field distortions by dielectric prisms in lens waveguides, discussing beam transformation, noting both geometrical optics effects and diffraction role
11 p1833 A69-24436

Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
11 p1851 A69-24986

TEM-DUAL surface wave propagation in coaxial cable with stratified dielectric structure to reduce attenuation calculated by addition theorem to Bessel functions
11 p1856 A69-25659

Transformation of longitudinal plasma wave into electromagnetic wave during collision with dielectric in plasma
11 p1934 A69-25708

Radiation pattern of circular cylindrical dielectric rod antenna excited in mixed magnetic and electric modes, discussing mode transducer
12 p2035 A69-25900

Short circuit and variable frequency technique for measurement of coupling efficiency between dielectric loaded rectangular and trough waveguides, noting propagation modes
12 p2039 A69-26374

Perturbation analysis in dielectric loaded rectangular waveguides, considering scattered modes and phase progression 12 p2039 A69-26381

Dielectric coated finite cylindrical antennas, using numerical and Wiener-Hopf methods to obtain input admittance and current distribution 12 p2041 A69-26604

Aircraft engine spark plugs development, reviewing ceramic and mica insulated plugs and four pole electrode spark plugs 13 p2324 A69-27333

Velocity profiles of MHD flow through electrically insulated circular channel in transverse magnetic field 13 p2307 A69-27501

Optical surface wave propagation on thin dielectric film waveguides, noting applications to integrated optical data processors 13 p2229 A69-27676

Dielectric thin film electrical and mechanical properties and preparation for semiconductor devices, emphasizing Si compounds 13 p2286 A69-28004

Prebreakdown and breakdown electrical properties of thin film capacitors with certain oxides, fluorides and Teflon dielectrics 13 p2322 A69-28012

Wave propagation and bandwidth characteristics of rectangular waveguide loaded with H plane lossless dielectric slab 13 p2222 A69-28075

Dispersion and coupling impedance of logarithmic spiral resting on anisotropic magnetodielectric layer for microwave devices design 13 p2235 A69-28512

Gas laser design utilizing internal window mirrors deposited with dielectric coating outside resonator 14 p2457 A69-29160

Coupled mode theory for surface wave propagation along tapered cylindrical dielectric rod, considering radiation field effects 14 p2422 A69-29557

Adapter between dielectrically loaded waveguides with different cut-off frequencies and sizes for pulse compression systems 14 p2423 A69-29760

Plasma microwave measurement error allowance for multiple reflection of waves from vacuum chambers dielectric walls 14 p2498 A69-29806

Equivalent circuits of dielectric loaded and unloaded rectangular waveguide Esaki diode reflection amplifier 15 p2578 A69-30801

MIS devices with dielectric properties avoiding positive space charge formation, discussing radiation effect 15 p2625 A69-30829

Propagation modes attenuation and guidance on circular hollow dielectric waveguides dependent on dielectric loss tangent 16 p2757 A69-31587

Deformation of amplitude and frequency envelopes of plane modulated electromagnetic waves with dispersion in isotropic dielectric with cubic nonlinearity 17 p2928 A69-33869

Integral equation method for electromagnetic scattering by perfectly conducting obstacles modified for volume scattering regions involving disparities in dielectric constant, permeability or conductivity 17 p2930 A69-33890

Electromagnetic field formulation of eigenvalue problem for optical coaxial dielectric waveguide, using computer root searching method 17 p2930 A69-33892

Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods 18 p3108 A69-34802

Plane wave scattering by semiinfinite turbulent dielectric slab, using Born approximation to develop asymptotic series for stochastic components of forward scattered field [OSA PAPER WH-16] 18 p3174 A69-35245

Plane electromagnetic wave interaction with moving conductive dielectric medium to obtain reflection and transmission coefficients, noting energy transfer 18 p3105 A69-35486

Transfer molded epoxy dielectrics, comparing encapsulation rate, pressure and cure times to compression molding 19 p3281 A69-35548

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer 19 p3373 A69-36053

Second harmonic radiation generation in nonlinear dielectric by broadband short pulse optical signals 19 p3278 A69-36693

Turbulent boundary layer of conducting fluids on dielectric plate in transverse magnetic field in presence and absence of pressure gradient 20 p3513 A69-37092

Field patterns, propagation constants and losses determined for axially propagating modes guided by circular cylindrical inhomogeneous dielectric, using perturbation method 20 p3497 A69-38130

Radiation field of tapered dielectric rod antenna by Schelkunoff equivalence principle, investigating input impedance variation with axial length and taper angle 21 p3681 A69-38444

Atomic sources local multipolar field in anisotropic dielectrics determined from magnetic dipole radiation spatial distribution measurements 21 p3779 A69-38531

Electromagnetic waves attenuation and field structure within gas filled dielectric waveguide tube, tube walls and waveguide surroundings 21 p3674 A69-39123

Multiquantum photoemissive effect in metals, semiconductors and dielectrics emphasizing laser application for studying electromagnetic field 22 p3964 A69-40690

Resonance frequency behavior of waveguide cavity with evanescent air gap symmetrically loaded with dielectric 22 p3900 A69-40925

Electromagnetic propagation in infinite rectangular waveguide surrounded by dielectric medium described by Green dyadic 23 p4115 A69-41570

Waveguide fed rectangular aperture antenna with dielectric plug load, describing admittance resonant perturbation due to excited TE mode 23 p4136 A69-41589

Dielectric materials permittivity determined by measuring amplitude ratios of reflected and transmitted plane electromagnetic waves 23 p4123 A69-41950

Thermal radiation diffraction of dielectric cylinder /cold plasma model/ containing N plus one layers with arbitrary temperatures and permittivities 23 p4123 A69-42028

Fiber optics interferometers, analyzing light propagation along dielectric light pipes and wave interference 24 p4315 A69-43162

Ruby laser second harmonic generation statistical characteristics with dielectric surface scatterer, showing variety of modes and high cross sectional stability 24 p4328 A69-43164

Transmission properties and directional coupler determined for optical circuit dielectric rectangular waveguide with surrounding dielectrics of smaller refractivity 24 p4287 A69-43328

Light transmission through curved dielectric rectangular rod, studying optical waveguides of various cross sectional dimensions and radii of curvature 24 p4287 A69-43329

Rectangular dielectric waveguide propagation modes, describing computer analysis based on electromagnetic field expansion in circular harmonics series terms 24 p4288 A69-43330

Dielectric and semiconductor films vacuum deposition by CW carbon dioxide laser, discussing optical properties 24 p4329 A69-43755

DIENCEPHALON

Aminazine and adrenaline effects on adrenocortical function in patients with diencephalic syndrome 22 p3888 A69-41272

DIENES

NT BUTADIENE

Vibration and absorption bands in IR spectra of diborene hydrazine stabilized by boiling in benzene 12 p2027 A69-26917

DIES

Large hydraulic press forgings for light metals, discussing 50,000 ton machine used for Al alloys, tooling and die considerations [ASM PAPER C7-5.1] 04 p0604 A69-14521

Closed die development for forging very large and complex parts to meet needs of high Mach aircraft 04 p0604 A69-14523

Extrusion processes used for aluminum, magnesium and titanium extrusions, presenting die configurations 04 p0604 A69-14526

Interface friction and adhesion of alloys workpieces and die materials under pressure and temperatures typical of plastic deformation 15 p2629 A69-30902

Ti structural components for forgings, noting problems facing die-forging industry and machining equipment 21 p3728 A69-38459

DIETS

Rats on casein, soybean and Chlorella diets for protein source noting soybean diet produced no appreciable changes in intestinal flora 02 p0197 A69-11490

Nutritive value of protein from discolored algae biomasses on groups of rats kept on algae biomass, casein and soybean diets 02 p0198 A69-11510

Protein contained purine free basal and yeast ribonucleic acid diets effect on plasma and urinary uric acid production in male subjects 05 p0708 A69-15968

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria 05 p0709 A69-16516

Algae diet more effective than soya-protein diet in recovering metabolic processes in protein deficient white rats 07 p1065 A69-18977

In vivo hemolytic susceptibility to hyperoxia in mice deficient in tocopherol 07 p1066 A69-19422

Psychological, physiological and biochemical responses to controlled diets, determining regional and total body sweat composition of men working in temperate environment 10 p1644 A69-23314

Vegetable diet including 210 g of dry Chlorella biomass decreases effect on calcium and magnesium assimilation to produce insignificant negative balance of K and Mn 10 p1647 A69-23590

Human intolerance to bacteria as food, considering response to Hydrogenomonas eutropha and Aerobacter aerogenes 13 p2213 A69-27265

Sweet potatoes productivity and nutritive value as carbohydrates source in manned spaceflights 13 p2216 A69-28619

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months 13 p2212 A69-28624

Food intake changes of female rats in response to changes in energy balance, discussing steroids as physiological tracer 15 p2555 A69-30693

White rats diet containing alcohol-soluble fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerus 17 p2906 A69-32930

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria 18 p3096 A69-34735

Algae soil-protein diet more effective in recovering metabolic processes in protein deficient white rats 20 p3479 A69-38225

Exercise effects on hepatic cholesterol of rats on diets high in saturated or unsaturated fats 21 p3653 A69-38903

Glider pilots fatigue attributed to nutritional habits 23 p4106 A69-41796

DIFFERENCE EQUATIONS

Optimal control problems for Markov chains solved by iterative method, using nonlinear finite difference equations to approximate degenerate elliptic functions 02 p0224 A69-11963

Difference schemes for heat conduction analog simulation on electric integrators 03 p0410 A69-13300

Finite difference method for symmetric positive linear differential equations, discussing methods to solve finite difference equations generated 03 p0455 A69-13370

Difference schemes to solve Navier-Stokes equations for viscous incompressible fluid by substituting fourth order partial differential equation 03 p0415 A69-13650

Problem of viscous supersonic flow past blunt bodies based on Navier-Stokes equations formulated and solved numerically with explicit difference scheme 03 p0363 A69-13653

Eigenvalues for Orr-Sommerfeld equation by difference technique for Reynolds number range 5780-729000, determining Poiseuille flow stability in plane channel

03 p0416 A69-13654

Nonlinear oscillatory systems with constant delay under random forces action, noting use of stochastic difference-differential equations

03 p0468 A69-13866

Asymptotic solutions of linear difference equations, discussing applications to eigenvalue problems of free oscillations of model galaxies

04 p0623 A69-14946

Differential-difference equations and nonlinear initial boundary value problems for linear hyperbolic partial differential equations, noting procedure based on method of characteristics

04 p0623 A69-14949

Asymptotic oscillation results for solutions to first order nonlinear difference-difference equations, obtaining existence-uniqueness theorems

04 p0624 A69-14950

Difference equation for two dimensional elastic flow

04 p0681 A69-15286

Discrete ordinate difference equations of radiative transfer for slab using invariant method, noting storage and computing time advantages

07 p1183 A69-19623

Stability and perturbation theory of abstract Cauchy problem with difference scheme, showing application to parabolic differential equations

08 p1343 A69-20537

Difference schemes for approximating boundary value problems of elliptic equation free of mixed derivatives in rectangular region

09 p1532 A69-21788

Nonlinear second order elliptic difference equations in associated variational problems, considering differentiable solution of Dirichlet problem

10 p1718 A69-22879

Numerical solution for three dimensional boundary layers based on stability determinations for linearized difference equations

10 p1631 A69-22902

Scheme for choosing approximating system of difference equations for degenerate linear and nonlinear elliptic boundary value problems

10 p1719 A69-23515

Stable difference expressions for initial and mixed boundary value problems

10 p1720 A69-23594

Diffusion-stabilized difference schemes for inviscid compressible flow equations in conservation form for arbitrary number of space dimensions

12 p2062 A69-26624

Linear difference equations with exponential coefficients for numerical methods of integrating differential equations

13 p2288 A69-27526

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution

13 p2365 A69-28239

Variational difference method application to second order elliptic equations with inhomogeneous boundary conditions, applying results to boundary value problems in elasticity theory

13 p2289 A69-28318

Difference schemes for elasticity theory plane dynamic problem with mixed boundary conditions, establishing scheme absolute stability

14 p2536 A69-29474

Difference schemes for quasi-linear hyperbolic equations, with applications to three dimensional supersonic flow past bodies

14 p2430 A69-29475

Iterative solution for difference equations approximating displacement vector determination problem in theory of elasticity, investigating algorithm convergence

14 p2536 A69-29479

Modeling nonstationary random processes using linear time-invariant difference equation, with applications to Kalman filtering and gyro drift

14 p2479 A69-29486

Trajectory differential equations in state- variable form, presenting compatible difference equation adjoint scheme for trajectory integration

15 p2645 A69-31236

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation

18 p3164 A69-34701

Single parameter family of two layer difference schemes with decomposing operators for general linear second order parabolic equations with mixed derivatives and variable coefficients

18 p3164 A69-34702

Cauchy problem for homogeneous linear difference scheme with constant complex coefficients, giving stability lemmas

18 p3165 A69-35049

Difference method for parabolic differential equations solution for Rayleigh boundary layer in dissociating gas, using integral estimates to determine stability

18 p3124 A69-35295

Boundary conditions of incompressible fluid viscous flow on semiinfinite plate edge defined using difference methods for Navier-Stokes equations

19 p3299 A69-36394

Autonomous functional differential equations with finite time interval dependent derivatives, resulting in periodicity theorem applicable to difference equations

19 p3361 A69-36600

Approximation error involved in difference optimal control problem substitution for differential optimal control problem based on functional minimization

20 p3509 A69-36989

Difference method for initial value problems in quasi-linear hyperbolic first order approximations extended to wider quasi-linear problems, assessing convergence

20 p3568 A69-37833

Difference method for solving multidimensional differential equations of higher orders

20 p3568 A69-38074

Partial difference methods from parabolic, elliptic and hyperbolic equations solved by splittings of locally one dimensional nature

21 p3754 A69-38745

Thermal buckling of skew plates clamped along all edges under radiant heating, measuring various characteristics, solving differential equations by difference method

22 p4044 A69-40599

Integro-interpolation difference schemes for gas dynamic equations system satisfying laws of mass, momentum, energy conservation and energy balance

23 p4151 A69-41527

Wrong boundary conditions influence decay in overdetermined difference approximations to hyperbolic partial differential equation

24 p4340 A69-43227

DIFFERENTIAL ALGEBRA U MATRICES [MATHEMATICS]

DIFFERENTIAL AMPLIFIERS

Alternative balancing technique utilizing linear combination of two equal and opposite drift characteristics to minimize drift in integrated differential amplifiers

07 p1102 A69-18874

Signal conditioning amplifiers covering carrier and DC amplifiers, differential amplifiers, charge amplifiers and active filters

10 p1691 A69-23230

Magnetograph in Italian observatory for weak solar magnetic field longitudinal components avoiding differential amplifier by electronic compensation

10 p1693 A69-23311

Jet fluidic differential amplifier transfer function determination, describing interconnection dynamics

11 p1824 A69-24350

Circuit designs using differential amplifier devices or operational amplifier integrated circuits

11 p1857 A69-25664

DIFFERENTIAL ANALYZERS U ANALOG COMPUTERS

DIFFERENTIAL CALCULUS

Differentiability of fundamental solution to elliptic equations based on exact theorems of smoothness

01 p1016 A69-10955

Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers

02 p0271 A69-11653

Infinite system of first order integral equations derived from Prandtl boundary layer equation and continuity equation

02 p0231 A69-12059

Bilinear covariant of linear differential form involving 2n independent variables used for grouping to achieve symplectic and contact transformations

16 p2804 A69-31623

Bounds from asymptotic behavior of solutions of nonlinear integrodifferential equation arising from nonlinear oscillators in acoustics

01 p1013 A69-10001

Sobolev first embedding theorem providing relationship between global and local properties of functions in theory of differential equations

01 p1013 A69-10005

LCL /Liapunov, Cetaev and LaSalle/ functions for autonomous systems of second order extended to more general differential equation systems

01 p1013 A69-10007

Continuous wave solid state lasers active elements temperature fields calculated by differential equations

01 p0089 A69-10105

Linear ordinary differential equations with exponential coefficients, giving solutions asymptotic behavior for large values of independent variable

01 p1013 A69-10231

Nonlinear time dependent parameters systems, analyzing governing differential equations in terms of elliptic functions

01 p0050 A69-10237

Injection locked oscillator FM receiver consisting of linear mixer and negative resistance oscillator in phase locked configuration, solving receiver output differential equation

01 p0042 A69-10247

Second order systems of linear differential equations eliminating all nonessential difficulties associated with initial value problem

01 p1014 A69-10316

Bending of micropolar plates using differential equations, considering transverse displacement and microrotation vector

01 p1017 A69-10324

N-body problem in celestial mechanics, using differential equations, reduced to quadratures [UN PAPER 68-95268]

01 p0150 A69-10476

Optimal control system sensitivity definitions, analysis methods and design techniques, discussing equations of motion of dynamical system satisfying vector differential equation

01 p0051 A69-10553

Wave scattering in nonuniform cross section waveguides with large flare angles using coupled differential equations

01 p0044 A69-10622

Cauchy problem correctness for one dimensional hyperbolic equation of arbitrary order with data on degeneracy line

01 p1014 A69-10699

Algorithms for linear system of first order differential equations, emphasizing equations associated with computer oriented circuit design

01 p0036 A69-10708

Finite difference method for boundary value problem for second order differential equation, demonstrating convergence

01 p1015 A69-10721

Two dimensional ionized plasma flow in coaxial channels calculated using differential equations

01 p0130 A69-10723

Monte Carlo method accuracy improvement for calculating probability characteristics of nonlinear ordinary differential equations, describing nonlinear automatic control

01 p1015 A69-10730

Comparative analysis of variable structure adaptive systems and time optimal system for control of plant described by differential equation

01 p0052 A69-10795

Dynamic system for self adaptive control of inertial plant described by differential equations, noting synthesis method eliminates distortion

01 p0052 A69-10797

Determination of plant differential equation from time characteristics

01 p0053 A69-10804

General predictor-corrector method for system of m ordinary first order differential equations proved stable if Hermitian forms with coefficients are positive definite

01 p1015 A69-10807

Theory of generalized multistep methods, using off-grid point extended to special second order differential equation, applied to unperturbed orbit trajectory
01 p0153 A69-10808

Single frequency oscillations in stochastic quasilinear differential equations with delay
01 p0170 A69-10825

Multidimensional nonlinear plants adaptive control by direct integration, identifying differential equations coefficients
01 p0053 A69-10875

Reduction principle for study of linear differential equations stability
01 p0106 A69-10956

Soviet book on linear differential equations in Banach space covering equations with unrestricted operators, continuous semigroups, partial differential equations and asymptotic methods
01 p0106 A69-10996

Necessary and sufficient stability conditions for differential equation systems with selfadjoint quasiperiodic coefficients
01 p0107 A69-11130

Differential equations for dynamical problems in plates obtained by symbolic approach involving power series substitution into linear elasticity dynamical equations
01 p0172 A69-11282

Keplerian motion parameters second derivatives determined from initial conditions by deriving differential equations
01 p0107 A69-11305

Stable high order implicit methods to solve numerically differential equation systems with matrix coefficients used for heat conduction equation
01 p0107 A69-11364

N dimensional extensions of finite difference scheme for solution of differential heat conduction equation, noting practical limit by truncation error considerations
01 p0107 A69-11365

Boundedness theorem for all solutions of class of nonlinear second order differential equations
02 p0271 A69-11549

Iterative process for determining periodic solutions of nonlinear nonautonomous periodic differential equations without weak nonlinearity hypothesis applied to nonlinear synchronization
02 p0271 A69-11550

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
02 p0306 A69-11657

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front
02 p0241 A69-11729

Periodic cubic differential equation of motion solved with special reference to location of fixed points and stability of solutions
02 p0280 A69-11816

Linear integrodifferential motion equations for turbulent flow within Heisenberg statistical turbulence theory
02 p0230 A69-11869

Convergence of Multihopp collocation method for numerical solution of linear singular integrodifferential equation, noting use in airfoil, propeller and elasticity theory
02 p0271 A69-12056

Eigenvalue problem solutions for ordinary differential equations, discussing coefficient replacement, Ritz polynomial substitution and error limits
02 p0271 A69-12057

Existence theorems for solutions to second order ordinary differential equations
02 p0272 A69-12129

Electromagnetic wave propagation problems, using asymptotic solutions of differential and integral equations in domains containing transition points
02 p0208 A69-12130

Bifurcation of closed orbits from equilibrium points of autonomous differential system
02 p0281 A69-12133

Monograph of lectures on numerical solutions of linear, singular and nonlinear differential equations for boundary value problems using finite differences
02 p0272 A69-12157

Approximate solution of linear functional, singular integral and integrodifferential equations by general theory of approximate methods
02 p0272 A69-12163

Grobner formulas for numerical analysis of differential equations, discussing applications to orbit computations in celestial mechanics
02 p0322 A69-12250

Numerical integration stability of differential equations, noting limiting integration step size for unsteady distillation
02 p0273 A69-12478

Motion stability of two tethered unsymmetrical earth pointing bodies in circular orbit, presenting nine degrees of freedom differential equations of motions
02 p0324 A69-12507

Nonlinear first order equations solution by reduction method, using nonlinear transformation of dependent variable, noting two axis gyro drift
02 p0273 A69-12541

Stress state of circular cylindrical shell subjected to uniform inward radial line load along generator solved by closed form particular integral, discussing convergence
02 p0349 A69-12797

Lie algebra of second order linear differential equations
02 p0273 A69-12841

Statistical analysis of unsteady dynamic systems describable by unstable differential equations containing random parameters
03 p0408 A69-12948

Differential equations of motion for holonomic system of points with variable mass
03 p0465 A69-12965

Linear differential equations zero solution stabilization by control formed as linear combination of measured coordinates of object
03 p0408 A69-12972

Mathematical basis for designing controllers of time lag systems by approximately solving differential equations
03 p0408 A69-12973

Integral prediction method for arbitrary continuous function on right hand side of nonhomogeneous linear differential equation with constant coefficients
03 p0455 A69-13022

Zero solution asymptotic stability for linear differential equations with continuous functions
03 p0465 A69-13129

Bounded solutions for systems of ordinary second order differential equations
03 p0455 A69-13257

Finite difference method for symmetric positive linear differential equations, discussing methods to solve finite difference equations generated
03 p0455 A69-13370

Role of second order internal resonance in problem of stability of equilibrium of system neutral in linear approximation
03 p0466 A69-13404

Bergman integral operator to solve second order differential equations with two independent variables
03 p0527 A69-13742

Single and double resonance in system of coupled nonlinear differential equations describing vibration phenomena in mechanical and similar systems
03 p0527 A69-13748

Nonlinear oscillatory systems with constant delay under random forces action, noting use of stochastic difference-differential equations
03 p0468 A69-13866

Linear differential equation theory corresponding to metric theory of dynamic systems, proving theorems with results of qualitative theory of differential equations
04 p0621 A69-14358

Ordinary nonlinear differential equations with linear boundary conditions, discussing formulation and proof of lemma and theorems to demonstrate existence
04 p0621 A69-14416

Generalized Riemann-Liouville fractional integrodifferential operator and application to representation of analytic and harmonic functions inside circle
04 p0622 A69-14512

Book on qualitative theory of sampled data systems
04 p0630 A69-14563

Comparison and oscillation theory of linear differential equations, discussing zeros of solutions and Sturm type theorems
04 p0622 A69-14598

Book on nonlinear ordinary differential equations in transport processes, noting iterative and numerical methods for diffusion, conduction, fluid mechanics and chemical kinetics
04 p0622 A69-14599

Book on nonlinear boundary value problems for ordinary second order differential equations, illustrating

difference between linear and nonlinear problems concerning existence and uniqueness
04 p0622 A69-14600

First-kind operator equation solution by reduction to dual extremum problem, proving existence and convergence
04 p0622 A69-14622

One-dimensional self similar motion of relaxing gas, noting ODEs of process and gas dynamic parameters of flow field
04 p0588 A69-14623

Computer solution of Cauchy problem of ordinary differential equations in form of Taylor series
04 p0622 A69-14624

Differential-difference equations and nonlinear initial boundary value problems for linear hyperbolic partial differential equations, noting procedure based on method of characteristics
04 p0623 A69-14949

Asymptotic oscillation results for solutions to first order nonlinear differential-difference equations, obtaining existence-uniqueness theorems
04 p0624 A69-14950

Convergence of optimal control for denumerable system of differential equations treated by functional-space decomposition
04 p0583 A69-15095

Averaging error of system of nonlinear differential equations with time periodic right-hand sides
04 p0624 A69-15097

Green matrix of periodic boundary value problem for system of linear differential equations
04 p0624 A69-15098

Nonlinear Volterra integral equation, extending topological dynamics application of nonautonomous ordinary differential equations
04 p0626 A69-15288

Second approximation to Boltzmann equation solved for rigid sphere gas by reducing integral equation to differential equation
04 p0633 A69-15434

First order linear differential equations having complementary solutions of exponential type to determine effective initial and boundary conditions
05 p0786 A69-15926

Laminar boundary layer equations, discussing generalized similar solutions based on parametric approximation
05 p0746 A69-16019

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem
05 p0786 A69-16061

Nonlinear steady state vibration of single degree of freedom system, obtaining relationships between non-dimensional pi parameters of differential equation of motion
[ASME PAPER 68-WA/DE-7]
05 p0839 A69-16172

Identification of nonlinear control systems, determining nonlinearities in differential equation by curve fit or iteration method
[ASME PAPER 68-WA/AUT-19]
05 p0738 A69-16173

Phase error mean square value in phase lock loop determined from linear differential equations to determine output SNR and noise threshold
05 p0720 A69-16342

Motion stability analysis of system represented by differential equation having continuously differentiable functions as continuously acting disturbances
05 p0794 A69-16450

Conditions for solution existence for n differential equations and Liapunov functions
05 p0787 A69-16451

Solution to system of equations in boundary layer theory of steady incompressible fluid flow
05 p0751 A69-16454

Linear differential equations with sinusoidal coefficients analyzed with aid of trinomial recursions
05 p0787 A69-16464

Existence of minimal solutions of doubly infinite trinomial linear recursions of Poincaré-Perron type
05 p0787 A69-16465

Engineering solution for integrodifferential equations of physical systems with electronic circuits
05 p0724 A69-16468

Harmonic oscillations for systems of two differential equations, analyzing relative and global boundedness for solutions
05 p0788 A69-16479

Convergence of improper integral evaluated along solution of differential equation, noting use in asymptotic control theory

05 p0788 A69-16481

Explicit solubility of asymptotically periodic linear systems of differential equations

05 p0788 A69-16483

Stability of differential systems with random parameters, developing Liapunov function approach and application to Ito equation

05 p0788 A69-16484

Differential pursuit games solved by integrating Bellman equation for value function and determining set of possible positions in game with prescribed duration

05 p0788 A69-16536

Characteristic coefficients in method of integral relations calculated by Lagrange interpolation, noting application to numerical solution of differential equations

06 p0857 A69-17102

Differential equations of rotational motion of systems of rigid bodies in gravitational field derived with Lagrange equation

06 p0957 A69-17130

Axisymmetric form of stability loss of cylindrical shell under effect of axial load suddenly applied along generatrix, considering inertia forces and obtaining differential equations

06 p1021 A69-17181

Asymptotic solutions for nonlinear differential equations with gradually varying coefficients of great resistivity

06 p0947 A69-17392

Finite parametric family of solutions to differential equations systems with deviating argument

06 p0948 A69-17500

Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma

06 p0966 A69-17520

Approximate solution of celestial mechanics differential equations by reducing to quadratures for n body problems

06 p1006 A69-17566

Quasi-random properties of dynamic system generated by solutions of second order differential equations

06 p0948 A69-17657

General two dimensional second order hyperbolic differential equation analyzed by substitution method

06 p0948 A69-17786

Differential equations for two phase flow in axisymmetric supersonic nozzle, discussing existing solutions

06 p0861 A69-17815

Gradient method solution for class of optimal control problems, minimizing root mean square value of finite state components of object in motion

06 p0904 A69-17886

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas [AIAA PAPER 69-73]

06 p0905 A69-18121

Second order half linear differential equation solutions compared with linear equation, investigating differences

07 p1172 A69-18262

Differential equations governing free convection boundary layer flow past isothermal semiinfinite vertical flat plate solved for large Prandtl numbers by matched asymptotic expansions

07 p1239 A69-18266

Boundedness and stability of second order differential equation solutions

07 p1172 A69-18377

Zeros of solutions of second order differential equations, discussing disconjugacy concepts

07 p1172 A69-18378

Frequency modulated signal envelope passage through bandpass filter of inductively coupled circuits described by differential equation

07 p1100 A69-18555

Approximate solution to differential equations describing primary radiation defects transformation into secondary defects in semiconductors

07 p1199 A69-18679

Geometrical optics method for differential equations of fourth order in applications to LF plasma oscillations

07 p1190 A69-18697

Linear differential system with boundary conditions, obtaining equivalent Fredholm integral equation and perturbation theorem

07 p1173 A69-18729

Boundary value problems for second order differential equation with continuous f satisfying local Lipschitz condition

07 p1173 A69-18730

Analytic autonomous Hamiltonian differential equations with two degrees of freedom admitting unstable equilibrium point

07 p1215 A69-18732

Basic frequencies of uniformly almost periodic solutions of differential equations extended, noting application to orbit closures decomposition of almost periodic continuous flows

07 p1174 A69-18733

Uniform matched asymptotic approximations derived for various functions, with application to boundary value problem for ordinary differential equation with turning point

07 p1180 A69-18810

Analytic integration of Langmuir equation for spherical space charge flow obtained in terms of Airy equation or Bessel functions solution

07 p1115 A69-18864

Liapunov functions construction for linear and nonlinear differential equations, including n th degree systems with multiple nonlinearities

07 p1181 A69-19002

Differential equations with singular problem solutions analyzed by reducing problem to solution of integral equation

07 p1174 A69-19004

Stokes phenomenon, considering continuity solution of differential equations across Stokes lines

07 p1174 A69-19220

Accelerating convergence of one step methods for numerical solution of ordinary differential equations, discussing various initial value problems

07 p1174 A69-19724

Differential method with invariance principle used to analyze nonlinear invariant systems, determining physical realizability conditions

08 p1296 A69-20234

Homogeneous linear systems conditions for asymptotic growth of solutions of nonhomogeneous linear differential equations system

08 p1342 A69-20348

Multiplication of solutions of homogeneous linear differential systems

08 p1342 A69-20349

Error bounds and variational methods for nonlinear boundary value problems for ordinary differential equations

08 p1343 A69-20536

Differential equation reduction for vibrational motion of rectangular plates subjected to variable tangential forces, discussing dynamic stability

08 p1415 A69-20666

Monograph on implicit Runge-Kutta formulas for numerical integration of first order differential equations

08 p1343 A69-20706

Error estimation technique for Chebyshev series solution to ordinary differential equations

08 p1344 A69-20828

Stress-strain distribution in rotor wheel with radial side blades, giving differential equations system for circular disk strains

09 p1612 A69-21494

Heat transfer mechanism in solid body, deriving integrodifferential equation with classical equation and hyperbolic equation of heat propagation as special case

09 p1621 A69-21587

Three dimensional vibration analysis of circular homogeneous elastic cylinder, obtaining differential equations and zero stress conditions

09 p1612 A69-21601

Numerical studies of initial value problems by boundary value techniques for cases having available asymptotic estimates or periodicity of solutions

09 p1532 A69-21610

Bar flexure determination for Saint Venant torsional and transverse loading, solving differential equations by finite element methods

09 p1614 A69-21722

Soviet book on methods of optimal statistical solutions and problems of optimal control covering basic equations of random processes, stochastic differential equations, etc

09 p1473 A69-21932

Integrodifferential equations describing longitudinal oscillation properties in nonlinear region of electron Maxwellian plasma waves and two cold electron beams

09 p1550 A69-22026

Optimal stochastic control, discussing dynamic mathematical models described by differential equations

09 p1475 A69-22567

Torsional vibrations of unstiffened cylindrical tubes analysis by differential equations and applications to free-free rectangular cross section

09 p1620 A69-22769

Third order nonlinear ordinary differential equation solutions oscillatory and nonoscillatory behavior for conditions on variable coefficients

09 p1533 A69-22772

Book on special functions and approximations covering differential and integral equations and attendant theories arising in mathematical physics analysis

10 p1717 A69-22801

Two point boundary value problems solution for parameter dependent nonlinear differential equations, noting application to hinged rod bending

10 p1718 A69-22846

Static, kinematic and elastic basic equations of shell theory integrated into differential equation for minimal surface helical shells

10 p1793 A69-22886

Determining transfer matrix and comparing solution of homogeneous differential equation to Floquet theory results

10 p1666 A69-22928

Maximum principle in integral form for optimal control problems with delay differential system equations, using vector matrix notation

10 p1718 A69-23038

SNODE /spectra numerical ordinary differential equations/ computer program for solving differential equations and integration with basic time sharing system

10 p1659 A69-23142

Optimum control involving plants with intermediate position between lumped and distributed parameters

10 p1666 A69-23363

Finite difference schemes of high order of accuracy for Sturm-Liouville and boundary value problems with regular singularity

10 p1719 A69-23365

Impulse induction MHD generator with cylindrical channel, finding differential equations for velocity and current

10 p1638 A69-23484

Stability and error bounds in numerical integration of ordinary differential equations, determining highest possible degree of stable finite difference form

10 p1719 A69-23517

Sommerfeld type and Fermi type approximation analytical solutions of Thomas-Fermi differential equations for positive ions

10 p1726 A69-23525

Probable spectrum stability criterion and reducibility derived for linear differential equation having recursion or almost periodic coefficients

10 p1720 A69-23562

Dynamical systems technique for nonautonomous differential equations leading to recurrent motions

10 p1720 A69-23636

Existence and oscillation of initial and boundary value problems solutions for real scalar second order differential equations

10 p1720 A69-23637

Comparison theorem for nonlinear real vector ordinary differential equation

10 p1720 A69-23638

Convergence of zeta function for flows and diffeomorphisms

10 p1720 A69-23639

Nonsymmetric periodic solutions of second order nonlinear differential equations

10 p1721 A69-23641

Correction of linear functional differential equations with time delay showing error due to incorrect interchange of order of integration involving Stieltjes integral

10 p1721 A69-23642

Differential equation for laminar flow of nonNewtonian fluid in annulus with porous walls of nonuniform permeability, considering inelastic and suction Reynolds numbers

10 p1680 A69-23690

Asymptotic solution to problem of finding time optimal transformation for controlled plant with motion in phase space described by matrix differential equation

10 p1666 A69-23883

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential

equations, applying results to mixed boundary value problem

10 p1721 A69-23885

Instabilities of numerical integration of ordinary differential equations on digital computer, considering difference approximation containing extraneous solutions

10 p1721 A69-24042

Optimal controls for differential system nonlinear in state function and linear in control function

10 p1667 A69-24057

Criteria governing solution uniqueness to Volterra equations system

10 p1722 A69-24067

Similarity solution for flow of fluid-particle suspension over disk rotating at constant velocity, solving differential equations for flow velocity distributions

11 p1867 A69-24280

Liapunov functions generation for deterministic ordinary differential equations, discussing integral methods, quadratic forms, partial differential equations, canonical forms, etc

11 p1908 A69-24317

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations

11 p1915 A69-24535

Order of finite order linear continuous completely controllable completely observable system, using impulse response matrix and order of corresponding differential equations

11 p1858 A69-24567

Turbulent flow velocity field evolution in presence of random forces using equation of motion

11 p1867 A69-24628

Periodic solutions of strongly nonlinear differential equations for behavior of automatic control systems with delayed argument, noting autonomous and nonautonomous systems

11 p1916 A69-24765

Oscillatory properties of solutions to second order nonlinear differential equations with delayed arguments

11 p1908 A69-24767

Asymptotic series solutions for initial value problem involving nonlinear ordinary differential equation with small parameter epsilon

11 p1908 A69-24881

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates

11 p1982 A69-24950

Control sets corresponding to desired stability behavior of controlled motion, giving theorem concerning differential inequality

11 p1910 A69-25412

Optimal control theory for systems modeled by ordinary differential equations, considering delay in control action

11 p1860 A69-25447

Transition density function of randomly excited diffusion process and confinement probability at fixed spatial point satisfying integrodifferential equation involving functional derivatives

11 p1860 A69-25451

Synthesis for nonlinear second order differential equations with terms satisfying Lipschitz condition, using two person games optimal strategy

11 p1910 A69-25602

Green tensor construction for systems of linear differential equations with constant coefficients

11 p1996 A69-25730

Motion of heavy body with gyroscope, using coordinate system to reduce problem to linear second order differential equation

11 p1920 A69-25746

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem

12 p2027 A69-25882

Optimal controllers analytical design for closed loop systems with pure time delay in actuating mechanism using differential equations

12 p2045 A69-25959

Nonoscillatory solutions of second order nonlinear differential equations

12 p2120 A69-26033

Linear differential equations solutions boundedness and unboundedness criteria, determining quantitative relations

12 p2120 A69-26035

Third order multivariable control systems calculation with linear differential equations describing plant for design and digital optimization

12 p2049 A69-26085

Monograph on rapid rotations of aircraft with fixed controls, covering spin and roll movements differential equations

12 p2013 A69-26118

Cauchy problem solution for linear/nonlinear differential equations with analytic right hand sought in form of power series

12 p2120 A69-26199

Elliptic boundary value problem for differential equation and pseudodifferential boundary conditions, obtaining Green formula from formulated conjugate problem

12 p2121 A69-26200

Differential equations application to electrical circuit problems, solving voltage for series LCR networks and transforming Mathieu into Hill equation

12 p2052 A69-26351

Nondeterministic differential games with imperfect state information, emphasizing linear system with quadratic cost functional and additive white Gaussian noise

12 p2053 A69-26505

Liapunov function construction with numerical algorithm, considering systems described by dx/dt equals y and dy/dt equals $f(x,y)$

12 p2122 A69-26520

Dahlquist linear multistep methods of stability analysis for ordinary differential equations extended to Volterra integrodifferential equations

12 p2123 A69-26753

Cylinder buckling and other boundary value problems, applying inverse differential operators to solution of integrodifferential equations

12 p1886 A69-26841

Order determination for single step Runge-Kutta methods for solving general system of differential equations

12 p2124 A69-26891

Enclosures for large eigenvalues of ordinary second and fourth order differential equations based on asymptotic solutions of linear homogeneous second order differential equations

12 p2124 A69-26892

Eigenvalue approximation for first order systems by introducing artificial periodicity through successive impulse functions of alternate sign

12 p2287 A69-27242

Transient response in liquid-metal conduction MHD generators, analyzing constant magnetic field using differential equation

13 p2207 A69-27506

Differential approach game for unfavorable pursued motion, examining optimum control laws

13 p2288 A69-27525

Linear difference equations with exponential coefficients for numerical methods of integrating differential equations

13 p2288 A69-27526

Numerical methods for time integrating first order differential equations, emphasizing atmospheric oscillations in baroclinic model, evaluating errors

13 p2290 A69-27636

Internal solution of Einstein equations for steady axisymmetric gravitational fields by integrating differential equations with initial conditions

13 p2351 A69-27863

Second order differential equations eigenvalues with Sturm boundary conditions analyzed by difference method

13 p2288 A69-27922

Zlamal theorems refinements by means of Banach theorem of fixed points for Lienard differential equation

13 p2289 A69-27925

Differential equations of single loop parametric amplifier response, analyzing forced oscillations

13 p2234 A69-28329

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations

13 p2378 A69-28340

Set of states for control system described by linear differential equation with constant coefficients and brought to zero phase coordinates

13 p2239 A69-28437

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations

13 p2218 A69-28457

Quasi-L-analytic functions for ordinary linear operator L

13 p2290 A69-28484

Increases of Newtonian potential, gradient and second derivative on gravitating body, considering positive and negative masses

13 p2300 A69-28545

Differential equations for shallow circular spherical shell transformation to equation describing stress-strain state of plate on elastic base

13 p2369 A69-28565

Phase and amplitude changes of arbitrary-Q self excited oscillator under external disturbance, using differential equations

13 p2300 A69-28574

Analogy between differential equations for skew isotropic plates and rectangular anisotropic plates

13 p2371 A69-28678

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation

13 p2333 A69-28688

Contact problem for half plane with elastic stiffener reduced to Prandtl integrodifferential equation, determining contact stresses

14 p2531 A69-28804

Differential equation with finite jump type discontinuities

14 p2424 A69-28811

Completeness theorem for integrodifferential operator to establish Schwarzschild criterion for stability of gaseous masses

14 p2470 A69-28902

Boundary value problem for nonlinear functional differential equations, discussing matrix and general operators

14 p2470 A69-28906

Orbital elements evolution of binary or planetary system with decreasing mass by nonlinear nonautonomous differential equations

14 p2519 A69-29138

Numerical solution of differential equations for two channel PFM with pulse element, applying Dirac pulse sequence to input

14 p2426 A69-29148

Differential equations for ignited mode theory, considering ion and electron transport and energy flux

14 p2490 A69-29233

Singularity-free global solutions to nonlinear differential equations associated with variational principles, deriving necessary condition for existence from dilatation invariance considerations

14 p2470 A69-29367

Optimal control conditions for systems described by differential equations with deviating neutral type argument formulated in maximum principle form

14 p2426 A69-29419

Wentzel-Kramers-Brillouin approximation validity determined by sufficiency conditions based on differential equations series solution

14 p2471 A69-29454

Solution methods for differential heat conduction equations, discussing methods of variable separation, Green function, thermal potentials, etc

14 p2539 A69-29456

Quasi-distribution function differential equation for laser field with nonMarkoffian character derived from density matrix master equation

14 p2486 A69-29633

Von Karman swirling flow problem differential equations solved by extending Serrin existence theorems

14 p2432 A69-29676

Conduction solution to generalized nonlinear Benard problem showing existence of bifurcation and analyticity of convective motion

14 p2540 A69-29679

Asymptotic expansions of solutions to nonhomogeneous differential equation with perturbation

14 p2471 A69-29680

Integrodifferential equation derived and solved for evolution of collisional model of asteroids and debris

14 p2526 A69-29879

Nonoscillatory solution to nonlinear differential equation, presenting theorem describing sufficient condition for nonoscillation

14 p2471 A69-29950

Necessary and sufficient conditions for solution existence to second order boundary value problems, considering second order differential equation involving function of three variables

14 p2471 A69-29951

Convergent solutions of inviscid solar wind equations in expansions form including dimensionless distance from sun

14 p2515 A69-29968

Asymptotic power series solutions of viscous solar wind equations

14 p2515 A69-29969

Book on Bessel functions with physical applications covering solution of Bessel and associated equations, integral representations, Fourier-Bessel series, Hankel transforms, etc

15 p2643 A69-30037

Functional analysis methods to solve Cauchy problem for linear nonhomogeneous differential equations with delayed argument

15 p2643 A69-30101

Riccati equation solution for inhomogeneous and homogeneous lines obtained by Lagrangian method for differential equations

15 p2582 A69-30124

Differential equations for elastic stress distribution in thin rotating shell with arbitrary profile, obtaining analytical dimensionless solutions for potential profiles

15 p2703 A69-30158

Differential equations for optimum reception to synthesize detectors of deterministic signals against nonGaussian background noise using Markov process

15 p2567 A69-30340

Averaging procedure for solving Cauchy problem applied to two point boundary value problem for non-linear differential equations

15 p2644 A69-30449

Plane contact problems in elasticity theory allowing for cohesive forces solved by integral and differential equations

15 p2706 A69-30578

Sinusoidal perturbation extremal control system stability, using harmonic balance principle to obtain periodic solutions of system differential equations

15 p2582 A69-30616

Modified Chaplygin method for approximate integration of Cauchy problem for differential equations, estimating rate of convergence

15 p2644 A69-30656

Chetaev /A, lambda/ estimates of approximate integrations of system of ordinary differential equations, analyzing stability with aid of Liapunov functions

15 p2644 A69-30664

Runge-Kutta type method truncation error estimation, discussing validity conditions, evaluation processes and numerical tests

15 p2644 A69-30672

Electronic analog model for differential equations of equilibrium of gaseous combustion products based on asymptotic stability

15 p2717 A69-30862

Book on solution of linear ordinary differential equations and simultaneous systems using bar statics-equivalent beam method

15 p2711 A69-30929

Pontryagin maximum principle applied to time optimal control of autonomous second order system with constant coefficients and differentiation in transfer function numerator

15 p2583 A69-31059

Asymptotically almost periodic solutions of almost autonomous differential equation

15 p2645 A69-31096

Shock force calculation for parachute of arbitrary canopy design, illustrating simplification permitting differential equation solution in closed form

15 p2551 A69-31172

Sloping helicoid median surface with given parameters, obtaining equilibrium equations, elasticity and formulas relating deformations to displacements

15 p2714 A69-31197

Asymptotic solutions of optimum control for systems with constraints as linear differential equations and quadratic type functional

15 p2583 A69-31234

Trajectory differential equations in state- variable form, presenting compatible difference equation adjoint scheme for trajectory integration

15 p2645 A69-31236

Differential games theory with nonzero sum for application to economic analysis, discussing Nash equilibrium, minimax and noninferior strategies set

15 p2645 A69-31237

Stability and asymptotic stability theorems related to Liapunov second method, considering linear differential equations zero solution

15 p2654 A69-31259

Differential equations of steady motion construction from integral manifold

15 p2654 A69-31260

Plane Cauchy problem solution for differential equations in heat and mass transfer theory, applying contour integral method in matrix construction

15 p2719 A69-31262

Numerical integration of subdominant solutions of systems of ordinary differential equations, using partial Wronskians

15 p2646 A69-31519

Boundedness in mean square of solutions derived for linear differential equations forced oscillations with nonwhite Gaussian random functions parameters

16 p2873 A69-32058

Differential coefficients applied to Izsak-Borchers ballistic trajectory and errors produced by perturbations of initial vectors, applying results to data capsule recovery

16 p2857 A69-32156

Simultaneous unbounded solutions existence to homogeneous linear differential equations with continuous positive elastic and dissipative coefficients

16 p2804 A69-32251

Asymptotic solutions to second order differential equations with slowly varying parameters and large resistance applied to mathematical pendulum damped swinging motion

16 p2804 A69-32253

Nonlinear vibrations of mechanical two degrees of freedom system during resonance described using Krylov-Bogoliubov method to obtain differential equations solutions

16 p2875 A69-32255

Quasi-linearization algorithm for solution of boundary value problems for ordinary differential equations, formulating representation and convergence theorems

17 p2994 A69-32835

Shocks in gases, giving differential equation set for ideal gas behavior

17 p2948 A69-32845

Fluid filled spherical shell axisymmetric nontorsional motion analysis via differential equations obtained by Hamilton principle

17 p3051 A69-32956

Mechanical systems differential equations of motion solution behavior, discussing program constraints

17 p3053 A69-33017

Pulsed control systems sensitivity relationship to discreteness period described via differential equations

17 p2994 A69-33143

Friedrich qualitative analysis of ordinary differential operators modified to obtain quantitative information regarding eigenvalues distribution

17 p2995 A69-33404

Stability conditions for time lag differential equation systems over finite interval employing Liapunov functions, noting similarity with systems having continuously acting disturbances

17 p2995 A69-33616

Quasi-periodic solutions for canonical systems of differential equations in plane n-body problem

17 p3035 A69-33620

Spectrum of ordinary second order differential operators, correlating spectral properties with analytic function-theoretic properties of differential equation solutions

17 p2996 A69-33793

Monograph on solar system space flight trajectory calculations covering solutions to differential equations, error analysis and gravitational effects

17 p3039 A69-33798

Differential equations as Hamiltonian function for signal path, travel time and frequency variation in anisotropic nonpermanent absorbing medium

17 p2924 A69-33836

Approximation of vector linear differential equations with slowly varying matrix coefficients on time sharing computers, noting modeling possibilities

17 p2996 A69-33879

Nonlinear differential equations describing one degree of freedom systems oscillations, allowing for dry friction and internal friction in elastic element

17 p3007 A69-33913

Nonlinear differential equations of mechanical systems with restoring forces approximated by odd power displacement functions and energy dissipation approximated by displacement and velocity functions

17 p3007 A69-33914

Asymptotic series expansion for solutions of differential equations containing parameter

18 p3163 A69-34328

Differential equations of shells of revolution theory assuming rotationally symmetric stress and strain in thin elastic shells

18 p3215 A69-34549

Nonlinear systems of differential equations to free oscillations about equilibrium, obtaining periodic solutions

18 p3172 A69-34591

Convergence of discrete approximations of Navier-Stokes equations to solutions of corresponding differential equations

18 p3121 A69-34613

Nonlinear differential equations for nonequilibrium gases with internal degrees of freedom, considering

spatially homogeneous gas and oscillatory relaxation in harmonic oscillators

18 p3122 A69-34911

Linear boundary value problem solution using iterative method

18 p3165 A69-35050

One degree of freedom systems nonlinear oscillations differential equations periodic solutions by successive approximations, obtaining proof for convergence

18 p3174 A69-35311

Thin walled shell temperature and strain fields described by integrodifferential equations based on Kirchhoff hypothesis and coupled thermoelasticity reciprocity equations

18 p3225 A69-35368

Quadratic Liapunov function existence for exponentially stable linear system with varying coefficients described by vector differential equations

19 p3359 A69-35617

Two player zero-sum differential games with emphasis on play with state determined by differential equations, noting optimal solutions

19 p3359 A69-35665

Krein solution method for linear integral equations of first kind and related differential equations

19 p3360 A69-35780

Ordinary differential equations integration method, presenting algorithm based on double constraint of maximum accuracy and stability

19 p3279 A69-35805

Structural analysis of thin walled conical shell with variable external loading and Winkler-base elastic filler, using linear differential equation with variable coefficients

19 p3436 A69-35846

Syphon geometry influence on rigidity and strength determined using integrating Meissner type differential equations with finite difference schemes

19 p3358 A69-35849

Liapunov first stability theorem generalized for differential equations in Banach space

19 p3360 A69-35860

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitian polynomials analyzed via ordinary differential equations

19 p3373 A69-36202

Existence and uniqueness theorems for operator equation in differential equations theory for application to boundary value problem

19 p3360 A69-36373

Finite difference analogs with increasing error terms applied to simple differential Laplace operator for accuracy determination

19 p3365 A69-36510

Ordinary differential equations in linear topological space extended from Fattorini investigation, emphasizing use of linear operator

19 p3360 A69-36599

Autonomous functional differential equations with finite time interval dependent derivatives, resulting in periodicity theorem applicable to difference equations

19 p3361 A69-36600

Constraint restoration in holonomic and non-holonomic problems involving system of algebraic or transcendental equations or first order differential equations

19 p3361 A69-36758

Similarity method applied to linear integrodifferential equations of neutron transport in homogeneous space

19 p3361 A69-36774

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation

19 p3443 A69-36792

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin walled segments, using homogeneous differential equations

19 p3445 A69-36831

Approximation error involved in difference optimal control problem substitution for differential optimal control problem based on functional minimization

20 p3509 A69-36989

Theorem extending results of techniques for analytical solutions of nonlinear ordinary differential equations applied to terrestrial brachistochrone problem

20 p3575 A69-37205

Asymptotic stability of null solution of matrix differential equation, considering linearized equations of

rotational motion for hinged two body gravity gradient satellite orbit

20 p3575 A69-37212

Singular perturbations and boundary layer theory for approximating solutions to simple ordinary differential equations

20 p3515 A69-37583

Minimax error technique used with finite difference methods to estimate error in approximations to functions defined by nonlinear differential equations

20 p3568 A69-37832

Monograph on periodic solutions and locking-in regions for differential equations with switching points describing motion of self excited oscillatory physical structures

20 p3577 A69-37923

Difference method for solving multidimensional differential equations of higher orders

20 p3568 A69-38074

Nonlinear partial differential equations numerical solution applied to solving Cauchy problem encountered in Goursat problem

20 p3569 A69-38293

Cauchy problem solution for first order nonlinear Volterra integrodifferential equation, using Runge-Kutta method

20 p3569 A69-38294

Optimization for processes expressed in differential equations, stressing use of calculus of variations and limitation

21 p3795 A69-38400

Variational or optimal control for delayed systems, involving integrated maximum principle for problems with nonlinear functional differential systems

21 p3754 A69-38429

Continuous optimal control problems, proving direct solutions existence for case of differential equations system linearity in control and state variables

21 p3684 A69-38431

Existence and uniqueness of optimal feedback control proved for autonomous nonlinear differential equations, allowing any finite number of variables

21 p3685 A69-38433

Optimal control of dynamic system motion described by linear differential equation, selecting vector function ensuring predetermined trajectory

21 p3685 A69-38452

First order linear differential equations subject to linear constraints, discussing solution uniqueness dependence on matrix nonsingularity

21 p3754 A69-38744

Shooting method difficulties in boundary value problem numerical solutions using computer programs to integrate differential equations

21 p3755 A69-38753

Time optimal control for second order automatic system with motion described by differential equations

21 p3770 A69-38856

Algorithms testing characteristic polynomials and differential equation classical stability relations

21 p3755 A69-38925

Linear and nonlinear differential equations systems stability and instability problems, describing procedures and theorems for solutions

21 p3755 A69-38960

Periodic motions of mechanical oscillators with velocity discontinuities analyzed by differential equations

21 p3771 A69-39009

Asymptotic stability of differential equations solutions in linear normalized spaces via Liapunov theorems extension

21 p3755 A69-39105

Differential equations for variable mass solid body motion about fixed point having cavities filled with ideal fluid

21 p3771 A69-39106

Stability of two differential equations in critical case, obtaining Liapunov stability and instability

21 p3755 A69-39107

Critical case of stable motion for differential equations having two zero roots

21 p3771 A69-39108

Synthesis by differential equation technique for linear antenna arrays of identical radiators radiation patterns

21 p3682 A69-39125

Deformation of circular cylindrical shell of varying thickness, obtaining differential equation solutions through multiple scales method

21 p3837 A69-39159

Arbitrary form temperature rate wave growth and decay, determining differential equation governing wave amplitude

21 p3853 A69-39671

Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids

21 p3697 A69-39674

Periodic solutions of differential equation as example of locking in of frequencies, developing mapping procedure for perturbation methods application

22 p3979 A69-39894

Criterion for class of differential equations ensuring absence of nontrivial periodic solutions

22 p3974 A69-39897

Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model

22 p3984 A69-40186

Existence conditions of critical points for autonomous differential equations in bounded flows

22 p3975 A69-40571

Two dimensional gas dynamics differential equations for simple waves, discussing invariant solutions and conditions for group solutions

22 p3933 A69-41030

Time dependent differential equation for order parameter in superconductors near critical temperature derived from density matrix equations

22 p3994 A69-41053

Random processes correlation functions determined by stochastic differential equations applied to lunar surface statistical characteristics determination

22 p4033 A69-41092

Asymptotic methods for differential equations containing parameter, discussing reduction to integral equations system

22 p3976 A69-41124

Coupled set of differential equations describing generalized Volterra problem of conflicting populations and application to plasma oscillations

22 p3976 A69-41260

N-th order differential systems using first approximation, finding conditions for bounded solutions, solutions asymptotic to zero and stability

23 p4181 A69-41722

Variational formulation of nonlinear differential equations, treating vector fields in Hilbert spaces, finding relations useful in quantum mechanics

23 p4181 A69-41723

Nonlinear differential equations of injection phase locking solved by Riccati equation, discussing initial frequency offset to loop gain ratios

23 p4119 A69-41742

Existence theorem for relation between solutions of systems of ordinary differential equations

23 p4182 A69-41959

Differential operators representing potential energy of thin shell, discussing self conjugacy of boundary value problems

23 p4229 A69-41999

Invariance conditions for steady and unsteady systems by differential method compared to variational approach

23 p4145 A69-42371

Absolute invariance conditions for closed isolated subsystem of nonlinear differential equations of Cauchy normal form

23 p4183 A69-42372

Nonlinear loaded integrodifferential equation analytical and formal solutions, noting role of characteristic number relation to unity

24 p4339 A69-42595

Sufficient conditions theorems for investigation of instability of numerical integration methods to solve differential equations

24 p4339 A69-42646

Bethenod pendulum behavior using coupled nonlinear differential equations, discussing synchronization methods

24 p4349 A69-42673

Newton method providing continuing solutions of nonlinear differential equations through limit or bifurcation points, discussing elastic stability applications [ASME PAPER 69-APMW-14]

24 p4401 A69-43102

Positive cyclic systems of linear differential equations, proving existence and projective uniqueness of solution having positive n components for all t

24 p4340 A69-43131

Bellman equation analyzed for higher derivatives, suggesting bounded partial derivatives of optimal feedback control function

24 p4341 A69-43234

Uniqueness theorem and successive approximations for delay functional differential equations, noting scalar problems

24 p4341 A69-43236

Quasi-steady laminar flat plate boundary layer in shock tube determined by reducing boundary layer equations to linear differential equations

24 p4305 A69-43632

Vector matrix second order sensitivity equation application to Mars entry guidance, performing numerical simulation of second order sensitivity guidance and tabulating results

24 p4388 A69-43690

Synthesis of second order nonlinear differential equations reducible to linear third order equations for application to vibrations field

24 p4342 A69-43702

DIFFERENTIAL GEOMETRY

NT LIE GROUPS

NT RIEMANN MANIFOLD

NT SPINOR GROUPS

NT TENSOR ANALYSIS

Quasi-linear parabolic partial differential equations, discussing solutions, regularity, differential geometric aspects and Dirichlet problem

02 p0273 A69-12779

Four dimensional space-time immersion in conformally flat six dimensional space or flat eight dimensional space, noting group of isometries of tangent spaces

10 p1774 A69-23162

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement matrix analyses, discussing local subelement, natural modes, cross sectional resultants, etc

16 p2872 A69-32025

DIFFERENTIAL INTERFEROMETRY

Quantitative analysis of differential interferometer photographs using Wollaston prism with beam separation, applying method to sphere in low density hypersonic flow

12 p2089 A69-26187

Streak photographs by differential interferometer to study head wave standoff in shock tubes as function of time

18 p3085 A69-34473

Multifrequency dispersion interferometers applicability in plasma diagnostics, considering integral electron concentration measurements

22 p3947 A69-40959

DIFFERENTIAL OPERATORS

U OPERATORS [MATHEMATICS]

DIFFERENTIAL PRESSURE

Venturi meter design, discussing effects of turbulent velocity fluctuations, hole size and internal geometry on differential pressure measurement

11 p1880 A69-24468

Electric dose variometer principles, emphasizing differential pressure meter, differential capacitor and capacitor meter

24 p4315 A69-43143

DIFFERENTIAL THERMAL ANALYSIS

Thermosetting resin curing behavior characterized by differential thermal analysis performed above atmospheric pressure to prevent volatilization

09 p1500 A69-22311

Dynamic differential thermal analysis of dried plant and animal specimens and related substances yielding discrete decomposition peaks of exothermic type

15 p2555 A69-31000

Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process

16 p2747 A69-31807

Premature exothermic decomposition suppression in propellant grade ammonium perchlorate, using differential thermal analysis

16 p2833 A69-32688

La-Rh system study by powder X ray diffraction, metallographic and differential thermal analysis, constructing equilibrium diagram and determining crystal structure data

21 p3744 A69-38739

DIFFERENTIATION [BIOLOGY]

Classical and differential eyelid conditioning for truth or falsity of visually presented verbal statements

07 p1064 A69-18632

DIFFERENTIATORS

Error origin and control in high gain operational amplifier in time differentiation of voltage signal used for photoemission studies

06 p0897 A69-17700

Error and noise sources in analog differentiators, discussing signal distortion minimization techniques and augmentation with linear phase filter

06 p0897 A69-17702

Differentiating network with nonlinear resistance and capacitance elements, noting improvement in pulse shaping properties

08 p1295 A69-19910

Pulse frequency signal processing continuous and discrete differentiators, analyzing time delay, constant frequency, accuracy and codes

09 p1454 A69-21755

Alloying pairs of metal pellets to n and p type semi-insulating GaAs, discussing photo effects

17 p3015 A69-32824

DIFFRACTION

NT ELECTRON DIFFRACTION

NT FRESNEL DIFFRACTION

NT NEUTRON DIFFRACTION

NT PULSE DIFFRACTION

NT WAVE DIFFRACTION

NT X RAY DIFFRACTION

Intracavity laser diffraction gratings for single wavelength output

01 p0092 A69-10897

Algebraic formulation of electromagnetic diffraction, discussing propagation of positive and negative time frequency components by dual operators

18 p3172 A69-35010

HF radar scattering by finite circular cone as function of frequency and aspect angle using modified diffraction pattern theory

20 p3495 A69-37849

Modified geometrical diffraction theory applied to determination of vertically polarized radar backscattering from rear of cylinders and frustums

20 p3495 A69-37851

Eigenmodes of asymmetric cylindrical confocal laser resonator with single output coupling aperture, obtaining diffraction loss factors and mirror field distributions

21 p3741 A69-39564

Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory

22 p3914 A69-40703

DIFFRACTION GRATINGS

U GRATINGS [SPECTRA]

DIFFRACTION PATHS

One way measurement of dual inband frequency diversity improvement on HF ionospheric path with frequency division multiplexed FSK modulation

10 p1656 A69-23536

DIFFRACTION PATTERNS

Crystals and molecules diffraction in supersonic molecular jets

02 p0284 A69-12629

Moire fringe interpolation and multiplication by shifting master interference grating, noting increased measurement sensitivity

03 p0524 A69-13063

Laser beam diffraction method for measurement of apparent filament diameters, emphasizing high modulus carbon filaments

08 p1316 A69-20499

Fabry-Perot fringes maxima in frequency response of laser interferometer, describing passive technique using eight wave plate

09 p1517 A69-21915

Diffraction pattern recording technique and application to thin film measurements

09 p1499 A69-22303

Hologram obtained by recording interference pattern displayed by ultrasonic camera, discussing real time viewing

10 p1696 A69-23550

Diffraction theory of schlieren photometric slot and wire methods for cylindrical light wave of even order, discussing Fresnel diffraction for spherical wave

12 p2088 A69-26180

Contrast interference patterns obtained in Michelson interferometer at various path differences, using He-Ne laser as light source

12 p2108 A69-26593

Natural unbroken tektite surface examination by interferometry, discussing fringe patterns for pit shapes and sizes

12 p2173 A69-27175

Visual observation of surface vibration nodal patterns by incoherent light illumination of object, noting holography

12 p2099 A69-27176

Diffraction images of coherently illuminated objects in presence of aberrations stressing images of edges, disks and bars

13 p2297 A69-27451

Multichannel optical interference fluid manometer, using laser light source for fringe pattern photographic record

13 p2263 A69-28190

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality

14 p2532 A69-28885

Irradiance distribution in far field diffraction patterns of partially coherent light diffracted by annular aperture, using Fourier transformation relationship of Schell

14 p2460 A69-29640

Optical image diffraction method for analyzing radiation patterns of horn antenna sounding beams used in microwave measurement of expanding plasmoids

14 p2497 A69-29793

Random motions velocity of ionospheric inhomogeneities by extreme lines delineation of diffraction pattern during amplitude recording of reflected signal

14 p2444 A69-29872

Asymmetrical waves diffraction field at wide slots in circular waveguides determined in Huygens-Kirchhoff approximation

15 p2570 A69-30955

Stresses in fixed two dimensional photoelastic models analyzed by hologram interferometry, displaying isochromatic and isopachic interference patterns

15 p2611 A69-31110

Vibration measurement by hologram interferometry, explaining interference fringes as linear combination of vibrating object classical modes

18 p3135 A69-34635

Holographic velocimetry data reduction applicable to flow field holograms, using singlet interference pattern for spherical and plane wave illumination

19 p3305 A69-35730

Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution

19 p3315 A69-36824

Cranz-Schardin camera for high speed recording in dynamic photoelastic fringe pattern studies, discussing framing rates, fringe gradients and design

20 p3541 A69-37778

Diffraction pattern of satellite signal field-aligned amplitude scintillation during quiet geomagnetic conditions

20 p3497 A69-38108

Fringe multiplication techniques for moire fringe arrays of inhomogeneous strain fields

21 p3845 A69-39328

Moire technique for gaging surface deformations or surface configuration differences by optical interference patterns

21 p3726 A69-39775

Wedge fringes visibility and localization in hologram interferometry during focusing on surface under examination for displacements

22 p3943 A69-40016

Photographic high speed recording system characteristics effects on dynamic photoelastic fringe patterns fidelity

22 p3945 A69-40077

Isoclinic angle errors effects on photoelastic fringe order measurements accuracy

22 p3945 A69-40082

Edge diffracted fields by conical body frustums evaluated, including equivalent currents for caustic regions

23 p4136 A69-41583

Radio echoes diffraction patterns determination from reflection coefficients of polarized radio waves reflected from ionized meteor trails

23 p4214 A69-41846

Principal stresses determination in optically active photoelastic models from fringe pattern while obtaining sum from Dirichlet problem solution by straight line method

23 p4228 A69-41987

Lateral waves used to explain diffraction effects by light incident upon interface at critical angle of total reflection, discussing quasi-optical properties

23 p4191 A69-42148

Isoclinics determination from fringe patterns, obtaining continuous principal stress direction data for photoelastic model in bonded polariscope

24 p4396 A69-42738

Index of refraction turbulent fluctuations effect on beam traversing optically active medium, discussing far field diffraction pattern and incoherent scattering [AIAA PAPER 68-683]

24 p4304 A69-43578

DIFFRACTION PROPAGATION

Wave propagation in open periodic two dimensional iris waveguide and beam reconstruction by diffraction, considering existence and character of modal fields

16 p2753 A69-32394

Knife-edge obstacle diffraction of nonisotropic transmitter analyzed via isotropic source model propagation path noting accuracy

17 p2917 A69-32847

Far field of line source in medium with sinusoidally stratified dielectric constant, studying diffraction effects due to Bragg mechanism

17 p2925 A69-33842

Diffraction of plane polarized electromagnetic wave incident on dielectric wedge formulated as singular integral equation, discussing electric field amplitude

22 p3903 A69-41258

Edge diffraction effects in TEM axially slotted finite ground plane on radiation pattern in waveguides of different geometries

23 p4116 A69-41588

Linear diffraction equations in electronics in self consistent formulation reduced to complex transcendental equations, using perturbation method

23 p4124 A69-42033

DIFFRACTION TELESCOPES

U SPECTROSCOPIC TELESCOPES

DIFFRACTOMETERS

Diffraction effects on periodic structures in millimeter wavelength range, discussing apparatus for measurements of Fraunhofer zone field, polarization and phase characteristics

04 p0598 A69-14852

Diffraction effects on periodic structures in millimeter wavelength measurements of Fraunhofer zone field, polarization and phase characteristics

15 p2607 A69-30244

DIFFUSE RADIATION

Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern

02 p0319 A69-12105

Diffusive scattering effects on planetary surface reflection coefficient determined by radar observations

04 p0662 A69-15245

Diffuse cosmic X radiation flux and intensity law, noting inverse Compton effect of electrons on 3K black body radiation

05 p0817 A69-16714

Low energy diffuse cosmic X radiation, considering adequacy of single exponent power law spectrum [ISAS-428]

06 p0986 A69-17024

Spectral reflection computer program utilizing virtual image technique to determine reflection characteristics of enclosed diffusely emitting surface [AIAA PAPER 69-65]

06 p1040 A69-18215

Diffuse reflection of electromagnetic waves by rough random surface using probabilistic method and statistical distributions

07 p1075 A69-18280

Diffuse cosmic X ray background measured during balloon flight with actively shielded and collimated detector

09 p1584 A69-22767

Interstellar diffuse absorption bands due to resonance lines of impurity atoms trapped in low temperature hydrocarbon matrices

10 p1781 A69-23677

Diffuse galactic radiation reinterpretation by solving same transfer problem exactly for properties of interstellar particles

10 p1782 A69-23680

Diffuse X radiation spectrum below 4 keV measured with beryllium window proportional counter at rocket altitudes

10 p1770 A69-24094

Supplemented data to analyze intergalactic gas diffuse X ray background radiation

10 p1792 A69-24209

Double focus lens holography for diffusely reflecting surface deformation recording, discussing gas lasers, Polaroid photographic materials, etc

11 p1880 A69-24467

Diffuse reflection of monochromatic radiation by semiinfinite plane layer in case of isotropic scattering, reducing problem to power series

11 p1960 A69-24732

Specularly vs diffusely reflecting cylinders for cavity type sources of approximately black body radiant energy, noting ray tracing of cones

12 p2130 A69-26245

Radiation diffusion in medium of finite optical thickness, computation of source function and tabulation of matrices

12 p2131 A69-26661

Monograph on atmospheric radiation transfer including absorption, scattering, direct, diffuse, global, thermal and net radiation

12 p2073 A69-26918

Southern radio auroral zone observation with rhombic antennas, noting diffuse and discrete zones associated with proton and electron precipitation

12 p2033 A69-26950

Cosmic X ray background measurements and Crab Nebula observation during sounding rocket flight

13 p2326 A69-27570

Vertical refraction effect on gas laser beam propagation near earth surface under various meteorological conditions, comparing index for diffuse light

13 p2220 A69-27827

Light diffusive reflection from rough surface measured as function of angle of incidence in presence of specular component by goniospectrophotometer

14 p2485 A69-29171

X ray energy spectrum from Crab Nebula and diffuse background on celestial sphere near galactic anticenter, noting spectral index

15 p2675 A69-30759

Light polarization diffusely reflected by earth at atmosphere measured from balloon, using gain compensated photoelectric polarimeter

16 p2781 A69-32320

Time dependent radiation diffusion in inhomogeneous stationary medium applied to diffuse reflection of light

16 p2813 A69-32591

Cosmic X rays diffused component absolute intensity measurement using rotating collimator borne on sounding rocket, noting flat spectrum and Sco X-1 intensity variation

17 p3023 A69-33068

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model

[AIAA PAPER 69-624] 17 p3070 A69-33259

Time dependent diffuse reflections related to solar activity, showing diffusion intensity variations with sporadic E layer height and electron concentration

17 p2968 A69-33997

Cosmic X rays diffuse component possible origin, discussing galactic gamma ray flux and disagreement with measured isotropy

18 p3185 A69-34275

Search for diffuse galactic light component between 2100-2800 Å by rocket measurements of night sky brightness, showing low albedo of interstellar dust

18 p3202 A69-35210

Time dependent collimated light diffuse reflection and transmission by finite inhomogeneous atmosphere, using principle of invariance

18 p3132 A69-35345

Occurrence, development and disappearance of diffused reflections, relating dynamic behavior to ionospheric electron concentration

20 p3529 A69-37687

Diffuse reflection of UV radiation from rough metallic surfaces, noting irregularities

21 p3770 A69-38796

Milky Way galactic diffuse radiation photometric study using Schmidt camera, stressing Northern Coal-sack commencement region

21 p3817 A69-39725

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona

22 p4002 A69-40002

Diffuse galactic radiation intensity and distribution from photoelectric measurements compared with radiative transfer calculations using various interstellar dust models

22 p4013 A69-40096

Diffuse reflection of electromagnetic longitudinal wave from magnetoactive plasma in oblique incidence

22 p3990 A69-40788

Spatial coherence of He-Ne laser radiation diffused by turbid medium calculated by using diffraction and interference measurements

22 p3964 A69-40798

Aperture distortions and spectral line shapes of electromagnetic radiation diffused by plasma

22 p3982 A69-40799

Stellar and diffuse galactic radiation intensity observations to obtain albedo values of interstellar dust particles

22 p4034 A69-41112

High energy astronomical diffuse radiation component properties tabulated, discussing power law and thermal X ray background, gamma rays, etc

23 p4207 A69-42319

Meter and decimeter wavelength range short period fading under conditions excluding optical sights, correlating specular and diffuse reflection

24 p4281 A69-42612

Diffuse cosmic X rays from Compton collisions between galactic leakage electrons and extragalactic background photons to verify microwave blackbody radiation properties

24 p4368 A69-43202

DIFFUSERS

Swirl flow through single and multistage Carnot shock diffuser, analyzing relation of pressure rise and diffuser aspect ratio

02 p0230 A69-11616

Short cylindrical diffusers efficiency in supersonic wind tunnel with exchangeable nozzles with conical supersonic section

03 p0365 A69-14226

Pressure recovery of straight channel divergence diffusers at high inlet Mach numbers

[ASME PAPER 68-WA/FE-19] 05 p0698 A69-16095

Inlet velocity profiles distortion effects on flow regimes and performance in two dimensional diffusers with turbulent boundary layers

[ASME PAPER 68-WA/FE-25] 05 p0698 A69-16100

Inlet conditions influence on two annular diffusers performance, using low speed tests

[ASME PAPER 68-WA/FE-38] 05 p0698 A69-16110

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number

[ASME PAPER 68-WA/FE-45] 05 p0698 A69-16112

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency

[ASME PAPER 68-WA/FM-2] 05 p0763 A69-16135

Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency

[ASME PAPER 68-WA/FM-2] 14 p2447 A69-29447

Diffuser inlet geometry, studying effects of straight section length on flow pattern and diffuser resistance

14 p2391 A69-29899

Subsonic diffuser design, discussing flow distortion and turbulence levels and pressure loss characteristics

[AIAA PAPER 69-449] 16 p2843 A69-32700

Jet flap as alternative to rigid diffuser for momentum propulsion, discussing thrust augmentation

[AIAA PAPER 69-777] 19 p3393 A69-35645

Diffuser for high performance centrifugal compressors based on discrete pipe drillings

[ASME PAPER 68-GT-38] 19 p3240 A69-36420

Tridimensional infrasonic diffuser geometry effects on operational efficiency, considering opening angle, outlet/inlet section fields ratio and diffuser length/hydraulic radius ratio

24 p4243 A69-42560

Inverse transition from turbulent to laminar flow in radial diffusers, noting nonagreement of transition point prediction methods

[ASME PAPER 69-HT-33] 24 p4247 A69-43530

DIFFUSION

NT AMBIPOLAR DIFFUSION

NT ATMOSPHERIC DIFFUSION

NT ELECTRON DIFFUSION

NT GASEOUS DIFFUSION

NT IONIC DIFFUSION

NT MAGNETIC DIFFUSION

NT MOLECULAR DIFFUSION

NT PARTICLE DIFFUSION

NT PLASMA DIFFUSION

NT SPECIES DIFFUSION

NT SURFACE DIFFUSION

NT THERMAL DIFFUSION

NT TURBULENT DIFFUSION

Diffusion zones in filament reinforced metal matrix composites, using metallographic technique

01 p0103 A69-11269

Diffusion in conduction process in dielectric fluids, discussing space charge limited current-voltage characteristics

03 p0415 A69-13140

Electron plasma oscillations diffusion due to scattering by large amplitude ion wave background, noting electron wave spectrum evolution

03 p0483 A69-14256

Diffusion in compounds of elements of groups III-V

04 p0641 A69-14502

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

04 p0614 A69-14578

Diffusion anomaly of native acceptor defect in zinc selenium telluride p-n junctions, discussing applications in triple diffusion technique of preparing p-n junction diodes

05 p0808 A69-16286

Double diffused planar Ge n-p-n and p-n-p transistors with high switching speed, noting fabrication and performance

05 p0809 A69-16557

Double diffused Si transistors, discussing temperature dependence of gain, injection efficiency, emitter and base regions energy gaps and excess noise

05 p0733 A69-16558

Computer tape controlled pulsed externally excited gas laser mask making machine with micropositioning coordinate table for integrated circuit fabrication

06 p0931 A69-17200

Low temperature technique for preparing solid-diffusion sources for silicon device fabrication based on gaseous hydrides as reagents

07 p1198 A69-18619

Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions

10 p1652 A69-23371

Brittle fracture at high temperatures in titanium alloys using scanning electron beam microanalysis, noting reaction diffusion with atmosphere and grain boundaries destruction

10 p1713 A69-23823

Soviet collection of papers on diffusion processes in metals covering welding, annealing, anisotropic crystals, metal condensation layer, cast iron decarburization, etc

11 p1890 A69-24798

Diffusion processes in metal welding noting role of recovery, polygonization, recrystallization, polymorphic transformations, etc

11 p1890 A69-24799

Diffusion processes during annealing of metals irradiated by electrons and neutrons, discussing crystal damage, recovery and recrystallization

11 p1891 A69-24800

Diffusive flow with isopycnic lateral boundaries in porous medium and density distribution of diffusive motion, noting exact solution equivalence to previous solution

11 p1869 A69-24887

Etch pits behavior during diffusion and rediffusion of copper in low dislocation crystals of gallium arsenide, demonstrating vacancy nature

11 p1937 A69-25029

Characteristics method for stress waves from hyper-velocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields

[AIAA PAPER 69-355] 13 p2365 A69-28287

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

15 p2638 A69-30279

Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems

15 p2687 A69-30548

Diffuse Zn layers structure in GaAs single crystals, showing dislocations formation by anomalous Zn diffusion

15 p2670 A69-31048

Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes

19 p3346 A69-36440

Spectral line scattering during propagation of radiation in turbulent plasma

19 p3396 A69-36573

Be diffusion during vapor phase saturation of W, Mo, Nb and Ta, noting time and temperature dependence of layer thickness

20 p3549 A69-37364

Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model

21 p3662 A69-38388

DIFFUSION COEFFICIENT

Mass or energy transfer in reinforced media, discussing components characteristics and role of diffusion processes

01 p0173 A69-10079

Vacancy diffusion in Ge, relation to precipitation of Cu impurities from supersaturated solid solution and determination of monovacancy migration energy

02 p0295 A69-11780

Diffusion data in binary compound semiconductors, tabulating impurities, electrical behavior, temperature variations and diffusion coefficients

02 p0296 A69-11809

Diffusion coefficients for oxygen transport in whole blood, discussing effects of intact red cell concentration

02 p0200 A69-12479

Radial diffusion coefficient for trapped electrons moving across field lines, obtaining time dependent solutions of Fokker-Planck equation

03 p0502 A69-14002

Heterodiffusion of metallic impurities in body centered phases of doped zirconium and titanium, determining diffusion coefficients via radioactive isotopes

04 p0613 A69-14557

Stationary vertical distribution of weightless radioactive substance in surface air layer, accepting two layer exponential law for vertical turbulent diffusion coefficient

04 p0593 A69-15091

Si diffusion rate in single crystal and polycrystalline Mo, using various donor materials

05 p0780 A69-15990

Unique solution for radial diffusion coefficient applicable to equatorially trapped electrons in artificial radiation belt

05 p0816 A69-16279

Graphite ablation in air, N, Ar and He assuming chemical equilibrium, equal diffusion coefficients and steady state ablation

[AIAA PAPER 69-148] 06 p0947 A69-18155

Temperature variability data for 120-km altitude from observations of grenade glow clouds, calculating molecular diffusion coefficients and atmospheric temperature and density

07 p1127 A69-19277

Diffusion coefficients of H atoms in mixtures of He and Ar with hydrogen by catalytic sink technique, discussing rigid sphere collision diameters

07 p1185 A69-19300

Kinetic theory development of equations for multicomponent gaseous mixtures symmetric diffusion coefficients

07 p1186 A69-19395

Diffusion coefficient of interstitial oxygen atoms in tantalum by elastic energy dissipation measurements as temperature function, discussing relaxation effect

07 p1168 A69-19452

Diffusion coefficient, velocity distribution function and velocity averages for gaseous ions moving in strong electric fields, considering ion-gas molecule charge transfer collisions

08 p1355 A69-20209

Loss rate of plasma from stellarator due to binary Coulomb collisions scattering particles in loss region, discussing diffusion coefficients

08 p1364 A69-20520

Self diffusion coefficients measurements for cobalt in nickel-cobalt alloys, using cobalt radioisotope 60

08 p1334 A69-20577

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

09 p1554 A69-21469

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

09 p1555 A69-21470

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

09 p1555 A69-21471

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic analyses, establishing linear equations for temperature dependence

09 p1523 A69-21736

Multicomponent diffusion coefficients of dissociated air as function of pressure, temperature and concentration, based on simplified model of binary diffusion

09 p1623 A69-22098

Plasma diffusion in toroidal stellarator, calculating collisional diffusion and diffusion constants

09 p1552 A69-22294

Solar cosmic rays proton intensity time variations and diffusion coefficient obtained by satellites, balloons and ground stations observations

10 p1755 A69-22812

Diffusion coefficient and cosmic ray motion in solar system, using satellite data of interplanetary magnetic field

10 p1757 A69-22822

Temperature vs compactness relationship in NbC compacts having nonstoichiometric composition and approximately equal specific surface, determining self diffusion coefficients

10 p1711 A69-23337

Diffusion constant of Ni in Ti alloys with Al, Mo and Nb, considering beta phase

11 p1902 A69-24274

Variational calculation of coefficients of viscosity, thermal conductivity, thermal diffusivity and diffusion in binary mixture

11 p1997 A69-24285

Microsectioning technique applied to measurement of diffusion coefficients of Cr 51 in polycrystalline Nb at 1220-1766 K temperature range

11 p1903 A69-24577

Diffusion coefficients of carbon in tantalum, niobium and vanadium by sectioning method, using carbon 14 as tracer

11 p1906 A69-25575

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings

12 p2190 A69-25890

InAs-InP solid solutions diffusion rate and lattice constant for various compositions

12 p2144 A69-26587

Diffusion-stabilized difference schemes for inviscid compressible flow equations in conservation form for arbitrary number of space dimensions

12 p2062 A69-26624

Ions and electrons in ionosphere diffusion tensor components and ambipolar diffusion coefficient expressions derived for nonisothermal plasma

12 p2071 A69-26700

Drift velocity and longitudinal and transverse diffusion coefficient for low energy N ions in N gas in mass spectrometer at room temperature

13 p2302 A69-27458

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

15 p2669 A69-30714

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

15 p2669 A69-30715

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

15 p2669 A69-30716

Thermal diffusion coefficient for fully ionized plasma containing mixture of arbitrary charge ions in topside ionosphere

16 p2775 A69-32084

Turbulent diffusion inside sun as explanation of solar spin-down, Li depletion at surface and neutrino discrepant, discussing diffusion coefficient and stellar evolution

16 p2866 A69-32814

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight

17 p3069 A69-33136

Aluminum oxide relative grain boundary energy and surface diffusion coefficient, considering thermal grooving of bicrystals with symmetrical tilt boundaries

17 p2993 A69-34191

Gaseous diffusion coefficients during argon, krypton, oxygen and nitrogen diffusion into helium measured by gas chromatography

18 p3099 A69-34280

Carbon diffusion parameters in alloys of Nb with Ti, Zr, W and Mo, using radioactive carbon 14

18 p3157 A69-35250

Beryllium diffusion coefficients in Zr and Ti bcc phases, using radioactive beryllium 7 at high temperatures

18 p3157 A69-35251

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

19 p3345 A69-36156

Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momentum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum

19 p3424 A69-36335

Carbide coatings formation on graphite in molten media, determining diffusion coefficient of carbon in molten Zr

20 p3566 A69-37372

Eddy diffusion coefficients due to instabilities in internal gravity waves near mesopause

20 p3534 A69-38090

Radial diffusion coefficient calculation in presence of magnetic shell splitting in magnetosphere

20 p3534 A69-38094

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic

analyses, establishing linear equations for temperature dependence

20 p3564 A69-38214

Diffusion layers and elasticity-dependent interdiffusion coefficients of Ti binary systems, using X rays

21 p3745 A69-38954

Vertical heat exchange flux model using heat conduction equation compensating for tropospheric and stratospheric radiation divergence, calculating diffusion coefficient

22 p3936 A69-40137

Ternary diffusion at high temperature in Fe-Co-Ni alloy system covering entire ternary phase diagram, including computed interdiffusion coefficients

23 p4176 A69-41505

DIFFUSION ELECTRODES

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology

06 p0930 A69-17152

Fuel cell system using double skeleton catalyst gas diffusion electrodes, discussing design, mode of operation and performance

08 p1261 A69-21047

Lateral diffusion gas electrodes for electrochemical generators compared with classical electrodes

16 p2739 A69-32415

DIFFUSION FLAMES

Oxygen addition to fuel stream effect on formation of soot and polycyclic aromatic hydrocarbons in ethane-air and ethylene-air diffusion flames

02 p0205 A69-12318

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber

02 p0353 A69-12324

Chemical reaction scheme effect on hot zone structure of hydrogen-oxygen diffusion flame, considering influence of hydroxyl radical

03 p0531 A69-12895

Unsteady motions of diffusion flame sheet due to perturbations of reactant concentration, approximating species and energy conservation requirements

03 p0532 A69-13014

Combustion in heterogeneous systems, considering diffusion flames and fine droplets dispersed into gaseous oxidizer in fog form

06 p1032 A69-17421

Temperature distribution in low pressure magnesium vapor-oxygen diffusion flames, discussing environmental conditions and visible radiation

[WSCI PAPER 68-20] 07 p1241 A69-18367

Hydrogen diffusion flames stabilization by flame holders in supersonic flow at low stagnation temperature, measuring burning limits

[DVL-815] 09 p1624 A69-22615

Boundary layer equations describing momentum, energy and mass concentration conservation in axisymmetrical turbulent jet flame solved for Lewis number unity in von Mises plane

13 p2379 A69-28455

Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence

13 p2380 A69-28461

Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction

16 p2876 A69-31711

IR spectrometric analysis of flames of composite rocket propellants, maintaining diffusion flames between surfaces of decomposing ammonium perchlorate and fuel source

[WSCI PAPER 69-10] 16 p2831 A69-32350

Deflection effect on flow and mixing process in flames covering enclosed turbulent diffusion flames in combustion chamber

17 p3068 A69-32966

Diffusion flame stability at inlet of fuel stream into oxidizer, showing ignition coordinates dependence on fuel, oxidizer and ratio of burning/flow rate

19 p3448 A69-35855

Temperature measurement in and near opposed-jet diffusion flame subjected to electric field, discussing flame behavior at low mass flow rate

21 p3852 A69-39597

Reaction broadening in hydrogen-oxygen diffusion flame for slow hydrogen dissociation, using matched asymptotic expansions

24 p4408 A69-42920

Three dimensional shadowgraph-like images in single exposure holograms of diffusely illuminated flame explained as time average holographic interferograms

24 p4317 A69-43764

DIFFUSION THEORY

Inelastic collisions effect on electron energy distribution in low temperature diffusion dominated discharges
04 p0637 A69-15047

Helium flux in lower thermosphere, using diffusion theory for multicomponent gas mixture to determine equation for equilibrium distribution
07 p1125 A69-18848

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity
07 p1199 A69-19009

Rays associated Fokker-Planck relation for isotropic turbulence diffusion equation, discussing logarithmic refractive index, moments and path length
08 p1272 A69-20021

Positive column in longitudinal magnetic field in helium and neon, noting agreement with collision diffusion theory and Kadomtsev perturbation theory
08 p1361 A69-20212

Cosmic ray modulation by solar wind, discussing anisotropic diffusion during propagation through interstellar magnetic field
10 p1759 A69-22842

Solar activity and 19 to 24 day variations in cosmic ray intensity
10 p1759 A69-22843

Neon discharge positive column at medium gas pressures, discussing calculated and experimental data concerning diffusion theory to interpret parameters
10 p1740 A69-23723

Chapman-Enskog procedure extension for binary gas mixtures, obtaining diffusion equation from revised relaxation time of component velocities
11 p1921 A69-24308

Beam-plasma dispersion relations, obtaining dispersion equation for plasma waves and dispersion curves for longitudinal waves
11 p1925 A69-24366

Emission and diffusion theories of metal-semiconductor contacts for describing current characteristics of abrupt isotype nGe-nGaAs heterojunction
11 p1938 A69-25115

Transition density function of randomly excited diffusion process and confinement probability at fixed spatial point satisfying integrodifferential equation involving functional derivatives
11 p1860 A69-25451

Pitch angle diffusion of trapped electrons in terrestrial radiation zones, discussing diffusion theory based on Fokker-Planck equation, atmospheric Coulomb scattering mechanism, etc
12 p2150 A69-26746

Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition
13 p2374 A69-27784

Diffusion equation unsteady solution for flasks of equal volumes connected by capillary, considering end effect and transient processes
13 p2251 A69-28561

Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
14 p2510 A69-28936

Elastomeric adhesives diffusion theory, tack increasing methods, cast polymer films, properties and applications in shoe manufacturing and sealants
14 p2468 A69-29341

Cometary tail diffusion model based on luminous particle number decrease with time and particle accelerated motion and diffusion in space
14 p2523 A69-29705

Galactic cosmic rays and Alfvén waves interaction, considering gyration frequency resonance, wave growth, Fokker-Planck equation and diffusion model
15 p2675 A69-30761

Harmonic analysis for computing diffusing matter with periodically varying surface concentration applied to electrical insulants degradation by atmospheric moisture
15 p2592 A69-31057

Spatial and temporal dependence of trapped particle energy spectra on basis of bimodal diffusion
16 p2852 A69-32619

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events
17 p3015 A69-32822

Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations
17 p3030 A69-33059

Polarization effect on diffusion equations of radiative transfer, noting anisotropy in Rayleigh scattering
21 p3847 A69-38473

Monochromatic radiation diffusion in one dimensional bounded medium, deriving equations for probability density of quantum yield and intensity of light fluxes
21 p3769 A69-38586

Wiener-Hermite truncated stochastic expansion used for velocity and concentration fields in turbulent flow convecting passive scalar, determining diffusivity and spectrum function
24 p4302 A69-43359

DIFFUSION WAVES

Cosmological implications of diffuse X ray background, noting Compton black body process effect on isotropic cosmic X rays
09 p1578 A69-22152

DIFFUSION WELDING

Diffusion welding of AMS 4921 titanium, discussing premature pressure removal before completion of first joining stage
01 p0086 A69-10535

Diffusion bonding and forming of large and complex Ti structures, noting advantages in freedom of design and in economy
04 p0604 A69-14525

[ASM PAPER C7-2.3]

Diffusion bonding of whisker reinforced aluminum in closed steel die in argon atmosphere
06 p0943 A69-17238

Microstructure of diffusion zone during contact fusion in magnesium-nickel system at high temperatures
06 p0945 A69-17895

Titanium alloy interaction porosity with fillers during diffusion brazing, discussing joint strength as function of time, temperature and pressure
06 p0945 A69-17896

Doped silicon dioxide films as controlled reproducible diffusion sources for silicon devices fabrication
07 p1198 A69-18620

Roll diffusion bonding technique for permitting complex design of coldplates and radiators of spacecraft electronic equipment
09 p1504 A69-22066

Diffusion bonding parameters for producing hollow Ti-Al compressor blades, discussing surface preparation, postbond heat treatment quality control and mechanical properties
09 p1513 A69-22484

[ASME PAPER 69-GT-46]

Fusion and solid state welding of steels, considering electron beam, HF resistance, friction and explosive welding
12 p2100 A69-25830

Diffusion bonded Ti honeycomb sandwich, demonstrating structural integrity, efficiency, low weight and cost effectiveness
12 p2115 A69-26828

Diffusion bonding as solid state metal joining process for nuclear and aerospace hardware, discussing tooling and nondestructive tests
14 p2454 A69-28840

[ASME PAPER 69-DE-7]

Diffusion bonding for leaktight joints in connectors using intermediate metal system of Au-Cu-Au
15 p2617 A69-30100

Diffusion bonding of metals, discussing interface joining processes and application to fluoric devices, jet engine servovalves and porous woven structures
17 p2978 A69-33374

Diffusion bonded Ti honeycomb sandwich, discussing production, structural efficiency, high strength/weight ratio, etc
19 p3320 A69-35558

Tensile and stress rupture strengths of diffusion bonded Ni superalloys, using spin tests of simulated hollow turbine disks
19 p3320 A69-35559

Soviet book on diffusion welding in vacuum covering ferrous metals, homogeneous nonferrous metals, equipment, cermets, etc
19 p3329 A69-36748

Diffusion bonding of Al and boron filament layers into continuous structural material, studying process variables including heat treatment and cross rolling effects
20 p3564 A69-38197

[AIME PAPER S69-6]

Diffusion welding and soldering of metallic wire with graphite and graphitized viscose applied to chromel, copel, chromel-alumel, Mo, W and W-Re
21 p3728 A69-38617

Joints structure, phase and chemical composition in kinetics of titanium diffusion brazing with copper
22 p3958 A69-41203

Room temperature tensile tests determining failure modes and defect influence on diffusion welds of unalloyed Ti, using electron microscopy and fractography
24 p4331 A69-42939

Metallurgical and structural production of diffusion bonded titanium honeycomb sandwich panels for aerospace hardware weight saving
24 p4324 A69-43434

DIFFUSIVITY

Turbulent fluid transport properties predicted by simple model for fluid behavior, obtaining mass, momentum and energy diffusivities
01 p0177 A69-11402

Heat of solution and diffusivity of nitrogen in molybdenum analyzed by quenching technique and resistivity measurements at liquid helium temperature
02 p0267 A69-12188

Composition dependence of carbon activity and carbon diffusivity in austenite
13 p2279 A69-27763

DIFLUORIDES

U CALCIUM FLUORIDES

DIFLUORO COMPOUNDS

U POLYTETRAFLUOROETHYLENE

DIGESTING

Scenedesmus algae cell wall structure degrading to increase digestibility of cell bound protein, describing mechanical, enzymatic and chemical methods
21 p3667 A69-39701

DIGESTIVE SYSTEM

NT ESOPHAGUS
NT GASTROINTESTINAL SYSTEM
NT INTESTINES
NT RECTUM
NT STOMACH

Anoxia effect on succinic dehydrogenase and lactic dehydrogenase activities in digestive glands and organs sensitive to oxygen tension changes
22 p3887 A69-41193

DIGITAL COMMAND SYSTEMS

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System
16 p2759 A69-31856

Digital autopilots for Apollo CSM and CSM/LM vehicles thrust vector control, describing modifications of onboard computers and programs
21 p3762 A69-39377

DIGITAL COMMUNICATION

U PULSE COMMUNICATION

DIGITAL COMPUTERS

NT IBM 360 COMPUTER
NT SEQUENTIAL COMPUTERS

Digital computer system for storing, processing and displaying TV pictures
01 p0077 A69-10024

Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects
01 p0050 A69-10208

Numerical digital computer determination of ultra subharmonic response for Duffing equation
01 p0104 A69-10235

Numerical evaluation of curvilinear integrals and areas, using digital computer
01 p0106 A69-10867

Hybrid computers, discussing analog and digital devices combination and distinction between use of computer for general purpose computation and control purposes
02 p0212 A69-11997

Proper digital filters devoid of transient response analyzed as extension of time invariant filters
02 p0213 A69-12815

Multipulse propagation communications system /MMPCS/ utilizing digital computer to implement intermittent system
03 p0389 A69-13191

Digital computer systems design optimization based on operational experience in development of Saturn S-1C stage Automatic Test and Checkout System
03 p0400 A69-13233

Interferometer at lambda 21 cm using fully steerable paraboloids for processing output signal with on-line digital computer
03 p0411 A69-13468

Nonlinear aerodynamic problems of plane and asymmetric flows solved by digital computer, using modified Monte Carlo method
03 p0364 A69-13921

Digital electronic computer technique for control of aircraft power plant, describing self adaptive control
03 p0496 A69-14091

Aerospace digital computer design, discussing influence of data trends and reliability techniques
03 p0401 A69-14181

Collection of papers on engineering applications of digital computers, examining programming, numerical methods and design and simulation problems
04 p0563 A69-14514

Computer systems definition, terminology and functional description, discussing engineering problems, flow charts, programming and techniques
04 p0563 A69-14515

Digital computers for global atmospheric circulation, describing circulation models and computer produced color movies utilization
04 p0628 A69-15363

Digital radar systems, discussing control computers, beam steering computers, signal processors, mode control, displays and chirp networks
05 p0718 A69-15748

Digital signal processing in radar, sonar and communication
05 p0718 A69-15749

Multimode digital radar control paths and operating communication, discussing radar data, triggers, real time data and error localization
05 p0718 A69-15750

Digitally controlled flight systems simulators, noting design improvements over conventional trainers
05 p0742 A69-15884

Digital computer interface systems design for simulation, control, instrumentation and data processing, discussing hybrid computer linkages
05 p0723 A69-16195

Computer use evaluation, discussing standards for automatic data processing [ADP/ investment and operations
05 p0850 A69-16299

Flight test data reduction on time sharing general purpose computer, noting hardware link between airborne equipment and computer
05 p0726 A69-16758

On-line analysis with digital computer, noting system designed for vibration and random vibration analysis
05 p0726 A69-16761

Computer oriented telemetry data processing systems designed to condition raw telemetry data for further processing by other systems
05 p0727 A69-16770

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems
06 p0924 A69-17164

Digital computer optimization of representation of sampled data signals on orthogonal basis, using iterative method
06 p0901 A69-17363

Book on FORTRAN computer programming language
06 p0891 A69-17364

Digital computer motion pictures generation for ground controlled intercept simulation
06 p0906 A69-17397

Digital computer circuit design book covering requirements of circuit for digital logic and memory functions and physical properties of components
06 p0892 A69-17869

Onboard digital computer evaluation of trigonometric functions for antenna pointing
07 p1089 A69-19745

Complex digital computers designed for Apollo spacecraft missions, discussing construction techniques [AGARDOGRAPH-114]
08 p1279 A69-20990

Airborne digital computers for optimization of aircraft control and monitoring functions, discussing avionics and circuit technology
08 p1349 A69-21194

OMNITRAC general purpose airborne digital computer with permanent memory of 4096 words of 23 bits, noting modular construction
10 p1659 A69-22845

Conformal mapping of regions with corners and large curvatures of boundary curves onto unit circle with digital computer, considering airfoil
10 p1724 A69-22880

Analog to digital conversion for data sampling systems including scanning, distributors, multiplexing, automatic ranging, noise reduction and data storage techniques
10 p1660 A69-23232

Computer controlled data acquisition and control system /DACS/ for wind tunnel applications, describing system and programs
10 p1673 A69-23286

Instabilities of numerical integration of ordinary differential equations on digital computer, considering difference approximation containing extraneous solutions
10 p1721 A69-24042

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment
11 p1834 A69-24544

Dynamic behavior of nonlinear continuous multivariable systems represented by equations derived from block diagram, stressing digital computer properties
12 p2049 A69-26081

Automatic plotting devices for graphic readouts in analog and digital computers
12 p2091 A69-26303

Digital differential analyzer as control element, analyzing performance limitations imposed by scaling constraints with canonical realization of transfer functions
12 p2053 A69-26509

Digital computer redundancy, analyzing triple modular redundancy in Saturn vehicles and quad design in primary processor and data storage for OAO
12 p2034 A69-26567

Self adjusting digital computer method for two dimensional gravitational anomalies
12 p2076 A69-27088

Man machine interactive structural analysis using digital computer with CRT display, detailing design
12 p2035 A69-27098

Designs and capabilities of digital processing systems for automatic air traffic control radar information stressing future use of display for computerized control
13 p2295 A69-27332

Microwave measurement methods, discussing uses of digital computers and sampling techniques
13 p2223 A69-28605

Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects
14 p2424 A69-28744

Largest scalar product of class and identification codes in diagnostic problems, discussing recognition
14 p2417 A69-29144

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Vibration/acoustics environmental testing, discussing advantages of digital computer control system and digital noise generation techniques
15 p2586 A69-30387

Time delay errors compensation methods in analog-digital computation loops, finding digital scheme inferior to analog
15 p2572 A69-30618

Automatic meteorological radar data processing system incorporating MRL-1 radar and low speed digital computer
16 p2791 A69-32279

Computer programs for space engineering analytical and scientific computation using digital computers
16 p2756 A69-32555

Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations
17 p2912 A69-32941

On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
17 p2932 A69-33106

Astronomical satellite direct digital attitude control using digital computer between sensor and actuator to achieve optimal filtering and stabilization
17 p3049 A69-33244

Digital computer for aircraft engine control covering in-flight health monitoring, automatic flight checkout, diagnostic failure routines, etc
17 p3022 A69-33603

Electronic computers for avionics system design in terms of technology, performance and cost, discussing reliability prediction and failure rate data
17 p2976 A69-34058

TC-2 general purpose digital avionics computer in A-7D/E avionics system performing tasks in weapon delivery, navigation and guidance, display updating, self testing, etc
17 p2933 A69-34059

AN/ASN-24/V/ general purpose digital computer deployed in large worldwide jet transport fleet
17 p2933 A69-34061

Patch panel programmed DDA computer having MHz iteration rate and 35 bit usable word length, discussing system design and demonstration model
17 p2934 A69-34073

Solid state single unit digital control computer performing stability augmentation, pilot relief functions and generating minimum fuel flight paths for VTOL landing
17 p2934 A69-34075

General purpose /GP/, differential digital analyzer /DDA/ and CORDIC /coordinate rotation digital computer/ computers for navigation system computations
17 p3003 A69-34100

Airborne digital computers techniques in avionics stressing memory design, packaging, reliability and maintainability
18 p3106 A69-34846

PDP8 digital computer and Trebel vertical balancing machine combined for real time presentation of trim weights and positions, noting noise in force components
18 p3220 A69-34888

Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat/Fort Worth [AIAA PAPER 69-811]
19 p3289 A69-35629

Takeoff and landing analysis digital computer program /TOLA/ developed by Air Force Flight Dynamics Laboratory for quantitative performance analysis [AIAA PAPER 69-810]
19 p3289 A69-35630

Precompression automatic wild point rejection from sampled telemetry data for data compressors evaluated by digital computer simulation
19 p3273 A69-36263

Stored program data processor used as PCM telemetry data acquisition system for postApollo applications, considering format and bit rate changes
19 p3274 A69-36280

Space environmental simulation facilities, discussing digital computers and equipment for simulating oxygen atmosphere, vacuum, heating and cooling, etc
19 p3295 A69-36326

Digital computers standard programs for astronomical problems
20 p3596 A69-37317

Binary increment and residual class notation techniques for onboard spacecraft computer arithmetic
20 p3499 A69-37378

Failure test algorithm for sequential units with delay lines of control digital computers, detecting replacement of output terminals by sensitive paths
20 p3502 A69-37394

Integrated logic circuits assembly for digital computers, considering high density, mechanical environment, reliability, accessibility and costs
20 p3505 A69-37401

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices
21 p3724 A69-39100

Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration
21 p3856 A69-39133

CRT graphic display/plotter for small digital computers, describing device operation, control and applications
21 p3679 A69-39608

Centaur computer assimilating Centaur vehicle hardware functions performed by digital computer, discussing modules, flight control system, cost reduction, etc [AIAA PAPER 69-943]
22 p3904 A69-40326

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequences [AIAA PAPER 69-946]
22 p3974 A69-40329

SIMUPOL /Simulation Procedure Oriented Language/ system for hardware description and architecture and interface requirements of digital processor [AIAA PAPER 69-960]
22 p3905 A69-40341

Software support package for aerospace digital computer emulation, consisting of symbolic assembly program and interpretive simulator program and subprogram [AIAA PAPER 69-974]
22 p3907 A69-40354

Digital computer system for navigation, landing, fire control, monitoring and checkout aboard Saab 37 Viggen aircraft handling attack, reconnaissance and fighter missions [AIAA PAPER 69-985]
22 p3908 A69-40365

Hybrid and monolithic integrated microcircuits application to electronic digital computer structures
24 p4284 A69-42907

DIGITAL DATA

Satellite digital video data analyzed by two dimensional digital computer technique, discussing biomedical applications

02 p0213 A69-12155

Multichannel digital data compression simulation, discussing algorithms, buffer queue control, identification coding and system performance measurements

02 p0213 A69-12814

Ground based control system via cockpit PPI display on transponder equipped aircraft broadcast with digital coding

03 p0464 A69-13244

Fast Fourier-Hadamard transform for digitized signal representation, classification, discrimination and efficiency

03 p0392 A69-13249

Delay line bandwidth reduction for video or digital information, noting radar tracking application

03 p0392 A69-13251

Optimum gain control for diversity receivers used for radar and digital data transmission through fading media

03 p0410 A69-13833

Digital communications between aircraft and flow control computers on ground to avoid runway saturation and automating routing functions

05 p0721 A69-16722

Block coding systems performance in digital PCM data transmission through N-ary discrete channels in white Gaussian noise presence, discussing SNR upper bounds

07 p1080 A69-19096

Data transition tracking in digital communication systems by decision directed phase tracking loops

07 p1082 A69-19108

Asynchronous on-line digital data acquisition system with immediate access to on-site numerical real time printout for rocket engine performance tests [AIAA PAPER 69-323]

09 p1478 A69-22381

Computer simulation of unbiased digital recording composed of sequential computations intended for various bit densities [IEEE PAPER 3.3]

09 p1461 A69-22562

Digital sampled data spectra conditioning, deriving linear functions for low pass, bandpass and band rejection numerical filters and spectrum shaping

10 p1654 A69-23292

Error correction of digital data with cyclic codes and probability function set extended to Bose-Chaudhuri-Hocquenghem codes and P super M codes

10 p1655 A69-23529

Tandem interleaved cyclic codes for digital HF communication with improved error rate at reduced decay time

10 p1655 A69-23530

Digital data transmission techniques and complex instrumentation systems design noting control, identification, synchronism and error reduction

11 p1834 A69-24545

Angle-to-code converter designed on basis of quantum magnetometers frequency sensors, transforming vector sum of bias magnetic fields into pulse repetition rates

12 p2016 A69-25963

Fast folding algorithm for detection and correlation of digital data with weak noisy pulse trains of differing periods

14 p2416 A69-29548

Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming

15 p2582 A69-30601

Alphanumeric listing and digital data x-y plotting by high speed printer, describing equipment modifications and control software

17 p2932 A69-33108

Taylor series expansion used in correcting quantized digital coefficient errors in hybrid feedback control system

18 p3111 A69-34687

Digitized video cloud picture data from ESSA satellite, discussing mesoscale archive and computer products including time averages and composites

19 p3279 A69-35810

Digital data transmission by pulse code modulation considered for minimum mean square error

19 p3274 A69-36282

Numerical and analog data acquisition system /CARINA/ for processing rocket, balloon and satellite data, describing distributor characteristics, control console, etc

20 p3511 A69-37914

Noiseless feedback schemes for digital and analog transmission over additive white Gaussian noise channels

21 p3671 A69-38405

Digital data analysis systems role in experimentation and R and D

21 p3843 A69-39315

Real time FM-to-digital converter for measuring periods of demodulated FM/FM data, discussing systems design

22 p3903 A69-39923

Digital data transition tracking loop mean square phase noise computed as function of input SNR by Fokker-Planck technique

23 p4130 A69-42514

Analog feedback system for digital data transmission, describing feedback channel, error rate and SNR effects

24 p4289 A69-42977

DIGITAL FILTERS

Signal to noise ratio requirements for sharp cut-off biphasic digital communication channel

13 p2221 A69-27959

Optimum nonlinear digital filter synthesis for smoothing, predicting and differentiating measured quantity having uniform probability distribution over finite number of discrete values

14 p2426 A69-29421

Digital notch filters synthesis based on bilinear transformation method

15 p2575 A69-30182

FORTAN program for calculation of magnitude and phase of digital filter transfer functions and power spectra of periodic waveforms

15 p2567 A69-30612

Probability density functions of waveforms from summation of digits in n-stage shift register generating m-sequence

15 p2568 A69-30617

Stepped digital narrow band bandpass microwave elliptic function filters design and construction

16 p2759 A69-31939

Book on linear digital filtering and discrete spectrum analysis, emphasizing frequency domain description of signals and systems

20 p3487 A69-37146

Spacecraft onboard processor for digital filtration and data compression, discussing prototype design, construction, sample memory, weight memory, arithmetic unit and programmer

20 p3500 A69-37383

Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter

21 p3676 A69-39450

DIGITAL INTEGRATORS

Steady state digital-analog integrator for solving nonlinear heat conduction type equations

21 p3680 A69-39852

DIGITAL NAVIGATION

PDM command coder meeting NASA Tone Digital Command Standard for German central ground station

16 p2755 A69-31859

Airborne digital computer and display devices role in navigation management, discussing data processing and hybrid navigation systems

16 p2809 A69-32260

Onboard navigation digital computer simulation to verify calculation principle and logic units during design and construction

20 p3502 A69-37398

DIGITAL SIMULATION

Digital phase locked loops synthesis for fading and sequential phase estimation in decoder using digital computation

03 p0388 A69-13178

Radar or ECM/ECCM system simulation by digital computer, using signal and jamming spectral inputs

03 p0400 A69-13200

Digital simulation of demodulator/tracking phase locked loop of navigation/traffic control satellite system in thermal noise diffuse multipath fading environment

03 p0390 A69-13204

Digital simulation based on guided missile experience, discussing numerical methods for ordinary differential equations, literature, choice of method and simulation languages

03 p0401 A69-13763

Continuous dynamic systems digital simulation, noting run-time program determined by numerical integration structure

04 p0565 A69-15339

SALEM programming system developed for digital simulation of systems described by partial differential equations

04 p0565 A69-15340

System/360 Continuous Modeling Program, detailing input language, user-defined functions and documentation

05 p0723 A69-16196

Digital simulation of vehicle motion and control for six degree of freedom simulations of Gemini reentry and aircraft, missile control, etc

05 p0725 A69-16477

Digital simulation design for linear dynamic systems, noting role of digital transfer function

06 p0906 A69-17491

Control systems digital simulation based on coupling of prediction correction procedure with integration and differentiation procedure, discussing simulation errors

08 p1296 A69-20110

Multistep integration formulas treated as transfer system to examine properties in frequency domain for selection in digital simulation programs

09 p1460 A69-21417

Digital computer simulation as maintainability design and prediction tools, discussing fault localization in complex electronics systems

10 p1668 A69-22974

Monte Carlo digital computer simulations, considering sample sizes and confidence intervals in multinomial output

10 p1661 A69-23853

Integration routines performance used in dynamic systems simulation by digital programs, comparing speed, accuracy and convenience

10 p1661 A69-23854

Rigid body rotational simultaneous equations of motion transformed into explicit form for digital simulation

10 p1661 A69-23855

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise

11 p1839 A69-25298

Space vehicle docking dynamics and matrix equations of motion amenable to numerical solution on digital computer, using Hamilton principle and Lagrange multipliers

11 p1967 A69-25501

Digital program containing Eulerian formalism for multiple interconnected rigid members applied to gravity gradient stabilized satellite with flexible booms

11 p1989 A69-25502

Digital computer simulation of multidimensional stationary or nonstationary Gauss-Markov random processes with specified autocorrelation function, discussing time step choice

12 p2122 A69-26523

Computer simulation program for design and evaluation of digital Doppler processor, analyzing performance limitation due to quantization and white noise

12 p2035 A69-27096

Digital simulation for radio systems nonlinear elements, outlining procedures to obtain algorithms

15 p2582 A69-30111

Digital simulation optimizing parameters of digital equipment to measure target azimuths in pulsed surveillance radar system, establishing optimum echo pulse quantization threshold

15 p2563 A69-30138

Digital computerized analysis and characteristics of variable stability aircraft, examining digital control system

15 p2549 A69-30229

Digital simulation of transient solar still processes, using finite difference approach for heat flow to and from soil

16 p2765 A69-31816

Digital simulation computer stability analysis scheme premised on use of perturbed transient responses

17 p2944 A69-32899

Digital simulation of biological model for visual images classification derived from human visual system aspects

17 p2911 A69-34094

Saturn 5 system simulation showing feasibility, efficiency and economy of real time simulation using large mathematical model and general purpose digital computer

18 p3113 A69-34268

Cerebral circulation arterial system pulsatile flow flexible vessel digital simulation models distribution

19 p3264 A69-36867

Linearized wave propagation digital simulation models to predict arterial blood flow characteristics and impedance, comparing phase velocity and transmission per wavelength

19 p3264 A69-36868

Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model

21 p3662 A69-38388

Arrhythmia diagnosis instruction aided by cardiac pacemaker digital simulation, discussing clinical electrocardiograms generation mechanisms

21 p3667 A69-39606

SIMUPOL /Simulation Procedure Oriented Language/ system for hardware description and architecture and interface requirements of digital processor [AIAA PAPER 69-960]

22 p3905 A69-40341

Flight training using digital simulators, including maneuver analysis for TWA 707 program

22 p3928 A69-41137

Digital simulation of oxygen pressure fields and supply conditions in biological tissues

23 p4097 A69-42098

DIGITAL SYSTEMS

Integrated circuit digital filters design characterized by weight coefficients containing Lanczos factor for application to processing of signal transmitted from space vehicles

01 p0038 A69-10071

Hybrid digital transmission systems, discussing joint optimization of analog and digital repeaters and information rate of coaxial cable systems

01 p0027 A69-10248

Regenerative digital transmission system error, representing memory of binary regenerative channel with Markov model

01 p0027 A69-10249

Quantizing noise effect on reconstructed analog signal at reception terminal of digital data transmission system

01 p0027 A69-10250

Fluidic system controlling inlet guide vanes to high pressure compressor of two spool jet engine, using digital elements to drive hydraulic servosystem

02 p0305 A69-12090

Optimum control of fourth order digital control system

03 p0408 A69-12916

Generalized digital low pass filter synthesis by recursion technique, noting coefficient sensitivity simplification

03 p0403 A69-13227

Digital data processing equipment for space flight PCM telemetry

03 p0393 A69-13290

Digital processing of Doppler radar signals using matched filter concept

03 p0393 A69-13291

Noise susceptibility of integrated circuits in digital systems, discussing sources and specifications

03 p0410 A69-13579

CASSANDRE programming language for digital systems, noting application to logic systems

03 p0401 A69-14179

Granularity of beam positions in digital phased arrays based on method of moments and phase distribution

04 p0570 A69-14306

Miniaturized adding sample and hold device with adjustable delay applied to digital filters

04 p0574 A69-14350

Instrument and rounding-off errors of aircraft computers as function of digital network dimensions

04 p0563 A69-14491

High speed modular multiplier and digital filter for LSI development

04 p0567 A69-15354

Digital nth order phase locked loop for FM demodulation

04 p0561 A69-15452

Digital filter design with complex coefficients for analytic signals and complex envelopes

04 p0579 A69-15460

Digital filter transfer functions design by sampled data transformation, noting role of analog filters

04 p0584 A69-15461

Special purpose computer for implementing programmable digital filter used in sampled data control systems

04 p0569 A69-15462

Digital filters for moving target indicator radars compared with analog filter systems

04 p0580 A69-15463

Bit reduction in digital transfer functions with LF poles in sampled data systems using zero order hold function

04 p0584 A69-15464

Fluid amplifiers, discussing digital and proportional jet-interaction devices and circuits

05 p0704 A69-16004

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection [IEEE PAPER R-2]

05 p0775 A69-16326

Digital controller weighting function sectionalization to simplify logic in developing adaptive control system

05 p0739 A69-16386

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes

06 p0904 A69-17865

Sequence pulse stuffing technique for rate equalization of digital channels, discussing coding effect and capacity for word signaling

07 p1080 A69-19094

Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver

07 p1082 A69-19109

Design and construction of linear digital filters for signal processing, discussing digital filtering of various signals for space research

08 p1297 A69-20303

Fluidics in UK, discussing digital control elements and systems and transmission lines in alternating flow hydraulics

[AGARDOGRAPH-118]

08 p1257 A69-20952

Power spectrum of nonstationary processes with periodicity in two dimensional autocorrelation function based on Fourier transform

09 p1455 A69-21847

Common mode rejection technique to determine phasing differences in digital systems by measuring pulse delay

09 p1463 A69-21896

Joint filter optimization in combination analog-digital hybrid multilevel transmission system

09 p1457 A69-22465

Minimum error probability and optimal system regime relationship to noise rejection in memoryless communication investigated for limited repeated transmissions

09 p1459 A69-22639

Probability analysis of distortions caused by pulse noise action on digital information

09 p1476 A69-22678

Test stand final control element for fluid flow application, noting analog control valve with digital to analog conversion and digital actuator

10 p1671 A69-23259

Wall attachment phenomenon /Coanda effect/ basis for jet elements in digital and/or pulse-mode systems

10 p1638 A69-23553

Large scale integrated circuit accumulator chip as control element for design of digital system by design automated techniques

12 p2037 A69-25942

Digital logic techniques for high speed satellite communications, noting general purpose logic cards

12 p2040 A69-26465

Error due to amplitude quantization and design of digital control systems in discrete time optimum control theory

12 p2053 A69-26507

Ferrite core storages characteristics with rectangular hysteresis loop for digital control units, discussing optimal selection method

14 p2418 A69-29145

Limiting incoherent or coherent interference signals at frequency of biphasic or quadriphase digital signal

14 p2413 A69-29483

Bayesian theory to determine maximum a posteriori estimation algorithms for optimum bit synchronization in digital communication systems

14 p2413 A69-29496

Digital receiver of radar signals for performing binary quantization of input data with subsequent processing by digital computer

15 p2563 A69-30136

Digital simulation optimizing parameters of digital equipment to measure target azimuths in pulsed surveillance radar system, establishing optimum echo pulse quantization threshold

15 p2563 A69-30138

Disturbances simulation in instrumentation utilizing digital integrated circuits for reliability computation in complex circuits

15 p2628 A69-30848

Dispersion characteristics of open interdigital line structure by treating structure as radiator, applying linear antenna theory

16 p2748 A69-31580

Equipment- and program-type methods for solving automatic digital control systems synthesis problems, evaluating efficiency based on accuracy

17 p2933 A69-33120

Pulsed control systems sensitivity relationship to discreteness period described via differential equations

17 p2994 A69-33143

Digital IC radiosonde system, discussing sampling, pulse width modulation, time multiplexing, follow-on subsystems, etc

17 p2937 A69-33675

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error incremental covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc

17 p2944 A69-33742

Digital data acquisition system with ultrahigh sampling rate for Ames electric arc shock tunnel, describing analog to digital conversion, data storage, system performance, etc

19 p3293 A69-35744

High speed analog to digital multiple channel wide-band data acquisition system designed for short pulse Doppler radar and probe measurements

19 p3307 A69-35745

Digital data compression system transmission error statistical analysis, emphasizing addressing schemes effect on compression ratio

19 p3272 A69-36261

Optimal structural parameters of radar digital ranging servosystems derived from reproduction error, including computer simulation data

19 p3278 A69-36593

Digital frequency synthesizer design parameter selection, giving expressions for output frequency and division coefficient variations

19 p3284 A69-36594

Gunn effect applied to digital electronics, discussing diode characteristics, microwave amplifier design, pattern recognition, analog- numerical conversion, etc

19 p3285 A69-36708

Book on digital magnetic logic, considering digital magnetic core circuits consisting of magnetic components and interconnecting conductors

20 p3498 A69-37144

Double binary PSK system digital computer simulation for satellite communications, investigating filter and limiting effects on performance in error probability terms

20 p3492 A69-37705

Eye chart determination and layout for digital transmission system by computer simulation

21 p3678 A69-38776

Digital data analysis systems role in experimentation and R and D

21 p3843 A69-39315

Titan 3C launch vehicle digital flight control system using flight equations time-shared with guidance equations

21 p3824 A69-39404

Parse-implement approach to digital systems design, combining systems level /conceptual/ and engineering environmental level /physical/ viewpoints

21 p3680 A69-39663

Programmable digital compensator for single high performance control loop servomechanisms

21 p3688 A69-39704

Digital systems for acoustical or vibrational measurements reception and evaluation

22 p3945 A69-40168

Digital data systems fault detection and isolation, describing diagnostic programs and hardware [AIAA PAPER 69-967]

22 p3906 A69-40348

Booster digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device

22 p3978 A69-40368

Aircraft digital control hardware and applications including airborne computer proper, distributed systems, loop control, system integrity, etc [RAES PAPER 4]

22 p3908 A69-40485

Integrated adaptive data transmission system accepting analog inputs through information compressing sampler or digital inputs by sampling

23 p4121 A69-41760

Multiple access discrete address system /MADA/ for digital modulation communication systems for satellite networks, using time division techniques

23 p4130 A69-42512

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method

23 p4130 A69-42513

Coefficient quantization in digital continuous time process controllers, applying results to nominal transfer function approximation

24 p4292 A69-43283

Tristable fluid amplifiers, analyzing J functions of staticized variable, ternary logical characteristics, input equations, flow stability and switching measurements

24 p4255 A69-43298

Correction coefficients for time response of hybrid control systems with digital feedback elements containing quantized coefficients

24 p4293 A69-43302

DIGITAL TECHNIQUES

Digital matched filtering technique for RF interferometer employing carrier modulated by pseudo-noise sequence, discussing applications to antenna arrays

01 p0048 A69-11003

Moving window analysis digital technique for complex seismic surface waves in presence of noise and multimode propagation

02 p0243 A69-12006

Digital detection of angle modulated signals including zero crossing detectors, digital phase locked loops, differentiation and arcsine demodulator

03 p0391 A69-13230

Digital electronic computer technique for control of aircraft power plant, describing self adaptive control

03 p0496 A69-14091

Fourier coding method for coding images for digital transmission, achieving bandwidth reduction for televised images

04 p0556 A69-14429

Continuous dynamic systems digital simulation, noting run-time program determined by numerical integration structure

04 p0565 A69-15339

Hybrid executive development based on digitally oriented software, explaining assembly language routing

04 p0567 A69-15351

Radar echoes signal amplitude and phase digital recording with Radicord /radar digitizing and recording device

05 p0721 A69-16618

Statistical analysis of Radicord /radar digitizing and recording / clutter and signal spectra and moving target detection by pulse radar

05 p0721 A69-16619

Radar signal matched filters synthesis using linear digital filters and digital correlators noting role in radar detection

05 p0722 A69-16733

Digital adaptive recording system /DARS/ 12 channel flight recorder

05 p0766 A69-16754

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra

05 p0722 A69-16762

Book on FORTRAN computer programming language

06 p0891 A69-17364

Digital FM techniques, signal spectral properties, discrimination detection, phenomenological model, etc

07 p1081 A69-19105

High speed sampling for dynamic data analysis, considering random and transient vibrations

07 p1232 A69-19139

Radome performance dependence on dielectric permittivity determined by digital program and simple design criterion

07 p1110 A69-19519

Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods

08 p1272 A69-19959

Digital method for quantitative study of carrier circulation phenomena in semiconductors, noting Algol program and continuously polarized p-n junction

08 p1280 A69-19973

Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods

08 p1276 A69-20591

Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers

08 p1276 A69-20592

Digital information transmission error characteristics determining error distribution over time and relation to distribution function of intervals between errors

09 p1454 A69-21795

Microelectronics for digital adaptive controls, discussing digital filter design and chips required in fabrication

09 p1474 A69-22453

Digital signal tracking module operation and stability, considering use of interconnecting modules to achieve adaptive tracking

09 p1459 A69-22477

Digital reconstruction of images from optical holograms for acoustical data, discussing image degradations

10 p1695 A69-23547

Digital design techniques for electronic equipment including measuring instruments, generators, synthesizers, etc

10 p1664 A69-23796

Digitally controlled formant /spectral maximum/ generator for terminal analog speech synthesizer

11 p1852 A69-25292

Digital logic techniques for high speed satellite communications, noting general purpose logic cards

12 p2040 A69-26465

Digital computer methods for weak pulsars search using radio noise picked by telescopes

12 p2172 A69-27169

Error analysis involved in calculating tangent functions defined by nonlinear differential equation solution, using digital differential analyzer

13 p2225 A69-27968

Algorithm for optimal digital processing of pulse signals during multilevel quantization in Markov noise, including error analysis

15 p2571 A69-30126

Digital computerized analysis and characteristics of variable stability aircraft, examining digital control system

15 p2549 A69-30229

Vibration/acoustics environmental testing, discussing advantages of digital computer control system and digital noise generation techniques

15 p2586 A69-30387

Vibration/acoustics digitally controlled environmental testing, describing configuration and operation of control system and statistical requirements for noise generation

15 p2587 A69-30388

Vibration/acoustics digitally controlled environmental testing, describing random test signal generation and random vibration tests

15 p2587 A69-30389

Hybrid coupled low power digital microwave phase shifters design, discussing lumped element L-C and variable C shifter theories, power limitations and construction techniques

15 p2580 A69-31076

Counter for decimal counting and numeric display applications using integrated fluid logic elements

15 p2616 A69-31295

Optimizing control system design using fluidic digital circuitry and FM type transducers

15 p2583 A69-31296

Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters

16 p2784 A69-32576

Seismic surface wave observations analyzed by applying moving window method to orthogonal detector recordings permitting lateral refraction measurement, wave separation, etc

16 p2784 A69-32577

Airborne digital computers techniques in avionics stressing memory design, packaging, reliability and maintainability

18 p3106 A69-34846

Book on digital electronics for scientists covering digital circuits and instruments for measurement, control or computation

18 p3112 A69-34915

Book on linear digital filtering and discrete spectrum analysis, emphasizing frequency domain description of signals and systems

20 p3487 A69-37146

Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages

[AIAA PAPER 69-873] 21 p3763 A69-39399

Temperature program generation for test chambers, describing temperature programmers and readout, verification and recording systems

22 p3954 A69-40038

Digital processing of rocket-borne mass spectrometers for measurements in upper atmosphere, discussing calibration

22 p3904 A69-40232

Digital signal processing electronic device for linearizing signals from sensors with nonlinear frequency output by modifying time signal frequency

22 p3915 A69-40935

Digital telemetry link coding as English language analogy, developing block code scheme combining bit, word and block error detection and correction methods

23 p4119 A69-41745

Digital analysis of surface wave observations discussing moving window, multiple filter, multicomponent recording, time variable filtration and cross correlation techniques

23 p4157 A69-42018

Digital analysis of nonlinear control systems dynamic stability under small perturbations, using linearized differential equations

24 p4285 A69-42984

On-board digital filtering applied to spectral estimation and data compression, discussing theory, techniques, computerized implementation and prototype design

[AIAA PAPER 69-969] 24 p4285 A69-43510

DIGITAL TO ANALOG CONVERTERS

Pneumatic analog to digital and digital to analog converters, noting diaphragm force balance capsules, converters using stepping motors and factors affecting accuracy

[ASME PAPER 68-WA/AUT-16] 05 p0706 A69-16176

MSI 12 bit digital to analog converter in integrated circuit form using MOS switching circuit

[AIAA PAPER 69-968] 22 p3906 A69-40349

DIGITAL TRANSDUCERS

Phantom disk encoder for arc second digital position transducers

05 p0766 A69-16748

Production method for fabricating HF surface wave interdigital electrode transducers, discussing pattern replication, etching, etc

14 p2455 A69-29571

Electrode interactions effects in interdigital surface wave transducers on piezoelectric materials, using Fourier analysis

24 p4312 A69-42615

DIGITIZERS

U ANALOG TO DIGITAL CONVERTERS

DIGITS

U BINARY DIGITS

DIHEDRAL ANGLE

Polytropic gas unsteady motion in dihedral piston wake by solving mixed boundary value and Goursat problems

22 p3861 A69-41025

DIHEDRAL EFFECT

U LATERAL STABILITY

DILATION

U STRETCHING

DILATOMETERS

U EXTENSOMETERS

DILATOMETRY

Precipitation hardening of gamma phase in austenitic stainless steels studied for phase transformations by dilatometry after aging and quenching

01 p0096 A69-10613

Dilatometer for measuring thermal expansion of solid bodies over temperature range at various gas media pressures

03 p0432 A69-14151

Automatic recording inverted dilatometer employing fused quartz vertical pedestal and yoke type pushrod

15 p2607 A69-30153

DIMENSIONAL ANALYSIS

Dynamic programming methods to avoid dimensionality problem arising in solution of boundary value problems by digital computer

01 p0103 A69-10006

Electric arc properties, investigating volt-ampere characteristics by approximate similitude and dimensional analysis

01 p0125 A69-10099

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities

02 p0237 A69-11665

Relationships derived by dimensional arguments connecting vertical heat fluxes and horizontal momentum in constant flux layer with other relevant variables

02 p0275 A69-12692

- Hydrostatic journal gas bearings calculations for carrying capacity, gas consumption and optimal dimensions for maximum lifting capacity
03 p0432 A69-12960
- Thermovortex effect, determining functional relations between interdependent parameters by means of dimensional analysis
03 p0531 A69-12966
- Independent nature of variables in dimensional analysis, discussing temperature in kinetic and dimensional analyses
13 p2289 A69-28362
- Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities
13 p2257 A69-28696

DIMENSIONAL MEASUREMENT

- Moon figure from meridional measurements of visible diameters at different angles of libration, deriving equation for polar and equatorial compression of lunar ellipsoid
03 p0512 A69-13690
- Cepheid stars as distance indicators in extragalactic space, using periodicity-luminosity relation
08 p1408 A69-21147
- Holographic interference method for measuring film height in analyses of fluid film vaporization under blowing hot gas
12 p2088 A69-26178
- Gas laser-Doppler radar system for moving materials velocity and length measurements in industrial processes
22 p3955 A69-40237
- Laser interferometric length measurement by fringe counting, considering mechanical and optical systems limitations and design tolerances
22 p3960 A69-40238
- Nondestructive thermal method of measuring wall thickness and channel blockage in investment castings used in aircraft parts production
24 p4312 A69-42754

DIMENSIONAL STABILITY

- NT SHELL STABILITY
NT STRUCTURAL STABILITY
- Cesium sorption in materials for thermionic converters reservoirs, discussing dimensional stability of porous alumina, W and C samples
14 p2463 A69-29220
- Liquid drop in electric field numerically analyzed for disintegration dynamics and instability through cross section computation at time intervals
23 p4151 A69-41694

DIMENSIONLESS NUMBERS

- NT FROUDE NUMBER
NT GRASHOF NUMBER
NT LEWIS NUMBERS
NT MACH NUMBER
NT NUSSELT NUMBER
NT PRANDTL NUMBER
NT RAYLEIGH NUMBER
NT REYNOLDS NUMBER
NT RICHARDSON NUMBER
NT SCHMIDT NUMBER
NT SIMILARITY NUMBERS
NT STANTON NUMBER
NT STROUHAL NUMBER
- Fracture toughness measurements by means of dimensionless fracture toughness parameters, noting results for materials with very different elastic moduli
05 p0780 A69-16080
- Heat transfer for incompressible inviscid fluid flow in cone, expressing solution in terms of dimensionless numbers
13 p2375 A69-27788
- Dimensionless approach to maximum flow in heat pipes and optimization of capillary structure
14 p2539 A69-29206
- Similitude applied to dynamics of disperse media, discussing role of dimensionless numbers in mechanics of suspensions and two phase flows in porous media
19 p3300 A69-36775

DIMENSIONS

- NT DIAMETERS
NT FILM THICKNESS
NT HEIGHT
NT LENGTH
NT RADII
NT SCALE HEIGHT
NT TARGET THICKNESS
NT THICKNESS
- Dimensions, temperature and electron density of quiet solar corona from radio interferometer measurements, noting activity and temperature at solar maximum and minimum
08 p1393 A69-20573

- Dimensioning and strength calculations - Conference, Budapest, October-November 1968
17 p3051 A69-32975
- DIMERS**
- Spectral measurements for matrix isolated lithium fluoride extended into far IR to obtain evidence for linear lithium fluoride dimer
02 p0205 A69-12465
- Submillimeter wave absorption by dimeric water in atmosphere, using interferometer and maser
05 p0759 A69-16658
- Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
16 p2828 A69-32792
- Dimer bond energies analysis in Mg and Ca dimer molecules, approximating characteristic temperatures and virial coefficients
23 p4195 A69-42210

DIODES

- NT AVALANCHE DIODES
NT CESIUM DIODES
NT CRYSTAL RECTIFIERS
NT GERMANIUM DIODES
NT JUNCTION DIODES
NT PARAMETRIC DIODES
NT PHOTODIODES
NT PLASMA DIODES
NT THERMIONIC DIODES
NT TUNNEL DIODES
NT VARACTOR DIODES
- Small signal impedance of subcritically doped gallium arsenide Gunn diodes, using drift velocity vs electric field relationship
01 p0038 A69-10121
- X band mixer with reactively terminated image, using gallium arsenide barrier diodes and microwave integrated circuit techniques
01 p0039 A69-10189
- Diode structure optimization for monolithic integrated circuit for Ku-band reflective phase shifter
01 p0040 A69-10195
- Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity
01 p0137 A69-10260
- Gunn generator efficiency dependence on diode and regime parameters using computer model
01 p0042 A69-10319
- YIG single crystal resonator tuning of Gunn diode in coaxial line circuit
01 p0042 A69-10320
- Limited space-charge accumulation mode efficiency for gallium-arsenide diodes, taking into account electron-lattice relaxation processes
01 p0137 A69-10321
- Semiconductor switching diode, evaluating operation with nonlinear time delay equivalent circuit
01 p0046 A69-10747
- Output power of Gunn effect microwave diode using equal area analysis and Fourier transforms
01 p0049 A69-11195
- Efficiency curve for step recovery diode frequency multipliers, using analog computer simulation
02 p0215 A69-11947
- Fluid mechanics of one stage momentum flueric diode
02 p0195 A69-12071
- Dynamic current-voltage characteristics of thin film diodes on chalcogenide glass base
02 p0223 A69-12834
- Clamp type diode holders for obtaining CW coherent emission from gallium arsenide injection lasers
03 p0435 A69-12985
- Small silicon diodes to explore depth-dose distributions in water phantom of proton beams
03 p0430 A69-13481
- Thermal and shot noise in pumped resistive diode for frequency conversion, analyzing equivalent circuits
03 p0406 A69-13828
- Diode mixer power series coefficients for spurious response prediction in superheterodyne receiver
03 p0399 A69-13905
- Computer simulations defining conditions to produce series operation of Gunn effect diodes
04 p0573 A69-14340
- Schottky barrier mixer diodes and point contact diodes failure, discussing criterion for degradation of noise figure, 1/f noise and reverse breakdown voltage
04 p0574 A69-14352
- Gamma radiation effects on transistors and diodes, discussing dosage and thermal changes within operational temperature range of germanium devices
05 p0728 A69-15695

- Peripheral surface damage effects on epitaxial GaAs bulk diodes breakdown characteristics, noting measurements on mechanically and chemically prepared elements
05 p0733 A69-16561
- Shot noise in Si Schottky barrier diodes for frequencies between 100 Hz and 50 kHz
05 p0734 A69-16564
- Equivalent circuit for microwave point diode noting waveform calculations, frequency dependent elements and recovery phenomena
05 p0735 A69-16605
- Diffused Si and GaAs diodes electroluminescence and current-voltage characteristics
06 p0893 A69-16898
- Spectral response of fast GaAs point-contact diode in mm and submillimeter wavelength ranges
06 p0893 A69-16939
- Active region doping effect on laser diode threshold current, noting current dependence on loss coefficient in interband transition model without selection rule
06 p0933 A69-17257
- Q factors dependence of IMPATT diode oscillator FM noise, noting excess noise temperature correlation with diode current
06 p0899 A69-17826
- Gunn effect diodes application to ultrafast pulse electronic circuitry for computer logic
07 p1089 A69-18244
- Richardson constant and tunneling effective mass for thermionic and thermionic field emission in Schottky barrier diodes
07 p1089 A69-18247
- Surface recombination rate and retardation field effects on diffusion current in mesa diodes with low level injection
07 p1105 A69-19008
- Controlled charge models for computer calculation of electronic circuits, discussing tunnel diode static characteristics and equivalent transistor circuits
08 p1280 A69-19975
- Quenched multiple domain mode oscillations in GaAs microwave diodes noting relationships between efficiency, power output, negative resistance and bias voltage
08 p1282 A69-20107
- Semiconductor laser with isolated diodes in cavity, noting watt-ampere characteristics during nonuniform excitation and threshold curves
08 p1326 A69-20539
- Inertia limited flow transition to mobility limited flow in gas diodes by taking velocity moments of Boltzmann equation for electron velocity distribution function
09 p1462 A69-21325
- Voltage dependence of mobility limited electron current density in gas filled diode for collision frequency proportional to electron speed
09 p1462 A69-21326
- Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials
09 p1462 A69-21477
- Forward volt-ampere characteristics and differential resistance peak of Schottky barrier diode on doped Si
09 p1557 A69-21744
- Isothermal diode as study basis for internal complex controlling thermionic energy conversion
09 p1439 A69-21827
- Silicon diode array camera tube modified to permit X ray images to be displayed on TV monitor
09 p1463 A69-21845
- Gunn effect domains propagation calculated for nonuniform diodes of annular geometry, obtaining frequency variation
09 p1464 A69-22159
- Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity
09 p1559 A69-22653
- Discontinuous vortex power amplifier and diode design, noting supply regulator effects and load matching
09 p1443 A69-22737
- Spontaneous reverse current due to Brillouin EMF observed in diode in thermal noise range
10 p1661 A69-22950
- Transient characteristics of negative resistance zinc alloy diodes, investigating temperature effects
10 p1662 A69-23157
- Computerized design techniques for microwave components using diodes, detailing X band parametric amplifier
10 p1661 A69-23874

Passive structural units in fluidic circuits, discussing tesla diode and proportional amplifier
11 p1825 A69-24542

High temperature and power gas diodes and thyratrons for nuclear electrical space power systems
11 p1847 A69-24744

AC diode switching circuits employed as threshold elements in functional rectifiers for approximating non-linear functions
11 p1857 A69-25717

In-circuit diodes testing by semiautomatic low current regulated voltage test set
12 p2035 A69-25835

Diode type image shutter tube with proximity focusing for high speed photography
12 p2083 A69-26145

Computer analysis on ideal step recovery diode frequency multipliers for optimum efficiencies
12 p2039 A69-26378

LF negative resistance of X band Gunn diodes with lumped components, using coaxial circuit
12 p2039 A69-26387

Matched diodes in monolithic balanced mixer by diode array fabrication for noise suppression
13 p2233 A69-28071

Operation mode of modulator with p-i-n diode, determining modulus and phase of reflection factor
13 p2235 A69-28518

Injection phase-locking characteristics of LSA /limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit
14 p2421 A69-29544

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials
15 p2578 A69-30722

Diode burn-in dissipation measurement for reliability testing
15 p2579 A69-31043

Optical and electrical properties of electroluminescent diffused gallium arsenide phosphide diodes with low donor concentrations, analyzing spectral emission and fabrication effects
16 p2758 A69-31699

Single balanced modulators using square law resistors /space charge limited diodes/, discussing noise properties, conversion losses and terminating conductance
16 p2758 A69-31756

Electrical switching in thin film arsenic selenium telluride semiconducting glass diodes, observing formation of liquid phase and conducting filaments
16 p2760 A69-32017

GaAs dual diode laser structure used to give electrical control of laser threshold and permit study of optical flux and current density role
17 p2980 A69-32959

Pulsed ultrasonic flaw detectors resolving power enhancement by shunting semiconductor diodes across piezoelectric elements of scanning heads to shorten scan pulse duration
18 p3137 A69-35112

Magnetic field effect on Gunn diode vibrations and LF oscillations, noting increase in threshold field and decrease in threshold current
18 p3183 A69-35267

Light emitting diodes /LED/, discussing operating voltage vs color, diode materials and applications
20 p3505 A69-37702

Step recovery diode principle and operation mode as frequency multiplier explained by models
21 p3684 A69-39736

S-band pin-diode switch for high CW power satellite and deep space probe communication, using multiple quarter-wave transformers to stepdown diode impedance
23 p4143 A69-42518

DIOXIDES

- U CARBON DIOXIDE
- U ENSTATITE
- U HYDROGEN PEROXIDE
- U PYROCERAM [TRADEMARK]
- U PYROXENES
- U QUARTZ
- U SILICON DIOXIDE

DIPLO ANTENNAS

Dipole array antenna radiation pattern, gain and beamwidth as function of number of dipoles, noting case for main beam scanning
01 p0046 A69-10737

Radiation pattern, gain and polarization of omnidirectional antenna consisting of dipoles or monopoles arranged along circular cone
01 p0046 A69-10738

Dipole antenna current distribution, deriving simple, accurate formula for infinite, semiinfinite and finite cases
02 p0218 A69-12330

Helical log periodic and log periodic dipole arrays impedance and radiation patterns measurements have similar characteristics
02 p0219 A69-12337

Short backfire antenna radiation fields calculation by approximate method
02 p0219 A69-12339

Ground wave excited by dipole in conducting half space, discussing lateral wave character and optimum radiation angle
02 p0209 A69-12347

Electric or magnetic dipole antenna radiated electromagnetic field for antenna orientation perpendicular to striations of periodically stratified dielectric medium
03 p0398 A69-13802

Infinite phased dipole array, discussing integral equation, current distributions and active admittances
04 p0571 A69-14316

Mutual coupling and element efficiency for infinite linear arrays of dipoles
04 p0571 A69-14317

Book on cylindrical dipole arrays covering theory and programs for computational analysis and design with desired characteristics
04 p0574 A69-14353

Input admittance of cylindrical dipole antenna immersed in cold isotropic lossless plasma medium and insulated by ion sheath or unit permittivity dielectric
04 p0580 A69-15490

Emission of thin metallic antenna in randomly inhomogeneous medium, determining effective impedance
06 p0894 A69-17451

Circular antenna array consisting of identical center fed cylindrical dipoles placed tangential to and in plane of circle and with equal spacing
06 p0898 A69-17765

Shot noise in dipole antenna immersed in hot plasma related to antenna input resistance, using Maxwellian velocity distribution
07 p1079 A69-18920

Radiation resistance of short dipole immersed in cold magnetoionic medium, using polarized wave modes
07 p1107 A69-19226

Algebraic expression for field pattern of asymmetrically driven long antenna with multiple excitations, using Wiener-Hopf integral equation
08 p1281 A69-20016

Long transmitting dipole antenna, studying current and charge distributions by Wiener-Hopf technique
08 p1281 A69-20019

Coupling between array antennas shown to reduce reflecting properties of Van Atta reflector consisting of linear half wave dipoles
08 p1282 A69-20037

Y-circulators specified, measured and calculated values correlated as function of leakage matrix elements and terminating dipoles reflection
09 p1473 A69-22114

Horizontal VLF cylindrical transmission antenna current distribution calculated with allowance for ground reaction, showing exponential decrease with distance
09 p1467 A69-22581

Antenna for lunar occultation observations at 81.5 MHz, detailing experimental procedure and data reduction
10 p1779 A69-23606

Radiation field of log periodic dipole array calculated as function of observation point and dipole currents
10 p1664 A69-23802

Approximate method for calculating linear multidipole antennas parameters in terms of power requirement, considering equidistant/nonequidistant element antennas
11 p1849 A69-24969

Log periodic dipole array antennas simulated with simple RLC circuit loading uniform transmission line
11 p1850 A69-24977

Current distribution on elements of circular arrays of tangential dipoles, discussing large odd component in zeroth order approximation
11 p1853 A69-25318

Far field radiation pattern, radiation resistance, power gain, directivity and effective aperture for center fed dipole antenna with feed points displaced arbitrarily
12 p2039 A69-26352

Input impedance of quarter wavelength antenna in anisotropic plasma, discussing plasma parameters role and use of probe antenna in plasma diagnostics
12 p2044 A69-27071

Field patterns for wave radiation from electric dipole immersed in anisotropic plasma column excited by longitudinal DC magnetic field
12 p2034 A69-27103

Antenna cross dipole array for vehicle tracking in VHF band, obtaining effect of local rotation by electrical phase shifting
13 p2226 A69-27185

Gain optimization for dipole endfire array through orthogonalization of element directivity noting effects of element spacing, element gain and mutual coupling
13 p2226 A69-27186

Radio emission of atmospheric cosmic ray showers observed with multiple wideband half wave dipole antenna system, obtaining radiation spatial distribution
13 p2332 A69-28407

Half wave dipole antenna operational factors analyzed for RF radiation spatial power distribution from atmospheric cosmic ray showers
13 p2332 A69-28408

Radiation pattern of electric and magnetic dipole on flat semiinfinite impedance system edge found similar
13 p2236 A69-28546

Diffraction of electromagnetic waves produced by vertical dipole on impedance sphere of large radius in isotropic medium, using moment method
16 p2751 A69-32028

Coupling between electric dipoles in warm plasma, determining electron density and temperature from resonance peak of mutual impedance at electron plasma frequency
17 p2925 A69-33846

Thin metal antenna average current and effective impedance in randomly inhomogeneous medium, discussing cases of strong and weak permittivity fluctuations
17 p2927 A69-33858

Van Atta array reflector retrograde effect, studying influence of transmission line length, interelement spacing and line-dipole matching on incident reflected radiation phase correlation
17 p2929 A69-33878

Emission of thin metallic antenna in randomly inhomogeneous medium, determining effective impedance
20 p3508 A69-37936

Deployable cross log periodic dipole /LPD/ array on conducting cone as potential application to spacecraft or missile requiring frequency independence in VHF-UHF band
22 p3913 A69-40693

Kirchhoff equations for synthesis of passive dipole arrays, obtaining best approximation to radiation patterns
23 p4138 A69-41935

Radiation characteristics of dipole on wedge edge with sinusoidal current, discussing spatial phase and polarization calculations by computer
23 p4138 A69-41937

Ground antenna array for ionospheric physics experiments, consisting of wire dipoles connected to receive circular or linear polarization
24 p4286 A69-42607

DIPLO MOMENTS
NT ELECTRIC MOMENTS
NT MAGNETIC MOMENTS

Magnetotropometer for measuring torque /proportional to magnetic dipole moment/ exerted on object by earth magnetic field
02 p0248 A69-11768

Paraelectric resonance spectroscopy on KCl, using bistable dipole model
06 p0982 A69-18235

Rotational spectrum of ethylene episulfide to determine molecular structure, particularly orientation of C sub 2 S ring
08 p1268 A69-20535

Magnetic masses of differentiating or integrating floating gyroscope effect on gyro moment sensor performance, examining utilization of multiple permanent magnet
09 p1497 A69-22102

Scattering of spherical electromagnetic wave emitted by electric and magnetic dipoles with equal moments at truncated infinitely thin ideally conducting paraboloid of revolution
11 p1846 A69-24614

Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/
24 p4352 A69-43124

DIRAC EQUATION

Vector potentials for Dirac equation derived assuming time independent external magnetic field without scalar potential
04 p0638 A69-15273

Higher dimensional Dirac Hamiltonians from L-matrix hierarchy using dimensional eigenvector
04 p0625 A69-15275

Second rank Dirac spinors with invariant components relative to Lorentz group transformations
19 p3361 A69-36817

Dirac hypothesis on varying G constant considered in formulating earth expansion theory without resorting to Ramsey hypothesis
22 p4018 A69-40178

Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport
23 p4190 A69-41357

Steady state cosmology for classical and quantum electrodynamics in local vicinity, deriving Lorentz-Dirac equation from variational principle
23 p4215 A69-42116

DIRECT CURRENT

Brushless DC torque motor using reluctance magnetic circuit and toroidally distributed coil winding
01 p0012 A69-10154

Storm-Shattuck and push-pull tunnel diode DC-to-DC converters suitable for spacecraft power supplies
01 p0013 A69-10750

Amplifying channel processes of DC amplifier, discussing relations to couple channel with HF channels of operational operators and to synthesize amplifier frequency characteristics
01 p0053 A69-10802

DC beta falloff in transistors at large collector currents measured, discussing relation to emitter crowding
04 p0574 A69-14347

Low DC current measurement on board satellite, noting absence of elaborate compensation
04 p0602 A69-15399

Regulated high voltage DC to DC converter with output voltage programmable numerically, noting application on board HEOS A satellite
04 p0602 A69-15400

DC servo system with torque feedback to ensure sensitivity to load variation and provide optimal performance
05 p0736 A69-15659

DC servo system with torque feedback, discussing bang-bang system comparison, analog simulation, damping and quasi-optimum behavior
07 p1059 A69-19229

Mutual influence of two different laser modes corresponding to two transitions with same ground level, using He-Ne DC laser
08 p1325 A69-20284

Final stage of three phase DC/AC converter, noting three phase control circuit for power stages with germanium transistors
08 p1285 A69-20381

Closed loop regulated flyback DC to DC converter using constant frequency generator for duty cycle control
09 p1442 A69-22454

DC to DC converters design using HF transistors to achieve high switching speeds while reducing size and weight
10 p1635 A69-22983

DC conversion amplifier commutation induced noise and signal ratio as function of shunt capacitance across vibrator load investigated for increased noise stability
11 p1845 A69-24555

Time-pulse function generator with piecewise parabolic approximation for converting value given by DC voltage or time interval into DC voltage for arbitrary functional relation
12 p2079 A69-25968

DC to RF energy conversion in ungridded klystron gaps, calculating efficiency and optimum load conductance as function of gap dimensions
12 p2041 A69-26629

Brushless DC motor with commutation control by magnetic position sensor scanned at HF
12 p2017 A69-26894

Signal processing and DC restoration in line scan devices used in land/water terrain analysis
12 p2096 A69-26980

Single phase bidirectional AC/DC power convertor based on back-to-back SCR hybrid bridge
13 p2209 A69-28178

Tubes faults monitoring in three phase Gratz converter bridges by measuring voltage across DC smoothing inductor
15 p2575 A69-30180

Operating conditions influence on thermal stability of DC plasmatron arc to obtain high temperature source
15 p2663 A69-30994

Stabilized DC to DC converter advantages in output voltage, overall dimensions and efficiency for battery driven mobile equipment
16 p2765 A69-32443

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field
21 p3649 A69-39027

Two dimensional analysis of junction transistor electrical behavior, analyzing DC and AC crowding effects, conduction and impedance of base and collector
22 p3911 A69-40011

Capacitive coupling vs DC coupling between data input and transmitter exciter in FM telemetry system, based on pulse series Fourier analysis
23 p4119 A69-41744

DIRECT POWER GENERATORS

NT ALKALINE BATTERIES

NT DRY CELLS

NT FUEL CELLS

NT HYDROGEN OXYGEN FUEL CELLS

NT MAGNETOHYDRODYNAMIC GENERATORS

NT PHOTOELECTRIC GENERATORS

NT RADIOISOTOPE BATTERIES

NT REGENERATIVE FUEL CELLS

NT SNAP 10A

NT SNAP 13

NT SNAP 21

NT SNAP 27

NT SOLAR CELLS

NT THERMAL BATTERIES

NT THERMIONIC CONVERTERS

NT THERMOELECTRIC GENERATORS

Satellite power generation and transmission system for solar energy conversion, noting estimates of surface area and weight of collectors
02 p0323 A69-12296

Electrogasdynamics generator for direct conversion of moving dielectric medium potential or thermal energy to electric power
03 p0369 A69-14153

Fuel cells utilizing direct electrochemical conversion of energy of radioactive elements
08 p1269 A69-21054

Closed loop regulated flyback DC to DC converter using constant frequency generator for duty cycle control
09 p1442 A69-22454

DC to DC converters design using HF transistors to achieve high switching speeds while reducing size and weight
10 p1635 A69-22983

Thermodynamics of sinusoidal steady state energy converters governed by Onsager reciprocal relation, determining maximum conversion efficiency
11 p1826 A69-25396

Variable voltage DC power supplies for energizing cryogenically cooled and superconductive electromagnets
12 p2017 A69-26498

MHD energy converters electric fields and current distributions, analyzing MHD flow problems
21 p3777 A69-39480

Performance, size, weight, operational characteristics and cost estimates of ZrH reactor-organic Rankine power systems
23 p4189 A69-42265

DIRECTION

Cosmic ray approach directions computation for high latitude stations, discussing results for low rigidity galactic cosmic rays and solar corpuscular events detection
18 p3187 A69-34940

DIRECTION FINDERS [RADIO]
U RADIO DIRECTION FINDERS

DIRECTIONAL ANTENNAS

NT DIPOLE ANTENNAS

NT HELICAL ANTENNAS

NT HORN ANTENNAS

NT INERTIALESS STEERABLE ANTENNAS

NT LENS ANTENNAS

NT LOG PERIODIC ANTENNAS

NT LOOP ANTENNAS

NT PARABOLIC ANTENNAS

NT RADAR ANTENNAS

NT RHOMBIC ANTENNAS

NT SLOT ANTENNAS

NT STEERABLE ANTENNAS

NT TWO REFLECTOR ANTENNAS

NT YAGI ANTENNAS

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
02 p0214 A69-11612

Retrodirective antenna array with switched Butler matrix feed
02 p0223 A69-12813

Decameter wideband directional antenna system for investigation of ionosphere by retrodiffusion method
03 p0402 A69-12860

Radiation pattern of linear phased antenna array calculated during commutated scanning
04 p0577 A69-14785

Electronic counterrotating antennas, developing turning model of antenna group of telecommunications satellite
04 p0578 A69-15065

Multielement antenna array radiators interaction taking into account edge effects
05 p0727 A69-15638

Directive gain optimization of antenna array during 90 degree radiation deflection
05 p0728 A69-15652

Directional mirror antenna parameters measurement by finite focusing of radiating element
06 p0895 A69-17453

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelsat 3 satellite
06 p0897 A69-17590

Signal resolution during space diversity reception with nondirective or weakly directive antennas and noncorrelated receiver background noise, discussing signal processing
06 p0890 A69-17800

Telemetry and tracking antenna feed system in EC-135N instrumented aircraft for Apollo moon project
07 p1105 A69-19110

Focusing effect on far field directional pattern shifting of array normal, noting electronic scanning properties
08 p1285 A69-20400

Electronic beam-rotation systems operation using matrix network to feed circular arrays, noting applicability to direction finding or radar systems
08 p1288 A69-20964

Broadband multibeam antenna array with frequency independent beam directions, noting aperture gain limitation
08 p1288 A69-20965

Counterrotating antenna for spin stabilized satellite, noting linear phase shift influence on radiation pattern
08 p1289 A69-20968

Superdirective aerial endfire array of four unequally spaced half wave dipoles and only one fed element, calculating and measuring maximum gain
09 p1468 A69-22603

Apollo LM and CSM tracking systems boresight shift reducible by decreasing modulation indices or scaling factor alpha
10 p1672 A69-23277

Shipborne self pointing antenna for reception of telemetry signals from maneuverable missile, discussing tracking and compensation for ship platform motion
10 p1664 A69-23803

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data
11 p1847 A69-24719

Self steered retrodirective antenna arrays with phase synthesizer, combining signals from individual elements at LF levels
11 p1850 A69-24983

Antenna cross dipole array for vehicle tracking in VHF band, obtaining effect of local rotation by electrical phase shifting
13 p2226 A69-27185

Electroacoustic transducers interaction effects in multibeam acoustical reflector type receiving antennas
13 p2227 A69-27536

Quasi-optical oversize waveguide directional coupler with two prisms interface matched by Brewster angle effect
14 p2424 A69-29764

Multielement antenna array radiators interaction taking into account edge effects
16 p2762 A69-32496

Directive gain optimization of antenna array during 90 degree radiation deflection
16 p2762 A69-32509

Retrodirective antennas for spacecraft, discussing design, operations and applications
16 p2762 A69-32557

Doubly curved reflectors for rotating search radar directional antenna, noting assembly of elliptical strips constituting segments of parabolic dishes and sidelobe suppression

16 p2763 A69-32790

Bearing system for mechanically despin antenna in spin stabilized communications satellite, offering greater directional stability, lower weight and power losses

17 p2978 A69-33431

Automatic radar station for meteor observations, discussing separate transmitting and receiving antennas directive gain and radio echo power

17 p2939 A69-33902

Directional transmitting and receiving antenna arrays for short wave meteor studies in Kharkov

17 p2939 A69-33903

Minimum weight design of tiltable enclosed antenna structure as subject to deformation constraints

18 p3211 A69-34341

Mechanical drives effectiveness for large antenna tracking/communications systems evaluated in terms of reliability and availability

18 p3100 A69-34522

Digital computer controlled antenna positioning system computing spacecraft tracking trajectory from given parameter input set

19 p3267 A69-35997

Backfire antenna radiation characteristics and physical dimensions for tracking and telemetry applications, including five element array model

19 p3271 A69-36251

Antenna high noise temperature reduction in single channel combined transmission and reception of tracking and communication data

19 p3275 A69-36328

Multiplicative feed system for monopulse angle tracking antennas, discussing influence of sidelobe and backlobe responses on control function slope determining antenna bearing angle

20 p3510 A69-37704

Phase error in monopulse antenna system attributed to far field background noise sources during passive or active objects tracking

20 p3492 A69-37707

Directional mirror antenna parameters measurement by finite focusing of radiating element

20 p3508 A69-37938

Intelsat 3 communications satellite mechanically despin high gain directive antenna, discussing system, control electronics, design and performance

22 p3913 A69-40691

Redirection of time varying signal between specified points by arbitrarily spaced antenna array elements with condition involving time delays for validity of retrodirection

23 p4136 A69-41580

Directional couplers applied to excitation of non-protruding surface wave antennas, examining ridge slot system

23 p4139 A69-41946

Antenna pointing and tracking accuracy by identifying error sources in servo, structural, mechanical and alignment factors

23 p4125 A69-42126

Design criteria for antenna control equipment for earth tracking from landing site on Martian surface [AIAA PAPER 68-868]

24 p4348 A69-43246

DIRECTIONAL CONTROL

NT THRUST VECTOR CONTROL

Hybrid electropneumatic and electrohydraulic servosystem for actuation of gas jet nozzles of sounding rocket automatic pointing system

04 p0550 A69-15182

Direction changing of large solid propellant motors by changing jets angle or gas injection

07 p1230 A69-19291

Single loop directional stripline filters synthesis, including general expression for frequency characteristics based on wave matrices

19 p3284 A69-36570

Integrated sensor controllers for missile directional control, discussing test results for two different systems [AIAA PAPER 69-837]

21 p3761 A69-39368

Miniature hydraulic controls with emphasis on four-way directional control valve for space and cost problems

22 p3870 A69-41243

Electromagnetic waveguides direction-changing capability, deriving expressions for permitted bending radius with respect to mode conversion

24 p4288 A69-43331

DIRECTIONAL STABILITY

NT GYROSCOPIC STABILITY

Directional gyroscope accuracy increased by self adaptive systems, based on precession theory and drift amplitude dependence

11 p1881 A69-24559

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

11 p1994 A69-25534

Directional properties of electro-optical goniometric system based on known design parameters

14 p2420 A69-29332

Aircraft constant altitude-pressure flight navigation attained using Bellamy formula and loxodromic route for drift compensation

15 p2651 A69-30294

Skyvan 2 aircraft aerodynamic design, describing modifications to increase fuel capacity, directional stability and range capability

17 p2896 A69-34193

Manual attitude control for Lunar Module employing directional stability, coordinated turn and attitude command [AIAA PAPER 69-892]

21 p3824 A69-39417

Aircraft directional stability in terms of ideal nonholonomic coupling on mechanical system, noting servosystem role

21 p3830 A69-39836

DIRECTIVITY

Directivity and beamwidth determination of large scanning Dolph-Chebyshev arrays

04 p0570 A69-14303

Directive gain optimization of antenna array during 90 degree radiation deflection

05 p0728 A69-15652

Solar wind directional fluctuations at middle heliographic latitude, comparing Vela satellite measurements with comet Morehouse tail beam undulations

06 p0985 A69-16981

Self dual graphs and diagraphs enumeration and properties

06 p0947 A69-17410

Electromagnetic wave propagation direction in vacuum for reflection from semiinfinite plasma, noting effects of nonlinear transverse wave excitation

09 p1459 A69-22529

Emission spectrum of ruby laser as function of relative orientation of resonator and active crystal axes, noting spectrum width

12 p2104 A69-26029

Directive gain optimization of antenna array during 90 degree radiation deflection

16 p2762 A69-32509

Center to limb variation of solar hard X ray bursts, suggesting inverse Compton effect and bremsstrahlung from anisotropic electrons

17 p3023 A69-33055

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error

19 p3282 A69-35826

Thermal calculations of objects near lunar surface, considering IR emission directivity effects

24 p4385 A69-43254

DIRECTORIES

U INDEXES [DOCUMENTATION]

DIRECTORS [ANTENNA ELEMENTS]

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction

04 p0574 A69-14459

Multielement antenna array radiators interaction taking into account edge effects

05 p0727 A69-15638

Multielement antenna array radiators interaction taking into account edge effects

16 p2762 A69-32496

DIRICHLET PROBLEM

Approximate solution for Dirichlet problem for linear Karman differential equation used in thin plate deflections obtained by Bubnov-Galerkin method

01 p0105 A69-10700

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space

02 p0272 A69-12221

Quasi-linear parabolic partial differential equations, discussing solutions, regularity, differential geometric aspects and Dirichlet problem

02 p0273 A69-12779

Dirichlet problem for degenerating elliptical equations with nonlinear low order terms

03 p0456 A69-13601

Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half plane and circle cases

03 p0456 A69-13602

Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem

03 p0456 A69-13603

Discretization error of Dirichlet problem analyzed in plane region with corners, discussing error in numerical solution of elliptic differential equations

03 p0457 A69-13741

Difference iteration method for solving three dimensional Dirichlet problem presented as system of plane Dirichlet problems

05 p0787 A69-16457

Dirichlet and Neumann problems solvability using potential theory methods, limiting study to three dimensional domains

07 p1173 A69-18496

Elliptic equation solution of Dirichlet problem with zero boundary condition, examining dependence of modulus of continuity of solution on boundary properties

07 p1173 A69-18498

Dirichlet problem for nonuniformly second order elliptic quasi-linear equation for case of arbitrary coefficient growth

07 p1173 A69-18500

Canonical forms for second order elliptic systems with constant coefficients, studying Dirichlet problem solvability for systems reduced to canonical forms

07 p1174 A69-19476

Existence and uniqueness of Dirichlet problem solutions for elliptic type equations with measurable and bounded coefficients

08 p1343 A69-20659

Nonlinear second order elliptic difference equations in associated variational problems, considering differentiable solution of Dirichlet problem

10 p1718 A69-22879

Finite difference approximation to degenerate Dirichlet problem, obtaining a priori estimate to prove convergence

10 p1719 A69-23517

Dirichlet problem solution for Volterra elliptic integrodifferential equation, considering existence theorem hypotheses

12 p2121 A69-26468

Dirichlet problem for elliptic second order differential equations with constant coefficients in region of Euclidean space of two real variables bounded by ellipse

12 p2123 A69-26728

Dirichlet problem of linear degenerate second order differential elliptic systems with independent variables

12 p2123 A69-26729

Network method for Dirichlet problem of Laplace equation in regions with rounded corners, noting polar and composite errors

12 p2123 A69-26730

Dirichlet problem for second order linear hyperbolic partial differential equations in cylindrical domain, deriving necessary and sufficient condition for solution uniqueness

12 p2124 A69-26932

Simultaneous Wiener-Hopf equations for electromagnetic wave diffraction, giving cyclic matrix solutions for Dirichlet and Neumann mixed boundary value problems

13 p2287 A69-27299

Elliptic second order equation showing nonequivalent regularity conditions for Laplace and continuous coefficient equations

13 p2288 A69-27743

Pointwise estimate for gradient of solution of first boundary value problem /Dirichlet problem/ for second order elliptic equation

13 p2289 A69-28319

Algorithm for solving Dirichlet problem of nonlinear elliptical differential equations representing atmospheric dynamics balance equation

14 p2470 A69-29401

Monograph on Dirichlet problem for quasi-linear elliptic differential equations with many independent variables

14 p2471 A69-29599

Necessary and sufficient conditions for boundary point regularity in Dirichlet problem for heat conduction equation assuming Holder condition

15 p2716 A69-30047

Stability of steady circular motions in systems with hidden variables analyzed by using Lejeune-Dirichlet theorem

16 p2804 A69-31621

Iteration process by difference scheme for numerical solution to Dirichlet problem of two dimensional Poisson equation
18 p3164 A69-34701

Convergence properties of finite difference approximations to solutions of Dirichlet problem for Poisson equation
18 p3164 A69-34840

Dirichlet polynomials double sequences and double series with positive exponents, defining conditions for convergence in bicylinder
19 p3361 A69-36639

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space
23 p4182 A69-41972

Principal stresses determination in optically active photoelastic models from fringe pattern while obtaining sum from Dirichlet problem solution by straight line method
23 p4228 A69-41987

DISCHARGE

Electrodynamic law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control
14 p2485 A69-29320

DISCHARGE COEFFICIENT

Discharge coefficient nondependence on Reynolds number demonstrated by measurement at orifices with sharp edges
01 p0006 A69-10362

Sonic nozzle optimal profile determination with and without cylindrical throats, noting sonic line curvature importance on discharge coefficient
02 p0188 A69-12037

Discharge coefficients for Herschel type smooth venturimeters, analyzing influence of transport coefficients, convergence angles and contraction ratios
02 p0250 A69-12414

Discharge rates of metabolic products in men confined in pressure chamber wearing airtight suits and gas masks
10 p1646 A69-23508

Discharge coefficient and opening time of pneumatic and hydraulic systems incorporating disks, nozzles and valves
18 p3094 A69-34981

Servovalve orifice characteristics described by discharge, flow or loss coefficients for laminar and turbulent flow, noting use of Mises model
19 p3256 A69-36712

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem
19 p3241 A69-36721

DISCHARGE TUBES

U GAS DISCHARGE TUBES

DISCONTINUITY

NT SHOCK DISCONTINUITY

Optimal control problems with discontinuities, noting jump discontinuities in state variable derivative arising in bang-bang control problems
01 p0049 A69-10003

Stationary and nonstationary weak discontinuity surfaces propagation for ideal and viscous compressible conductive atmosphere with regard to heat flux, using Hadamard method
03 p0422 A69-13511

Reflection coefficient of double discontinuity consisting of two closely spaced inductive irises in rectangular waveguide
09 p1453 A69-21444

Dynamic programming computational approach to optimization with state variable discontinuities, treating problems as multistage optimization with continuous subarc stages
09 p1474 A69-22440

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature
10 p1677 A69-22894

Galactic discontinuity near longitude 140 degrees attributed to stars deficiency in anticenter quadrant or interstellar cloud obscuration
10 p1776 A69-23215

Forced discontinuous vibrations of liquid in conduit experimentally analyzed, discussing test devices and procedures
11 p1875 A69-25485

Differential equation with finite jump type discontinuities
14 p2424 A69-28811

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances

conjunctively with magnetospheric, ground and ionospheric currents
14 p2512 A69-29041

Ray optics method of far field scattering by discontinuity in parallel plane waveguide applied to strips, apertures, bifurcations, etc
14 p2423 A69-29753

Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
14 p2528 A69-29970

AI interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
17 p2936 A69-32893

Traveling ionospheric disturbances in form of large scale electron concentration discontinuities created by propagating internal gravitational waves
17 p2966 A69-33980

Wave scattering in elastic medium by discontinuity line or finite crack, noting dynamic stress intensity dependence on incident wavelength and Poisson ratio
21 p3840 A69-39293

DISCRETE FUNCTIONS

Optimal adaptive control of discrete linear systems with unknown gain, considering Gaussian distribution functions and random disturbances
02 p0224 A69-11962

Optimal control of open loop aperiodically modulated discrete time systems, discussing solution of associated two point boundary problem
02 p0226 A69-12732

Stability properties of discrete-continuous feedback control systems with signal dependent sampling
02 p0226 A69-12733

Fast Fourier-Hadamard transform for digitized signal representation, classification, discrimination and efficiency
03 p0392 A69-13249

Approximation for discretization error of discrete analog of Bergman harmonic kernel, discussing discretization error in Dirichlet and Neumann problems for Laplace equation
03 p0456 A69-13555

Discretization error of Dirichlet problem analyzed in plane region with corners, discussing error in numerical solution of elliptic differential equations
03 p0457 A69-13741

Book on qualitative theory of sampled data systems
04 p0630 A69-14563

Discrete time positive real functions defined for analyzing system stability with memoryless feedback
05 p0739 A69-16349

Optimal controls for linear systems with matrix elements and vector components discrete functions of time
09 p1473 A69-21787

Discrete predicting filter optimal synthesis in terms of rms error by solving normal Gaussian equations
09 p1473 A69-21858

Discrete variable approximation for computation of flight path optimization, discussing constrained and unconstrained minimizations
09 p1538 A69-22090

Optimal control of discrete processes with bounded phase coordinates, proving optimality conditions
09 p1475 A69-22668

Optimal control of discrete time linear system with random parameters, noting case of additive noise in measurements
12 p2052 A69-26501

Error due to amplitude quantization and design of digital control systems in discrete time optimum control theory
12 p2053 A69-26507

Discrete automatic control systems determination by adjustable model, considering quasi-steady state conditions
13 p2238 A69-27253

High energy neutron transport calculated using one dimensional discrete ordinates code with anisotropic scattering, comparing results with nucleon transport code calculations
14 p2481 A69-29592

Recognition system for discrete decision function generation to select one out of two classes of objects, deriving solutions for selection probability
17 p2932 A69-33119

Pulsed control systems sensitivity relationship to discreteness period described via differential equations
17 p2994 A69-33143

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin

walled segments, using homogeneous differential equations
19 p3445 A69-36831

DISCRIMINATION

U BRIGHTNESS DISCRIMINATION
U SENSORY DISCRIMINATION
U TACTILE DISCRIMINATION
U VISUAL DISCRIMINATION

DISCRIMINATORS

Reduction of ATR switch pulse peak in automatic frequency control system of radar station
01 p0047 A69-10784

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
04 p0556 A69-14462

Smooth limiter effect on output of SNR for unbalanced and balanced FM discriminators, noting role of error function
07 p1106 A69-19127

Error probability for discriminator detection of wideband PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect
08 p1271 A69-19864

Reduction of ATR switch pulse peak in automatic frequency control system of radar station
10 p1661 A69-23113

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
14 p2410 A69-28833

FM discriminator click widths probability distribution function, defining click widths duration from input noise considerations
14 p2422 A69-29553

Unsaturable frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum
15 p2635 A69-30967

Bessel functions new addition theorem suggested from mathematical investigation of ideal discriminator output voltage
19 p3266 A69-35767

Wideband FM telemetry transmitters for S band, using symmetrical discriminator
23 p4119 A69-41741

DISEASES

NT ARTERIOSCLEROSIS
NT ASTHMA

NT TUMORS
NT UROLITHIASIS

Space biomedical research trends, noting gastroenterology and lack of research on disease processes during space travel and overemphasis on space physiology
03 p0369 A69-12859

Food-born diseases prevention in civil aviation, reporting gastroenteritis cases during flight
24 p4278 A69-43392

DISHES

U PARABOLIC REFLECTORS

DISILICIDES

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon
04 p0619 A69-15392

Molybdenum disilicide allotropy influence on coating growth rate and morphology [ONERA-TP-642]
08 p1335 A69-19967

Oxidation influence on molybdenum disilicide coatings emissivity, determining degree of blackness over thermal stability range
09 p1522 A69-21588

Tungsten disilicide coated Ta-W alloy oxidation mechanisms, comparing coatings protective properties at high temperatures
13 p2280 A69-28137

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon

18 p3156 A69-35020

Charge transport in n and p type samples of beta phase semiconducting iron disilicide, noting effect of room temperature doping

19 p3390 A69-36556

Aluminum alloying additives effects on tungsten disilicide corrosion resistance, studying plasticity properties and oxidation rate

20 p3561 A69-37376

Molybdenum disilicide oxidation kinetics at various temperatures by thermal conductivity method, determining oxidation rates and activation energy

20 p3567 A69-37780

Thermodynamic properties of exchange reaction of Ti, Nb, Mo and W disilicides with graphite and pyrographite systems

22 p3970 A69-40638

DISINTEGRATION

Absolute cross sections for coincidence detection of deuteron breakup by 42 Mev alpha particles, showing He 5 and Li 5 final state interaction peaks

03 p0472 A69-13469

DISKS

Electron bombardment ion source generated Ar plasma beam to study wakes of disks and spheres, considering plasma interaction with bodies [AIAA PAPER 69-79]

06 p0865 A69-18200

DISKS [SHAPES]

NT ROTATING DISKS

Torsional oscillations of elastic half space set up by rigid circular disk examined by integral equation method

01 p0169 A69-10809

Electroerosion effect on fabrication of small disks for direct examination by electron microscopy, using refined and heat treated aluminum

03 p0427 A69-12880

Constant thickness disk temperature field for inhomogeneous boundary conditions, considering roots of characteristic equations determination

04 p0685 A69-14498

Circular disk stress-strain state due to thermoelastic strain applied at disk sector edge

04 p0681 A69-15171

Natural frequencies controllability by induced thermal membrane stresses examined for thin disk

04 p0682 A69-15494

Phantom disk encoder for arc second digital position transducers

05 p0766 A69-16748

Compressibility parameters role in pressure distribution derived for radial laminar compressible fluid flow between two disks

07 p1121 A69-19321

Logarithmic decrement and period of disks performing torsional oscillations measured in viscous fluid, noting dependence on oscillation amplitude

08 p1417 A69-20781

Fatigue behavior of composite disk modified from previously evaluated boron epoxy reinforced titanium compressor disk

09 p1619 A69-22323

Weight minimizing of circular disk subjected to behavioral and side constraints, considering resonance frequency of vibration and tolerances [ASME PAPER 69-VIBR-1]

10 p1700 A69-24159

Characteristic equation for corrugated surface wave line loaded with uniformly spaced thin metallic disks excited in E mode, considering spacing and groove depth

12 p2028 A69-25899

Velocity potential function for flow over disk shaped wing near screen, noting aerodynamic lift and drag

13 p2199 A69-27524

Steady rectilinear translational motion of circular disk-shaped slightly bent wings near solid wall in incompressible fluid medium in absence of vortices and external forces

15 p2547 A69-30583

Stress-strain state of circular disk with diametral cracks determined by approximating limiting equilibrium equation

15 p2708 A69-30663

Equilibrium equations for elastic medium with stress couples, presenting first term of asymptotic expansion of solution for disk and simply connected region

16 p2871 A69-31830

Vortex ring production in liquid jet by vibration induced pressure pulses at orifice, discussing plates formed under high g vibration [AIAA PAPER 68-132]

16 p2770 A69-31880

Fuel cell oxygen electrode problems, noting oxygen ionization reaction and disk electrodes role

16 p2739 A69-32416

Subsonic and supersonic turbulent air jets expansion over perpendicularly positioned plane disk obstacle, deriving equations for pressure distribution and stagnation temperature

18 p3123 A69-34990

Flow breakdown in wind tunnel tests of high disk loading systems at low forward speeds, investigating downwash distribution effect using disk loading and airfoil models

18 p3119 A69-35230

Transient thermal stresses in heat treated elastic-perfectly plastic disks with temperature dependent yield stress, considering stress distribution sequence and residual stresses

20 p3629 A69-37974

Stress strain state in thin circular elastoplastic disks under axially symmetric transient temperature distribution, noting moving annular plastic deformation region

20 p3629 A69-38028

Automatic electropolisher for copper disks

21 p3720 A69-38597

Enlargement of circular hole in disk with kinematic hardening and Tresca yield function compared with isotropic hardening

21 p3840 A69-39297

Nadai and Zyczkowski stress analysis for Tresca yield condition reexamined for determination of critical angular velocity of solid elastic perfectly plastic disk

23 p4235 A69-42480

DISLOCATIONS [MATERIALS]

NT CRYSTAL DISLOCATIONS

NT EDGE DISLOCATIONS

NT SCREW DISLOCATIONS

Graphical representation of stress distributions and forces on dislocations

03 p0529 A69-13973

Structural changes and cold shortness of molybdenum in deformation

04 p0615 A69-14637

Pointwise limitation of field dislocation and bending moments in elastic plates

05 p0831 A69-15599

Mathematical theory for describing geometric structure of simple bodies, discussing dislocation distribution and exact field equations for elastic bodies motion

05 p0834 A69-15731

Dual continuum model of nonelastic processes in elasticity and dislocation theory, including incompatibility effects of interaction forces between structural elements

10 p1799 A69-23152

Plastic energy dissipation and crack surface displacement of penny shaped crack in elastoplastic material

10 p1803 A69-24030

Fracture and equilibrium position of dislocations in discrete and continuously distributed dislocations arrays including stress due to crack, energy considerations and crack initiation

13 p2358 A69-27222

Necked tension specimens profiles for rigid-plastic nonhardening materials determined from compatibility equation for displacements and unloading rate

15 p2704 A69-30292

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation

17 p3052 A69-32984

Somigliana dislocations effects on displacement field in linear isotropic elastic medium represented by integral with respect to line delineating surface

17 p3053 A69-33020

Linear isotropic elastic continuum dislocations distribution, deriving transport equations by statistical methods, noting analogy between energy/momentum and MHD equations

18 p3212 A69-34352

Burger condition for distortion field of dislocation lines in continuous medium, considering arbitrary shape in arbitrary motion

19 p3439 A69-36477

Dislocation effects on stress corrosion of metals, discussing behavior of porous structure and metal/corrosion film interface under applied stress

19 p3349 A69-36886

Precipitation hardening, microstructure and dislocation influence on intergranular stress corrosion cracking /SCC/ of high strength Al alloys examined by transmission electron microscopy

19 p3351 A69-36898

Plastic deformation and dislocation damping of cemented WC-Co alloys studied by compressive testing at room temperature

21 p3744 A69-38736

Serrated yielding at high temperatures from dislocation theory viewpoint, considering critical strain relation to temperature and strain rate

21 p3749 A69-39710

Thermodynamics of elastoplastic materials with dislocation motion related to internal state variables, including case of rate independent plasticity

23 p4226 A69-41537

DISORDERS

Fast reversible switching between highly resistive and conductive states in various disordered semiconductors, using electric field

01 p0140 A69-11248

DISORIENTATION

NT DISORDERS

Spatial disorientation as factor in accidents in operational command, noting relatively high experience level of involved pilots

07 p1072 A69-19431

Man psychic activity interference resistance, discussing stress effects characterized by theta and delta rhythms

08 p1262 A69-19839

DISPENSERS

Truss framework for support of eight 100-lb satellites through Titan 3C launch and dispensing of satellites at predetermined times, discussing materials and fabrication

09 p1512 A69-22369

DISPERSING

Airport warm fog dispersal, discussing full scale aircraft seeding of polyelectrolyte materials, noting ground dispenser

01 p0054 A69-10149

Dispersion and average monthly numbers of whistlers for propagation trajectories during solar activity minimum, discussing electron concentrations in magnetosphere

09 p1485 A69-21531

Dispersion and average monthly numbers of whistlers for propagation trajectories during solar activity minimum, discussing electron concentrations in magnetosphere

16 p2783 A69-32526

DISPERSION

Difference schemes implementation through fractional time step and phase error methods reduce dispersion

04 p0591 A69-15282

Dispersion of paraffin cork after instantaneous shock heating, noting expansion at various isentropic indices

19 p3301 A69-36839

Dispersion and correlation function for atmospheric transparency due to water vapor from statistical model of absorption bands and effective mass

21 p3759 A69-39113

Electromagnetic wave propagation in semiconductor plate under constant electric field, studying nonstandard carrier energy dispersion law effects on refractive index

22 p3994 A69-40751

DISPERSION PRECIPITATION HARDENING

U PRECIPITATION HARDENING

DISPERSIONS

NT AEROSOLS

NT COLLOIDAL PROPELLANTS

NT COLLOIDS

NT EMULSIONS

NT FOG

NT LIQUID-GAS MIXTURES

NT NUCLEAR EMULSIONS

NT PHOTOGRAPHIC EMULSIONS

NT SMOKE

Scattering data for optical diagnostic measurements on two component suspensions or gases, using random distributions of spheres

04 p0555 A69-14282

Dispersion in gel permeation chromatography, noting eddy diffusion in chromatographic columns

04 p0555 A69-14885

Laser beam propagation in scattering media, noting attenuation coefficients for coherent and incoherent radiation

08 p1328 A69-21092

DISPLACEMENT

Generalized plane stress concept extended for mathematical model to study out of plane displacement restraint in thin plates

01 p0165 A69-10114

Reciprocal theorem for displacements of solid skeleton caused by fluid sources action in infinite consolidating space

05 p0835 A69-15869

Linear analysis of strain in continua in terms of one-one correspondence, relative displacement and stretch dyadic
07 p1236 A69-19445

Curved tetrahedral and triangular elements in matrix displacement method covering linear and non-linear cases
08 p1415 A69-20631

Reissner algorithms for displacements of bent plate represented in finite series form as solutions of Euler equations
10 p1793 A69-22883

Variational method of displacements for calculating positive Gaussian curvature shells with allowance for shear strain, considering shallow shell equations and symmetrical load
12 p2178 A69-26006

Displaced layer thickness dependence on air injection parameters measured in wind tunnel
13 p2245 A69-27385

Iterative solution for difference equations approximating displacement vector determination problem in theory of elasticity, investigating algorithm convergence
14 p2536 A69-29479

Finite element analysis of flat rectangular panels, developing equilibrium equations based on specified displacement modes
15 p2708 A69-30667

Surface displacements at end of elastic semiinfinite circular cylinders due to annular axisymmetric loading, employing Boussinesq solution
15 p2711 A69-30872

Thermal stresses and displacements in isotropic inhomogeneous rotating circular disk with axle hole under steady temperature field
15 p2712 A69-31016

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement matrix analyses, discussing local subelement, natural modes, cross sectional resultants, etc
16 p2872 A69-32025

Somigliana dislocations effects on displacement field in linear isotropic elastic medium represented by integral with respect to line delineating surface
17 p3053 A69-33020

Transposition formula for finite displacements of solid body having fixed point relative to fixed axes
18 p3172 A69-34589

Stress and displacement waves propagation in thin walled elastic cylindrical shell under compressive axisymmetric force based on momentless theory
18 p3218 A69-34600

Weak displacements of opaque objects and optical distortion in solid state lasers analyzed by holographic interferometry
19 p3308 A69-35909

Displacement patterns for buckled shapes of axially compressed thin walled circular, cylindrical and conical shells
19 p3443 A69-36793

Relative displacement spectra analysis illustrating shock spectra errors, comparing real system response with simple single degree of freedom system response
20 p3548 A69-37301

Vibrational displacement phase measurement by Michelson interferometer with laser source
20 p3538 A69-37320

Airframe stability of VAK 191 examined by displacement method, using matrix calculations within Automatic System of Kinematic Analysis
20 p3462 A69-37515

Reaction forces calculated for system of connected solid bodies of various composition during accomplishment of given motion
21 p3771 A69-39085

Saint Venant principle of elastic equivalence of kinematically equivalent displacement systems at small surface area of elastic body
22 p4048 A69-41276

DISPLACEMENT MEASUREMENT

Time dependent tube wall radial displacement during explosive welding as function of distance from initial explosion
02 p0254 A69-12675

Electro-optical tracking devices for displacement and/or dislocation measurement without physical contact
05 p0763 A69-15986

Glass fiber optical angular displacement noncontacting nonloading transducer suitable for measuring torsional vibrations
06 p0923 A69-16929

Linearization unit for compensating hyperbolic characteristic of capacitive displacement sensor used for contactless displacement measurement
08 p1317 A69-20879

Temperature and displacement fields in unbounded elastic space due to instantaneous point heat source action
09 p1621 A69-21495

Structural damping coefficient of metals determined from complex Young modulus with transmissibility, using mass loaded cantilever beam experiment [ASME PAPER 69-VIBR-36]
10 p1807 A69-24175

Natural mode structural analysis matrix methods for small displacements, discussing curved local subbeam in space and circular arch
11 p1969 A69-24374

Deformation measurement by laser pulse holographic method, discussing laser source choice criteria
12 p2087 A69-26175

Resistance type bonded strain gages for seven adverse environments, discussing installations and transducers
12 p2099 A69-27165

Interferometric displacement transducer for measuring linear displacements up to one and one-half inches
15 p2614 A69-31280

Displacement of rectangularly mouthed pitot tubes in turbulent tube flow, determining roles of wall and shear effects
17 p2976 A69-34049

Wedge fringes visibility and localization in hologram interferometry during focusing on surface under examination for displacements
22 p3943 A69-40016

Short range telemetering strain gage system with astable multivibrator transmitter for measuring intercoupling displacement and shaft torque
22 p3946 A69-40314

Differential capacitance transducer measuring small displacements in heated transformer oil, air, castor oil or glycerin
22 p3946 A69-40439

Plane-truss joints displacements determined by graph-analytic method, discussing representation of fictitious forces and moments
23 p4225 A69-41420

Green formula and fundamental solution for determining displacements and stresses in contour integral form for plate bending problems
23 p4230 A69-42002

Holographic interferometry for measuring small static displacements of diffusely reflecting surfaces
23 p4167 A69-42185

Wave generation in infinite micropolar elastic solid, determining displacement and rotation fields and strain state
24 p4406 A69-43731

DISPLAY DEVICES

NT ANEMOMETERS
NT APPROACH INDICATORS
NT FLOW DIRECTION INDICATORS
NT HOT-WIRE ANEMOMETERS
NT KINOFORM
NT PLAN POSITION INDICATORS
NT POSITION INDICATORS
NT RADARSCOPIES
NT SONIC ANEMOMETERS
NT SPACECRAFT POSITION INDICATORS
NT SPEED INDICATORS
NT TACHOMETERS
NT WIND VANES

Fluidic display systems, discussing thermochromic modules and decoder with miniature components
01 p0078 A69-10155

Man machine relationship in VSTOL control display, discussing inflight simulators, emphasizing NASA X-14 and CH-3C programs
01 p0010 A69-10452

Airline area navigation system functions for developing map type pictorial display system including digital computer, cockpit control unit and microfilm charts
01 p0112 A69-10453

All-weather landing flight director systems and fault warning display simulator studies of Boeing 707-720B aircraft in Category 3-C environment
01 p0010 A69-10455

Head-Up Display /HUD/ flight information applied to civil aviation, noting operational safety improvement and pilot work load reduction
01 p0020 A69-10635

Modular three dimensional mockup technique for economizing and facilitating design of control and display equipment
02 p0202 A69-11953

Large scale information displays for group sharing in air traffic control, military operations and organization management
02 p0250 A69-12159

Operator handedness effect on control display movement stereotypes
02 p0203 A69-12212

Aircraft cockpit displays design for flight control and navigation, discussing integration, pictorial realism, moving part, pursuit tracking, frequency separation and optimum scaling
02 p0203 A69-12213

Navigation techniques for emergency helicopter services in medical evacuation and air/sea rescue missions, discussing displays and search patterns
02 p0279 A69-12363

Manual optimal guidance schemes for space vehicles to minimize computational and display requirements for pilot task loading
02 p0279 A69-12365

Two photon fluorescence technique for display of picosecond laser pulses, discussing mode locking and ruby laser contrast ratios
02 p0259 A69-12654

Alpha numerical and symbolic information combined for head up display /HUD/ systems, providing pilot with takeoff director
03 p0379 A69-12885

Navigational and tactical data with correlative map information provided on single CRT display in aircraft, storing map data on video tape
03 p0464 A69-13246

Vertical contact analog display /VCAD/ design, emphasizing need for integrated and supplementary information to pilots in systematic way
03 p0379 A69-13361

Automatic all-weather landing system for scheduled civil passenger aircraft, discussing safety, display devices, Category 2 and 3 conditions
03 p0465 A69-13697

Laser display technology, discussing experimental systems, light sources, modulation and scanning
03 p0431 A69-13850

Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection
04 p0600 A69-15028

Display techniques, discussing cold cathode luminous gas discharge /plasmas/ tube, electroluminescence and cathode ray tube
04 p0600 A69-15029

Research center for investigating man/computer interaction, discussing display systems, computers, languages and data entities
04 p0566 A69-15342

Graphics system using computer configuration connected by conventional voice lines, noting hardware and components
04 p0566 A69-15343

Visual factors of laser displays providing human factors recommendation for several visual variables
05 p0760 A69-15591

Plastic virtual infinity lens system for large aperture cathode ray tube direct view simulator displays
05 p0760 A69-15592

Multilevel modeling structure for interactive computer graphic design, discussing conversational display manipulation program and interconnection with analysis program
05 p0724 A69-16381

Three dimensional computer graphic modeling program, discussing SIGHT and LEGER programs
05 p0724 A69-16383

Program to study interactive graphic display console systems use for solving mechanical design problems involving plate cam and follower mechanisms
05 p0724 A69-16384

Typewriter keyboard computer system with CRT display having closed circuit TV link contents of file to add, delete or change information
06 p0891 A69-17204

Filter effectiveness in improving air to ground target identification performance on TV display
06 p0887 A69-17210

Map information display methods comparison for tactical image interpreters
06 p0924 A69-17212

Holography for display devices, nondestructive testing, quality control, high speed, microscopy, acoustic testing, sonar, data storage, etc
06 p0928 A69-17873

Light valving techniques applied to large screen display of computer generated video information, noting electron beam control mechanism for transmitted light
06 p0928 A69-17922

Photorecording techniques for command and control systems requirements, discussing association with large screen computer generated CRT projection display equipment

06 p0928 A69-17923

Laser displays for information transfer to provide improved computer driven read-out techniques, noting real image and holographic displays

06 p0928 A69-17924

Predictive display technique for remote manual control of roving lunar and planetary surface vehicles

06 p0928 A69-17925

Reading and reliability efficiency comparison in round vs vertical aircraft displays

06 p0883 A69-18025

Electrostatic storage display tube characteristics, construction, applications and reliability

07 p1101 A69-18655

Control-display panels design for accurate response with electronic and mechanical equipment, showing display stimulus and control response correspondence in rectangular configuration arrangement

07 p1070 A69-18907

Laser color TV projection-display system using moving mirrors and dual polarization scanner

07 p1137 A69-19740

Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity

08 p1312 A69-19968

Aircraft head-up display systems emphasizing all-weather operations and equipment characteristics

08 p1315 A69-20451

All-weather head-up displays /HUD/, discussing operational usage, hardware availability and design philosophy

08 p1315 A69-20452

Control and recording device for parameters and information relating to takeoff and landing, using detection elements and cross wire on runway

08 p1347 A69-20780

Peripheral fluidic devices for sequencing and monitoring machinery in hazardous areas, describing circuits

[AGARDOGRAPH-118] 08 p1257 A69-20954

Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications

09 p1492 A69-21394

UHF telemetry conversion program at Pacific Missile Range, describing antenna, receive-record and separation display systems

09 p1454 A69-21800

Flight test evaluation program for airborne multisensor electro-optical display systems performance in TV mode under variety of optical conditions

[AIAA PAPER 69-317] 09 p1500 A69-22387

Pulsed RF spectra analyzer displays, noting responses to CW and pulsed signals and Fourier and pulsed repetition rate lines

09 p1460 A69-22791

Graphic electronic visualization equipment for computerized design

10 p1660 A69-23795

Manual control displays for instrument landing approach of large subsonic jet transport, evaluating closed loop system performance and scanning workload

10 p1650 A69-23877

Device to simultaneously observe integral and differential field effect curves on oscillograph screen as function of continuously varying field

10 p1698 A69-24210

Electro-optical tracking device with pyramidal reflector for field of view dissection, determining dead zones and trajectories for pointing error correction

10 p1698 A69-24219

Aircraft engine instrument displays evaluated by human factors, noting vertical scale design

[SAE PAPER 690328] 11 p1829 A69-24488

Electric outside-in attitude gyro display system prototype tested and compared with contemporary inside-out display

[SAE PAPER 690326] 11 p1890 A69-24507

Soviet book on electroluminescent devices covering panels, indicator contrast levels, control, multicolor indicators, image conversion and storage and optoelectrical systems

11 p1850 A69-24976

Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity-optics display

[SMPT PAPER 105-74] 12 p2055 A69-25768

Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation

12 p2055 A69-26265

Automatic plotting devices for graphic readouts in analog and digital computers

12 p2091 A69-26303

Alignment/test rig for head-up displays using laser light pencils

12 p2091 A69-26304

Man machine interactive structural analysis using digital computer with CRT display, detailing design

12 p2035 A69-27098

Designs and capabilities of digital processing systems for automatic air traffic control radar information stressing future use of display for computerized control

13 p2295 A69-27332

Pictorial display techniques aiding air traffic and aircraft control, discussing projection and directly viewed display

13 p2296 A69-27335

Computer based data handling and display for relating remote sensor signals to ground truth information derived from aerial photographs

14 p2416 A69-29534

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature

14 p2449 A69-29562

Navigational information display in aircraft, discussing moving map technique and mechanization

15 p2558 A69-30692

Flexible glass fiber optics, discussing total internal reflection, light and image transmission, digit display and waveguide for laser communication

16 p2789 A69-31933

Airborne digital computer and display devices role in navigation management, discussing data processing and hybrid navigation systems

16 p2809 A69-32260

High intensity light adaptation effects on visibility of raster scan, TV type and avionic displays for symbol luminance needs

16 p2746 A69-32788

Integrated trajectory error display /ITED/ for flight path control of helicopters and VTOL, describing principles governing display synthesis

[AHS PAPER 314] 17 p3001 A69-33541

Situation/command system displays and maneuvers for collision avoidance systems, discussing pilot preferences

17 p3002 A69-34096

Airborne electric power systems maintenance aids, describing design and operation of annunciator for establishment and display of system failure causes

17 p2905 A69-34112

Self monitored subsystems in automatic flight control of Concorde, describing operation mode and landing display

17 p3003 A69-34196

Computer graphics engineering applications in line drawing displays for industry, including design programs and color TV flight simulation

18 p3106 A69-34659

Situation displays and flight instrument development including head-up, vertical tape and map systems

18 p3170 A69-34858

Luminophors for carbon dioxide laser radiation visualization noting controlled sensitivity, quick response and resolution

18 p3153 A69-35259

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc

[AIAA PAPER 69-798] 19 p3367 A69-35632

Controlled-variable prediction display based on Taylor series computation, describing acceleration system simulator and human operator performance

19 p3313 A69-36414

Heated body cooling off study via temperature field isothermal lines visualization on TV screen

20 p3539 A69-37437

Receiving and display telemetry system for obtaining direct ionospheric topside ionograms from Alouette 1 satellite, discussing video data tape recording cost

20 p3507 A69-37861

Radar digital processing and display system for air traffic control with IC central processor and discrete data transmission over telephone lines from remote sites

21 p3760 A69-38328

Psychology and physiology of vision in relation to large screen display design, discussing effects of symbol size and spacing, color usage, etc

21 p3662 A69-38330

Simulation and display for radar ground-backscatter signatures by computer ray tracing, using model ionosphere containing realistic traveling disturbances

21 p3717 A69-39280

HF direction finder for display of time varying multimode propagation phenomena, using analog computer and phase sensitive interferometer

21 p3677 A69-39456

CRT graphic display/plotter for small digital computers, describing device operation, control and applications

21 p3679 A69-39608

EEG patterns computerized spatio-temporal display technique using CRT and motion picture camera

21 p3668 A69-39864

Aircraft navigation system requiring computer and display for approach guidance to circular orbit over fixed ground area

[AIAA PAPER 69-986] 22 p3978 A69-40366

Horizontal Situation Display /HSD/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection

[AIAA PAPER 69-987] 22 p3908 A69-40367

Cockpit displays for transport aircraft noting digital techniques and flight control-navigation integration

22 p3946 A69-40486

CRT display system coupling interface with magnetic storage determined from algorithms and time diagrams, describing character storage and system logic design

22 p3908 A69-40936

Reconstruction properties of image plane holography for producing bright white light displays, using reference beams

23 p4164 A69-41627

Photochromic film behavior under high power argon ion laser excitation studied for display and computer memory applications, using excitation model

23 p4173 A69-41629

Moving map pictorial display system for on board capability of area navigation, noting crew reaction

[SAE PAPER 690393] 23 p4186 A69-41663

Flight indicators monitoring by pilots, describing physiological and psychotechnical criteria for dials and clocks arrangement to improve efficiency

23 p4108 A69-41827

Senior commercial jet pilots ability to visualize flight instruments

23 p4089 A69-41829

Head-Up Display /HUD/ incorporated with autopilot for human participation in flight control for all-weather operation

23 p4109 A69-41871

Hybrid display for data visual display using electroluminescent and thermochromic technologies for wide range of ambient illumination

24 p4313 A69-42899

Colors production on electroluminescent display using phosphors impressed-frequency/emission-color relationships together with chromatic biasing

24 p4286 A69-42900

Display system design principles and procedures, discussing checklists, formal procedures and behavior theory

24 p4274 A69-43017

Sensory information processing model for tactile perception using array of airjet and piezoelectric stimulators applicable to display design and nervous system investigation

24 p4276 A69-43273

DISPOSAL

U WASTE DISPOSAL

DISSIPATION

Chebyshev filter design problems including minimum highest dissipation loss, bandwidth, resonators, etc

10 p1665 A69-23875

DISSIPATORS

U DISSIPATION

DISSOCIATION

NT AUTOIONIZATION
NT GAS DISSOCIATION
NT PHOTODISSOCIATION
NT THERMAL DISSOCIATION

Nonequilibrium dissociation effects on constant pressure laminar mixing for diatomic molecules and atoms, analyzing concentration and temperature of free shear layer

04 p0588 A69-14733

Dissociation energy and vibrational terms of ground state hydrogen

05 p0796 A69-15908

Hydrogen ions collision-induced dissociation cross section angular dependence measured, showing qualitative agreement with theoretical predictions

05 p0798 A69-16698

Dissociation of hydrogen on tantalum using modulated molecular beam mass spectrometry
06 p0960 A69-17107

Dissociation equilibrium of negative H ions in solar type stellar atmospheres, noting H molecule vibrational and rotational levels and continuous thermal radiation
07 p1223 A69-19635

Dissociation equilibrium of diatomic molecules in solar atmosphere, comparing concentration above photosphere to MgH
14 p2528 A69-29963

Half maximum temperature of diatomic gases determined by extending relation between specific heat and molecular dissociation to diatomic molecules [DVL-899]
15 p2656 A69-31102

Molecular concentration-optical depth curves for combinations of two photospheric and two facular models, noting lines contrast dependence on dissociation energy
18 p3204 A69-35391

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced
19 p3375 A69-35985

Quantum-mechanical theory of unimolecular kinetics and predissociation developed from generalized Fano theory of resonant scattering
22 p3986 A69-40724

O-hemoglobin dissociation curve shape effect on O affinity of hemoglobin
23 p4095 A69-42086

Thermodynamic calculation of equilibrium constant and homolytic dissociation degree of tetrafluorohydrazine based on enthalpy and statistical entropy
24 p4280 A69-42788

DISSOLUTION

U DISSOLVING

DISSOLVING

Ellipsoidal gas bubble dissolution in low viscosity fluid, discussing rate of steady motion, deformation degree and diffusion rate
07 p1120 A69-18990

Lifetime of highly soluble isolated dense spherical solute particle in solvent, taking into account molecular diffusion, kinetic limitations, etc
10 p1651 A69-22939

DISSYMMETRY

U ASYMMETRY

DISTANCE

NT DEBYE LENGTH
NT MISS DISTANCE
NT MISSILE RANGES
NT RADAR RANGE
NT RADIO RANGE
NT RANGE AND RANGE RATE TRACKING
NT REENTRY RANGE

Neutral hydrogen content in directions of pulsars related to distance estimates
01 p0149 A69-10271

Hovercraft range operating at constant speed as function of design efficiency, power apportionment, fuel consumption and initial specific resistance
03 p0367 A69-13909

Pulsar distance estimates based on evaluation of galactic H absorption of 21 cm radiation
06 p1012 A69-18225

Pulsar distance estimates, discussing effect of interstellar electron and H densities and temperature dependence of H density-electron density ratio within disk
08 p1397 A69-20698

Short range passenger aircraft, considering payloads, weights and economical classification
13 p2201 A69-27294

Distance and mass-luminosity relation for Hyades stars relative to sun-Sirius type stars
13 p2339 A69-27565

Quasar red shifts distance dependence indicated by visually bright quasar faintness in radio range
13 p2344 A69-27635

Spiral galaxy linear diameter relation to luminosity applied to Virgo galactic clusters, noting effect on distance modulus and Hubble constant
19 p3427 A69-36652

Pulsar distance determined by electron content in line of sight to pulsar compared with neutral H amount integrated through galaxy in pulsar direction
20 p3597 A69-37409

Discreteness of distances to extragalactic objects, tabulating red shift values from Wilson formula for galaxy clusters
21 p3802 A69-38843

Pulsars dispersion measure and distance relationship, particularly for Crab Nebula pulsars
23 p4220 A69-42381

Flight range and fuel consumption formulas of power gliders used for transportation compared with automobiles
24 p4253 A69-43142

DISTANCE MEASURING EQUIPMENT

NT ALTIMETERS
NT OPTICAL RANGE FINDERS
NT RADIO ALTIMETERS
NT RANGE FINDERS

Electro-optical tracking devices for displacement and/or dislocation measurement without physical contact
05 p0763 A69-15986

Conversion of range telemetry systems /CORTS/ program noting installations and standardization
05 p0743 A69-16306

Distance measurement by distance relay circuit composed of intermediate current transformers and rectifier bridges
05 p0765 A69-16746

Photoelectric measurement of chromospheric heights by method requiring neither high telescopic resolution nor best seeing, discussing trials during September 1967
08 p1385 A69-20070

Radio location system based on measuring distance between object and two stationary satellites, noting application to air traffic over North Atlantic
09 p1537 A69-21269

Distance measurements of several hundred feet to resolution of three millionth of inch by applying He-Ne laser interferometer
09 p1519 A69-22475

Cepheids variations used to measure intergalactic distances, noting method of calibrating absolute Cepheid luminosity
10 p1780 A69-23646

VOR/DME ground facilities accuracy improvement by complementing navigation computation with signals from inertial navigation system [SAE PAPER 690338]
11 p1914 A69-24499

Distance vs time and velocity vs time measurements for high speed model missiles by means of laser interferometry and optical Doppler shift method
11 p1886 A69-25042

Communication systems in interplanetary space covering telemetry, remote control, Doppler and distance measurements, coherent PCM/PSK/PM, demodulation, deep space network, etc
12 p2027 A69-25875

Astronomical unit determined by measuring radial velocity of radio wavelength spectral line source
13 p2350 A69-27822

Space direction by compensation method of cosmic triangulation network, using laser and optical observations of artificial satellites
15 p2699 A69-31377

Auroral absorption influence on ionospheric wave propagation calculated for distances over 4000 km
16 p2749 A69-31603

Laser measurements of earth-moon distance applied to determinations of earth axis motion and lunar shape, relief, dimensions and motion
16 p2788 A69-31624

Stellar group Ba 6 distance measured using three color photometry in RGU system
16 p2854 A69-31650

Open galactic cluster NGC 2254 distance determined by three color photometry in RGU system
16 p2854 A69-31651

Pulsars distance determined using H II region data covering line of sight stars and Galaxy hydrogen distribution
17 p3026 A69-32858

Lunar rotation elements determined from distances between Moesting A and limb craters, using Iakovkin position angle method
17 p3028 A69-32876

Diademe satellites stabilization system to measure station-to-satellite distance by laser pulse, discussing reflector, magnet for attitude control, damping device, etc
17 p3046 A69-33224

Proper motions, color magnitude and distance modulus of stars in galactic cluster in direction of Large Magellanic Cloud using Cape wide angle photometry
17 p3034 A69-33411

Cosmic ray shower axis mean distance from apparatus determined by measuring muon to charged particles densities ratio
17 p3024 A69-33580

Cosmic ray shower axis mean logarithmic distance from apparatus calculated by transforming shower recording frequency radial distribution to lin-log coordinate system
17 p3024 A69-33581

Optical distance measurement using laser and atmospheric dispersion method through average refractive index determination over path
18 p3152 A69-35198

Electrooptical distance measurement based on laser pulse traveling time and phase measurements to determine satellite range
18 p3103 A69-35199

Radio distance meter design for accurate distance measurement, discussing transit time and advantages over optical meters
18 p3139 A69-35493

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data
19 p3432 A69-36633

VOR/DME information augmentation by air data /airspeed/ for positional accuracy improvement, describing error sources, optimum data filter and system sensitivity and performance [AIAA PAPER 69-841]
21 p3762 A69-39372

Distance measuring method limitations for modulated CW laser determined by laser transmitter receiver in conjunction with retroreflector target fixed position
21 p3739 A69-39457

Laser application to distance measurement in air for determining atmospheric influence, using two wavelengths
22 p3959 A69-39901

Astronomical unit determination, discussing dynamical and radar methods and Doppler shift of neutral hydrogen line spectra in radio astronomy method
22 p4022 A69-40464

Target distance and direction monocular estimates with stabilized and nonstabilized retinal images, finding eye movements not improving spatial judgment accuracy
22 p3878 A69-40838

Cepheid variable stars distance estimated from UVB three color photoelectric photometry data
22 p4031 A69-40943

Airline area navigation test programs involving use of VOR/DME signals and inertial navigation system within air traffic control system
23 p4185 A69-41662

Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program
23 p4138 A69-41781

Geographical position coordinates of radio operator determined by distance difference measurement using Loran and digital computer methods
23 p4186 A69-42027

DISTANCE PERCEPTION

U SPACE PERCEPTION

DISTILLATION

Numerical integration stability of differential equations, noting limiting integration step size for unsteady distillation
02 p0273 A69-12478

Vacuum distillation determination of O in Li, evaluating accuracy through O additions and recoveries, method blank and residue identification
22 p3897 A69-40932

DISTILLATION EQUIPMENT

Vacuum distillation technique for isolation and recovery of alkali metal reaction products with Ta, Ni, V and oxygen
01 p0083 A69-10927

DISTORTION

NT FLOW DISTORTION
NT SIGNAL DISTORTION
NT SURFACE DISTORTION

Visual distortion in discrimination of figure proportion
06 p0875 A69-18022

Compressor to inlet distortion tolerance design techniques for gas turbine compressors, noting rotor matching, blade chord length, blade geometry, etc [ASME PAPER 69-GT-115]
09 p1572 A69-22525

He-Ne laser light coherence distortion by atmospheric turbulence
11 p1894 A69-24452

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system
11 p1885 A69-24848

Nonlinear holograms distortions analyzed by five point method utilizing relation between irradiance and amplitude transmittance of photographic emulsion
12 p2090 A69-26255

Distortionless propagation of light through optical two level atoms medium, considering relation to Poynting theorem, hyperbolic secant solution and pendulum analogy
12 p2130 A69-26313

Burger condition for distortion field of dislocation lines in continuous medium, considering arbitrary shape in arbitrary motion
19 p3439 A69-36477

Holographic technique for reduction of image distortion during penetration through inhomogeneous medium
24 p4314 A69-42975

DISTRIBUTED AMPLIFIERS

Transient response of distributed gain amplifier employing m-derived filters and vacuum tubes
13 p2235 A69-28516

RF band multimode parametric pulsed oscillations in distributed system using one dimensional resonators
16 p2758 A69-31796

Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits
18 p3111 A69-34679

DISTRIBUTION [PROPERTY]

NT ANGULAR DISTRIBUTION
NT ANTENNA RADIATION PATTERNS
NT BOLTZMANN DISTRIBUTION
NT CHARGE DISTRIBUTION
NT CURRENT DISTRIBUTION
NT DIFFRACTION PATTERNS
NT ELECTRON DENSITY PROFILES
NT ELECTRON DISTRIBUTION
NT ENERGY DISTRIBUTION
NT FLOW DISTRIBUTION
NT FORCE DISTRIBUTION
NT FREQUENCY DISTRIBUTION
NT HOLE DISTRIBUTION [ELECTRONICS]
NT HOLE DISTRIBUTION [MECHANICS]
NT INTERFERENCE LIFT
NT ION DISTRIBUTION
NT LOAD DISTRIBUTION [FORCES]
NT MASS DISTRIBUTION
NT MOMENT DISTRIBUTION
NT NEUTRON DISTRIBUTION
NT PRESSURE DISTRIBUTION
NT RADIAL DISTRIBUTION
NT RADIATION DISTRIBUTION
NT SIDELOBES
NT SPATIAL DISTRIBUTION
NT SPECTRAL ENERGY DISTRIBUTION
NT STAR DISTRIBUTION
NT STRESS CONCENTRATION
NT TEMPERATURE DISTRIBUTION
NT VELOCITY DISTRIBUTION
NT VERTICAL DISTRIBUTION

Redistribution of potassium and argon in meteorites and rock samples, discussing thermal diffusion and grain size
08 p1405 A69-20926

Three dimensional log amplitude and phase fluctuation distributions of collimated and focused Gaussian beams propagated through random inhomogeneous medium, evaluating mean-square values
12 p2130 A69-26393

Correlation coefficients, comparing galactic X ray sources distribution with classical cepheids, old novae, planetary nebulae and Wolf-Rayet stars
12 p2171 A69-27155

MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters
13 p2307 A69-27499

Anomalous meteorological field distribution as observed by correlated stations, determining independent stations number observing same data
13 p2293 A69-27851

Far and near side lunar crater chains regularities in distribution and size
18 p3202 A69-35329

DISTRIBUTION FUNCTIONS

Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
01 p0085 A69-10210

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257

Molecular velocity distribution function in nonequilibrium flows, detailing asymptotic expansions in different velocity domains for weak shock
01 p0059 A69-10330

Odd and even translational two sample test statistics uncorrelated when combined sample distribution function is equally symmetric
01 p0106 A69-10925

Landau damping in plasma, noting competing effects of nonlinearities and collisions on formation of plateau in spatially homogeneous distribution function
01 p0133 A69-11215

Partial differential equation for distribution function in transport of charged particles in earth magnetosphere
01 p0147 A69-11320

Electron distribution function of isotropic homogeneous Lorentzian plasma subjected to frequency modulated electric field calculated by successive approximation method
02 p0285 A69-11543

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails
02 p0207 A69-11690

Trimodal solutions for strong shock structure in gas of spherocylindrical molecules
03 p0414 A69-13136

Linear processing effect on digital communications systems performance by channel impulse response and input-output relationship as distributional convolution equation
03 p0391 A69-13226

Extension of results of one dimensional representation theory treating nonGaussian processes as perturbations of log normal process to higher dimensions
03 p0392 A69-13248

Distribution functions for fast electrons near anode calculated by kinetic theory, assuming weakly ionized plasma with smaller Debye length than collision mean free path
04 p0635 A69-14764

Distribution free sequential probability ratio procedure for detecting signal in multiple resolution element radar
05 p0717 A69-15609

Mathematical theory for describing geometric structure of simple bodies, discussing dislocation distribution and exact field equations for elastic bodies motion
05 p0834 A69-15731

Electron distribution function effect on microwave emission and HF conductivity of weakly ionized discharge plasma
05 p0799 A69-15734

Electron distribution function for homogeneous weakly ionized gas in presence of alternating electric field, discussing solution of Boltzmann equations
05 p0797 A69-16604

Linear distributed parameter system identification by stochastic approximation, obtaining constant parameters sequentially
06 p0900 A69-17358

Electrostatic waves interaction to electrons in plasma characterized by bump-in-tail distribution function, deducing mechanism of wave particle interaction
06 p0966 A69-17521

Plasma diffusion in toroidal stellarator using integrals of drift equations for particle trajectories, determining distribution function
07 p1191 A69-18985

Kinetic description of inhomogeneous plasma in ring approximation, discussing Vlasov equation and velocity distribution function
07 p1193 A69-19034

Noncoherent scattering of atoms with Maxwellian distribution in moving atmosphere, discussing Doppler broadening expansion in Legendre polynomials
07 p1219 A69-19286

Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions
07 p1233 A69-19314

Angular intensity distribution of corpuscular radiation in time independent geomagnetic field characterized by particle velocity distribution
07 p1210 A69-19619

Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method
07 p1115 A69-19758

Plasma instability with isotropic ion or electron velocity distribution function /nonMaxwellian/, discussing magnetic field and particle energy distribution functions
08 p1359 A69-19949

Time dependent velocity distribution functions for carriers calculated in weakly ionized plasma in external electric field
08 p1362 A69-20265

Electromagnetic waves attenuation and scattering by rainfalls calculated using droplet distribution function
08 p1275 A69-20430

Electron energy distribution function in plasma heated by electron-cyclotron resonance in adiabatic trap determined from bremsstrahlung spectrum
08 p1365 A69-20547

Slow distribution function of magnetoactive plasma, deriving kinetic equation in quasi-linear approximation for analyzing particle-HF electromagnetic wave interactions
08 p1365 A69-20550

Particle-wave interactions in weakly turbulent collisionless plasma, discussing ensemble average distribution function, diffusion, nonlinear Landau damping and nonlinear instabilities
08 p1368 A69-20803

One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion
08 p1299 A69-21069

Postselection estimation of component reliability in multicomponent systems, considering cases of binomial and exponential distributions of random variables
08 p1322 A69-21099

Planckian stellar velocity distribution function, moduli and projections on coordinate planes determined by ellipsoidal approximation
09 p1589 A69-21370

Digital information transmission error characteristics determining error distribution over time and relation to distribution function of intervals between errors
09 p1454 A69-21795

General solution of Liouville equation for collisionless system of gravitationally interacting particles, with distribution function locally isotropic in momentum space
09 p1605 A69-22412

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
09 p1559 A69-22650

Quasi-linear relaxation of electron beam in magnetoactive plasma, noting instability of plateau in velocity distribution function
09 p1553 A69-22659

Rate estimates of convergence of multidimensional central limit theorem for sequence of identically distributed independent random variables with third order finite moments
10 p1719 A69-23400

Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals
10 p1731 A69-23437

Tracking filter steady state oscillation amplitude and phase distributions determined from Fokker-Planck equation for high and low noise levels
11 p1844 A69-24441

Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field
12 p2067 A69-26354

Partial differential equation with stochastic characteristics reducible to parabolic equation by introducing additional variables
12 p2121 A69-26366

Distribution function of multiple correlation coefficient for various sampling volumes and various numbers of predictors calculated using Fisher formula
13 p2293 A69-27843

Electron velocity distribution function in gaseous plasma with known collective oscillations and frequency/wave number relationship
13 p2313 A69-28327

Monograph on velocity distribution function in turbulent boundary layer, discussing hot wire anemometer for mean velocity, turbulence intensity and higher order moments determination
13 p2250 A69-28336

Cosmic ray showers components relationships, analyzing superhigh energy nuclear cascade development, discussing components distribution function at constant proton energy
13 p2332 A69-28410

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails
13 p2224 A69-28721

Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
14 p2453 A69-28747

Extremal system of adaptive circuits adjusted by random search with varying random step distribution function
14 p2425 A69-28824

Mathematical model of mechanical wear in surface friction based on approximation of cross section profiles, using Fokker-Planck equation for distribution function
14 p2455 A69-29331

Orientation distribution of lineal and areal elements in space, expanding density function definition of two dimensional lineal array
14 p2470 A69-29363

Graphical method for plotting contours of Rice distribution function as rocket-borne radar reflection data, determining leakage factor
14 p2416 A69-29536

Minimum error criteria for shock wave structure determined by applying Mott-Smith distribution to Boltzmann equations for rigid sphere gas
14 p2431 A69-29579

Electron energy distribution functions and energy transfer rates to inelastic levels of carbon dioxide and nitrogen in laser
14 p2460 A69-29603

Quasi-distribution function differential equation for laser field with nonMarkoffian character derived from density matrix master equation
14 p2486 A69-29633

Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution
14 p2499 A69-29847

Kinetic theory of fluctuations in turbulent plasmas based on construction of many particle distribution functions
14 p2502 A69-29989

Radial distribution functions for dense hydrogenous plasma near ionization temperature by solving Percus-Yevick equations
14 p2502 A69-29998

Distribution function of SNR from coherent optimal estimate of signal amplitude
15 p2564 A69-30149

Pressure fluctuation relaxation model to close turbulent distribution function equations at one point level, solving equation for rectilinear flows and periodic wake decay
15 p2591 A69-30906

Ionospheric VLF emission and particle measurements, discussing energy, distribution and flux of protons and electrons
15 p2605 A69-31425

Krylov functions determined by distribution theory and operational calculus, discussing deformations and statics of straight beams
15 p2715 A69-31475

Fluctuation spectra of monatomic gases, using two time probability distributions for distribution function autocorrelations
16 p2817 A69-31669

Heat transfer in rarefied gas plane Couette flow determined by BGK model and moments method of half range distribution functions
16 p2876 A69-31688

Electron distribution function for weakly ionized plasma under alternating electric and circularly polarized rotating magnetic field, noting cyclotron resonance
16 p2820 A69-31753

Automatic nonrepairable control elements reliability evaluated statistically with differentiable lifetime distribution function
16 p2764 A69-32199

Precipitation intensity measurements, obtaining distribution parameters from radar reflectivity at two wavelengths and microwave attenuation factor at third wavelength
16 p2806 A69-32265

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system
16 p2813 A69-32284

Electromagnetic noise in current sheet in geomagnetic tail, discussing effects on distribution function [AFCLR-69-0395]
16 p2781 A69-32317

Lynden-Bell statistical mechanics of relaxation in collisionless one dimensional stellar system, discussing low energy particles distribution
16 p2862 A69-32376

One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion
16 p2765 A69-32484

Water bag spherically symmetrical universe model, discussing system stability, distribution function representation and polytrope equivalency
16 p2866 A69-32813

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials
17 p3009 A69-32827

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions
17 p2951 A69-33257

Ion energy distribution function and density profile in strong implosion wave generated by theta pinch discharge, investigating compression wave in deuterium
17 p3013 A69-33821

Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment
17 p3014 A69-33829

Gas laser power dip in presence of elastic collisions, using equilibrium equations for particles velocity distribution function
17 p2983 A69-33972

Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas
18 p3179 A69-34438

Planckian velocity distribution function, moduli and projections on coordinate planes determined by ellipsoidal approximation
18 p3198 A69-34759

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial
18 p3124 A69-35170

Natural oscillations frequency spectrum of turbomachine impeller blades subjected to random variations determined with frequency distribution function obtained by moments method
19 p3436 A69-35844

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitian polynomials analyzed via ordinary differential equations
19 p3373 A69-36202

Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line
19 p3396 A69-36630

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form
19 p3396 A69-36631

Component hazard rate distribution functions from unit time and failure analysis, noting confidence statements and simulation studies
20 p3548 A69-37158

Electron momentum transfer cross sections by numerically solving electron energy distribution function from Boltzmann equation in Lorentz approximation
21 p3773 A69-38396

Quantum theory for single mode laser radiation, considering photon distribution function and mean field damping decrement by phase quantum fluctuations
21 p3737 A69-38996

Antenna array synthesis optimization for limited deviations of source distribution function from prescribed function
22 p3916 A69-40952

Distribution function for thermalization distances derived for infinite atmosphere with plane source in noncoherent light scattering
23 p4192 A69-42403

Optimal rule for decision to stop or continue observation of random variables after observing sequence of variables with continuous distribution function
24 p4341 A69-43235

DISTRIBUTION MOMENTS
NT MEAN
NT STANDARD DEVIATION
NT VARIANCE [STATISTICS]
Nonisotropic relaxation of Boltzmann gas in homogeneous space, expressing collision integral moments in terms of distribution function moments for any molecule
06 p0910 A69-17347
Shallow shells two dimensional theory including effects of transverse shear deformation and of moments turning about normal to middle surface
22 p4048 A69-41197

Optimal scheme of combining moment estimators set derived for computational simplicity and asymptotic efficiency
24 p4342 A69-43704

DISTURBANCE THEORY
U PERTURBATION THEORY
DISTURBING FUNCTIONS
Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances
09 p1476 A69-22717
Optimal controller design and transfer functions in linear stabilization systems subjected to unknown disturbances determined by variational calculus
13 p2259 A69-27425
Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances
16 p2765 A69-32550
Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements
19 p3402 A69-35934

DISULFIDES
Disulfide effects on jet fuel operating characteristics and demercaptanization influence on thermal stability, corrosive action and sedimentation
01 p0142 A69-11098
Aqueous hydrazine solution effect on Ti disulfide crystalline structure
23 p4112 A69-41426

DITCHING [LANDING]
Passenger and crew members escape from aircraft following water accidents, discussing ditching, evacuation, survival and rescue facilities
08 p1254 A69-20453
Safety measures for aircraft ditching at sea, discussing low wing configuration advantages and life rafts
14 p2392 A69-29697

DITHIOLS
U THIOLS
DIURESIS
Short latency antidiuresis following initiation of food ingestion by food deprived rats, noting possible signaling factor
01 p0014 A69-10860
Physical factors affecting proximal and distal tubular sodium reabsorption in dogs undergoing water diuresis
13 p2210 A69-28482
Portal blood pressure decrease effects on diuresis in unanesthetized rats, discussing osmotic diuresis
23 p4094 A69-42074
Diuresis during total immersion in thermally neutral water, interpreting urine flow increase caused by intrathoracic blood volume expansion
23 p4094 A69-42075

DIURNAL RHYTHMS
U CIRCADIAN RHYTHMS
DIURNAL VARIATIONS
North-south ionospheric drift velocities near magnetic equator, noting marked seasonal characteristics and diurnal variations
01 p0062 A69-10138
Exosphere diurnal and latitudinal variations in electron and proton content, ion composition, and electron, proton and positive O ion densities
01 p0063 A69-10422
Night ionosphere electron content changes in Southern Hemisphere, discussing diffusion from exosphere and corpuscular radiation as sources of ionization
01 p0063 A69-10423
Ionospheric inhomogeneities vertical and latitudinal distributions and diurnal variations, measuring Explorer 22 signals Faraday fading with space diversity reception
01 p0064 A69-10446
Ionospheric negative ion coefficient variations, analyzing formation microprocesses
01 p0066 A69-10599
Whistler rate and dispersion daily and annual variations derived relative to propagation conditions and magnetospheric behavior over North Italy
01 p0067 A69-11033
Latitudinal variations in auroral and subauroral region F layer diurnal and magnetic storm pattern shown by scintillation measurements
01 p0069 A69-11127
Gross behavior patterns of intense sporadic E including seasonal, diurnal and geographic variations and latitudinal and longitudinal effects
01 p0070 A69-11157

Lower thermosphere neutral composition diurnal variations, noting molecular N and O, Ar, He and atomic O

01 p0076 A69-11231

Electron intensity diagram of diurnal trapped electron variation from Cosmos 5 satellite data, including harmonic analysis of data

01 p0147 A69-11321

Second harmonic cosmic ray daily variation, discussing density gradient model with particle diffusion along field direction

02 p0305 A69-11422

Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle

02 p0239 A69-11685

Cosmic ray meson diurnal anisotropies direction calculated on basis of subtracted diurnal vectors

02 p0306 A69-11730

Middle ionosphere temperature diurnal variations analyzed on basis of rocket experiments and electron density asymmetry

02 p0246 A69-12768

Diurnal variation in horizontal magnetic component of South American stations close to electrojet during IGY

02 p0246 A69-12771

Diurnal, magnetic and solar cycle dependences of auroral emission variations and auroral occurrence

03 p0420 A69-13325

Middle stratospheric diurnal temperature variation based on model eliminating radiation error of rawinsonde

03 p0461 A69-13344

Earth ionosphere resonator natural frequencies, considering diurnal variation and geomagnetic field eccentricity

03 p0422 A69-13512

Diurnal variation of variation coefficient of F 2 critical frequency for steady and unsteady primary ionizing fluxes simulated on computer

03 p0423 A69-13516

Polar auroral region cosmic radio noise absorption bays diurnal variations attributed to drift of electrons captured in magnetosphere

03 p0423 A69-13520

Diurnal upward and downward flows of atmospheric matter following upper atmosphere temperature nighttime minimum and daytime maximum

03 p0423 A69-13533

Geomagnetic field quiet day solar variations current system calculated, using 2000 LT as zero level basis

03 p0424 A69-13541

Thermal forcing role in diurnal oscillation of planetary boundary layer wind above sloping terrain

03 p0462 A69-13682

Cosmic ray solar diurnal variations for nucleonic component, discussing differential response functions

03 p0501 A69-13751

Cosmic ray meson component solar diurnal variation calculations noting amplitude, average deflection angle and dependence on zenith angle of arrival

03 p0501 A69-13752

Diurnal variations of low latitude VLF emissions observed at Hiraiso, Japan

03 p0398 A69-13900

Amplitude and phase of cosmic ray meson diurnal variation, noting less variation in neutron diurnal variation

04 p0648 A69-14374

Atmospheric, geomagnetic and interplanetary effects on cosmic ray flow, noting anisotropy and diurnal variation phase and amplitude averages

04 p0649 A69-14683

Daily solar indices monthly averages errors due to evaluation for days presenting favorable weather conditions

04 p0657 A69-14700

Diurnal variations of visual meteoric activity mean hourly rates compared with earlier observations

04 p0658 A69-14879

Frequency of cold front passages during year in French part of Switzerland and times of occurrence during day

04 p0628 A69-15089

Atmospheric rotation speed dependence on specific heat, thermal conductivity, air absorption coefficient and lower boundary pressure, discussing diurnal variation of thermosphere

[AFRL-69-0363]

04 p0649 A69-15130

VLF phase measurements for apparent and equivalent diurnal height variation for lower ionosphere waveguide

05 p0752 A69-15666

Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets

05 p0755 A69-16267

Diurnal variations of neutral and charged particle temperatures in equatorial F region

05 p0755 A69-16270

Lunar tide effect on height distribution and velocity of ionospheric electron density daily variations near magnetic equator

05 p0756 A69-16401

F region seasonal and magnetic storm behavior from region daily behavior showing global upper atmospheric circulation

05 p0757 A69-16404

Lower ionospheric diurnal variations in electron density observed by beacon satellite, noting effect on high power VHF forward scatter circuits

05 p0757 A69-16405

Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra

05 p0757 A69-16407

Wind data from Arctic upper mesosphere showing easterly winds increasing with height, resolving diurnal and semidiurnal oscillations

06 p0949 A69-17005

Galactic cosmic rays anisotropies due to density gradient perpendicular to ecliptic plane studied, using diurnal and semidiurnal component and intensity deficiency

06 p0990 A69-17289

Cosmic ray daily variations relationship to geomagnetic activity, sector structure of interplanetary magnetic field and sunspot activity

06 p0990 A69-17291

Variational coefficients for vertical and inclined meson telescopes, deriving primary cosmic rays anisotropy parameters from daily variations

06 p0924 A69-17293

Data on muons indicating temperature effect diurnal maximum and pressure corrected daily variation

06 p0924 A69-17294

Day and night reversals in NmF2 north-south asymmetry related to neutral wind direction

06 p0918 A69-17384

Diurnal field strength and phase variations of VLF transmissions over transequatorial path from Australia to Japan

06 p0889 A69-17654

Phase and amplitude record changes in sunrise and sunset transitions in VLF transmissions over long path

06 p0889 A69-17655

Global geomagnetic anomalies influence on longitudinal pattern of solar quiet day variations and in phases of second harmonics of components

06 p0920 A69-17734

Optimum length of Fourier time series approximating diurnal F 2 critical frequency variation on planetary scale

06 p0921 A69-17746

Magnetospheric ring current effect on main phase of geomagnetic storms, calculating diurnal storm-time portion of perturbation field

07 p1122 A69-18296

Lunar daily geomagnetic periodicities by periodogram or spectral analysis, comparing amplitudes obtained by spectral analysis to those by harmonic analysis

07 p1123 A69-18817

Equatorial hourly storm time part of disturbances field for 1958, discussing magnetic storm effects

07 p1124 A69-18822

Nighttime equatorial Pi 2 micropulsations, noting seasonal and diurnal distributions and dependence on three hour index of magnetic activity

07 p1125 A69-18841

VLF diurnal phase change observations, showing deviations from theoretical first mode and second mode dominance

07 p1078 A69-18912

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere, calculating results for terrestrial and Martian atmospheres

07 p1126 A69-19036

Soviet monograph on diurnal solar cosmic ray variations from maximum to minimum solar activity, discussing model based on anisotropic particle scattering theory

07 p1209 A69-19500

Double diurnal oscillation of atmospheric pressure and vertical gradient of electromagnetic field, noting agreement between diagrams and role of atmospheric tides

08 p1306 A69-19866

Equatorial counter-electrojet and inverse quiet day solar diurnal variation current layers, noting regular diurnal variation horizontal component and latitude effect

08 p1306 A69-19884

Flight test performance of airborne Omega radio navigation system capable of worldwide coverage, discussing diurnal variations effects in phase velocity

08 p1348 A69-21191

Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization

09 p1575 A69-21550

Zero reference field for quiet day solar variations, considering magnetic field levels and errors

09 p1575 A69-21551

Cosmic ray intensity diurnal variations from super neutron monitor observations, discussing anisotropy resulting from reduced intensity in gardenhose direction in ecliptic plane

09 p1576 A69-21706

Diurnal variation of D region electron production rates, discussing Lyman alpha ionization of nitric oxide

09 p1577 A69-21717

Diurnal nutation and periodic terms of local coordinates using OPL model of Danjon astrolabe, presenting harmonic and Fourier analysis

09 p1596 A69-22059

Atmospheric radio noise at 27 kc measured at European stations, showing field strength variations, latitude dependence and amplitude distribution

09 p1491 A69-22163

Geomagnetic activity correlation to cosmic ray solar daily variation underground, observing primary cosmic ray flux with meson telescopes

09 p1583 A69-22755

Cosmic rays origin, measurements of energy spectrum and stellar diurnal variations

10 p1757 A69-22823

Cosmic ray anisotropy relation to scattering and sectorial structure of interplanetary magnetic field using neutron monitor data

10 p1758 A69-22834

Solar diurnal variation amplitude and phase instability, considering anisotropic cosmic ray fluxes superposition

10 p1759 A69-22837

Air-earth current density variations with universal time, noting hemispherical dependence of storm activity effects

10 p1682 A69-23415

Thomson scatter bistatic sounder data on ionization transports in F region, describing diurnal variations by hourly values of velocities

10 p1685 A69-23830

Nighttime ionospheric recombination studies by model reference heights varying diurnally, seasonally and with solar flux and geographic location

10 p1685 A69-23834

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis

10 p1769 A69-23904

Interplanetary magnetic field sectorial structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence

10 p1769 A69-23905

Auroral electron energy diurnal variation, noting ground observations of polar auroras, riometric absorption, vertical changes in ionization layer maximum position, etc

10 p1687 A69-23915

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geomagnetic field components

10 p1687 A69-23918

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanism and ambient electron density

10 p1688 A69-23932

Nitrogen dioxide molecular ions formation in air, discussing absence at lower pressures and early afterglow dominance in air ionized and dissociated by microwave pulses

11 p1879 A69-25158

Neutral gas motions causing plasma motions in F region, obtaining vertical plasma velocity component pronounced diurnal variations

12 p2070 A69-26684

Diurnal and seasonal variations in drift velocity vector of small scale inhomogeneities in F 2 region

12 p2070 A69-26688

- Auroral cosmic noise absorption relationship to auroral geomagnetic disturbances, investigating absorption diurnal distribution
12 p2071 A69-26706
- Gustafsson pattern for variations in position of quiet homogeneous arcs, noting diurnal variations from visual observations at antarctic station
12 p2073 A69-26951
- Solar control of day-to-day variability in phase of solar diurnal variation of horizontal magnetic intensity on quiet days
12 p2073 A69-26954
- Solar quiet currents in three dimensional ionosphere, considering ionospheric conductivity and horizontal layer equations
12 p2074 A69-26955
- Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component
12 p2161 A69-26957
- Geomagnetic field daily variations, discussing observational techniques, observation analysis, S-field seasonal changes, equatorial electrojet, solar wind effects, dynamo theory, etc
12 p2077 A69-27143
- Air mass displacements and diurnal variations in potential temperature at tropopause level
13 p2252 A69-27608
- Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations
13 p2253 A69-27692
- Probable sign-invariant periods of air temperature anomalies based on random Gaussian processes
13 p2294 A69-27855
- Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle
13 p2258 A69-28716
- Muonic component diurnal wave trains at 70 mwe during cosmic ray decreases, discussing Forbush decay as result of shock front advance
14 p2511 A69-28962
- Diurnal variation of cosmic ray muon intensity near geomagnetic equator and primary anisotropy monitored by cubical counter telescope
14 p2512 A69-28966
- Cosmic ray angular distribution spectrum and interplanetary magnetic field properties determined from semidiurnal cosmic ray variations data
14 p2512 A69-29046
- Time and altitude induced variations in daytime NO and molecular and atomic oxygen ions
14 p2435 A69-29050
- Polar aurora rays mean length diurnal variations determined from photographic and visual observations in Tiksi bay
14 p2437 A69-29077
- Thomson scatter probes for diurnal variations of daytime atmospheric density at 100 km altitude
14 p2440 A69-29125
- Polar cap absorption riometer recorded during 2-6 September 1966 event compared to satellite measurements of solar protons, discussing diurnal variations and oxygen role in associative detachment reactions
14 p2440 A69-29126
- Thermally excited diurnal wind oscillations in lower mesosphere using model atmosphere in CIRA 1965, discussing daytime ozone density profiles
14 p2441 A69-29379
- Daytime ionospheric screening effect on low latitude geomagnetic micropulsations estimated using ionosphere model
14 p2441 A69-29380
- Turbulent heat exchange coefficient radiation absorption and diurnal vertical variations effects on temperature field in surface layer of sea and atmospheric boundary layer
14 p2472 A69-29462
- Zonal drift influence on morning ionization anomaly in F region, noting shifts to West with increasing height and electron production rate
14 p2442 A69-29732
- F 2 region small scale inhomogeneities drift observations showing seasonal and diurnal velocity and direction changes
14 p2444 A69-29868
- Radio signals F region scattering related to electron density fluctuations in ionosphere
14 p2444 A69-29870
- Waveguide mode propagation theory for determining earth-ionosphere spherical waveguide upper boundary height diurnal variation for VLF waves
15 p2595 A69-30224
- Diurnal variations of wind velocity, temperature and density at high altitude measured by Skylark rockets
15 p2598 A69-31319
- Diurnal change in equatorial electrojet parameters observed by magnetometers on Nike Apache rockets
15 p2598 A69-31320
- Atmospheric density and temperature variations between 200-600 km from Cosmos satellite data, noting solar activity effect
15 p2599 A69-31343
- Upper atmosphere structure and variations including density and composition in lower thermosphere, diurnal variations, variations with solar activity, etc
15 p2600 A69-31355
- RF mass spectrometric measurements of diurnal variation of thermosphere and ionospheric E and F regions composition, noting oxygen concentration
15 p2601 A69-31371
- Diurnal variations of atmospheric ion composition at 100-200 km from rocket experiments
15 p2603 A69-31401
- Diurnal thermospheric density, temperature and wind variations due to direct solar EUV heat input and tidal wave from lower atmosphere
15 p2605 A69-31439
- Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function
15 p2557 A69-31458
- Diurnal variations of IR atmospheric oxygen bands in airglow observed with filter photometer on balloon flights
16 p2776 A69-32091
- Cosmic ray second harmonic daily variations explainable by symmetrical gradient rising away from solar equatorial plane
16 p2850 A69-32304
- Direct wind measurement and momentum transport estimates obtained from cyclones and anticyclones daily displacements over Northern Hemisphere, applying results to planetary atmospheres
16 p2780 A69-32306
- Solar quiet day geomagnetic variations harmonic analysis with respect to time intervals centered around noon, defining parameters responsible for modulated Sq
16 p2781 A69-32452
- Equations of transformation for hourly data harmonic terms used in computation and representation of solar and lunar daily magnetic variations
16 p2782 A69-32457
- Lunar components in mean values of geomagnetic field daily variations, discussing lunar phase during selected quiet days
16 p2782 A69-32458
- Semiannual variation in amplitude of solar daily quiet geomagnetic variation, discussing sunspot dependence of seasonal secondary minimum and maxima
16 p2782 A69-32459
- Upper atmospheric winds to produce solar quiet day magnetic variations based on dynamo theory, illustrating solenoidal, irrotational and mixed winds
16 p2782 A69-32460
- Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
16 p2851 A69-32545
- Zero reference field for quiet day solar variations, considering magnetic field levels and errors
16 p2851 A69-32546
- Vertical ozone distribution determination discrepancies between Brewer-Mast electrochemical sonde and Umkehr methods, discussing influence of seasonal and diurnal variations
16 p2786 A69-32630
- Nighttime latitude variations in Danjon astrolabe observations at Poltava, noting decrease from early evening to midnight
17 p2959 A69-32870
- Upper atmospheric gas density and temperature distribution diurnal and seasonal variations calculated from satellites orbiting time changes
17 p2959 A69-32924
- F region stratification during solar minimum and maximum, discussing regularities of plasma frequencies and diurnal variations
17 p2959 A69-33005
- Semidiurnal oscillation in thermalgeostrophic atmosphere examined using atmospheric model for tidal oscillations response study
17 p2959 A69-33148
- Scattered ionospheric reflection distribution at evening/morning periods showing deviation, using coherent method
17 p2927 A69-33860
- Meteor trail drift radar observations in Kharkov, giving wind velocity diurnal and seasonal variations
17 p3041 A69-33897
- Polar auroras pulsation attributed to background brightness fluctuations, discussing intensity diurnal variation
17 p2963 A69-33954
- High latitude geomagnetic field quiet solar diurnal variations during magnetically quiet IGY winter days, relating type and amplitude at low and midlatitudes
17 p2964 A69-33960
- Unsteady model taking into account photoionization, neutralization and diffusion, describing electron concentration diurnal and seasonal variations in ionosphere F 2 region at midlatitudes
17 p2966 A69-33978
- Postsunset apparent reflection height and electron density variability in equatorial F 2, discussing singularities of diurnal variation in November-January
17 p2967 A69-33984
- Reflection and ionization heights diurnal variations in F region, obtaining data for sporadic E formation
17 p2968 A69-33995
- Diurnal sporadic E layer height variations analyzed for singularities in height peak behavior as function of geography, season and magnetic activity
17 p2968 A69-33996
- Space diversity reception and diurnal variations of F region ionospheric motions, comparing IQSY program
17 p2969 A69-33999
- Reexamination of polar F region electron density diurnal variation data contradicting Krich-Kohl theory of rotating neutral winds role
18 p3125 A69-34255
- Magnetic declination effect on F 2 layer critical frequency diurnal variations attributed to vertical ionospheric drift due to neutral air winds
18 p3126 A69-34256
- Cosmic ray intensity short term stochastic variations in solar system related to turbulent solar wind day-to-day variations
18 p3186 A69-34300
- Diurnal wind variations below 30 km plotted on constant pressure charts, showing topographical influence on tidal fluctuations
18 p3166 A69-34828
- Cosmic ray diurnal anisotropy variations, correlating component annual means with magnetic activity
18 p3186 A69-34934
- Dawn-dusk electric field in outer radiation zone associated with magnetospheric plasma convection, comparing electron densities for magnetically quiet periods
18 p3128 A69-34942
- Whistlers occurrence and dispersion rate variations from data obtained at lower latitudes during magnetic storms
18 p3102 A69-34967
- Source position of cosmic ray diurnal anisotropy relative to ecliptic plane from neutron monitor data at Mawson and Churchill stations
18 p3189 A69-35441
- Vertical profiles of pressure, temperature and density variations due to upper troposphere pressure changes with and without zero layer effect
19 p3365 A69-36580
- Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models
19 p3396 A69-36621
- Diurnal and seasonal phase-differing fluctuation measurement of radio waves propagating along ground layer caused by atmospheric turbulence
20 p3485 A69-36971
- Global distribution of F 2 layer critical frequencies by expanding empirical function of diurnal variations into natural orthogonal components
20 p3521 A69-37051
- Diurnal, seasonal and cyclic altitude and maximum ionization median value variations of undisturbed ionosphere from vertical sounding data obtained at Yakutsk, Siberia
20 p3527 A69-37668
- Diurnal F 1 layer development over Irkutsk, Siberia, during minimum and maximum solar activity, using semiquantitative method
20 p3527 A69-37670
- Ionospheric radio wave absorption seasonal and diurnal variations over Tiflis from pulsed ionospheric sounding at 2.2 MHz
20 p3491 A69-37677
- Alouette 2 ionograms secondary resonances data indicating day-night effect in relative frequency of occurrence
20 p3496 A69-37889

Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32

20 p3534 A69-38087

Diurnal variations in cosmic ray intensity from observations by inclined meson telescopes scanning equatorial plane

20 p3593 A69-38109

Diurnal entrainment deviations and atmospheric turbulence effects on flash photographs from Geos 1

21 p3793 A69-38339

Morphology of discrete polar cap and polar glow auroras, noting diurnal variations correlation with magnetic activity changes at low latitude

21 p3707 A69-38487

Rocket measurement data of auroral particle precipitation classified in substorm phases of quiet and breakup period, breakup and postbreakup events and morning events

21 p3707 A69-38489

Equatorial plasma sheet role in magnetotail assessed from Vela satellite data, noting diurnal density variations

21 p3711 A69-38512

Spectrum, latitude dependence and diurnal variation of night airglow emission, noting space and time correlation and magnetic activity relationship to luminous intensity

21 p3711 A69-38514

Diurnal intensity variations in OI 5577 A line emission connected with vertical movements in 90 km level of atmosphere

21 p3713 A69-38525

Primary cosmic rays solar diurnal modulation, measuring relative amplitudes and phases over full cycle

21 p3788 A69-38547

Geomagnetic field horizontal component daily variations in relation to solar wind, noting effects of ambient field night side decrease

21 p3714 A69-38549

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis

21 p3791 A69-38840

Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters

21 p3718 A69-39747

Venus and Mercury diurnal period commensurability associated with Venus spin-orbit resonance with earth orbit

22 p4018 A69-40270

Ionospheric electron temperature profiles for mid-day equinoctial conditions noting protonospheric and conjugate heating effects

22 p3939 A69-40506

Diurnal variations of electron flux based on balloon observations near polar cap consistent with geomagnetic cut-off variations of magnetospheric models

22 p4005 A69-40511

Daily variation of trajectory derived high latitude vertical cut-off rigidities in magnetospheric model consistent with proton and electron experiments

22 p4005 A69-40513

Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data

22 p3939 A69-40515

Cosmic ray diurnal phase and amplitude variations determined using superimposed records of cosmic ray stations inside limited rigidity region

23 p4204 A69-41481

Geomagnetic disturbances relations to cosmic ray diurnal variation phase and amplitude, including Forbush decreases

23 p4204 A69-41483

Day-to-day variability of daily variation of cosmic ray intensity during quiet solar activity period using high latitude neutron monitor data

23 p4204 A69-41484

Day-to-day changes of cosmic ray diurnal variation measured on meson and neutron components, showing relationship with interplanetary magnetic field

23 p4206 A69-42012

Diurnal rhythms of heart rate and blood pressure reactions to posture changes on tilt table, finding orthostatic lability maxima

23 p4094 A69-42072

Noncyclic daily solar quiet variation in mean hourly geomagnetic field by including noncyclic variation term in regression model

23 p4158 A69-42170

Faraday rotation diurnal variation plotted by analyzing radio transmissions from Canary Bird geostationary satellite, considering ionospheric electron density peak

23 p4160 A69-42433

Diurnal variation of Pc type geomagnetic pulsations correlation with F 2 layers critical frequency diurnal variations

23 p4161 A69-42441

Geomagnetic activity hourly and daily variations during solar cycle at Huancayo

23 p4162 A69-42442

Diurnal variations in solar cosmic ray muon component near sea level, using scintillation counters assembled in muon telescope array

23 p4207 A69-42498

Bigeminus pattern in baboon social behavior, noting diurnal rhythm independence from social deprivation, light cycling and food supply

24 p4260 A69-42705

Solar wind kinetic energy density using geomagnetic field horizontal component daily variation, treating earth as plasma probe

24 p4308 A69-42968

Diurnal and solar cycle variations of thermosphere density and temperature generated by solar EUV input and tidal wave, using two dimensional model

24 p4367 A69-43003

Pulsating aurora diurnal variations and dependence on latitude and magnetic activity, photometric observations

24 p4308 A69-43004

Circadian periodicity of human reaction times tested during normal diurnal cycles and 24 hour wakefulness, noting acoustic and visual stimuli effects on learning

24 p4267 A69-43387

Lower ionosphere atmospheric density, temperature and pressure profiles diurnal variations from data of radio meteor echoes

24 p4311 A69-43504

DIVERGENCE

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes

07 p1148 A69-18804

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator

09 p1515 A69-21474

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination

12 p2045 A69-26059

Emission intensity and beam divergence of p-n junction GaAs laser with nonlinear passive element in resonator

15 p2633 A69-30719

Operational circulation model numerical experiment suggesting elimination of spurious divergence-on-divergence interactions from implied vorticity equations in primitive equations

19 p3363 A69-36503

Measurement of helium-neon laser radiation divergence emitted in TEM sub nm modes

21 p3736 A69-38949

Adaptive filtering to prevent divergence observed in application of Kalman filter to orbit determination

23 p4146 A69-42446

DIVERGENT NOZZLES

Interactions between outer and inner jets behind maximum cross section of jet engine nozzle [ONERA-TP-600]

02 p0187 A69-11620

Diverging nozzle flow of gas mixtures containing solid or liquid particles analyzed by one dimensional approximation separately averaging boundary layer and flow core

19 p3298 A69-36389

DIVERTERS

Trapping of plasmoids injected from two coaxial plasma sources through magnetic gaps of diverter, discussing alternate and simultaneous injection

12 p2133 A69-25976

Dynamic characteristics of plasma fluxes across magnetic field of diverter inside plasma cylinder formed during injection

12 p2134 A69-25977

DME-A SATELLITE

U EXPLORER 31 SATELLITE

DNA

U DEOXYRIBONUCLEIC ACID

DO- 31 AIRCRAFT

Dornier Do 31 VTOL jet aircraft noise alleviation in far field, discussing shielding, interference, ground attenuation and reflection

22 p3862 A69-39932

DOCKING

U SPACECRAFT DOCKING

DOCUMENT STORAGE

USAF accident information, reporting and retrieving, describing Directorate of Aerospace Safety structure and functioning

06 p1041 A69-16843

Holographic storage of three dimensional measurement information using model formed by stacking plates

13 p2260 A69-27739

DOCUMENTATION

Military systems trouble documentation and evaluation, emphasizing computerized monitoring of reliability and maintainability

15 p2722 A69-31121

Subcontractors documentation coordination system for Mississippi Test Facility, identifying end items for maintenance and spares provisioning

18 p3118 A69-35063

Documentation aspects of computer programs use in civil engineering, describing maintenance, users and operators manuals

22 p3904 A69-40140

DOCUMENTS

NT CATALOGS [PUBLICATIONS]

NT ENGINEERING DRAWINGS

NT HANDBOOKS

NT MANUALS

NT TEXTBOOKS

Diffusion data in binary compound semiconductors, tabulating impurities, electrical behavior, temperature variations and diffusion coefficients

02 p0296 A69-11809

DODGE SATELLITE

Department of Defense Gravity Experiment /DODGE/ attitude stabilization simulation with time-lag magnetic damping

06 p1014 A69-17584

Doppler tracking of near synchronous DODGE satellite from single frequency data, noting error sources [AAS PAPER 68-128]

21 p3674 A69-39202

DOGHOUSES

U PROTUBERANCES

DOGS

Prophylactic and therapeutic vitamin and organic compounds complexes in radiation damage reduction and death prevention for dogs exposed to X rays

02 p0197 A69-11493

Control mechanisms of hemodynamic shifts from dogs subjected to acceleration under anesthesia

02 p0198 A69-11503

Dog adaptation to 60 or 90 mm Hg carbon dioxide in 260 mm Hg total pressure environment, noting arterial pH and bicarbonate level

03 p0375 A69-14071

Cardiovascular responses of baboons and dogs subjected to anoxic near vacuum environment by rapid decompression

06 p0875 A69-17846

Reactions of respiratory and cardiovascular system of dogs in biocompartment of ballistic missiles, discussing biopotential of myocardium, arterial pressure, etc

07 p1060 A69-18576

Physiological reactions of dogs during acceleration and weightlessness in suborbital flights of ballistic rockets

07 p1061 A69-18577

Phonocardiograms, EKGs, sphygmograms, heart and respiration rates, body temperature and motor activity recorded/transmitted by TV during canine confinement in Soviet biological capsules

07 p1061 A69-18578

Human and animal cardiovascular system reactions to weightlessness, noting vagus nerve role in adjusting organism

07 p1061 A69-18583

Telemetry aortic blood pressure and heart rate from dogs under various physical activities and emotional stress

07 p1071 A69-19133

Dogs cardiovascular activity mathematical analysis from physiological indices during long space flight

08 p1261 A69-19828

Test dogs feeding through enteropancreatic fistula homogenized mixture containing juice excretion stimulating agents during long space flight

08 p1265 A69-19829

Dogs blood coagulation system functional state after 22 day space flight onboard Cosmos 110

08 p1262 A69-19830

Bone marrow distribution in dogs as basis for study of compensatory reactions of hemopoietic organs in response to radiation damage

08 p1262 A69-19835

Motion sickness inhibitive effect on stomach motor activity, measuring biopotential of stomach wall, pyloric sphincter and ganglions

08 p1263 A69-19935

Local shielding effectiveness of dogs against proton irradiation at minimum lethal dose, noting bone marrow role

08 p1263 A69-19939

Monomethylhydrazine /MMH/ toxic effects on cornea and blood aqueous barrier studied in vivo on dogs

09 p1447 A69-22547

X ray irradiated dogs subjected to heat stresses to determine thermoregulatory ability

09 p1445 A69-22548

Transverse accelerations effect on dogs gastrointestinal tract secretory activity, noting central nervous system role

10 p1645 A69-23498

Dogs orthostatic tolerance and resistance to transverse acceleration after 14-day hypodynamia, studying tachycardia and arterial pressure

10 p1645 A69-23499

Blood oxygen metabolism, analyzing content and volume circulation in dogs under oxygen partial pressure decrease in inhaled air

12 p2019 A69-26346

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique

14 p2406 A69-28916

Glucose disappearance rate from dogs blood at simulated 27,000 ft altitude compared with tolerance at ground level, discussing chlorpromazine administration effect

14 p2408 A69-29305

Gastric perfusion rate in restrained animals determined by Rb 86 clearance technique

17 p2908 A69-33170

EKG during electrical defibrillation of heart in immobilized dogs

19 p3257 A69-36168

Pubertal puppy and adult dog cardiovascular system during inhalation of various nitrogen-oxygen mixtures, comparing heart beat rates, minute blood volumes, etc

19 p3257 A69-36169

Supralethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles

19 p3259 A69-36459

Pulmonary arterial pressure for perfusion of excised dog lungs after inflation not due to shunt channels through atelectasis areas

21 p3651 A69-38386

Heart muscle ultrastructure during general hypoxia in dogs, noting development of compensatory-adaptational and dystrophic changes in myocardial intracellular components

21 p3651 A69-38412

Aldosterone and hydrocortisone introduced into bladders of adrenalectomized dogs to restore sodium metabolism contributing to normal water-salt homeostasis

21 p3656 A69-38965

Nerve tissue oxidation processes relation to nervous system radiation sensitivity in dogs with cerebellum X rayed after enzyme poisons administration

21 p3658 A69-39053

Canine cerebellar Purkinje cells electron microscopy after rapid decompression to near vacuum

21 p3660 A69-39177

Critical closing phenomenon in dog gracilis muscle, using pressure flow measurements and tissue staining techniques, detecting sudden vessel closure in microcirculation

22 p3873 A69-40202

Dogs cardiovascular responses to histamine liberator /compound 48/80/, describing shock and acidosis with elevated histamine levels

22 p3873 A69-40206

Carbon monoxide effect on dog lung volume, mechanical properties and diffusing capacity

22 p3874 A69-40224

Left ventricular function in intact anesthetized dogs analyzed during graded hypovolemia produced by lower body negative pressure

22 p3874 A69-40225

Whole body LF mechanical vibration effects on anesthetized dogs peripheral circulation and vascular smooth muscle

22 p3875 A69-40228

Heart beat rate, arterial pressure, blood volume and peripheral blood pressure increase observed in dogs running 7 min at 10 km/hr

22 p3885 A69-40966

Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide

22 p3885 A69-40977

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis

22 p3887 A69-41189

Monomethylhydrazine absorption through canine skin noting metabolic aftereffects and methemoglobinemia

22 p3887 A69-41191

Hyperventilation induced hemolysis in dogs measured as function of exposure time, body temperature and blood pH

22 p3887 A69-41192

Topography of potentials induced by acoustic clicks in auditory cortex of dogs, including ectosylvian gyrus distribution

22 p3888 A69-41269

Cardiovascular effects of hypoxia in conscious and anesthetized dogs in environmental chamber, discussing artery pressure, tachycardia, stroke volume and cardiac output

23 p4078 A69-41314

Chronic congestive heart failure in dogs compared to pulmonary system, discussing effect on cardiac lymphatics

23 p4078 A69-41364

Arterial pressure and heart rate responses to increased intrapulmonary pressure in anesthetized dogs via simulated Valsalva tests

23 p4078 A69-41365

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog

23 p4081 A69-41432

Carbon dioxide inhalation and intravenous isoproterenol effects on hemorrhagic consolidation occurring after left pulmonary artery ligation in dogs

23 p4082 A69-41441

Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins

23 p4083 A69-41459

Acceleration effect on greyhound cardiac output and regional blood flow from Sapirstein radioisotope uptake technique, studying blood, skin, skeletal muscle, etc

23 p4089 A69-41823

Noradrenalin release from hearts of open chest dogs given artificial respiration upon occlusion of left descending coronary artery

23 p4092 A69-42053

Sinusoidal pressure electric stimuli frequency effects in isolated carotid sinus on canine peripheral blood pressure, determining dynamic characteristics from observation data

23 p4092 A69-42062

Energy cost of muscular exercise in gastrocnemius muscle of dogs anesthetized with morphine, chloralose and urethane

23 p4093 A69-42065

Coronary circulation response to hyperoxia after vagotomy and combined alpha and beta adrenergic receptors blockade in anesthetized intact dog

23 p4096 A69-42088

Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure

23 p4098 A69-42105

Alaska sled dogs cardiovascular performance and flow distribution during cross country runs

24 p4256 A69-42624

Vascular interface histological and chemical responses to acute mechanical stress in dog aorta

24 p4257 A69-42625

Alveolar and pleural pressures affecting pulmonary interstitial pressure in anesthetized dogs, applying Starling law of transcapillary exchange

24 p4257 A69-42627

Refractory period adaptation to sudden heart rate changes in dogs

24 p4257 A69-42628

Electrical stimulation effects of carotid sinus on sinus rate and atrioventricular conduction for vagi and sympathetic nerves interruption to heart in dogs

24 p4257 A69-42629

Cardiac myosin characteristics obtained from dogs with naturally occurring heart failure, showing reduced

adenosinetriphosphatase activity as compared with normal dogs

24 p4258 A69-42630

Contraction frequency increment effects on myocardial oxygen consumption in dogs determined for various heart rate levels, using isovolumic left ventricular preparation

24 p4258 A69-42634

Experimental myocardial infarction in dogs, examining lysosomal enzymes activity changes in soluble and particle-bound fraction

24 p4259 A69-42636

Positive pressure breathing effects on cerebral arterial and venous blood pressure, hypothalamus and adrenal glands catecholamine content and cerebrum histological changes in dogs

24 p4265 A69-43371

DOLOMITE [MINERAL]

Thermoluminescence intensity of dolomite specimens from Kaali meteorite craters, discussing meteorite impact thermomechanical effect and crystal lattice defects

01 p0159 A69-11371

DOMAIN WALL

Intervalley scattering model for Gunn domain dynamics, noting effects comparable to diffusion

06 p0893 A69-16937

DOMAINS

NT MAGNETIC DOMAINS

Gunn domains reduction in sheet type GaAs oscillators by spreading of field lines out of active region

02 p0215 A69-11933

Domain operating point application to Gunn domain buildup including trajectory graphs

02 p0297 A69-11948

Traveling high electric field domains in bulk semiconductors use in high speed integrated electronics, noting domain properties of GaAs and CdS

02 p0216 A69-12144

Acoustoelectric domains in CdS, making time evolution visible by means of modified optical strain birefringence and stroboscopic illumination

02 p0258 A69-12618

Optical modulation near intrinsic edge in n-type bulk GaAs due to Franz-Keldysh effect, noting carrier production by photon initiated excitation

02 p0300 A69-12650

Small transverse dimensions effect and domain formation criterion for surface oriented Gunn diodes prepared on thin epitaxial GaAs layers

04 p0639 A69-14335

Semiinsulating GaAs mobile electric domains, determining electric field strength from electrooptical effect measurements

04 p0643 A69-15261

Acoustoelectric domain propagation in N-type GaAs, noting flux influence on peak acoustic density

05 p0806 A69-15815

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

06 p0981 A69-17880

Delta functions use in extending domain of Laplacian operator in quantum mechanics

07 p1174 A69-19495

High field domains in Gunn effect diode in transit time mode of operation probed with stroboscopic electron beam in scanning electron microscope

08 p1283 A69-20162

Gunn effect domains propagation calculated for nonuniform diodes of annular geometry, obtaining frequency variation

09 p1464 A69-22159

Torsion theory for modules over integral domain, giving definition of injective sums

13 p2287 A69-27339

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

14 p2503 A69-28789

Impurities effect on domain structure of barium titanate single crystals grown from solution in KF melt determined by inner stresses

21 p3783 A69-39559

Electric properties and domain structure changes of polycrystalline Ba titanate and other ferroelectrics characterized by high dielectric nonlinearity

22 p3996 A69-41166

DOMES [STRUCTURAL FORMS]

NT RADOMES

Large telescope dome movements automatic control, considering central and eccentric telescope mounting

15 p2588 A69-30441

Nonlinear stability of shallow elliptical paraboloidal dome under uniformly distributed compression, solving by Bubnov-Galerkin method on computer
21 p3838 A69-39186

DONNELL EQUATIONS

Linear theory of cylindrical panel buckling and circumferential restraint along straight edges under lateral pressure, using Donnell equations
09 p1621 A69-22782

Donnell small displacement equations for arbitrary open noncircular cylindrical shells under arbitrary normal pressure loadings
13 p2365 A69-28248

DONOR MATERIALS

Poole-Frenkel model for internal field assisted thermal emission with compensation for relative densities of donor and acceptor sites
04 p0640 A69-14450

Si diffusion rate in single crystal and polycrystalline Mo, using various donor materials
05 p0780 A69-15990

Gold donor level impurity photovoltaic effect in silicon, noting solar cell efficiency reduction due to minority carrier recombination
19 p3381 A69-35679

Donor and acceptor impurity effect on absorption and reflection spectra of CdTe single crystals, analyzing In, Ga, S and Se
24 p4362 A69-43735

DOPES

Lattice location of dopant elements implanted into Ge determined by carbon ion backscattering, noting substitutional concentrations above thermal equilibrium solubilities
07 p1199 A69-18903

Quenched one dimensional bulk GaAs oscillators with linearly increasing and decreasing concave and convex doping gradients, showing profiles
10 p1663 A69-23667

DOPING [ADDITIVES]

U ADDITIVES

DOPPLER EFFECT

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system
01 p0088 A69-10028

Laser Doppler velocity profile measurement at localized points in flow stream without disturbing flow
01 p0090 A69-10298

Laser beam spectra for modulation by electrooptic Doppler shift, considering sawtooth and triangular functions for applied electric field
01 p0091 A69-10843

Optical path variations and angle of emergence calculation in dynamic ionosphere
01 p0068 A69-11111

Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun
02 p0315 A69-11836

Radar target amplitude, angle and Doppler scintillation from analysis of echo signal propagation in space
02 p0211 A69-12447

Goldberg-Unno method for determining Doppler width, microturbulence velocity and convection errors, considering photosphere as hot ascending and cold descending columns
02 p0328 A69-12752

Doppler effect in centimeter wave range demonstrated by radio interferometer, noting amplitude difference between reference wave and wave reflected from moving reflector
03 p0393 A69-13333

Complex Doppler effect for oscillating source moving in dispersive medium, analyzing time behavior of radiation field
03 p0396 A69-13630

Table of equivalent widths of isolated lines with combined Doppler and collision broadened profiles
05 p0796 A69-15747

Radio aurora radar measurement, determining echo and Doppler velocity distribution and dependence on aspect angle, magnetic latitude, height, azimuth and time
05 p0754 A69-16265

Ionospheric models for studying nature of difference in relationships between HF radio waves Doppler shifts and changing ionosphere
05 p0755 A69-16269

Laser Doppler meter model: interpreting output frequency in terms of particle crossing set of fringes
06 p0932 A69-16927

Quasars, stressing local Doppler and gravitational hypotheses for observed red shifts
06 p0998 A69-16968

Velocities of neutral and ionic species in MPD flow determined from Doppler shift of selected spectral lines
[AIAA PAPER 69-109] 06 p0971 A69-18116

Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc
[AIAA PAPER 69-110] 06 p0972 A69-18171

Doppler shift in zodiacal light spectrum, noting variation of dust concentration and possible orbits
06 p1012 A69-18227

Chromospheric velocity field temporal characteristics in quiet region of sun, determining power spectra of Doppler shifts of H alpha spectra
07 p1217 A69-19240

Velocity measurement by combination of Doppler principle and schlieren method involving reflection, refraction or diffraction of laser beam
07 p1135 A69-19259

Noncoherent scattering of atoms with Maxwellian distribution in moving atmosphere, discussing Doppler broadening expansion in Legendre polynomials
07 p1219 A69-19286

Secondary maxima observed in pulses with binary phase shift keying for cases of large Doppler shifts
07 p1086 A69-19488

Astronomical unit determined by measuring Doppler shift of spectral features of galactic hydrogen
07 p1222 A69-19590

Numerical determination of Doppler effect and reduced Doppler frequency difference for two coherent radio waves emitted from earth satellite
07 p1087 A69-19610

Motion measurement using Doppler shift of scattered laser light, noting high resolution
09 p1492 A69-21398

Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] 09 p1494 A69-21555

Doppler effect in ionospheric acoustic perturbations caused by strong ground explosion, noting accord with nonlinear acoustic wave propagation theory
09 p1488 A69-21694

Wideband signal Doppler distortion influence on parameter estimate accuracy
09 p1454 A69-21725

Laser induced line narrowing in coupled Doppler broadened transitions, noting mode crossing and spontaneous emission
09 p1519 A69-22282

Conventional and dual beam laser Doppler methods for velocity measurement of solids, liquids and gases
11 p1893 A69-24333

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
11 p1955 A69-24389

Distance vs time and velocity vs time measurements for high speed model missiles by means of laser interferometry and optical Doppler shift method
11 p1886 A69-25042

Optical modulation through Doppler frequency shift obtained by rotating radial diffraction grating
[AOLR-69-1] 11 p1889 A69-25394

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects
11 p1932 A69-25535

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect
11 p1932 A69-25536

Communication systems in interplanetary space covering telemetry, remote control, Doppler and distance measurements, coherent PCM/PSK/PM, demodulation, deep space network, etc
12 p2027 A69-25875

Plasma velocity measurement by Doppler shifts of spectral lines with photoelectric recording, using Fabry-Perot interferometer
12 p2079 A69-26021

Laser Doppler flowmeter for heterodyne detection of laser light scattered from moving fluid applied to fluid velocity and velocity distribution measurements
12 p2093 A69-26546

Laser Doppler particle sensor to measure velocities in rocket exhausts, using He-Ne laser light source and Fabry-Perot interferometer frequency filter
[AIAA PAPER 68-723] 12 p2094 A69-26783

Statistical distribution of instantaneous frequency and power of signal associated with Doppler spectrum for exponentially distributed and determinate frequencies
12 p2032 A69-26863

Quasars and radio-quiet objects numbers and properties, discussing red shifts interpretation by cosmological, gravitational and Doppler theories
12 p2161 A69-26937

Laser Doppler method for measuring local particle velocities in two phase flows of liquid-metal MHD generators
13 p2260 A69-27476

Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere
13 p2219 A69-27701

Ultimate resolvable line dependence of Balmer series on electron density, considering line broadened by Stark and Doppler effects
13 p2351 A69-27865

Remote optical heterodyne measurement of Doppler shift as method for determining vector wind velocity, noting influence of air pollution
14 p2448 A69-29523

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields
14 p2499 A69-29845

Inlet shape and Reynolds number effects on entrance flow development, using laser flowmeter based on Doppler effect to obtain laminar velocity profiles
15 p2589 A69-30001

Correlated noise effect on accuracy of suboptimal servosystem velocity measurements from recording Doppler frequencies
15 p2567 A69-30341

Radial velocities measuring tracking rate meter performance for Doppler frequencies, allowing for multiplicative noise
15 p2576 A69-30350

Laser Doppler heterodyning for monitoring motion noting solid surfaces vibration, liquid and solid surfaces linear velocity and turbulence in liquids and gases
15 p2614 A69-31276

Doppler geodetical measurements, emphasizing relative orientation between station and orbit influence on coordinates determination accuracy, presenting electromagnetic wave propagation theory
15 p2601 A69-31375

Doppler measurements in semidynamical geodesy, processing data from Transit satellites collected at various Mediterranean ground stations
15 p2602 A69-31382

Doppler effect significance in radio astronomy including galaxies relative motion and information concerning isolated hydrogen clouds between galaxies
16 p2853 A69-31565

Axial velocities in ammonia MPD thruster exhaust by measuring Doppler shifts of spectral lines emitted by plasma constituents
16 p2835 A69-31890

Asymptotic formulas for X and Y functions for resonance radiation scattering in layer, analyzing Doppler absorption and line profiles
16 p2813 A69-32588

Decameter waves Doppler shift shown inversely proportional to wave frequency from electron density variation caused by acoustic wave propagation in ionosphere
16 p2755 A69-32610

First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies
16 p2755 A69-32614

Doppler shift measurements at two coherent frequencies from Diadem satellites to determine ionospheric electron content, discussing accuracy and parameters defining satellite passage
16 p2785 A69-32615

FM detecting resolution using free running multimode uniphase Ar laser with Doppler broadened bandwidth
17 p2981 A69-33091

Lamb theory of Doppler broadened gas laser extended to arbitrary intensities for single mode operation, calculating detuning curves and inversion densities
19 p3335 A69-36048

Laser Doppler velocimeter /LDV/ for fluid velocity measurements, noting advantages
20 p3552 A69-37004

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect
20 p3486 A69-37027

Wideband signal Doppler distortion influence on parameter estimate accuracy
20 p3488 A69-37461

Doppler technique for ionospheric electron density measurement by VLF ground based radio transmitter, noting HF method
20 p3542 A69-37792

H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile
20 p3607 A69-38039

Doppler broadened atomic O emission line measurement providing indication of exospheric temperature storm-time variations
20 p3546 A69-38099

Doppler observations of ionospheric motions associated with magnetic micropulsations, noting hydromagnetic and neutral gas waves
20 p3535 A69-38194

DIA satellite Doppler observations, noting effect of observation grouping on ground stations mutual position
21 p3701 A69-38336

Optimum wideband signal for minimum Doppler distortion, describing pulse compression by linear-period modulation
21 p3671 A69-38406

Alford and Gold light modulation effect expanded to include one frequency spectrum with Doppler shift, discussing applications to optical radar for range and velocity measurements
21 p3672 A69-38409

Intensity integral inversion for Doppler core of strong solar absorption lines to obtain line source function for solar atmosphere
21 p3796 A69-38478

Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency
21 p3796 A69-38479

Ultrasonic Doppler flowmeter for detection of circulating gas emboli of animal blood vessels during decompression
21 p3663 A69-38915

Doppler tracking of near synchronous DODGE satellite from single frequency data, noting error sources [AAS PAPER 68-128]
21 p3674 A69-39202

Astronomical unit determination, discussing dynamical and radar methods and Doppler shift of neutral hydrogen line spectra in radio astronomy method
22 p4022 A69-40464

Space simulation tests of satellite-borne quartz crystal oscillators for tracking based on Doppler effect
22 p3927 A69-40590

Electromagnetic radiation characteristics from vibrating electrons or electric dipole moving in compressible isotropic plasma and from stationary dipole in moving medium, emphasizing Doppler effects
23 p4114 A69-41359

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR
23 p4122 A69-41771

Flow profile effect on signal of Doppler ultrasonic flowmeter, noting limited application to quantitative blood circulation measurements
23 p4166 A69-42085

Relativistic Doppler shift effect observed from radio signal periodic variation of GEOS-1 satellite
23 p4126 A69-42389

Ionospheric electron content measurements at low latitudes close spaced frequency and differential Doppler shift technique, using BE-B and BE-C satellite transmission
23 p4161 A69-42435

Stellar radial velocity measurement accuracy dependence on dispersion, spectrum and line width
24 p4386 A69-43347

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
24 p4390 A69-43779

Rotating mirrors used for light signal Doppler frequency shifting
24 p4351 A69-43806

DOPPLER NAVIGATION

Navigation system for American SST noting use of Doppler radar and inertial navigation
02 p0278 A69-12238

Transatlantic aircraft cross-track air navigation error reducible by augmenting Doppler system with satellite ranging system
03 p0464 A69-13237

Optimum inertial/Doppler satellite navigation system, discussing position fixes application in resetting
08 p1349 A69-21199

Omega/VLF transmission range rate measurements for satellite Doppler navigation to provide velocity and location data, noting propagation error
14 p2479 A69-29857

Doppler and inertial self contained systems for long range navigation, considering air traffic control separation standards
15 p2651 A69-31544

Direction defining radio beacons performance, discussing signal amplitude and phase comparison systems and Doppler techniques
17 p2918 A69-33028

Aircraft electromagnetic position finding system based on Doppler shift of CW carriers
17 p3002 A69-34078

Doppler navigation, explaining radar beam mechanization, Doppler spectrum, scanning noise, spectral compression and tracking
18 p3169 A69-34849

Lockheed C-5 Galaxy aircraft avionics systems with Doppler inertial navigation equipment to operate with precision without ground based aids
18 p3104 A69-35465

DOPPLER RADAR

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes
01 p0032 A69-10887

Spectrum distortion of intermediate frequency signal in coherent Doppler navigation radar
01 p0034 A69-11013

Digital modified discrete Fourier transform Doppler radar processor for tactical aircraft
03 p0389 A69-13196

Digital processing of Doppler radar signals using matched filter concept
03 p0393 A69-13291

Wind shear and reflectivity gradient effects on Doppler radar spectra
03 p0461 A69-13341

Level crossing rate meter correction for boxcar-ed and receiver noise readings in incoherent weather radars
04 p0557 A69-14915

Wind turbulence measurement by shock wave tracking using Doppler radar, stressing relative location of antenna and sound source
04 p0628 A69-15149

Doppler radar inertial navigation, discussing developments in sensors and digital computers
06 p0956 A69-17859

Optical processing of planetary radar data for range Doppler image generation
08 p1270 A69-19816

Range-Doppler processing in pulsed radar applied to imaging of rigid rotating body with motion compensating resolution cells
08 p1270 A69-19861

Wind changes calculated from Doppler data and inertial system, noting role of heading and air speed
08 p1346 A69-20317

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes
12 p2031 A69-26651

Computer simulation program for design and evaluation of digital Doppler processor, analyzing performance limitation due to quantization and white noise
12 p2035 A69-27096

Pseudorandom FM waveforms for simultaneous range and Doppler shift radar measurements
13 p2221 A69-27944

Doppler radar clearance hole packaging method for ruggedized dual in-line integrated circuits with conventional etching, tooling and double-sided printed wiring techniques
14 p2419 A69-29102

Doppler echo from random rough surface, discussing average power return, frequencies, amplitudes, antenna beamwidth and radar data correlation
14 p2413 A69-29488

Airborne Doppler radar, estimating velocity distribution and density of pulse signals reflected from air and ground targets
15 p2567 A69-30349

Digital method to produce radar reflectivity from analog audio frequency Doppler data extracted from terrain echo signal of CW scatterometer radar
15 p2572 A69-31111

Wind velocity and precipitation particle terminal fallspeeds component determination from continuity equation for data collected by Doppler radar
17 p2919 A69-33162

Doppler inertial system with remote attitude capability, detailing sensor operation by airborne computers
17 p3002 A69-34097

Short term frequency stability measured for Doppler radar and space tracking communication applications, reviewing FM theory for spectral purity relationship
18 p3100 A69-34277

Meteorological Doppler radar information display for real time identification of hazardous winds and turbulence in storms
18 p3139 A69-35427

Navigational accuracy dependence on spacecraft geometry, determining information content and critical error sources of earth based Doppler radio tracking data
19 p3402 A69-35935

Imaging radar study based on optical imaging and electromagnetic wave processes, discussing Doppler signal processing, synthetic aperture radars and microwave holography
20 p3489 A69-37632

Ambiguity function interaction with target scattering function in range-Doppler radar, discussing matched filtering application
20 p3490 A69-37641

Moving target indication, discussing target motion effects dependence on Doppler imaging radar scan rate and compression ratio
20 p3490 A69-37644

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions
20 p3490 A69-37648

Doppler radar observations of precipitation induced mesoscale wind oscillations near melting layer produced by pressure perturbations due to horizontal variations in cooling
20 p3572 A69-37909

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases [AIAA PAPER 69-899]
21 p3761 A69-39334

Gas laser-Doppler radar system for moving materials velocity and length measurements in industrial processes
22 p3955 A69-40237

DORNIER AIRCRAFT

NT DO-31 AIRCRAFT
Dornier R and D, discussing single and twin engined aircraft, utility aircraft, helicopter, VTOL transport, safety, etc
22 p3862 A69-39931

DORNIER DO-31 AIRCRAFT

U DO-31 AIRCRAFT

DOSAGE

U RADIATION DOSAGE

DOSIMETERS

NT THRESHOLD DETECTORS [DOSIMETERS]
High energy interactions greater than 10 Gev from dosimetric point of view
03 p0371 A69-13477

Negative pion beams for therapy, radiobiology and dosimetry
03 p0371 A69-13478

Radiation accidents involving sudden brief exposure to penetrating radiation
03 p0374 A69-13502

Nuclear pulsed radiation dosimeter based on strain gage measurement of induced thermal expansion, noting separation of neutron and gamma ray components
06 p0922 A69-16892

Laboratory simulation methods for cosmic nuclear radiation, discussing dosimetry methods
11 p1862 A69-24875

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation
13 p2356 A69-27702

Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease
22 p3879 A69-40846

Psychopharmacological drug effect on visually evoked responses in cats from recordings from visual cortex, noting latencies increase with dose
22 p3879 A69-40847

DOSIMETRY

U DOSIMETERS

DOUBLE BASE PROPELLANTS

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires

02 p0354 A69-12668

DOUBLE BASE ROCKET PROPELLANTS

Strong electrostatic fields effects on burning rates of double base and composite propellants [WSCI PAPER 68-24]

07 p1241 A69-18366

Solid propellant rockets, discussing composite and double base propellants and use of polymers

11 p1941 A69-25588

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion

17 p3017 A69-33349

DOUBLE CUSPS

Osculatory interpolation explicit method demonstration with error terms determination

24 p4341 A69-43230

DOUBLE SIDEBAND TRANSMISSION

Waveform distortion resulting from adjacent channel crosstalk and from amplitude and phase nonlinearity in channel filters in DSB/SC telemetry link

07 p1083 A69-19130

Frequency division multiplex telemetry technique with double sideband-quadrature carrier multiplexing system, discussing data signals, channels and distortion

07 p1084 A69-19131

Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests

07 p1084 A69-19132

DOUGLAS DC-3 AIRCRAFT

U DC 3 AIRCRAFT

DOUGLAS DC-8 AIRCRAFT

U DC 8 AIRCRAFT

DOUGLAS MILITARY AIRCRAFT

U MILITARY AIRCRAFT

DOVAP

U DOPPLER EFFECT

DOWN-CONVERTERS

Mathematical model for voltage step-down DC to DC converter with hysteretic bistable trigger circuit regulating output voltage

06 p0904 A69-17941

Signal conversion by multiple modulation in optical communication system, discussing electrooptic modulators and modulation spectrum

07 p1075 A69-18472

UHF down-converter design used in various Navy missiles UHF telemetry/miss-distance information system

23 p4137 A69-41778

DOWNWASH

Rotor downwash in ground effect in presence of step, using two dimensional analysis for flow field calculation

[AIAA PAPER 69-225]

08 p1253 A69-21032

Wing elastic strains effect on vertical velocity in downwash, noting wing tail combination

18 p3086 A69-34999

DRAFTING (DRAWING)

Printed circuits development based on use of grid without aid of draftsmen

02 p0216 A69-12051

DRAG

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT INTERFERENCE DRAG

NT MINIMUM DRAG

NT PRESSURE DRAG

NT SATELLITE DRAG

NT SUPERSONIC DRAG

NT VISCOUS DRAG

NT WAVE DRAG

Variational calculus applied to time optimal trajectories between two points in range altitude space, discussing aircraft thrust and drag laws

01 p0009 A69-10414

Wind tunnel measurement of rear parts drag of small scale aircraft models [ONERA-TP-633]

02 p0226 A69-11624

Approximate solution for turbulent jet expansion in opposing stream, discussing hydraulic drag coefficient formula derivation

07 p1118 A69-18396

Hydraulic drag coefficient in MHD fluid flows in traveling magnetic field from motion equations for turbulent flows, considering velocity profiles

07 p1192 A69-19017

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing [AIAA PAPER 69-265]

09 p1566 A69-21258

Drag and friction coefficients for laminar pulsating incompressible fluid flow in circular tubes obtained from Navier-Stokes equation

15 p2592 A69-30988

Blockage effects of flat plates and solid bluff bodies in closed wind tunnels compared concerning drag coefficient values

17 p2890 A69-33245

Drag measurements for sharp and blunt-nosed bodies shot into wind tunnel supersonic gas counterflows, discussing shock waves for different configurations

19 p3239 A69-36401

Energy losses due to drag in unstable laminar fluid flow in tube

20 p3513 A69-36973

Drag effect on plasma motion in high current pulsed plasma accelerators of Marshall type, calculating current variations, voltage, particle velocity, efficiency and impulse

21 p3778 A69-39548

Hypersonic reentry spheres drag coefficients derived from radar measurements

23 p4059 A69-41898

Stagnation point Mach number gradient, sonic point location and drag coefficient of hemisphere at zero angle of incidence

23 p4060 A69-41910

DRAG BALANCE

U AERODYNAMIC BALANCE

U LIFT DRAG RATIO

DRAG CHUTES

High altitude balloon stationkeeping system combining battery powered propeller and drag chute

22 p3866 A69-40941

DRAG COEFFICIENT

U AERODYNAMIC COEFFICIENTS

DRAG DEVICES

NT AERODYNAMIC BRAKES

NT LEADING EDGE SLATS

NT SPOILERS

NT TRAILING-EDGE FLAPS

NT WING FLAPS

Stopping barriers for jet aircraft landing design and operation

11 p1862 A69-24354

Monograph on optimal design of free-running drag turbines for boundary layer suction in aircraft, emphasizing gliders performance

12 p2011 A69-26117

DRAG MEASUREMENT

Drag and spray effects due to slush and water on runways during aircraft takeoffs

01 p0011 A69-11048

Accelerometric measurement of atmospheric drag with satellite 1968-59B, obtaining upper atmosphere density profile at 130-160 km

02 p0245 A69-12728

Airplane drag prediction by wind tunnel tests

05 p0695 A69-15543

Drag force measurement in low density flows using modulation techniques

06 p0861 A69-17638

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique

[AIAA PAPER 69-140]

06 p0865 A69-18184

Hypersonic drag and shock wave characteristics of blunt bodies including cones, spherical nose and concave nose bodies

09 p1433 A69-22568

Pressure distribution measurement over sphere with cylindrical afterbody in magnetofluid dynamic flow, showing drag decrease at large magnetic field

11 p1873 A69-25136

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust minus drag, noting nozzle configurations variations effect

[AIAA PAPER 68-395]

12 p2059 A69-26769

Small body drag in wake of large satellite using two dimensional model noting methods for calculating distribution function moments in wake regions

12 p2012 A69-26798

Thrust balance for scale model of powered nacelle fan jet engine from drag analysis in wind tunnel, deriving fan nozzle velocity coefficient

13 p2199 A69-27446

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage

[AIAA PAPER 67-657]

13 p2312 A69-28219

Free flight sharp cone drag measurements in rarefied hypersonic flow

13 p2199 A69-28244

Initial flow turbulence effects on drag coefficient for prismatic bodies in low velocity gas flow determined by wind tunnels

14 p2391 A69-29625

Wind tunnel investigation of turbulent gas flow heat transfer and hydrodynamic drag in variable pressure gradient field of divergent-convergent channel

15 p2548 A69-3117

Drag measuring requirements and comparison of accelerometer or drag-free satellite control systems usage for atmospheric density determination

16 p2788 A69-31722

Hypersonic slender cone zero angle of attack drag in rarefied continuum and noncontinuum flow in shock tunnel, indicating body dimension influence in transition regime [AIAA PAPER 69-711]

17 p2891 A69-33445

Lift and drag determination for moving rectangular coils over infinite plane sheet for magnetic suspension and guidance for rocket sleds

17 p2946 A69-33789

Cylindrical models in hypersonic rarefied flow, determining drag data by free flight technique

24 p4249 A69-43677

DRAG REDUCTION

Polyvinyl chloride coating for reducing aerodynamic skin friction drag, noting water saturation effect on polyurethane foam

[AIAA PAPER 69-165]

06 p0912 A69-18043

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate

[AIAA PAPER 69-164]

06 p0914 A69-18163

Minimum drag wing flap profile design, discussing application for trailing edge flaps

08 p1251 A69-20441

Optimum aerodynamic shapes theory, considering linearized and nonlinearized supersonic flow, Newton-Busemann hypersonic flow, free molecular flow, mathematical models and variational problems

08 p1253 A69-21127

Three dimensional optimum hypersonic wings construction for wave drag minimization for given lift

[AIAA PAPER 68-158]

09 p1430 A69-21944

Axial and radial turbulence intensities for flow through smooth round tubes, measuring velocity profiles and drag coefficients

15 p2590 A69-30003

Viscous drag reduction - Conference, Dallas, September 1968

17 p2950 A69-33247

Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc

17 p2951 A69-33252

Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior

17 p2951 A69-33253

Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles

17 p2951 A69-33254

Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction

17 p2951 A69-33256

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions

17 p2951 A69-33257

Magnetic field effects on rotating cone compressible boundary layer at zero angle of attack, describing changes in drag coefficient, torque and velocity profiles [AIAA PAPER 69-721]

17 p2892 A69-33484

Drag minimization as extremization of products integrals powers, noting application to optimum wings and fuselages

19 p3242 A69-36800

Transonic flow around profiles with heat input, showing drag reduction in supersonic part of flow field

23 p4061 A69-42414

Newton formula and Ritz method to determine wing shape with blunt leading edge, considering minimum drag achievement at hypersonic velocities

24 p4247 A69-43497

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate

[AIAA PAPER 69-164]

24 p4306 A69-43685

DRAGULATORS

U BRAKES [FOR ARRESTING MOTION]
U DRAG DEVICES

DRAINAGE

Liquid draining motion from transversely moving cylindrical tank in time varying gravity field with outlet pipe at bottom, discussing flow rate and free surface [AIAA PAPER 69-679] 17 p2953 A69-33440
Nonlinear free surface effects in low gravity tank draining, finding domains of validity for linearized and nonlinear analyses [AIAA PAPER 69-680] 17 p2953 A69-33450

DRAINING

U DRAINAGE

DRAWINGS

U ENGINEERING DRAWINGS

DRIFT

Electric drift instability in semiconductors with hot electrons, discussing diffusion, electron heat conduction, energy transfer, space charge density, etc 13 p2318 A69-27891
Drift correction schemes for periodic cross correlation comparison unification and extension 15 p2564 A69-30169

DRIFT [INSTRUMENTATION]

Rubidium self oscillating magnetometer long term stability, noting changes affecting accuracy and sensitivity 02 p0250 A69-12394
Traveling wave tube segmentation, analyzing effects of drift, grouping and selecting sections on efficiency and amplification 03 p0407 A69-13985
Ion and electron contaminating currents removal in vacuum evaporating devices, using biased field plates 04 p0577 A69-14875
Directional gyroscope accuracy increased by self adaptive systems, based on precession theory and drift amplitude dependence 11 p1881 A69-24559
Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations 11 p1881 A69-24560
Dynamics of triaxial gyrostabilizer with additional rotor mounted on base, showing systematic drift 13 p2259 A69-27428
Automatic control circuit zero drift compensation during external disturbance, using algorithm for computer minimizing of losses caused by control and response inaccuracy 14 p2425 A69-29140
Electronic components reliability by failure rates and drift behavior, assuming probabilities product rule and exponential law of life distribution 15 p2626 A69-30835
Drift of two connected gyroscopes, discussing equations of motion assuming unperturbed rotation and weightlessness 18 p3135 A69-34561
Strapdown electrostatic aerospace navigator /SEAN/ using electrostatically suspended gyros /ESG/ for inertial reference, including drift and computer tests 19 p3369 A69-35802

DRIFT RATE

Temperature dependence of hot electron drift velocity in silicon at high electric fields, using space charge perturbation theory 01 p0135 A69-10120
North-south ionospheric drift velocities near magnetic equator, noting marked seasonal characteristics and diurnal variations 01 p0062 A69-10138
Electrostatic polarization field formation by acoustic wave propagation through ionosphere, calculating effect on ionization drift velocity 01 p0068 A69-11110
Electron drift velocity, diffusion coefficient and trapping time in GaAs, measuring variation with electric field 01 p0140 A69-11255
Mathematical modeling of gyro drift rate in inertial navigation based on stationary and nonstationary time series analysis 03 p0463 A69-13213
Horizontal drifts at E region level measured in India by spaced phase path technique 03 p0421 A69-13330
Cyclotron drift instabilities of low pressure plasma containing charged impurities 03 p0478 A69-13834

Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution 03 p0503 A69-14015
Nighttime variations of F region electron density profiles at Puerto Rico, discussing seasonal and solar cycle variations in temperature and vertical drift velocity 03 p0503 A69-14017
Charged particle motion in time dependent external magnetic field 03 p0504 A69-14235
Drifting temperature fluctuations in semiconductors in presence of strong electric field 04 p0643 A69-15256
Drift and diffusion of electron pulse advancing through gas, providing physical basis for Townsend ionization coefficient 04 p0633 A69-15443
Oxygen ions motion in oxygen, measuring drift velocities in glow discharge 05 p0795 A69-15662
Threshold velocities of acoustoelectric current oscillations in elemental piezo- and nonpiezoelectric semiconductors, taking into account amplification and losses of phonons 05 p0807 A69-15956
Plasma confined in transverse magnetic field analyzed for drift rates, noting role of injection direction 06 p0963 A69-16907
Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces 06 p1009 A69-17966
Drift measurements of rate constants for charge transfer in ion-molecule processes 08 p1355 A69-20210
Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field 08 p1368 A69-20809
Drift rate of gyroscopic devices in space based on kinematic theorem, stressing free gyroscope subjected to harmonically varying moment 09 p1498 A69-22111
Azimuthal drift of rotor axis of directional gyroscope mounted on sloping base, showing vertical component responsibility via truncated equations of motion 09 p1502 A69-22702
VHF radar observations of electron density irregularity in nighttime equatorial electrojet, comparing day and night time electron drift rates and directions 10 p1769 A69-23837
Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity 10 p1686 A69-23911
Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect 11 p1922 A69-24226
Drift elimination in linear system identification using binary m-sequences by crosscorrelating over two periods of output 11 p1834 A69-24547
Drift velocity of earth magnetic field based on spherical harmonic analysis of geomagnetic secular variation 12 p2077 A69-27111
Triaxial gyrostabilizer systematic drifts during rocking at large platform displacement angles, analyzing drift direction and rate dependence 13 p2259 A69-27430
Drift velocity and longitudinal and transverse diffusion coefficient for low energy N ions in N gas in mass spectrometer at room temperature 13 p2302 A69-27458
Unstable weakly ionized HF magnetoplasma fluctuations with no axial drift, noting phase velocity parametric dependence 13 p2312 A69-28197
Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction 14 p2436 A69-29053
Radio astronomical observations of shape and drift velocity of focusing ionospheric discontinuities 14 p2436 A69-29054
Three dimensional model of atmospheric drift currents in equatorial region of world ocean system based on nonlinear differential equations 14 p2472 A69-29405
Ionospheric inhomogeneity model for motion of infinite elliptical cylinder of cold plasma in neutral particle flow and ambient electrostatic and magnetostatic fields 14 p2500 A69-29864

F 2 region small scale inhomogeneities drift observations showing seasonal and diurnal velocity and direction changes 14 p2444 A69-29868
Radio equipment for studying ionospheric inhomogeneities using space diversity reception, presenting vertical component of drift velocities of small scale inhomogeneities 14 p2453 A69-29876
Aircraft constant altitude-pressure flight navigation attained using Bellamy formula and loxodromic route for drift compensation 15 p2651 A69-30294
Particle drift velocity distribution of fully ionized plasma in magnetic field calculated by integration of Boltzmann equation 15 p2659 A69-30707
Collisionless drift plasma wave instability growth rate calculation noting destabilization from resonant electrons 16 p2820 A69-31691
Geomagnetic field westward drift related to earth core rotation from calculating drift at earth surface and at core 16 p2774 A69-31983
Continuity conditions for drifting magnetoplasmas without ionic effects, discussing eigenvalue equation of refractive index and electromagnetic modes propagation 17 p2926 A69-33851
Meteor trail drift radar observations in Kharkov, giving wind velocity diurnal and seasonal variations 17 p3041 A69-33897
Radar unit for network component /wind patrol/ in statistical observations of wind drift conditions in meteor trails 17 p2939 A69-33901
Vertical distribution of ionospheric drift velocity in auroral zone, evaluating role and intensity of electric field formed in dynamo region 17 p2964 A69-33964
Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density 18 p3179 A69-34261
Mean drift rates of single and two rotor gyroscopic linear acceleration integrators mounted on irregularly rocking base 18 p3135 A69-34586
Mesospheric wind measurement by meteorological rockets based on radar determination of drift trajectories of chaff clouds 20 p3529 A69-37797
Drift velocity and lateral diffusion of positive hydronium, hydrogen and K ions in hydrogen with zero field mobilities 20 p3580 A69-38026
Electron density in positive column of Cs vapor discharge related to current and gas pressure, discussing field strength effects on drift velocities 23 p4196 A69-42197
Electron intensities and substorm drift effects in outer radiation belt using two satellite technique 24 p4309 A69-43172
Drift characteristics of hydrogen plasma partially captured by transverse magnetic field, finding drift rate dependence on magnetic field level 24 p4357 A69-43470

DRILLING

Drilling and welding with sealed-off continuous carbon dioxide gas laser with outgoing beam collimated by Ge lens 01 p0086 A69-10821
Pulsed ruby laser of small output for hole drilling, studying correlation of vaporization, hole diameter and depth with laser output 09 p1504 A69-22247

DRINKING

Electrode stimulated hypothalamic drinking in rats compared with drinking induced by water deprivation, noting difference in consumption 17 p2910 A69-33750

DRIVES

MOSFET drivers for low current memory fabricated in 64 unit monolithic strips, discussing driver performance data 01 p0039 A69-10172

DROUGE PARACHUTES

U DRAG CHUTES

DROGUES

U TOWED BODIES

DRONE AIRCRAFT

NT FIREBEE 2 TARGET DRONE AIRCRAFT
NT TARGET DRONE AIRCRAFT

Operational system effectiveness information for reconnaissance drone system including test flights, discussing application to reliability and maintainability in project management

18 p3232 A69-34505

DRONE HELICOPTERS

U HELICOPTERS

DRONE VEHICLES

U FIREBEE 2 TARGET DRONE AIRCRAFT

U TARGET DRONE AIRCRAFT

DROP SIZE

Atmospheric droplets diameter, number density and scattering cross sections determined from laser radar return equation and Mie theory

06 p0888 A69-17483

Electromagnetic waves attenuation and scattering by rainfalls calculated using droplet distribution function

08 p1275 A69-20430

Simultaneous measurements of cumulus cloud thermal structure and concentration of water particles larger than 18 micron diameters

09 p1536 A69-21866

Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter

09 p1483 A69-21995

Dropletwise condensation, analyzing nucleation sites, growth, vapor capture, heat transfer rates and surface texture

13 p2376 A69-28143

Quantitative analysis of interaction between spray and ambient atmosphere, discussing atomization of flat sheet and drop behavior relationship to operating conditions

15 p2717 A69-30465

Sulfur dioxide, nitrogen dioxide and Aitken nuclei washout by artificial rain of known intensity and droplet size distribution

24 p4345 A69-43146

Pitot probe measurements of Hg drop growth rates and diameters, allowing for thermal and diffusion effects

24 p4316 A69-43583

DROP TESTS

Drop-weight tear tests dependence on specimen thickness and metallurgical properties

09 p1503 A69-21389

Impact testing machine with dropping load, noting provision for sample fastening to reduce reflected tensile wave effect

15 p2583 A69-30286

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests

[AIAA PAPER 69-531] 16 p2833 A69-32691

Drop test method to obtain subsonic terminal velocity and base pressure data for planetary entry probe configurations

19 p3238 A69-35959

Rain erosion process on aircraft surface, using single impact test apparatus with photographic recording and photoelastic study

23 p4227 A69-41872

DROPS (LIQUIDS)

NT RAINDROPS

Fluctuating radar echoes from cloud targets with vibrating drops, noting amplitude modulation effect of changing cross section on backscattered signals

02 p0208 A69-12021

Flame zone development of monopropellant droplets during heat-up period

02 p0352 A69-12310

Supercooled water drop frozen and observed to undergo explosive shattering and ejection of ice splinters

02 p0275 A69-12693

Propagation of detonation wave in tube containing single stream of diethylcyclohexane droplets dispersed in gaseous oxygen

03 p0415 A69-13139

Temperature measurement of moving droplets, noting influence of thermocouple electrode stability

04 p0688 A69-15423

Aspiration psychrometric probe for measurements of relative humidity of gas-vapor phase of gas flow containing liquid droplets

06 p0927 A69-17689

Water droplet simulation by glass spheres used in study of light scattering at cloud particles

06 p0953 A69-17992

Transient development of reacting boundary layer near stagnation point of vaporizing drop in gas stream

[AIAA PAPER 69-174] 06 p0912 A69-18056

Quasi-steady combustion model of fuel droplet with convection, including pressure effect

[AIAA PAPER 69-147] 06 p1037 A69-18114

Rotating incompressible liquid drop held together by surface tension noting spheroidal and toroidal shapes, energies and case of surrounding denser medium

07 p1120 A69-19267

Stability of rotating liquid mass held together by surface tension

07 p1121 A69-19268

Kerosene droplets combustion stability studied by motion pictures, discussing pressure, temperature and O concentrations effects in turbulent carbon dioxide flow

08 p1421 A69-20345

Vaporization of mist of small droplets by intense light beam for droplet extinction rate proportional to absorbed radiant energy

09 p1539 A69-21346

High velocity gas stream induced shattering of liquid drops, disintegration rate and breakup time

[AIAA PAPER 68-83] 09 p1482 A69-21947

Spark ignition of liquid fuel droplets atomized in air analyzed by spark discharge visualization for two phase mixture

09 p1623 A69-22220

Heat transfer rates for water, acetone and alcohol droplets splattering from heated plate, noting effect of impact angle and velocity

10 p1809 A69-23196

Aerodynamic forces causing deformation and breakup of liquid droplet with ellipsoid of revolution form in constant velocity gas flow

11 p1875 A69-25466

Spherical monopropellant droplet radially symmetric burning during adiabatic vaporization and direct decomposition, examining near-equilibrium limit by asymptotic analysis

12 p2190 A69-25948

Freezing of water droplets in thermal equilibrium with gas mixtures, considering droplet shattering and gas volume

12 p2126 A69-26018

Shock tunnel hypersonic flow effect on critical Weber number for zinconium drop breakup in partially and fully molten states

12 p2063 A69-26802

Dropletwise condensation, analyzing nucleation sites, growth, vapor capture, heat transfer rates and surface texture

13 p2376 A69-28143

Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature

13 p2378 A69-28250

Equations for steady state combustion of fuel drops in oxidizing atmosphere integrated numerically, obtaining ignition and extinction conditions

13 p2379 A69-28456

Spherical symmetric unsteady conservation equations describing transient burning of volatile fuel droplets, obtaining time dependent fuel and heat distribution in flow field

14 p2537 A69-29016

Sessile drop contact angles of alkali liquid metals on Re, W, Mo, Ta and Nb substrates related to substrate surface bare work function

14 p2506 A69-29270

Evaporation of liquid droplets from heating wall observed cinematographically, noting heat transfer by violent film boiling and conduction through thin vapor layer

15 p2718 A69-31117

Liquid fuel droplets combustion under free and forced convection noting combustion rate

15 p2719 A69-31174

Fuel drop combustion under unsteady conditions at high pressure in unlimited and limited air volume

15 p2719 A69-31476

Solid materials erosion rate as function of cumulative damage generated by liquid droplets impingement

16 p2794 A69-31904

Laser ignited Zr droplet free fall combustion in oxygen, analyzing metal conservation and luminosity correlation assuming reflux action from fog layer

[WSCI PAPER 69-1] 16 p2830 A69-32342

Laser ignited combustion of 365 micron Zr droplets falling in ultrapur oxygen using spectroscopic and photographic techniques, discussing vapor phase transport phenomena

[WSCI PAPER 69-4] 16 p2830 A69-32345

Pure monopropellant steady droplet burning rate theory for determining heat-up and convection trans-

port rates in droplet combustion products of flat flame burner

[AIAA PAPER 69-563] 16 p2834 A69-32722

Bag type deformation of incompressible viscous convective and nonevaporating droplets immersed in Stokes or potential flow pressure distributions, including Weber number

[AIAA PAPER 69-669] 17 p2954 A69-33456

Fuel droplet evaporation and combustion in still air as unsteady diffusion controlling phenomenon, basing calculations on flame front model

20 p3632 A69-37520

Liquid drop in electric field numerically analyzed for disintegration dynamics and instability through cross section computation at time intervals

23 p4151 A69-41694

Pitot probe measurements of Hg drop growth rates and diameters, allowing for thermal and diffusion effects

24 p4316 A69-43583

Supercritical burning of liquid fuel droplets in stagnant environment, using flame sheet model to obtain heat and mass fields

24 p4415 A69-43600

DROPSONDES

Dropsonde for vertical wind profile or wind shear measurement without tracking noting low cost

10 p1692 A69-23254

DROSOPHILA

Recessive lethal mutations frequency in gametes of male and female Drosophila melanogasters onboard Vostok spacecraft

07 p1063 A69-18598

Mortality kinetics of Drosophila melanogaster, comparing effects of gamma radiation-induced life shortening and natural aging

15 p2555 A69-30444

Oxygen effect on X ray induced somatic crossing over frequency in Drosophila melanogaster, noting bristle spots number modification on abdominal tergites

23 p4099 A69-42118

Phosphodiesterase activity of anterior pituitary, median eminence, heart and cerebral cortex of rat, studying effects of caffeine, theophylline and hydrocortisone

02 p0199 A69-11885

Therapeutic potential of dimethyl sulfoxide in aerospace medicine

06 p0883 A69-17851

General aviation accidents and hazards presented by drugs, ethyl alcohol, pesticides and carbon monoxide

07 p1068 A69-19435

Drug action on decompression sickness in rats compared with action on nitrogen narcosis and oxygen toxicity

17 p2913 A69-33172

Alcohol and drug intake effects on drivers control of motor vehicles, describing postrotatory nystagmus test for toxicity measurement

21 p3652 A69-38791

Pilots and automobile drivers functional impairment due to alcohol and drugs

21 p3663 A69-38792

Decompression sickness prevention in guinea pigs by heparin and papaverine combination nebulized in carbogen, discussing nitrogen elimination enhancement

21 p3655 A69-38917

Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease

22 p3879 A69-40846

Psychopharmacological drug effect on visually evoked responses in cats from recordings from visual cortex, noting latencies increase with dose
22 p3879 A69-40847

Radioprotective effects of 5-azacytidine on bone marrow and blood leukocytes of X ray irradiated AKR mice
23 p4080 A69-41429

Noise level effects on pharmacological effectiveness of centrally acting drugs in rats
24 p4262 A69-42947

Hypnotic compounds properties influencing REM /rapid eye movements/ stage, discussing insomnia problems with jet flight crew and passengers
24 p4277 A69-43389

DRUMS [CONTAINERS]

Axisymmetric vibrations of thin drums consisting of circular cylindrical shell and two circular end plates
20 p3629 A69-38114

DRY CELLS

Sealed nickel-cadmium cell design optimization, evaluating effects of various electrochemical treatments on energy density of nickel oxide positive electrode
10 p1639 A69-23992

Signal electrode charge control of sealed Ni-Cd batteries, discussing signal voltage for overcharge control
10 p1640 A69-23993

Maintenance free high rate sealed Ni-Cd battery power system compatible with existing aircraft electrical systems
10 p1640 A69-23994

DRY FRICTION

Dry friction stabilizing effect on motion of astatic gyroscope with quasi-elastic compensation
04 p0597 A69-14605

Dry sliding friction and wear in ultrahigh vacuum, emphasizing slip rings and brushes for space applications
[IME PAPER 7] 07 p1138 A69-18561

Yielding of matrix material and cell size of substructure relationship to dry abrasion resistance of SAP type aluminum alloy at room temperature
08 p1319 A69-19995

Single axis gyro-stabilizer stability analysis allowing for dry friction in precession axis, noting asymptotic tendency of motions toward steady rotation
09 p1502 A69-22701

Dry friction whip role in radial rubs dynamic stability in labyrinth seals and blade tips of turbomachinery
[ASME PAPER 69-VIBR-56] 10 p1804 A69-24146

Longitudinal and transverse frequencies of cylindrical metallic rod with spherical tip for sliding motion with dry friction
12 p2102 A69-26290

Dry friction effects on stability of single axis gyro-stabilizer
14 p2445 A69-28922

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests
15 p2642 A69-30328

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity
[ASLE PREPRINT 69AM 5C-2] 15 p2619 A69-30473

Lunar conditions differing from simulations in laboratories, examining surface, physicochemical properties and friction
18 p3113 A69-34241

Casing bearings dry friction force moment effect on double rotor gyrocompass sensor motion, showing diminished device accuracy at high latitudes
18 p3135 A69-34560

Quasi-plastic impact resulting from incomplete elastic collision of two material points in presence of dry Coulomb friction, noting engineering role in pneumatic equipment
18 p3215 A69-34568

Dry dynamic friction of brass disk against steel surface reduced using ultrasonic oscillations creating air gap
18 p3135 A69-34587

Molybdenum disulfide dry film lubricant wear theory and test correlation problems, considering sintering self propagation due to chemical effect of environment
19 p3323 A69-35580

Harmonic linearization for analyzing dry friction effect on gyroscope stability with free play in mechanical couplings, showing effective damping of natural oscillations
23 p4163 A69-41554

DRY HEAT

Spacecraft sterilization techniques efficiency in terrestrial and extraterrestrial environments noting dry heat, radiation, ethylene oxide, isopropanol and formaldehyde in methanol
05 p0712 A69-15937

Dry heat destruction of spores, discussing dependence on spore water content and effect of surrounding gas volume on escape of water from spore
05 p0712 A69-15938

Dry heat sterilization of spacecraft, microorganism water content and recommendations for fabrication conditions for spacecraft
05 p0712 A69-15939

Mathematical model for estimating microbial survival in heat sterilization of spacecraft, including environmental and time cumulative effects
05 p0707 A69-15941

Spacecraft terminal dry heat sterilization procedures for minimal time and temperature conditions, using simple geometric configuration of spacecraft for thermal analysis
05 p0712 A69-15942

Dry heat destruction rates for microorganisms encapsulated in and on spacecraft hardware, concluding temperature and water conditions in spore as major factors
15 p2560 A69-31444

Spacecraft sterilization by destructive heating with thermite or high velocity entry friction before entering planet atmosphere
15 p2560 A69-31472

DUCTED FAN ENGINES

Monograph on exhaust gases mixing with cold airstream in ducted fanjet engine, noting thrust and efficiency increase
03 p0496 A69-14048

Ducted fan engine turbine air flow rate and frontal gas temperature determined from air temperature/pressure measurements behind compressor and engine fuel flow
18 p3086 A69-34986

DUCTED FANS

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system
[AIAA PAPER 69-222] 08 p1253 A69-21030

DUCTED FLOW

NT KNUDSEN FLOW

MHD flow through circular, elliptic and rectangular straight channels with external magnetic field transverse to flow direction
01 p0132 A69-11209

Static pressure field induced by steady subsonic flow of compressible inviscid fluid through two dimensional duct with statistically distributed wall roughness
01 p0062 A69-11279

Flow in square to rectangular constant area transition piece having straight walls with outlet aspect ratio of 5 fitted with exit duct
02 p0189 A69-12412

Conservation equations for steady incompressible flow in variable area duct with mass transfer at walls simplified by linearizing inertial and convective terms
03 p0413 A69-13011

Average energy dissipation in MHD duct flow of arbitrary cross sectional shape, evaluating bulk temperature, net wall heat flux and pressure gradient
04 p0635 A69-14724

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system
[AIAA PAPER 69-85] 06 p0984 A69-18082

Uniqueness theorem for laminar MHD duct flows
07 p1190 A69-18813

Flow rates characteristic of trapezoidal geometries encountered after schematization of noncylindrical ducts involving irrotational flow, leakage, heat exchanges and electrical conduction phenomena
08 p1303 A69-20270

Laminar turbulent transition conditions in MHD channel flow
10 p1727 A69-23097

MHD fluid flow in rectangular duct with allowance for finite wall conductivity
10 p1727 A69-23098

Nonuniformity of magnetic field effect on steady flow of incompressible inviscid electrically conducting fluid in duct, considering Reynolds and Alfven numbers
[JPL-TR-32-1376] 11 p1923 A69-24291

Three dimensional compressible potential flow in curved circular duct analyzed by perturbation method
11 p1867 A69-24607

Duct entrance region flow, analyzing eigenvalue problem and nonlinear transformation simplification
11 p1874 A69-25285

Current and voltage distribution around normal shock in MHD duct using conformal transformation, considering continuous and segmented electrode boundary conditions
11 p1931 A69-25359

Internal flows of compressible fluids with heat transfer in accelerating nozzles and constant area ducts, simplifying equations by assuming one dimensional flow
12 p2012 A69-26790

Effective electrical conductivity of two phase vapor-potassium flow in flat duct at flow temperature 800 C, showing dependence on volumetric vapor content
13 p2306 A69-27480

Shear stress and velocity profile in MHD duct, examining turbulence damping by electromagnetic coupling
13 p2309 A69-28024

Tensor conductivity measured and analyzed for MHD generator duct with electric and magnetic fields
13 p2309 A69-28026

Boundary value problem for one dimensional unsteady equations for inviscid conducting gas during transition processes in MHD duct
13 p2309 A69-28027

Current distribution in MHD duct with permeable electrodes with tensor conductivity, obtaining Riemann-Hilbert heterogeneous boundary value problem solution by finding electric field
13 p2310 A69-28030

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for bulk and wall temperatures, transfer coefficients and rates, etc
15 p2716 A69-30004

Static pressure distribution induced by statistically roughened duct walls on supersonic stream
15 p2593 A69-31148

Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct
15 p2549 A69-31220

Entrainment of viscous electrically conducting liquid in long duct with narrow rectangular cross section and movable walls in magnetic induction field
16 p2816 A69-31606

Gas ducted flow at subsonic inlet velocity and critical outlet Reynolds numbers, proposing surface friction relation to Mach number
16 p2771 A69-31956

Model for mixing and combustion of compressible particle laden ducted flows
[AIAA PAPER 69-460] 16 p2880 A69-32650

Taylor vorticity transport theory and von Karman similarity hypothesis extended to consider three dimensional fluctuating velocity field in analyzing turbulent swirling ducted flow
[ASME PAPER 69-APM-19] 18 p3120 A69-34394

Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
18 p3171 A69-35178

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes
19 p3381 A69-36772

Reynolds number dependence of turbulent velocity profile in circular tube and parallel plate channel analyzed by von Karman similarity hypothesis
20 p3513 A69-37081

Membrane vibration problems for combined free and forced laminar convection through vertical ducts, obtaining expressions for velocity, temperature and Nusselt numbers
21 p3851 A69-38974

Shock wave transient motion during passage through ducts in inviscid gas containing convergences, using characteristics method
23 p4153 A69-42398

DUCTED PROPELLERS

Laminar flow swirling motion in circular duct, studying separation and reversal 24 p4301 A69-43355

Unsteady MHD conducting fluid flow in arbitrary ducts under transverse magnetic field, studying effects of pressure gradient impulsive change 24 p4359 A69-43678

U SHROUDED PROPELLERS

DUCTILITY

Maraging steels ductile and strength characteristics with increased Co and Mo as function of Ni content, tempering method and aging 01 p0098 A69-10731

Stability of ductility and fatigue strength of stainless steel under longtime static loads in vacuum and in liquid lithium 03 p0450 A69-13912

Grain-size refinement of beryllium castings and extrusions after compression in pressure chamber, determining effect on ductility 08 p1330 A69-20013

High strength steels, discussing ductility, austenite to martensite transformation for increased strain hardening rate and elongation and corrosion resistance 12 p2115 A69-26829

Strain rate and pressurization effect on ductile-brittle transition temperature of polycrystalline sintered W, discussing yield stress 12 p2117 A69-27138

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition 13 p2274 A69-27225

Structural modes of fracture, analyzing brittle, ductile, fatigue and stress corrosion fractures using fractography 13 p2274 A69-27226

Dynamic strain aging of Fe-Cr-C and Fe-Mo-C steels, analyzing strength, ductility and secondary hardening by using microprobes, foils diffraction and extraction replicas 13 p2276 A69-27403

Reversion and drawing techniques for ultrahigh strength ductile maraging steel wire without excessive deformation 13 p2278 A69-27412

Aluminum alloys ductile fatigue striations, considering dependence on grains crystallographic orientation and vacuum effect 13 p2278 A69-27415

Strain-rate sensitivity measurements to determine ductility of materials, noting relation to elongation 13 p2278 A69-27416

Ductile metal powder chemical reactions during comminution in pure or oxygenated water 13 p2216 A69-27762

Dislocation and energy balance analysis of ductile and brittle metal cracks for determining metal fracture strength from plastic deformation 17 p3052 A69-32984

Alloying elements effects on low temperature metal fracture, considering changes in ductile-brittle transition flow due to solute 17 p2988 A69-33551

Smooth and notched tensile properties of Fe-Ni alloys in liquid Hg, discussing ductility and toughness 20 p3563 A69-38025

Alpha-beta Ti-Al-V-Mo-Zr alloy with high strength, fracture toughness and crack propagation resistance, low density and adequate ductility, discussing test results [AIME PAPER S69-3] 21 p3747 A69-39472

Ti, Al, S and P influence on Ni alloys weldability, discussing chemical composition, susceptibility to hot cracking and ductility temperatures 22 p3967 A69-39884

DUCTS

NT AIR DUCTS

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number [ASME PAPER 68-WA/FE-45] 05 p0698 A69-16112

Connecting duct influence on slide wire vertical air-speed indicator operating on barometric principle during aerial gravimetric surveying 13 p2260 A69-27828

Negative resistance amplifier with stabilizing resistor in compensating circuit for operation in microwave duct mismatched beyond amplifier passband range 15 p2573 A69-30118

Self excited vibration of flowing medium and infinite cylindrical duct wall in primary magnetic field, discussing vibration stability and critical speeds 18 p3226 A69-35462

Supercritical frequencies horizontal gradient ducting effects on backscatter sounding of F region magnetic field aligned irregularities 22 p3941 A69-40913

DUFFING DIFFERENTIAL EQUATION

Numerical digital computer determination of ultra subharmonic response for Duffing equation 01 p1014 A69-10235

DUMMY LOADS

U IMPEDANCE

U LOADING

DUNGEYS WIND SHEAR MECHANISM

U WIND SHEAR

DUOPLASMATRONS

Bilateral plasma outflow plasmatron with variable electrode diameter, discussing efficiency, current-voltage characteristics and size 01 p1025 A69-10102

Duo-plasmatron charged particles energy spectra analyzed as function of discharge parameters 14 p2501 A69-29955

DUPLEX OPERATION

Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability 18 p3147 A69-34531

DUPLEXERS

S band thyatron waveguide switch as pretriggered megawatt balanced duplexer 01 p0048 A69-11035

DUPLICATING

U REPRODUCTION [COPYING]

DURATION

U TIME

DUST

NT COSMIC DUST

NT INTERPLANETARY DUST

NT LUNAR DUST

NT TERRESTRIAL DUST BELT

NT ZODIACAL DUST

Dust particle separation from inlet flow with S-bend duct to minimize engine dust ingestion, determining particle trajectories [AHS PAPER 211] 01 p0006 A69-10409

Spherical flames of spark-ignited dust clouds, discussing streak film photographs, flame propagation, particle burnout time and burning velocities 02 p0353 A69-12323

Terminal velocities of dust particles for two Venus atmospheric models from Mariner 5 and Venera 4 data, obtaining vertical wind velocity requirements 06 p1001 A69-17172

Comet atmosphere dust component, relating physical properties to brightness characteristics in stellar magnitudes 15 p2685 A69-30528

Arend-Roland comet head luminescence intensity, considering radiation scattering by dust component 21 p3804 A69-39080

Aerosol attenuation coefficients vs altitude in troposphere and stratosphere, noting seasonally dependent surface convective dust layer and temperature dependent aerosol maximum altitude 21 p3718 A69-39773

Martian seasonal darkening attributed to windblown dust 24 p4389 A69-43742

DUST COLLECTORS

Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes 12 p2158 A69-26342

Barbados airborne dust collections showing metal fragments and black magnetic spherules contaminants from handling, discussing deep sea cosmic spherules and zodiacal cloud 12 p2075 A69-26964

Inflight shadowing device incorporated into dust particle collection devices borne in Aerobee rocket sampling noctilucent cloud display over Fort Churchill 15 p2602 A69-31386

DWARF STARS

NT WHITE DWARF STARS

Microturbulent velocity parameter correlation to iron-to-hydrogen ratio for G dwarfs, using model atmosphere abundance analyses 01 p0154 A69-10877

Sky areas search for stars with UV excesses listed in Luyten Two-Tenths Catalog of Proper Motions 08 p1392 A69-20560

Gas flows in close binary systems of dwarf stars

08 p1396 A69-20648

Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature 09 p1600 A69-22199

Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atmospheres 09 p1607 A69-22431

Dwarf and subdwarf stars limb darkening tables for unblanketed nongray radiative model atmospheres 12 p2171 A69-27153

Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339 13 p2349 A69-27811

Red dwarf star /YZ Canis Minoris/ radio outbursts observation noting stellar atmospheric spectrum, electron density and temperature and total flare energy 17 p3043 A69-34164

YZ Canis Minoris red dwarf star flare event observation record, noting optical spectrum energy output and slow decay 17 p3043 A69-34165

Red dwarf star YZ CMi corona structure showing possible estimation of additional carried energy by shock waves after flare 17 p3043 A69-34166

Physical nature of HZ 22 short period hot subdwarf binary, noting arguments against normal B type binary hypothesis 17 p3044 A69-34181

DYADICS

Waves in inhomogeneous warm magnetoplasmas with static pressure gradients, applying dyadic to planar stratified plasma case 01 p0129 A69-10561

Linear analysis of strain in continua in terms of one-one correspondence, relative displacement and stretch dyadic 07 p1236 A69-19445

Dyadic Green function technique extended to problems of electromagnetic scattering in inhomogeneous media with spherical symmetry 17 p2924 A69-33837

Electromagnetic propagation in infinite rectangular waveguide surrounded by dielectric medium described by Green dyadic 23 p4115 A69-41570

Group interaction finite Markov chain model, analyzing changes in interpersonal relationships based on balanced dyadic states 23 p4110 A69-42017

DYES

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels 01 p0090 A69-10381

Spectral absorption curves of hematoxylin stains in stained tissue sections of rat thyroid 01 p0015 A69-10924

Frequency and time dependent gains of dye solution lasers for pumping by lasers and flashlamps 02 p0257 A69-12616

Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra 02 p0258 A69-12617

Dye solution laser wavelength shift and simultaneous oscillations at different wavelength ranges for pumping by another dye laser 02 p0258 A69-12620

Stimulated emission of cyanine dyes, discussing amplification coefficients 04 p0612 A69-15373

Critical population inversion for xanthene dye solution laser, analyzing optical loss due to triplet state concentration [IEEE PAPER A-2] 05 p0773 A69-16307

Lasing threshold and spectral characteristics of organic dye solutions, using excitation of second harmonic of monopulse ruby laser 06 p0933 A69-17255

Light generation by lasing organic dye liquid solution with negative absorption on activator molecules and induced combination scattering for solvent molecules 06 p0933 A69-17256

Organic lasers, discussing coherent laser light emission induced from organic dye molecules 07 p1149 A69-18908

Phase matched optical harmonic generation by anomalous dispersion in liquid media, using dye fuchsin red [IEEE PAPER V-9] 07 p1155 A69-19086

Saturable dye filters used with ruby lasers, discussing relaxation time, residual absorption source and transient spectral hole burning

07 p1155 A69-19089

Organic cyanine dye solution laser pumped by Q switched ruby and another dye laser, discussing spectral distribution and modes

11 p1900 A69-25580

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

12 p2109 A69-26676

Stimulated emission of cyanine dyes, discussing amplification coefficients

16 p2797 A69-32120

Polymethine dyes in passive Q switches of neodymium lasers, noting effects of absorption band intensity, width and position on single pulse laser energy yield

17 p2983 A69-33968

Lasers based on organic dye solutions, discussing operation, structural formulas, absorption and luminescence spectra

20 p3555 A69-38011

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics

21 p3739 A69-39542

Mode locking of organic dye laser by pumping laser with mode locked pulse train from Nd-glass laser, obtaining spectral bandwidth

21 p3740 A69-39545

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions

21 p3740 A69-39546

Flashlamp-excited organic dye lasers capable of tunable emission throughout most of visible spectrum

22 p3966 A69-41219

Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials /organic dyes/

23 p4174 A69-42187

with structural properties and contact formation conditions

01 p0136 A69-10256

Dynamic polarizability at imaginary frequencies, deriving upper and lower variational bounds with functionals containing trial functions

01 p0122 A69-10284

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

01 p0090 A69-10381

Multilevel optimization techniques for dynamic systems control evaluated, developing second level Newton-Raphson controller

01 p0051 A69-10440

Forced processes in continuous extremal control systems, proposing algorithm for designing dynamic model

01 p0052 A69-10798

Automatic control systems correction by compensating for nonlinear statistical dynamic characteristics with aid of nonlinear devices

01 p0053 A69-10801

Determination of plant differential equation from time characteristics

01 p0053 A69-10804

Amplification equations for calculating unsteady lasing in Q switched ruby laser, considering changes in populations and fields along cavity

01 p0092 A69-10888

Soviet book on dynamics of radiation belts of earth covering theories concerning magnetosphere, magnetic fields and plasma and electromagnetic pulsations

02 p0307 A69-11799

Vortex valve characteristics, noting Reynolds number and geometry effects on flow and turnaround ratio

02 p0195 A69-12079

Vortex controlled fluid amplifiers, discussing static and dynamic performance characteristics

02 p0195 A69-12081

Book on dynamics of linear and nonlinear systems covering mathematical methods for control system design

02 p0225 A69-12228

Nonlinear programming of optimization of parameters and control functions of dynamic systems

03 p0408 A69-12974

Synthesis of statistically optimal self adaptive system for dynamic characteristics stabilization of automatic control system main loop

03 p0410 A69-13256

Multilevel optimal control and decomposition of trajectories by studying static and dynamic systems

04 p0581 A69-14570

Multiframe platform stabilization, analyzing dynamic coupling due to possible avoidance of adjusting moment and effect of coupling on attitude control

04 p0629 A69-14830

Gunn effect theory, discussing dynamic characteristics and domain propagation for inhomogeneous transmission line profile

05 p0807 A69-15821

Static and dynamic performance of pancake vortex flow field and application to signal amplification

05 p0704 A69-16001

Beam deflection fluid amplifiers dynamic properties determined by random signal testing

05 p0705 A69-16010

UK hovercraft research covering internal/external dynamics, propulsion systems and full scale tests

05 p0702 A69-16393

Large signal impedance measurements and dynamic characteristics explain Si avalanche diodes efficiency degradation at higher frequencies

06 p0893 A69-16938

Temperature dependence of dynamic viscoelastic properties of plasticized epoxy resins

06 p0946 A69-17125

Dynamic measurements of modulus of elasticity for polycrystalline nickel-tungsten alloys at elevated temperatures

06 p0943 A69-17232

Multivibrator with two widely different zones of discontinuous oscillation

06 p0896 A69-17474

Quasi-random properties of dynamic system generated by solutions of second order differential equations

06 p0948 A69-17657

He-Ne laser with small spark gap optimum parameters dependent on active medium and resonator field structure

06 p0935 A69-17683

Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere

06 p0861 A69-17812

Root-locus curve characterization of dynamic behavior of nonlinear control system, considering effects of changes in perturbing variable or reference input

07 p1114 A69-18290

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power

07 p1148 A69-18800

Magnetosphere dynamical properties, discussing atmosphere, ionosphere, magnetopause, magnetosheath, bow shock, solar wind, collisionless plasmas, etc

07 p1127 A69-19352

Plasma heating dynamics by straight turbulent discharge current influenced by initial plasma parameters

07 p1195 A69-19592

Computer simulation on engines dynamic behavior covering thrust transfer functions, time behavior and engine and fuel controller operation

08 p1301 A69-20167

Synoptic meteorological predictions using statistical dynamic approach, considering probability distributions and nocturnal temperature decay

08 p1345 A69-20300

Dynamic behavior of electrohydraulic servactuators over wide range of loads using differential equations of motion

08 p1256 A69-20718

Earth equipotential surface shape determination from satellite orbit dynamics, obtaining triaxial ellipsoid

09 p1487 A69-21635

Stabilized gyroscope platform internal dynamics analysis, outlining optimal orientation for full compensation of cross couplings

09 p1499 A69-22240

Electron microscopy for continuous observation and recording of dynamic reactions in high temperature materials

09 p1499 A69-22304

Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected with structural properties and contact formation conditions

09 p1559 A69-22649

Stress graphitizing and boron codoping effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus

10 p1716 A69-23036

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence

10 p1678 A69-23209

Torsiograph systems analysis for rotors angular acceleration recording, discussing dynamic characteristics, system, environmental problems, etc

10 p1692 A69-23252

Elastic release wave and pressure drop measurement in 2024-T4 aluminum at 313 kb for dynamic yield strength, considering surface velocity and stress

10 p1712 A69-23665

Frequency response dynamics of beam type periodic structures on elastic supports typical in flight vehicle designs

[ASME PAPER 69-VIBR-17]

10 p1804 A69-24150

Differential equations for effect of sinusoidal force with slowly varying frequency on dynamic behavior of nonlinear vibrator, using phase surface technique

11 p1916 A69-24760

Steady state and dynamic characteristics of linear plant with constant lag element based on correlation function moments

11 p1859 A69-24965

Dynamical effects of mass exchange in close binary systems ejection modes from point of view of orbital elements evolution

11 p1962 A69-25113

Inertial servomechanisms actuators, discussing dynamic characteristics, power, vibration damping, matching, couplers, etc

11 p1826 A69-25119

Frequency characteristics of flexible compensated manifolds for aircraft engines, considering axial force

11 p1826 A69-25332

NT WAVE DRAG

Heisenberg ferromagnet dynamics at low temperatures, calculating spectral weight function and other properties with low density expansion

01 p0135 A69-10016

Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures

01 p0085 A69-10210

Darlington composite transistor hybrid parameters used to describe performance characteristics, noting load resistances and source

01 p0041 A69-10244

Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected

Amplitudes of forced bending vibrations of frames with superfluous elastohysteretic couplings by dynamic compliances method

11 p1986 A69-25333

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics

11 p1989 A69-25495

Magnetically selective microwave filters using magnetodynamic natural oscillations in premagnetized ferrite sphere at cavity center

11 p1855 A69-25626

Dynamic properties of supply sources in carbon dioxide shielded welding as function of short circuit current statistical parameters, noting metal spatter correlation

11 p1892 A69-25667

Dynamic behavior of nonlinear continuous multivariable systems represented by equations derived from block diagram, stressing digital computer properties

12 p2049 A69-26081

Lunar surface layer temperature field dynamics obtained from stable periodic solution to parabolic differential equation with nonlinear nonautonomous boundary conditions

12 p2157 A69-26281

Amplification equations for calculating unsteady lasing in Q switched ruby laser, considering changes in populations and fields along cavity

12 p2109 A69-26652

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

12 p2109 A69-26676

AZUR German research satellite main structure dynamic characteristics, solar panels, yo-yo despin system, electronic ignition devices and magnetometer boom

12 p2175 A69-26875

AZUR satellite structural development static and dynamic considerations, discussing center of gravity, notching technique and test results

12 p2187 A69-26876

Herringbone grooved gas lubricated journal bearing static and dynamic characteristics analyzed approximately, noting pressure distribution and vibration amplitudes [ASME PAPER 68-LUBS-7]

13 p2265 A69-27269

Design optimization for gas lubricated spiral grooved spool bearing based on narrow groove theory, analyzing static and dynamic characteristics for motion in axial direction [ASME PAPER 68-LUBS-12]

13 p2266 A69-27276

Elastic directed curves dynamic theory, considering Hamilton principle, mass conservation and behavior of action density function under rigid body variations

13 p2360 A69-27321

Optimal parameters of hydraulic sensor of angular accelerations for given dynamic and geometrical requirements

13 p2259 A69-27432

MHD induction converters operational characteristics calculations with simultaneous considerations for finite length and channel width

13 p2207 A69-27496

Volterra integral equation with nondifference type singular kernel for stress-strain state in long hollow viscoelastic cylinder with moving inner boundary

13 p2361 A69-27744

Conditions governing application of reduced Nielsen equations to anholonomic systems dynamics, discussing kinetic energy function

13 p2288 A69-27924

Trajectory terminal state error analysis using adjoint-generated sensitivities in nonlinear time-varying systems

13 p2296 A69-27940

Parameter identification in linear dynamical systems with transport lags, discussing linear differential-difference equations and finite difference theory

13 p2289 A69-27945

Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields

13 p2320 A69-27994

Ionization sensors and detectors classification and dynamic calibration for pressure measurement

13 p2262 A69-28083

Dynamic characteristics of Clough-Tocher triangle for natural frequency of simply supported plate, noting bending elements

13 p2365 A69-28246

Gas laser modulation steady state characteristics with KDP crystal in cavity, noting output power dependence on applied electric field

13 p2273 A69-28432

Reactive parameter scatter effect on amplitude frequency characteristics of regenerative reflection amplifiers based on equivalent circuit

13 p2235 A69-28515

Cut-in and cut-out characteristics of fast acting composite transistor circuit, noting pulse duration

13 p2235 A69-28517

Operation mode of modulator with p-n diode, determining modulus and phase of reflection factor

13 p2235 A69-28518

Random signals and real time analysis systems for environment testing and transient signals

13 p2264 A69-28603

Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures

14 p2453 A69-28747

Surface equilibrium configurations and bifurcation points for rotating homogeneous right fluid cylinder confined by surface tension forces

14 p2428 A69-28816

Dynamic process during rms deviation of nonlinear system from prescribed trajectory described by nonlinear differential equations

14 p2425 A69-28822

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability

14 p2436 A69-29058

Linearized perturbation for photochemical and dynamical effects in internal atmospheric gravity wave production of E region ionospheric irregularities

14 p2440 A69-29128

Ground testing method to evaluate inertial navigation systems dynamic errors by programmed platform drift rates, position output comparisons and error source identification

14 p2479 A69-29490

Comet Ikeya-Seki 1965f primary nucleus splitting date and rate established from dynamic solutions

14 p2524 A69-29710

Nongravitational force dynamic effect and model for rotating cometary nucleus, including changes in orbital elements

14 p2524 A69-29713

Logarithmic amplifiers amplitude characteristics accuracy obtained by gain variations or successive summation of voltages, plotting curves illustrating error variations vs gain

15 p2574 A69-30128

Nanosecond pulse generator for powering semiconductor lasers, examining circuit diagram and elements design

15 p2633 A69-30234

Bladed disk assemblies vibrational properties, discussing dynamic characteristics of system with pairs of close natural frequency modes under forced vibration

15 p2704 A69-30304

Dynamic characteristics of local slope winds, considering thermal and geometrical effects of underlying surfaces

15 p2648 A69-30577

Minimum vibration frequency and compressive force for freely supported rectangular, triangular and circular plates simulated on analog computer

15 p2708 A69-30665

Monograph on dynamic behavior of jet engines especially during perturbations based on linear theory

15 p2671 A69-30931

Panel flutter under loads along profile, evaluating constraints dynamic characteristics by Hamilton principle

15 p2712 A69-31001

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential

15 p2696 A69-31064

Dynamics of spin stabilized satellite with long crossed dipoles or slender beams, including linearized equations of motion

15 p2703 A69-31332

Comparisons and combinations of geodetic parameters from dynamic and geometric satellite solutions and Mariner flights

15 p2600 A69-31362

Monograph on transmission characteristics of mechanical vibration transducers covering frequency response operators and analog computer simulation

16 p2789 A69-31842

Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal

17 p2970 A69-32853

Stationary galaxy dynamical theory, assuming constant velocity body of physically homogeneous star subsystems in space

17 p3031 A69-33102

Automatically controlled dynamic systems reliability estimation in terms of failure probability illustrated with autopilot-aircraft case

17 p3001 A69-33144

Aircraft and missile dynamic characteristics for heavy loads and large heat flux, noting small harmonic vibrations of heated structures in plastic domain [ICAS PAPER 68-38]

17 p3061 A69-33589

Laser pulse development dynamics taking into account phase relations between field and active medium polarization

17 p2983 A69-33695

Book on solid bodies collision theory covering elastic bodies with ruled surfaces, dynamic effects associated with Rayleigh surface waves, thermodynamic effects, etc

18 p3210 A69-34259

Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems

18 p3093 A69-34356

Plastics behavior under loading and performance prediction, considering engineering design applications

18 p3161 A69-34609

Parametric and forced oscillations analogy for analyzing dynamic behavior of oscillatory systems with time dependent parameters

18 p3175 A69-35322

Dynamic performance accuracy of astatic gyroscope with three degrees of freedom improved by inner gimbal mass increase

19 p3308 A69-35825

Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star

19 p3403 A69-35966

Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions

19 p3295 A69-36471

Static and dynamic characteristics of pressure compensated oil-hydraulic flow control valves and relief valves with emphasis on linearized effects

19 p3256 A69-36713

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat

19 p3259 A69-36832

Mechanical loss factors calculated by approximation formula from resonance curves of Voigt-Kelvin and Maxwell models

20 p3623 A69-37435

Occurrence, development and disappearance of diffused reflections, relating dynamic behavior to ionospheric electron concentration

20 p3529 A69-37687

Dynamic stall characteristics of high speed symmetrical and cambered helicopter rotor blade airfoils from two dimensional wind tunnel determinations [AHS PAPER 206]

20 p3463 A69-37806

Dynamic cathode ray tube spot size measurement by two slit technique, noting relationship to beam current and luminance

21 p3719 A69-38329

Monograph on control dynamics of gas turbines with adjustable guide vanes, using methods of control theory and applied mathematics

21 p3784 A69-38449

Automated rebound resilience apparatus for polymer dynamic mechanical properties studies over wide temperature range, using photoelectric device

21 p3689 A69-38593

Coupled gyroscopic systems two parameter stabilization problem analyzed for steady state characteristics by iterative method

21 p3723 A69-38829

Gyroscopic system behavior analyzed for steady state operation following transient period

21 p3723 A69-38832

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power

21 p3736 A69-38945

Potential flow past plane array of thin blades, analyzing perturbed dynamic behavior

21 p3696 A69-39243

Test pad isolation characteristics mathematical model to predict pad dynamic behavior [AIAA PAPER 69-860] 21 p3690 A69-39388

Test stand for measurement of forces and moments from thrust vector controlled rocket, analyzing dynamic characteristics of hydrostatic supports 21 p3691 A69-39631

Dynamics of relay gas jet preliminary vibration damping system of gravity gradient stabilized satellite, allowing for sensor limitations and stabilizer flexural vibrations 21 p3826 A69-39638

Artificial damping of longitudinal winged reentry vehicle motions in earth atmosphere, discussing vibration damper dynamic characteristics 21 p3829 A69-39828

Weighting function of statistically optimal automatic dynamic system generating stochastic loads, using Fredholm equations 21 p3688 A69-39861

Nonlinear compensator characteristics determination for modifying compensated system output signal under various disturbances with inputs subjected to white noise 21 p3688 A69-39862

Dynamical analysis of Bernard star motion, yielding companions in co-revolving, approximately coplanar, circular orbits 22 p4013 A69-40119

Radiotelemetric EEG recording variation possibility, examining dynamic behavior of human cerebral rhythms 22 p3889 A69-40158

Device determining dynamic mechanical properties of tissues and various transducers, evaluating elastic properties of polyurethane, Hevea rubber and descending thoracic aorta 22 p3890 A69-40204

Dynamic parameters of full scale and equivalent structures of electromechanical transducer circuits determined experimentally 22 p3869 A69-40249

Dynamic characteristics of temperature control systems using crystal oscillators determined by nonlinear automatic control theory 22 p3869 A69-40254

Linear equations of motions of inviscid ideal gas atmospheres, describing climatology of propagation parameters for point impulse sources 22 p3938 A69-40446

Ball lightning as positively charged region of electroluminescent air maintained in dynamic structure and molecular composition by atmospheric electric field 22 p3940 A69-40536

Metric state-time dynamical polysystem with sequentially compact topological space, noting sliding state trajectories 22 p3975 A69-40573

Performance characteristics of multivariable model reference adaptive systems synthesized by Liapunov method analyzed using computer simulation 22 p3919 A69-41201

Quantum mechanical systems dynamics in diagonal coherent state representation, discussing applications 22 p3983 A69-41259

Book on fundamentals of dynamics of deformable bodies of increasing dynamic complexity, using calculus of variations 23 p4226 A69-41474

Dynamic characteristics of nonlinear discrete systems by motion division method, using discontinuous Liapunov function for stability criteria 23 p4144 A69-41956

Teleological systems behavior modeling based on input, output, goals, operation duration, etc 23 p4134 A69-42059

Analog computer simulation of single shaft Brayton cycle system dynamics, including startup and shutdown transients 23 p4071 A69-42280

Rigid shaft dynamics in hinged and elastic bearings, eliminating inaccuracy by limiting analysis to forced vibration 23 p4171 A69-42483

Cardiovascular autonomic effects dynamic characteristics under severe arterial hypoxia in unanesthetized rabbit 24 p4258 A69-42632

Cosmic rays properties and dynamical effects in Galaxy disk including origin, lifetime, magnetic field instability, etc 24 p4366 A69-42695

Proportional fluid amplifiers analysis in cascade and with feedback by extended lumped parameter method, discussing dynamic characteristics of analog amplifiers with air 24 p4255 A69-43268

Dynamic equilibrium of making and breaking adhesion bonds between polymer segments and dissimilar surfaces through water, allowing thermal stresses relaxation 24 p4326 A69-43458

Dynamic behavior of gas bubble in ideal fluid plane flow, considering bubble shape, velocity field, gas pressure and stagnation point pressure determination 24 p4302 A69-43478

Composite and metal tubes compared to determine properties for various loadings [AIAA PAPER 68-340] 24 p4405 A69-43653

Jet dynamic characteristics injected into supersonic air slipstream incident on flat body, calculating configuration, shock wave geometry and parameters distribution in flow field 24 p4250 A69-43710

DYNAMIC CONTROL

Optimal control of discrete and continuous stochastic linear dynamical systems, discussing algorithms for instantaneous weighted minimum mean square error performance 01 p0051 A69-10439

Sensitivity reduction in specific optimal control by use of dynamical controller 01 p0051 A69-10441

Two parameter dynamic system of fourth order optimization based on gradient method modified for discrete optimization 02 p0224 A69-11594

Frequency domain stability criterion for nonlinear feedback system consisting of nonlinear amplifier, linear dynamical system and transducer with backlash 02 p0225 A69-11968

Linear filter performance degradation due to modeling error in estimate of state vector of stochastic linear dynamic systems 02 p0225 A69-11971

Book on dynamics of linear and nonlinear systems covering mathematical methods for control system design 02 p0225 A69-12228

Book on applications of information theory to dynamical systems with random initial conditions and cybernetic systems consisting of communication systems with feedback 04 p0580 A69-14520

Linear regression and related procedures in identifying dynamic processes 06 p0901 A69-17360

Absolute stability of dynamic control systems with single nonlinear element function of two feedback state variables, giving sufficient conditions 06 p0905 A69-17948

Observability theory of dynamic objects application to composing measurements for space flights, solving parametric observability problem 07 p1087 A69-19605

Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system 10 p1718 A69-23206

Active broadband vibration isolation of human subjects from severe vertical dynamic excitations experienced in low level high speed flight [ASME PAPER 69-VIBR-65] 10 p1650 A69-24157

Mathematical model for initial conditions of asymptotically stable nonlinear control system to estimate region of acceptable motions 11 p1861 A69-25453

Asynchronous finite state sequential nonlinear controller synthesis with few flip-flops for dynamic space vehicle systems [AIAA PAPER 67-988] 13 p2225 A69-28201

Transistorized DC amplifier circuit with reversible and controllable transfer constant based on voltage conversion principle 13 p2235 A69-28511

Multidimensional discrete control systems for spectral characteristics of random processes in vibrational and fatigue strength testing of machines and equipment 19 p3286 A69-35890

Stability of interrelated linear dynamic control systems with distributed parameteres evaluated by using differential equations 19 p3286 A69-35892

Invertibility of linear time invariant dynamical control systems, discussing L-inverses, sequential circuits,

inherent integration, reproducibility, pointwise and functional inverses 20 p3509 A69-37138

Variational method for necessary and sufficient conditions of terminal state invariance of dynamic control system 21 p3756 A69-39147

Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems [AIAA PAPER 69-885] 21 p3764 A69-39410

Stochastic motion control problems formulations in rocket dynamics 21 p3767 A69-39650

Programmable digital compensator for single high performance control loop servomechanisms 21 p3688 A69-39704

Approximation of linear unsteady dynamic systems at finite time interval expressed in Bessel or degenerate hypergeometric functions 22 p3917 A69-40616

Heart rate respiratory control model with inclusion of pressoreceptor feedback, considering posture effect in transient envelope alteration 22 p3894 A69-41202

Invariance theory in automatic dynamic systems 23 p4145 A69-42368

Absolute invariance of perturbations affecting dynamic plant achievable by inertial measurement of highest derivatives 23 p4145 A69-42369

Optimal deterministic inputs derived for estimating dynamic control system parameters from white observation noise 24 p4293 A69-43294

Time-invariant multivariable linear systems, discussing structure theorem for controllable systems and application to decoupling problem 24 p4294 A69-43314

Adaptive model of human operator control strategy in response to sudden changes in plant dynamics and transient disturbances 24 p4276 A69-43325

NT TRANSIENT LOADS

NT VIBRATORY LOADS

NT WING LOADING

Fatigue life, kinematics, dynamics, etc, of thrust loaded ball bearings, considering inertial effects of hollow balls 01 p0087 A69-10908

Mechanical behavior of materials under dynamic loads - Conference, San Antonio, September 1967 02 p0342 A69-12277

Thermodynamics of viscoplastic materials under dynamic loads within framework of continuum mechanics of materials with memory 02 p0343 A69-12281

Ductile crack propagation speed relation to dynamic flow properties of metals analyzed using Dugdale crack model 02 p0343 A69-12283

Plane strain plastic stress waves radial propagation from center of hollow cylinder subject to dynamic pressure load 02 p0344 A69-12292

Elastic/viscoplastic wave propagation in thin tubes under combined stress of tension and torsion, using viscoplastic constitutive equations 02 p0344 A69-12293

Solid viscosities effects on dynamic load factors of ring and hollow sphere subject to uniformly distributed impulsive loads along inner and outer edges 03 p0530 A69-14089

Stability against snap-through and final states of shallow arches on elastic foundations and subject to time varying loads [ASME PAPER 68-WA/APM-26] 04 p0669 A69-14394

Circular cylindrical isotropic shell deformation rate under dynamic axial load described by second order linear differential equation 04 p0673 A69-14499

Elastic rod buckling under dynamic longitudinal compression load, determining critical load 04 p0679 A69-14926

Truncated solid cones plastic yielding under quasi-static and dynamic axial loads at various strain rates
04 p0682 A69-15301

Parallel damped dynamic vibration absorbers, modifying conventional absorber by adding subsidiary undamped absorber mass
[ASME PAPER 68-WA/DE-6]
05 p0839 A69-16171

Elastoplastic stress-strain state of asymmetric profile thin walled beam under mobile load
05 p0841 A69-16205

Dynamic response of semiinfinite circular cylindrical shells to traveling load
06 p1021 A69-17148

Axisymmetric vortex free motion of ideal fluid in conical container with spherical bottom under axial acceleration
06 p0910 A69-17335

Snapping and buckling of simple elastic structures under dynamic load, noting influence of structural geometry and load duration
[AIAA PAPER 69-22]
06 p1029 A69-18206

Dynamic stress intensity factor for axisymmetric loading of circular crack in infinite isotropic elastic medium
08 p1413 A69-20412

Dynamic response of anisotropic circular cylinders to uniformly distributed pressure varying periodically with time analyzed using Laplace transformation
09 p1611 A69-21440

Asymptotic two dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads
09 p1614 A69-21884

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads
09 p1616 A69-21977

Fatigue strength and stress-time functions obtained by programmed fatigue tests under time variable loads
09 p1620 A69-22572

Fatigue life evaluation by programmed fatigue strength tests, using frequency distribution of load set amplitudes
09 p1620 A69-22573

Liquid filled elastic shells natural frequencies and oscillation modes, deriving eigenfunction system from liquid velocity potential boundary conditions to determine dynamic load
11 p1870 A69-24951

Elastic and elastoplastic strains in materials under various loadings, determining temperature variations by thermoelectric method and verifying by tensile tests
11 p1985 A69-25178

Polyurethane foam high velocity deformation properties, discussing results of dynamic uniaxial stress tension and compression tests
11 p1907 A69-25648

Viscoelastic models for solving longitudinal oscillations of one degree of freedom system under dynamic load, taking into account energy dissipation
12 p2177 A69-25995

Complex two layered shell of revolution under static and dynamic asymmetric loads analyzed using SABOR/DRASTIC computer codes
12 p2184 A69-26811

Stress waves analysis of brittle fractures, considering loading time role and cavitation of viscous fluids relation to fracture incipience
13 p2275 A69-27229

Parallel damped dynamic vibration absorbers, modifying conventional absorber by adding subsidiary undamped absorber mass
[ASME PAPER 68-WA/DE-6]
13 p2360 A69-27422

High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold /onset of microcracking/ for elastic pulses
[AIAA PAPER 69-360]
13 p2283 A69-28293

Minimum weight design of structures excited to harmonic vibrations by given single load, with intensity dependent on time
13 p2369 A69-28350

Graphites wear rates and structural changes in machine parts under dynamic stresses in air or vacuum, noting pressure role
14 p2467 A69-28912

Design and test criteria for dynamically loaded structures from various viewpoints, discussing statistical variations, load strength and limitations
15 p2618 A69-30368

Annealed aluminum rods dynamically compressive impact loading used to study longitudinal plastic waves propagation velocity
15 p2709 A69-30677

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution
15 p2711 A69-30971

Moving load at plane interface between two elastic media in space related to direct trirectangular trihedron with vertically descending Oz axis
16 p2870 A69-31829

Inhomogeneity effects on elastic waves generated by impulsive loading of surface using asymptotic method, discussing high stress intensification regions
16 p2873 A69-32157

Bending of rigid freely supported plastic plates under local axisymmetric dynamic load, discussing rectangular pulse effects and velocity fields
18 p3217 A69-34593

Extreme disturbance analysis and optimum performance and design problems for structural and mechanical dynamic systems, basing solutions on linear, nonlinear and dynamic programming
18 p3106 A69-34663

Transverse vibrations of thin linear viscoelastic rectangular plate of constant thickness resting on elastic medium
18 p3223 A69-35171

Closed form solutions for rigid viscoplastic cylindrical shell under dynamic loading based on constitutive equations for rate sensitive plastic material
19 p3439 A69-36478

Plastic deformation effect on dynamic buckling of elastic-plastic simple shallow truss subjected to step and impulsive loading
19 p3446 A69-36836

Axial forces effects on dynamic load factors of beams under transverse impulsive loads, considering various end conditions
20 p3629 A69-38113

Elastic closed and truncated conical shell stability with initial deflections under dynamic critical loading
21 p3834 A69-38716

Solid viscosities effects on dynamic load factors of hollow sphere subjected to uniformly distributed impulsive loads, using three element model
22 p4044 A69-40598

Plastic deformation by uniaxial tension during transition from dynamic to static loading from microscopic and macroscopic standpoint, noting slip lines
22 p4047 A69-41081

Solid solutions precipitation effect during deformation process on static and dynamic tensile tests of Al alloy by electric resistance measurement
22 p3972 A69-41082

Stress-strain state of circular disks with arbitrarily varying thickness along radius under antisymmetrical load calculated by integral equations method
22 p4047 A69-41168

Scale factor in designing uniform strength structures for dynamic load effects determined by recording fatigue limit and failure location, using variable cross section samples
23 p4225 A69-41422

Mechanical model for dynamic buckling of elastic imperfection-sensitive structures under step loading, using perturbation method
24 p4405 A69-43656

DYNAMIC MODELS

Repeated elastoplastic deformation of polycrystalline body analyzed by dynamic model
01 p0164 A69-10082

Dynamic system for self adaptive control of inertial plant described by differential equations, noting synthesis method eliminates distortion
01 p0052 A69-10797

Forced processes in continuous extremal control systems, proposing algorithm for designing dynamic model
01 p0052 A69-10798

Hydrodynamic model of laser produced solid particle plasma, giving distributions of pressure, density, temperature and velocity
01 p0132 A69-11210

Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat
01 p0122 A69-11288

Instability of struts subjected to axial force and radiant heat, considering elastic and thermal deformation
02 p0337 A69-11716

Neuromuscular actuation system model, noting compatibility with human physiological and anatomical data in tracking tasks
02 p0202 A69-11952

Dynamic flight simulators fidelity assessment, discussing hybrid method based on pilot psychomotor responses
02 p0203 A69-12215

Dynamical strength of solid cylinder under axial loads increasing in time at given rate, using constitutive equations of thermodynamic theory
02 p0342 A69-12278

Optimization of control functions and parameters of dynamic systems with variable structure and discontinuous phase coordinates
04 p0582 A69-14795

Sensitivity models for adaptive and self adaptive systems design
04 p0582 A69-14797

Electronic counterrotating antennas, developing turning model of antenna group of telecommunications satellite
04 p0578 A69-15065

Continuous dynamic systems digital simulation, noting run-time program determined by numerical integration structure
04 p0565 A69-15339

Cross slip model for work hardening of nickel aluminum crystals, discussing temperature dependence
05 p0779 A69-15760

Nonlinear system identification by learning model, assuming discrete on-line operation and Hammerstein form
05 p0737 A69-15805

Adaptation in nonstationary environment formulated for tapped delay line filters with adjustable time varying gains
05 p0737 A69-15806

Collection of papers on computerized simulation covering dynamic modeling of ideas and systems
05 p0724 A69-16467

Space radiator dynamic model for predicting outlet temperature transient response to environmental variations
[AIAA PAPER 69-29]
06 p1039 A69-18205

Fluid and thermodynamic modeling for ground test simulation of nuclear rocket vehicle liquid hydrogen propellant behavior
[SAE PAPER 690201]
07 p1178 A69-18306

Regression rate model for pressure sensitive hybrid combustion based on classical turbulent flame theory
[WSCI PAPER 68-22]
07 p1240 A69-18362

Radio wave propagation over smooth cylindrical surface with specified boundary impedance, discussing diffraction loss and effect of surmounted obstacle
08 p1273 A69-20024

Adaptation process of management systems from point of view of control system philosophy
[AIAA PAPER 68-807]
08 p1422 A69-20197

Weather forecasting using statistical technique and Subsynchronous Advection Model of Weather Bureau, discussing mathematical background for various early morning predictions
08 p1345 A69-20298

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics
09 p1587 A69-21355

Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
09 p1440 A69-21828

Mathematical, physical and physiological modeling for analysis of functional changes during varying gravity conditions
09 p1444 A69-22541

Optimal stochastic control, discussing dynamic mathematical models described by differential equations
09 p1475 A69-22567

Cosserat continuum and elasticity models of dynamics of composite materials, analyzing dispersive longitudinal waves
10 p1798 A69-23148

FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
10 p1654 A69-23279

Antiplane strain model for describing cracks and dislocation arrays within circular cylindrical inhomogeneity surrounded by elastic material
10 p1803 A69-24031

Polymer fatigue model from low cycle analysis of dynamic and thermal properties in structural plastics
10 p1717 A69-24217

Viscosity and electrical conductivity effects on axisymmetric instabilities of current carrying annular cylinder of mercury
11 p1923 A69-24292

Computational method for quasi-optimal control with parameter sensitivity function, noting application to dynamical system model

11 p1859 A69-25165

Mechanical model for oscillatory motion of solid body in Newtonian central force field

11 p1919 A69-25179

Model evolution of flow in fluid layer suddenly heated from below at Rayleigh number convection sufficient for turbulence

11 p1874 A69-25351

Graphite and B filament-epoxy resin composites application to aeroelastic scaled dynamic models, analyzing weight savings, fabrication and component stiffness

11 p1990 A69-25508

Dynamic modeling for spin stability of satellites with flexible parts, noting torques induced by attitude control

11 p1994 A69-25533

Analytical synthesis of dynamic plant model to insure desired output in response to cyclic action

11 p1861 A69-25714

Water vapor laser, discussing water vapor molecular structure, population inversion mechanism, perturbation model, etc

12 p2106 A69-26325

Ablation wedge model design for testing in wave superheater under controlled pressure gradients and constant temperature

12 p2059 A69-26816

Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate

[ASME PAPER 68-LUBS-2]

13 p2267 A69-27285

Venusian upper atmosphere dissociation and ionization, considering photochemical and dynamic processes and molecular, eddy and ambipolar diffusions

13 p2344 A69-27643

Periodic solution to equations describing nonlinear autonomous time lag system close to Liapunov systems

14 p2482 A69-28799

Optical refraction effects from refractive index gradients in stressed models as limitation on moire interferometry usefulness in Boussinesq problem and expanding pulse studies

14 p2531 A69-28883

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality

14 p2532 A69-28885

Searchless gradient self adaptive system for adjusting servosystem parameters to reference model characteristics, using auxiliary operator method

14 p2426 A69-29146

Engineering models for wearout reliability prediction in dynamical systems subject to random loading, demonstrating practical and statistical methods

15 p2705 A69-30366

Aluminum models of single cell simply supported folded plates to study instability phenomena possibly occurring in actual structure

15 p2709 A69-30679

Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection

15 p2692 A69-30769

Thick gas model for monochromatic one dimensional radiant flux near diffusely emitting and reflecting boundaries, discussing gray gas and exponential kernel approximations

16 p2769 A69-31871

Feed-system-coupled combustion instability linearized mathematical models for liquid fuel rocket engines, discussing nonrigid injector and method for instability elimination

16 p2836 A69-32001

Collisional equilibrium and nonuniform formation models for spatial gradient development of early afterglow of He plasma molecular excited state densities

16 p2782 A69-32465

Gas turbine engine compressor system dynamic representation by one dimensional mathematical model

16 p2842 A69-32697

Wave motion nonsteadiness influence on detonation front thickness using quasi-steady kinetic model of induction process, discussing agreement with experimental observations

17 p2952 A69-33403

Dynamically scaled model rotor tested in wind tunnel to evaluate blade aeroelastic limits constructed with realistic mass and stiffness distributions

17 p3059 A69-33506

[AHS PAPER 341]

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbine speed control simulations and transition from mathematical models to hardware components

17 p2946 A69-33531

Monte Carlo inversion of seismic body waves for transposing uncertainties of observations to velocity models

17 p2962 A69-33654

Ejection seat cushion dynamic characteristics influence on incidence of spinal injury during ejection, considering MIL specification dynamic model of human body

17 p2917 A69-34033

Dynamic equations solution for interacting rigid or elastic body system models using Cosserat bodies elastic theory, considering engineering applications

17 p3067 A69-34143

Dynamic model of bodies with microstructure and nondissipative energy motion, discussing action steadiness, invariance conditions and Galilean relativity

17 p3067 A69-34149

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model

18 p3125 A69-34231

System state phase modeling as method for evaluating safety and reliability by analysis of system states in mission phases through logic diagram

18 p3142 A69-34480

Physiological processes computer simulation with aorta modeling as example, noting difficulties and major problems

18 p3098 A69-34669

Photon whirls and formation of protogalaxies, discussing density inhomogeneities in hot model of universe in terms of pregalactic structure dynamics

18 p3197 A69-34745

Jet injection into free circular cross section cross wind using curvilinear dynamic model, assuming negligible Archimedean forces effect

18 p3124 A69-35149

Human ear frequency discrimination, discussing nonlinear functional modeling systems

18 p3097 A69-35440

Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests

19 p3291 A69-35720

Lumped parameter simulation model, based on vector mechanics for flexible spinning bodies, to study spin stabilized spacecraft or turbine rotors

19 p3280 A69-35990

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model

19 p3449 A69-36353

Two body mechanical system operating within dynamics laws simulating backward and forward bending motions of falling cat

19 p3259 A69-36832

Surface stresses in rotating asymmetric profiled disks and axial deflection effects computed theoretically and compared to measurements on photoelastic models

19 p3447 A69-36862

Stress corrosion cracking model for 7075 Al, correlating macroscopic yield stress and corrosion time to failure

19 p3351 A69-36897

Saturn ring dynamical structure theory supported by observations of knots or condensations

20 p3600 A69-37482

Linear dynamic modeling of barotropic fluid in rigid circular tube, presenting axial velocity profile by confluent hypergeometric function with complex arguments

[ASME PAPER 69-FLCS-18]

20 p3516 A69-37982

Analytical relations in phenomenological model theories for turbulent flow near wall

21 p3695 A69-39010

Magnetic hysteresis dynamic model suitable for digital computer simulation of near-earth satellite attitude motions damping compared with experimentally generated loops

[AIAA PAPER 69-833]

21 p3821 A69-39364

Herzenberg geomagnetic dynamo model extensions including rigid rotors calculus, laminated rotors, induction problem and fluid rotors in rigid conductor

22 p3989 A69-40193

Model for statistically isotropic homogeneous turbulence in incompressible fluid, representing turbulence as superposition of individual vortex sheets

22 p3930 A69-40525

Recirculation concept for air cushion vehicle air curtain evaluated by two dimensional and circular models, discussing optimum cushion area/jet exit area ratio

22 p3866 A69-40816

Astrophysical ions acceleration model based on magnetic field annihilation theory

22 p3987 A69-41002

Nonlinear model including rocket rotary and forward motion inside smoothbore launcher utilizing dynamic friction coefficient

22 p4037 A69-41038

F region dynamic model, including variations in temperature, electron and molecular ion concentrations, etc

23 p4156 A69-41843

Potential energy modeling method for optimal design of structural systems with diverse performance criteria, giving truss design example

23 p4228 A69-41923

Theoretical models for collisionless plasma shock waves in terms of nonlinear, magnetosonic, constant profile waves, turbulent- and electrostatic-shock structures, etc

24 p3355 A69-42694

Continuous potential fields modeling based on electrodynamical analogy extended to flows involving stream separation

24 p4300 A69-43089

Linear viscoelastic model parameters optimization for designing automobile lap seat belts, assuming abrupt impact stop

[ASME PAPER 69-APMW-25]

24 p4275 A69-43094

Dynamic model of ablation pitching moment derivative and time lag effect on spinning reentry vehicle applied to Black Knight flight results

24 p4245 A69-43249

Rocket exhaust plume models for signal attenuation predictions, considering inhomogeneous plasma medium with varying electron density and collision frequency

24 p4408 A69-43253

Dynamic models for viscous fluid transmission lines using distributed parameter for accuracy and rational approximate form to avoid computational difficulty

24 p4301 A69-43289

Actuator disk model for study of azimuthally nonuniform MPD arc plasma dynamics

[AIAA PAPER 68-714]

24 p4359 A69-43570

DYNAMIC MODULUS OF ELASTICITY

Bounds for real and imaginary parts of dynamic moduli of composite viscoelastic systems

08 p1417 A69-20824

Dynamic modulus of elasticity measured for nonporous refractory compounds obtained by diffusion saturation

09 p1529 A69-21871

Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives

20 p3620 A69-36997

DYNAMIC PRESSURE

Plane strain plastic stress waves radial propagation from center of hollow cylinder subject to dynamic pressure load

02 p0344 A69-12292

Dynamic pressure pulse over band on solid elastic cylinder surface, analyzing time stress distribution throughout elastic cylinder

04 p0670 A69-14408

Flight tests of deployment of 20 ft diam ribbon parachute at high dynamic pressures and supersonic speeds

11 p1823 A69-25383

Compression forces during interaction of colliding shock waves in compressible fluid medium, discussing linear and nonlinear problems

13 p2246 A69-27523

Characteristics method for stress waves from hypervelocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields

[AIAA PAPER 69-355]

13 p2365 A69-28287

Spherical stress wave reflected from plane surface, discussing tensile stress in target

[AIAA PAPER 69-363]

13 p2366 A69-28295

Pulsating mechanisms in alternative gas and liquid blocks two phase flow, using stochastic process specified by dynamic pressure time dependent fluctuations

24 p4305 A69-43633

DYNAMIC PROGRAMMING

Dynamic programming methods to avoid dimensionality problem arising in solution of boundary value problems by digital computer

01 p0103 A69-10006

Low thrust spacecraft motion continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption

01 p0113 A69-10572

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized

02 p0225 A69-11975

Dynamic programming application to synthesis of unequally spaced symmetrical antenna arrays

02 p0219 A69-12338

Optimum structural design based on linear, non-linear and dynamic programming
[SAE PAPER 680752]

03 p0525 A69-13437

Dynamic optimization problem with several decision and state variables, examining methods of solution

03 p0456 A69-13737

Dynamic programming application to function generation, determining breakpoints for best linear approximation of one dimensional function

03 p0401 A69-13765

Optimal control theory applied to systems described by partial differential/integral equations

04 p0581 A69-14571

Book on dynamic programming basic theory and standard computational algorithm and applications to optimization in diverse fields

04 p0563 A69-14652

Optimal stochastic control of small dynamic systems described by random differential equations, noting selective bibliography on several subjects

04 p0582 A69-14697

Finite state finite-action-space Markovian decision process, discussing optimal policies set in discrete dynamic programming

04 p0624 A69-14951

Dynamic programming and indeterminate Lagrange multipliers to formulate optimal control for discrete systems

05 p0737 A69-15886

Existence and uniqueness theorem for functional equation of optimal control problems, noting stability of solution

06 p0949 A69-17889

Dynamic programming for nonlinear suboptimal control system with minimum Q factor, developing nonlinear functional with controller motion restraint

08 p1297 A69-20416

Differential dynamic programming algorithms of second and first order for optimal control, considering nonlinear unconstrained and constrained problems

09 p1531 A69-21415

Dynamic programming computational approach to optimization with state variable discontinuities, treating problems as multistage optimization with continuous subarc stages

09 p1474 A69-22440

Statistical theory and dynamic programming to synthesize optimal pulsed control systems having restrictions on control device storage capacity

09 p1476 A69-22673

Dynamic programming method to achieve optimal control of discrete systems with lagging control variables, considering structural properties

09 p1476 A69-22674

Pseudodynamic programming for optimizing design of correlator supersynthesis antenna arrays used for radio source tracking

10 p1663 A69-23420

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized

10 p1666 A69-23884

Dynamic programming determining optimal feedback control policies for optimal trajectories based on invariant imbedding

11 p1910 A69-25410

Dynamic programming approach to numerical solution of elliptic boundary value problems, using Laplace equations

11 p1910 A69-25411

Nonlinear bang-bang optimal control problems solution based on differential dynamic programming, noting use of Pontryagin adjoint variables

11 p1860 A69-25444

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming

12 p2046 A69-26060

Discrete linear optimal control system with quadratic performance index synthesized by dynamic programming method, obtaining matrix equations

12 p2050 A69-26091

Dynamic programming method for upper bound on collapse load of rotationally symmetric thin cylindrical shell under ring loading

12 p2179 A69-26214

Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations

14 p2533 A69-28988

Optimal control problems solved by dynamic programming algorithm based on successive approximations of elementary control operation in space of states

14 p2426 A69-29472

Cauchy problem for Bellman dynamic programming equation in automatic control time minimization

14 p2426 A69-29478

Low thrust spacecraft action continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption

15 p2651 A69-30742

Optimization of control system described by linear parabolic integrodifferential equation, using dynamic programming approach

15 p2645 A69-31024

Electronic hardware optimum quality assurance selected by dynamic programming in terms of failure mechanism detection efficiency per source allocation

15 p2722 A69-31127

Stochastic differential game theory, discussing nonlinear partial differential equations for solution, dynamic programming validity conditions, finite difference scheme, etc

17 p2994 A69-32844

Book on elements of optimal control covering methods for deterministic problems including calculus of variations, Pontryagin principle, dynamic programming, feedback control, etc

18 p3109 A69-34532

Quasi-linearization to overcome dynamic programming dimensionality difficulties, reducing computer memory requirement and computation time

21 p3754 A69-38751

Point mapping in optimal control, describing maximum principle, dynamic programming and substitution of variables

21 p3688 A69-39860

Algorithm for optimal solution to secondary optimization problem in nonserial dynamic programming

22 p3976 A69-41037

Adaptive control systems analysis and application, noting off-line and on-line optimization, dynamic programming, linear systems, etc

24 p4289 A69-42946

DYNAMIC RESPONSE

NT TRANSIENT RESPONSE

Circular, cylindrical thin walled shell dynamic response to moving shock solved by Flugge equations in series form

01 p0164 A69-10057

Combustion response of hydrazine-nitrogen tetroxide hypergolic rocket propellants to transverse gas flows, noting coupled and uncoupled oscillations

01 p0175 A69-10112

Structural vibration problems of SA 330 helicopter from test flight data, discussing natural frequency displacement of blades and dynamic response improvement of structure

01 p0009 A69-10158

Uniform transmission line response to independent distributed sources using extraction integrals, analyzing traveling wave transistor

01 p0043 A69-10562

Multiple configuration analysis of structures systematically predicting static and dynamic response of structures of single configuration class

01 p0169 A69-10639

Acoustic probe for measuring pressure fluctuations on hypersonic reentry vehicle, discussing flow characteristics and heat shield ablation effects on frequency response

01 p0008 A69-11278

Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance

01 p0022 A69-11335

Dynamic behavior of elastoplastic beam column model with one degree of freedom subjected to axial compressive force

02 p0337 A69-11717

Flight vehicle dynamics, discussing classical mechanics, fluid dynamics, structural dynamics and thermodynamics

02 p0193 A69-11985

Book on stability criteria for linear mechanical engineering systems covering response characteristics, encirclement theorem, Routh and Hurwitz criterions, root loci, D partition, etc

02 p0281 A69-12276

Finite length cylindrical shell dynamic response to uniform radial impulse, noting simple harmonic motion and flexural mode excitation instability
[AIAA PAPER 68-144]

02 p0347 A69-12517

Gyroscopically induced vibrational response of rectangular plates and membranes, determining spin and precession effects on natural frequencies

02 p0347 A69-12519

Pyroelectric crystals transparent at laser output wavelength used for recording transmitted radiation, noting response of triglycine sulfate crystal

03 p0438 A69-13050

Universal solution for static and dynamic response of structural components by method of initial parameters

03 p0527 A69-13746

Thin film lubricant effect on machine dynamic performance, proposing inclusion with machine structure for reducing vibration effect

03 p0435 A69-13948

Solid viscosities effects on dynamic load factors of ring and hollow sphere subject to uniformly distributed impulsive loads along inner and outer edges

03 p0530 A69-14089

Twisted yarns composed of continuous viscoelastic filaments dynamic response under periodic strain effect on dynamic modulus

04 p0619 A69-14686

Beam vibration problems with mixed response-excitation input information solved by recasting equations of motion
[AIAA PAPER 68-319]

04 p0676 A69-14711

Dynamics of single loop nonlinear sampled data systems with integrator, deriving equations of periodic motions and stability conditions by means of point transformations

04 p0583 A69-15135

Steady state response of inertialess discrete multivariable extremal system with noise, noting stepwise search systems

04 p0583 A69-15139

Dynamic behavior of series and parallel flow thrust-balance systems for compressible and incompressible flow, using analog computer simulation

04 p0647 A69-15521

Dynamic shear stresses at interface of embedded thin elastic filament and elastic matrix after subjecting filament to concentrated longitudinal line load

05 p0831 A69-15577

Dynamic response of solids induced by charged particle interaction noting laser interferometric measurement of surface stresses

05 p0771 A69-15817

Liquid flow systems dynamic response to periodic disturbances of system structural supports

05 p0747 A69-16073

Impulse loaded elastic-plastic beam response approximate solutions based on uniqueness proof
[ASME PAPER 68-WA/APM-23]

05 p0840 A69-16188

Dynamics of laser response in IR detection by means of optical mixing in He-Ne laser, noting bandwidth

05 p0776 A69-16331

Resonant amplifier response having stages identical to radio pulse with exponential envelope

05 p0720 A69-16444

Response of single and multidegree of freedom systems to nonstationary random excitation, analyzing spectral density function of pressure field close to jet engine

05 p0844 A69-16763

Transfer function coefficients from frequency response data determined to obtain information about dynamic system characteristics

05 p0844 A69-16764

Dynamic response of semiinfinite circular cylindrical shells to traveling load

06 p1021 A69-17148

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error

06 p0905 A69-17950

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect
[AIAA PAPER 69-58]

06 p1019 A69-18204

Two signal four quadrant multiplier design having subnanosecond response

07 p1103 A69-18879

Direct coupled monolithic IF amplifier with active gain control, analyzing large signal response, stability, available gain and noise behavior
07 p1104 A69-18885

MHD flow in channels with abruptly widening sections and finned walls under transverse magnetic field, discussing effects on drag
07 p1192 A69-19016

Axisymmetric turbulent conducting fluid jet propagation in longitudinal magnetic field without induction
07 p1192 A69-19019

Dynamic internal thermal shock in spherical shells of arbitrary thickness, considering uncoupled dynamic thermoelasticity problems with spherically symmetrical temperature fields
07 p1236 A69-19471

Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement [AIAA PAPER 69-203]
07 p1054 A69-19546

Stress-strain-time relations in magnesium alloy and aluminum plate impact load tests, discussing stress measurement, Hugoniot equation of state, yield point and dynamic response
08 p1330 A69-20102

Control technique to make aircraft insensitive to parameter variations and to achieve desired response to control
08 p1255 A69-20719

Response time of semiconductor diode from dependence of equivalent capacitance on direct displacement current
08 p1287 A69-20889

Dynamic response of anisotropic circular cylinders to uniformly distributed pressure varying periodically with time analyzed using Laplace transformation
09 p1611 A69-21440

Optimal linear quick response problem solving by fast convergence iterative procedure
09 p1473 A69-21791

Bond shear effects on dynamic behavior of two layered cylindrical shell, identifying bond stiffness parameters [AIAA PAPER 68-354]
09 p1616 A69-21941

Generalized orthogonality principles and expansion schemes for forced response of partial differential equations, noting applicability to rodlike structures
09 p1533 A69-21975

Rigid top mass effect on longitudinal response of model vehicle propellant tank, determining natural frequencies and forced asymmetric response
09 p1616 A69-21979

Fast response microwave interferometers classification and construction principles
09 p1496 A69-22028

High sensitivity gyroscopic HF angular acceleration sensor using special differentiator, obtaining motion equations and dynamic response
09 p1498 A69-22109

Fiber glass reinforced plastic backing phase of composite armor, noting test method for evaluation of performance
09 p1507 A69-22319

Lift engine model compressor response to inlet pressure distortion to determine nature and extent of critical area of spooling for axial flow compressors [ASME PAPER 69-GT-29]
09 p1571 A69-22493

Time varying linear system with input-output relation described by differential equation calculated for impulse response using Taylor series
09 p1459 A69-22580

Self biasing influence on tunnel diode amplifiers dynamic range, determining limiting conditions for amplitude characteristics
09 p1469 A69-22633

Control system controllability under discontinuous control constraints, presenting optimal response rate linear system synthesis with continuous restriction on control function
09 p1475 A69-22670

Aircraft modal control systems synthesis to improve response characteristics by altering pairs of complex conjugate and real eigenvalues simultaneously
09 p1435 A69-22779

Pseudoelectrical bandpass filter response curves and electrical characteristics based on ripple Chebyshev responses
09 p1470 A69-22794

EEG, heart beat, respiration rates, body temperature, motor activity, physical and mental efficiency of man during anechoic chamber confinement
10 p1646 A69-23510

Disturbed index of refraction scattering cross sections and aircraft acceleration increments for clear air turbulence, deriving correlation for measurements
10 p1656 A69-23651

Axial torque effect on critical speeds of continuous rotor with motion described by partial differential equations [ASME PAPER 69-VIBR-52]
10 p1804 A69-24152

Damped steady state response of elastic foundation beam subjected to cyclic moving loads to determine load movement frequencies for natural frequency excitation [ASME PAPER 69-VIBR-13]
10 p1806 A69-24166

Response and stability of self sustained two degrees of freedom system with nonlinear damping, noting harmonic oscillations [ASME PAPER 69-VIBR-24]
10 p1806 A69-24171

Structural damping coefficient of metals determined from complex Young modulus with transmissibility, using mass loaded cantilever beam experiment [ASME PAPER 69-VIBR-36]
10 p1807 A69-24175

Structure dynamic response for motion through homogeneous frozen random load field with spacewise variations, applying analysis method to beam [ASME PAPER 69-VIBR-38]
10 p1807 A69-24176

Multiparameter optimum damping for harmonically excited linear stable strictly dissipative n degrees of freedom system, locating multivariable saddle points [ASME PAPER 69-VIBR-42]
10 p1807 A69-24180

Nonstationary vibrations of mechanical systems subjected to harmonic or external limited energy source excitations
11 p1975 A69-24739

Topologies introduced on state space for differential equations to obtain dynamical systems
11 p1909 A69-25409

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics
11 p1989 A69-25495

Aircraft dynamic response to three dimensional turbulence, establishing unique correspondence between spatial symmetry properties of ambient fields of turbulence and aircraft
11 p1823 A69-25503

Gust load predictions for aircraft design by treating aircraft load history as linear response to stationary Gaussian process excitation
11 p1823 A69-25504

Cylindrical shells spectral response to random acoustic pressure excitation, noting natural modes and inner air column effects
11 p1990 A69-25506

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain histories and residual strain
11 p1991 A69-25512

Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes
11 p1993 A69-25525

Polyurethane foam high velocity deformation properties, discussing results of dynamic uniaxial stress tension and compression tests
11 p1907 A69-25648

Space vehicle dynamic structure response, discussing vibration problems, test methods and responses to periodic, stochastic and forced excitations
12 p2176 A69-25857

Linear automatic control system floating response to harmonic effects achieved by coinciding open loop system transfer function poles with disturbance pattern poles
12 p2045 A69-25967

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength
12 p2119 A69-26847

Dynamic response of imperfect circular cylinder to constant velocity load, noting applicability of Hoff nonlinear equation for dynamic buckling of columns
13 p2359 A69-27260

Asymptotic analysis for stability and vibration response of spherical squeeze-film hybrid bearing, obtaining perturbation solutions [ASME PAPER 68-LUBS-37]
13 p2267 A69-27281

Thermocouples dynamic response attached to thin skinned model under constant heating rate, considering error reduction in temperature measurement
13 p2375 A69-27785

Multiband frequency conversion in filters or correcting circuits with four terminal networks, noting prototypes
13 p2235 A69-28519

Materials surface thermal stress analysis by strain gauges, considering behavior during rapid temperature changes
13 p2264 A69-28599

Cavity mounted pressure transducers response in high speed pressure measurements
14 p2445 A69-28874

Input signal piecewise linear approximation for investigating response of dynamic automatic control systems to nonstandard input signal
14 p2426 A69-29143

Dual pendulum with tilt sensitivity at wide passband frequencies and damping due to horizontal oscillations
14 p2450 A69-29570

Dynamic instrumental errors of quasi-steady state mechanical meters approximated by graph analytical method
14 p2451 A69-29747

Microwave filter tailored for frequency response in L through S band regions for high range resolution radar receiver
14 p2423 A69-29759

SST fuselage response to reverberant and turbulent boundary layer noise calculated for computing equivalent reverberant acoustic fields
15 p2549 A69-30302

Real time shock response analysis advantages over sequential analysis, describing equipment
15 p2618 A69-30359

Time dependence of maximum structural response of single degree of freedom mechanical system under random loading
15 p2705 A69-30365

Dynamic vibration effects on guidance and control systems performance determined from spectral densities, cross spectral densities and vibratory environment amplitude distributions
15 p2608 A69-30367

Clamped circular plates impulse load tests with sheet explosives, showing finite difference program for computing large deflection dynamic response
15 p2709 A69-30675

Molecular beam behavior in constant electric and magnetic fields, applying laser frequency dependence on magnetic field orientation to resonator
15 p2655 A69-30943

Power spectral density response of uniform beams to random pressures, evaluating joint acceptance of systems with pressure field [ASA PAPER SVT2]
15 p2713 A69-31143

Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
15 p2700 A69-31442

Mathematical optimization to achieve near equal-ripple response in passband for coaxial low pass filters having unequal line lengths
16 p2757 A69-31583

X band avalanche diode oscillator operated as super-regenerative amplifier, noting frequency response characteristics ascribed to diode susceptance modulation
16 p2757 A69-31585

Liquid free surface response to mass force variation during space flight near zero-g, discussing effects on ignition
16 p2866 A69-31735

Stress waves analysis in laminates design, assuming one dimensional linear elastic response to plane stress pulse on flat laminated plate surface
16 p2872 A69-31923

Inertia, compressibility and viscous friction effects on dynamic response of long fluid line, constructing models
16 p2771 A69-32066

Blast response of model structures fabricated from material differing from prototype structures, testing in dynamic, impulsive and quasi-static loading realms
16 p2874 A69-32164

System kinetics synthesis for nonlinear multiple lumped parameter system having responses in boundary region of phase-time space
16 p2812 A69-32247

Resonant amplifier response having stages identical to radio pulse with exponential envelope
16 p2753 A69-32476

Single freedom vibratory system response to imposed displacement harmonic excitation, analyzing response in terms of constrained system modes
17 p3067 A69-34139

Equations in series form to describe composite beams behavior under nonuniform torsion
18 p3211 A69-34343

Linear analysis of damped flexibly mounted rolling element bearings influence on dynamic rotor unbalance response, including optimum support characteristics
[ASME PAPER 69-LUBS-21]
18 p3212 A69-34382

Cylindrical and conical panels dynamic responses to time varying load distributions, using trigonometric series coupled with finite difference methods
[ASME PAPER 69-APM-22]
18 p3214 A69-34396

Ionospheric electric current systems dynamics in polar latitude in relation to 1966 geomagnetic storms
18 p3130 A69-35188

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766]
19 p3433 A69-35657

Thermal effects on viscoelastic structure response to applied loads, using equations for thermomechanics, linear and nonlinear thermoviscoelasticity and nonisothermal creep theorem
19 p3440 A69-36657

Electrohydraulic servomechanism harmonic response showing nonlinear behavior, including jump resonance, analyzed by mathematical model and analog simulation
20 p3464 A69-36999

Bloch wall motion along hard direction of Permalloy films due to fast rising hard-axis pulses
20 p3584 A69-38191

Optimal control of dynamic system motion described by linear differential equation, selecting vector function ensuring predetermined trajectory
21 p3685 A69-38452

Control function ensuring minimal response time of controlled plant with motion described by integral equations system, using method of distributed moments
21 p3685 A69-38847

Spring mass nonlinear systems under constant force excitation, studying step function responses of systems with various restoring force characteristics
21 p3836 A69-38985

Damped mass spring system response to sonic booms, considering effects of structural damping, total/positive phase duration ratio and N wave rise time
21 p3647 A69-38987

Acoustoelastic interaction effects of sonic bangs on natural frequencies response of large windows backed by closed cavity
21 p3836 A69-38988

Response of three level particles system with equidistant spectrum under resonant action of acoustic and electromagnetic pulses sequence with different frequencies
21 p3737 A69-39068

Liquid propellant rocket injectors response to HF chamber pressure oscillations using one dimensional model
21 p3786 A69-39235

Optimal control synthesis by determining conditions for absolute minimum in quick response having no regular constraints on phase coordinates
21 p3689 A69-39863

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material
22 p4047 A69-41101

Burning solid propellant behavior under pressure fluctuations expressed in response function terms defining small mass flux change ratio to small pressure change
23 p4201 A69-41922

Dynamic reactions of mathematical model representing vision and hearing process adaptation
23 p4110 A69-41984

Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
23 p4231 A69-42133

Dynamic response of anisotropic elastic cylindrical and spherical shells determined by application of Hankel transforms, considering time dependence of loads
23 p4235 A69-42481

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form
24 p4395 A69-42591

Asymmetric dynamic response to free and forced vibrations of thin membrane shells at given stress state due to previous loads
24 p4399 A69-42990

Thermosphere dynamic response to low altitude geomagnetic disturbances, showing time lag dependence on perturbation intensity
24 p4310 A69-43180

Dynamic pressure response of viscous compressible fluids in rigid tubes with dead ended volume termination, testing Ibrall theorem as function of Stokes number
24 p4301 A69-43287

DYNAMIC STABILITY

NT AERODYNAMIC STABILITY

NT AIRCRAFT STABILITY

NT ATTITUDE STABILITY

NT BOUNDARY LAYER STABILITY

NT COMBUSTION STABILITY

NT CONTROL STABILITY

NT DIRECTIONAL STABILITY

NT FLAME STABILITY

NT FLOW STABILITY

NT FREQUENCY STABILITY

NT GYROSCOPIC STABILITY

NT HOVERING STABILITY

NT LATERAL STABILITY

NT LONGITUDINAL STABILITY

NT LOW SPEED STABILITY

NT MAGNETOHYDRODYNAMIC STABILITY

NT MOTION STABILITY

NT ROTARY STABILITY

NT SPACECRAFT STABILITY

Necessary and sufficient stability conditions for differential equation systems with selfadjoint quasi-periodic coefficients
01 p0107 A69-11130

Expanded describing functions used in studying nonlinear control systems with multiplication points, considering systems with/without integral response
01 p0054 A69-11359

Absolute input-output stability of time varying nonlinear feedback system established by frequency domain test similar to Popov test
01 p0054 A69-11414

Asymptotic stability conditions for delayed quasi-linear nonautonomous systems periodic solutions derived by Shimanov method
02 p0280 A69-11705

Dynamic stability of structural system excited by random load, discussing effect of nonlinearities and dynamic snapping problems
02 p0339 A69-11988

Collective stability of collisionless gravitating systems based on variational principles resembling energy principle
02 p0323 A69-12275

Book on stability criteria for linear mechanical engineering systems covering response characteristics, encirclement theorem, Routh and Hurwitz criterions, root loci, D partition, etc
02 p0281 A69-12276

Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds
[AIAA PAPER 68-142]
02 p0334 A69-12373

Logarithmic variation criteria for stability of feedback systems with time varying gains
03 p0409 A69-13073

Synthesis of statistically optimal self adaptive system for dynamic characteristics stabilization of automatic control system main loop
03 p0410 A69-13256

Application of modern stability theory to solution of practical problems by means of comparison theorems, demonstrating effectiveness of method
03 p0467 A69-13747

Conventional TWT theory modified to include interaction between beam and two spatial harmonics, investigating TWT stability near edges of pass band
03 p0407 A69-13976

Aircraft stability during sideslip, discussing influence of fuselage/wing interference
04 p0548 A69-14824

Air density fluctuation effects on aircraft dynamic stability around center of gravity during climbing and diving maneuvers, discussing atmospheric pressure and flight path angle
04 p0548 A69-14825

Modified versions of standard definitions of finite time stability, presenting converse theorems for necessary and sufficient conditions
04 p0624 A69-15005

Stability functions for local buckling of long thin flat walled structures loaded for longitudinal compression and shear
05 p0833 A69-15709

Stability theorems for discrete linear circulatory systems with N degrees of freedom for static and dynamic loss of stability in presence of velocity dependent forces
05 p0836 A69-15875

Discrete time positive real functions defined for analyzing system stability with memoryless feedback
05 p0739 A69-16349

Roll dynamics of spinning axisymmetric satellite in elliptical orbit, discussing eccentricity and gravity gradient torque effect
05 p0830 A69-16397

Articles on automatic control systems stability, discussing relation between method of Lure and Popov criteria
05 p0740 A69-16667

Pulsed control systems stability with frequency pulse modulation analyzed by Liapunov direct method
05 p0740 A69-16670

Dynamic instability of solid bodies, using modal vibration method to establish criteria on basis of equivalent energy conditions
05 p0844 A69-16742

Stability and weak oscillations of systems with distributed parameters, using method based on representation of characteristic equation in power series
06 p0956 A69-16822

Synthesis of linear controlled systems with variable parameters, reducing parameter determination problem to Chebyshev approximation of relations between linear components
06 p0899 A69-16829

Dynamic stability tests of tilt winged V/STOL aircraft model in ultralow speed range, discussing apparatus for stability derivatives
06 p0866 A69-17091

Axisymmetric form of stability loss of cylindrical shell under effect of axial load suddenly applied along generatrix, considering inertia forces and obtaining differential equations
06 p0121 A69-17181

Stability of tangential velocity discontinuity between two media with different densities situated in acoustic field
06 p0910 A69-17344

Geometry changes influence on rigid plastic circular plate behavior under two independent distributed pressures
06 p1023 A69-17508

Dynamic behavior of three layer plates in supersonic gas flow
06 p1024 A69-17552

Linear state variable feedback to obtain asymptotic stabilization of linear dynamic systems
06 p0905 A69-17947

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers
[AIAA PAPER 69-133]
06 p0862 A69-18050

Lifting reentry dynamic stability of flare stabilizers and flap controls
[AIAA PAPER 69-182]
06 p1017 A69-18053

Dynamic stability loss on ablating vehicles ascribed to boundary layer transition effect from turbulent aft body heating
[AIAA PAPER 69-106]
06 p1037 A69-18087

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89]
06 p1028 A69-18133

Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories
[AIAA PAPER 69-105]
06 p1019 A69-18209

Maximum index of exponential growth of solution of linear Hamiltonian equation with periodic operator coefficient encountered in dynamic stability of elastic systems
07 p1231 A69-18501

Dynamic stability of systems with distributed parameters subjected to parametric loading, considering parametrically excited systems with infinite degrees of freedom
07 p1231 A69-18502

Transient stability of AC generator analyzed by Liapunov direct method, considering effects of flux decay, speed governor and voltage regulator
07 p1058 A69-18644

Dynamical stability in premain sequence stars, discussing adiabatic models for pure hydrogen composition and collapse initiation by low opacity
07 p1220 A69-19388

Longitudinal stability of unsteady motion of flight vehicle along ballistic trajectory, using linear differential equations
07 p1230 A69-19701

Nonautonomous linear systems stability, with coefficient varying with bounded time function and bounded derivative
08 p1296 A69-19922

Line shape for dynamic Stark effect during optical resonance field irradiation calculated as function of relaxation constants and beam intensity
08 p1325 A69-20282

Dynamics and instability of multilayered systems models in field of gravity, noting isostatic adjustment of layered globe
08 p1309 A69-20578

Dynamic stability of thin flat plates and applications in ship and aircraft deck construction, studying dynamic buckling for rectangular plate
08 p1415 A69-20665

Differential equation reduction for vibrational motion of rectangular plates subjected to variable tangential forces, discussing dynamic stability
08 p1415 A69-20666

Command inputs handling by linear optimal control theory, investigating Riccati matrix differential equation convergence
08 p1298 A69-20856

Almost periodic systems stability criteria derived from differential inequalities and Liapunov function, considering existence and uniqueness
09 p1532 A69-21612

Thermionic converters stability and safety maintainable at high Ce pressures
09 p1441 A69-21837

Stability analysis including delayed collector and structure coefficients, showing thermionic reactor instability with all negative reactivity coefficients
09 p1442 A69-21841

Stabilized gyroscope platform internal dynamics analysis, outlining optimal orientation for full compensation of cross couplings
09 p1499 A69-22240

Validity of finite difference approximations for barotropic instability of zonal currents
09 p1537 A69-22298

Stability of thin rotating disks of stars with respect to axisymmetric disturbances, noting overstabilities dependence on epicycles sizes
09 p1605 A69-22413

Digital signal tracking module operation and stability, considering use of interconnecting modules to achieve adaptive tracking
09 p1459 A69-22477

Stability and local parametric synthesis conditions of programmed optimal control established for optimal control problem within fixed interval
09 p1475 A69-22666

Stability conditions for nonlinear pulse width and pulse time modulation systems, considering pulse element properties and system continuous part frequency characteristic
09 p1476 A69-22672

Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances
09 p1476 A69-22717

Numerical solution for three dimensional boundary layers based on stability determinations for linearized difference equations
10 p1631 A69-22902

Mathieu equation with square law damping effect on first order instability range
10 p1724 A69-22920

Probable spectrum stability criterion and reducibility derived for linear differential equation having recursion or almost periodic coefficients
10 p1720 A69-23562

Time varying linear optimal control system sensitivity obtained by comparing closed loop with open loop sensitivity to parameter variations
10 p1667 A69-24058

Axisymmetric models for stable and unstable oscillations of rapidly rotating zero temperature white dwarfs, discussing kinetic and potential energy
10 p1789 A69-24129

Hydrodynamic equations and conservation laws for nonviscous fluid in postNewtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability
10 p1789 A69-24130

Dry friction whip role in radial rubs dynamic stability in labyrinth seals and blade tips of turbomachinery [ASME PAPER 69-VIBR-56]
10 p1804 A69-24146

Differential equation for dynamic behavior of acrobatic flight navigation instruments in steep flight, considering vertical gyroscopes, gimbal platforms and time optimal control
11 p1880 A69-24328

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
11 p1956 A69-24394

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations
11 p1915 A69-24535

Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations
11 p1881 A69-24560

Stability of barotropic perturbations superimposed on wind velocity profile of basic currents in geostrophic multilayer models
11 p1911 A69-24586

Dynamic stability of double pendulum with vibrating point of suspension, obtaining differential equations of motion by Lagrange equations application in averaging method
11 p1884 A69-24768

Differential equations describing system stability with delay in functional space
11 p1919 A69-25093

Optimum controller design for dynamic stability of ideal incompressible fluid in cavity of body constrained to horizontal rectilinear translational motions
11 p1966 A69-25330

Dynamic stability of elastic beam type structures, using electronic simulation based on finite element approach
11 p1986 A69-25344

Asymptotic stability of discrete homogeneous linear minimum-variance estimation formulas
11 p1860 A69-25449

Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier
11 p1860 A69-25450

Stability of linear time-varying systems via examples, comparing various techniques
11 p1861 A69-25452

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth, top impedance and ullage pressure by Donnell theory
11 p1989 A69-25499

Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates
11 p1990 A69-25507

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight
11 p1990 A69-25510

Optimal multivariable linear control system design, based on Pontryagin principle using Laplace transform method, providing good approximation to finite interval controllers
11 p1861 A69-25663

Blood vessel model in form of cylindrical shell filled with liquid for studying cardiovascular system dynamic and static problems
12 p2018 A69-25989

Dynamic properties and reliability of linear time invariant multivariable control systems
12 p2051 A69-26093

Vector equation for correction masses for dynamic balancing of rotor supported on n points derived from bearing structure vibrations amplitude and phase
12 p2180 A69-26243

Steady modes of operation analysis for optimal single channel differential relay system with inertial controlled plant, assuming constant rate varying plant input
12 p2052 A69-26278

Helicoidal precession stability in sense of Liapunov, Poincare and Lagrange
12 p2130 A69-26286

Gasdynamic stability of detonation shock wave in case of arbitrary heat evolution kinetics using detonation model
12 p2062 A69-26672

Soviet book on strength, stability and vibrations covering stability of rods, plates and shells subjected to plastic and elastic deformations, etc
12 p2182 A69-26755

Nose bluntness effect on hypersonic unsteady aerodynamics of flared and conical bodies of revolution [AIAA PAPER 68-889]
12 p2012 A69-26794

Monograph on nonlinear servosystems covering nonlinearity with/without inertia, self oscillations, linearization by forced oscillations, stability theorems and Liapunov function choice
12 p2054 A69-26966

Instability phenomena encountered in galaxies determined based on classification of galaxies according to mass and brightness
12 p2163 A69-27019

Interacting NGC 4485 and 4490 galaxies instability, establishing early stage of evolution from morphological and spectroscopic results of photographic observations
12 p2169 A69-27056

Photographic studies of unsteady features of galaxies, discussing spectra, color, spiral arm instability and extragalactic H II regions
12 p2170 A69-27063

Asymptotic analysis for stability and vibration response of spherical squeeze-film hybrid bearing, obtaining perturbation solutions [ASME PAPER 68-LUBS-37]
13 p2267 A69-27281

Gas lubricated hybrid journal bearings with external pressure, noting load capacity and stability in steady state and dynamic analyses [ASME PAPER 68-LUBS-21]
13 p2267 A69-27284

Dynamic multistable analog integrator capable of prolonged retention of integration, giving differential equation of device
13 p2224 A69-27427

Linear oscillation modes of premain sequence star model of pure hydrogen composition with variable specific heats ratio, discussing dynamic instability of polytropes
13 p2336 A69-27449

Local stability of rotating stars in toroidal and poloidal magnetic fields, using linear stability analysis
13 p2346 A69-27707

Dynamic stability of two degrees of freedom circulatory systems with bilinear hysteresis damping
13 p2363 A69-28127

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models [AIAA PAPER 69-350]
13 p2243 A69-28284

Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation
13 p2369 A69-28353

Noise stability of nonoptimal radar detection system for noise and FM signals, deriving expressions for optimal spectral width
13 p2222 A69-28508

High gain broadband amplifiers with triple tuned coaxial resonators and gridded power tubes, discussing phase stability
14 p2418 A69-28892

Relay sampled data phase plane trajectories periodic motions increased with increase of system duty factor
14 p2425 A69-28898

Stable operation of pulsed system with signal modulated pulse frequency described by nonlinear integral equation
14 p2425 A69-28909

Root locus method for nonlinear systems analysis, determining existence, stability and parameters of periodic solutions
14 p2445 A69-28919

In-core thermionic reactor space power plants stability and control criteria, comparing linear and nonlinear models
14 p2481 A69-29189

Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions
14 p2534 A69-29318

Magnetic suspension device replacing mechanical bearings of inertial guidance systems gyro rotors, evaluating device strength and stability
14 p2479 A69-29492

Slow neutrons irradiation compensated high resistivity p-InSb current instability

15 p2666 A69-30058

Noise stability of receiver network during detection of finite duration noise signal on white noise background, considering various narrow band preselectors

15 p2563 A69-30142

Expanding isotropic universe with cosmological constant, noting stability for rotational perturbations and gravitational and sound waves

15 p2690 A69-30735

Dynamic stability of elastic bodies with motion described by partial differential equation

15 p2652 A69-30860

Linear elastic columns dynamic stability under time dependent axial load, investigating almost-sure asymptotic stability

16 p2872 A69-31911

Nonlinear nonconservative systems asymptotic stability analysis, emphasizing Zubov construction procedure for Liapunov functions

16 p2873 A69-32059

Cylindrical shell aeroelastic dynamic stability subjected to supersonic flow field, considering geometric imperfections, edge constraint and prestability deformation [AIAA PAPER 68-285]

16 p2874 A69-32159

Stellar system stability for corresponding stable barotropic gaseous system, discussing Schroedinger operator role

16 p2862 A69-32374

Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances

16 p2765 A69-32550

Cylindrical viscous jet transition points from stable to unstable modes of oscillation found same as for inviscid jet

16 p2773 A69-32570

German monograph on instability of nonrevolving rotating stars covering secular rotational perturbations, radiative zone rotation, spherical Cowling model, etc

17 p3029 A69-32997

Machine for testing vibration stability of polymer samples subject to tension or compression, noting stability of plastic during vibration lower than during static loading

17 p2972 A69-33043

Planetary zonal flows hydrodynamic instability characteristics analysis, using quasi-geostrophic numerical model to study earth atmospheric cyclone wave role

17 p2960 A69-33149

Atmospheric stability influence on vertical spectra of refractive index and air velocity deduced from beam swinging experiments and compared with radiosondes data

17 p2960 A69-33157

Elastic stability of warped rods, using small oscillations method for varying end conditions and torsional-moment vector behavior

17 p3057 A69-33196

Thermal wind instability by numerical integration of equations of motion, noting convective cells tilt

17 p2998 A69-33734

Compressed signal spectral analyzer resolving power, discussing dynamic amplitude range influence and weighting functions role

17 p2939 A69-33906

Cylindrical aluminum shell dynamic stability, analyzing steady state parametric oscillations, mode shape, frequency, amplitude and damping

17 p3065 A69-33929

Elastic beam-plate vibration natural frequency and dynamic instability in transverse static or oscillating magnetic field [ASME PAPER 69-APM-B]

18 p3215 A69-34400

Vibrations damping coefficient for asymptotic stability of inertial navigation system platform, determining stabilization errors

18 p3134 A69-34555

Viscous friction damping effect on impact vibrator stability, analyzing boundary region of multiply periodic single impact motion by point mapping

18 p3172 A69-34588

Numerical procedure for testing absolute stability and positive realness of free dynamic systems based on Routh algorithm

18 p3112 A69-34689

Dynamic balancing mechanics covering graphical representation, mass asymmetries corrections or adjustment calculations and ballasting equations [SAWE PAPER 736]

18 p3220 A69-34891

Dynamic instability regions of parametric resonance of cylindrical shells with curved generating lines under axial and radial pressure

18 p3223 A69-34979

Viscoelastic shaft stability rotating at harmonically variable angular velocity, considering internal and external damping

18 p3224 A69-35300

Dynamic stability of dual wheel gears for aircraft applications, discussing shimmy, tire characteristics, velocity effects, etc [AIAA PAPER 69-769]

19 p3245 A69-35654

Static dynamic and damage tolerant strengths of advanced materials for VTOL aircraft with emphasis on Ti, cryoformed 301 stainless steels and filamentary composites [AIAA PAPER 69-764]

19 p3433 A69-35658

Stability of periodic orbits in elliptic restricted three body problem [AAS PAPER 68-086]

20 p3595 A69-37172

Asymptotic stability of null solution of matrix differential equation, considering linearized equations of rotational motion for hinged two body gravity gradient satellite orbit

20 p3575 A69-37212

Amplification stability region in overexcited regenerative traveling wave amplifier with respect to parasitic emission buildup

20 p3506 A69-37724

Photometry methods for spacecraft brightness in dynamical states of rapid spin and tumble

21 p3671 A69-38340

General relativity effects on isotropic stars evolution, discussing dynamic stability and white dwarfs

21 p3798 A69-38540

Dynamic system absolute stability and sensitivity to parameter variations in linear part of system calculated by graphical and analytical techniques

21 p3685 A69-38729

Dynamic stability of linear systems with periodic coefficients based on iterative formulas, evaluating transition matrix

21 p3685 A69-38779

Constraint torque elimination from vector equations canonical system for attitude dynamics of satellite consisting of arbitrarily interconnected rigid bodies [AIAA PAPER 69-923]

21 p3821 A69-39354

Coupled acoustic and spiral EM waves drift instabilities in bounded plasma of solid body found to be convective

21 p3782 A69-39556

Dynamic systems stability with two degrees of freedom, determining second order time dependent integrals valid near periodic orbit

22 p4013 A69-40123

Normal radial vibrations in Newtonian and general relativistic stellar objects and dynamic instability, determining modes and natural frequencies

22 p4014 A69-40142

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation

22 p4043 A69-40455

Variational principle for stability of galactic models, developing perturbation potential in terms of operator similar to Hartree-Fock exchange operator

22 p4022 A69-40468

Stability boundaries of discrete circuits employing delay lines with forward and feedback links, deriving equations

22 p3918 A69-40957

Dynamic simulation for gas turbine engine components design to assure stable operation and rapid response characteristics [SAE PAPER 69-0386]

23 p4200 A69-41655

Semiempirical stability boundary for flutter of simply supported cylinders for various length-radius and radius-thickness ratios

23 p4228 A69-41914

Sufficient conditions derived for absolute stability of dynamic systems containing nonlinear functions of several state variables

23 p4145 A69-42445

Digital analysis of nonlinear control systems dynamic stability under small perturbations, using linearized differential equations [IS-ERI-71]

24 p4285 A69-42984

Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density

24 p4361 A69-43121

Centrifugal forces effect on stability of inviscid liquid film over rotating cylinder away from stagnation region, noting film thickness stabilization effect

24 p4305 A69-43597

Contraststreaming self gravitating gas streams stability taking into account thermal conduction and radiation effects

24 p4388 A69-43638

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability

24 p4390 A69-43784

DYNAMIC STRUCTURAL ANALYSIS

Equations of linear theory of anisotropic elastic plates including Reissner-Green bending equations

01 p0168 A69-10387

Collection of Soviet papers on problems of dynamics and strength, Number 15

01 p0086 A69-10826

Nonlinear buckling analyzed by mathematical models and computational procedures using organized matrix approach to structural analysis based upon finite element

01 p0171 A69-10964

Differential equations for dynamical problems in plates obtained by symbolic approach involving power series substitution into linear elasticity dynamical equations

01 p0172 A69-11282

Motion, field momentum and field kinetic energy equations of concentrated dislocations based on Zorski field theory of defects

02 p0336 A69-11556

Paradoxes associated with elastic-plastic limit load analysis of material satisfying Drucker stability postulates

02 p0337 A69-11562

Modal substitution method for free vibration analysis of large discrete undamped dynamic systems

02 p0338 A69-11747

Ductile crack propagation speed relation to dynamic flow properties of metals analyzed using Dugdale crack model

02 p0343 A69-12283

Dynamic mechanical behavior of metal at tip of plain strain crack, discussing fracture strength relation to triaxial plastic stability

02 p0343 A69-12284

Crystal dislocation motion in viscous media, discussing velocity stress behavior and measurements by etching and ultrasonic attenuation methods

02 p0343 A69-12285

Constitutive equations for dynamic material behavior permit consideration of large deformations in direct manner

02 p0343 A69-12286

Structure of sources of noise storm enhancements and stationary type 4 bursts, discussing head and tail components

02 p0328 A69-12753

Postbuckling behavior of elastic spherical shells from pressure and volume-displacement instrumentation and photography

03 p0524 A69-13062

Thickness twist and face shear vibrations of laminated layer, determining frequencies from stress equations of motion, constitutive equations and boundary conditions [ASME PAPER 68-WA/APM-10]

04 p0668 A69-14392

Stability against snap-through and final states of shallow arches on elastic foundations and subject to time varying loads [ASME PAPER 68-WA/APM-26]

04 p0669 A69-14394

Stresses and displacements in anisotropic elastic solids under mechanical loading, determining general solution for treatment of time dependent boundary conditions

04 p0675 A69-14595

Dynamics of structured solids - ASME Conference, New York, December 1968

04 p0675 A69-14684

Equilibrium and compatibility equations for axisymmetric stress distribution in finite length anisotropic elastic cylinder reduced to single integrodifferential equation

04 p0676 A69-14709

Optimization of control functions and parameters of dynamic systems with variable structure and discontinuous phase coordinates

04 p0582 A69-14795

Saturn ring formation by satellite spiral into Roche limit and disintegration

04 p0660 A69-15128

Symmetrical bending of laterally loaded circular micropolar plates

04 p0682 A69-15291

General kinematic yield mechanism and associated kinematically adequate multiplier formulated for structural elements characterized by plane deformation state

05 p0831 A69-15684

Equation governing transverse vibration of beams with exponentially varying properties, expressing solution in terms of Bessel functions

05 p0835 A69-15873

Mathematical model simulation of structures using building block approach

05 p0842 A69-16471

Soviet collection of papers on dynamics and strength of machines

06 p1026 A69-18013

Spacecraft control system and flexible structures interactions, discussing transient phenomena, limit-cycle oscillations and instabilities [AIAA PAPER 69-116]

06 p1019 A69-18187

Stresses and displacement around crack under various conditions using two dimensional elasticity theory, deriving complex potentials for various loading types

07 p1231 A69-18269

Fatigue life in nonstationary cyclic loading above endurance limit, describing methods of shortened fatigue tests for fatigue life

07 p1231 A69-18403

Dynamic stability of systems with distributed parameters subjected to parametric loading, considering parametrically excited systems with infinite degrees of freedom

07 p1231 A69-18502

Explicit transverse bending stiffness and mass matrices for triangular finite plate element with linear thickness variation, using matrices for natural frequencies of vibration

08 p1414 A69-20526

Reaction vs time relations in accidental impact of large commercial aircraft against rigid surface, detailing stress analysis of nuclear power plants structures

09 p1613 A69-21677

Geometry at tip of growing fatigue crack, measuring crack propagation rate and fitting data to nucleation theory

10 p1795 A69-23062

Time dependence criterion in dynamic fracture determined by spall stress relation to stress pulse duration during plate impact

10 p1803 A69-24032

Natural frequencies and associated composite loss factor for laminated plate with alternate elastic and viscoelastic layers, deriving partial differential equations [ASME PAPER 69-VIBR-68]

10 p1805 A69-24158

Structural damping coefficient of metals determined from complex Young modulus with transmissibility, using mass loaded cantilever beam experiment [ASME PAPER 69-VIBR-36]

10 p1807 A69-24175

Structure dynamic response for motion through homogeneous frozen random load field with spacewise variations, applying analysis method to beam [ASME PAPER 69-VIBR-38]

10 p1807 A69-24176

Two dimensional wavefront shape induced in finitely strained elastic body by impulsive point body force

11 p1969 A69-24338

Elastic waves propagation in inhomogeneous composite media, considering coefficient of structural stress concentration

11 p1972 A69-24649

Stress concentration analysis of interactions between stress raisers and cross section changes, considering asymptotic expansion method

11 p1972 A69-24650

Dynamic unified structural analysis method in computer program, calculating stiffness matrix to obtain natural frequencies and mode shapes

11 p1987 A69-25367

Structures, structural dynamics, materials and aeroelasticity - ASME-AIAA Conference, New Orleans, April 1969

11 p1988 A69-25492

Digital program containing Eulerian formalism for multiple interconnected rigid members applied to gravity gradient stabilized satellite with flexible booms

11 p1989 A69-25502

Classification of second order quasi-linear partial differential equations with two independent variables in structural dynamics with emphasis on elastic structures

11 p1991 A69-25513

Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes

11 p1993 A69-25525

Transient dynamic response of linearly viscoelastic structures and continua, presenting finite element displacement formulation

11 p1993 A69-25528

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope

11 p1994 A69-25530

Elastic free-free body deformation during motion based on equations of motion valid for rigid body, noting dynamic Green tensor

11 p1994 A69-25604

Space vehicle dynamic structure response, discussing vibration problems, test methods and responses to periodic, stochastic and forced excitations

12 p2176 A69-25857

Rigid plastic circular and annular plates dynamics taking into account yield point dependence on strain rate

12 p2177 A69-25994

Large plastic deformation of two metallic cylindrical flat ended missiles in mutual longitudinal impact

12 p2179 A69-26217

Vector equation for correction masses for dynamic balancing of rotor supported on n points derived from bearing structure vibrations amplitude and phase

12 p2180 A69-26243

Transverse symmetrical vibrations of thin elastic plates under Jacobi pressure distribution, giving displacement and velocity plots

12 p2180 A69-26271

Dynamic analysis methods for airframe flight control design noting equations of motion, system criteria and analysis and synthesis methods [AIAA PAPER 68-832]

12 p2174 A69-26758

Structures, structural dynamics and materials - AIAA-ASME Conference, New Orleans, April 1969

12 p2183 A69-26807

Simply supported laminated anisotropic rectangular plate with coupling occurring between bending and in-plane extension, discussing stiffness analysis by Fourier series method

12 p2184 A69-26808

Thermostructural simulation of lifting vehicle panel design, considering safety and trajectory shaping of flying laboratory

12 p2060 A69-26836

Accelerated structural tests under creep conditions, noting isothermal structures subjected to uniaxial and complex stress loads

12 p2186 A69-26838

Dynamic relaxation method for elastic deformation in mirrors, using tensor equations of elasticity in nonorthogonal curvilinear coordinates

12 p2187 A69-26890

Representation formula for response function of elastic materials having given isotropy group

12 p2188 A69-26926

Local failure of axially loaded plastic foam core sandwich panels, using face wrinkling analysis procedures

13 p2357 A69-27207

Load deflection equation solution based on row operations, involving three passes of coefficient matrix, using wavefront processing and modified Gauss algorithm

13 p2358 A69-27208

Natural vibration modes of linearly tapered rectangular plates, approximating plate characteristic shapes with series of products of beam characteristic shapes

13 p2358 A69-27211

Collection of papers on aerodynamic flutter covering airfoils, flow theory, aircraft structures, etc

13 p2358 A69-27234

Thin cylindrical shell vibration with three supports analyzed by minimizing Lagrangian of vibration, obtaining frequencies and modes

13 p2359 A69-27257

Plane stress theory for large elastic deformations of isotropic thin sheets, outlining successive substitutions method for neoHookean materials static and dynamic problems

13 p2359 A69-27320

Vibration modes in four lowest natural frequencies of clamped rectangular plates with linear thickness variation, using Ritz method

13 p2361 A69-27442

Plane problem for inhomogeneous elastic media based on assumption of elastic coefficients as functions

of two variables defined in domain occupied by medium

13 p2362 A69-27977

Stresses in elastic half plane with bonded disk of same elastic properties, describing stress production by expansion of disk

13 p2363 A69-28132

Inelastic structural system stresses, strains and displacements analyzed by differential stress-strain relationships, using finite element method [AIAA PAPER 68-291]

13 p2364 A69-28208

Dynamic stresses in case bonded cylinder due to transient angular accelerations, presenting numerical results for incompressible elastic cylinder

13 p2364 A69-28209

Projectile impacts into laminated targets consisting of plastic layers backed by Al substrates using SHAPE code with hydrodynamic elastoplastic distortional model [AIAA PAPER 69-356]

13 p2366 A69-28289

Experimental and predicted shock axial pressure variations for semiinfinite metallic targets during high velocity impact, using Al alloys and Cu [AIAA PAPER 69-361]

13 p2366 A69-28294

Couple stresses effect on dynamic stress concentrations, considering elastic compressional wave diffraction by cylindrical discontinuity

13 p2369 A69-28351

Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation

13 p2369 A69-28353

Complex structures lumped weight and inertia parameters automatic computation based on finite weight element method, using SCOWL computer program

14 p2533 A69-29025

Flexural vibrations of unstiffened doubly symmetric cylindrical tubes, obtaining natural frequencies of simply supported rectangular tube

15 p2703 A69-30210

Integrated structural and dynamic testing plans for proposed large interplanetary spacecraft, discussing acoustic testing, testing environments and flight environment transformation into laboratory

15 p2588 A69-30399

Uncoupled dynamic thermal stresses and displacements by heat generation in infinite flat plates, using classical thermoelasticity theory for infinitesimal displacements

15 p2709 A69-30669

Transient behavior of finite damped cantilever beam and circular plate analyzed by direct finite element method, noting applicability to dynamic problems

15 p2710 A69-30868

Deformation functions for finite beam analysis allowing continuity at nodes and accurate eigenvalues

15 p2710 A69-30869

Matrix eigenvalue problems with statistical properties, applying to dynamic structural systems and verifying solutions by Monte Carlo simulation

16 p2871 A69-31878

Blast response of model structures fabricated from material differing from prototype structures, testing in dynamic, impulsive and quasi-static loading realms

16 p2874 A69-32164

Aerodynamic aspects of tail rotor design and structural dynamics of stiff inplane configurations, discussing blade natural frequencies [AHS PAPER 342]

17 p3059 A69-33504

Network synthesis technique applied to structural dynamics design, using topological formulas to express systems response transfer functions

17 p2933 A69-33709

Numerical Fourier transform and inversion in random vibration performed on computer, noting use for stochastic structural dynamic analysis of complex structures

17 p2996 A69-33710

Blade vibration damper consisting of springs attached to blade, analyzing resonance stresses on basis of dynamic rigidities

17 p3066 A69-33944

Aircraft landing gear cylinder reinforcement rings design for minimum weight, using optimization iteration method for planar frames with elastic supports [AIAA PAPER 68-328]

17 p3066 A69-34030

Dynamic equations solution for interacting rigid or elastic body system models using Cosserat bodies elastic theory, considering engineering applications

17 p3067 A69-34143

Transient vibration linear analysis using Duhamel integral and Fourier and Laplace transformations, deriving receptances and application to aeroelastic systems

18 p3211 A69-34326

DYNAMIC TESTS

Axisymmetrical vibration characteristics of circular sandwich shell with viscoelastic core layer analyzed via differential equation to obtain frequency equation and composite loss factors
18 p3211 A69-34327

Book on deformable bodies mechanics covering load resisting members of structures and machines
18 p3222 A69-34927

Plate dynamics generalized equations independent of plate theory hypotheses, discussing algorithm and initial and boundary conditions
18 p3226 A69-35376

Soviet papers on dynamics and strength of machines covering oscillations of shells and impeller blades, stress concentration at shallow shell holes, thermoelasticity, etc
19 p3435 A69-35841

Von Karman equations for large deflection of simply supported square plates solved using dynamic relaxation method, recommending optimum mesh spacing
20 p3619 A69-36938

Vibration absorber incorporating polymer spring/damping elements for attachment to complex main system, noting butyl rubber as effective and convenient damper material
20 p3620 A69-36996

Flexible circular plate in stationary temperature field calculated for stress-strain state using perturbations method
21 p3835 A69-38830

Dynamic behavior of infinitely long cylindrical shells of ideally rigid plastic materials strengthened with ring ribs, determining distribution of moments and displacements
21 p3837 A69-39156

Numerical procedure for structural systems analysis, discussing computer application to hydrodynamic, electric, magnetic, thermodynamic, elastostatic and elastodynamic problems
[AIAA PAPER 67-955] 21 p3839 A69-39216

Field transfer matrices for simultaneous treatment of free and forced vibrations and buckling through axially loaded Timoshenko beam
23 p4234 A69-42400

Dynamic uniaxial tensile stress-strain data obtained at high rates by measuring kinematics of symmetrically expanding thin ring specimens
24 p4330 A69-42735

DYNAMIC TESTS

Rotary derivatives of aerodynamic forces and moments in subsonic and supersonic flow, emphasizing kinematic and dynamic oscillations
21 p3647 A69-38733

Bicycle ergometer combined with induction clutch, investigating effect of eccentric dynamic work with arms and legs
21 p3663 A69-38902

Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package
[AIAA PAPER 69-849] 21 p3765 A69-39424

DYNAMICS

Variational principles of dynamic shell theory using Legendre transform for relations and boundary conditions of Timoshenko theory
01 p0166 A69-10262

Dynamic systems with impact interactions and nonlinear oscillation theory
16 p2875 A69-32295

Amplitude maxima for nonstationary oscillations of dynamic system with multiple degrees of freedom
16 p2876 A69-32296

Finite element discretization technique extended to time dependent processes emphasizing dynamics and heat conduction, discussing applications to aircraft transient response
20 p3575 A69-37204

Soviet collection of papers on static and dynamic problems in elasticity and plasticity theory covering plates, shells, beams, etc
22 p4038 A69-39911

DYNAMO THEORY

Earth magnetic field variations, discussing source of field, dynamo theory and paleomagnetic evidence for polarity reversals
03 p0420 A69-12935

Exact solutions with helical symmetry for hydromagnetic dynamo problem steady state equations
03 p0476 A69-13380

Reversals of earth magnetic field, discussing lavas, deep sea sediments, ocean floor magnetic pattern and dynamo theory
04 p0593 A69-15075

Magnetic field generation by dynamo action of liquid planetary cores, discussing evidence against magnetism around Mercury, Venus, Mars and Jupiter
07 p1210 A69-18371

F 2 layer drift relation to current systems of dynamo confirmed at middle and high latitudes
10 p1682 A69-23611

Sun-like alternating field generators, discussing dynamo theory of stellar and planetary magnetic fields based on nonmirror symmetrical turbulent motion in conducting fluid
10 p1782 A69-23703

Dynamo action produced magnetospheric currents in ionosphere computable without knowing real horizontal ionospheric current system
10 p1685 A69-23836

Geomagnetic field daily variations, discussing observational techniques, observation analysis, S-field seasonal changes, equatorial electrojet, solar wind effects, dynamo theory, etc
12 p0277 A69-27143

Upper atmospheric winds to produce solar quiet day magnetic variations based on dynamo theory, illustrating solenoidal, irrotational and mixed winds
16 p2782 A69-32460

Dynamo action origin of stellar and planetary magnetic fields, considering turbulent helical motions of H convection zone of sun
22 p4011 A69-39998

Homogeneous dynamo in cylindrically symmetric volume with symmetrically moving fluid and large magnetic Reynolds number, demonstrating first and second approximations using Braginskii method
22 p3989 A69-40192

Herzenberg geomagnetic dynamo model extensions including rigid rotors calculus, laminated rotors, induction problem and fluid rotors in rigid conductor
22 p3989 A69-40193

Bullard-Gellman dynamo, discussing magnetic field developed as series expansion, truncation levels and convergence
22 p4018 A69-40194

Kinematic dynamo waves, discussing excitation and maintenance of magnetic field by assumed motion of uniformly conducting fluid using small parameter and numerical methods
22 p3989 A69-40195

MHD dynamo construction with emphasis on fluid motion effect on magnetic field, considering spatially periodic dynamo derivation from kinematic considerations
22 p3989 A69-40196

Horizontally flowing eddies or Rossby waves in solar convection zone and photosphere, giving mathematical models showing hydromagnetic dynamo effects inducing reversing magnetic fields
22 p4019 A69-40294

Galactic field augmentation by dynamo action from highly condensed objects, considering Crab Nebula field production by central body
22 p4035 A69-41207

Solar quiet and lunar electric current systems deduced from geomagnetic data, discussing electrical conductivities and wind models in dynamo region
23 p4160 A69-42427

DYNAMOMETERS

ONERA vertical bench for dynamometric calibration to 20 tons used for engine and rocket thrust measurement
07 p1116 A69-19217

High temperature vacuum tensile test device for continuously direct recording various stress-strain diagram rates by interchangeable dynamometer scale
07 p1117 A69-19319

Dynamometer based on electrical capacitance change in sensor element, discussing working range, circuit diagram and mechanical design
11 p1887 A69-25207

DYNODES

Collection efficiency of continuous dynode electron multiplier arrays, discussing incident electron current
06 p0897 A69-17699

Temperature effect on amplification factor of box type dynode system of photoelectron multipliers made of alloy AMGK, using single electron method
11 p1846 A69-24626

DYSPROSIUM

Magnetic ordering in dysprosium phosphate observed by high resolution spectral line intensity measurements, finding Neel temperature
21 p3773 A69-38331

E

E REGION

NT E-2 LAYER
NT SPORADIC E LAYER

Vertical wind profiles and electron density profiles in E region, determining time dependence and ionization drift velocity
01 p0072 A69-11172

Linearized perturbation treatment developed for photochemical and dynamical effects in gravity wave production of E-region ionospheric irregularities, including ion convergence
01 p0073 A69-11175

Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values
02 p0239 A69-11682

E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods
02 p0239 A69-11683

Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
02 p0239 A69-11686

Algorithm for N/h ionospheric profiles calculations using both x and o magnetoeionic components, taking into account interlayer and underlying ionization influence
02 p0239 A69-11687

Phase path variations at three closely spaced points, measuring horizontal drifts at E region level, investigating time shift variability in spaced fading records
03 p0421 A69-13329

Horizontal drifts at E region level measured in India by spaced phase path technique
03 p0421 A69-13330

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
03 p0394 A69-13378

Nighttime E layer mean variations noting critical frequencies, electron density and seasonal and solar activity effects at sunset, midnight and sunrise
03 p0398 A69-13899

Rocket measured profiles of electron density and ion abundances in E region, discussing role of minor atmospheric constituents
05 p0757 A69-16408

Variation in critical E layer frequencies at large solar zenith angles
06 p0921 A69-17748

Formation dynamics of thin sporadic layers of E region, determining maximum ionization and electron concentration and electron-neutral atoms collision frequency
06 p0922 A69-17751

Approximation formulas of Appleton-Hartree equations for nighttime medium wave frequency absorption in E region of ionosphere, discussing electron density
07 p1122 A69-18295

Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation
07 p1204 A69-18823

Model of auroral backscatter from E region including ionospheric refraction, comparing computations to experimental HF auroral backscatter data for aspect sensitivity
09 p1488 A69-21700

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963
09 p1490 A69-21771

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse
09 p1490 A69-21772

Rocket sounding data on ionospheric currents at mid and low latitudes, showing absence in D and above E region
10 p1686 A69-23909

Reversible ion heating by atmospheric tides, noting radar Thomson scatter observations of E region ion temperature height profiles
11 p1879 A69-25159

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations
11 p1950 A69-25160

Pulsed radio waves for measuring phase height in E

- region, showing short period fluctuations
12 p2066 A69-26111
- E region radio waves triple splitting observed in probe ionograms, analyzing diurnal and seasonal variations in Z component reflections occurrence
12 p2031 A69-26686
- Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts
13 p2254 A69-28333
- E layer fine scale structure, F1 reactions and F2 reflected signals analysis during 20 May 1966 solar eclipse
13 p2255 A69-28541
- Seasonal variations in thickness of ionospheric E-F interlayer region during daylight and maximum integral ionization values
13 p2257 A69-28713
- E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods
13 p2258 A69-28714
- Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
13 p2258 A69-28717
- Algorithm for N/h ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence
13 p2258 A69-28718
- Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
14 p2410 A69-28829
- Ion chemistry of D and E regions to be studied during years of solar maximum in framework of IQSY/IUCSTP
14 p2439 A69-29111
- Rocket measured electron densities of nighttime auroral E region over Canada at different magnetic activity levels, noting frequency and plasma density relations
14 p2439 A69-29117
- Linearized perturbation for photochemical and dynamical effects in internal atmospheric gravity wave production of E region ionospheric irregularities
14 p2440 A69-29128
- Solar X rays intensity and spectrum effects on e layer critical frequency and D region ionospheric absorption
15 p2677 A69-31346
- RF mass spectrometric measurements of diurnal variation of thermosphere and ionospheric E and F regions composition, noting oxygen concentration
15 p2601 A69-31371
- E region ionization redistribution by neutral winds, comparing calculated vertical drift velocities to observed electron density profiles
15 p2677 A69-31395
- Atmospheric temperature and vertical gradient in E region based on measured instantaneous wind profiles
15 p2603 A69-31399
- Electron cooling rates due to vibrational excitation of molecular oxygen calculated as function of electron temperature in E region
16 p2774 A69-31982
- Correlation between F region electrons vertical motion velocity variations and E region electrons horizontal motions in equatorial ionosphere
16 p2779 A69-32193
- Meteoritic elements ionization and loss mechanisms in E region, discussing roles of atomic oxygen and metal ions chemical reactions
16 p2780 A69-32313
- Atomic oxygen density role in ionospheric E and F region magnetic stability, noting heat loss effect of atomic excitation
16 p2780 A69-32314
- E region horizontal drift measurements at Ahmedabad from 1956 to 1966, noting solar activity and seasonal influences
17 p2962 A69-33678
- E layer inhomogeneities analysis concerning drift, chaotic processes, statistical parameters and reliability of data processing
17 p2962 A69-33896
- Ionospheric processes associated with changes in polar aurora height, noting glow in E layer and soft electron emission into earth atmosphere
17 p2964 A69-33957
- Kinesonde radio sounding system for three dimensional ground observations of E region microstructure and vertical motion of neutral air and ions
18 p3125 A69-34250
- Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover
18 p3127 A69-34800
- Noctilucent cloud layer spectral brightness and transparency in E region determined from transhorizon rocket observations
18 p3130 A69-35148
- Reactions determining ion composition in E region, discussing neutral composition variations from day to night and during solar activity cycles
20 p3520 A69-37031
- Small scale inhomogeneities motions in E and sporadic E layers, processing data with method of full correlation analysis and statistical method
20 p3528 A69-37683
- Vertically moving disturbances relationship to behavior of E and F layers over Tiflis, noting sporadic E layers formation
20 p3528 A69-37685
- Rocket observations of ionospheric E layer winds using Na release method
20 p3529 A69-37796
- Lower E region field-aligned plasma instability arising from neutral wind driving ionization across magnetic field
20 p3534 A69-38091
- Vertical neutral wind measurements in lower E region with wavelike spatial structure, noting vertical shear role in ionosphere dynamics
21 p3703 A69-38363
- Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods
21 p3672 A69-38558
- Magnetic activity effects on horizontal drifts, anisotropy and random change characteristics of E region ionization irregularities
21 p3715 A69-38561
- Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models
23 p4160 A69-42428
- Ionization irregularities in equatorial E region observed in various scale sized by rocket-borne Langmuir and plasma-noise probes
23 p4160 A69-42430
- E-2 LAYER**
Ionization index, electron formation and effective recombination coefficient in E2 layer, noting solar activity effect
06 p0920 A69-17725
- Time-space variations in occurrence probability of ionospheric E-2 layer during solar activity maximum and minimum
20 p3527 A69-37672
- E-2 AIRCRAFT**
Avionics of Naval E-2C airborne sentry and command and control system, discussing digital computer, search radar, etc
18 p3108 A69-34811
- EAR**
NT COCHLEA
NT CORTI ORGAN
NT LABYRINTH
NT MIDDLE EAR
NT SEMICIRCULAR CANALS
NT VESTIBULES
Barotrauma during hyperbaric oxygenation at flight descent or reentry into caisson, including ear trauma symptoms and use of paracetesis
17 p2911 A69-33776
- Human ear frequency discrimination, discussing nonlinear functional modeling systems
18 p3097 A69-35440
- Distortion processes in ear, discussing sound pressure level/SPL measurements in rigid-walled couplers
23 p4085 A69-41573
- Stimulus correlated with neuronal discharge periodicities in colliculus inferior, deriving structure models, discussing acoustic channel below geniculatum mediale
23 p4096 A69-42089
- EAR PRESSURE TEST**
Rapid decompression and recompression in stapelotomized cat, noting fibrous tissue response in middle ear at reconstructions utilizing polyethylene struts on gelfoam
14 p2406 A69-29292
- EARLY BIRD SATELLITES**
Fucino earth station operation with Early Bird and Intelsat 2-F3 satellites receiving equipment and transmission system
[UN PAPER 68-95455] 01 p0028 A69-10493
- Attitude determination and hydrogen peroxide control system for spacecraft orientation in Syncom, Early Bird and ATS
[AIAA PAPER 67-532] 09 p1610 A69-21988
- EARLY STARS**
NT PROTOSTARS
NT T TAURI STARS
Relative proper motion of blue star in field of pulsar CP 1919 determined from photographic data analysis
01 p0149 A69-10270
- Hydrogen line profiles in various early stars compared with profiles predicted from model atmosphere calculations for rotating and nonrotating early stars
01 p0154 A69-10876
- Radio signals from hydroxyl radicals by maser action in early stars, noting emission magnitude and intensity spectrum dissimilarity at different frequencies
02 p3234 A69-12493
- Hydrogen alpha line strength in 951 O, B and early A stars from narrow band photoelectric measurements for stellar luminosity
03 p0511 A69-13435
- Rotational velocity correlation to space velocity for early stars, suggesting attainment of spin momentum and space velocity during close encounter in small cluster
06 p1010 A69-17972
- Three color photoelectric observations of stars near Orion Nebula, discussing gravitational contraction stars and color magnitude diagram
08 p1384 A69-20055
- Chemical composition of atmospheres of oldest Galactic stars, considering element abundances, metal and helium content and nuclear activity of massive stars
08 p1402 A69-20909
- Spectrum analysis for early B type star Barnard 29 in M13 globular cluster
09 p1599 A69-22193
- Distance of bright stars in Cepheus OB2 region by MK spectral classification and UVB photometry, noting early main sequence and supergiant stars
09 p1599 A69-22194
- Element abundances of sharp lined field early A stars using model atmosphere
09 p1600 A69-22198
- Early type stars spectrophotometric parameters, discussing hydrogen beta, gamma and delta line widths, magnitude, etc
10 p1777 A69-23387
- Early F stars Li/Be abundance ratios estimation from change in solar Be abundance, discussing stellar Li isotopes ratios
10 p1785 A69-24099
- Nongray models of atmospheres of early stars, giving Avrett-Krook method of correcting temperature distribution
11 p1954 A69-24361
- Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud
12 p2152 A69-25802
- Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
12 p2153 A69-25812
- Spheroidal galaxies with early type spectra distinguished by UV continuum, discussing telescopic spectral and color observations
12 p2159 A69-26663
- Surface gravities and detection of metallic line early A stars from spectral classification using equivalent line widths
12 p2171 A69-27151
- High dispersion classification of early K2-M6 giants of high and low velocity, using titanium oxide band strengths criteria tested by atomic lines estimation
13 p2338 A69-27556
- Interstellar absorption and spatial distribution in northern Aquila with absence of early O-B2 stars, including luminosity function
15 p2683 A69-30513
- Carbon stars in south galactic pole region detected in objective prism survey, including variable R Scl and early R stars
16 p2860 A69-32322
- Photodestruction rate of H molecules by absorption of Lyman or Weber band radiation in interstellar space calculated at various distances from early stars
18 p3204 A69-35351
- Stars of spectral class F2 and earlier, brighter than magnitude 11.5, found in four regions of intermediate galactic latitude
20 p3612 A69-38162

EARLY WARNING SYSTEMS

- Finding list of spectral type A7 stars and earlier in region at south galactic pole compiled from prism survey data 22 p4021 A69-40436
- Rocket measurement of far UV spectral intensity of theta Orionis for far UV interstellar extinction law in Orion nebula region 22 p4030 A69-40770

EARLY WARNING SYSTEMS NT BALLISTIC MISSILE EARLY WARNING SYSTEM

- Clutter rejection using coded burst waveform for airborne early warning /AEW/ and airborne attack type radars 03 p0388 A69-13185
- Mechanical, electromagnetic and chemical signatures monitoring and analysis during system operation 06 p0932 A69-17875

EARTH [PLANET]

- Mass functions of real earth derived from satellite orbital perturbations [UN PAPER 68-95385] 01 p0064 A69-10460
- Soviet book on dynamics of radiation belts of earth covering theories concerning magnetosphere, magnetic fields and plasma and electromagnetic pulsations 02 p0307 A69-11799
- World maps highlighting differences in geomagnetic field at conjugate localities 02 p0245 A69-12737
- Kepler third law application to radar determinations of astronomical unit of length in general relativity 04 p0657 A69-14698
- Earth and planets shallow seas tidal dissipation reflected in Q values, noting larger planet pressure effect 08 p1393 A69-20581
- Chemical abundances in planetary atmospheres based on spectroscopic determinations, considering terrestrial and Jovian planets 08 p1406 A69-20934
- Rare earths relative and absolute terrestrial abundances in shales, basalts, rhyolites and granites 08 p1310 A69-20942
- Earth ellipsoid fundamental parameters for calculation of earth flattening and normal acceleration due to gravity 09 p1487 A69-21633
- Two fixed centers with force function approximating earth gravitational potential, deducing formula for gravity distribution at level surface 11 p1952 A69-24254
- Monograph on world of planets covering solar planetary system, atmospheres, water, seasons, organic life, etc 11 p1958 A69-24666
- Meteorology and space vehicle capabilities noting earth, outer space and earth atmosphere observations and measurements, relaying telecommunication signals, etc 12 p2126 A69-26126
- Earth center of mass determination from simultaneous satellite observations by photography or laser radar 12 p2068 A69-26425
- Earth contamination by returned lunar or Martian material, discussing extraterrestrial biota survival on earth 13 p2210 A69-28467
- Diurnal hemisphere auroras assuming origins in magnetosphere tail with pressure responsible for tail formation, discussing tentative model and implications 13 p2256 A69-28654
- Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth 14 p2438 A69-29081
- Catastrophic and noncatastrophic alternatives for earth capture of moon, discussing tidal action and spin-orbit resonance 18 p3198 A69-34823
- Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite 18 p3199 A69-34941
- Earth bow shock electrical conductivity estimation from macroscopic equations without knowing microscopic dissipation processes 18 p3131 A69-35191
- Book on wave propagation around earth covering intermedia passage, terrain influence, diffraction zones, ground waves, roles of atmosphere, troposphere and ionosphere, etc 19 p3275 A69-36382

Mercury and Venus thermal histories based on analogy to earth models 20 p3597 A69-37333

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured 20 p3603 A69-37559

Paleontological evidence to verify varying G constant hypothesis for expanding earth theory, discussing uncertainties of geological dating 22 p4017 A69-40177

Dirac hypothesis on varying G constant considered in formulating earth expansion theory without resorting to Ramsey hypothesis 22 p4018 A69-40178

Observations indicating slow earth expansion 22 p4018 A69-40179

Earth gravitational potential energy changes in examining expanding earth theory 22 p3936 A69-40180

Paleogeographical evolution in support of earth expansion, discussing polar wandering, global continental drift and final complete disruption 22 p3936 A69-40181

Venus and Mercury diurnal period commensurability associated with Venus spin-orbit resonance with earth orbit 22 p4018 A69-40270

Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model 23 p4215 A69-41896

Density model for free oscillations of earth, noting dependence on core radius and S wave velocity at top and bottom of D layer 23 p4158 A69-42117

Design criteria for antenna control equipment for earth tracking from landing site on Martian surface [AIAA PAPER 68-868] 24 p4348 A69-43246

EARTH ALBEDO

- Surface radiation balance measurements in India during IQSY, discussing diurnal, seasonal and spatial variations of net radiation 02 p0307 A69-11820
- Aircraft measurements of stratus cloud absorption and albedo and earth surface albedo 04 p0627 A69-14914
- Meteorological satellites observation of energy exchange between earth and space, discussing planetary albedo, energy absorption and source and sink regions 07 p1127 A69-19261
- Albedo over Antarctic, measuring solar radiation reflected by surface and atmosphere by Eppley radiometer 09 p1484 A69-21404
- Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors 10 p1689 A69-23969
- Night airglow variations observed during Cosmos 92 satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies 14 p2435 A69-29042
- Earth reflected solar radiation spatial, angular and spectral distributions measured by telephotometers on-board Cosmos 149 15 p2596 A69-30650
- Earth albedo instrument on OSO 3 spacecraft to measure solar reflectance of earth at various wavelengths 15 p2614 A69-31279
- Earth reflected radiation pressure and perturbing effect on satellites 15 p2599 A69-31324
- Earth-reflected solar energy /albedo energy/ distribution model, assuming isotropic scattering by homogeneous atmosphere [AIAA PAPER 69-591] 17 p2961 A69-33292
- Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover 18 p3127 A69-34800
- Earth albedo in lower latitudes measured by satellites and surface stations, comparing solar energy absorption by oceans and atmosphere 20 p3591 A69-38058
- Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors 21 p3717 A69-39655

Reentrant albedo flux and singly charged particles directional asymmetry in upper atmosphere estimated from oriented telescope observations over Hyderabad 22 p4005 A69-40519

EARTH ATMOSPHERE

NT UPPER ATMOSPHERE
NT UPPER IONOSPHERE

Meteorological rocket soundings and global synoptic observations, noting influence of atmospheric middle region [UN PAPER 68-95405] 01 p0109 A69-10484

Atmospheric optics - Conference, Pulkovo, U.S.S.R., November-December 1965 and December 1966 01 p0073 A69-11181

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability 01 p0074 A69-11185

Atmospheric transmission factor and optical stability determination by photometer, estimating error due to solar aureole 01 p0075 A69-11193

Helium isotopes escape mechanism from earth atmosphere related to polar wind ionospheric plasma flow from earth 01 p0077 A69-11240

Earth atmosphere air density and temperature profiles from drag acceleration measurements in falling sphere experiment 02 p0251 A69-12809

Radio waves diffraction around earth with atmospheric dielectric constant having linearly quadratic height dependence 03 p0399 A69-14130

Atmospheric, geomagnetic and interplanetary effects on cosmic ray flow, noting anisotropy and diurnal variation phase and amplitude averages 04 p0649 A69-14683

Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves 05 p0754 A69-16261

General atmospheric circulation characteristics estimation for earth, Mars, Venus and Mercury based on thermodynamic and hydrodynamic laws 05 p0828 A69-16635

Meteorological satellite TV data of earth cloud cover for determining atmosphere pressure field [UN PAPER 68-95654] 06 p0949 A69-17052

Solar neutron production and propagation to earth, discussing particle detectors 06 p0989 A69-17281

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude 06 p0887 A69-17450

Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions 06 p0919 A69-17617

Terrestrial and Martian aerosols estimation based on carbon dioxide spectral and Mariner 4 RF occultation measurements [AIAA PAPER 69-52] 06 p1011 A69-18199

Terrestrial and Cytherean atmospheres evolution based on gray atmosphere model, surface energy budget and partition of water and carbon dioxide 07 p1213 A69-18608

Meteorological satellites observation of energy exchange between earth and space, discussing planetary albedo, energy absorption and source and sink regions

07 p1127 A69-19261

Mars and Earth atmospheric carbon dioxide simulation and spectroscopic measurement for developing planetary surface pressure estimating procedures from IR transmission measurements

08 p1354 A69-20151

Carbon dioxide pressure in earth atmosphere through geologic time determined by carbon input rate and transfer efficiency to crust

08 p1310 A69-20946

Aircraft measurements of earth atmosphere radiance in 8-14 micron window compared to calculated values as functions of altitude

08 p1311 A69-21094

Mars and Venus atmospheric properties, noting influence of biosphere and human activity on earth atmosphere

08 p1408 A69-21160

Photochemical production of reduced organic compounds of C and N in primitive earth atmosphere

09 p1444 A69-21465

Spin stabilized spherical satellite in high elliptical orbit for lower thermosphere measurements during entire solar cycle

09 p1610 A69-22009

Chemical composition of Venusian atmosphere by Mariner and Venera satellites, comparing upper atmospheres of Venus and earth

11 p1960 A69-24971

Meteorology and space vehicle capabilities noting earth, outer space and earth atmosphere observations and measurements, relaying telecommunication signals, etc

12 p2126 A69-26126

External perturbation effects of near earth environment on dynamics and attitude of slowly spinning multibody satellite

[AIAA PAPER 68-856]

12 p2174 A69-26795

Book on earth atmosphere and outer space influence on human physiology for life support systems design

12 p2024 A69-27074

Atmospheric electricity and space charges ionization and equilibrium in earth atmosphere, discussing electric fields in lower atmosphere, ionosphere and magnetosphere

12 p2076 A69-27105

Rocket grenade measurements of earth atmosphere, finding lowest temperature in Alaska

13 p2255 A69-28637

General atmospheric circulation characteristics estimation for earth, Mars, Venus and Mercury based on thermodynamic and hydrodynamic laws

14 p2516 A69-28791

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field

14 p2438 A69-29082

Q switched ruby laser designed for lidar probing of cosmic bodies and earth atmosphere

14 p2460 A69-29660

Soviet collection of articles on atmospheric optics

15 p2646 A69-30159

Synoptic meteorological conditions effect on stellar images vibration and on relationship between vibration and zenith distance

15 p2647 A69-30164

Atmospheric hydrogen and helium atoms emission in geomagnetic poles and winter hemisphere, comparing thermal dissipation and migration of light atoms

15 p2599 A69-31322

Cloud distribution effect on global coverage of remote radiometric sounding of atmosphere, considering Nimbus 1 and 2 data

15 p2650 A69-31335

Balmer alpha emission for abundance and distribution of hydrogen around earth, relating temporal variations to azimuth

15 p2700 A69-31437

Transmission of Alfvén waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification

16 p2777 A69-32099

Direct wind measurement and momentum transport estimates obtained from cyclones and anticyclones daily displacements over Northern Hemisphere, applying results to planetary atmospheres

16 p2780 A69-32306

Light polarization diffusely reflected by earth atmosphere measured from balloon, using gain compensated photoelectric polarimeter

16 p2781 A69-32320

Earth atmosphere effect on cosmic ray variations, considering relation between extensive air showers and cosmic ray spectrum

16 p2851 A69-32381

Equatorial and polar semidiurnal oscillations in earth atmospheric tides related to inertial oscillations originating in autobarotropic field

17 p2996 A69-32862

Planetary zonal flows hydrodynamic instability characteristics analysis, using quasi-geostrophic numerical model to study earth atmospheric cyclone wave role

17 p2960 A69-33149

Limb darkening on earth night side observed by Aerobee rocket, with explanation based on atmospheric opacity in water vapor and carbon dioxide bands

17 p2960 A69-33167

Planetary atmospheres origin, discussing earth formation by planetesimals accumulation and similarity to Mars and Venus, volatiles in outer planets, etc

17 p3033 A69-33369

Earth ecosystem chemical composition compared with Mars and Venus ecosystems to determine presence of life

18 p3193 A69-34361

Earth atmospheric large scale motion simulated in laboratory and by numerical technique

18 p3127 A69-34668

Fourier transform laboratory spectroscopy for absorption near earth atmosphere millimeter wave spectrum, discussing integrated absorption strength and dimeric effect

18 p3177 A69-35240

Predictability of deterministic fluid systems with many scales of motion using vorticity equation for two dimensional incompressible flow, noting application to earth atmosphere

19 p3303 A69-36404

Shock wave parameters from meteoric body moving at high supersonic speeds through atmosphere, calculating specific heat ratio

19 p3428 A69-36841

Rare gas distribution in earth atmosphere explained as outgassing from primordial solid particles, discussing stony meteorites composition

20 p3600 A69-37489

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude

20 p3496 A69-37935

Soviet book on shock waves propagated by meteorite intrusion into earth atmosphere, covering interaction with earth surface, Tungusk meteorite, etc

20 p3613 A69-38205

Automatic planetary electrophotometer designed for earth atmosphere and lunar photometry, noting operational data

20 p3547 A69-38310

Angular dependence of ocean surface-cloudless atmosphere reflectance for solar radiation studied with digitized camera signals from ATS 1 satellite

21 p3704 A69-38372

Earth atmospheric density measurement by microwave radio occultation techniques, transmitting coherent radio signal to repeater spacecraft from master station

21 p3705 A69-38375

Microwave refraction method for satellite horizontal probing of earth atmosphere, discussing phase delay data inversion, air density and intersatellite relative velocity

21 p3671 A69-38376

Helium in atmosphere, aurora and solar wind, discussing geophysical problems, interplanetary neutral H, etc

21 p3710 A69-38509

Atmospheric and hydrospheric evolution on primitive earth from geological point of view

21 p3806 A69-39290

Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum

[AIAA PAPER 69-869]

21 p3763 A69-39395

Soviet book on earth atmosphere fluctuations covering propagation of acoustic, gravity and gyroscopic waves using linearized equations of hydrodynamics

21 p3717 A69-39528

Martian atmosphere circulation compared to terrestrial, considering absence of oceans, radiative coupling and planetary scale motions

21 p3814 A69-39569

Antimatter motion in solar system and earth atmosphere, discussing vaporization and annihilation energy in collisions with interplanetary gas atoms

22 p4034 A69-41100

Acoustic gravity waves propagation over spherical earth with isothermal windless atmosphere, determining pressure perturbations

23 p4158 A69-42175

Orographic inhomogeneities of underlying surfaces for radiating atmospheric waves formation, deriving formulas for plane stable atmosphere

23 p4185 A69-42492

Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence

24 p4346 A69-43154

EARTH CORE

Electromagnetic induction theory for spherical earth model involving conducting core with radial conductivity variation and concentric nonconducting mantle

03 p0423 A69-13523

Ponderomotoric forces and irregularities in earth rotation, considering core and lower mantle as closed system with respect to periodic electromagnetic and mechanical effects

09 p1487 A69-21636

Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity

13 p2253 A69-27821

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role

14 p2436 A69-29061

Geomagnetic field westward drift related to earth core rotation from calculating drift at earth surface and at core

16 p2774 A69-31983

Silicon in iron meteorites and earth core determined by activation analysis on octahedrites, hexahedrites and ataxites

16 p2865 A69-32807

Earth core conductivity effects on ionospheric shielding against geomagnetic changes from external sources, noting earth-ionosphere coupling

17 p2959 A69-32925

Fluid velocities at earth core surface inferred from magnetic data, considering velocity constraints and diffusion contributions to secular change

18 p3129 A69-34951

Ponderomotoric forces and sudden irregularities in earth rotation, discussing core-mantle electromagnetic coupling and toroidal field induction effects

19 p3302 A69-35769

Earth early thermal history with core formation before emplacement of earliest known rock possessing remanent magnetism

22 p3936 A69-40136

Book on geomagnetic quadrupole field temporal changes and effects on earth rotation, covering physical parameters in earth interior and earth conductivity model correlations

22 p3937 A69-40423

MHD disturbances in earth core produced by sudden introduction of magnetic dipole with axis positioned perpendicular to earth mantle and toroidal excitation fields

23 p4158 A69-42176

EARTH CRUST

Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition

06 p1000 A69-17006

Gold and iridium concentrations in meteoritic and terrestrial materials by neutron activation, discussing chondrules, meteoritic troilite and metallic spherules

08 p1404 A69-20918

Composition of continental crust based on material balance and rare earth estimates of shales, discussing ocean floor and mantle derived rocks

08 p1309 A69-20939

Statistical distribution of chemical elements average abundances in earth crust and meteorites and nucleosynthesis of elements under specific astral conditions

08 p1310 A69-20941

Earth crust transition elements distribution and abundance compared to rare earths

08 p1310 A69-20943

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle

09 p1487 A69-21554

Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks

11 p1879 A69-25405

EARTH CURRENTS

- Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle 16 p2784 A69-32549
- Collection of papers on earth crust and upper mantle covering thermal history, oceanic heat flow, mass anomalies, gravitational variations, etc 21 p3717 A69-39731
- Variations in gravity, plotting results for U.S., with tables for Alaska, Mexico, India, Africa, etc 21 p3718 A69-39735
- Precambrian crustal geotectonic evidence of earth radius expansion based on dated orogenic fold belts distribution 22 p3936 A69-40182
- Airborne electromagnetic systems measuring complex dielectric constant in earth crust for mineral and water resources exploration [RAES PAPER 8] 22 p3946 A69-40481
- ## EARTH CURRENTS
- ### U TELLURIC CURRENTS
- ## EARTH FIGURE
- ### U GEODESY
- ## EARTH HYDROSPHERE
- Epochs in atmospheric circulation development over Northern Hemisphere, emphasizing solar activity roles in epochs appearances 14 p2478 A69-29837
- Ocean and atmospheric interactions analyzed by using hydrodynamic equations for boundary layers 14 p2442 A69-29838
- Atmospheric and hydrospheric evolution on primitive earth from geological point of view 21 p3806 A69-39290
- ## EARTH MANTLE
- Electromagnetic induction theory for spherical earth model involving conducting core with radial conductivity variation and concentric nonconducting mantle 03 p0423 A69-13523
- Velocity distribution in lower mantle, showing second major discontinuity in P wave travel time curve at 24 degrees 07 p1129 A69-19502
- Electrical conductivity in interior of earth stressing electromagnetic induction method, discussing mantle conductivity distribution value 08 p1306 A69-19825
- Magnesium silicate crystal structure, discussing transformations under high pressure, crystallochemistry and implications for physics of earth mantle 08 p1267 A69-19904
- Composition of continental crust based on material balance and rare earth estimates of shales, discussing ocean floor and mantle derived rocks 08 p1309 A69-20939
- Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle 09 p1487 A69-21554
- Ponderomotive forces and irregularities in earth rotation, considering core and lower mantle as closed system with respect to periodic electromagnetic and mechanical effects 09 p1487 A69-21636
- Earth upper mantle wave velocity structure based on surface wave dispersion, noting low velocity layers thickness 09 p1491 A69-22153
- Thermal convection in earth mantle with temperature and pressure dependent viscosity, considering mechanisms for fluid-like mantle 10 p1682 A69-23412
- Model for perturbations in earth rotation and geomagnetic core-mantle coupling, discussing electromagnetic restoring torque 12 p2077 A69-27110
- Planetary mantles thermal and nonthermal convection model, solving sphere density variations and radial velocity components due to internal time-independent motions 13 p2344 A69-27644
- Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity 13 p2253 A69-27821
- Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle 16 p2784 A69-32549
- Eclogite fractionation role in creation and spreading of suboceanic lithospheric plate, discussing density determination at 100 km depth 18 p3132 A69-35434

- Ponderomotive forces and sudden irregularities in earth rotation, discussing core-mantle electromagnetic coupling and toroidal field induction effects 19 p3302 A69-35769
- Collection of papers on earth crust and upper mantle covering thermal history, oceanic heat flow, mass anomalies, gravitational variations, etc 21 p3717 A69-39731
- Dynamic processes in upper earth mantle, discussing thermal convection currents and stress propagation 22 p3937 A69-40184
- Equation of state measurements of earth materials by shock wave techniques, applying to olivine for earth mantle constitution problem 22 p3937 A69-40188
- ## EARTH-MARS TRAJECTORIES
- Third phase dynamics of planetary approach of earth-Mars journey, computing approach trajectory on two body spacecraft-Mars assumption 11 p1968 A69-25725
- Planetary navigation using spacecraft measurements and Doppler data from earth-based radio tracking, determining accuracy for earth-Mars trajectory 19 p3368 A69-35791
- Abort capability mission selection criterion, evaluating energy requirements, Mars flyby and velocity contours [AAS PAPER 68-139] 21 p3805 A69-39209
- ## EARTH-MOON SYSTEM
- Synodic month length variations since late Cambrian, noting paleontological evidence in mollusks and stromatolites and associated geological changes 02 p0241 A69-11807
- Zodiacal light isophotes and near-earth component from relationship between brightness at various geomagnetic latitudes and position of moon 03 p0512 A69-13693
- Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites 05 p0824 A69-16252
- Lunar laser ranging for testing Einstein and Brans-Dicke gravitational theories, discussing pulse transit time and dominant nonNewtonian correction 05 p0825 A69-16362
- Lunar libration clouds, discussing visual observation at small phase angles for estimation of dominant cloud particle size 05 p0827 A69-16527
- Photographic investigation of gegenschein and cloud satellites at L sub 5 earth-moon libration point, noting gegenschein intensity peak 07 p1212 A69-18602
- Perturbing body influence on motion near triangular Lagrangian solutions of restricted elliptical three body problem applied to earth-moon system under solar perturbations 10 p1779 A69-23612
- Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth 14 p2527 A69-29882
- Laser measurements of earth-moon distance applied to determinations of earth axis motion and lunar shape, relief, dimensions and motion 16 p2788 A69-31624
- Apollo 11 moon reflector-laser beam experiment, discussing range changes produced by axial rotation and orbital motion and use for earth-moon dynamics 19 p3339 A69-36766
- Tabulated coherent S-band Doppler data from Pioneer 6 and 7 radio tracking, improving astronomical constants and ephemerides for earth-moon system [AAS PAPER 68-130] 20 p3595 A69-37179
- Hypothetical planet captured by earth, becoming earth satellite /moon/, discussing Mercury orbits peculiarities 20 p3603 A69-37562
- Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease 22 p3960 A69-40190

EARTH-MOON TRAJECTORIES

- Asymptotic solutions of restricted three body problem for one parameter periodic orbits in earth-moon synodic system, determining motion near moon 04 p0663 A69-15382
- Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping 15 p2680 A69-30188

- Numerical analysis of asymptotic solution for earth-moon particle trajectories in idealized restricted three body problem 16 p2857 A69-32155
- Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory 18 p3196 A69-34704

EARTH MOTION

- Earth velocity through 3 K cosmic background radiation, measuring velocity by determining anisotropy of radiation 03 p0511 A69-13475
- Ellipticity of trajectory of free motions of pole of revolution of earth, using harmonic analysis of motion amplitudes and phases 06 p0919 A69-17536
- Earth motion relation to cosmic background radiation excess determined from radiometer study of galactic radiation 17 p3022 A69-32864
- Magnetic fluctuations in various frequency ranges, associated with earth bow shock, detected with search coil magnetometer on OGO 3 22 p3938 A69-40501
- North Pole trajectories and geomagnetic fields assuming motion of earth mantle and interior 22 p3942 A69-41120

EARTH MOVEMENTS

- Spectral peaks for torsional oscillations of earth, estimating free periods from observations at six stations around earth 02 p0243 A69-12007
- Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion 03 p0420 A69-13094
- Thermal convection in earth mantle with temperature and pressure dependent viscosity, considering mechanisms for fluid-like mantle 10 p1682 A69-23412
- Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion 14 p2433 A69-28776
- Earth polar wanderings attributed to rotation axis angular displacements generated by density redistribution on geologic time scale 20 p3535 A69-38192
- Observations indicating slow earth expansion 22 p4018 A69-40179
- Paleogeographical evolution in support of earth expansion, discussing polar wandering, global continental drift and final complete disruption 22 p3936 A69-40181
- Dynamic processes in upper earth mantle, discussing thermal convection currents and stress propagation 22 p3937 A69-40184

EARTH ORBITS

- Errors arising from inaccurate insertion of initial conditions in autonomous determination of coordinates of object moving along surface of spherical earth 02 p0281 A69-12137
- Electric propulsion for payload transfer from low to synchronous orbit of ELDO launch vehicles 03 p0496 A69-13994
- Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware 07 p1083 A69-19124
- Satellite altitude stabilization by gravity gradient capture in earth elliptical orbit, showing effect of increase in damping 10 p1791 A69-22926
- Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model [AIAA PAPER 68-1059] 12 p2174 A69-26797
- Earth TV pictures from Molniya I communication satellite, showing advantages of high orbit over low orbit photography for global weather analysis and forecasting 13 p2292 A69-27729
- Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity 13 p2253 A69-27821
- Earth orbital entry vehicles weight prediction, noting vehicle geometry as function of vehicle shape, hypersonic lift drag ratio and crew size [SAWE PAPER 770] 18 p3208 A69-34876

Earth ellipsoid determination by satellite observations, noting accuracy of polar flattening measurement on basis of perturbation or perigee argument
18 p3131 A69-35195

Geocentric orbital elements determination of lunar particles expelled into space by meteorite impact, using spheres of influence method
18 p3202 A69-35330

Future combined environment space simulation tests duplicating environment interaction encountered during earth orbits, deep space probes and manned flights
19 p3288 A69-35531

Earth orbit estimation by manual stadimeter, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties
19 p3369 A69-35793

Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems
19 p3430 A69-36010

Technology flow for future manned earth orbit and lunar operations and planetary exploration
[AAS PAPER 69-494] 24 p4380 A69-42840

EARTH PLANETARY STRUCTURE

Lunar surface early geologic evolution noting bearing on earth geologic history
[AAS PAPER 68-202] 02 p0312 A69-11478

Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
02 p0240 A69-11699

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
02 p0240 A69-11700

Earth structure model based on million random trials using eigenfrequencies, travel times of shear and compressional waves, mass and moments of inertia
02 p0243 A69-12009

Reversals of earth magnetic field, discussing lavas, deep sea sediments, ocean floor magnetic pattern and dynamo theory
04 p0593 A69-15075

Earth upper mantle wave velocity structure based on surface wave dispersion, noting low velocity layers thickness
09 p1491 A69-22153

Magnetotelluric method for investigating earth vertical structure with allowance for sphericity
13 p2258 A69-28730

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
13 p2258 A69-28731

Comet scintillations and tail characteristics studied to obtain information on interplanetary flux field, magnetic fields and planetary structures
14 p2523 A69-29704

Chemical composition of earth, Venus, Mars, Mercury and moon calculated from mathematical models, constructing approximate equations of state at high pressure
14 p2526 A69-29878

Love wave amplitude data satisfying earth model with intrinsic internal friction at depths assumed due to single thermally activated relaxation
15 p2596 A69-30624

Planetary systems interrelationship with binaries and rotating stars, emphasizing occurrence frequency study based on stellar angular momentum orientation
17 p3032 A69-33105

Mars internal structure and composition modeling, considering core, mantle and temperature via earth analogy and Mariner 4 data
17 p3037 A69-33652

Monte Carlo inversion of seismic body waves for transposing uncertainties of observations to velocity models
17 p2962 A69-33654

Eclogite fractionation role in creation and spreading of suboceanic lithospheric plate, discussing density determination at 100 km depth
18 p3132 A69-35434

Book on thermal processes of earth and moon covering heat generation and transfer, internal temperatures, gravitational energy, etc
19 p3401 A69-35887

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction
19 p3425 A69-36422

Satellite representations of earth gravity field portraying consistent pattern of mass anomalies due to density differences in layers
20 p3523 A69-37566

Planetary interiors from geophysical viewpoint emphasizing earth data
21 p3811 A69-39508

Earth temperature distribution using various models, noting excess of total heat production in interior vs heat flow during planet history
21 p3718 A69-39732

Earth early thermal history with core formation before emplacement of earliest known rock possessing remanent magnetism
22 p3936 A69-40136

Ancient and present earth radii ratios determined by triangulation using paleomagnetic sites situated on different paleomericidians
22 p3937 A69-40183

Geophysical aspects of earth chemical composition, structure and energy balance
22 p4032 A69-40983

North Pole trajectories and geomagnetic fields assuming motion of earth mantle and interior
22 p3942 A69-41120

Terrestrial type planetary evolution from early history and present internal configuration of earth, discussing gravitational energy associated with earth formation
23 p4212 A69-41613

Impedance of inhomogeneous earth from magnetic and electric fields and geomagnetic potential measurements
23 p4157 A69-41867

Model for accumulation of earth and planets from primitive solar nebula, implying inhomogeneous chemical composition of bodies in solar system
24 p4385 A69-43215

EARTH RADIATION

U TERRESTRIAL RADIATION

EARTH RESOURCES

NT COAL
NT CRUDE OIL
NT FARM CROPS
NT FORESTS
NT GRAINS [FOOD]
NT GRANITE
NT LAVA
NT RIVERS
NT ROCKS
NT SANDSTONES
NT SHALES
NT VEGETATION

Integrated landscape analysis with radar imagery for earth resources
15 p2608 A69-30454

Aerospace images information suppressing and enhancing methods to aid interpreter in making more accurate recognition and measurement of earth resources subjects
18 p3133 A69-34338

Satellite IR hyperaltitude imagery for earth resources application, obtaining geological, meteorological and hydrological information
20 p3536 A69-36930

Domestic and international law compared in connection with space program, considering legal aspects of using satellites in discovering and exploiting earth resources
20 p3639 A69-37132

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
21 p3799 A69-38629

Airborne electromagnetic systems measuring complex dielectric constant in earth crust for mineral and water resources exploration
[RAES PAPER 8] 22 p3946 A69-40481

Systems analysis method for determining spacecraft remote sensors earth resources survey effectiveness by integrating specifications, mapping requirements and orbital characteristics
23 p4163 A69-41567

Orbiting vehicles remote sensing of earth resources, discussing instrumentation and accuracy requirements, data management and analysis and effectiveness criteria
24 p4315 A69-43199

EARTH RESOURCES PROGRAM

Earth orbital satellites for geologic applications, discussing Gemini photograph qualities and influence on Earth Resources Observational Satellite program
[UN PAPER 68-95441] 01 p0065 A69-10509

Remote sensors utilization in earth orbital space for discovery, inventory, evaluation, development and conservation of earth natural resources, noting satellite design
[UN PAPER 68-10464] 01 p0065 A69-10532

Book on Demeter-earth resources satellite system covering design, instrumentation, cost estimates, economic benefits and political considerations
01 p0163 A69-11333

European space programs requirements for satellite launch autonomy/independence from U.S. and U.S.S.R., discussing satellite applications for resource surveys, weather forecasting, etc
02 p0335 A69-12682

Agricultural remote sensing information system composed of data acquisition, processing and information extraction and interpretation phases, providing knowledge of earth resources
03 p0400 A69-13195

Application satellites for air traffic control, meteorology and earth resources, considering European participation
03 p0520 A69-13587

Technological base for planning space flight missions to obtain data on earth resources, detailing earth resources technology satellites /ERTS/
05 p0830 A69-15921

Earth resource information from spacecraft including landmapping, geological photographs, hydrological and oceanographic data, etc
06 p0916 A69-16855

TV system producing images with 5000 line resolution, proposing application in Earth Resources Observation Satellite
07 p1131 A69-18552

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study
[SMPT PAPER 105-79] 12 p0277 A69-25767

Space photography for natural resource inventory, describing Gemini photographs role in assessing vegetation, geological, metal and soil resources in Western Hemisphere
12 p2097 A69-26987

Remote sensing technology application to improving range resource inventories, discussing aerial photography, optical, IR and radar scanning, etc
12 p2098 A69-26992

European earth resource satellite systems technology, applications and costs
13 p2356 A69-27833

Earth Resources Technology Satellites design for complete spectrum of frequencies
14 p2453 A69-29952

Satellite and aircraft use compared for earth resource surveys, discussing proposed aircraft data collection system
16 p2881 A69-31632

Manned spacecraft earth resource sensing, discussing advantages and applications in agriculture, forestry, geography, hydrology, oceanography and geology
18 p3208 A69-35058

NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
19 p3312 A69-36259

International organizations and planning for earth observation satellite program involving exploitation in communications, meteorology and aircraft
21 p3855 A69-38622

Orbital images for earth resources satellite mission planning using Mercury, Gemini and Apollo synoptic terrain photographs
21 p3721 A69-38632

Aerial remote sensing data for earth resources program including agricultural, geothermal/ geological tests, hydrological, water pollution and soil and flood water control observations
22 p3949 A69-40994

Earth orbital remote sensing applications to forest and range resources management, discussing conventional aerial photography
[AAS PAPER 69-059] 24 p4307 A69-42823

Earth resources surveys by space flights and plans for future satellites, describing results of EROS and ERTS programs
[AAS PAPER 69-058] 24 p4307 A69-42824

EARTH RESOURCES TECHNOLOGY SATELLITES

Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
12 p2192 A69-26978

Electromagnetic waves as data carriers for earth resources and technology satellite sensors
15 p2607 A69-30231

Satellite and aircraft use compared for earth resource surveys, discussing proposed aircraft data collection system
16 p2881 A69-31632

Earth resource satellites, discussing mapping, land evaluation, geological observation, agricultural and hydrological applications, electromagnetic spectrum information, sensors and photographs
16 p2881 A69-31763

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film
21 p3720 A69-38619

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems
21 p3818 A69-38621

Earth resources technology satellite global survey system carrying multispectral sensors in long life space platform
21 p3720 A69-38623

Earth resources observation technology from satellites, reviewing sensors and methods, electromagnetic spectrum, atmospheric attenuation and windows, passive-active devices
21 p3720 A69-38624

Multispectral radiometric analysis of ERTS images, discussing image registration, SNR and atmospheric and diffraction effects
21 p3721 A69-38627

Earth resources technology satellite /ERTS/ choice regarding local time of ascending node based on cloud cover and IR measurement considerations
21 p3798 A69-38628

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites
21 p3721 A69-38630

Surveying earth resources from space, covering orbital height photography in cartographic programs, hydrologic engineering, pollution control and geology
22 p3936 A69-40170

Earth resources surveys by space flights and plans for future satellites, describing results of EROS and ERTS programs
[AAS PAPER 69-058] 24 p4307 A69-42824

EARTH ROTATION

Atmospheric circulation influence on earth rotation velocity, discussing estimation methods
02 p0236 A69-11641

Synodic month length variations since late Cambrian, noting paleontological evidence in mollusks and stromatolites and associated geological changes
02 p0241 A69-11807

Viscous damping of internal waves on rotating earth, analyzing spatial propagation attenuation in two layer system
02 p0247 A69-12775

Mean tropospheric wind vectors periods compared to annual variations of earth rotation and pole latitude
08 p1309 A69-20854

Conversion of Woollard theory coefficients of tidal irregularity of earth rotation to new system of constants
09 p1484 A69-21383

Ponderomotoric forces and irregularities in earth rotation, considering core and lower mantle as closed system with respect to periodic electromagnetic and mechanical effects
09 p1487 A69-21636

Upper atmosphere rotation perturbation effect on satellite orbit when scale height varies with height, showing inclination reduction
09 p1594 A69-21660

Earth rotation and aircraft speed effects on vertical gyroscopes during banking, obtaining formulas for gyro errors
09 p1498 A69-22107

Atmospheric circulation contribution to velocity variations in earth rotation calculated by force moment method
11 p1952 A69-24258

Earth rotation velocities nonuniformity according to astronomical observation data obtained from Universal Time and atomic time scales comparison
11 p1957 A69-24407

Variable solar activity effect on earth upper atmosphere rotation at altitudes from 200 to 300 km
12 p2069 A69-26442

Model for perturbations in earth rotation and geomagnetic core-mantle coupling, discussing electromagnetic restoring torque
12 p2077 A69-27110

Earth polar coordinates determined from latitude observations, discussing weighting functions for determining polar motion
17 p2959 A69-32869

Conversion of Woollard theory coefficients of tidal irregularity of earth rotation to new system of constants
18 p3127 A69-34771

Ponderomotoric forces and sudden irregularities in earth rotation, discussing core-mantle electromagnetic coupling and toroidal field induction effects
19 p3302 A69-35769

Earth-pole wobble /1951-1966/ by spectral analysis using least square fit method
21 p3716 A69-39244

Book on geomagnetic quadrupole field temporal changes and effects on earth rotation, covering physical parameters in earth interior and earth conductivity model correlations
22 p3937 A69-40423

Earth rotation rate variations connected to longitude variations of continentals time services, noting atmospheric circulation and inertial forces role
22 p4024 A69-40609

Earth rotation velocities nonuniformity according to astronomical observation data obtained from Universal Time and atomic time scales comparison
24 p4391 A69-43797

Ship navigation by altitude and azimuth measurements of artificial earth satellite, discussing position and reference errors and synchronous satellite advantages
[UN PAPER 68-95247] 01 p0112 A69-10461

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field
01 p0161 A69-10585

Soviet artificial earth satellites, discussing Sputnik, Polet, Elektron, Cosmos, Molniya and Vostok series
01 p0162 A69-10937

Earth and lunar magnetic field studies in U.S.S.R., discussing Soviet earth satellite and lunar probe data
01 p0066 A69-10943

French satellites structure, power and communications systems, stabilization and detector groups
02 p0333 A69-11917

Geopotential resonant orbital perturbations of existing satellites, noting high inclination role
03 p0521 A69-13777

Earth resource satellites, discussing world ground station network for data reception and information dissemination and training and research center
[UN PAPER 68-95529] 06 p0917 A69-17067

Solar flare proton radiation effects on earth satellites and solar probes, considering sunspot cycle 20, earth magnetic field shielding and Van Allen radiation belts
12 p2151 A69-26873

Lunar surface and earth early satellite system, discussing maria distribution, satellite impacts and close passage collisions
13 p2345 A69-27654

Artificial earth satellites positional observations by graphical smoothing on azimuth and altitude, discussing advantages for space geodesy
15 p2594 A69-30029

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field
15 p2702 A69-30755

Transit forecast of terrestrial satellite moving through fixed coordinate line in assigned reference
16 p2859 A69-32221

Attitude control system for 625 A-1 research earth satellite, detailing operation and test program
17 p3050 A69-33426

Ground traces of artificial earth satellites with respect to perturbations due to atmospheric drag, earth oblateness and moon and sun as third body
19 p3398 A69-35614

Attitude stabilization of symmetrical nonrotating earth satellite using earth-pointing rotor as gravitational anchor
19 p3429 A69-35914

Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk
19 p3427 A69-36618

Instantaneous and integral solar irradiance of earth oriented satellite surface, noting solar illumination nomogram representation
19 p3432 A69-36629

Earth satellite sweeping mass spectrometer for measuring atmospheric neutral particle and positive ion concentration
19 p3314 A69-36681

Short radio wave damping of earth satellite transmitter due to ionospheric diffraction resulting from increasing satellite-ground station distance
20 p3491 A69-37689

Orbital parameters of short-lived low altitude earth satellites assuming no atmospheric drag, no orbital precession and flat earth condition
21 p3798 A69-38626

Linear multichannel spatial motion control systems for vehicles orbiting in earth atmosphere at supersonic velocities
21 p3766 A69-39645

Optimal control system for earth satellite orbital transfer, using wandering ellipse technique to develop trajectory correction algorithm
21 p3767 A69-39652

Algorithms for close earth satellite orbit calculation developed by numerical integration methods, discussing solution efficiency
[AIAA PAPER 69-948] 22 p4021 A69-40331

Integral electron concentration in column of space between earth satellite and ground determined by integral equation, assessing errors minimization methods
23 p4157 A69-41858

EARTH SHAPE
U GEODESY
EARTH SURFACE

Earth surface shape determinations by geodetic networks connecting ground observation points and satellite positions
[UN PAPER 68-95377] 01 p0065 A69-10528

Terradynamic research program for studying instrumented projectile penetration of terrestrial materials
02 p0228 A69-11767

Earth ionosphere resonator natural frequencies, considering diurnal variation and geomagnetic field eccentricity
03 p0422 A69-13512

Accretion rate of cosmic dust estimation from cosmogenic aluminum-26
03 p0514 A69-13935

Earth surface temperature change quantitative determination due to Milankovitch insolation variations
03 p0426 A69-14232

Lunar craters compared with underground explosion craters on earth, determining criteria for identifying explosion craters on moon
04 p0656 A69-14670

Electromagnetic phase measurement for determining integrated air density near earth surface
04 p0598 A69-14910

Aircraft measurements of stratus cloud absorption and albedo and earth surface albedo
04 p0627 A69-14914

Turbulent transport of energy in atmospheric boundary layer near earth surface resulting from forced convection
04 p0627 A69-15087

Radio wave diffraction by knife edge obstacle on conducting earth surface noting effect on radio propagation
[AFCRL-68-0375] 04 p0560 A69-15216

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations
05 p0763 A69-16054

IR scanning systems of meteorological satellites for detection of clouds and various underlying surfaces, determining detection probability and errors
06 p0952 A69-17986

Radio profilograph designed for integrating aircraft excess altitudes and measured distances between aircraft and earth, discussing block diagram
07 p1132 A69-19006

Exchange coefficient of energy balance of earth surface for propagation studies of entrained atmospheric contaminants
09 p1535 A69-21514

Stereophotogrammetric measurements of smoke columns for wind soundings
09 p1535 A69-21517

Air layer between target and instrument effect on earth surface temperature conducted with airborne radiometers
09 p1536 A69-22166

Secular variations distribution on earth surface, plotting isopor charts from mean annual values of magnetic elements/1960-1965/
10 p1687 A69-23920

Forced convection in atmospheric boundary layer above nonuniformly heated earth surface, noting roles of wind and stratification parameters
12 p2126 A69-26579

Extensive cosmic ray showers structure at sea level, using multiple hodoscopic counters and control system
13 p2332 A69-28405

Sea level fluctuations of electron-photon, muon and active nuclear components of extensive cosmic ray showers determined, obtaining shower parameters
13 p2332 A69-28406

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field
14 p2438 A69-29082

Earth radar studies, relating echo behavior to rocket altitude and surface electrical characteristics
14 p2416 A69-29531

Stellar image vibration dependence on zenith distances and terrain relief determined from stellar traces by 200 mm telescope
15 p2647 A69-30163

Signal reflection elimination from underlying surface during aircraft flights by using two antenna array with identical radiation patterns
15 p2567 A69-30345

Dynamic characteristics of local slope winds, considering thermal and geometrical effects of underlying surfaces
15 p2648 A69-30577

Geomagnetic field westward drift related to earth core rotation from calculating drift at earth surface and at core
16 p2774 A69-31983

VLF radio wave propagation in waveguide channel formed by earth and inhomogeneous anisotropic ionosphere
16 p2751 A69-32032

Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust
[AIAA PAPER 69-589] 17 p2961 A69-33284

Topographic mapping by high altitude jet aircraft photography
18 p3134 A69-34339

Navigation equations, discussing earth geometry, coordinates, gravity, dead reckoning and orbit computations with regard to LORAN
18 p3169 A69-34845

Near and antipodal fields in earth-ionosphere waveguide using mode theory, ray theory, zonal harmonics series and method of images to derive field representations
19 p3283 A69-35931

Altitude asymmetry of instantaneous auroral oval plotted for geomagnetic pole and earth surface
20 p3522 A69-37056

Photogrammetric instruments applied to determination of spatial position of tectonic surfaces by aerial photography
20 p3539 A69-37511

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations
20 p3545 A69-37964

Fe-Ni unmelted and unablated micrometeorites number at earth surface calculated, using space density of interplanetary particles and micrometeoritic theory
20 p3614 A69-38251

Planetary boundary layer top formation, considering particle velocity, earth surface roughness role, geostrophic wind, etc
21 p3715 A69-38566

Molodenskii boundary value problem exact solution by successive approximations for determination of earth figure, noting quasi-geoid surface
21 p3716 A69-39248

Nighttime atmospheric shape analysis created by lightning and propagating in earth lower ionosphere waveguide
22 p3941 A69-40961

Multispectral color aerial photography using broadband spectral filters for detecting and identifying small environmental features of earth surface
22 p3949 A69-40997

Spheroidal disturbances theoretical seismograms on surface of gravitating elastic sphere with homogeneous mantle and liquid core, considering gravity and polar radial stress effects
23 p4158 A69-42020

Mean absolute relative humidity variations above earth surface over various time intervals during cloudless nights, obtaining spatial humidity differences and corresponding extinction coefficients
24 p3436 A69-43158

EATING

Lateral hypothalamic stimulation bound eating motivation in animals, comparing electrical stimulation and hunger elicited eating
17 p2910 A69-33752

EBULLITION
U BOILING

ECCENTRIC ORBITS

Rotational locks for arbitrary eccentricity orbit satellites
19 p3397 A69-35609

Comet observations and orbit determinations, noting eccentricity of comet Thomas
19 p3403 A69-35970

First approximation stability of triangular Lagrange solutions of restricted elliptical three body problem, formulating power series for orbital eccentricity
20 p3575 A69-37318

Recurrence formulas for calculating Fourier expansions in elliptic motion in terms of eccentric and mean anomaly
21 p3807 A69-39342

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit
[AIAA PAPER 69-921] 21 p3821 A69-39351

Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing parameters influence on orbital lifetime with reference to approximate stability criteria
[AIAA PAPER 69-926] 21 p3808 A69-39355

Computer program for eccentric geocentric satellite orbits evolution, discussing atmospheric drag, earth oblateness and solar radiation effects
[AIAA PAPER 69-928] 21 p3808 A69-39357

Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
22 p4033 A69-41086

ECCENTRICITY

Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder
01 p0059 A69-10307

Orbits with small eccentricities and inclinations in generalized problem of two fixed centers, showing osculating elements relationship to intermediate orbit elements
10 p1779 A69-23613

Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle
[ASLE FICFS PREPRINT 15A] 15 p2620 A69-30483

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B] 15 p2620 A69-30484

Exact analytic solution for thermal conductance of two dimensional eccentric constriction in dimensionless numbers
18 p3228 A69-34375

Stability of thin walled eccentrically reinforced cylindrical shell, determining eccentricity influence and critical pressure formula from considerations of Poisson ratio, reinforcement parameters, etc
18 p3216 A69-34576

ECHO PROJECT

Communication satellites development in U.S.S.R., discussing Molniya 1 satellite design and objectives and Echo 2 satellite transmission experiments
01 p0032 A69-10949

ECHO SATELLITES

Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae
14 p2447 A69-29408

ECHO SUPPRESSORS

Line filter compression and positioning of bipolar video pulse trains for conjunctive use with moving target indicator in echo elimination
04 p0558 A69-15071

ECHO 1 SATELLITE

Echo 1 aluminized plastic balloon satellite, discussing radio linkup by reflections, use in geodesy and atmospheric and radiation pressure effects on lifetime
10 p1792 A69-23804

ECHOES

NT ANGELS
NT AURORAL ECHOES
NT CLUTTER
NT LUNAR ECHOES
NT LUNAR RADAR ECHOES
NT RADAR ECHOES
NT RADIO ECHOES
NT SIGNAL REFLECTION
NT SOLAR RADAR ECHOES
NT VENUS RADAR ECHOES

Coulomb collision and microturbulence effect on plasma wave echo, noting echo dependence on perturbations in particle distribution
03 p0474 A69-13144

High order plasma wave echoes formulation and relation to initial perturbations based on Landau solution of initial value problem for Vlasov equation
15 p2661 A69-30926

Photography of laser echoes on satellites, tabulating results
15 p2570 A69-31311

Spatial ion wave echoes emphasizing echo line shape analysis and effects of ion-neutral and ion-ion collisions
16 p2818 A69-31676

Electromagnetic echo generation in collisionless spatially homogeneous plasma dependence on velocity distribution and magnetic interaction
16 p2818 A69-31677

Plasma wave echoes concept extended to transverse electromagnetic wave excitation propagating parallel to external magnetic field
16 p2823 A69-32467

- Earth albedo effect on ionospheric D layer determined from aircraft sounding of E layer echo amplitude above reflecting cloud cover
18 p3127 A69-34800
- Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride
21 p3774 A69-38589
- Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction
21 p3777 A69-38713
- Electromagnetic backscattering by perfectly conducting prolate spheroid, predicting echo signal in resonance region
23 p4115 A69-41584

ECLIPSES

NT LUNAR ECLIPSES

NT SOLAR ECLIPSES

- Book on eclipse phenomena in astronomy covering moon, earth and other planets, occultation, planets transit over sun, influence in radio astronomy, etc
19 p3425 A69-36379

ECLIPSING BINARY STARS

- Empirical relation between B-V color and radiation temperature by observing eclipsing variables undergoing total eclipses
03 p0469 A69-13964
- Photoelectric observations of Aurigae during 1963-1964 eclipse, noting reliability of equipment and effect on observation series
08 p1388 A69-20242
- Radial velocity curve, orbital elements and masses and radii of components of eclipsing binary system 9 Chamaeleontis/BV 430/
08 p1391 A69-20395
- Photoelectric light diagrams for eclipsing binary star
08 p1392 A69-20565
- Spectroscopic residual intensities variation of metallic and hydrogen lines of eclipsing system R Canis Majoris with phase, discussing surrounding gaseous matter
08 p1396 A69-20646
- Russell method application to combined data of both minima of eclipsing binary using electronic computers
08 p1408 A69-21136
- Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm
09 p1588 A69-21363
- Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries
09 p1588 A69-21364
- Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements
09 p1590 A69-21378
- Eclipsing binary AU Puppis studied photoelectrically in yellow and blue light, noting period decrease by 1.3 sec in last 40 years
10 p1774 A69-22968
- Yellow and blue photoelectric observations of eclipsing binary CO Lac
10 p1775 A69-23202
- Photometric over dynamical ellipticity excess attributed to gravitational darkening in eclipsing binaries of W Ursae Maioris type
10 p1776 A69-23217
- Photometric consequences of reflection effect in close binaries, tabulating light curves
10 p1776 A69-23218
- Binary eclipsing visual star systems angular momentum, discussing evolution
10 p1777 A69-23313
- Absolute dimensions of 34 eclipsing variables having both components near main sequence, comparing mass luminosity and mass spectrum to homogeneous model stars
11 p1952 A69-24248
- UBV photometry observations of eclipsing binary AG Persei at Mount Palomar with 51 cm reflector
12 p2156 A69-26220
- Photoelectric and visual minima tabulated for eclipsing binaries, calculating light elements
12 p2160 A69-26853
- Two channel polarimeter capable of eliminating atmospheric scintillation effects used for observation of magnetic stars and eclipsing binary u Herculis
13 p2347 A69-27713
- Eclipsing close binary stars orbital planes spatial position determined from stellar emission polarization
15 p2688 A69-30560
- Nonlinear limb darkening corresponding to nongray stellar atmosphere model applied to light curve for compact eclipsing binary systems
15 p2689 A69-30563

- Spectrographic and photoelectric analyses of F type sharp line eclipsing binary HR 7484, tabulating masses, radii, color indices and absolute magnitudes
15 p2693 A69-30776

- Photoelectric observations program at Astronomical Observatory of Bucharest to determine smallest moments of several eclipsing stars
15 p2696 A69-31224

- Photoelectric observations in B and V colors of binary system S Equ
16 p2858 A69-32212

- Nonocculted areas of Algol during eclipse using Balmer discontinuity spectrophotometric method, determining apparent stellar diameters
16 p2858 A69-32216

- Eclipsing binary CQ Cephei envelope variability determined from photoelectric light curve, using astronomical telescope
16 p2864 A69-32593

- Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm
18 p3197 A69-34753

- Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries
18 p3197 A69-34754

- Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements
18 p3198 A69-34766

- WY Gem star spectroscopic observation showing peculiarity about forbidden and absorption spectra superposition
20 p3598 A69-37464

- Fluxes and luminous efficiencies tabulated for main sequence and subgiant stars within reflection effect problem in eclipsing binaries and Chandrasekhar nongray atmospheric models
20 p3600 A69-37479

- Spectroscopic orbital elements of eclipsing binary IZ Per determined from 22 spectra using Wilsing and Russell method
21 p3795 A69-38469

- Photoelectric observation of EM Cygni eclipsing binary and old nova
22 p4015 A69-40151

- Photoelectric observations of eclipsing binary 32 Cygni during 1968 eclipse using standard UVB color filters, tabulating results of UVB photometry
22 p4032 A69-40946

- Eclipsing binaries spectroscopic and photometric data compared to Iben and Horn models of main sequence stars, noting stellar mass effects
23 p4208 A69-41287

- Photometric data for variable stars in Lyra and Cygnus including eclipsing variables
23 p4215 A69-42009

ECLIPTIC

- Source position of cosmic ray diurnal anisotropy relative to ecliptic plane from neutron monitor data at Mawson and Churchill stations
18 p3189 A69-35441

- Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing parameters influence on orbital lifetime with reference to approximate stability criteria [AIAA PAPER 69-926]
21 p3808 A69-39355

ECLOGITE

- Eclogite fractionation role in creation and spreading of suboceanic lithospheric plate, discussing density determination at 100 km depth
18 p3132 A69-35434

ECOLOGICAL SYSTEMS

U ECOLOGY

ECOLOGY

- Soviet space biology and medicine, discussing ecological physiology, closed system ecology, exobiology and medical tests on cosmonauts
13 p2209 A69-27356

- Earth contamination by returned lunar or Martian material, discussing extraterrestrial biota survival on earth
13 p2210 A69-28467

- Circadian rhythm in dermestid beetles *Trogoderma glabrum* Herbst as response to compulsory constant light and temperature conditions
15 p2557 A69-31469

- Earth ecosystem chemical composition compared with Mars and Venus ecosystems to determine presence of life
18 p3193 A69-34361

- Color and color IR aerial photography compared for estuarine and marshland research, considering detection of turbidity, pollution, salinity, etc
22 p3942 A69-40993

- Aerial photography for near-shore ecology, noting biological cover on ocean floor, submarine biological communities and human activities on submarine life
22 p3894 A69-40995

- Ecological foundations of Haley metalaw and implications of interstellar golden rule, discussing social interaction with alien life forms
23 p4240 A69-41304

ECONOMICS

NT DEMAND [ECONOMICS]

- Aerospace technology role in economic and social benefits [UN PAPER 68-95321]
01 p0178 A69-10467

- Book on Demeter-earth resources satellite system covering design, instrumentation, cost estimates, economic benefits and political considerations
01 p0163 A69-11333

- Economic importance of European communications satellite system development
03 p0535 A69-13583

- Passenger aircraft design to cope with air traffic volume increase in 1970s, discussing economic aspects of high capacity aircraft
04 p0546 A69-14804

- European launch vehicle development program, discussing economic limitations and employment possibilities
04 p0665 A69-14808

- Economic and technical advantages and disadvantages of satellite telecommunications, discussing Telstar intercontinental TV transmission and Soviet Molniya system
04 p0662 A69-15328

- Economic and scientific reasons for using artificial satellites to establish continental geodetic network, noting continental displacements and terrestrial pole motion observations [UN PAPER 68-07445]
06 p0917 A69-17069

- Commercial orbital space stations economics and potential markets, considering fisheries, ocean transportation, air traffic control, resources surveys, pollution reduction, etc
06 p1007 A69-17599

- Air navigation and economics, discussing air traffic control and traffic density effects on fuel consumption and engine life
07 p1052 A69-18661

- Nondemographic model predicting market shares of V/STOL aircraft in competition with automobiles and conventional airliners for short haul intercity business travel markets
07 p1244 A69-18967

- Reliability in aeronautics and astronautics, discussing safety, economic cost of technical delays and effect on public, air transport, design, development, testing, utilization, etc
07 p1053 A69-19287

- Future launch vehicle programs for automated space missions, discussing higher launch velocities and economics [AIAA PAPER 68-447]
09 p1610 A69-21983

- Airport evolution in London, discussing transportation, safety, international trade, economics, aircraft types and noise spectra
09 p1479 A69-22582

- Laser applications to production line metal working, discussing economics, welding, drilling, automation, thermal and atmospheric effects, etc
10 p1698 A69-22985

- V/STOL aircraft future, discussing Federal Government policies, economics, airport planning, engineering problems, etc
10 p1811 A69-23221

- Statistical, economic and psychological aspects of aeronautical and astronautical profitable reliability in relation to operation, using mathematical model
10 p1700 A69-23839

- Boeing 747 operational and economic considerations including capacity, airport constraints, noise factors, landing gear, compatibility, etc
13 p2201 A69-27340

- Application satellites effects on European economy
13 p2382 A69-27834

- Flexible skirt design for air cushion vehicle consisting of semicylindrical elements and permitting horse power and cost reductions
13 p2203 A69-28179

- Book on subdivision of aircraft structural design covering technology, economics, working conditions, performance, etc
14 p2456 A69-29860

- Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Turbulent process employing product constituents dilute suspensions in inert carrier /Quickmix/ to obtain solid propellant mixtures, discussing plant design and analysis, economics, etc
[AIAA PAPER 69-517] 17 p2978 A69-33033

Air transport systems aspects including efficiency, performance and economics interplay for subsonic and supersonic aircraft
17 p3018 A69-33218

Expenditures for R and D effect upon U.S. economy
17 p3076 A69-34041

R and D for economic growth, discussing interaction between management, planning, engineering, marketing, production, customers and competitors
17 p3077 A69-34126

Semiconductor reliability evaluation program for economical experimental design, noting stress tests
18 p3232 A69-34496

Jumbo aircraft production technology causing economic setback, recommending added emphasis on passenger/cargo requirements and operating environments for greater profitability
18 p3232 A69-34542

Crane helicopters for heavy lift transport mission, noting weight and size effect on productivity
[SAWE PAPER 782] 18 p3091 A69-34905

Cargo aircraft future design regarding engine development, structural flexibility, airport compatibility, cargo handling, etc
18 p3092 A69-35467

Jet noise effect on real estate value, discussing market survey, insulation and navigation easement costs and litigation damages
[AIAA PAPER 69-802] 19 p3288 A69-35594

Aircraft Economic Design Evaluation /AEDE/ computerized model to estimate aircraft design performance differences economic impact to carriers
[AIAA PAPER 69-814] 19 p3289 A69-35626

Space age metals supply and demand relationships, discussing system engineering criteria for maximum efficiency
19 p3346 A69-36635

Book on systems cost effectiveness covering methodology, system cost models, economics, etc
20 p3640 A69-37533

Space rendezvous methods from developmental environment to operational method
21 p3824 A69-39474

Airline economics long term trends requiring management tools for cost control, operations simulation and monitoring, computer use and information data processing
[SAE PAPER 690414] 23 p4241 A69-41641

Scaled Ni-Cd battery with bipolar construction to reduce internal resistance and increase power bursts capacity, emphasizing electrical characteristics and economic considerations
23 p4072 A69-42283

Management activities related to economics of failure in aerospace industry
24 p4416 A69-42777

SST contribution to commercial aircraft transportation, discussing economic and operational aspects, decision making process leading to fixed wing design, etc
[AAS PAPER 69-323] 24 p4252 A69-42869

Economic aspects of future space activities noting systems analysis, operations research, manned and unmanned space capabilities, etc
[AAS PAPER 69-113] 24 p4418 A69-42878

Communication satellites european development, discussing economic and technological problems, stressing color TV and SHF/FM transmission, compared to conventional ground station transmission
24 p4393 A69-43133

ECONOMY

Air traffic prediction based on mathematical econometric methods
03 p0536 A69-14105

Turbine blade cooling emphasizing economics, service life and computerized calculations
17 p3020 A69-33352

EDDIES

U VORTICES

EDDINGTON APPROXIMATION

Eddington approximation to solve radiative transfer equation
02 p0282 A69-12703

Eddington approximation to radiative transfer equation extended to time dependent multifrequency problems
09 p1541 A69-22254

EDDY CURRENTS

Electrical conductivity standards and eddy current measurements noting calibration facility
01 p0081 A69-10830

Beryllium nondestructive tests, discussing eddy current inspection, ultrasonics, film radiography and scintillation
[SAE PAPER 680652] 03 p0444 A69-13546

High temperature eddy current crack detection technique for atomic reactor components under high thermal gradients
04 p0607 A69-14972

Eddy current damping systems for gravity gradient stabilized satellites, discussing electromagnetic torque and various parametric relationships
07 p1228 A69-18341

Eddy current nondestructive tests of nonmagnetic thin metallic sheets and plates from single surface
10 p1698 A69-23046

Metal surface distribution of electromagnetic field from striding transducer in eddy current flow detection, calculating magnetic field component
10 p1697 A69-24071

Steady helical discharges /skin effect/ in air and Ar under high pressure without gas injection, discussing discharge stability factors
12 p2140 A69-27122

Electrical conductivity, hardness, ultimate tensile strength and yield strength correlations of age hardenable Al alloys by eddy current methods
15 p2641 A69-31513

Eddy current and ultrasonic applications to aircraft engine inspection, discussing electric and magnetic methods for quality control during fabrication
15 p2632 A69-31516

Nondestructive eddy current testing of chromium steel for early stage fatigue damage of aircraft components
18 p3136 A69-34777

Eddy current machine /nondestructive testing device/ for aircraft structures surface cracks detection
21 p3719 A69-38391

Eddy current plasmoids formation in potential magnetokinematic plasma flux found economical in terms of energy requirements
23 p4214 A69-41834

Mechanical stress measurement in cylindrical steel subjected to loads inside coaxial transducer, using transducer signal in contactless eddy current method
24 p4296 A69-42654

Structural detection in steel welded joints using higher harmonics from eddy current sensing element
24 p4319 A69-42886

EDDY DIFFUSION

U TURBULENT DIFFUSION

EDDY VISCOSITY

Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model
17 p2951 A69-33255

Adiabatic compressible turbulent boundary layer equations for two dimensional and axisymmetric flows, discussing methods of solution based on eddy viscosity formulation
[AIAA PAPER 69-687] 17 p2955 A69-33470

Turbulent velocity distribution and wall friction calculated from eddy viscosity distribution for concentric annulus
17 p2956 A69-33575

Turbulent Schmidt number as function of ratio between turbulent and molecular kinematic viscosities for He, carbon dioxide and normal octane eddy diffusivities
21 p3852 A69-39432

EDEMA

Effects of oxygen saturation variations of blood on rates of weight gain in isolated perfused canine lung, noting pulmonary edemogenesis
22 p3887 A69-41189

EDGE DISLOCATIONS

Slip band continuity across grain boundaries in aluminum bicrystals reexamined for geometrical criteria
01 p0095 A69-10607

Scanning electron beam display of space charge of defects and junction behavior of edge dislocation array in Ge and Si monocrystals
02 p0301 A69-12661

Effective slip systems in hexagonal close packed magnesium alloy under static and hydroexplosive loading, examining flow mechanism for fine structure formation
04 p0615 A69-14639

Plastic yield on inclined slip planes at tip of crack deformed in antiplane strain
05 p0842 A69-16436

Brittle fracture criterion for small steel specimens based on interaction between stress concentration of initial crack and nearby slip band
07 p1238 A69-19694

Edge dislocations effect in perpendicular slip planes on work hardening and strain aging, calculating dilatation centers absorbed
07 p1238 A69-19695

Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructure changes
12 p2116 A69-26912

Plastic strains at crack tips in thin plate under concentrated forces, analyzing slip bands during initial deformation
15 p2708 A69-30659

Plastic flow anisotropy and texture shifting by rolling in Ti-Mo-V alloy, analyzing slip rotation, grain boundary shear and deformation mode
17 p2987 A69-33078

Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role
18 p3157 A69-35246

Molybdenum single crystals deformation in direct shear, determining stress temperature dependence and critical regions for various slip systems
19 p3342 A69-35811

EDGE LOADING

Stress distribution in composite cantilever beams of three layers with end loading solved by closed form elasticity method
01 p0172 A69-11266

Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading
01 p0172 A69-11270

Direct matrix method for evaluation of critical loads and buckling modes for nonuniform flexural rigid plates having end and side constraints
03 p0522 A69-12866

Stress-strain state of thin elliptical shell of revolution under rapidly varying cyclic edge loads
05 p0832 A69-15686

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses
[ASME PAPER 68-WA/MET-19] 05 p0839 A69-16157

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation
05 p0843 A69-16681

Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function
06 p1021 A69-17177

Exponential decay of stresses in circular elastic cylinders subject to axisymmetric self equilibrated end loads
06 p1023 A69-17507

Semibrittle material compaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities
11 p1972 A69-24656

Warping rigidity effect on stability of cantilever bar under eccentric follower end load, discussing bending torsional flutter and buckling
12 p2179 A69-26212

Symmetrical stressed state of shallow shell with crack edge loading solved in Cartesian coordinates
12 p2181 A69-26614

Bending state of shells of revolution due to edge effects using nonlinear stress strain relation
13 p2362 A69-27921

Stressed state of cylindrical circular shell clamped at edges and subjected to concentrated radial forces
13 p2368 A69-28322

Thin elastic plates buckling under small normal load and external edge force
14 p2531 A69-28810

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect
15 p2703 A69-30050

Strains determination for laterally edge loaded rectangular plate and sagittas determination of perpendicularly loaded plate proved analogous
15 p2704 A69-30295

EDGES

Flat rectangular plates large deflection due to uniform lateral pressure and compressive edge loading analyzed through partial differential equations, difference equations and computer program
20 p3620 A69-37000

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms
22 p4041 A69-40114

Dynamic stability of circular isotropic plate with central hole subjected to torsional moment uniformly distributed over both edges by equilibrium equation
22 p4043 A69-40455

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges
22 p4046 A69-41061

Flat square plates loaded along two opposite straight edges, analyzing postbuckling behavior and geometric imperfections effects
23 p4234 A69-42395

Plane problem of infinite strip weakened by crack, determining crack form under uniformly distributed tensile loads applied to edges
24 p4395 A69-42592

Orthotropic fiberglass/epoxy faced honeycomb aircraft type sandwich structure elastic properties by edgewise compression test
24 p4403 A69-43443

EDGES

- U LEADING EDGES
- U SHARP LEADING EDGES
- U TRAILING EDGES

EDUCATION

- NT ASTRONAUT TRAINING
- NT FLIGHT TRAINING
- NT PILOT TRAINING
- NT SPACE FLIGHT TRAINING

Geostationary satellite transmissions for educational purposes
[UN PAPER 68-95533] 01 p0028 A69-10494

Space program effects in education, science and engineering, noting impact of first satellite on U.S. research and technology
01 p0179 A69-10500

Science education and training, discussing student motivation
[UN PAPER 68-95809] 01 p0179 A69-10515

NASA programs impact on U.S. education
[UN PAPER 68-95291] 01 p0180 A69-10519

Spacecraft systems, education - Conference, Belgrade, September 1967
06 p1015 A69-17596

Technology and education - Conference, Los Angeles, September 1968
10 p1668 A69-22971

On job training of logistic publications engineers, emphasizing technical publications and system engineering and development for Minuteman program
10 p1811 A69-22977

Management training goals and methods for executive development, comparing effective and ineffective programs
11 p2005 A69-25305

Combined cueing and knowledge of results for transfer of training in visual monitoring
13 p2213 A69-28256

Nondestructive testing education, current programs available and future needs
18 p2322 A69-34518

Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc
18 p2325 A69-35077

NASA Pilot Program in instructional monographs to provide up-to-date material from current research for engineering education
18 p2326 A69-35078

Civil aviation center for R and D in aviation personnel education and training
[AIAA PAPER 69-785] 19 p3453 A69-35597

Universities and public service education noting NASA requirements and programs
20 p3641 A69-38282

Aerospace medical educational programs for MD, post-MD and practicing physicians at medical faculties in U.S. and at Ohio State University
23 p4106 A69-41799

EDUCATIONAL TELEVISION

Satellite educational TV, considering program distribution, satellite characteristics, ground terminals design, reliability, quality, programming and costs
[UN PAPER 68-95827] 01 p0029 A69-10499

Educational TV satellites, considering stationary ASCEND system with high power transmitters
02 p0335 A69-12747

Satellite educational TV capabilities, applications and planning
[UN PAPER 68-95355] 06 p0887 A69-17078

Communication satellites in synchronous equatorial orbit for two types of educational TV, discussing picture quality, modulation, power, bandwidth and system costs
06 p1017 A69-17624

Satellite TV broadcast application for communication and education, discussing costs and benefits in single and multimission combinations
07 p1244 A69-18678

Instructional broadcast satellites programming for time cost reduction, discussing frequency allocation, interference and ground station design
13 p2381 A69-27373

Educational TV satellite system design for U.S. in 1970s
18 p3235 A69-35076

Educational TV coverage extension via synchronous satellites to areas of limited coverage, emphasizing South American countries
19 p3268 A69-36163

Nationwide TV system using synchronous communication satellite proposed for India, discussing antenna, modulation, multiplexed channels and educational aspects
19 p3275 A69-36413

EEG [ELECTROENCEPHALOGRAMS]

- U ELECTROENCEPHALOGRAPHY

EFFECTORS

- U CONTROL EQUIPMENT

EFFERENT NERVOUS SYSTEMS

Physiological, cytochemical and histological effects on muscular activity, nervous system, adrenal and thyroid glands and liver of mice during 30 day hypokinesia
02 p0198 A69-11502

Human motor activity under hypodynamia and increased carbon dioxide, discussing positive effects of prescribed physical exercises
03 p0377 A69-14205

Motion sickness inhibitive effect on stomach motor activity, measuring biopotential of stomach wall, pyloric sphincter and ganglions
08 p1263 A69-19935

Corticosteroid and catecholamine metabolism change in rabbits during sharp limitation of motor activity
12 p2021 A69-26973

Astronauts physical training for space flight requirements
13 p2215 A69-28611

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats
13 p2212 A69-28617

Astronaut vestibular and motor analyzer functions during flight and simulation tests, discussing illusory space orientation and role of cortical dynamics
20 p3469 A69-37241

Motor and tonic reactions in animals during weightlessness, discussing interaction between gravity receptors and visual analyzer
20 p3470 A69-37247

Information transfer capacity of afferent and efferent cell system and fiber tracts of human cerebellum numerically defined with regard to cybernetics
23 p4084 A69-41467

Learning model of motor behavior in brain cortex of higher animals and man, discussing M automaton, information reception, correlation, memory, emotions, desires and actions
23 p4109 A69-41977

Self rhythms of low audio frequencies in motor nerves under electric pulses influence at VLF related to viscosity changes of nerve substance
23 p4092 A69-42057

Temperature dependence of afferent and efferent spontaneous activity of spinal cord, using filament recordings from ventral and dorsal roots in anesthetized cats
23 p4093 A69-42066

Efferent innervation influence of one ear to another in feline auditory system, based on afferent neurons responses to contralateral and binaural stimulation
23 p4094 A69-42073

EFFICIENCY

- NT COMBUSTION EFFICIENCY
- NT COMPRESSOR EFFICIENCY
- NT ENERGY CONVERSION EFFICIENCY
- NT NOZZLE EFFICIENCY
- NT POWER EFFICIENCY

- NT PROPELLER EFFICIENCY
- NT PROPULSIVE EFFICIENCY
- NT THERMODYNAMIC EFFICIENCY
- NT TRANSMISSION EFFICIENCY

Efficiency curve for step recovery diode frequency multipliers, using analog computer simulation
02 p0215 A69-11947

Intracavity acoustooptic devices based on isotropic and anisotropic acoustic Bragg diffraction, discussing efficiency, bandwidth and acoustic column width
10 p1697 A69-23871

EGGS

Weightlessness effects on fertilized frog egg development on board Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogenesis
01 p0017 A69-11084

Simulated weightlessness used in determining ontogenesis of otolith organ in tadpoles and eggs as function of acceleration forces
[DVL-855] 10 p1647 A69-24021

EGRESS

Psychophysiologic factors in USAF aircraft mishaps involving ground egress
06 p0878 A69-16959

Psychophysiologic factors in USAF aircraft mishaps involving ground egress
15 p2558 A69-30462

EIGENFUNCTIONS

- U EIGENVECTORS

EIGENSTATES

- U EIGENVECTORS

EIGENVALUES

Continuum eigenfunction problem for hard sphere gas in spherically symmetric state, applying theory of singular integral equations
01 p0061 A69-10813

Eigenvalue problem for Laplace operator for two dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method
02 p0271 A69-11650

Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers
02 p0271 A69-11653

Eigenvalue problem solutions for ordinary differential equations, discussing coefficient replacement, Ritz polynomial substitution and error limits
02 p0271 A69-12057

Upper and lower bounds for eigenvalues of differential problem connected with transverse vibrations of wedge shaped simply supported beam
02 p0272 A69-12193

Exact expressions for rates of change of eigenvalues and eigenvector to facilitate computerized design of complex structures
02 p0347 A69-12532

Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions
03 p0412 A69-12847

Necessary conditions for stability of trivial solutions of parabolic systems of partial differential equations
03 p0456 A69-13405

Eigenvalues for Orr-Sommerfeld equation by difference technique for Reynolds number range 5780-729000, determining Poiseuille flow stability in plane channel
03 p0416 A69-13654

Variational theorems on eigenvalues of Laplace finite difference operator with first order boundary conditions
03 p0457 A69-14230

Asymptotic solutions of linear difference equations, discussing applications to eigenvalue problems of free oscillations of model galaxies
04 p0623 A69-14946

Two dimensional elementary transformation for obtaining eigenvalues, considering programming aspects for computing characteristic roots of matrix
04 p0624 A69-14967

Irregular Sturm-Liouville first and higher order perturbation problem in boundary layer theory providing analytical approximations to complete orthogonal set of characteristic functions
04 p0590 A69-15001

Schaefer theory of two parameter eigenvalue problems applied to stability of twisted bars, discussing quick estimate of critical loads
04 p0682 A69-15290

Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency
05 p0736 A69-16783

Lehmann-Maehly procedure for lower and upper bounds to eigenvalues of Hermitian operators in Hilbert space

06 p1020 A69-17131

Numerical methods for VLF electromagnetic wave propagation in earth-ionosphere waveguide, discussing boundary conditions assignment effect at ionosphere on eigenvalues

06 p0920 A69-17732

Capacitance and lowest eigenvalue bounds for two dimensional anisotropic media as exemplified by transverse vibrations of stretched membrane

08 p1418 A69-20848

Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression

09 p1615 A69-21921

Asymptotic behavior of frequency function of fluctuations for generalized ensemble parameters, noting characteristic function convergence to Gaussian at thermodynamic limit

09 p1623 A69-22395

Waveguides and resonators design by solving scalar problem for eigenvalues of elliptic operator

09 p1469 A69-22626

Duct entrance region flow, analyzing eigenvalue problem and nonlinear transformation simplification

11 p1874 A69-25285

Vibration eigenfrequencies of helicopter blades, discussing equation integration problems

11 p1995 A69-25673

Characteristic plane harmonic free internal neutral atmospheric wave oblique propagation through horizontally stratified quiet atmosphere for various thermospheric parameters

12 p2065 A69-26101

Inverse iteration method insensitive to small eigenvalue errors for finding eigenvectors

12 p2121 A69-26510

Enclosures for large eigenvalues of ordinary second and fourth order differential equations based on asymptotic solutions of linear homogeneous second order differential equations

12 p2124 A69-26892

Eigenvalue approximation for first order systems by introducing artificial periodicity through successive impulse functions of alternate sign

13 p2287 A69-27242

Second order differential equations eigenvalues with Sturm boundary conditions analyzed by difference method

13 p2288 A69-27922

Matrix eigenvalues for nonlinear simultaneous algebraic equations, discussing computer program for numerical integration

13 p2289 A69-28227

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution

13 p2365 A69-28239

End loaded two layer laminated elastic strip stress concentration and self equilibrating traction distribution analyzed by eigenvalue equation

13 p2370 A69-28672

Linear control design to synthesize system with prescribed spectrum, deriving formula yielding control coefficients as function of eigenvalues

14 p2425 A69-28821

Semifree elastic membranes standing waves fundamental frequency, developing variational principle for first eigenvalue

14 p2535 A69-29365

Impedance eigenvalues for eigenmodes of multiconductor transmission lines, discussing transverse field distributions along conical line

14 p2423 A69-29756

Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations

15 p2703 A69-30211

Deformation functions for finite beam analysis allowing continuity at nodes and accurate eigenvalues

15 p2710 A69-30869

Eigenvalue bounds for amplification rates, wave speeds and linear stability conditions for Orr-Sommerfeld equation governing parallel flow in boundary layer and round pipes

16 p2768 A69-31591

Eigenvalues for class of nonself adjoint differential equations system treated as small perturbation of norm epsilon, assuming perturbation expansion

16 p2812 A69-31811

Matrix eigenvalue problems with statistical properties, applying to dynamic structural systems and verifying solutions by Monte Carlo simulation

16 p2871 A69-31878

Gradient iterative methods for finite element eigenvalue problem associated with stability and vibrations of elastic systems based on Rayleigh quotient

16 p2871 A69-31898

Regression rate of solid fuel in hybrid combustion determined as eigenvalue by Rayleigh flow model with evaporating boundary

16 p2879 A69-32013

Eigenvalues of truncated orthotropic shells of revolution with degenerate poles and various rigidities and geometries

16 p2873 A69-32133

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem [AIAA PAPER 68-318]

16 p2874 A69-32158

Mixed plate element application to vibration and buckling eigenvalue problems based on Reissner variational principle, considering quadrilateral elements

16 p2874 A69-32176

Electromagnetic field eigenvalues along conductive circular cylinder in magnetoionic medium, assuming lossless medium and field frequency not equal to cyclotron frequency

16 p2754 A69-32568

Eigenvalue problems in partial differential equations solved by extended Kantorovich method, considering vibration of rectangular membrane and stability of elastic rectangular plate

16 p2876 A69-32783

Friedrich qualitative analysis of ordinary differential operators modified to obtain quantitative information regarding eigenvalues distribution

17 p2995 A69-33404

Continuity conditions for drifting magnetoplasmas without ionic effects, discussing eigenvalue equation of refractive index and electromagnetic modes propagation

17 p2926 A69-33851

Electromagnetic field formulation of eigenvalue problem for optical coaxial dielectric waveguide, using computer root searching method

17 p2930 A69-33892

Laser eigenmodes determined iteratively from eigenvalue equation including spatial inversion inhomogeneities, atomic density and local loss

17 p2984 A69-34046

Least squares method of smoothing curves or surfaces involving orthogonal base functions, discussing matrices conditioning and structure eigenmodes

18 p3218 A69-34642

State space procedure for mixed boundary value problems applied to structural analysis, fluid mechanics and eigenvalues for deformable bodies

18 p3164 A69-34685

Eigenvalue conversion of second variation test for algebraic and differential constraints to Jacobi accessory minimum problem by introducing norm in coordinate perturbation space

19 p3400 A69-35672

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin walled segments, using homogeneous differential equations

19 p3445 A69-36831

Ensembles of random Hermitian cyclic matrices in statistical theory of complex systems energy level spectra, noting Gaussian density function of eigenvalues

20 p3567 A69-36988

Naimark theorem extended to class of nonself-adjoint eigenvalue problems in hydrodynamic stability, considering Orr-Sommerfeld equation and Taylor stability problem

21 p3754 A69-38426

Reduction of boundary value problems to initial value problems through variables transformation, considering application to eigenvalue problems

21 p3754 A69-38747

Motion stability in nonresonant case of four pairs of imaginary roots in characteristic equation

21 p3770 A69-38883

Approximate boundary conditions in electrodynamics of stratified tensor media estimated for ferrite layers

21 p3675 A69-39282

Eigenmodes of asymmetric cylindrical confocal laser resonator with single output coupling aperture, obtaining diffraction loss factors and mirror field distributions

21 p3741 A69-39564

EIGENVECTORS

Unsteady heat flow in finite composite hollow circular cylinder using inverse method of eigenfunction expansion /method of finite integral transformation/

01 p0175 A69-10230

Continuum eigenfunction problem for hard sphere gas in spherically symmetric state, applying theory of singular integral equations

01 p0061 A69-10813

Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers

02 p0271 A69-11653

Exact expressions for rates of change of eigenvalues and eigenvector to facilitate computerized design of complex structures

02 p0347 A69-12532

Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions

03 p0412 A69-12847

Eigenvectors utilized in flutter computation for couplings [ONERA-TP-650]

03 p0522 A69-12878

Eigenvector approximation of complex matrix by inverse iteration, giving Algol 60 program

03 p0455 A69-13371

Two dimensional elementary transformation for obtaining eigenvalues, considering programming aspects for computing characteristic roots of matrix

04 p0624 A69-14967

Irregular Sturm-Liouville first and higher order perturbation problem in boundary layer theory providing analytical approximations to complete orthogonal set of characteristic functions

04 p0590 A69-15001

Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency

05 p0736 A69-16783

Field diffraction at finite metallic surface represented in eigenfunctions of discrete spectrum, considering forced oscillations of open circuit

07 p1084 A69-19151

Vector equation of transfer for planetary atmosphere describing light scattering by anisotropic particles and analysis of resonance line scattering

08 p1385 A69-20063

Families of eigenfunctions concept for stress and strain tensors of proper motions in continuous isotropic medium, considering vortices and gradients

08 p1417 A69-20752

Asymptotic behavior of frequency function of fluctuations for generalized ensemble parameters, noting characteristic function convergence to Gaussian at thermodynamic limit

09 p1623 A69-22395

Pointwise bounding of eigenfunctions in vibration and stability problems in elasticity theory

10 p1794 A69-22925

Existence and completeness of eigenfunctions for boundary value problem arising in theory of small amplitude motions of stratified polytropic gas

11 p1868 A69-24884

Liquid filled elastic shells natural frequencies and oscillation modes, deriving eigenfunction system from liquid velocity potential boundary conditions to determine dynamic load

11 p1870 A69-24951

Stresses and displacements in half plane with edge crack given as eigenfunction expansions using Wiener-Hopf technique

11 p1987 A69-25438

Characteristic plane harmonic free internal neutral atmospheric wave oblique propagation through horizontally stratified quiet atmosphere for various thermospheric parameters

12 p2065 A69-26101

Inverse iteration method insensitive to small eigenvalue errors for finding eigenvectors

12 p2121 A69-26510

Eigenvalues of finite matrix Hamiltonian, considering convergence radius of perturbation series, limits and renormalization

14 p2470 A69-29451

Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations

15 p2703 A69-30211

Localization and convergence of Fourier series for fundamental systems of functions of Laplace operator, including eigenfunctions and trigonometric systems

15 p2644 A69-30287

Motion stability in nonresonant case of four pairs of imaginary roots in characteristic equation

21 p3770 A69-38883

Eigenmodes of asymmetric cylindrical confocal laser resonator with single output coupling aperture, obtaining diffraction loss factors and mirror field distributions
21 p3741 A69-39564

Eigenfunction expansion technique to analyze three dimensional crack and wedge problems, emphasizing stress field near straight edge crack
24 p4395 A69-42641

EINSTEIN EQUATIONS

Einstein-Maxwell equations corresponding to superposed electric and magnetic fields stationary solutions, noting singularities in metric tensor
01 p0115 A69-10020

Approximate integrals of Einstein equations for dipole and quadrupole electromagnetic radiation
01 p0115 A69-10263

Equatorial geodesic motion of rotating source in gravitational field, using exact empty space solutions of Einstein equations
01 p0157 A69-11289

Gravitational fields in Hamiltonian formulation of relativistic theory of gravitation, noting geometrical aspects and equivalence to Einstein theory
02 p0280 A69-11715

Godel type solution of Einstein-Maxwell equation for dust filled universe, using Rainich equations
02 p0280 A69-11814

Einstein equations obtained for axisymmetric distribution of masses in approximation of square of stellar rotation angular velocity in empty space
02 p0317 A69-11956

Lorentz invariant theories of gravitation compared with Einstein general relativity tests with respect to one body motion observations
02 p0318 A69-12094

Plane front gravitational waves analyzed on basis of gravitational radiation theory, discussing Einstein equations
02 p0332 A69-12836

Static locally flat solutions of Einstein vacuum field equation with line singularities and global space curvature, noting analogy to electromagnetic fields
03 p0466 A69-13389

Kerr family of solutions of Einstein and Einstein-Maxwell equations for gravitational field of rotating body, noting global structure and causality
03 p0466 A69-13473

Conformal change and connection relations in Einstein unified field theory, noting tensor applications
03 p0467 A69-13756

Factorizability of Einstein field equations in two dimensional spinor formulation
03 p0468 A69-13759

General relativity confirmation, discussing mass equivalence and classical and new experiments such as gravitational shift, rotation effect on perihelion and precession test
04 p0661 A69-15165

Necessary and sufficient conditions for Einstein spaces of second embedding class
06 p0957 A69-17547

Einstein equations solution in Gaussian coordinates describing particles gravitational fields including point particles
07 p1180 A69-18507

Axially symmetric static solutions of Einstein equations with singularities on z axis allowing for higher multipole moments in general relativity
08 p1350 A69-19783

Einstein space time concepts for unified formalism of matter interactions from elementary particles to astronomical bodies, discussing relativity theory
08 p1352 A69-20730

Gravitational wave solution of Einstein field equations, deriving Ricci and Riemann tensors for Einstein space
08 p1352 A69-20755

General theory of relativity and tensor field equations relating space time characteristics to local properties of matter and vacuum, using Palatini Lagrangian method
09 p1593 A69-21572

Clock paradox of Einstein special theory of relativity, reviewing work of Prokhovnik, Schlegel and Arley
10 p1772 A69-22865

Einstein cosmological field equations solved after subjecting electromagnetic null field metric tensor to Einstein gravitational field equations, noting coordinates significance
10 p1778 A69-23406

Generalized gravitational field equations derived on basis of principle of least action, noting vector potential of electromagnetic field
10 p1725 A69-23714

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
11 p1956 A69-24394

Penfield-Haus solution to magnetodynamic effect problem as inertial effect of orbital angular momentum, deriving Bohr magneton formula from Einstein equivalence principle
11 p1919 A69-25098

Einstein field equations solutions for homogeneous cosmological models, assuming perfect fluid gravitation source and existence of simply transitive surface motions
11 p1919 A69-25245

Singularity of Schwarzschild spherically symmetrical solution to Einstein equations of general relativity theory, exemplifying Lemaitre coordinate system
12 p2129 A69-25974

Gravitational recoil due to gravitational emission of source analyzed in terms of Einstein equations
12 p2130 A69-26338

Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristic of pulverized material representing gravitational fields
13 p2298 A69-27796

Internal solution of Einstein equations for steady axisymmetric gravitational fields by integrating differential equations with initial conditions
13 p2351 A69-27863

Einstein general theory of relativity, discussing evolution and disunity among physicists and philosophers on universal relativity of mechanical motion
14 p2483 A69-28857

General relativity theory philosophical substance and meaning, discussing Einstein formulations and bases of classical, relativistic and quantum physics
14 p2483 A69-28859

Gravitational recoil, showing integration of Einstein equations in axisymmetric case reduced to integration of equations for Fourier coefficients
14 p2485 A69-29358

Angular momentum-gravitational field coupling in collapsing star, applying rotational perturbation to spherically symmetric time dependent interior solution of Einstein field equation
14 p2520 A69-29374

Energy momentum tensor in Einstein field equations derived from covariant field equations for vector meson
14 p2486 A69-29452

First order approximation to spherically symmetric solution of Einstein equations, noting gravitational and cosmical lambda force potentials
14 p2521 A69-29455

Classical and relativistic gravitation theories using harmonic coordinate system, interpreting Einstein equations for insular distribution of masses and applications in geodesy
15 p2596 A69-30573

Einstein equations solution for empty space without singularities containing metric, with closed homogeneous space type hypersurfaces expanding anisotropically
15 p2690 A69-30732

Exact static exterior and interior solution of Einstein equations for thick plane plate, discussing surface energy-momentum tensor
15 p2654 A69-31477

Mathematical solutions of Einstein cosmological equations for radiation universe, discussing model limitations for universes older than 5-6 billion years
15 p2700 A69-31496

Gravitational effect of electromagnetic radiation evaluated on test particle using Einstein field equations
16 p2812 A69-32049

Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
16 p2812 A69-32053

Einstein equations for empty space applied to degenerate gravitational fields with twisting rays, admitting shear-free twisting congruence of null geodesics
17 p3004 A69-32832

General relativity theory applicability to cosmology, Einstein principle of equivalence and contradicting arguments of relativistic cosmology
18 p3200 A69-34997

Einstein gravitational field equations series expansion in powers of gravity constant by Bondi method for gravitational waves
18 p3173 A69-35146

Five dimensional theory applied to Einstein generalized gravity equations for spherically symmetrical

gravitational waves, yielding gravity constant variation from Newton approximation
21 p3802 A69-38842

Einstein general theory of relativity and apparatus for gravitational radiation detection, discussing Dicke experiments and Riemann tensor measurement
23 p4192 A69-42331

Gravitational field quantization according to Einstein theory using classical Hamiltonian dynamics and quantum rules for constraints
23 p4192 A69-42332

Planck-Einstein equation derivation in special theory of relativity, discussing relativistic measurement of thermodynamic values in terms of Lorentz transformations
24 p4349 A69-42748

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
24 p4390 A69-43784

EJECTION

NT STELLAR MASS EJECTION

Release windows for auxiliary body ejection from satellite in eccentric orbit, discussing visibility, celestial body interference, etc
03 p0505 A69-13003

Survival of aircrew after successful ejection over water and boarding life raft
06 p0878 A69-16958

Clinical analysis of combat and noncombat ejection experience of USAF
06 p0878 A69-16960

Photographic measurement of parachute exit velocity during ejection from chute, describing electronic recording and unit operation with block diagram
08 p1317 A69-20875

Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets /Sud-Aviation/ with RF mass spectrometer
10 p1635 A69-23034

Problems connected with rescue of crew members ejected over water
15 p2551 A69-30866

Concorde propulsion and ejection systems reliability, testing reheating duct, primary nozzle, secondary assembly, etc
16 p2837 A69-32072

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, rarefaction coefficient for air between jets, etc
21 p3696 A69-39095

EJECTION INJURIES

Psychological aspects of crew members resistance to eject from aircraft in trouble
06 p0877 A69-16956

Ocular injuries during bailout from Vampire aircraft, noting hemorrhages
10 p1649 A69-23380

Human resistance to short duration high accelerations applied to aircraft ejection studies, noting bone damage, consciousness retention, etc
13 p2215 A69-28591

Ejection seat cushion dynamic characteristics influence on incidence of spinal injury during ejection, considering MIL specification dynamic model of human body
17 p2917 A69-34033

Vertebral column fracture resulting from aircraft ejection, studying ejection seat geometry and personal equipment design influence on spinal curvature relation to catapult thrust
23 p4102 A69-41681

Thematic apperception test /TAT/ cards for assessing attitudes in naval recruiting, respiratory responses during ejections and aviation psychology
23 p4112 A69-42365

Radiology diagnosis of military jet pilots injuries during ejection and touchdown, discussing fractures, spine injuries and ejection seat spine position
24 p4266 A69-43379

EJECTION SEATS

Small column insulated delay /SCID/ aircraft seat ejection systems, illustrating weight saving
06 p0877 A69-16957

Ejection seat cushion dynamic characteristics influence on incidence of spinal injury during ejection, considering MIL specification dynamic model of human body
17 p2917 A69-34033

Vertebral column fracture resulting from aircraft ejection, studying ejection seat geometry and personal equipment design influence on spinal curvature relation to catapult thrust
23 p4102 A69-41681

EJECTORS

- Induced flow determination in pulsejet ejector, solving momentum and continuity equations by method of characteristics and mathematical model
[ASME PAPER 68-WA/FE-33] 05 p0812 A69-16106
- Ejector-diffuser performance improvement by reduction of backflow with orifice plate installed at inlet of straight diffuser duct 11 p1819 A69-25382
- Ejector driven wind tunnel for turbulent flow generation with arbitrary velocity profile, using jet arrays [AIAA PAPER 69-743] 18 p3114 A69-34408
- Supersonic air to air ejectors performance for low secondary-to-primary mass flow ratios, deriving correction factor for Fabry-Paulon theory 21 p3644 A69-38654

EKMANN LAYER

U BOUNDARY LAYER TRANSITION

ELASTIC ANISOTROPY

- Elastic stresses in rotating anisotropic disks with constant thickness, discussing solid, circular rigid shaft mounted and center drilled disks 17 p3067 A69-34138
- Reissner variational principle applied to incompressible and nearly incompressible anisotropic thermoelasticity 22 p4040 A69-39980

ELASTIC BARS

- Load diffusion from transverse tension bar into semiinfinite elastic sheet, considering line and area contact methods of stringer attachment [ASME PAPER 68-WA/APM-15] 04 p0669 A69-14396
- Longitudinal stress pulse propagation in finite length free-free bar with variable cross section, noting stresses in projectile impacting plane target 04 p0671 A69-14412
- Higher modes of longitudinal wave propagation in dispersive thin elastic rod, noting response to laser pulse 04 p0678 A69-14869
- Stability of elastoplastic clamped free rod, noting compressive force for production of new equilibrium state and occurrence of transition to state 04 p0679 A69-14925
- Elastic rod buckling under dynamic longitudinal compression load, determining critical load 04 p0679 A69-14926
- Stress concentration around centrally placed circular bolt in axially loaded bar, using theory of infinite systems of linear equations 04 p0681 A69-15195
- Torsional or longitudinal vibrations of nonuniform bar with elastic end constraints, developing frequency and mode form equations suitable for computer 04 p0681 A69-15196
- Elastic rods shape for maximum stability defined by solution of variational problem, assuming noninfinite compressive stresses 05 p0832 A69-15688
- Numerical method for stress function of elastic-plastic torsion of hollow bars during quasi-static monotonic twist compared with relaxation method solution 06 p1023 A69-17370

- Circular bar elastoplastic behavior under combined axial force and torque in strain hardening range, noting elastic compressibility effects 06 p1023 A69-17371
- Forced vibrations in semibounded elastic bar with various moduli of elasticity, discussing reversing longitudinal force and elastic waves propagation 10 p1799 A69-23155
- Asymptotic solution of two dimensional problem of elastic impact of bars, showing longitudinal and surface waves decay with time 11 p1996 A69-25737
- Thermoelastic waves in stretched circular cylindrical bar, analyzing displacements, secondary pressure and temperature field by using Frobenius method 12 p2189 A69-27115
- Galerkin method application to solve differential equation and boundary value conditions for elastic stability of bars, showing linear relation between critical loads 21 p3845 A69-39678
- Large deflection of three dimensional bar structures stability analyzed by potential energy minimization method, considering radome design 23 p4232 A69-42141

ELASTIC BENDING

- Point load subjected deflections of cantilevers and circular rings found using electronic analog computers 03 p0522 A69-12865

Reissner algorithms for displacements of bent plate represented in finite series form as solutions of Euler equations 10 p1793 A69-22883

Elastic bending moments and shear forces uniformly loaded flat plate structures with rectangular symmetry, using collocation technique and complex variable methods 11 p1986 A69-25241

Amplitudes of forced bending vibrations of frames with superfluous elastohysteretic couplings by dynamic compliances method 11 p1986 A69-25333

Bending of elastic triangular plates with free and supported corners under uniformly distributed transverse load determined using Ritz method 14 p2535 A69-29410

Beam deflection equations having different rigidity moduli on each half span 15 p2705 A69-30417

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution 15 p2711 A69-30971

Plate bending problems, comparing various approximate analytical methods including point matching, Galerkin, Ritz, Kantorovich and least squares techniques [AIAA PAPER 68-296] 16 p2874 A69-32160

Anisotropic elastic plate deflection weakened by circular hole with thin elastic ring reinforcement, assuming no load on ring and uniform stress-strain state of plate 17 p3055 A69-33128

Uniform thickness rectangular plates bending with rigidly clamped or freely hinged edges solved by refined version on digital computer 18 p3215 A69-34535

Tension, bending and buckling torsion in thin walled beams described by extended beam model considered as one dimensional continuum 18 p3224 A69-35296

Variational method for computer calculation of supercritical bending of thermoelastic uniformly loaded circular plates, determining Ritz parameter influence on accuracy 19 p3434 A69-35829

Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions 19 p3438 A69-36306

Curvilinear planform plates natural oscillations, assuming small elastic bending strain obeying Hooke's law 22 p4038 A69-39912

Elastic curve shape effects on volume of minimum weight uniformly strong beam under combined longitudinal and transverse bending 23 p4225 A69-41421

ELASTIC BODIES

- Natural vibration properties of elastic free-free body obeying Hooke law analysis from equilibrium and motion equations, determining Green tensor 01 p0167 A69-10323
- Elastic wind tunnel models used for testing at full scale dynamic pressures, discussing scaling laws and manufacturing and testing problems [AIAA PAPER 68-56] 01 p0011 A69-11018
- Nonlinear viscoelastic bodies arising in 3d rheological models with hidden parameters behaving according to law compatible with objectivity and 2nd thermodynamics principles 01 p0171 A69-11131
- Three dimensional stress concentration around cylindrical hole in semiinfinite elastic body loaded at infinity, using Fredholm integral equation 01 p0172 A69-11332
- Stress analysis of multiply connected bodies under large elastic strains, deriving second order potentials for plate with elliptical holes 02 p0340 A69-12139
- Menabrea theorem for anisotropic elastic body with internal incompressibility constraint, discussing validity during thermoelastic transformation 02 p0341 A69-12194
- Menabrea theorem for nonisothermal transformations of anisotropic elastic body with internal incompressibility constraint and initial stress 02 p0341 A69-12197
- Trajectories of elastic bodies analyzed by Hertz theory of impact 02 p0349 A69-12829

Equilibrium stability of elastic circular arch constrained in rigid cavity and subjected to uniformly distributed parallel loading 03 p0524 A69-13066

Kinematic parameters for elastic slender body aid in description of motion of body 04 p0668 A69-14271

Vertical, horizontal and rocking vibrations of body on surface of otherwise unloaded elastic half plane, estimating stiffness for coupled vibrations [ASME PAPER 68-WA/APM-12] 04 p0668 A69-14393

Elastic ring subject to uniform hydraulic pressure on inner boundary and with two opposite slipless quarter-arcs on outer boundary, noting stress and deformation [ASME PAPER 68-WA/APM-17] 04 p0669 A69-14395

Stresses and displacements in anisotropic elastic solids under mechanical loading, determining general solution for treatment of time dependent boundary conditions 04 p0675 A69-14595

Book on continuum theory of inhomogeneities in simple bodies 05 p0833 A69-15727

Cauchy equation derived, giving rise to definite differential equation for materially uniform elastic bodies with inhomogeneities 05 p0834 A69-15730

Mathematical theory for describing geometric structure of simple bodies, discussing dislocation distribution and exact field equations for elastic bodies motion 05 p0834 A69-15731

Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods 05 p0834 A69-15784

Elastic bodies collisions in presence of thermoelastic effects, investigating local inertial and thermoelastic forces effect on compression region shape 05 p0841 A69-16207

Rotation wave propagation in elastic homogeneous isotropic centrosymmetric body in asymmetric elasticity theory 05 p0843 A69-16645

Dynamic instability of solid bodies, using modal vibration method to establish criteria on basis of equivalent energy conditions 05 p0844 A69-16742

Three dimensional compression problem for two elastic bodies in contact, determining contact pressure distribution by iteration procedure on computer 06 p1026 A69-18014

Cosserat functions for homogeneous isotropic elastic body filling finite domain with sufficiently smooth boundaries, noting eigenfunctions for first and second boundary value problems 07 p1173 A69-18499

Crack front and zone in brittle elastic body under high pressure at wall inside body 07 p1231 A69-18699

Stress concentration factors for composite body of two isotropic elastic phases in plane strain in plane of composite parameters 07 p1170 A69-18716

Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations 07 p1234 A69-19382

Mathematical theory generalization for smooth materially uniform simple bodies, discussing elastic body structure, material tangent bundle and index bundle, motion equations, etc 08 p1410 A69-19822

Uniqueness theorem for equations of dynamics of viscoelastic bodies, using energy and hereditary elasticity considerations 08 p1415 A69-20658

Elastic cone stresses due to axial force at point on axis, solving problem in terms of convergent integrals 08 p1415 A69-20689

Hertz impact theory application to aircraft tire in operation, considering imperfectly elastic body with impact expressible by Newton recovery factor of about one 10 p1633 A69-22887

Couple-stresses and singular stress concentrations in elastic solids with locally unbounded deformations and stress reduction around hole 10 p1798 A69-23149

Concentrated loads in elastic Cosserat continuum involving body moments and small deformations 10 p1799 A69-23151

Forced vibrations of elastic beam covered by viscoelastic layer subjected to transverse harmonic excitation
10 p1800 A69-23241

Potential functions for three dimensional problems of elliptical crack in elastic solid
10 p1802 A69-24026

Active feedback control of distributed parameter systems including elastic airplane and missile structures, noting feedback loop coupling problem [ASME PAPER 69-VIBR-61]
10 p1668 A69-24145

Two dimensional wavefront shape induced in finitely strained elastic body by impulsive point body force
11 p1969 A69-24338

Reduced modulus of elasticity dependence on form of plane stressed state, assuming initially anisotropic body with transversely isotropic elastic properties
11 p1986 A69-25182

Elastic free-free body deformation during motion based on equations of motion valid for rigid body, noting dynamic Green tensor
11 p1994 A69-25604

Thermal stress and displacement fields in elastic solid weakened by crack outside of circular region, noting plastic zone size and energy dissipation
12 p2179 A69-26216

Elastic stress created by perpetual motion of isotropic elastic solid in static space-time
12 p2130 A69-26283

Elastic mirror flexure and distortion patterns, considering periodic nature of load in polar coordinates, second flexure mode avoidance and friction elimination
12 p2056 A69-26407

Elastic deformation of cord reinforced compressible thin sheet and rectangular cuboid solved using linear stress strain law and strain tensor nonlinear components
13 p2359 A69-27262

Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation
13 p2369 A69-28353

Three dimensional equations of elasticity reduced to two dimensional equations of shell theory, discussing stressed states of thin elastic bodies
14 p2531 A69-28807

Heat conduction and Navier equations solved for temperature distribution and displacements in elastic solids, considering time dependent boundary conditions, body forces and heat generation
14 p2535 A69-29364

Elastic and elastoplastic bodies, showing vector field for surface condition as sufficient condition for stability
15 p2707 A69-30621

Dynamic stability of elastic bodies with motion described by partial differential equation
15 p2652 A69-30860

Perturbation formula for frequencies as function of Poisson coefficient, considering vibration modes of elastic body subject to boundary conditions
15 p2713 A69-31097

Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts
16 p2872 A69-31906

Linear elastic columns dynamic stability under time dependent axial load, investigating almost-sure asymptotic stability
16 p2872 A69-31911

Wave generation in infinite micropolar elastic solid body analyzed by linearized equations of motion
17 p3053 A69-33018

Wave generation in infinite micropolar elastic body, studying axially symmetric displacement and rotation fields
17 p3053 A69-33019

Energy dissipation in elastic systems as function of limiting damping characteristics of oscillations
17 p3065 A69-33923

Dynamic equations solution for interacting rigid or elastic body system models using Cosserat bodies elastic theory, considering engineering applications
17 p3067 A69-34143

Book on solid bodies collision theory covering elastic bodies with ruled surfaces, dynamic effects associated with Rayleigh surface waves, thermodynamic effects, etc
18 p3210 A69-34259

Modified Bubnov-Galerkin-Ritz method for determining approximation coefficients in stress and displacement analysis, using mixed variational principle of elasticity theory
18 p3215 A69-34566

Load analysis for elastoplastic bodies by Prandtl-Reuss theory and Mises yield condition, considering avoidance of difficulties associated with nonlinear partial differential equation solution
18 p3216 A69-34571

Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions
18 p3216 A69-34578

Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods
18 p3223 A69-35036

Elastic bodies brittle stability weakened by cut, developing criterion for determining critical cut length
18 p3224 A69-35314

Green functions for displacement and rotation fields of infinite homogeneous isotropic centrosymmetric micropolar elastic body subjected to time dependent mass forces and momenta
18 p3226 A69-35459

Motion equations of holonomic system of elastic bodies subjected to scleronomic, ideal and statically determinate constraints, using Green tensor
19 p3374 A69-36584

Thermoelastic deformation and mean rotation divergence formulas for elastic simply connected micropolar body
19 p3440 A69-36586

Plastic deformation effect on dynamic buckling of elastic-plastic simple shallow truss subjected to step and impulsive loading
19 p3446 A69-36836

Mooney and Rivlin theories compared for strain energy function W of ideal superelastic material
20 p3624 A69-37586

Transient thermal stresses in heat treated elastic-perfectly plastic disks with temperature dependent yield stress, considering stress distribution sequence and residual stresses
20 p3629 A69-37974

Optimal control of flight vehicle consisting of long thin elastic body under torsional deformations, solving by method of successive approximations
21 p3760 A69-38852

Steady motion of frictionless indenters along surface of elastic layer in plane strain, using Fourier transform and Fredholm equations for numerical solution
21 p3837 A69-39155

Stress-strain state of homogeneous anisotropic elastic body under action of internal forces, deriving equations to generalize state
21 p3838 A69-39184

Sequential design for economic description of potentially redundant elastic structures, noting redesign sequence
21 p3842 A69-39302

Equations of motion of elastic dumbbell satellite and two-mass spring-connected satellite in orbit, using energy and Floquet theory to investigate spinning motion stability
21 p3817 A69-39759

Protoelastic materials defined in terms of protopotential function, discussing stress tensor dependency on displacement gradients within body
22 p4042 A69-40452

Saint Venant principle of elastic equivalence of kinematically equivalent displacement systems at small surface area of elastic body
22 p4048 A69-41276

Book on fundamentals of dynamics of deformable bodies of increasing dynamic complexity, using calculus of variations
23 p4226 A69-41474

Boundary value problem solution for inviscid fluid flow past compliant body with analytical behavior of flow discontinued at points
23 p4151 A69-41525

Laplace-Carson integral transforms for analyzing surface waves generated by central impact of two elastic bodies
23 p4226 A69-41702

Stress analysis in elastic bodies induced by axisymmetric strains in presence of mass forces and temperature gradients, obtaining equilibrium equation
23 p4229 A69-41997

Continuous dependence of boundary value problems of linear elastic body in smooth three dimensional region on force, elasticity and initial data
24 p4397 A69-42750

Contact stress distribution between two two-dimensional finite nearly rectangular elastic bodies with general surface configurations for surface load expressed in trigonometric series [ASME PAPER 69-APMW-9]
24 p4397 A69-42750

24 p4402 A69-43104

Axisymmetric Lamb wave propagation in semi-infinite micropolar elastic solid, considering time varying load on half space boundary
24 p4406 A69-43730

Wave generation in infinite micropolar elastic solid, determining displacement and rotation fields and strain state
24 p4406 A69-43731

ELASTIC BUCKLING

Plate theories derived via strain energy potential integration through thickness, noting constitutive equations applicability to elastic buckling and postbuckling
02 p0340 A69-12055

Direct matrix method for evaluation of critical loads and buckling modes for nonuniform flexural rigid plates having end and side constraints
03 p0522 A69-12866

Postbuckling behavior of elastic spherical shells from pressure and volume-displacement instrumentation and photography
03 p0524 A69-13062

Initial deviations or imperfections effects on load capacity of infinite and finite length thin circular cylindrical shells under axial compression [ASME PAPER 68-WA/APM-22]
04 p0669 A69-14398

Buckling equations for orthotropic cylindrical shells with eccentric spiral stiffeners derived through variation method of total potential
04 p0676 A69-14710

Elastic rod buckling under dynamic longitudinal compression load, determining critical load
04 p0679 A69-14926

Circular plate elastic stability under unidirectional compression, using Rayleigh-Ritz-Timoshenko method to determine buckling load
04 p0683 A69-15515

Axial buckling load for thin walled circular cylindrical shell, noting design of internal mandrel for control of boundary expansion conditions
05 p0831 A69-15581

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads [ASME PAPER 68-WA/DE-4]
05 p0839 A69-16169

Buckling of rod with initial deflection as sinusoidal half wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep
06 p1021 A69-17182

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method [AIAA PAPER 69-92]
06 p1027 A69-18060

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations [AIAA PAPER 69-93]
06 p1029 A69-18194

Snapping and buckling of simple elastic structures under dynamic load, noting influence of structural geometry and load duration [AIAA PAPER 69-22]
06 p1029 A69-18206

Thin walled symmetrical angle section beam stability under bending moment by section deformation or torsional buckling
08 p1410 A69-19892

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads
09 p1616 A69-21977

Linear theory of cylindrical panel buckling and circumferential restraint along straight edges under lateral pressure, using Donnell equations
09 p1621 A69-22782

Validity limits of formulas for critical buckling load for oscillating continuous beams found to be elastic buckling
11 p1969 A69-24349

Statistical parameters of critical load distribution in buckling of imperfection sensitive elastic structures, noting probability of failure
11 p1969 A69-24415

General perturbation theory for branching analysis of discrete structural systems, considering elastic postbuckling
12 p2179 A69-26213

Elastic buckling and initial postbuckling behavior of clamped shallow spherical shells under axisymmetric load
12 p2187 A69-26842

Equilibrium paths in initial postbuckling of elastic structural systems, discussing stability boundaries and relationships between imperfections and critical loads
13 p2359 A69-27261

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads
[ASME PAPER 68-WA/DE-4]
13 p2360 A69-27420

Thin elastic plates buckling under small normal load and external edge force
14 p2531 A69-28810

Buckling of ring stiffened cylinders subject to axial compression, considering prebuckling lateral wall displacements
14 p2534 A69-29030

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations
16 p2871 A69-31897

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations
16 p2872 A69-31905

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory
16 p2874 A69-32162

Local buckling of infinite continuous plane elastic membrane under longitudinal load in form of concentrated forces
16 p2875 A69-32293

Linear theory of elastic stability of structures, discussing deformation kinematics, perturbed and neutral equilibriums and solutions for buckling of beams, plate, shells, etc
17 p3054 A69-33042

Thin circular ring stability under uniform external transverse loading at various angles, discussing transverse shear deformation effects and buckling
17 p3061 A69-33707

Rod buckling under impact load, discussing compression strain wave front propagation
18 p3217 A69-34580

Buckling in process of loading idealized elastoplastic Shanley column, noting continuous increase possibility
18 p3217 A69-34596

Growth rate of stability loss intrinsic modes in elastic shells under severe load, discussing stress distribution during buckling
18 p3217 A69-34598

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves
18 p3218 A69-34624

Tension, bending and buckling torsion in thin walled beams described by extended beam model considered as one dimensional continuum
18 p3224 A69-35296

Buckling behavior of idealized Shenley rod consisting of linearly reinforced elastoplastic materials under compression, formulating constraints for stability
19 p3446 A69-36846

Simply supported rectangular plates experiments showing prediction on buckling load
19 p3447 A69-36854

Buckling of eccentrically stiffened thin circular elastic plate under circumferential uniform compression, obtaining equations and critical loads
20 p3622 A69-37221

Stress analysis of circular elastic plate buckling under radial compression, noting Kirchhoff hypothesis influence on critical value of thickness-to-radius ratio
21 p3834 A69-38722

Buckled rectangular plates with constrained edges, analyzing natural frequencies as basis for supersonic panel flutter analysis
22 p4046 A69-41049

Prebuckling deformation influence on compressive buckling load for orthotropic cylindrical shells with elasticity principal axes in axial and circumferential directions
22 p4047 A69-41182

Space frame radome model elastic buckling tests for load deflection and maximum load predictions, considering individual beam failure and complex instability
23 p4232 A69-42143

Flat square plates loaded along two opposite straight edges, analyzing postbuckling behavior and geometric imperfections effects
23 p4234 A69-42395

Circular cylindrical photoelastic shells buckling modes under axial compression using high speed isoclinic photography, discussing shallow shell equations applicability to early stages
24 p4404 A69-43652

Mechanical model for dynamic buckling of elastic imperfection-sensitive structures under step loading, using perturbation method
24 p4405 A69-43656

Orthotropic stiffness layer models for buckling of eccentrically stiffened shells of revolution with two unbonded orthotropic layers uncracked and circumferentially cracked
24 p4405 A69-43657

ELASTIC CYLINDERS

Mixed boundary value problem of elastostatics for isotropic elastic cylinder containing strip crack opened by internal pressure, using auxiliary functions
01 p0167 A69-10317

Dynamical strength of solid cylinder under axial loads increasing in time at given rate, using constitutive equations of thermodynamic theory
02 p0342 A69-12278

Dynamic pressure pulse over band on solid elastic cylinder surface, analyzing time stress distribution throughout elastic cylinder
04 p0670 A69-14408

Equilibrium and compatibility equations for axisymmetric stress distribution in finite length anisotropic elastic cylinder reduced to single integrodifferential equation
04 p0676 A69-14709

Small twist of elastic circular cylindrical tube with nonorthogonal cylindrical aeolotropy, noting zero and nonzero warping conditions effects
05 p0831 A69-15580

Elastic contact between two parallel cylinders with rough surfaces noting contact area, spots and stress distribution
06 p1023 A69-17373

Exponential decay of stresses in circular elastic cylinders subject to axisymmetric self equilibrated end loads
06 p1023 A69-17507

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects
07 p1232 A69-18718

Thermal stress concentrations in vicinity of cylindrical elastic inclusions embedded in elastic matrix, using displacement functions and photothermoelasticity
07 p1171 A69-18726

Axially symmetric torsion of finite elastic cylindrical rod partially bonded to elastic half space, discussing coupling between dual Dini series and integral equations
07 p1236 A69-19474

Two dimensional problems in classical theory of elasticity concerning zero normal stress and zero tangential stresses, noting formulas for right cylinder
08 p1415 A69-20660

Cylindrical elastic membranes with finite axisymmetric deformation, discussing exact solution by strain energy method
08 p1418 A69-21001

Three dimensional vibration analysis of circular homogeneous elastic cylinder, obtaining differential equations and zero stress conditions
09 p1612 A69-21601

Three dimensional analysis of torsional vibrations of circular elastic homogeneous cylinder, stressing new torsional vibrations
09 p1612 A69-21603

Plane thermal stress field in discontinuous temperature distribution within isotropic linear elastic circular cylinder of infinite length
10 p1793 A69-22884

Plane deformation in nonorthotropic body composed of various anisotropic cylinders with different elastic constants
10 p1799 A69-23156

Torsional vibrations of composite elastic orthotropic cylinders, including cylindrical shells and isotropic composite cylinder
10 p1800 A69-23243

Partial derivatives of harmonic and biharmonic functions at surface of cylinder for three dimensional problem in elasticity theory, considering displacement vector
11 p1976 A69-24777

Stresses in infinite solid elastic circular cylinder due to rotating line source of heat
13 p2364 A69-28206

Dynamic stresses in case bonded cylinder due to transient angular accelerations, presenting numerical results for incompressible elastic cylinder
13 p2364 A69-28209

Steady state problems of elastic orthotropic cylinder solutions applicable to boundary value problems of laminar orthotropic elliptical cylinders
13 p2369 A69-28528

Contact problem between elastic cylinder and rigid punch analyzed using integral equation, singularity isolation and series expansion
14 p2532 A69-28972

Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method
14 p2534 A69-29284

Surface displacements at end of elastic semiinfinite circular cylinders due to annular axisymmetric loading, employing Boussinesq solution
15 p2711 A69-30872

Creep calculation with temperature considerations for multilayer cylinder under nonisothermal load, comparing stress-strain state of viscoelastic and elastic cylinders
18 p3225 A69-35358

Hollow cylinder plane stress-strain state analyzed for effect of variable modulus of elasticity of cylinder material
19 p3436 A69-35858

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states
19 p3440 A69-36636

Elastohydrodynamic lubrication of cylindrical rubber surface sliding over glass plate, using optical interference technique
23 p4171 A69-42531

ELASTIC DAMPING

Longitudinal elastic wave damping, excitation and propagation in lithium niobate crystals at frequencies from 200 to 2000 MHz
03 p0487 A69-13729

Supercritical damping of nonlinear mass elastic system with damping force function dependent on fractional powers of velocity, noting impact deceleration
04 p0671 A69-14413

Constrained layer damping and conventional techniques combination for vibration and noise control
04 p0606 A69-14691

Frictional losses in straight tubing and effect of system on ball type valve, using polyurethane foam damped flexible silastic tube
04 p0608 A69-15331

Damped steady state response of elastic foundation beam subjected to cyclic moving loads to determine load movement frequencies for natural frequency excitation
[ASME PAPER 69-VIBR-13]
10 p1806 A69-24166

Polynomial coefficients multiplication by weighted damping factors for increased conformal mapping and boundary value problems solutions accuracy for doubly connected regions
12 p2178 A69-25998

Vibration control by alternate layers of high damping viscoelastic material, discussing damping and loss factors, beams design and attachment
15 p2622 A69-30704

Vibrations attenuation by viscoelastic sandwich shear damping, discussing examples of aircraft equipment racks, gyro and airborne circuit board mountings
15 p2622 A69-30705

Damping techniques using viscoelastic materials, discussing mechanical hysteresis
17 p2992 A69-33660

Structural damping effects on semiinfinite panel boundary aeroelastic limit by Galerkin variational method
19 p3437 A69-36148

Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives
20 p3620 A69-36997

Tail plane shape for optimal damping of rotational motion and elastic torsional deformations of aircraft body around longitudinal axis using calculus of variations
21 p3647 A69-38845

Numerical method for solution of nonlinear systems applied to damped and undamped motion with symmetrical and asymmetrical elasticity under harmonic excitation
22 p4040 A69-39937

ELASTIC DEFORMATION

Repeated elastoplastic deformation of polycrystalline body analyzed by dynamic model
01 p0164 A69-10082

Exact solution of shallow shells of revolution equations governing linear deformation compared with asymptotic integration procedure
01 p0166 A69-10234

Asymptotic integration of three dimensional elasticity equations for thin anisotropic shells and plates, deriving variability exponent of stress under given load
01 p0170 A69-10878

Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory
02 p0336 A69-11555

Deformation thermodynamics, discussing mechanics and thermokinetics of continuous media and wave propagation problem
02 p0339 A69-11990

Menabrea theorem for anisotropic elastic body with internal incompressibility constraint, discussing validity during thermoelastic transformation
02 p0341 A69-12194

Finite difference numerical integration technique for large elastoplastic deformation transient and permanent deflection responses of thin shells
02 p0347 A69-12518

Elastic-plastic and creep deformation calculations of cylindrical shell, providing better estimate of critical time at higher stress levels by including plasticity
02 p0348 A69-12539

Asymptotic constitutive approximations for rapid finite deformation of general viscoelastic materials, noting isotropic solids and fluids
03 p0523 A69-13020

Thermodynamics of materials with elastic range
03 p0529 A69-13955

Elastic ring subject to uniform hydraulic pressure on inner boundary and with two opposite slipless quarter-arcs on outer boundary, noting stress and deformation [ASME PAPER 68-WA/APM-17]
04 p0669 A69-14395

Resistance wire strain gages for measuring elastoplastic deformations in zones with high stress concentrations of strained machine elements
04 p0671 A69-14433

Difference equation for two dimensional elastic flow
04 p0681 A69-15286

Exact geometrical equations and internal equilibrium for elastoplastic deflections of orthotropic shells of revolution using thin shell theory
05 p0831 A69-15680

Displacement, distortions and unit stresses in rotating circular disk under plane strain
05 p0835 A69-15807

Constitutive equation for viscoelastic materials generalized, assuming instantaneous part of deformation to be nonlinear function of time dependent stress state
05 p0835 A69-15868

Coupled heat equation to calculate transient and steady state temperature distributions in viscoelastic solids under cyclic deformations
05 p0836 A69-15878

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads [ASME PAPER 68-WA/DE-4]
05 p0839 A69-16169

Elastic-plastic analysis of flat plates in membrane stretching and flexure, using method of initial strains [ASME PAPER 68-WA/PVP-10]
05 p0840 A69-16191

Elastic displacements for edge cracked plate specimens used as crack extension indicator in plane strain fracture toughness measurements
05 p0841 A69-16433

Finite elastic-plastic deflections of orthotropic shells of revolution, deriving exact geometrical relations and equilibrium equations
05 p0842 A69-16642

Flow theories of fluids with elastic deformation of substructure, treating suspensions of irregularly shaped deformable particles
05 p0752 A69-16738

Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function
06 p1021 A69-17177

Three dimensional compression problem for two elastic bodies in contact, determining contact pressure distribution by iteration procedure on computer
06 p1026 A69-18014

Vertistat H gravity gradient configuration prevents elastic deformation, permitting high pointing accuracy at synchronous altitudes
07 p1229 A69-18351

Supercritical elastic states of closed spherical shell
07 p1232 A69-18934

Existence and uniqueness theorems for boundary value problems of axisymmetric deformation of circu-

lar membrane at normal pressure, using membrane theory and shooting method
07 p1233 A69-19299

Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations
07 p1234 A69-19382

Stability of finitely deformed thin cylindrical shell of rubberlike material, showing bending resistance and thickness effects
08 p1413 A69-20414

Polar elastic media pure torsion solved, noting couple-stresses influence on Poynting effect
08 p1414 A69-20527

Cylindrical elastic membranes with finite axisymmetric deformation, discussing exact solution by strain energy method
08 p1418 A69-21001

Static axisymmetric deformation of elastic paraboloid of revolution, using integration of equilibrium equation in Lamé displacement
09 p1613 A69-21631

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states
09 p1617 A69-22078

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations
10 p1798 A69-23147

Couple-stresses and singular stress concentrations in elastic solids with locally unbounded deformations and stress reduction around hole
10 p1798 A69-23149

Concentrated loads in elastic Cosserat continuum involving body moments and small deformations
10 p1799 A69-23151

Plane deformation in nonorthotropic body composed of various anisotropic cylinders with different elastic constants
10 p1799 A69-23156

Long rectangular rods stability and vibrations under elastic deformations using bending theory
10 p1802 A69-24024

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion
11 p1970 A69-24609

Stress distribution around holes in thin shells and plates during large elastic displacements, considering hole size, loading and shallow spherical shells
11 p1972 A69-24654

Stress-strain relation in crystalline media for pure tension and elongation epsilon several times conventional elastic limit, verifying by testing Al alloy [ONERA-TP-695]
11 p1975 A69-24754

Direct measurement device for metallic material response to mechanical stresses from stress force and global displacement /including material deformation/
11 p1884 A69-24757

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces
11 p1979 A69-24813

Nonlinear shell theory, determining elastic deformation as function of stress under external loads using Lagrange variational principle
11 p1979 A69-24817

Three dimensional theory of elasticity for finite hollow cylinder under axisymmetric deformation, considering stress and pressure distribution over surface
11 p1983 A69-25022

Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution
11 p1983 A69-25090

Elastic two cavity revolving hyperboloid deformation by arbitrary forces solved by spherical functions
11 p1984 A69-25169

Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system
11 p1985 A69-25176

Deformations of thick walled cylinder with internal surface subjected to uniform pressure and externally connected to rigid chamber, calculating solid rocket booster charge
11 p1942 A69-25347

Elastic free-free body deformation during motion based on equations of motion valid for rigid body, noting dynamic Green tensor
11 p1994 A69-25604

Plane stress state in plate with different glide moduli during tension and compression, considering axisymmetrical deformations
12 p2178 A69-26003

Transverse impact along flexible couplings, deriving motion equations in presence of elastoplastic deformation
12 p2178 A69-26034

Torsion in composite inhomogeneous circular cylinder, obtaining solutions for elastic displacements and stresses
12 p2180 A69-26274

Elastic mirror flexure and distortion patterns, considering periodic nature of load in polar coordinates second flexure mode avoidance and friction elimination
12 p2056 A69-26407

Antiflexure cylinder for large astronomical mirror, noting support by astatic counterpoint levers and simple flanges
12 p2056 A69-26409

Finite plane deformations theory extended to incompressible materials with logarithmic change of volume proportional to pressure
12 p2181 A69-26613

Dynamic relaxation method for elastic deformation in mirrors, using tensor equations of elasticity in nonorthogonal curvilinear coordinates
12 p2187 A69-26890

Elastic deformation of cord reinforced compressible thin sheet and rectangular cuboid solved using linear stress strain law and strain tensor nonlinear components
13 p2359 A69-27262

Perturbation theory of antiplane elastoplastic deformations based on plasticity theory, considering circular hole in body under uniform shear
13 p2359 A69-27263

Plane stress theory for large elastic deformations of isotropic thin sheets, outlining successive substitutions method for neoHookean materials static and dynamic problems
13 p2359 A69-27320

Inverse deformation in elastic materials, using variational principle to obtain equilibrium equations properties
13 p2360 A69-27324

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads [ASME PAPER 68-WA/DE-4]
13 p2360 A69-27420

Elastoplastic deformations of thin axisymmetric shells of revolution with variable thickness, exemplifying shell with piecewise constant thickness
14 p2533 A69-28982

Constitutive equations for living soft tissues freely deforming under negligible stresses with Hooke law as limit
14 p2535 A69-29366

Elastic deformations of spherical sandwich shell of rigidly connected isotropic homogeneous layers, describing shell symmetrical expansion and inversion under stresses
15 p2707 A69-30582

Isothermal deformations in linear viscoelastic material under uniaxial stress, determining optimum strain rate history for maximum work lower bound
15 p2707 A69-30637

Sailplanes design, discussing structural flexibility, deformations, aeroelastic effects and plastics and man-made fibers
15 p2551 A69-30899

Coaxial deviator theory of nonlinear elasticity, applying deformation theory variant to shell theory
15 p2592 A69-31058

Sloping helicoid median surface with given parameters, obtaining equilibrium equations, elasticity and formulas relating deformations to displacements
15 p2714 A69-31197

Rotatory cylindrical shells supported at corners under symmetric load, determining deformation in arbitrary locations by moire method
15 p2715 A69-31546

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations
16 p2871 A69-31897

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations
16 p2872 A69-31905

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic

beams along edges, analyzing local deformations effect on shell strength and stability
16 p2873 A69-32131

Stress and deformation in cross section of beam during complex loading using steepest-descent method
16 p2873 A69-32132

Cylindrical shell aeroelastic dynamic stability subjected to supersonic flow field, considering geometric imperfections, edge constraint and prestability deformation
[AIAA PAPER 68-285]
16 p2874 A69-32159

Linear theory of elastic stability of structures, discussing deformation kinematics, perturbed and neutral equilibria and solutions for buckling of beams, plate, shells, etc
17 p3054 A69-33042

Attitude and simple stability of deformable earth pointing satellite
17 p3047 A69-33229

Static implications of strong ellipticity condition in linearized elasticity theory, exemplifying homogeneous deformations
17 p3058 A69-33415

Large deflections of thin nonlinearly elastic ring under external pressure, using two layer model
17 p3062 A69-33715

Elastohydrodynamic theory of spherical bodies in normal approach contact, discussing lubrication and elasticity equations
[ASME PAPER 69-LUBS-3]
18 p3213 A69-34384

Nonlinear equations for elastic strain of circular-to-ridal membrane shell under uniform pressure, computing stress and displacement fields
18 p3216 A69-34575

Equations of motion of rapidly rotating spacecraft, considering deformations of long elastic booms
18 p3207 A69-34582

Thin walled cylindrical shells deflections under axial impact load, assuming deformations resembling cylindrical surface bending
18 p3217 A69-34599

Stress and displacement waves propagation in thin walled elastic cylindrical shell under compressive axisymmetric force based on momentless theory
18 p3218 A69-34600

Sandwich beams optimal design determined for case of constraint on elastic deflection and for load factor at plastic collapse
18 p3218 A69-34623

Two dimensional theory for anisotropic plates motion derived, using asymptotic integration of three dimensional elasticity equations
18 p3224 A69-35297

Friction coefficient and elastic deformation magnitudes relation in polyurethane during sliding friction in various liquids /lubricants/
18 p3149 A69-35362

Green functions for displacement and rotation fields of infinite homogeneous isotropic centrosymmetric micropolar elastic body subjected to time dependent mass forces and momenta
18 p3226 A69-35459

Elastic oscillations of inhomogeneous orthotropic ring under time-variable axisymmetrical load analyzed by Fourier method
19 p3434 A69-35828

Equations of motion for axisymmetric elastic deformation of inhomogeneous body of revolution subjected to torsion and steady oscillations
19 p3436 A69-35845

Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions
19 p3438 A69-36306

Geometrical model for surface contact area, noting influence of nonlimitations on friction coefficient in elastic deformation
19 p3329 A69-36494

Thermoelastic deformation and mean rotation divergence formulas for elastic simply connected micropolar body
19 p3440 A69-36586

Longitudinal and transverse wave propagation in homogeneously deformed isotropic elastic solids, considering Hadamard and Green materials
19 p3440 A69-36588

Plane elastic deformation in isotropic homogeneous medium using displacement vector, discussing finite difference equations and application to rectangular boundary
19 p3441 A69-36719

Boundary conditions for shells with reinforced nonasymptotic boundaries, assuming coincident beam axis deformation with shell boundary deformation
19 p3443 A69-36781

Reducibility conditions of flow theory for smooth and piecewise smooth yield surfaces to relations of small elastoplastic deformations
19 p3443 A69-36794

Buckling and postbuckling of complete spherical shells with symmetric initial shape deviations and elastic deformations
19 p3446 A69-36834

Stress and strain concentration factors under initial stages of elastoplastic deformation for circular hole in infinite medium, using method of successive approximation
19 p3447 A69-36860

Clamped uniformly loaded rectangular plate large deflection elastic behavior approximate analysis, using perturbation method
20 p3620 A69-36998

Flat rectangular plates large deflection due to uniform lateral pressure and compressive edge loading analyzed through partial differential equations, difference equations and computer program
20 p3620 A69-37000

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design
20 p3621 A69-37064

Nonlinear theory based on Euler-Bernoulli hypothesis for axisymmetric deformations of heterogeneous orthotropic shells of revolution under rotationally symmetric mechanical and thermal loads
20 p3625 A69-37592

Asymptotic integration method of nonlinear elasticity equations for first approximation theory of anisotropic plates moderately large deflections
20 p3630 A69-38129

Rotation of antenna pattern of radio telescope parabolic mirror subjected to thermoelastic deformations due to asymmetric solar heating
20 p3497 A69-38307

Tail plane shape for optimal damping of rotational motion and elastic torsional deformations of aircraft body around longitudinal axis using calculus of variations
21 p3647 A69-38845

Optimal control of flight vehicle consisting of long thin elastic body under torsional deformations, solving by method of successive approximations
21 p3760 A69-38852

Multiple support wing deformations, obtaining bending equations solutions by matrix methods
21 p3835 A69-38872

Optimal control of rotational and transversal motions of elastic flight vehicles, considering torsional and flexural deformations
21 p3760 A69-38890

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure
21 p3837 A69-39088

Constitutive equation for nonlinear viscoelastic materials, noting validity for short times, slow motions or small deformations
21 p3840 A69-39288

Deformation of uniformly thick elastic circular plates containing circular holes reinforced by thin rigid elastic rings
21 p3846 A69-39713

Photoelastic behavior in amorphous solids, proposing microstructural mechanism for deformation birefringence
22 p3972 A69-40081

Protoelastic materials defined in terms of protopotential function, discussing stress tensor dependency on displacement gradients within body
22 p4042 A69-40452

Prebuckling deformation influence on compressive buckling load for orthotropic cylindrical shells with elasticity principal axes in axial and circumferential directions
22 p4047 A69-41182

Saint Venant principle of elastic equivalence of kinematically equivalent displacement systems at small surface area of elastic body
22 p4048 A69-41276

Large elastic deformations of isotropic materials by deflection of composite parallelepiped composed of elastic incompressible materials, applying Rivlin solutions
22 p4048 A69-41277

Book on fundamentals of dynamics of deformable bodies of increasing dynamic complexity, using calculus of variations
23 p4226 A69-41474

Deformation tractions in undeformed and curved cuboid flexure and inverse flexure determined by stress-strain relations for homogeneous isotropic compressible materials
23 p4226 A69-41521

Deformation of orthotropic layered elastic shells based on linear elasticity theory, assuming surface and stress constraints
23 p4226 A69-41535

Nonlinear differential equations for large deflections of multisandwich shells of arbitrary shape built of stiff and weak elastic layers, considering cylindrical shells
23 p4226 A69-41572

Thermoelastic stresses in rotating cylinders and disks with radial temperature distribution, deriving plane deformation approximate solutions
23 p4227 A69-41707

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on statics
23 p4228 A69-41970

Supercritical elastic states of closed spherical shell
23 p4228 A69-41971

Computerized evaluation of elastic deformations of 100 m parabolic reflector designs for Max Planck Institute radio telescope, outlining supports and dish structure
23 p4148 A69-42122

Large deflection of three dimensional bar structures stability analyzed by potential energy minimization method, considering radome design
23 p4232 A69-42141

Finite deformation of circular elastic membrane spinning with constant angular velocity, solving nonlinear differential equations by Runge-Kutta method for three boundary conditions
24 p4404 A69-43651

ELASTIC MEDIA

Temperature field and stress state in elastic plane with temperature insulated arc shaped crack
01 p0164 A69-10078

Stress-strain state of isotropic elastic medium using equations with stress tensor, noting role of curvilinear hole
01 p0164 A69-10081

Torsional oscillations of elastic half space set up by rigid circular disk examined by integral equation method
01 p0169 A69-10809

Electromagnetic field interaction with polarizable elastic medium in gravitation theory resolves definition of electromagnetic energy in matter
02 p0279 A69-11537

Equilibrium problem of elastic medium with stress couples in linearized elasticity theory, representing biharmonic function with aid of analytical functions
02 p0340 A69-12035

Viscoelastic materials thermomechanical behavior, discussing constitutive equation and derivation of stress tensor and entropy density from viscoelastic potential
02 p0344 A69-12294

Velocity field generated by vibrations propagating at finite velocity over elastic wing surface
02 p0190 A69-12571

Spherical wave reflection from nondeformable plane in elastic viscoplastic medium
03 p0528 A69-13926

Propagation of longitudinal transverse loading and unloading waves /with cylindrical symmetry/ in non-homogeneous elastic/viscoplastic medium, accounting for plastic dilatational strains
03 p0528 A69-13929

Controllable states of elastic heat conductors, analyzing deformations and temperature fields
03 p0529 A69-13957

Nonlinear constitutive equations for mixture of two elastic solids linearized, assuming small displacements and subsequent temperature changes
03 p0529 A69-14063

Stability against snap-through and final states of shallow arches on elastic foundations and subject to time varying loads
[ASME PAPER 68-WA/APM-26]
04 p0669 A69-14394

Torsional elastic wave scattering from penny shaped crack, determining local dynamic stress field
04 p0678 A69-14872

Acceleration wave propagation and growth in elastic materials, discussing thermodynamic influences
05 p0836 A69-15931

Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes

06 p1021 A69-17184

Specialization of field equations and boundary conditions of elastic dielectric for special case of rigid dielectric, using Lagrange multipliers

07 p1200 A69-19174

Fredholm equations from dual integral equations for studying penny shaped crack response to incident harmonic shear wave in elastic medium

07 p1233 A69-19175

Large amplitude longitudinal wave propagation in elastic rod solved by method of characteristics, prescribing end velocity as step function of time

07 p1233 A69-19176

Constitutive equations for propagation of plane waves of finite amplitude in nonsimple elastic solids, discussing holohedral isotropic solids and transverse harmonic circularly polarized waves

08 p1411 A69-20141

Dynamic stress intensity factor for axisymmetric loading of circular crack in infinite isotropic elastic medium

08 p1413 A69-20412

Polar elastic media pure torsion solved, noting couple-stresses influence on Poynting effect

08 p1414 A69-20527

Charged body moving at subsonic velocity normally through stratified elastic half space composed of film on homogeneous half space

08 p1417 A69-20753

Thermodynamics of nonsimple elastic materials with two temperatures, showing temperature and stress difference proportional to heat supply

08 p1422 A69-20847

Plane and three dimensional stress concentration studies involving asymmetrical stress tensors, noting contributions to moment theory of elasticity

08 p1419 A69-21177

Temperature and displacement fields in unbounded elastic space due to instantaneous point heat source action

09 p1621 A69-21495

Transversely isotropic elastic solid approximation for oriented fibers of polyethylene, nylon, polyethylene terephthalate and polypropylene, measuring elastic compliances

09 p1528 A69-21504

Finite elastic locking medium, discussing equation of state for thermodynamic variables and applications to thermoelasticity [IS-ERI-70]

09 p1612 A69-21561

Thermally generated stress wave propagation in dispersive elastic rod investigated experimentally and analytically, using ruby laser and differential equation

09 p1617 A69-22010

Reciprocity theorems of coupled and uncoupled thermoelasticity for macroisotropic and microisotropic simple homogeneous solids with microstructure

09 p1618 A69-22259

Micropolar elasticity using Green functions to solve wave equations in unbounded medium, noting effects of concentrated force and body couples

09 p1618 A69-22261

Micropolar thermoelasticity using Green functions to solve wave equations in unbounded medium and study displacement, rotation and temperature fields

09 p1618 A69-22262

Couple stresses effect on distribution of stresses in elastic solid due to crack analyzed on basis of Cosserat theory

10 p1800 A69-23242

Crack propagation through layer of viscous fibers joining orthotropic elastic half planes

10 p1803 A69-24029

Dynamics of conducting fluid stream coupled to elastic medium by transverse electric or parallel magnetic field, considering stability of system

11 p1923 A69-24289

Energy theorem for time dependent materials, deriving convexity conditions for minimum work and maximum complementary work functions

11 p1969 A69-24412

Elastic isotropic half plane weakened by circular hole with concentrated force applied along hole contour, considering stress distribution

11 p1972 A69-24653

Mixed boundary value problem concerning expanding elastic space weakened by cracks located at same plane solved by integral transforms and Fredholm equations

11 p1973 A69-24663

Stress concentrations in physically nonlinear multiply connected elastic media, discussing rods, thin plates and bodies with cavities

11 p1976 A69-24783

Two dimensional elastic reinforcements effects on stress, strain and elasticity of quasi-homogeneous anisotropic elastic medium

11 p1981 A69-24941

Thermodynamics of strain rate sensitive elastoviscoplastic solids, considering kinematic description of plastic deformation and choice of state variables

11 p1994 A69-25601

Axisymmetric problem of stress in elastic space weakened by plane annular slit solved by asymptotic method in terms of equations for parameter lambda

11 p1996 A69-25735

Representation formula for response function of elastic materials having given isotropy group

12 p2188 A69-26926

Plane problem for inhomogeneous elastic media based on assumption of elastic coefficients as functions of two variables defined in domain occupied by medium

13 p2362 A69-27977

Free and forced vibrations of elastic layer, using iteration procedure based on asymptotic integration of linear theory of elasticity dynamic equations

13 p2363 A69-28126

Stress and displacement fields for uniaxially loaded infinite elastic continua with doubly periodic array of holes and inclusions, using finite element method

13 p2363 A69-28133

Acoustic power transferred to plane homogeneous elastic structures and cylindrical shells by neighboring sound sources

13 p2363 A69-28186

Elastic medium properties recovered from reflected or transmitted plane waves at normal incidence, obtaining computational procedures and analytical solution from Schroedinger equation

13 p2300 A69-28664

Libroelastic wave propagation and dispersion characteristics /solid carbon dioxide/ evaluated by using Raman scattering measurements

13 p2286 A69-28668

Elastic materials with particle interactions of finite range, establishing continuum field and constitutive equations from particle mechanics

13 p2371 A69-28674

Linear elastic structural analysis for one, two and three dimensional continua [ASME PAPER 69-DE-13]

14 p2531 A69-28843

Tissue-type fiberglass reinforced material properties as prototype of continuous anisotropic hereditary elastic media

15 p2642 A69-30584

Thermoelastic stress in semiinfinite elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem

15 p2712 A69-31006

Reflection of plane waves from stress free flat surface of micropolar elastic half space, presenting reflection laws and amplitude ratios

15 p2714 A69-31147

Equilibrium cracks propagation in linear hereditary elastic media using Volterra principle

15 p2715 A69-31201

Moving load at plane interface between two elastic media in space related to direct trirectangular trihedron with vertically descending Oz axis

16 p2870 A69-31829

Equilibrium equations for elastic medium with stress couples, presenting first term of asymptotic expansion of solution for disk and simply connected region

16 p2871 A69-31830

Acceleration waves propagation in nonlinear conducting thermoelastic solid, treating homogeneously deformed and undeformed media

16 p2873 A69-32060

Somigliana dislocations effects on displacement field in linear isotropic elastic medium represented by integral with respect to line delineating surface

17 p3053 A69-33020

Energy dissipation influence on elastic elements random vibrations, obtaining relations between displacements rms value and random disturbance intensity

17 p3064 A69-33921

Linear isotropic elastic continuum dislocations distribution, deriving transport equations by statistical methods, noting analogy between energy/ momentum and MHD equations

18 p3212 A69-34352

Shock wave propagation induced by nonuniform instantaneous internal heating of nonlinear elastic strain hardening solid material [SAWE PAPER 69-APM-17]

18 p3214 A69-34393

Two point tensor function symmetries of nonlocal cohesive finite elastic materials determined from atomic lattice theory, obtaining Green function

19 p3444 A69-36798

Continuous particle media on basis of microstructure, discussing granular media deformation, elastic media dilatation, turbulent flow and dilute suspensions

19 p3446 A69-36833

Adjoint system for determining equilibrium stability of elastic continuum subjected to follower type surface tractions

19 p3446 A69-36835

Grade three strain-gradient elastic materials, deriving general solution to linearized field equations

20 p3621 A69-37073

Linearly elastic medium supersonic flow past rigid wedge, considering longitudinal and transverse perturbations interactions, dry friction, adhesion, slip and wedge physicochemical properties

20 p3515 A69-37439

Semiinverse method for elastic nonhomogeneity problems, considering case of seismic wave propagation

20 p3624 A69-37589

Superposition principle extended for wave propagation in composite materials /nonhomogeneous elastic media/

20 p3627 A69-37765

Dynamic stress concentrations and rigid body response of cylinder imbedded in elastic medium subjected to compressional wave

21 p3840 A69-39300

Linear elastic isotropic materials for model tests, describing properties of material composed of Araldite B and air

21 p3844 A69-39319

Overall elastic moduli evaluation for solid composite materials comprising matrix of homogeneous elastic materials embedded with cylindrical shape inclusions

24 p4396 A69-42731

Initially sharp plane pressure pulse propagation through linear elastic composite material, determining wave front shape change and stresses behind front [ASME PAPER 69-APMW-11]

24 p4401 A69-43103

Stress wave propagation in nonhomogeneous elastic media, considering curvilinear characteristics transformation into equal slope straight lines by change of independent variable

24 p4403 A69-43574

ELASTIC MODULUS

U MODULUS OF ELASTICITY

ELASTIC PLATES

Equations of linear theory of anisotropic elastic plates including Reissner-Green bending equations

01 p0168 A69-10387

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates

02 p0251 A69-12561

Stresses in infinite elastic plate containing rigid rectangular inclusion subject to uniform stress field, using complex variable method and Schwartz-Christoffel conformal mapping

02 p0348 A69-12796

Stresses around two reinforced circular openings in thin elastic plate of isotropic material under biaxial loads

02 p0349 A69-12799

Mathematical models to investigate transient plane bending wave propagation in elastic plates, using elasticity and plate theories

03 p0525 A69-13606

Elastic equilibrium stress condition of anisotropic plates with circular isotropic inclusions

04 p0667 A69-14264

Photoelastic analysis of HF stress waves propagating in bars and plates subjected to damped sinusoidal loading [ASME PAPER 68-WA/APM-27]

04 p0669 A69-14397

Stress field for skew hole determined from plane stress field for equivalent right hole, considering elastic plate penetrated by oblique circular cylinder

04 p0674 A69-14589

Large finite deflections of clamped thin elastic circular plate subject to transverse concentrated load at center solved by power series

04 p0675 A69-14596

Plate thickness effect on bending of elastic plate with crack, investigating stress distribution
04 p0678 A69-14890

Bending theory for sandwich plates with layers having different elastic properties using asymptotic integration of three dimensional equations
04 p0684 A69-15534

Pointwise limitation of field dislocation and bending moments in elastic plates
05 p0831 A69-15599

Stress-strain state for two dimensional physically nonlinear multiply connected elastic regions, noting plate with two identical circular holes
05 p0841 A69-16203

Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending
05 p0842 A69-16643

Stresses in finite width infinite elastic isotropic strip with equally spaced identical semicircular notches under uniform tension or pure bending
05 p0843 A69-16644

Vibration response of thin elastic plates to random loads
05 p0844 A69-16741

Nonlinear constrained optimization by nonrandom complex method demonstrated by minimum weight structural analysis of elastic ring and plate
06 p1022 A69-17366

Transient nonaxisymmetric elastic wave propagation in infinite isotropic elastic plate, using linear elasticity theory
06 p1024 A69-17509

Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight
06 p1026 A69-18017

Plate theories of linearly elastic materials under free undamped vibration, giving 500 references
[AIAA PAPER 69-24] 06 p1027 A69-18061

Fiber geometry and partial debonding effects on bond stress distributions around single rigid fiber in infinite elastic plate subject to tensile stress
07 p1170 A69-18717

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium
08 p1412 A69-20324

Stability and bending of flexible plates and shallow shells obeying hereditary relations solved by singular kernel functions
08 p1413 A69-20335

Forced vibration of thin elastic plate resting on elastic foundation and subjected to time dependent loads and external damping
08 p1416 A69-20692

Monograph on plane problem and bending problem for infinite elastic plate with doubly periodic set of circular holes
08 p1416 A69-20709

Inhomogeneous half planes equilibrium bonded by elastic layer, noting tangential stresses at interfaces
09 p1611 A69-21482

Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression
09 p1615 A69-21921

Finite element analysis of large deflections in thin elastic plates subjected to transverse loading, including nonlinear geometric effects
09 p1615 A69-21924

Flexible circular plate on elastic support connected at free edge, noting stress independent of working load
09 p1618 A69-22239

Boundary layer suction sound emission, analyzing turbulent flow past elastic plate with reinforced slots performing flexural and torsional vibrations
09 p1483 A69-22638

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations
10 p1798 A69-23147

Natural frequencies and associated composite loss factor for laminated plate with alternate elastic and viscoelastic layers, deriving partial differential equations
[ASME PAPER 69-VIBR-68] 10 p1805 A69-24158

Propagation of extensional cylindrical waves in elastic plates with free boundaries, considering plane stress and Lamb dispersion
11 p1969 A69-24414

Elastic unbounded isotropic plane weakened by doubly periodic system of identical holes, noting solution involving Cauchy type integral
11 p1972 A69-24652

Stress distribution around holes in thin shells and plates during large elastic displacements, considering hole size, loading and shallow spherical shells
11 p1972 A69-24654

Two dimensional problems solutions by contour smoothing methods, considering stress concentrations in reinforced or perforated thin elastic plates
11 p1973 A69-24661

Two dimensional elasticity and plate bending theories for calculating elastic isotropic panels and thin reinforced plates
11 p1974 A69-24664

Book on statics and dynamics of anisotropic and heterogeneous elastic structures covering thin heterogeneous anisotropic panels, elastic and sandwich plates, etc
11 p1986 A69-25236

Viscous flow-induced vibrations of elastically restrained flat plates in narrow channel, considering one dimensional viscous flow theory
11 p1991 A69-25515

Monochromatic waves propagation in infinite micropolar elastic plate, treating Lamb and Love waves
11 p1995 A69-25605

Thermal stresses in infinite elastic plates containing insulated circular holes, using two dimensional bipolar coordinates
12 p2180 A69-26267

Transverse symmetrical vibrations of thin elastic plates under Jacobi pressure distribution, giving displacement and velocity plots
12 p2180 A69-26271

Elastic mirror flexure and distortion patterns, considering periodic nature of load in polar coordinates, second flexure mode avoidance and friction elimination
12 p2056 A69-26407

Antiflexure cylinder for large astronomical mirror, noting support by astatic counterpoint levers and simple flanges
12 p2056 A69-26409

Mathematical bending theory for three layer elastic plates containing light or rigid fillers
12 p2182 A69-26678

Turbulent boundary layer sound emission effect on elastic plate, discussing pressure pulsation spectrum reflection
13 p2246 A69-27538

Stresses in elastic half plane with bonded disk of same elastic properties, describing stress production by expansion of disk
13 p2363 A69-28132

Thin elastic plates buckling under small normal load and external edge force
14 p2531 A69-28810

Bending of elastic triangular plates with free and supported corners under uniformly distributed transverse load determined using Ritz method
14 p2535 A69-29410

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates
15 p2608 A69-30258

Equations for bending of elastic cantilever plate with parallelogram shape in oblique angle coordinate system, constructing functions satisfying Poisson conditions at contour
15 p2710 A69-30861

Elastic anisotropic panels mechanics analyzed using differential equations stressing transverse displacements, anisotropic thermal expansion, shape imperfections and slip deformations
15 p2711 A69-30904

Variational principles and differential equations of thin elastic panels mechanics for aerospace structures
15 p2712 A69-30974

Linear bending theory of elastic anisotropic sandwich plates with strong and weak cores
15 p2713 A69-31025

Unsteady oscillations after rupture in thin homogeneous isotropic elastic plate, assuming deflection amplitude smaller than thickness
16 p2873 A69-32033

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium
17 p3058 A69-33317

Infinite isotropic elastic plate vibration under vertical harmonic load, deriving vertical displacement at center of loaded area
17 p3058 A69-33408

Noise transmission from turbulent boundary layer through flexible plate into closed cavity, emphasizing nonlinear plate stiffness and mutual interaction between plate and airflow
17 p3006 A69-33409

Elastic sandwich structures design for maximum strength, using potential energy functional to derive governing equations
17 p3062 A69-33708

Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems
17 p3062 A69-33713

Von Karman equations in dimensionless and finite difference forms for deflections of elastic circular plate with central hole under load solved by iteration
[ASME PAPER 69-APM-20] 18 p3214 A69-34395

Elastic beam-plate vibration natural frequency and dynamic instability in transverse static or oscillating magnetic field
[ASME PAPER 69-APM-B] 18 p3215 A69-34400

Elastic circular cylindrical panel behavior in fluid with acoustic shock wave, allowing for propagation waviness of elastic stresses
18 p3216 A69-34579

Critical stresses and crack development near holes in compressed elastic plate
18 p3218 A69-34603

Transient processes of strain wave propagation in elastic shells and plates under time varying loads
18 p3224 A69-35321

Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators
19 p3437 A69-35989

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure
19 p3438 A69-36203

Coupled dilatational and equivoluminal modes of free vibration for elastic prisms and polygonal plates, using Poisson ratio and wave path construction
19 p3444 A69-36801

Swept cantilever thin elastic plates bending analyzed by power series representing deflection in oblique coordinate system
20 p3621 A69-37207

Stability loss nonaxisymmetric distribution in elastic annular plates under axisymmetric heating, using Ritz method to determine critical temperature
20 p3623 A69-37327

Turbulent boundary layer sound emission effect on elastic plate, discussing pressure pulsation spectrum reflection
20 p3518 A69-38204

Nonlinearly elastic plates with reinforced edges, deriving differential equations for boundary conditions
21 p3833 A69-38574

Stress analysis of circular elastic plate buckling under radial compression, noting Kirchhoff hypothesis influence on critical value of thickness-to-radius ratio
21 p3834 A69-38722

Deformation of uniformly thick elastic circular plates containing circular holes reinforced by thin rigid elastic rings
21 p3846 A69-39713

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms
22 p4041 A69-40114

Network method for stability of thin nonlinearly elastic compressible material plates, noting difference operators for rigidly clamped plates
23 p4230 A69-42003

Force maintaining rigid inclusion embedded in elastic plate with rigid boundaries
23 p4235 A69-42465

Real space-time Green functions applied to turbulence induced infinite thin elastic plate vibration, analyzing mechanical dissipation effects
24 p4395 A69-42597

Forced symmetrical vibrations of circular elastic plate analyzed by applying Gaussian hypergeometric, Legendre functions and Jacobi polynomial
24 p4397 A69-42746

Charge materials purity found to increase beta-Ti alloys properties

01 p0094 A69-10216

Stress function formulas in asymmetric theory of elasticity obtained by completeness method

01 p0167 A69-10325

Upper and lower bounds for static or geometric field in two and three dimensional elasticity theory, using Green functions

01 p0167 A69-10328

Flexural vibration of unbalanced rotating shaft with nonlinear characteristic of elasticity and damping, using equations of motion

01 p0168 A69-10329

Elastic anisotropy and polycrystalline orientations in cold rolled titanium sheets investigated by Fourier series method, discussing Young modulus values

01 p0094 A69-10431

Two dimensional structural model of micropolar continuum involving orientable points joined by extensible and flexible rods

01 p0169 A69-10810

Elastic properties of epoxy resins, deriving relation by considering different shear properties in tension and compression

01 p0103 A69-11268

Differential equations for dynamical problems in plates obtained by symbolic approach involving power series substitution into linear elasticity dynamical equations

01 p0172 A69-11282

Uniqueness formulation of concentrated load problem in linear theory of couple-stress elasticity

02 p0338 A69-11720

Modified Galerkin method applied to approximate solutions of two dimensional elasticity equations of equilibrium

02 p0338 A69-11748

Expandable D 21 airlock scheduled for testing on NASA Orbital Workshop Flight based on elastic materials technique, noting more complex chemically rigidized concept [IAF PAPER SD-49]

02 p0334 A69-11949

Equilibrium problem of elastic medium with stress couples in linearized elasticity theory, representing biharmonic function with aid of analytical functions

02 p0340 A69-12035

Elastic constants of point defects for bcc and fcc crystals with vacancies and interstitials calculated by Born-Huang method for nonprimitive lattices

02 p0267 A69-12186

Two dimensional elasticity problem for two zero tangential stresses, expressing stress-strain states by biharmonic and harmonic functions

02 p0341 A69-12198

Kinetic theory of fracture initiation, discussing changes in relative orientation distribution of network chains

02 p0345 A69-12401

Elastic analogue in creep stress analysis under time dependent boundary conditions and strain hardening theory

02 p0345 A69-12418

Numerical solutions of elastic problems by conformal mapping and finite difference method applied to circumferentially grooved shafts in torsion

02 p0346 A69-12419

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs

03 p0484 A69-13282

General solutions of three dimensional elasticity theory applied to isotropic disks and plates, emphasizing homogeneous solutions

03 p0526 A69-13738

Computerized solution of three dimensional problems of elasticity theory using Ritz method

03 p0527 A69-13743

Two dimensional problem of elasticity by numerical solution, outlining program for computer

03 p0527 A69-13750

Integral equations solved numerically for general nonhomogeneous elastic inclusion problem, using linear elasticity theory

03 p0530 A69-14064

Elastodynamic boundary value problem solution for stability in linear elasticity

03 p0530 A69-14066

Elastohereditary characteristics of composite materials with random inhomogeneities based on Volterra principle

04 p0667 A69-14263

Stress distribution near circular hole in elastic layer

04 p0667 A69-14266

Plane problem of asymmetric elasticity based on biharmonic and Helmholtz equation for stress functions

04 p0667 A69-14267

Thermal stress determination in two dimensional problem of theory of elasticity, using stress simulation by thin plate bending

04 p0668 A69-14272

Variational principle for solving nonlinear equations in elasticity theory, theoretical mechanics and mathematical physics

04 p0668 A69-14273

Adiabatic elastic constants of molybdenum-rich rhenium alloys, studying concentration effects on bulk modulus, Debye temperatures and interatomic forces

04 p0613 A69-14455

Stored energy function of hyperelastic material by Lie group extension of Truesdell theorem on symmetry groups

04 p0680 A69-14945

Soviet handbook on elasticity, plasticity and creep theories, emphasizing stresses and strains in solid thin walled shells and plates under bending, tension and torsion

04 p0683 A69-15499

Linear theory applied to anisotropic elastic materials, discussing transition from compressible to incompressible elastic materials

05 p0834 A69-15795

Stresses in cylindrical shell with elastic core loaded on curved surface solved, using elasticity theory for core and membrane solutions for shell

05 p0835 A69-15871

Plastic moments calculation of continuous steel beams under various loading patterns

05 p0837 A69-16035

Elastic plastic stress distribution in compressed ring determined with postyield strain gages and stress-strain relationship from uniaxial tensile test

05 p0837 A69-16063

Variational principles for differential equations and initial and boundary value problems in dynamic geometrically nonlinear elasticity theory

05 p0840 A69-16202

Circular inclusion effect on stresses around line crack in sheet under tension based on elasticity theory

05 p0841 A69-16432

Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing

05 p0785 A69-16489

Plane problem of moment theory of elasticity for stress concentration near circular hole

05 p0842 A69-16502

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two dimensional problem in elasticity theory for anisotropic medium

05 p0843 A69-16680

Asymptotic integration of equations in theory of elasticity to develop approximate theory of momentless shells

05 p0843 A69-16689

Book on continuum mechanics covering elasticity, fluid mechanics, plasticity and viscoelasticity, emphasizing basic concepts

05 p0843 A69-16713

Compressional and shear wave velocities vs porosity for sintered perlitic bricks

06 p1000 A69-17009

Elastic stability of three dimensionally reinforced composite cylindrical shells [AIAA PAPER 69-122]

06 p1029 A69-18216

Stresses and displacement around crack under various conditions using two dimensional elasticity theory, deriving complex potentials for various loading types

07 p1231 A69-18269

Elastic limit of lunar outer layer determined from analysis of lunar crater dimensions variations as functions of diameter

07 p1212 A69-18600

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects

07 p1232 A69-18718

Complementary variational principles for boundary value problems in continuum mechanics of solids, obtaining generalized Hamilton canonical formalism

07 p1232 A69-19173

Elastic constants of composite materials by dispersion relation of sound waves for long wavelength, assuming periodicity in three dimensional rectangular lattice

07 p1236 A69-19457

Temperature dependence of single crystal elastic constants of nickel aluminide determined by ultrasonic wave propagation measurement

08 p1332 A69-20288

Elastic potential for obtaining localized strain theory, describing deformation characteristics of compressible and incompressible orthotropic materials with physical nonlinearity

08 p1412 A69-20328

Complementary plastic work theorems in piecewise-linear elastoplasticity applied to plastic and nonlinear elastic problems

08 p1414 A69-20528

Dislocation model of strength of elastically inhomogeneous crystalline materials based on elastic interactions between dislocations and periodic fluctuations of shear modulus

08 p1333 A69-20557

Two dimensional problems in classical theory of elasticity concerning zero normal stress and zero tangential stresses, noting formulas for right cylinder

08 p1415 A69-20660

Elastic stability of one dimensional structures analyzed by energy method, discussing deformable line, conservative forces and linear stability

08 p1418 A69-20846

Asymptotic two dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads

09 p1614 A69-21884

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates

09 p1614 A69-21885

Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression

09 p1615 A69-21921

Part-through and through-thickness fatigue crack growth observations in glassy plastics, using linear elastic fracture mechanics [SESA PAPER 1348]

09 p1617 A69-22013

Micropolar elasticity using Green functions to solve wave equations in unbounded medium, noting effects of concentrated force and body couples

09 p1618 A69-22261

Elasticity theory upper and lower bounds for two and three dimensional inhomogeneous problems and applications to plates

10 p1794 A69-22889

Pointwise bounding of eigenfunctions in vibration and stability problems in elasticity theory

10 p1794 A69-22925

Cosserat continuum and elasticity models of dynamics of composite materials, analyzing dispersive longitudinal waves

10 p1798 A69-23148

Stress concentration in Cosserat continua based on model of six elastic constants in linear isotropic and notch case

10 p1799 A69-23150

Dual continuum model of nonelastic processes in elasticity and dislocation theory, including incompatibility effects of interaction forces between structural elements

10 p1799 A69-23152

Continuum theory of dislocations and internal stresses in generalized Cosserat continuum as theoretical model for crystals

10 p1799 A69-23153

Numerical orthonormalized system of functions for formulating functional equations in potential and elasticity theory, considering boundary value problems

10 p1801 A69-23687

Integral transform solutions for Griffith cracks in brittle fracture theory, discussing disk and penny shaped cracks in cylinders and thick plates

10 p1801 A69-23688

Energy theorem for time dependent materials, deriving convexity conditions for minimum work and maximum complementary work functions

11 p1969 A69-24412

Modified Rayleigh-Ritz method for prediction of stress concentration in elastostatic problems for elastic continua, noting plate bending

11 p1969 A69-24413

Asymptotic methods for integral equations of plane mixed problems of elasticity theory for nonclassical regions

11 p1971 A69-24647

- Nonlinear elasticity theories emphasizing quadratic approximation of stress concentration
11 p1973 A69-24660
- Conformal mappings for solving boundary value problems in elasticity and plasticity theories for regions having singular points
11 p1973 A69-24662
- Two dimensional elasticity and plate bending theories for calculating elastic isotropic panels and thin reinforced plates
11 p1974 A69-24664
- Micropolar elasticity theory for materials exhibiting granular structure and microstructure, discussing deformation geometry and measurement, strain kinematics, microstrains, thermodynamics, etc
11 p1975 A69-24674
- Partial derivatives of harmonic and biharmonic functions at surface of cylinder for three dimensional problem in elasticity theory, considering displacement vector
11 p1976 A69-24777
- Two dimensional elastic reinforcements effects on stress, strain and elasticity of quasi-homogeneous anisotropic elastic medium
11 p1981 A69-24941
- Three dimensional problem of elasticity for transversely isotropic medium with cylindrical anisotropy, using partial differential equations for unknown functions
11 p1983 A69-25091
- Flat bar optimal cross section under tensile stress applied to minimize stress in large structural components using elasticity theory
11 p1986 A69-25203
- Dynamic stability of elastic beam type structures, using electronic simulation based on finite element approach
11 p1986 A69-25344
- Classification of second order quasi-linear partial differential equations with two independent variables in structural dynamics with emphasis on elastic structures
11 p1991 A69-25513
- Theorem for integral expansion applied to boundary value problems of mathematical physics and elasticity theory for single sheet hyperboloids of revolution
11 p1910 A69-25731
- Stress distribution in elements of unidirectionally fiber reinforced composite materials analyzed as function of fiber content and fiber-matrix elastic properties
12 p2180 A69-26263
- Volterra operator algebra for boundary value problems involving linear viscoelasticity with continuous relaxation time and delay time spectra
12 p2182 A69-26677
- Orthotropic properties and stress fields for configurations of fiber or whisker reinforced composite materials subjected to nonaxial loading, considering infinite elastic matrix
12 p2186 A69-26824
- Monograph on shell calculations by linear three dimensional elasticity theory, relating displacements and stresses
12 p2188 A69-26902
- Variational principle for admissible functions partial solution in elasticity theory involving solid bodies with cracks
13 p2359 A69-27290
- Elastic directed curves dynamic theory, considering Hamilton principle, mass conservation and behavior of action density function under rigid body variations
13 p2360 A69-27321
- Plane problem for inhomogeneous elastic media based on assumption of elastic coefficients as functions of two variables defined in domain occupied by medium
13 p2362 A69-27977
- Classical plasticity theory modified to include finite elastic and plastic strain components by considering thermoelasticity and plastic work irreversible processes
13 p2362 A69-28119
- Polyharmonic Gq functions derivation and applicability to three dimensional elasticity theory equations solutions
13 p2369 A69-28522
- Elastic medium properties recovered from reflected or transmitted plane waves at normal incidence, obtaining computational procedures and analytical solution from Schroedinger equation
13 p2300 A69-28664
- End loaded two layer laminated elastic strip stress concentration and self equilibrating traction distribution analyzed by eigenvalue equation
13 p2370 A69-28672
- Three dimensional equations of elasticity reduced to two dimensional equations of shell theory, discussing stressed states of thin elastic bodies
14 p2531 A69-28807
- Plane mixed boundary value problem in elasticity theory for infinite wedge
14 p2531 A69-28809
- Fracture mechanics based on linear elasticity for evaluating crack propagation resistance, presenting plane strain fracture toughness test results for high strength alloys
[ASME PAPER 69-DE-10] 14 p2461 A69-28842
- Integral equations for classical elasticity boundary value problems, stressing analogous Stokes flow hydrodynamic equations
14 p2535 A69-29361
- Working fluids elastic characteristics variability effect on hydraulic actuator dynamics, studying adiabatic and isothermal conditions
14 p2405 A69-29423
- Difference schemes for elasticity theory plane dynamic problem with mixed boundary conditions, establishing scheme absolute stability
14 p2536 A69-29474
- Iterative solution for difference equations approximating displacement vector determination problem in theory of elasticity, investigating algorithm convergence
14 p2536 A69-29479
- Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs
14 p2508 A69-29655
- Differential equations for elastic stress distribution in thin rotating shell with arbitrary profile, obtaining analytical dimensionless solutions for potential profiles
15 p2703 A69-30158
- Charge materials purity found to increase beta-Ti alloys properties
15 p2638 A69-30272
- Longitudinal internal cracks in deformed Al alloys initiated by elastic stress concentration in areas of highest flow rate gradient
15 p2638 A69-30277
- Plane contact problems in elasticity theory allowing for cohesive forces solved by integral and differential equations
15 p2706 A69-30578
- Infinite strip plane elastic problem reduced to Hilbert problem by employing multiply connected region and biharmonic solutions
15 p2707 A69-30625
- Coaxial deviator theory of nonlinear elasticity, applying deformation theory variant to shell theory
15 p2592 A69-31058
- Integral representation of p-analytic functions of complex variable, applying axisymmetric boundary value problems of elasticity theory for cylindrical surfaces and paraboloid of revolution
15 p2714 A69-31191
- Analogy between Timoshenko plate theory and moment theory of elasticity achieved by reducing Timoshenko equations to biharmonic and Helmholtz equation
15 p2715 A69-31205
- Potential functions applications to three dimensional static elasticity problems of parallelepipeds, using general stress solution
15 p2715 A69-31216
- Polycrystalline BeO sound velocities determined as function of pressure and temperature using pulse superposition method
16 p2802 A69-32338
- Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods
16 p2876 A69-32785
- Two dimensional plate theory with moment stress considerations derived from three dimensional elasticity theory, discussing reduction of equilibrium and compatibility equations
16 p2876 A69-32786
- Composition effect on tensile and flexural moduli of composites containing randomly distributed fibrous strands, establishing strength-composition relationships
17 p2991 A69-32960
- Soviet collection of articles on hydroaeromechanics and elasticity theory, number 7
17 p3054 A69-33121
- Random oscillations of elastoacoustic systems, obtaining solution for spherical shell containing acoustic medium
17 p3057 A69-33199
- Static implications of strong ellipticity condition in linearized elasticity theory, exemplifying homogeneous deformations
17 p3058 A69-33415
- Fracture processes in high strength materials, considering effect of stored elastic energy, component geometry, fracture toughness and environment
17 p2988 A69-33553
- Filamentary composites elastic constants calculation extended to hexagonal symmetry by long waves method
17 p3061 A69-33666
- Complete spherical shells transverse frequency analysis, comparing results of elastic theory and classical, improved and membrane shell theories
17 p3061 A69-33705
- Orthogonal polynomials for solving plane elasticity theory boundary value problems without constructing mapping functions, noting applications
17 p3067 A69-34144
- Pressurized cylindrical shell creep analysis by elastic procedure extension using computer program
17 p3067 A69-34211
- Book on numerical methods in applied theory of elasticity, discussing oscillations of twisted rods for theory of steam and gas turbine blades
18 p3211 A69-34331
- Temperature dependence of metal elastic properties including thermal strains effect on stress field, yield stress changes and elastic modulus variations
18 p3212 A69-34353
- Plane problems of elasticity theory solved numerically using conformal mapping
18 p3219 A69-34709
- Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression
18 p3224 A69-35318
- Fredholm integral equation solution of circularly axisymmetric stress state for bodies of revolution
18 p3226 A69-35375
- Silicon carbide coated boron fiber reinforced /Bor-sic/ Al composites tensile strength and elastic properties
19 p3344 A69-35926
- Plate material Poisson ratio determined by application of holographic interferometry to plate pure bending deformation contour lines
19 p3312 A69-36206
- Volume prediction of human body exposed to vacuum based on animal skin elasticity and anatomical features
19 p3258 A69-36456
- Generalized Love functions in axisymmetric micropolar elasticity, deriving stress functions expressing all state components
19 p3440 A69-36585
- Variational principle for Fredholm integral equations applied to inclusion and indentation problems in elasticity
19 p3440 A69-36589
- Elastic stability theory from thermodynamic viewpoint, considering postulates and energy equations
19 p3442 A69-36796
- Linear-elastic fracture mechanics applied to environment enhanced crack growth /stress corrosion cracking/
19 p3349 A69-36888
- Stiffness matrices in plane elasticity problems by Galerkin method, leading to simultaneous expressions related to finite element method
20 p3619 A69-36951
- Grade three strain-gradient elastic materials, deriving general solution to linearized field equations
20 p3621 A69-37073
- Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient
20 p3621 A69-37076
- Fourier transform methods in elasticity problems, considering three dimensional equilibrium equations in elastostatics in terms of displacements
20 p3622 A69-37282
- Elastic properties of hot pressed polycrystalline quartz and rutile as function of pressure, obtaining pressure coefficients of compressional and shear wave velocities
20 p3583 A69-37502
- Collection of papers on mechanics including quantum theory, mechanics of micropolar continua, elasticity and plasticity, rheology, etc
20 p3623 A69-37580
- Elastic constants of composite containing parallel cylindrical fibers, discussing disturbance in stress field
20 p3626 A69-37759

Analog method for determining structural creep displacement by setting up boundaries for linear elasticity and perfect plasticity

20 p3628 A69-37915

Shell elasticity calculation method, discussing stress state model, equilibrium conditions, shell geometry, etc

21 p3832 A69-38419

Nonlinear theory of elastic membranes accounting for thickness effects, obtaining field equations and constitutive relations for various cases

21 p3832 A69-38465

Composites elastic behavior, considering stress-strain in anisotropic lamina, composite plates and shells theory, thermal stresses and buckling for improving heterogeneous structures design

21 p3836 A69-38931

Diffusion layers and elasticity-dependent interdiffusion coefficients of Ti binary systems, using X rays

21 p3745 A69-38954

Asymptotic solution, existence and uniqueness of integral equations occurring in elasticity theory and mathematical physics

21 p3772 A69-39618

Soviet collection of papers on static and dynamic problems in elasticity and plasticity theory covering plates, shells, beams, etc

22 p4038 A69-39911

Strain anisotropy matrices behavior along strain trajectories of arbitrary curvature, studying matrices and elastic constants dependence

22 p4039 A69-39914

Strain anisotropy matrix construction for various strain trajectories from elastic properties of expression relating stress and elastic strain deviators

22 p4039 A69-39915

Airway distensibility effect on elastic behavior of human lungs, noting compliance and resistance at different breathing frequencies for diseased lungs

22 p3873 A69-40205

Variational method using Hamilton principle and calculus of variations to determine elastic curve and internal forces in static or dynamic loaded beam

22 p4043 A69-40459

Elasticity boundary value problems solution based on equilibrating method and differential equation

22 p4046 A69-40967

Mechanical properties of fiberglass reinforced textile at normal temperature, noting applicability of elasticity formulas

23 p4179 A69-41994

Three dimensional mixed boundary value problem in elasticity by dominant states method, examining generalized Fourier series feature in Legendre polynomials

23 p4229 A69-41998

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods

23 p4232 A69-42142

Fcc metals higher order elastic constants calculated by Morse potential function, considering atomic interactions truncation and pressure derivatives

23 p4233 A69-42337

Soviet book on resistance of materials to deformation and fracture in complex stress states covering elasticity, mechanical theories of limiting stress state, experimental verification, etc

24 p4402 A69-43233

Orthotropic fiberglass/epoxy faced honeycomb aircraft type sandwich structure elastic properties by edgewise compression test

24 p4403 A69-43443

ELASTIC SCATTERING

Soviet book on atomic collisions and elementary processes in plasma covering atomic interactions, elastic and inelastic collisions, negative ions, autoionization, ion mobility and recombination

01 p0132 A69-11200

Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern

02 p0298 A69-12098

Elastic and inelastic collisions between deformable bodies, using Michelson interferometer with He-Ne laser as source

02 p0282 A69-12607

Elastic scattering cross section for low energy electrons on metastable He atoms, using polarized orbital method

03 p0469 A69-12922

Elastic scattering of slow electrons by negative H and positive Li ions, calculating differential cross sections and phase shifts

03 p0469 A69-12924

Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees

03 p0472 A69-13464

Transport phenomena analysis in n-InSb semiconductors during elastic/inelastic current carrier scattering

03 p0492 A69-14171

Elastic scattering of electrons from argon atoms in argon air plasmas by shock tube microwave reflection method, measuring power reflection coefficient

[AIAA PAPER 68-138] 04 p0632 A69-14701

Angular distribution of reactive elastic scattering analyzed by opacity function /reaction probability/

04 p0554 A69-14859

Elastic bodies collisions in presence of thermoelastic effects, investigating local inertial and thermoelastic forces effect on compression region shape

05 p0841 A69-16207

Vibrational excitation by electron impact in kinetic energy range 30-60 eV studied for water vapor and carbon dioxide, determining intensities relative to elastic scattering

06 p0960 A69-17108

Energy spectra of muons determined from knock-on electrons projected angles of emission in C, Al and Cu

06 p0991 A69-17305

Cross section calculations for elastic and inelastic electron collisions with atoms, ions and molecules and ionization of atomic systems by electrons and photons

07 p1187 A69-19660

Electron transport parameters in noble gases at low electric field intensities, elastic and inelastic scattering and Boltzmann transport equation

08 p1362 A69-20285

Quantum theory of line broadening and shift, relating adiabatic and diabatic collisions to elastic and inelastic scattering of perturbers

08 p1363 A69-20464

Channel coupling effects in elastic electron-atom collisions involving electric dipole transitions, noting phase shifts and differential cross section

09 p1542 A69-21623

Exact solutions for two state potential curve crossing in subexcitation molecular collisions in terms of various decoupling schemes

12 p2131 A69-25983

Elastic proton scattering measurements, noting consistency with statistical theory when diffraction is taken into account

13 p2302 A69-28368

Elastic and inelastic elementary particle collisions described by Feinman diagrams, discussing computer results for high energy particle interactions

13 p2303 A69-28369

Elastic collision effect on gas laser atoms velocity distribution and gain factor determined for strong collision model

14 p2459 A69-29388

Resonances in elastic cross section for electron/hydrogen atom scattering noting wide structure

15 p2657 A69-31265

Elastic collision operator for relativistic Lorentz gas converted to differential form using Fokker-Planck limit for anisotropy segments

16 p2817 A69-31668

Elastic scattering cross sections of negative pions by deuterons compared with Glauber model calculations

17 p3007 A69-32885

Gas laser power dip in presence of elastic collisions, using equilibrium equations for particles velocity distribution function

17 p2983 A69-33972

Quasi-plastic impact resulting from incomplete elastic collision of two material points in presence of dry Coulomb friction, noting engineering role in pneumatic equipment

18 p3215 A69-34568

Elastic scattering cross sections for 21-Mev incident protons measured for nuclei differing in mass, determining optical model potential

18 p3179 A69-35489

Heated supersonic beam study of He-Ar intermolecular potential, determining total elastic collision cross section as function of velocity in scattering chamber

19 p3377 A69-36183

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature

19 p3378 A69-36186

Differential cross sections for elastic scattering of protons by Ar atoms in energy range 12.7-44.1 eV, estimating internuclear separation

20 p3580 A69-37499

Wave scattering in elastic medium by discontinuity line or finite crack, noting dynamic stress intensity dependence on incident wavelength and Poisson ratio

21 p3840 A69-39293

Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for non-local Lagrangian

21 p3775 A69-39467

Diatomic molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation

21 p3775 A69-39665

Stueckelberg formulation for transition probabilities to interpret perturbation effects in elastic scattering differential cross section measurements

22 p3987 A69-41005

Shape resonances in low energy elastic scattering of electrons by C, N and O, discussing ground state configurations and close coupling equations corrections

23 p4193 A69-41452

Negative pions elastic scattering from hydrogen, confirming differential cross section minimum for specific incident momentum-scattering angle region

24 p4352 A69-43049

Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models

24 p4352 A69-43123

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei

24 p4352 A69-43125

Elastic differential Li ion scattering cross sections on helium, nitrogen and oxygen

24 p4354 A69-43817

Elastic electron scattering by metastable states of rare gases, using effective potential matching experimental binding energy of negative ions

24 p4354 A69-43818

ELASTIC SHEETS

Stress distribution near circular hole in elastic layer

04 p0667 A69-14266

Load diffusion from transverse tension bar into semiinfinite elastic sheet, considering line and area contact methods of stringer attachment

[ASME PAPER 68-WA/APM-15] 04 p0669 A69-14396

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate

[AIAA PAPER 69-164] 06 p0914 A69-18163

Boundary determination for separating elastic and plastic regions of infinite perforated sheet with triangular network of circular holes

11 p1996 A69-25736

Plane stress theory for large elastic deformations of isotropic thin sheets, outlining successive substitutions method for neoHookean materials static and dynamic problems

13 p2359 A69-27320

Two dimensional stress analyzed near crack in infinite elastic sheet, considering crack shape and Young modulus

19 p3440 A69-36638

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate

[AIAA PAPER 69-164] 24 p4306 A69-43683

ELASTIC SHELLS

Elastic shell nonlinear theory, introducing nonsymmetric stress tensor and principles of virtual work and objectivity

01 p0166 A69-10166

Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory

02 p0336 A69-11555

Three dimensional elastic theory using parametric expansion method developed for cylindrical translation shell profiles

02 p0338 A69-11718

Existence and uniqueness of weak solutions in linear theory of stable equilibrium position for inhomogeneous elastic thin walled shells

02 p0340 A69-12036

Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field

02 p0341 A69-12256

Matrix displacement method for nonlinear elastic analysis of shells of revolution under symmetrical and asymmetrical loadings

02 p0346 A69-12511

Postbuckling behavior of elastic spherical shells from pressure and volume-displacement instrumentation and photography

03 p0524 A69-13062

Stress diffusion from axially loaded stiffeners into cylindrical elastic shells

03 p0530 A69-14065

Elastic noncircular orthotropic conical shell stress-strain state, obtaining differential equations reducible to integrodifferential equations solvable by iteration

04 p0673 A69-14494

Variational theorems for stress function formulation of boundary value problems in linear theory of thin elastic shells

04 p0678 A69-14894

Kirchhoff-Love hypothesis error dependence on stressed state variability index in theory of elasticity for closed spherical shell under uniform surface load

04 p0680 A69-14927

Stability of circular cylindrical viscoelastic and elastic shells with local effects due to radial load on circumference or thermally induced tangential stress

04 p0680 A69-14928

Poincare sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis

04 p0683 A69-15495

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse reinforcement ribs, initial defects and under large strains

05 p0832 A69-15691

Bending equations for shallow elastic three layer asymmetric shell with different isotropic layers and transversely isotropic rigid filler at various temperatures

05 p0840 A69-16197

Three layer structure theory, discussing thin elastic sandwich shells with middle layer susceptible to transverse shear

06 p1025 A69-17615

Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight

06 p1026 A69-18017

Local stability of thin walled elastic shells of revolution subjected to external pressure

07 p1237 A69-19686

Finite elements for analysis of flexible shells, considering Kirchhoff theory for transverse shear deformation and problems involving rotations and buckling

08 p1411 A69-20142

Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying irrotational motions in compressible and incompressible ideal fluids

09 p1613 A69-21720

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads

09 p1616 A69-21977

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations

10 p1798 A69-23147

Stress concentration at holes and cavities in thin elastic shells under static and dynamic loads, considering physical nonlinearities of material

11 p1974 A69-24665

Static and dynamic stability of flexible shallow spherical shell under axisymmetric load and elastically hinged along contours

11 p1976 A69-24763

Thin elastic shell interior equations based on stress and strain, discussing shell description, strain derivatives plate deformation into cylindrical shells, etc

11 p1977 A69-24802

Thin elastic shell theory, using iterative process to develop differential equation integrals for interior state of stress

11 p1977 A69-24804

Nonlinear theories of deformable surfaces as two dimensional generalized continua applied to elastic shells, emphasizing elastic Cosserat surface

11 p1978 A69-24805

Consistent elastic shell theory based on expansion of sought solutions in power series over distance between point and middle surface

11 p1978 A69-24806

Continuum theory for thin elastic shells with local structural effects, emphasizing shell constituted by Cosserat material

11 p1978 A69-24809

Asymptotic methods for three dimensional equations in thin and thick elastic shell theory for determining two dimensional systems

11 p1978 A69-24810

Linear thin shell theory in complex dependent variable form for determining fourth order partial differential equations, considering elastic shells with edge loads

11 p1978 A69-24811

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects

11 p1981 A69-24943

Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution

11 p1983 A69-25090

Book on statics and dynamics of anisotropic and heterogeneous elastic structures covering thin heterogeneous anisotropic panels, elastic and sandwich plates, etc

11 p1986 A69-25236

Stochastic problems in thin elastic shell theory solved by equations obtained by linearizing shell equations near initial state of stress

11 p1996 A69-25732

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions

12 p2177 A69-25881

Quasi-shallow shells theory applicability to thin elastic shallow shells, emphasizing use of function W/δ

12 p2178 A69-26001

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells

12 p2181 A69-26609

Axisymmetric elastic stresses in ring stiffened segmented shells of revolution, noting finite difference method for nonlinear analysis and computer program

12 p2185 A69-26818

Plane strain solution for thick walled viscoelastic cylinder bonded to thin elastic shell from deformation rate and strain, including inertia effects

16 p2871 A69-31876

Approximate analytic solution to transient response of infinitely long cylindrical shell surrounded by viscoelastic medium, discussing composite and elastic shells

16 p2871 A69-31877

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory

16 p2874 A69-32162

Damped vibrations of elastic open cylindrical shell under arbitrary loading, obtaining mean square of bending from correlation theory

17 p3054 A69-33094

Local stability of viscoelastic shells of revolution under axisymmetric loads, discussing asymmetric snapthrough of dome

18 p3216 A69-34573

Collocation method applied to solving contact thermoelasticity problem for short thick walled hollow cylinder attached to thin elastic shell in axisymmetric temperature field

18 p3217 A69-34595

Growth rate of stability loss intrinsic modes in elastic shells under severe load, discussing stress distribution during buckling

18 p3217 A69-34598

Nonlinear axisymmetric oscillations and motion stability of cylindrical wound elastic glassfiber shell under time dependent uniform internal pressure

18 p3222 A69-34975

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

18 p3224 A69-35319

Transient processes of strain wave propagation in elastic shells and plates under time varying loads

18 p3224 A69-35321

Weak moment shells made from materials with different elastic moduli, developing theory based on undeformable normals

18 p3225 A69-35367

Resonant oscillations amplitude of nonlinearly elastic hinged cylindrical shell determined with cubic equation taking into account Hooke law, linear stresses, shell theory displacements, etc

19 p3435 A69-35843

Contact problem of two thin elastic shells within Kirchhoff-Love theory, discussing constitutive equations

19 p3438 A69-36305

Thin elastic shells internal stress state by iteration of two dimensional equation of general linear theory

19 p3443 A69-36790

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation

19 p3443 A69-36792

Elastic closed and truncated conical shell stability with initial deflections under dynamic critical loading

21 p3834 A69-38716

Asymmetrical oscillations of cylindrical shell with elastic bottom containing liquid, discussing liquid level influence on natural oscillation frequencies

21 p3834 A69-38718

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations

21 p3834 A69-38719

Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method

21 p3835 A69-38723

Strain rate-load relations in elastoplastic shells reaching yield point, discussing variational method applicability

21 p3838 A69-39189

General system of equations derived for nonaxisymmetric oscillations of elastic spherical shells, obtaining expressions for oscillations from torsion, tension and bending

21 p3839 A69-39199

Deformation of orthotropic layered elastic shells based on linear elasticity theory, assuming surface and stress constraints

23 p4226 A69-41535

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method

23 p4230 A69-42004

Dynamic response of anisotropic elastic cylindrical and spherical shells determined by application of Hankel transforms, considering time dependence of loads

23 p4235 A69-42481

Transverse acoustic wave excitation of elastic circular cylindrical sandwich shell submerged in infinite fluid medium, describing simultaneous equations development for modal response

[ASME PAPER 69-APMW-17]

Axisymmetric vibration of shallow spherical caps, using nonlinear dynamic equations and associated variational equation of motion for elastic spherical shells

[ASME PAPER 69-APMW-6]

24 p4401 A69-43100

ELASTIC STABILITY
U DAMPING

ELASTIC SYSTEMS
Normal modes and natural frequencies of combined linear elastic structures resting on immovable base

04 p0678 A69-14870

Natural longitudinal single frequency oscillations of system of n material points connected in series by nonlinear elastic threads and with energy dissipation

05 p0832 A69-15687

Maximum index of exponential growth of solution of linear Hamiltonian equation with periodic operator coefficient encountered in dynamic stability of elastic systems

07 p1231 A69-18501

Random oscillations of nonlinear elastic system described by nonlinear partial differential equations

11 p1918 A69-24781

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates

11 p1982 A69-24950

Gradient iterative methods for finite element eigenvalue problem associated with stability and vibrations of elastic systems based on Rayleigh quotient

16 p2871 A69-31898

Holor algebra with tensor notations applied to elastic structures/discrete systems/, discussing inertia and stiffness tensors

21 p3831 A69-38415

Damping effects on elastic systems stability under nonconservative forces, correlating stability and quasi-stability regions

22 p4040 A69-39981

Matrix method for analyzing elastic structures linear transient response to time dependent loads and temperature change

24 p4399 A69-42988

Apparatus for generating HF shock fronted pressure waves in resonant tube
 06 p0906 A69-17149
 Transient nonaxisymmetric elastic wave propagation in infinite isotropic elastic plate, using linear elasticity theory
 06 p1024 A69-17509
 Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow
 [AIAA PAPER 69-137]
 06 p0913 A69-18078
 HF instability of steady combustion process with allowance for elastic strains in chamber walls
 07 p1242 A69-18993
 Forced vibrations in semibounded elastic bar with various moduli of elasticity, discussing reversing longitudinal force and elastic waves propagation
 10 p1799 A69-23155
 Elastic release wave and pressure drop measurement in 2024-T4 aluminum at 313 kb for dynamic yield strength, considering surface velocity and stress
 10 p1712 A69-23665
 Elastic waves propagation in inhomogeneous composite media, considering coefficient of structural stress concentration
 11 p1972 A69-24649
 Two dimensional contained plastic deformation in asymmetrical elasticity theory based on Cosserat medium, examining boundary value problems, stress concentration and elastic wave propagation at holes
 11 p1973 A69-24659
 Elastic waves propagation in micropolar cylinder, treating longitudinal and torsional monochromatic waves in Cosserat medium
 11 p1995 A69-25606
 Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency
 12 p2182 A69-26656
 Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency
 12 p2182 A69-26659
 Thermoelastic waves in stretched circular cylindrical bar, analyzing displacements, secondary pressure and temperature field by using Frobenius method
 12 p2189 A69-27115
 Pressure waves interaction with solid fuel hot surface at HF based on linear theory of acoustic instability in condensed systems
 13 p2371 A69-27383
 High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses
 [AIAA PAPER 69-360]
 13 p2283 A69-28293
 Couple stresses effect on dynamic stress concentrations, considering elastic compressional wave diffraction by cylindrical discontinuity
 13 p2369 A69-28351
 Elastic microwaves propagation attenuation along lithium niobate crystals trigonal axis at various temperatures
 15 p2665 A69-30040
 Maser amplification of 9.5 GHz longitudinal elastic waves in divalent nickel impurity ions doped sapphire by stimulated emission from inverted spin population
 16 p2795 A69-31554
 Inhomogeneity effects on elastic waves generated by impulsive loading of surface using asymptotic method, discussing high stress intensification regions
 16 p2873 A69-32157
 Elastic wave reflection and refraction around cracks, considering plane harmonic compressional and vertically-horizontally polarized shear waves
 17 p3053 A69-32986
 Schlieren method for visualization of refractive index changes in transparent materials, discussing application to study of elastic wave fields
 17 p2973 A69-33322
 Canonical forms for three dimensional diffraction problem of elastic harmonic waves propagating along circular cylinders infinite array
 19 p3437 A69-36144
 Finite chemical reaction rate detonation wave interaction with rarefaction wave, noting mixture activation energy and heating power influence
 19 p3298 A69-36384
 Microwave elastic propagation in single crystal specimen of yttrium-iron-garnet ferrite, discussing attenuation
 21 p3780 A69-38774
 Air pressure wave forces on missile from silo wall motion resulting from close nuclear blast, using acoustic wave equation for concentric cylinder flow
 21 p3691 A69-39765

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
 22 p3929 A69-40112
 Turbomachinery periodic structures design to improve tolerance to inflow distortion and resonant oscillatory flows, considering large amplitude pressure waves propagation
 [SAE PAPER 690388]
 23 p4201 A69-41666
 Longitudinal elastic waves produced in truncated hollow Al cone due to steel spheres impact
 [ASME PAPER 69-APMW-15]
 24 p4401 A69-43101
 Three dimensional and shell theory analysis of nonaxisymmetric harmonic elastic wave propagation in hollow elastic sphere
 [ASME PAPER 69-APMW-7]
 24 p4402 A69-43105
 Computerized spectral analysis of vibrational frequency due to elastic waves in isotropic hollow spherical shells

 Uniqueness theorem for equations of dynamics of viscoelastic bodies, using energy and hereditary elasticity considerations
 08 p1415 A69-20658
 Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations
 14 p2533 A69-28985
 Axisymmetric impact of circular cylindrical plates, obtaining two dimensional dynamic stress distributions for materials of linear elastic compressibility and plastic behavior in shear
 14 p2534 A69-29027
 Wing elastic strains effect on vertical velocity in downwash, noting wing tail combination
 18 p3086 A69-34999
 Completeness and relations between potentials and stress functions in micropolar elasticity and thermoelasticity
 19 p3439 A69-36476
 Continuous dependence of boundary value problems of linear elastic body in smooth three dimensional region on force, elasticity and initial data
 24 p4397 A69-42750
 Mathematical flow graphs application in analysis and design of elastomechanical structural systems
 [AAS PAPER 69-151]
 24 p4339 A69-42816
ELASTOHYDRODYNAMICS
 Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder
 01 p0059 A69-10307
 Elastohydrodynamic lubrication, discussing film thickness and dependence on fluid hydrodynamics and contact zone deformation
 01 p0088 A69-11324
 Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage
 [ASLE FICFS PREPRINT 16]
 15 p2621 A69-30493
 Elastohydrodynamic lubrication film thickness in finite elliptical contact determined by two dimensional Reynolds equation in inlet region, using finite difference approximation
 [ASME PAPER 69-LUBS-17]
 18 p3120 A69-34379
 Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity
 [ASME PAPER 69-LUBS-11]
 18 p3140 A69-34381

Elastohydrodynamic theory of spherical bodies in normal approach contact, discussing lubrication and elasticity equations
[ASME PAPER 69-LUBS-3]

18 p3213 A69-34384

Cage and roller slip in high speed roller bearings over steady radial loads by measurement and theory

20 p3547 A69-37066

Surface texture effects, discussing metallic and elastomeric contacts, measurement, profile, model parameters, adhesion, hysteresis, lubrication, squeeze films, macroelastohydrodynamics and randomness

23 p4170 A69-42359

Elastohydrodynamic lubrication of cylindrical rubber surface sliding over glass plate, using optical interference technique

23 p4171 A69-42531

Undissolved air effects on working fluids elastodynamics in aircraft hydraulic actuators

24 p4255 A69-43076

ELASTOMERS

NT THIOPLASTICS

Elastomeric bearings for support of heavy loads and accommodation of oscillatory motions, considering molded type for helicopter tail rotor

01 p0085 A69-10406

Seal swell prediction methods extended to include three dimensional solubility parameter concept
[ASLE PAPER 68-LC-21]

07 p1171 A69-19306

Crack propagation in crosslinked glassy polymers, noting effects of added elastomers molecular weight

08 p1338 A69-20492

In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers

09 p1477 A69-22008

Elastomeric solid propellant grains viscoelastic flow, analyzing stresses and strains under various operating conditions and rocket engine geometry effect

10 p1801 A69-23702

Elastomeric adhesives diffusion theory, tack increasing methods, cast polymer films, properties and applications in shoe manufacturing and sealants

14 p2468 A69-29341

Elastomer hardness criteria ensuring maximum life and performance of rotary shaft seals

16 p2794 A69-32432

Fuel resistant elastomers evaluated for seal compounds for low temperature capability, noting epichlorohydrin-ethylene oxide as promising sealant

19 p3356 A69-35534

Polyperfluoroalkyleneimideolperfluoroalkylene-amine synthesized by reaction of perfluoroalkane dinitriles with ammonia or diamidine, giving elastomers of varying strength and elongation, noting thermal stability

19 p3264 A69-35535

Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions

19 p3281 A69-35549

Elastomeric and coating materials for aerospace systems, considering temperature, rain, sand erosion, propellant and radiation resistant properties

19 p3357 A69-35586

Molecular engineering of high organic polymers, discussing molecular weight, crystallization, elastomers, fiber formers and building construction materials

20 p3566 A69-37598

Surface texture effects, discussing metallic and elastomeric contacts, measurement, profile, model parameters, adhesion, hysteresis, lubrication, squeeze films, macroelastohydrodynamics and randomness

23 p4170 A69-42359

Elastomers for SST aircraft applications, discussing properties evaluation, material selection, sealant requirements, etc

24 p4338 A69-43455

ELASTOPLASTICITY

Temperature evolution velocity parameter effect on behavior of elastoviscoplastic solids, noting demonstration by work hardening tests at variable temperatures
[ONERA-TP-644]

01 p0164 A69-10036

Microscopic cleavage strength of high nitrogen steel notched bars determined from critical tensile stress criteria using elastoplastic analysis method

01 p0169 A69-10765

Elastoplastic stress-strain behavior of concentric composite cylinders under uniaxial tension using analytical model, predicting transverse stresses during axial loading

01 p0171 A69-11263

Paradoxes associated with elastic-plastic limit load analysis of material satisfying Drucker stability postulates

02 p0337 A69-11562

Dynamic behavior of elastoplastic beam column model with one degree of freedom subjected to axial compressive force

02 p0337 A69-11717

Critical loads in elastoplastic buckling of cylindrical shells analyzed using power series

02 p0340 A69-12058

Elastic-plastic wave profiles in Al alloy under uniaxial strain load, investigating sensitivity to various strain rates

02 p0344 A69-12289

Numerical solutions elastoplastic torsion of circumferentially grooved shafts based on flow and deformation type theories

02 p0346 A69-12420

Internal elastoplastic stress distribution within reinforced plastics subjected to force normal to internal filaments direction

02 p0347 A69-12513

Spherical elastic-plastic stress wave propagation analysis via finite difference procedure

02 p0348 A69-12610

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution

03 p0528 A69-13798

Elastoplastic bending of plates with nonlinear stress-strain diagram

04 p0667 A69-14269

Elastic-plastic boundaries velocities for combined longitudinal and torsional plastic wave propagation in thin walled tube during unloading
[ASME PAPER 68-WA/APM-7]

04 p0670 A69-14403

Elastic-plastic thin walled cylindrical shell axisymmetric behavior under radial pressure difference, noting load for collapse
[ASME PAPER 68-APM/AA]

04 p0670 A69-14404

One dimensional wave propagation analysis for zero value stress time derivatives on both sides of elastic-plastic boundary

04 p0670 A69-14407

Legendre transformation application to plane elastoplastic loading waves, examining shock front formation in interaction region

04 p0673 A69-14495

Stability of elastoplastic clamped free rod, noting compressive force for production of new equilibrium state and occurrence of transition to state

04 p0679 A69-14925

Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis

04 p0681 A69-15200

Plane shear pressure wave propagation in elastic-plastic half space for various combined normal and shearing loadings

05 p0835 A69-15798

Elastoplastic element structural growth induced by thermal cycling analyzed as function of temperature and sustained axial load
[ASME PAPER 68-WA/MET-14]

05 p0837 A69-16067

Impulse loaded elastic-plastic beam response approximate solutions based on uniqueness proof
[ASME PAPER 68-WA/APM-23]

05 p0840 A69-16188

Elastoplastic stress-strain state of asymmetric profile thin walled beam under mobile load

05 p0841 A69-16205

Statically indeterminate elastoplastic problem under condition of complex shear

05 p0843 A69-16691

Circular bar elastoplastic behavior under combined axial force and torque in strain hardening range, noting elastic compressibility effects

06 p1023 A69-17371

Iterative solution of integral equation and uniform convergence conditions of function sequence approximating incremental stress distribution in elastic-plastic structures

06 p1024 A69-17510

Automatic data processing method for analyzing multiply connected elastoplastic shells of revolution

06 p1025 A69-17614

Initial defects influence on equilibrium states of compressed elastoplastic plates

06 p1025 A69-17684

Snapping and buckling of simple elastic structures under dynamic load, noting influence of structural geometry and load duration
[AIAA PAPER 69-22]

06 p1029 A69-18206

Crack growth during cyclic loading in elastoplastic bodies

07 p1232 A69-18992

Minimum theorems in elastoplastic theory extended to continua for plastic strains governed by holonomic and nonholonomic stress-strain laws

07 p1235 A69-19442

Quadratic programming and theory of elastic perfectly plastic structures under holonomic laws, proving theorems of limit analysis

07 p1235 A69-19443

Unstable elastoplastic brittle fracture criterion based on energy balance considerations

07 p1238 A69-19693

Complementary plastic work theorems in piecewise-linear elastoplasticity applied to plastic and nonlinear elastic problems

08 p1414 A69-20528

Quasi-linear differential constitutive equation of work hardenable elastoviscoplastic material in case of plane wave propagation in half space

08 p1415 A69-20662

Matrix displacement method for nonlinear elastoplastic two or three dimensional structures or continua, discussing strain distribution

08 p1416 A69-20705

Axisymmetric elastoplastic bending theory for cylindrical shell by applying Saint Venant plasticity conditions, determining stress distribution

08 p1419 A69-21179

Duality between effect and influence problems in linear elastoplasticity, obtaining rules for influence functions plotting

09 p1612 A69-21604

Elastoplastic response of intersecting hemispherical/cylindrical shell structures compared with plastic deformation predictions

09 p1615 A69-21922

Elastoplastic stress in notch as cause of decreased lifetime of aircraft components, analyzing stress reversal and displacement during takeoff and landing

09 p1620 A69-22576

Nonwork hardening elastic plastic material fracture criteria for antiplane strain, noting plastic zone shape effect on zone size and crack opening

10 p1795 A69-23064

Continuum theory of dislocations and plasticity in crystals, analyzing stress fields in elastoplastic materials

10 p1799 A69-23154

Plastic energy dissipation and crack surface displacement of penny shaped crack in elastoplastic material

10 p1803 A69-24030

Moire patterns for photoelastic strain analysis noting applications to elasticity, plasticity and creep problems

11 p1882 A69-24944

Plastic strains in aluminum alloy under biaxial tensile and combined tensile and torsion tests, discussing small elastoplastic deformation theory

11 p1905 A69-24948

Bent plates elastoplastic stress-strain state determination by elastic solution and finite differences, considering linear strengthening under uniform distribution of load

11 p1985 A69-25175

Elastic and elastoplastic strains in materials under various loadings, determining temperature variations by thermoelectric method and verifying by tensile tests

11 p1985 A69-25178

Transverse impact along flexible couplings, deriving motion equations in presence of elastoplastic deformation

12 p2178 A69-26034

Elastoplastic stress wave generation by penetration of impulsive electromagnetic radiation through thin surface layer of solid

12 p2179 A69-26215

Computationally stable solution of finite element analysis of elastic-plastic response of nonlinear discrete structures loaded beyond yield load

12 p2185 A69-26819

Incompressible elastic-plastic solid flow through rough converging conical channel analyzed using Mises yield condition and Prandtl-Reuss equations

12 p2063 A69-27114

Perturbation theory of antiplane elastoplastic deformations based on plasticity theory, considering circular hole in body under uniform shear

13 p2359 A69-27263

Elastoplastic cylindrical shell instability determination under axial compression applied to inelastic solids

13 p2363 A69-28124

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials

13 p2368 A69-28346

Minimum theorems for plastic strain rates and plastic strains governed by holonomic elastoplastic theory utilizing quadratic functions

13 p2370 A69-28629

Elastic-plastic bending of rectangular plates with asymmetrically inhomogeneous material in plastic range, using modified Ritz method

14 p2533 A69-28984

Elastoplastic continua fire resistance at high temperatures, establishing plasticity condition and stress-strain relationships

14 p2536 A69-29598

Device for elastic-plastic circular bending with constant bending moment and angular strain for low cycle fatigue testing

15 p2583 A69-30207

Elastoplastic matrix for stress increments for yield surfaces with associated flow rule, considering initial stress computation

15 p2706 A69-30433

Elastic and elastoplastic bodies, showing vector field for surface condition as sufficient condition for stability

15 p2707 A69-30621

Plane strain and stress compared for elastoplastic cracked plate in work hardening tension

15 p2710 A69-30811

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution

15 p2711 A69-30971

Thomas fracture theory and compatibility conditions for fracture surface of elastic-plastic rotating hollow shaft, discussing plastic equilibrium

15 p2712 A69-31017

Stress waves propagation through elastic-plastic medium with uniaxial displacement, discussing wave interactions and interface conditions

16 p2870 A69-31809

Compressibility of material in stability problems of elastoplastic plates and shells

16 p2875 A69-32292

Stresses and displacements in elastoplastic cantilever beams and beams fastened at both ends calculated by stress-strain diagrams of material

17 p3056 A69-33191

Plane wave propagation due to combined compressive and shear stresses in half space, assuming elastoplastic material
[ASME PAPER 69-APM-12]

18 p3213 A69-34388

Elastoplastic boundaries of wave propagation of combined longitudinal and torsional stresses at tube end
[ASME PAPER 69-APM-13]

18 p3213 A69-34389

Load analysis for elastoplastic bodies by Prandtl-Reuss theory and Mises yield condition, considering avoidance of difficulties associated with nonlinear partial differential equation solution

18 p3216 A69-34571

Two dimensional elastoplastic problems in static condition, discussing analytical, variational and finite difference methods

18 p3217 A69-34594

Buckling in process of loading idealized elastoplastic Shanley column, noting continuous increase possibility

18 p3217 A69-34596

Quadratic programming method for equations of elastic perfectly plastic solid applied to stress distribution in plate torsion and bending

18 p3218 A69-34661

Elastoplastic flow equations formulation, inverting flow rule to relate stress rates to strain rates and instantaneous stresses, noting Navier equations

18 p3219 A69-34666

Stress-strain state of elastoplastic material subjected to quasi-static uniaxial tension and compression, considering Bauschinger type effects by scalar parameters

18 p3222 A69-34909

Constrained elastoplastic torsion of closed thin walled cylindrical shells, analyzing tangential and normal stress by using equilibrium equations

18 p3222 A69-34978

Reflection of spherical stress wave against smooth in-deformable plane in elastoviscoplastic medium, discussing Taylor series expansions for displacement, velocity and stress fields

18 p3226 A69-35463

Stochastic models for calculating optimal elastoplastic one dimensional systems

19 p3438 A69-36313

Elastoplastic state of composite structures with applicability of elasticity law and yield conditions illustrated by reinforced plate under plane stress

19 p3444 A69-36808

Equations of deformation for elastoviscoplastic bodies with different properties under loading and unloading conditions

19 p3445 A69-36812

Buckling behavior of idealized Shenley rod consisting of linearly reinforced elastoplastic materials under compression, formulating constraints for stability

19 p3446 A69-36846

Stress strain state in thin circular elastoplastic disks under axially symmetric transient temperature distribution, noting moving annular plastic deformation region

20 p3629 A69-38028

Mathematical models and solution techniques for calculating optimal elastoplastic structures by computer, discussing methods for displacements preceding plastic failure

21 p3831 A69-38414

Elastic-plastic torsion over complex polygonal domains without symmetry axis, using Sobolev space completeness characteristic to solve minimum variational problem

21 p3832 A69-38427

Stress-strain state of thin spherical shell of variable thickness in elastoplastic equilibrium, using Meissner variables to reduce equilibrium equations

21 p3834 A69-38717

Stress-strain state of thick and thin walled closed shells of variable thickness during elastoplastic torsion developing in aircraft component production

21 p3835 A69-38882

Strain rate-load relations in elastoplastic shells reaching yield point, discussing variational method applicability

21 p3838 A69-39189

Small parameter method applied to axisymmetric problems of elastoplastic nearly spherical bodies undergoing exponential hardening process, deriving linearized expressions for boundary conditions

21 p3839 A69-39198

Elastoplastic analysis of thin plates deformation, discussing loading conditions effects

22 p4041 A69-40064

Book on convergence in calculation of elastoplastically deformable aircraft structures and continua, covering matrix displacement method and stepwise linearized computational technique

22 p4044 A69-40619

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack

22 p4046 A69-41060

Thermodynamics of elastoplastic materials with dislocation motion related to internal state variables, including case of rate independent plasticity

23 p4226 A69-41537

Yield condition for elastic-plastic medium, considering pure torsion-associated second order effects and dissimilarity between stress and strain increment Mohr circles

23 p4234 A69-42409

Cylindrical steel specimens high strain rate tensile tests, using Malvern theory for ideal elastoplastic and work hardened materials

23 p4236 A69-42529

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form

24 p4395 A69-42591

Reflection of spherical stress wave against plane clamped partition in elastoviscoplastic medium, investigating three dimensional problem by infinitesimal deformations theory

24 p4406 A69-43732

ELASTOSTATICS

Stress concentration around centrally placed circular bolt in axially loaded bar, using theory of infinite systems of linear equations

04 p0681 A69-15195

Uniqueness theorem validity for boundary value problem in linear elastostatics for homogeneous media

05 p0844 A69-16739

Korn constant for boundary value problem of linear elastostatics applied to circular ring domain

05 p0844 A69-16740

Fundamental problems of plane elastostatics with stress couples reduced to solution of integral equations, noting uniqueness theorem in plate bending theory

07 p1233 A69-19328

Static axisymmetric deformation of elastic paraboloid of revolution, using integration of equilibrium equation in Lamé displacement

09 p1613 A69-21631

Modified Rayleigh-Ritz method for prediction of stress concentration in elastostatic problems for elastic continua, noting plate bending

11 p1969 A69-24413

Stresses and displacements in half plane with edge crack given as eigenfunction expansions using Wiener-Hopf technique

11 p1987 A69-25438

Bending of weightless thin elastic beams clamped to circular template by external force

12 p2181 A69-26572

Existence theorems for partial differential equations theory for traction boundary value problem of linearized elastostatics

12 p2188 A69-26928

Finite difference treatment of mixed boundary value problems in two dimensional elastostatics, using first derivatives of displacement components at grid points

15 p2706 A69-30432

Static implications of strong ellipticity condition in linearized elasticity theory, exemplifying homogeneous deformations

17 p3058 A69-33415

Green functions theory for finite integral Lebedev-Kantorovich transforms derivation, with application to elastostatics boundary value problems

17 p3067 A69-34148

Fourier transform methods in elasticity problems, considering three dimensional equilibrium equations in elastostatics in terms of displacements

20 p3622 A69-37282

Statics of axisymmetric deformation of cylindrical and conical shells of revolution of moderate thickness under uniformly and nonuniformly distributed loads

23 p4226 A69-41705

ELDO LAUNCH VEHICLE

Solid propellant rocket engine designs for ELDO-PAS apogee motors, discussing use of advanced materials to improve mass ratio and strap-on boosters

03 p0495 A69-12890

European launcher program analyzed from point of view of telecommunication and cost

03 p0520 A69-13593

Electric propulsion for payload transfer from low to synchronous orbit of ELDO launch vehicles

03 p0496 A69-13994

European launch vehicle development program, discussing economic limitations and employment possibilities

04 p0665 A69-14808

Platform system of ELDO launch vehicle and necessary test and alignment equipment, discussing inertial platform system for future space projects

04 p0629 A69-14809

Inertial guidance system for ELDO launch vehicles

07 p1176 A69-18491

In-flight testing of second and third stages of F 7 section of Europa 1 satellite booster, noting third stage explosion

08 p1410 A69-21144

Separation systems in Europa 1 booster vehicle, discussing thrust decay, ignition and control system characteristics

08 p1410 A69-21145

ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations

10 p1635 A69-23027

Aerodynamic heating of ELDO-A booster rocket, calculating flow field, heat transfer and conduction by method of characteristics and thermal models

11 p1966 A69-25433

ELDO/PAS rocket motor for satellite launching from elliptic orbit apogee to synchronous orbit powered by ammonium perchlorate with organic binder and Al

17 p3022 A69-33604

ELDO booster/EUROPA 1/ third stage management and construction problems

17 p3050 A69-33701

Microminiature Elliott MCS 920 M digital computer for inertial guidance of CECLES-ELDO launcher, discussing construction, code, interrupt, guidance system and functions

20 p3501 A69-37391

ELDO radio guidance station at Gove, discussing propulsion stage tracking and instruction transmitted to vehicle

22 p3919 A69-39920

Programming and checkout of computer for ELdo inertial guidance system, including flight simulation and autopilot tests
[AIAA PAPER 69-961]

22 p3978 A69-40342

ELECTRIC ANALOGIES

U ANALOGIES

ELECTRIC ARCS

NT CARBON ARCS
NT MERCURY ARCS

Heat transfer between arc column and discharge chamber wall of vortex linear plasmatron, using approximate similitude method

01 p0125 A69-10091

Electric arc properties, investigating volt-ampere characteristics by approximate similitude and dimensional analysis

01 p0125 A69-10099

Bilateral plasma outflow plasmatron with variable electrode diameter, discussing efficiency, current-voltage characteristics and size

01 p0125 A69-10102

Sparks from laser induced air breakdown due to focusing of laser beam, noting evidence for initiation by self focusing

01 p0092 A69-11246

Solar copper abundance determined from measuring Cu 1 and 2 and resonance lines transition probabilities in electric arc emission under LTE conditions

02 p0204 A69-11456

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-cesium pressure

02 p0285 A69-11570

Magnetic confinement of electric arc in alkali metal vapor containing gas flow, considering degree of ionization

02 p0286 A69-11585

DC argon arc electrical and thermal parameters and optical properties at high pressure, using spherical anode

02 p0291 A69-12482

Ion and atom temperature distribution for two fluid model of Ar plasma in cylindrically symmetrical wall stabilized electric arc column

03 p0481 A69-14155

Low temperature plasma electric arc source operation describing current voltage characteristics and potential distribution

05 p0802 A69-15902

Plasma characteristics in thermionic converter operating under low voltage arc conditions obtained by computer, probes and spectral techniques

06 p0963 A69-16910

Retrograde motion of electric arcs in transverse magnetic fields, using multifluid equation to predict inclination and properties

[AIAA PAPER 69-45] 06 p0971 A69-18091

Temperature profile calculations for high pressure electric arcs using diffusion approximation for radiant flux density, taking energy transfer into account

08 p1420 A69-20148

Experimental and theoretical investigation of mass injection effect on high current MPD arc

[AIAA PAPER 69-266] 09 p1564 A69-21242

Plasma column of free burning electric arc, deriving temperature, electron concentration and electric field radial distributions

09 p1545 A69-21431

Electric arc interaction with turbulent boundary layer in vortex stabilized plasmatron, noting variation in arc intensity

09 p1545 A69-21432

Device for producing high current high pressure arc discharge using water cooled chamber and Be bronze electrodes

09 p1547 A69-21593

Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution

11 p1933 A69-25556

Plasma physics of electric arc transition from conducting plasma to insulating gas in electric circuit interruption, noting interrupter interaction with power system

12 p2133 A69-25905

Dynamic energy balance in positive column of electric arc, integrating expression to determine temperature time dependence

12 p2137 A69-26535

Knudsen arcs in argon showing potential well presence with anode barrier and cathode potential drop, establishing slow electrons thermal equilibrium

12 p2137 A69-26536

Semiconductor thin films analysis using mass spectrometer with spark source

13 p2316 A69-27293

Electric arc and hydrogen flow interaction at high pressure, showing radiation role in heat exchange

13 p2305 A69-27387

Current, magnetic field, flow velocity and plasmatron dimensions effects on arc voltage in coaxial plasmatron

13 p2306 A69-27388

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage

[AIAA PAPER 67-657] 13 p2312 A69-28219

Electric arc structure in hydrogen magnetic annular discharge computed using nonequilibrium hydrodynamics to analyze supersonic and subsonic processes

13 p2312 A69-28221

Two chamber DC arc heater with vortex stabilization, determining current-voltage characteristics and efficiency

13 p2244 A69-28557

Low voltage arc in cesium thermionic converter, investigating current-voltage characteristics, electron temperature, electron density and plasma potentials in ignited mode

14 p2401 A69-29231

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions

14 p2402 A69-29244

Argon electric arc axis temperature measurements, showing current and tube diameter ratio dependence

15 p2662 A69-30977

Air plasma electrical and thermal conductivity coefficients measured in wall stabilized DC arc at atmospheric pressure and high temperatures

15 p2663 A69-30979

Electric arc plasma generator efficiency analysis including supply voltage, working current, current-source impedance, ballast resistor and optimum voltage-current selection

15 p2664 A69-31177

Microwave breakdown dependence on elevated gas temperature in electric arc shock tube, considering air, nitrogen and argon

16 p2749 A69-31693

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter

[AIAA PAPER 69-696] 17 p3011 A69-33451

Electric arc stabilization in crossed convective and magnetic fields, discussing column slanting relationship to widening near downstream electrode

[AIAA PAPER 68-709] 24 p4359 A69-43572

Anode fall measurements with Langmuir probe in coaxial arcs in Ar compared with anode energy balance values

24 p4256 A69-43695

ELECTRIC BATTERIES

NT ALKALINE BATTERIES

NT DRY CELLS

NT NICKEL CADMIUM BATTERIES

NT SILVER CADMIUM BATTERIES

NT SILVER ZINC BATTERIES

NT STORAGE BATTERIES

NT THERMAL BATTERIES

Spacecraft voltage-limited charging system for sealed secondary batteries, discussing operating characteristics and battery parameters

01 p0013 A69-11010

Water and heat removal unit for hydrogen/oxygen fuel cell systems, discussing temperature distribution, heat and liquid transport

05 p0704 A69-15676

High energy density lithium/dichloroisocyanuric acid battery system discharging under constant voltage and load conditions

[ECS PAPER 15] 05 p0706 A69-16231

Power supply subsystem for TD1/TD2 satellites with solar cells, discussing design including standby battery for solar eclipse periods

13 p2209 A69-28481

Aircraft secondary power sources reliability dependence on electric loads, charge control and maintenance, discussing hermetically sealed batteries features

17 p2905 A69-34113

Secondary power sources for space applications in solar arrays, static and dynamic thermal systems, high power batteries and fuel cells, discussing NASA machinery procurement

19 p3255 A69-36323

Computer simulation of satellite electric power systems concerning solar array, thermal, battery and charge models for end-of-mission-life orbits

23 p4068 A69-42241

Solar cell power systems for manned space stations, summarizing studies of battery power system designs

23 p4068 A69-42242

Battery subsystems optimization for earth satellite lifetimes greater than 5 years, analyzing flexibility, weight and reliability

23 p4068 A69-42243

Fuel cell/battery and solar array/battery systems for manned Apollo Applications Program /AAP/ space vehicles, considering mission and power requirements

23 p4069 A69-42244

Research and development programs leading to heat sterilizable spacecraft battery separator material, describing bench tests

23 p4072 A69-42284

Battery/fuel cell hybrid power source, discussing fast transient response

[SAE PAPER 690205] 24 p4255 A69-42889

ELECTRIC BRIDGES
NT WHEATSTONE BRIDGES
NT WIRE BRIDGE CIRCUITS

Bridge circuit n-type conductivity converter with internal compensation of parasitic effects

05 p0727 A69-15641

Distance measurement by distance relay circuit composed of intermediate current transformers and rectifier bridges

05 p0765 A69-16746

Balanced diode shunt bridges with electronically tunable carrier selection high-Q N-path filter from 0 to 200 kHz, using single integrated module

07 p1089 A69-18249

Integrated four transistor bridge network used for self neutralized active element in tuned RLC amplifier design

07 p1103 A69-18884

Equivalent circuit synthesis with six reactances- two terminal network bridges

08 p1295 A69-21166

RLC two terminal bridge network synthesis, considering two reactances, three resistances and constraints

09 p1464 A69-22291

Equivalence and stability for negative impedance converter of bridge circuits by symmetrical amplifier design

09 p1467 A69-22559

Parametric frequency converter consisting of mixer head in bridge circuit with varactors for 12 GHz TV transmitters

11 p1854 A69-25614

Linear bridge circuits design having proportional output signal to first or second derivative of input signal envelope

12 p2037 A69-25962

Design and operation of two frequency phase meter for plasma diagnostics, using frequency modulation of microwave oscillator and waveguide bridge

14 p2451 A69-29798

Tubes faults monitoring in three phase Graetz converter bridges by measuring voltage across DC smoothing inductor

15 p2575 A69-30180

Electrical conductivity in wake neck measured using RF bridge on boom extending from reentry vehicle

21 p3724 A69-39030

Carrier frequency monitoring amplifier with automatic bridge tuning for coupling to passive sensors including strain gages, inductive transmitters, etc

22 p3915 A69-40937

ELECTRIC CELLS

Integral cell-level electronic charge controls for secondary batteries, emphasizing performance, reliability and power system interfaces

23 p4076 A69-42542

ELECTRIC CHARGE

NT ELECTROSTATIC CHARGE

NT ION CHARGE

NT SPACE CHARGE

NT TRAVELING CHARGE

Spacecraft voltage-limited charging system for sealed secondary batteries, discussing operating characteristics and battery parameters

01 p0013 A69-11010

Plasma generator for maintenance of space vehicle electrical neutrality during ejection of high velocity electron pulses

[AIAA PAPER 69-273] 09 p1567 A69-21263

Rechargeable nickel cadmium batteries state of charge determination by monitoring capacitance

09 p1435 A69-21425

FET memory element charge storage two layer model for thin film dielectrics noting charge/discharge times

10 p1742 A69-22947

Design aspects and relation to optimum operation on overcharge in Ni-Cd cells

10 p1639 A69-23991

ELECTRIC CHOPPERS

Signal electrode charge control of sealed Ni-Cd batteries, discussing signal voltage for overcharge control 10 p1640 A69-23993

Maintenance free high rate sealed Ni-Cd battery power system compatible with existing aircraft electrical systems 10 p1640 A69-23994

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration 19 p3431 A69-36615

Integral cell-level electronic charge controls for secondary batteries, emphasizing performance, reliability and power system interfaces 23 p4076 A69-42542

ELECTRIC CHOPPERS

Tunnel diode univibrator, noting polarization influence on recovery time and pulse length stabilization dependence on resistive load 04 p0578 A69-15069

Regulated voltage converter systems for onboard spacecraft electric power supplies, noting chopper circuits with rectifiers 12 p2015 A69-25867

ELECTRIC CIRCUITS

U CIRCUITS

ELECTRIC COILS
NT MAGNETIC COILS

Pulse transformer design relationships and definitions, discussing core and winding structure choice 08 p1285 A69-20382

Lumped element construction technique involving crossed coils to reduce ferrite produced heat in resonance isolators, using substituted YIG 11 p1856 A69-25632

ELECTRIC CONDUCTORS

Hybrid microstrip integrated microwave circuits, discussing substrate and conductor materials and fabrication processes 01 p0040 A69-10199

Reflection of plane electromagnetic wave from conducting plane covered with moving uniaxial sheath 02 p0209 A69-12334

HF approximations, discussing plane wave diffraction by conducting circular cylinder using Watson transform 03 p0384 A69-12903

Scattering from thin conducting sheet obstacle on cylindrical surface 03 p0399 A69-14253

Relativistic analysis of far zone electromagnetic scattering by conducting sphere moving through incident plane wave, calculating scattering cross section 04 p0559 A69-15212

Flat cable terminating techniques for electric and electronic systems 04 p0578 A69-15217

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls 10 p1728 A69-23237

Two dimensional inhomogeneous conductors resistance determined by interchanging equipotential and flow lines 14 p2422 A69-29554

Superconducting leads with small electrical resistance and low thermal conductance for cryogenic applications, noting manganin wires coated with Pb-Sn alloy 22 p3997 A69-41236

Self consistent fields in waveguides containing thin conductors, expanding induced field into Fourier series in normal waves for series coefficients 23 p4123 A69-41942

ELECTRIC CONNECTORS

Air gap isolated microcircuit beam-lead devices fabrication, operation, electrical performance and radiation resistance 02 p0221 A69-12469

Flat cable terminating techniques for electric and electronic systems 04 p0578 A69-15217

Laws of wear and average life, noting application to electric connector reliability 04 p0579 A69-15320

Coupled and uncoupled terminals series connection for reactive multiport network determined by transforming scattering matrix columns into coordinate vectors 07 p1100 A69-18529

Spacecraft component heat sterilization, discussing heat effects on electrical connections, polymers and adhesives 08 p1284 A69-20267

Wire, lead frame, direct bonding and beam lead techniques for interconnecting active elements into hybrid circuits 09 p1508 A69-22338

Critical signal assignments optimization in electrical/electronic connectors, considering bent pins, signal cross talk, adjacency requirements and corona 19 p3284 A69-36030

Environmentally sealed connector for avionics packaging with die-cast Al alloy shell meeting specification ARINC 404 requirements 22 p3910 A69-39946

High density environment-resistant circular connectors, discussing design, applications, test and performance data compliance with MIL-C-81511 specifications 22 p3910 A69-39947

ELECTRIC CONTACTS

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity 01 p0137 A69-10258

Flat cable terminating techniques for electric and electronic systems 04 p0578 A69-15217

Braze bonds of refractory electrical contacts using induction heating 04 p0607 A69-15218

Multiple high field domain nucleation in GaAs, discussing dependence on contact inhomogeneities 05 p0807 A69-15959

Pyrolusite samples high dielectric and ferroelectric properties value ascribed to parasitic effects occurring in commonly used contacts 05 p0809 A69-16374

Electron and phonon tunneling spectroscopy in metal Ge contacts, noting improved agreement with one electron model 06 p0982 A69-18234

Dry sliding friction and wear in ultrahigh vacuum, emphasizing slip rings and brushes for space applications [IME PAPER 7] 07 p1138 A69-18561

Electron-electron interaction effect on I-V characteristic and equivalent circuit of metal-semiconductor contact, noting conductivity and rectifying properties 07 p1107 A69-19162

Differential capacity of Li doped zinc oxide single crystals between vapor deposited asymmetrical In electrode contacts 08 p1371 A69-19883

Semiconductor current fluctuations associated with generation, recombination and annihilation of random electron-hole pairs at ohmic contacts 08 p1372 A69-20545

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method 09 p1555 A69-21476

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity 09 p1559 A69-22651

Emission and diffusion theories of metal-semiconductor contacts for describing current characteristics of abrupt isotype nGe-nGaAs heterojunction 11 p1938 A69-25115

Current-voltage characteristics for double injection processes in nonideal contact p-i-n semiconductors operating in ohmic relaxation mode 13 p2323 A69-28524

Erosion of contacts under capacitive loads noting cable length, arc duration and battery voltage 13 p2269 A69-28608

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method 15 p2669 A69-30721

Optimum metal contact stripe width for CW operation of GaAs junction lasers bonded on copper heat sink 16 p2796 A69-31698

Cost optimization in converting brush type to brushless aircraft AC power systems, using analog computer to determine modifications 17 p2905 A69-34109

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap 19 p3384 A69-36480

Metal-semiconductor contact current-voltage characteristic derived from modified diode theory taking into account electron distribution function 19 p3391 A69-36608

Metal semiconductor contact resistance determination from measuring voltage drop in current passing through contact and second metallic contact 21 p3780 A69-39046

Corrosion of Ni through porous Au plate in humid sulfur dioxide atmospheric environments, analyzing product deposits and contact properties 23 p4176 A69-41534

STAR/Stud and Rocker Panel/ four couple section improved by incorporating bonded tungsten electrical contacts for PbTe thermoelectric elements 23 p4188 A69-42261

ELECTRIC CONTROL

Electrically controlled heat transfer between flat parallel flow hydrocarbon diffusion flame and walls of combustion chamber 02 p0353 A69-12324

Electrically controlled broadband microwave phase shifter consisting of coaxial line with varactors or ferroelectrics 03 p0408 A69-13987

Electrohydraulic guidance of second stage of Diamant rocket used for orbiting satellites employing thrust vector orientation 04 p0551 A69-15183

Electric position servosystems for 50 ton telemetry reception antenna and 1200 ton loading turntable of nuclear power plant 04 p0585 A69-15184

Electrohydraulic radar antenna telecontrol system, discussing pump assembly, hydraulic motor and pump control servojack 04 p0551 A69-15185

Electrohydraulic attitude servomechanism for controlling movements of pilot training cabin, describing hydraulic system and electric control circuit 06 p0906 A69-16966

Transverse AC current influence on longitudinal current induced by constant electric field in anisotropic semiconductor 06 p0978 A69-16991

Book on feedback control theory for engineering and applied physics noting signal theory, servomechanisms, transfer functions, system stability and Nyquist diagrams 08 p1295 A69-19841

Aircraft electrohydraulic primary control systems including electrical signal transmission, engine failure detection, signal structure and digital systems 08 p1347 A69-20872

Electrohydraulic vibration isolation systems with feedback, considering band and notch isolation, system stability and adjustable frequency response [ASME PAPER 69-VIBR-40] 10 p1641 A69-24178

Electric outside-in attitude gyro display system prototype tested and compared with contemporary inside-out display [SAE PAPER 690326] 11 p1890 A69-24507

Electrohydraulic servosystem to counteract atmospheric turbulence effects on B-52 global bombers, noting reduction in aircraft fatigue and structural damage 20 p3467 A69-38184

ELECTRIC CORONA

Lightning strikes to aircraft, discussing corona discharge, electric fields and meteorological measurements during thunderstorm in cumulonimbus 03 p0458 A69-13031

Counter rotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions [ASME PAPER WA/HT-9] 05 p0846 A69-16117

Corona and breakdown voltage in helium-oxygen atmospheres, analyzing conditions for manned space flight vehicles 05 p0730 A69-16241

Supersonic airplane high temperature wire tests, detecting corona onset voltage /COV/ or voltage breakdown 05 p0731 A69-16245

ELECTRIC CURRENT

NT ALTERNATING CURRENT

NT ARC DISCHARGES

NT AURORAL ELECTROJETS

NT BEAM CURRENTS

NT BRILLOUIN FLOW

NT CARBON ARCS

NT DIRECT CURRENT

NT EDDY CURRENTS

NT ELECTRODELESS DISCHARGES

NT EQUATORIAL ELECTROJET

NT GAS DISCHARGES

NT GLOW DISCHARGES

NT HIGH CURRENT

NT IONOSPHERIC CURRENTS

- NT LIGHTNING
NT LINE CURRENT
NT MERCURY ARCS
NT MULTIPACTOR DISCHARGES
NT PENNING DISCHARGE
NT RADIO FREQUENCY DISCHARGE
NT RING CURRENTS
NT RING DISCHARGE
NT TELLURIC CURRENTS
NT THRESHOLD CURRENTS
NT TOWNSEND DISCHARGE
- Gate current measurement of p-n junction during ultralow current operation of junction field effect transistor (JFET)
01 p0038 A69-10122
- Electromagnetic wave propagation in superconductors, noting transmission line structure variation with magnetic fields and current and suitability for parametric amplifiers
01 p0135 A69-10176
- Silicon p-n junction avalanche current temperature dependence calculation by considering space charge current and multiplication factor as function of temperature
01 p0136 A69-10245
- Forward current shot noise in parametric amplifiers using GaAs varactors, noting additional noise due to stored minority carriers current
01 p0048 A69-11137
- Dipole antenna current distribution, deriving simple, accurate formula for infinite, semiinfinite and finite cases
02 p0218 A69-12330
- Step voltage transient behavior of electron-hole plasma injected into Ge, noting current time dependence
02 p0301 A69-12651
- Laser oscillation frequency shift dependence on discharge current in 6328 Å He-Ne laser
02 p0260 A69-12658
- High power sinusoidal pulsed current generator using Si controlled rectifiers /thyristors/ as switches
03 p0404 A69-13262
- Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor
03 p0484 A69-13284
- Critique of paper on theory of gradient instability in semiconductor currents, questioning boundary value problems solution validity
03 p0487 A69-13728
- Electrostatic potential generated by rockets on space vehicles, noting source of electric current in exhaust plumes and effect on instrumentation
03 p0522 A69-13903
- Magnetic field dependences of Josephson critical current in high and low current Josephson junctions, discussing influence of induced self field
04 p0640 A69-14437
- Current nature on infinite cylindrical antenna in compressible anisotropic lossy plasma medium, noting characteristic waves on infinite cylinder
04 p0578 A69-15215
- Equation for analyzing radiation produced by current passing through filament situated over anisotropically conducting plane in flat waveguide
05 p0718 A69-15647
- Small scale filament structure of current systems in earth magnetosphere, noting coherence of magnetic disturbances in conjugate regions
05 p0753 A69-16049
- Surface recombination rate effect on lux-ampere characteristic of photomagnetic effect in CdS single crystals of low and high photosensitivity
05 p0809 A69-16377
- Equivalent capacitance derivation of space charge limited current from filamentary cathode
05 p0734 A69-16567
- Thermal and excess currents in GaSb tunnel diodes
05 p0734 A69-16570
- Electromagnetic properties associated with presence of overlapping bands in pure superconductors, discussing temperature dependence
05 p0810 A69-16802
- Temperature dependence of Josephson critical current in superconductor model having anisotropic energy gap
05 p0810 A69-16803
- Transverse AC current influence on longitudinal current induced by constant electric field in anisotropic semiconductor
06 p0978 A69-16991
- Solar flare eruptions due to current disruption, leading to magnetic energy transfer from whole current circuit to very small volume
06 p0995 A69-17444
- Backscattering due to collisions for electrons from emitter accelerated through positive ion sheath into plasma in thermionic diodes
06 p0898 A69-17773
- Wide range current-to-frequency converter with pulse frequency linear to input current
07 p1107 A69-19170
- Coupled wave equation solution based on spectral resolution for longitudinal components of electric and magnetic fields when source currents are present in compressible anisotropic plasma
08 p1274 A69-20031
- Semiconductor current fluctuations associated with generation, recombination and annihilation of random electron-hole pairs at ohmic contacts
08 p1372 A69-20545
- Resonances in plasma column monitored by frequency and current modulation methods
08 p1365 A69-20552
- Internal electric field effect of diode with inhomogeneously doped base on lifetime of strong reverse current generated during instantaneous switching
08 p1287 A69-20890
- Hall current influence on plasma jet interaction with space periodic magnetic field created by system of coaxial coils with alternating current directions
08 p1370 A69-21017
- Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
08 p1374 A69-21187
- Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field
[AIAA PAPER 69-280]
09 p1562 A69-21228
- Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods
[AIAA PAPER 69-244]
09 p1566 A69-21260
- Modified first order theory of magnetosphere boundary shape incorporating effects of neutral sheet currents of extended geomagnetic tail
09 p1488 A69-21661
- Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381]
09 p1568 A69-21731
- Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra
09 p1557 A69-21753
- Electric current spoke in MPD operation, using segmented anode and image converter methods with argon and helium propellant gases
09 p1548 A69-21962
- Current instability in H plasma in electric field of large amplitude fast magnetosonic wave, noting plasma heating
09 p1552 A69-22526
- Impulse induction MHD generator with cylindrical channel, finding differential equations for velocity and current
10 p1638 A69-23484
- Parametric amplification in beam plasma system, analyzing amplification of electron current component dependent on second order terms of velocity and charge density
10 p1740 A69-23791
- Electrical conductivity of impurity semiconductors containing variable current carrier concentrations, discussing current-voltage characteristics
11 p1937 A69-24909
- Current flow coefficient of high pervance three electrode electron guns with longitudinal compression
11 p1849 A69-24911
- Magnetospheric substorm as discharge process of associated electric current system, discussing relaxation processes, explosive release of energy, etc
11 p1879 A69-25249
- Electric field penetration into homogeneous plasma at frequencies near Langmuir frequency and current at surface of thin cylindrical antenna in plasma
11 p1853 A69-25551
- Emitter current density dependence on distance from center of drift transistor circular emitter, obtaining distributed base resistance in presence of arbitrary base current
11 p1853 A69-25565
- Correlation functions and spectral density of current fluctuations in weakly ionized plasma flows
11 p1934 A69-25715
- Si IMPATT diode current and voltage waveforms of oscillation, noting small signal theory inapplicability
12 p2036 A69-25914
- High speed photography of W strip fracture, considering electric current effects and electric circuit interruption by fracture
12 p2113 A69-26195
- Computer analysis on ideal step recovery diode frequency multipliers for optimum efficiencies
12 p2039 A69-26378
- Current to frequency converter for astronomical photometry, discussing oscillator drift, linearity characteristics and feedback pulse counting
12 p2040 A69-26479
- Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters
12 p2107 A69-26540
- Subtraction procedure for feedpoint singularity in current on axially symmetric antenna with slice generator
12 p2041 A69-26864
- Azimuthal electric currents generation by Coriolis forces in hot stars with intensive radial flows in convective zones
13 p2350 A69-27862
- Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise
13 p2317 A69-27876
- Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma
13 p2310 A69-28029
- MOS transistor Hall voltage, mobility and constant verified by magnetoelectric measurements of Si p-inversion layer
13 p2323 A69-28331
- Current harmonics in triode klystron for frequency multipliers, noting modulation voltage
13 p2234 A69-28510
- Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance
13 p2236 A69-28549
- Thermionic converters with matrix circuit connections, considering current flow patterns in matrices to evaluate electrical failure spreading
14 p2400 A69-29225
- Electrodynamics law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control
14 p2485 A69-29320
- Secular terms for parallel component of electric current parallel to permanent magnetic field in toroidal MHD oscillations
14 p2492 A69-29369
- Two dimensional inhomogeneous conductors resistance determined by interchanging equipotential and flow lines
14 p2422 A69-29554
- Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor
14 p2508 A69-29656
- Slow neutrons irradiation compensated high resistivity p-InSb current instability
15 p2666 A69-30058
- Current effects on quantum efficiency of gallium phosphide junction diodes emitting red light
15 p2575 A69-30174
- Point discharge measuring based on pulsed nature of discharge current, outlining field experiment results
15 p2610 A69-30698
- Disturbance currents from penetration of acoustic waves in weakly ionized gas, analyzing wave interaction with DC glow discharge
15 p2665 A69-31547
- Hall current effect on thermal instability explaining nonself gravitating astronomical objects, discussing current effects on propagation modes
16 p2854 A69-31649
- Screw pinch stability explained by strong force free current carried by magnetic field around central plasma column
16 p2821 A69-32037
- IR quenching of photocurrent under field effect in CdS crystal
16 p2827 A69-32044
- Equation for analyzing radiation produced by current passing through filament situated over anisotropically conducting plane in flat waveguide
16 p2762 A69-32504
- Partially conserved axial vector currents and current algebra to obtain vertex functions at point having zero mass by extrapolations
17 p3008 A69-33004

Thin metal antenna average current and effective impedance in randomly inhomogeneous medium, discussing cases of strong and weak permittivity fluctuations

17 p2927 A69-33858

Electron current flow from metal target in gas due to laser radiation, showing increased dependence on gas pressure

18 p3152 A69-35124

Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution

18 p3183 A69-35156

Current generator circuit designed for semiconductor laser excitation with pulses modulated by sinusoidal signals at 4.75 MHz

18 p3153 A69-35256

Solar flare model based on force-free currents in solar atmosphere, noting rapid energy release due to exceeding current density critical limit

18 p3188 A69-35392

Multiphoton luminescence and photocurrent excitation by ruby and neodymium laser beams of KCl-Eu single crystals, noting brightness dependence on laser beam power

19 p3335 A69-36165

Energy spectrum and transport mechanism for current carriers in amorphous-crystalline semiconductors, measuring thermally stimulated conductivity, induced photoconductivity, optical quenching, etc

19 p3391 A69-36558

High resistivity gallium arsenide single crystal LF current oscillations at low temperature, investigating electron heating effect and mechanisms

19 p3391 A69-36609

HCN laser line gain measurements during continuous excitation as function of current and pressure for acetonitrile and water mixtures

19 p3339 A69-36695

Optical and thermal attenuation of current induced by low energy electron bombardment in CdS crystal

19 p3392 A69-36727

Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current

20 p3520 A69-37037

Astronomical observatory photomultiplier cell dark current fluctuations, showing statistical resemblance to binomial distribution

20 p3599 A69-37470

Small scale filament structure of current systems in earth magnetosphere, noting coherence of magnetic disturbances in conjugate regions

20 p3532 A69-37958

Three dimensional current systems constructed semiquantitatively for polar magnetic substorms based on magnetic field distribution on earth surface

20 p3533 A69-38085

Radiation sources fields and propagation in homogeneous lossy magnetoplasma, deducing wave equations for electric and magnetic current electron flux and mechanical body force sources

21 p3775 A69-38434

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise

21 p3782 A69-39142

Galvanostatic anodic and cathodic currents effect on stress corrosion of Be sheet in aerated synthetic sea water at 72 F

21 p3747 A69-39436

Theory for current magnetic field characteristics of Penning discharge valid to extinction point

22 p3991 A69-40865

Edge diffracted fields by conical body frustums evaluated, including equivalent currents for caustic regions

23 p4136 A69-41583

Solid cylindrical antenna current and admittance calculation, considering reflection coefficient and multiple reflection phenomena at antenna ends

23 p4142 A69-42336

Solar quiet and lunar electric current systems deduced from geomagnetic data, discussing electrical conductivities and wind models in dynamo region

23 p4160 A69-42427

ELECTRIC DIPOLES

Dipole shielding factor in coupled Hartree-Fock approximation for atomic S state

02 p0281 A69-12179

Bound motion for particle in point electric dipole field, noting features of motion common to spherical pendulum motion

03 p0473 A69-14109

Oscillating electric dipole in cold plasma with ideal conductivity along lines of force of external magnetic field

06 p0921 A69-17743

Paraelectric resonance spectroscopy on KCl, using bistable dipole model

06 p0982 A69-18235

Horizontal electric dipole excitation of spherical guide waves between earth and ionosphere, discussing TM and TE modes and ELF and VLF range

08 p1273 A69-20023

Power radiated by oscillating magnetic and electric dipoles in cold streaming plasma calculated by Poynting vector method

09 p1544 A69-21329

Field patterns for wave radiation from electric dipole immersed in anisotropic plasma column excited by longitudinal DC magnetic field

12 p2034 A69-27103

Radiation pattern of electric and magnetic dipole on flat semiinfinite impedance system edge found similar

13 p2236 A69-28546

Molecular hydrogen electron scattering, optical refractivity and molecular anisotropy used to construct model dipole spectrum consistent with oscillator strength rules

14 p2488 A69-29094

Resonance effects between H levels by induced electric dipole transitions, using spatially periodic potential barriers

18 p3179 A69-35488

Electromagnetic field of horizontal LF electric dipole formed by thin ionosphere layer between anisotropic planes

20 p3521 A69-37047

Helium sequence ions spin forbidden transitions electric dipole oscillator strengths and transition probabilities evaluated by variational procedure

20 p3577 A69-38171

Effective Gaunt factors for threshold excitation of positive ions by electron collisions for 23 dipole transitions in 15 isoelectronic sequences

20 p3581 A69-38175

Radiation field several wavelengths from dipole above plane earth, specifying rigorous integral expression for Hertz vector by method of operators

21 p3770 A69-38748

Electromagnetic radiation characteristics from vibrating electrons or electric dipole moving in compressible isotropic plasma and from stationary dipole in moving medium, emphasizing Doppler effects

23 p4114 A69-41359

Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes

24 p4307 A69-42905

ELECTRIC DISCHARGES

NT ARC DISCHARGES

NT CARBON ARCS

NT ELECTRODELESS DISCHARGES

NT GAS DISCHARGES

NT GLOW DISCHARGES

NT LIGHTNING

NT MERCURY ARCS

NT MULTIPACTOR DISCHARGES

NT PENNING DISCHARGE

NT RADIO FREQUENCY DISCHARGE

NT RING DISCHARGE

NT TOWNSEND DISCHARGE

HF plasma ionic composition dependence on discharge conditions and ions translational energy

01 p0129 A69-10682

MHD instability in current discharges in magnetic field stabilized by current frequency modulation higher than perturbation increment of plasma column

04 p0635 A69-14549

Equilibrium and stability of strong current discharge in dense optically transparent plasma, determining cause of instability

04 p0636 A69-14983

Continuous emission spectrum and continuous plasma absorption spectral coefficients for optically dense quasi-steady state electrical discharge plasma in sulfur capillary

06 p0964 A69-17251

Forward velocity of Bostick plasmoids demonstrated proportional to mean surge current through button source

06 p0964 A69-17480

Lorentz force sustained energy discharge, discussing cesium added argon flow across magnetic field in disk channel

06 p0969 A69-17910

Heat transfer from unseeded DC augmented propane air flame to water cooled probe placed beyond discharge zone

06 p1035 A69-17934

Zeta discharge in low density regime characterized by strong turbulence, rapid loss of plasma, resistance higher than predicted and high ion temperature

06 p0970 A69-17955

Converging cylindrical shock waves produced by discharging condenser bank into single turn coil surrounding gas container /theta pinch discharge/

10 p1678 A69-22933

Primary explosives tested for effects of shock, friction, heat and electrical discharges

10 p1750 A69-23010

Neon discharge positive column at medium gas pressures, discussing calculated and experimental data concerning diffusion theory to interpret parameters

10 p1740 A69-23723

Sulfur dioxide-helium laser pulsed and CW submillimeter outputs

10 p1706 A69-24005

Magnetospheric substorm as discharge process of associated electric current system, discussing relaxation processes, explosive release of energy, etc

11 p1879 A69-25249

Neutron emission anisotropies in capacitor discharge produced plasma focus, detailing coaxial plasma gun energy spectrum and flux measurement

11 p1930 A69-25321

Aerospace applications of electric discharge interaction with fluid motion including sonic boom reduction, high lift devices, reentry vehicle pitch control, etc

12 p2136 A69-26405

Oscillating electron ion discharge in magnetic field in system of alternating positive and negative electrodes to obtain fast neutral particle fluxes

13 p2311 A69-28109

Electrical breakdown voltage and voltage-current characteristics of uncooled coplanar carbon electrodes in walls of supersonic conical and rectangular nozzles [AIAA PAPER 68-713]

13 p2249 A69-28231

Spectral lines emitted from low voltage discharge in cesium filled diode with hot cathode, giving current-voltage characteristics as function of pressure and temperature

14 p2491 A69-29260

Duoplasmatron charged particles energy spectra analyzed as function of discharge parameters

14 p2501 A69-29955

Point discharge measuring based on pulsed nature of discharge current, outlining field experiment results

15 p2610 A69-30698

Discharge parameters modulation caused by acoustic wave propagating in partially ionized plasma, deriving perturbation current density and irradiated light intensity

16 p2752 A69-32364

Atmospheric ozone production by silent discharges near ground level during first stage of storm cell development

16 p2785 A69-32623

Materials fracture electrically induced including arc and spark discharges, dielectric breakdown, electrolysis, etc

17 p2989 A69-33558

Electrical discharge machining effect on heat resistant alloys surface finish, noting volt-ampere characteristics

18 p3147 A69-34547

Capacitor discharge stud welding on Ti alloys, discussing weld zone microstructure, arc and mechanical properties

18 p3151 A69-35431

He-Ne laser light noises due to discharge current fluctuations and random mode beat

19 p3330 A69-35760

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects

21 p3776 A69-38712

Electrical excitation discharge effect on molecular composition of flowing carbon dioxide gas laser, noting dissociation characteristics

21 p3736 A69-38940

Shadow photography study of electrical discharge set off by laser spark

21 p3740 A69-39552

Methyl alcohol, ether and acetone vapors decomposition in microwave discharge, obtaining H and CO in addition to solid polymeric films

22 p3895 A69-40103

- Electromagnetic radiation below 1 GHz from gap type electrical discharges on electric power distribution lines
23 p4126 A69-42218
- Electrothermal waves in nonequilibrium electrical discharge in potassium seeded argon plasma
24 p4359 A69-43645
- ### ELECTRIC ENERGY STORAGE
- Stark effect meter for electric field measurement in space, discussing absorption cell development
03 p0429 A69-13222
- Automatic device for charging storage capacitors in plasma devices provides voltage and operational frequency control
04 p0580 A69-14493
- Inverted transistor parameters required for accurate prediction of electrical and radiation storage time, discussing computer predictions of radiation responses
06 p0977 A69-16884
- Erosion type plasma accelerator using inductive energy storage compared with capacitive energy storage
13 p2311 A69-28110
- Storage batteries for satellite electrical power sources emphasizing operation in overcharged state
16 p2735 A69-31729
- ### ELECTRIC EQUIPMENT
- Electrical explosive devices for space applications including explosive bolts, primers and igniters
01 p0141 A69-10544
- Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization
08 p1292 A69-21108
- Electrical analogs with passive elements in combination with stepping switches for simulation of plants with distributed parameters
09 p1471 A69-21436
- Type 2 ceramic capacitor manufacture, selection and control in Concerto space program
11 p1853 A69-25393
- Resistance type bonded strain gages for seven adverse environments, discussing installations and transducers
12 p2099 A69-27165
- Airborne electric power systems maintenance aids, describing design and operation of annunciator for establishment and display of system failure causes
17 p2905 A69-34112
- ### ELECTRIC EQUIPMENT TESTS
- Supersonic airplane high temperature wire tests, detecting corona onset voltage (COV) or voltage breakdown
05 p0731 A69-16245
- Design and tests of cable assemblies for F-111 aircraft
05 p0731 A69-16246
- Computer programs for linear systems fault isolation, discussing technique theory and limitations
12 p2040 A69-26568
- Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters
15 p2553 A69-31298
- Soviet book on testing aircraft electrical equipment covering climatic and mechanical tests, malfunction detection, etc
20 p3464 A69-37237
- Electrical sliprings assembly development with low dynamic resistance and long lifetime for space simulation testing, noting wear rate of rings and brushes [AIAA PAPER 69-1035]
22 p3925 A69-40402
- ### ELECTRIC FIELD STRENGTH
- Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected with structural properties and contact formation conditions
01 p0136 A69-10256
- Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
01 p0139 A69-10889
- Electron drift velocity, diffusion coefficient and trapping time in GaAs, measuring variation with electric field
01 p0140 A69-11255
- Advanced potentials method to determine electric field intensity tangential component on surface of cylindrical radiator
03 p0408 A69-14131

- Electric field strength and helix pitch in induced cholesteric-nematic phase transitions, noting activation energy for charge carrier production
04 p0555 A69-14964
- Homogeneous electroluminescence at 77 K in n-type GaAs single crystals without artificial p-n junctions, noting effects of electric field strength and Zn doping
04 p0644 A69-15271
- Multiple high field domain nucleation in GaAs, discussing dependence on contact inhomogeneities
05 p0807 A69-15959
- Electric field growth directional effect on avalanche breakdown conditions in p-n junctions
06 p0981 A69-17828
- Electrostatic field strength and conductivity dependence of expansion and contraction of space charge cloud in process of discharging during static electrification
06 p0959 A69-18219
- Electron transport parameters in noble gases at low electric field intensities, elastic and inelastic scattering and Boltzmann transport equation
08 p1362 A69-20285
- Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039
- Microwave instabilities in bulk GaAs under strong electric fields, considering characteristics connected with structural properties and contact formation conditions
09 p1559 A69-22649
- Electromagnetic wave transmission through anisotropic plasma, discussing incident wave field strength effects near cyclotron frequency
10 p1728 A69-23167
- Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect
11 p1922 A69-24226
- Relation between electric field strength and mean energy for electron swarms in oxygen determined, using Boltzmann transport equation
11 p1921 A69-24419
- Neutral gas flow transport velocity and Mach number effects on critical electric field strength and direction in formation of self sustained discharge
11 p1933 A69-25545
- Charged aerosols production for electrohydrodynamic processes by spraying liquids through capillary at high electric field strengths into high pressure air flows
12 p2138 A69-26631
- Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster [AIAA PAPER 67-728]
13 p2325 A69-28220
- Electric field distribution in focal region of finite off-set paraboloid reflector illuminated by linearly polarized plane wave
13 p2234 A69-28427
- Spectral distribution of fluctuations in stable plasma in absence of external fields, emphasizing electric field fluctuations, quasi-steady states, isotropic plasmas and thermodynamic equilibrium
14 p2490 A69-29103
- Plasma arc characteristic and radiation at high pressure and temperature showing strong electrical field strength and radiation increases with pressure
15 p2659 A69-30377
- Relative dielectric constant and permeability of inhomogeneously filled rectangular waveguide filling medium expanded into trigonometric series to calculate cut-off frequencies and field patterns
15 p2577 A69-30627
- Fluctuation kinetics of electron system in nonequilibrium state arising in semiconductor in strong electric field, considering lattice and interelectron scattering
16 p2824 A69-31569
- Yttrium desorption from W wire by strong electric field, noting electron work function or temperature increase effects on desorption field
17 p3015 A69-33631
- Anomalous absorption of electromagnetic wave in collisionless dense cylindrical plasma beam in circular waveguide, noting electric field strength for energy transfer
18 p3101 A69-34621
- Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
18 p3182 A69-34720
- Electromagnetic shaping of metallic parts using equations describing magnetic and electric field intensity

- as function of blank profile and cylindrical blank wall thickness
18 p3151 A69-35456
- Cumulus and cumulonimbus clouds electrical and microphysical properties measured by instrumented aircraft
20 p3572 A69-37907
- Artificial ion plasma cloud experiment for studying auroral electric fields
21 p3710 A69-38507
- Horizontal and vertical magnetospheric electric fields measured by balloon, determining average field strength for quiet and active periods
22 p3939 A69-40514
- Analyzing conditions for variable magnetic and electric noise occurrence at input of nuclear precession magnetometer used in field strengths measurements
23 p4165 A69-41852
- Electron density in positive column of Cs vapor discharge related to current and gas pressure, discussing field strength effects on drift velocities
23 p4196 A69-42197
- Fluctuating electric fields relations to MHD bow shock structure, using LF fluxgate magnetometer aboard OGO 5
24 p4306 A69-42693
- ### ELECTRIC FIELDS
- Temperature dependence of hot electron drift velocity in silicon at high electric fields, using space charge perturbation theory
01 p0135 A69-10120
- Electric field control of growth rates of insulating organic crystals from vapor phase
01 p0135 A69-10140
- Weak alternating electric field effects on human circadian rhythms
01 p0013 A69-10167
- Microwave second harmonic, sum and difference frequencies generation for two different microwaves normally incident on low temperature semiconductor slab in DC field
01 p0137 A69-10334
- Numerical solution method for equation of electric field affected by permanent flux of identical ions
01 p0128 A69-10364
- Electric field effects on flame temperature variation, suggesting electrons active role in flame combustion reactions
01 p0176 A69-10389
- Symmetrically truncated right angle E-plane corner, placing electric and magnetic walls in symmetry plane, solving resulting boundary value problems
01 p0044 A69-10624
- Electrohydrodynamic analogies to known MHD effects studied by differential equations for hydrodynamic and electric field energy relations
01 p0131 A69-10775
- Electrostatic polarization field formation by acoustic wave propagation through ionosphere, calculating effect on ionization drift velocity
01 p0068 A69-11110
- Sporadic E layer formation, considering ion convergence effects due to neutral wind shears and drift ionization due to electrostatic field
01 p0072 A69-11174
- Growth rate of wave instability in conducting liquid jet in perpendicular electric field and accelerating under gravity
01 p0062 A69-11207
- One dimensional Vlasov plasma nonlinear response to external electric field varying in space and time
01 p0133 A69-11214
- VLF electric field measurements from 1 AU heliocentric orbit, noting field oscillations in solar wind and large amplitude HF noise bursts
01 p0035 A69-11224
- Electric field in plasma half space determined by longitudinal wave normal mode analysis, using BKG particle conserving collision model
01 p0134 A69-11287
- Carrier mobility variation with electric field related to structure of epitaxial field effect transistors
02 p0294 A69-11541
- Plasma discharge energy balance analysis to determine discharge power and temperature as function of electric field parameters
02 p0286 A69-11572
- Characteristics of electrovortices and auroral electrojets of polar disturbance field, discussing dynamics during geomagnetic storms
02 p0240 A69-11723

Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients

02 p0295 A69-11779

Positive ion beam probe for approximate static electric field distribution in low pressure RF discharges, analyzing deflection data for potential distributions

02 p0287 A69-11838

Holtzmark plasma microfield, discussing neglect of term comparable to dipole moment during Fourier transform development for long range Coulomb field

02 p0287 A69-11871

Traveling high electric field domains in bulk semiconductors use in high speed integrated electronics, noting domain properties of GaAs and CdS

02 p0216 A69-12144

Dipole shielding factor in coupled Hartree-Fock approximation for atomic S state

02 p0281 A69-12179

Wave measurements of normal electric field and tangential magnetic field over microwave disk antenna surfaces

02 p0219 A69-12342

Photoelectric effect of thin gold film under electric field, noting work function dependence on film thickness exhibits extremum

02 p0300 A69-12631

Optical modulation near intrinsic edge in n-type bulk GaAs due to Franz-Keldysh effect, noting carrier production by photon initiated excitation

02 p0300 A69-12650

Green tensor for collisionless plasma, emphasizing relations between outgoing and ingoing electric fields

02 p0293 A69-12745

Transport phenomena in crossed electric and strong magnetic fields, developing semiclassical and quantum treatments

03 p0473 A69-12926

Scattering of energetic charged particles in weakly unstable plasma for integrated spectrum of plasma electric field autocorrelation function

03 p0475 A69-13151

Electron beam meter application as lunar surface electric field detector, discussing breadboard model and performance characteristics

03 p0429 A69-13221

Stark effect meter for electric field measurement in space, discussing absorption cell development

03 p0429 A69-13222

Electric effect in ruby, discussing resonance magnetic field and transition

03 p0485 A69-13320

Helium plasma ion oscillations damping by external RF electric field at sheath-plasma resonance condition

03 p0476 A69-13323

Perfect piezosemiconductor resonator /phaser/ with CdSe/CdS crystal, discussing vibration excitation in wurtzite type crystal in electric field of electron drift

03 p0431 A69-13930

Reduction of optical breakdown threshold in laser focus by superimposed microwave field

03 p0441 A69-13997

Frequency of damped oscillations in plasma in DC field, noting variation with electron density and DC field

03 p0479 A69-14050

Transport phenomena in semiconductors in strong DC field, emphasizing electrical conductivity as function of crystallographic orientation

03 p0491 A69-14097

Bound motion for particle in point electric dipole field, noting features of motion common to spherical pendulum motion

03 p0473 A69-14109

Explosive detonated in external electric field to obtain data on gas state behind shock wave

04 p0634 A69-14430

Electric field and energy dispersion law effects on plasma oscillations in semiconductors, calculating composite oscillation frequency

04 p0642 A69-14554

Detection of electric field turbulence in earth bow shock, noting wave amplitude correlation with magnetic field structure

04 p0592 A69-14681

High power waveguide tuner for use in traveling wave resonator to tune out reflections in resonant ring

04 p0576 A69-14759

Surface wave stability for horizontal layer of incompressible dielectric fluid in electric field, noting viscosity effect

04 p0638 A69-15193

Drifting temperature fluctuations in semiconductors in presence of strong electric field

04 p0643 A69-15256

Electric field influence on fluid oscillation modes for Korteweg-Helmholtz force density on incompressible dielectric liquid immersed in electric field

04 p0591 A69-15504

Boltzmann equation for weakly ionized gas electron component, solved by transformation to integral equation, applied to Lorentz gas in alternating electric field

05 p0795 A69-15619

Lamination influence on traveling wave tube performance, showing negative effect of radial variations in electric field

05 p0727 A69-15642

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices

05 p0799 A69-15646

Charged particle motion in constant direction magnetic field varying exponentially with time, discussing electric field effect on particle motion

05 p0801 A69-15744

Stationary solutions of Vlasov equation with external electric fields and BGK collision terms, using perturbation theory in moving frame

05 p0801 A69-15745

Ultrasound propagation amplification coefficient in high permittivity semiconductors with electric field based electron-phonon interaction

05 p0809 A69-16372

Whistler mode propagation in homogeneous electron plasma situated in longitudinal electrostatic field, using Fokker-Planck model

05 p0758 A69-16417

Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device

05 p0733 A69-16562

Electrogas dynamics /EGD/ engineering, discussing generators and compressors

05 p0804 A69-16586

Electron distribution function for homogeneous weakly ionized gas in presence of alternating electric field, discussing solution of Boltzmann equations

05 p0797 A69-16604

Coaxial Hall plasma accelerator, noting interaction between radial applied magnetic field and axial applied electric field

05 p0806 A69-16734

Electromagnetic waves transformation and scattering in plasma in electric field, showing abrupt increase at certain critical value

06 p0886 A69-16894

Hydrodynamic and lattice vibrations equations for coupled waves in ion semiconductors in external electric and magnetic fields, observing sound amplification

06 p0978 A69-16897

Gunn effect verification using n-type semiconductor single crystals in DC field, noting microwave field polarization plane rotation

06 p0978 A69-16902

Molecular and atomic beam focusing in electric and magnetic fields with helical symmetry of specified type

06 p0959 A69-16917

General theorem of isotropic microwave waveguide junction ports imposed by reflection symmetry

06 p0893 A69-16935

Static problem of electric field intensity and space charge density distribution in semiconductor with hot electrons and holes

06 p0978 A69-16989

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown

06 p0978 A69-16990

Longitudinal acoustic waves propagation in partially ionized gas in external electric field, taking into account ionic collisions with electrons and neutral particles

06 p0963 A69-17079

Ambipolar motion of light injected photocarriers in cadmium-mercury-telluride in terms of diffusion and drift in electric fields

06 p0979 A69-17154

Parametric instability of horizontal surface of ideally conducting or very high dielectric constant liquid in varying perpendicular electric field

06 p0957 A69-17542

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

06 p0981 A69-17880

Rates of charging of thermionically emitting particles in space charge

06 p1035 A69-17928

Dispersion relation for longitudinal oscillations of one component weakly ionized plasma without inter-carrier collisions in uniform constant electric field

06 p0970 A69-17957

Electromagnetic ion acceleration in steady electric and magnetic fields chosen to match fields of Alkali Plasma Hall Accelerator /ALPHA/ [AIAA PAPER 69-111]

06 p0985 A69-18175

Strong electrostatic fields effects on burning rates of double base and composite propellants [WSCI PAPER 68-24]

07 p1241 A69-18366

Nonlinear coupling between background illumination and illumination signal producing lateral electrical fields in p-n junction, noting effect on sensitivity of position sensor

07 p1101 A69-18654

MHD models for analysis of nonhomogeneous magnetized plasma stability with regard to perturbations having electrical field as potential field

07 p1190 A69-18694

Laser light scattering with orientation saturation of microsystems by electric field, noting application to optical anisotropy of macromolecules and colloidal particles

07 p1149 A69-18900

Maxwell equations solution for linear induction MHD machine coil area field components, allowing for finiteness of magnetic permeability of iron

07 p1059 A69-19028

Magnetospheric and high latitude ionospheric disturbances, bulk motion /convective/ flow pattern and electric field distribution

07 p1128 A69-19370

Gas breakdown in HF uniform electric field with/without steady transverse magnetic field

07 p1194 A69-19415

Complex microwave incremental conductivity of InSb at 77 K in steady electric field using displaced Maxwellian distribution function

07 p1200 A69-19447

Dynamics of pulsed microwave breakdown in nonuniform field at waveguide fed mica aperture, noting electric field distribution change due to initial plasma configuration

07 p1107 A69-19448

Electric fields and conductivity in thunderclouds by parachuting rotating differential electric field mills

08 p1345 A69-19813

Kinetic theory for plasma, considering electric field fluctuations time evolution simultaneously with one particle distribution time evolution and Landau damping in wave equation

08 p1360 A69-19991

Horizontal electric dipole excitation of spherical guide waves between earth and ionosphere, discussing TM and TE modes and ELF and VLF range

08 p1273 A69-20023

Bounds on electric field outside radiating system determined for application to UHF and VHF systems design, considering microwave breakdown

08 p1273 A69-20026

Diffusion coefficient, velocity distribution function and velocity averages for gaseous ions moving in strong electric fields, considering ion-gas molecule charge transfer collisions

08 p1355 A69-20209

Solution of equations of motion of charged particles in constant magnetic field and variable electric field

08 p1361 A69-20213

High Q capacitance loaded coaxial cavity resonator for study of electric susceptibility of ionized gas

08 p1313 A69-20214

Time dependent velocity distribution functions for carriers calculated in weakly ionized plasma in external electric field

08 p1362 A69-20265

Distribution and carrier type in germanium bar in electric field, relating distribution obtained by using Hall effect to avalanche phenomenon

08 p1372 A69-20277

Inertia of electrically charged spherical body calculated on basis of relativistic stress energy

08 p1352 A69-20756

Linear perturbation theory to predict instability threshold conditions caused by electric field in poorly conducting liquid subject to vertical temperature gradient

08 p1352 A69-20790

Electroconvective instability produced by uniform electric field in poorly conducting fluid under stabilizing

ing vertical temperature gradient, noting heat flow increase

08 p1352 A69-20791

Interfacial charge relaxation overstability in tangential electrical field, discussing electromechanical polarization surface waves propagation and dielectrophoretic orientation of liquids in zero gravity space

08 p1353 A69-20792

Heating of collisionless plasma in magnetic mirror by random electric field transverse to magnetic field

08 p1368 A69-20805

Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field

08 p1368 A69-20809

Internal electric field effect of diode with inhomogeneously doped base on lifetime of strong reverse current generated during instantaneous switching

08 p1287 A69-20890

Thin semiconductor plates negative differential resistance associated with captures at surface, describing electron gas by electron temperature

08 p1374 A69-21081

Population inversion in semiconductors obtained by applying electric field through dielectric sphere /field effect/

08 p1374 A69-21082

Charged liquid droplets generator and acceleration through electric field for thrust vectoring, analyzing beam focusing and deflection

[AIAA PAPER 69-283]

09 p1563 A69-21230

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs

[AIAA PAPER 69-230]

09 p1563 A69-21231

Electrothermal instabilities for explanation of MPD arc thruster rotating spoke phenomenon, noting agreement with experimental results

[AIAA PAPER 69-231]

09 p1566 A69-21254

Electron multiplication during ionized H plasma exposure to annular electric field and magnetic field, including microwave diagnostics

09 p1543 A69-21299

Plasma column of free burning electric arc, deriving temperature, electron concentration and electric field radial distributions

09 p1545 A69-21431

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave

09 p1484 A69-21528

Plasma conductivity tensor components in crossed fields calculated by Boltzmann kinetic equation, noting influence of magnetic field presence

09 p1546 A69-21565

Electromagnetic wave fluctuations and scattering in plasma in strong electric and magnetic fields at magnetoacoustic frequencies

09 p1453 A69-21569

Nighttime electric fields and vertical ionospheric drifts near magnetic equator concurrent measurements

09 p1489 A69-21705

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field

09 p1577 A69-21714

Shock wave structure problems in plasma, including plasma particles random motion in term representing electric field

09 p1551 A69-22032

Faraday dark space geometries in glow discharge, using superposition principle to divide electric field for transition visualization

09 p1540 A69-22099

Static characteristics of transistors dependence on current carriers surface recombination in inactive base region, noting strong electric field influence

09 p1464 A69-22287

Current instability in H plasma in electric field of large amplitude fast magnetosonic wave, noting plasma heating

09 p1552 A69-22526

Space electric fields research by artificial clouds of vaporized barium launched by rockets, noting neutral atmosphere and ionospheric results

09 p1492 A69-22800

Book on thermodynamics of charged and polarized layers covering matter in electric fields, general framework theory, applications, etc

10 p1724 A69-23159

Field distribution in insulated gate FET determined by numerical solution of Poisson equation

10 p1662 A69-23170

Closed cycle MPD experiments with applied electric and magnetic fields emphasizing current leakage, segmentation, relaxation and aerodynamic effects

10 p1738 A69-23479

MHD generator performance operating on nonequilibrium Ar plasma with K additions in presence of electric fields

10 p1637 A69-23480

Nonequilibrium ionization effects on performance of subsonic constant area MHD generator, using closed cycle blowdown loop facility

10 p1637 A69-23481

Two dimensional flow of unipolar medium in electrogasdynamic power generation channel, discussing stationary model, electric field and ion density distributions

10 p1638 A69-23486

Pulse and CW breakdown criteria for plasmas subject to spatially nonuniform electric fields, using variational formulation

10 p1739 A69-23650

Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions

10 p1739 A69-23660

Small signal HF conductivity of GaAs calculated for arbitrary frequency and DC field, considering subcritical Gunn devices

10 p1747 A69-23694

Rotating plasma behavior in magnetic mirror trap, using radial electric field

10 p1740 A69-23716

Transport and balance coefficients in ionized neon and helium plasmas in homogeneous electric field, calculating electron mobility, diffusion coefficient, energy and collision parameters

10 p1740 A69-23722

Field effect on positive column plasma of glow discharge in air, analyzing near wall potential and conductivity

10 p1741 A69-23946

Landau type interaction between electron beam and whistler/helicon/ wave electric field within semiconductor /InSb/

10 p1742 A69-24107

Longitudinal electric field distribution and charged particle density in magnetic mirror under potential difference between magnetic equator and plane

10 p1689 A69-24204

One dimensional electrostatic plasma oscillations in alternating external electric field, noting plasma stability and electron-electron two stream instability

11 p1924 A69-24298

Electric field fluctuations in inhomogeneous plasma calculated by test particle method, interpreting results in convective modes terms in plasma control and stability

11 p1924 A69-24301

Photoconductivity of semiconductors with multilevel electron energy and isotropic hole spectra, discussing nonlinearity of field dependence

11 p1937 A69-24913

Complete electric field of idealized infinite slot antenna with uniform excitation in infinite conducting plane

11 p1851 A69-24994

Electric field vertical and radial components for time harmonic electric line sources with piecewise sinusoidal current distribution

11 p1836 A69-24995

Tonks-Dattner resonances in plasma column, using linearized Vlasov equation for coupling to plasma waves of time varying electric fields

11 p1929 A69-25266

Electric field measurements for turbulence in collision-free shocks, noting power spectra of magnetic and electric fluctuations and electron density

11 p1930 A69-25276

Convective drift and flute instabilities of plasma stabilized by exerting HF forces on electrons, determining required HF field amplitudes

11 p1932 A69-25538

Electric field penetration into homogeneous plasma at frequencies near Langmuir frequency and current at surface of thin cylindrical antenna in plasma

11 p1853 A69-25551

Flute oscillation instability of dense plasma cylinder under nonuniform electric field, analyzing oscillation spectrum properties

11 p1934 A69-25707

Flow in linear MHD channel with two permeable electrodes, solving Riemann boundary value problem for electric field in channel

11 p1934 A69-25727

Paraxial electron beams from Pierce gun and spreading due to thermal velocities and space charge in nonuniform potential

12 p2036 A69-25920

Electric fields effect on flame front propagation structure and velocity, obtaining color topolegrams by high speed photography

12 p2190 A69-26192

Electric vector transformation for three dimensional photoelastic medium irradiated by light in reverse direction, noting optical systems of birefringent plates and rotators

12 p2180 A69-26339

One dimensional stationary flow of medium consisting of charged and neutral components within electrohydrodynamic limits in AC and DC electric fields

12 p2135 A69-26398

Radial electric field effect on pressure drop in isothermal laminar flow of dielectric liquid through stainless steel tube, considering ion drag

12 p2136 A69-26401

Electrically driven thin fluid jet stability in longitudinal field between two plate electrodes, discussing role of Ohm law in calculating jet potential

12 p2136 A69-26402

Plasma instability in magnetic and HF electric fields, observing aperiodic short wave and oscillatory instabilities

12 p2136 A69-26526

Electromagnetic waves directional velocity, plasma temperature and particle density determined from analyzing electric field fluctuations amplification near body in plasma

12 p2137 A69-26531

Solution for kinetic energy equation for organic semiconductors with narrow conduction band situated in strong electric field

12 p2144 A69-26673

Longitudinal electric field penetration into semibounded plasma using kinetic approximation, assuming diffusive plasma particles reflection from plasma boundary

12 p2138 A69-26711

Joint probability distributions of electric microfield in hot ionized plasma consisting of noninteracting particles

12 p2139 A69-26871

Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium

12 p2110 A69-26908

Atmospheric electricity and space charges ionization and equilibrium in earth atmosphere, discussing electric fields in lower atmosphere, ionosphere and magnetosphere

12 p2076 A69-27105

Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film

[ASME PAPER 68-LUBS-30]

13 p2267 A69-27287

Magnetic and electric fields influence on gas lubrication of bearings

[ASME PAPER 68-LUBS-26]

13 p2267 A69-27288

Alternating electric field parametric effects on inhomogeneous plasma in magnetic field, obtaining electrostatic wave coupling dispersion relation by density gradients considerations

13 p2304 A69-27298

Stationary magnetic field effect on sum and difference frequency generation due to nonuniform RF electric fields applied externally to plasma

13 p2305 A69-27376

Transport equation describing drift, diffusion and reaction of iron swarm influenced by electric field in gas

13 p2306 A69-27457

Polarization stabilization times dependence on risetime of external field pulse leading edge for semiconductor crystal, determining field concentration

13 p2317 A69-27880

Capture levels at photosensitive CdS crystals surface determined by studying field effect mobility dependence on electric field

13 p2318 A69-27884

Electric drift instability in semiconductors with hot electrons, discussing diffusion, electron heat conduction, energy transfer, space charge density, etc

13 p2318 A69-27891

Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal

13 p2272 A69-27969

Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma
13 p2310 A69-28029

Gas laser modulation steady state characteristics with KDP crystal in cavity, noting output power dependence on applied electric field
13 p2273 A69-28432

Electric field frequency effect on cyclotron resonance during gas discharge, establishing causes of discrepancy between theory and experiments
13 p2315 A69-28577

Electric field distribution in TWT electron beam deflection system determined, accounting for current-voltage characteristics dependence on electromagnetic field distribution
13 p2237 A69-28582

Potassium plasma drift instability suppression by applied external HF electric field, noting plasma diffusion decrease toward container wall
14 p2489 A69-28740

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential
14 p2503 A69-28789

Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
14 p2510 A69-28936

Diffusion of equatorial particles in outer radiation zone caused by expansions and contractions of permanently compressed magnetosphere, obtaining electric fields
14 p2510 A69-28937

Effects of cold electron and light emission centers from dispersed Au films in electric field, as universal qualities characterizing dispersed metal films
14 p2504 A69-28992

Galvanomagnetic characteristics of n-type semiconductor subjected to perpendicular electric and magnetic fields, noting electron temperature
14 p2505 A69-29037

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field
14 p2512 A69-29040

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
14 p2517 A69-29068

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere
14 p2437 A69-29070

Electromagnetic energy spectra of lightning expressed as function of electric field spectral density of atmospheric
14 p2437 A69-29076

Longitudinal electric field penetration into plasma slab in constant magnetic field
14 p2493 A69-29665

Ionospheric models for motion of slightly ionized homogeneous cold plasma influenced by electrostatic field and neutral particles flow, considering geomagnetic effects
14 p2499 A69-29863

Compressible gas MHD steady one dimensional flow in electric and magnetic fields
14 p2500 A69-29905

Velocity distribution effect on electric field at walls for axisymmetric flow of electrolyte in circular channel in magnetic field of E shaped inductor
14 p2501 A69-29915

Density fluctuations effect on fully ionized plasma electrical conductivity in large or zero frequency external electric fields
14 p2502 A69-29990

Integral formulation of scattering theory extended to Coulomb interactions by expanding Green function and treating kernel singularities
14 p2489 A69-29995

Boltzmann equation for hot electron distribution functions in GaAs and threshold field in Gunn effect
15 p2665 A69-30025

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field
15 p2666 A69-30061

Resonance cones in angular distribution of short antenna RF electric field in anisotropic plasma noting variation with incident, cyclotron and plasma frequency
15 p2659 A69-30876

Plane incompressible fluid interface stability in presence of transverse electric field, deriving equation of motion for perturbation amplitude
15 p2652 A69-30911

Energy absorption by cold nonuniform plasma from externally driven electric field, noting relation between plasma and driving frequencies
15 p2661 A69-30922

Molecular beam behavior in constant electric and magnetic fields, applying laser frequency dependence on magnetic field orientation to resonator
15 p2655 A69-30943

Interferometer for measuring electric fields spatial correlation function at camera aperture, describing laser light coherence measurements after propagation through turbulent atmosphere
15 p2653 A69-31164

Plasma modes, critical fluctuations and optical properties electric field dependence in two valley model of Gunn instability semiconductors
15 p2581 A69-31240

Alternating electric field effects on circadian rhythms in men, discussing period shortening and internal desynchronization
15 p2557 A69-31461

Controlled electric field capacitance probes for non-destructive testing, discussing field projection pattern and direction effective depth of field, applications, etc.
15 p2616 A69-31503

Low density cold plasma effect on stability of cylindrical layer of charged particles against electrostatic perturbations in uniform magnetic field
16 p2816 A69-31635

Nonlinear theory of $E \times B$ instability for weakly ionized plasma in presence of density gradient and parallel electric field perpendicular to magnetic field
16 p2819 A69-31682

Nonlinear generation of sum and difference frequency components in magnetoplasma current density due to alternating electric fields, electron density and temperature gradients
16 p2821 A69-32036

Lamination influence on traveling wave tube performance, showing negative effect of radial variations in electric field
16 p2762 A69-32499

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices
16 p2823 A69-32503

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
16 p2783 A69-32523

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow
17 p3010 A69-33016

Atmospheric aerosols influence on electric field in ground layer to account for ionization, demonstrating number and turbulent exchange coefficient relationship
17 p2996 A69-33036

Triple probes behavior in plasmas under AC electric field perturbations
17 p2920 A69-33592

Electromagnetic fields theory simultaneously determining vector electric and magnetic field aspects in terms of operator Green functions
17 p2924 A69-33833

Vertical distribution of ionospheric drift velocity in auroral zone, evaluating role and intensity of electric field formed in dynamo region
17 p2964 A69-33964

Level crossing signal obtained by magnetic/electric field modulation, tabulating corrections to widths and centers for distortions
17 p3009 A69-34155

HF electromagnetic waves penetration into slightly ionized plasma analyzed by Maxwell and kinetic equations, giving penetrating electric field by WKB formula
17 p2932 A69-34220

Pulse propagation through antipode, calculating time domain response of fields near axial caustic
18 p3100 A69-34233

Dawn-dusk electric field in outer radiation zone associated with magnetospheric plasma convection, comparing electron densities for magnetically quiet periods
18 p3128 A69-34942

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis
18 p3180 A69-35017

Conducting medium steady one dimensional motions determined by assuming space charge-electric field interaction, considering electrohydrodynamic behavior of medium
18 p3181 A69-35315

Refractive index profiles yielding wave functions expressed in terms of standard transcendental functions for electric fields in spherically stratified isotropic media
19 p3372 A69-35618

Near and antipodal fields in earth-ionosphere waveguide using mode theory, ray theory, zonal harmonics series and method of images to derive field representations
19 p3283 A69-35931

Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model
19 p3382 A69-36045

Longitudinal electric field, electron density and temperature in positive column of low pressure Cs-Ar DC arc discharge, discussing Cs vapor depletion
19 p3380 A69-36441

OGO 5 spacecraft detector instrumentation for measuring electrostatic and electromagnetic waves electric fields with coupled antennas, describing in-flight operation
19 p3315 A69-36683

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data
20 p3521 A69-37053

Electric field correlation to magnetic fields in quantum theory of coherence, deriving dynamical equations governing space-time development of correlation matrix
20 p3575 A69-37304

Retarding potential analyzers to measure rocket vehicle potentials and ambient electric fields in active auroras
20 p3542 A69-37793

VLF electric and magnetic fields observed in auroral zone with Javelin 8.46 sounding rocket, noting HF electrostatic noise bursts
20 p3533 A69-38080

Ion density, electric field and electron temperature responses to gas density perturbation calculated for acoustic wave propagation in gas discharge using hydrodynamic equations
20 p3578 A69-38243

Ionospheric currents geophysical DC electric fields measurement from sounding rockets, indicating anticorrelation with auroral luminosity
21 p3710 A69-38508

Electrostatic charge formations in atmosphere, discussing atmospheric electricity during precipitation and thunderstorms
21 p3758 A69-38785

Microwave breakdown characteristics predictable for circular loop antennas from near electric field analysis
21 p3683 A69-39281

MHD energy converters electric fields and current distributions, analyzing MHD flow problems
21 p3777 A69-39480

Nonlinear electron conductivity of Lorentz plasma subjected to frequency modulated electric field
21 p3778 A69-39573

Laminar burning rate of premixed propane-air flames at one atmospheric pressure in DC electric fields, using cooled porous plug burned method
21 p3852 A69-39596

Temperature measurement in and near opposed-jet diffusion flame subjected to electric field, discussing flame behavior at low mass flow rate
21 p3852 A69-39597

Accelerating electric field model to interpret energy and angular distribution of auroral particles, noting electric potential limitations
22 p3938 A69-40445

Injun 5 satellite VLF electric and magnetic fields observations, discussing antenna operation, Poynting flux and noise band measurements
22 p3938 A69-40503

Horizontal and vertical magnetospheric electric fields measured by balloon, determining average field strength for quiet and active periods
22 p3939 A69-40514

Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations
22 p4023 A69-40518

Electric field regions of p-n junctions using electron beam deflection measurement, noting application to Si specimens
22 p3994 A69-40752

Midlatitude F region continuity equation solutions, including east-west electric field effects on electron density
22 p3941 A69-40917

Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport
23 p4190 A69-41357

Oscillatory electric field disturbances monitored near human body concurrent with heart beat and respiration, showing signals unrelated to blood flow or streaming potentials
23 p4101 A69-41449

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption
23 p4198 A69-41499

Liquid drop in electric field numerically analyzed for disintegration dynamics and instability through cross section computation at time intervals
23 p4151 A69-41694

Impedance of inhomogeneous earth from magnetic and electric fields and geomagnetic potential measurements
23 p4157 A69-41867

Wideband vertical electric field noise reduction in ELF/VLF atmospheric receiving systems using bucking, delayed feedback and frequency rejection units
23 p4128 A69-42504

Transverse plasma waves propagating along parallel static electric and magnetic fields may lead to instabilities regardless of carriers sign
24 p4355 A69-42923

Sounding rocket measurements of electric and magnetic fields near auroral electrojet
24 p4310 A69-43188

ELECTRIC FILTERS
NT CRYSTAL FILTERS
NT DIGITAL FILTERS
NT IMAGE FILTERS
NT RADIO FILTERS
NT TRACKING FILTERS
NT WAVEGUIDE FILTERS

Active RC low pass filters sensitivity to component changes, discussing effect of below minimum limit value
04 p0578 A69-15070

Zero sensitivity integrated RC filter circuits design, exploiting capacitors and resistors property of having same temperature coefficient
08 p1300 A69-21174

Damping accuracy sensitivity to circuit element tolerances in polynomial filters
11 p1850 A69-24970

Transfer function parameters identification by fault isolation technique using white noise stimulus and processor matrix of orthogonal filters
11 p1865 A69-25077

Laser Doppler particle sensor to measure velocities in rocket exhausts, using He-Ne laser light source and Fabry-Perot interferometer frequency filter
[AIAA PAPER 68-723] 12 p2094 A69-26783

Distributed RC networks combined with lumped passive and active elements to produce distributed-lumped-active (DLA) networks for filter requirements
23 p4144 A69-41401

ELECTRIC FUSES
Exploding wire self healing fuse feasibility demonstrated with Hg, noting dynamics of conversion of electric to mechanical energy
01 p0120 A69-10677

ELECTRIC GENERATORS
NT AC GENERATORS
NT ALKALINE BATTERIES
NT DIRECT POWER GENERATORS
NT DRY CELLS
NT DYNAMOMETERS
NT FUEL CELLS
NT HYDROGEN OXYGEN FUEL CELLS
NT MAGNETOHYDRODYNAMIC GENERATORS
NT PHOTOELECTRIC GENERATORS
NT RADIOISOTOPE BATTERIES
NT REGENERATIVE FUEL CELLS
NT SNAP 10A
NT SNAP 13
NT SNAP 21
NT SNAP 27
NT SOLAR AUXILIARY POWER UNITS
NT SOLAR CELLS
NT SOLAR GENERATORS
NT THERMAL BATTERIES
NT THERMIONIC CONVERTERS
NT THERMOELECTRIC GENERATORS
NT TURBOGENERATORS

Gunn generator efficiency dependence on diode and regime parameters using computer model
01 p0042 A69-10319

Storm-Shattuck and push-pull tunnel diode DC-to-DC converters suitable for spacecraft power supplies
01 p0013 A69-10750

Hydrocarbon-air fuel cell producing electric power automatically for five days
01 p0013 A69-10965

Miniaturized X band IMPATT microstrip power sources based on Si avalanche transit time diodes integrated with microstrip oscillator circuits
02 p0216 A69-12146

Onboard electric power systems of transport aircraft, analyzing constant frequency systems for supersonic aircraft
02 p0196 A69-12166

Charge accumulation elimination on dielectric electrodynamic channel walls, comparing resistive wall channel to high internal impedance generator
02 p0291 A69-12506

High power sinusoidal pulsed current generator using Si controlled rectifiers /thyristors/ as switches
03 p0404 A69-13262

Transient stability of AC generator analyzed by Liapunov direct method, considering effects of flux decay, speed governor and voltage regulator
07 p1058 A69-18644

Caterpillar diesel electric sets for powering NASA tracking station in Australia during Apollo 8 flight
07 p1117 A69-19632

Sawtooth generators production based on equivalent circuit theory, calculating linearity errors in voltages
08 p1296 A69-20105

Electrical energy production on board space vehicles including solar batteries, chemical reagents and possible nuclear energy utilization
08 p1259 A69-21036

Electrochemical generators using zinc electrode in alkaline medium, noting weight consideration of zinc/air or zinc/oxygen cells
08 p1261 A69-21049

High energy-density electrochemical generators using lithium anode and copper sulfide cathode in nonaqueous media
08 p1261 A69-21056

Thermodynamic cycle and optimum conditions of electric power source of MHD generator in combination with thermocompressor
09 p1435 A69-21592

Power converter design for electrically propelled spacecraft, discussing weight, reliability, and thrustor load requirements
[AIAA PAPER 69-240] 09 p1568 A69-21732

Lumped element line generators for high power pulsed sinusoidal oscillations utilizing recurrent triggering system, noting use in plasma physics experiments
10 p1662 A69-23344

Electrical power requirements in spacecraft, discussing communication, engine and control systems, data processing, electrochemical and nuclear sources
12 p2015 A69-25863

Regulated voltage converter systems for onboard spacecraft electric power supplies, noting chopper circuits with rectifiers
12 p2015 A69-25867

Satellite and spacecraft power supply and power converters
13 p2209 A69-27917

Single phase bidirectional AC/DC power convertor based on back-to-back SCR hybrid bridge
13 p2209 A69-28178

Thermionic reactor design for electric propulsion with emphasis on reactor power and fuel energy and fast neutron flux
14 p2509 A69-29184

Thermionic electrical power generation from reentry plasmas with nose cone as emitter and vehicle afterbody as collector
14 p2399 A69-29194

Power conversion efficiency of frequency doubler using ideal nonlinear capacitance with arbitrary output phase angle
14 p2421 A69-29537

Power generating unit operating on air bearings
15 p2629 A69-31028

Aircraft generator weight in relation to system performance requirements, using digital computer to study generator design
17 p2904 A69-34087

Electric power quality effects on aircraft electronic utilization equipment, discussing characteristics of

variable speed constant frequency /VSCF/ generating system
17 p2905 A69-34091

Electric power system selection for long duration manned space station
[AIAA PAPER 68-1034] 22 p3869 A69-40549

Duty cycle IC generator for switching regulators, discussing construction, resistive and dielectric films fabrication, applications, etc
23 p4073 A69-42293

ELECTRIC IGNITION
Electrical devices for detonation initiation in pyrotechnic equipment for space applications, tabulating characteristics
10 p1749 A69-23006

Igniferous materials for electrical initiation of explosive in extreme conditions, considering nitrophenol salts and pyrotechnics
10 p1750 A69-23015

Soviet book on electric ignition systems for piston and jet engines and design aspects of different types of ignition systems
12 p2146 A69-26756

Inverse current in ignited mode diode linearly related to spacing, noting emitter sheath
14 p2401 A69-29230

AC ignitor priming of quartz-chlorine gas discharge X band waveguide limiter with fast recovery used as radar receiver protector
15 p2573 A69-30035

ELECTRIC MOMENTS
Benzene quadrupole moment estimates from second virial coefficient data with polarizability in intermolecular potential function and from molecular susceptibility anisotropy
01 p0124 A69-10687

ELECTRIC MOTORS
NT SYNCHRONOUS MOTORS
NT TORQUE MOTORS

Graetz-connection frequency converter and three phase shunt-connection commutatorless motor, noting speed control performed by electronic circuit
01 p0012 A69-10064

Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
01 p0047 A69-11000

DC servo system with torque feedback to ensure insensitivity to load variation and provide optimal performance
05 p0736 A69-15659

Motor design for operation in ultrahigh vacuum, discussing absence of convection cooling, outgassing avoidance, lubrication impossibility and oxygen absence as design parameters
08 p1377 A69-21028

DC/AC collectorless step electric motors operation and commutation circuits
09 p1442 A69-21860

Brushless DC motor with commutation control by magnetic position sensor scanned at HF
12 p2017 A69-26894

Hall generator DC brushless motors for aerospace use, discussing speed control and motor design
18 p3094 A69-35074

Advanced reaction wheel controller for spacecraft attitude control, discussing brushless DC motor role in weight and power reduction and control precision
[AIAA PAPER 69-855] 21 p3822 A69-39383

Tensor analysis of brushless DC motor controlled by transistors, discussing torque phase, torque variation phase and efficiency phase characteristics
24 p4255 A69-42678

ELECTRIC NETWORKS
Full multiplier design based on stable iterative array cells interconnected to provide logical functions, noting capabilities for binary numbers
01 p0048 A69-11138

Frequency controlled time delay network for broadband phased array antenna steering
04 p0580 A69-15469

Ultimate state periodic analysis of nonlinear electric systems by approximation methods in calculus of variations, discussing functional concept
09 p1474 A69-22448

Transmission line all pass equalizers theory and design for operation in TEM, TE or TM modes
13 p2233 A69-28065

State variables with delta functions for electrical network with discontinuously variable components, discussing application to parametron
19 p3287 A69-36763

- Distributed RC networks combined with lumped passive and active elements to produce distributed-lumped-active/DLA networks for filter requirements
23 p4144 A69-41401
- ELECTRIC POTENTIAL**
 NT BIOELECTRIC POTENTIAL
 NT CONTACT POTENTIALS
 NT COULOMB POTENTIAL
 NT LIENARD POTENTIAL
 NT LOW VOLTAGE
 NT PHOTOVOLTAGES
 NT SPIKE POTENTIALS
- Sensitivity of voltage transfer function relative to variation in value of components of resistance terminated reciprocal reactive network
01 p0049 A69-10069
- Amplifier with logarithmic transfer function noting use as null detector
01 p0038 A69-10075
- Capacitance-voltage relationships for PETN initiation by various diameter gold exploding bridgewires, noting optimum capacitance dependence on energy transfer efficiency
01 p0141 A69-10679
- Rarefied plasma flow interactions with conductors having cross sections equal to Debye radius, noting production of self consistent electrostatic potential
01 p0134 A69-11307
- Electric potential effects on heat transfer from plasma to solid wall, measuring heat input rates
02 p0290 A69-12423
- Electron flow in stable negative electrostatic potential well produced by electronic injection at center of hollow open spherical anode
03 p0475 A69-13153
- Electric potential for axisymmetric equilibrium electron density distribution, solving Poisson equation in closed form
03 p0476 A69-13159
- Potential energy functions based on electronegativities instead of spectroscopic parameters for Li and K molecules
03 p0472 A69-13805
- Electric potential distribution in coaxial quasi-stationary plasma injector
03 p0478 A69-13838
- Galvanostatic transients of iron passive in 2N sulfuric acid, noting space charge effects and zero field current variation
[ECS PAPER 84] 03 p0382 A69-13858
- Electrostatic potential generated by rockets on space vehicles, noting source of electric current in exhaust plumes and effect on instrumentation
03 p0522 A69-13903
- Potential distribution approximations for junction semiconductor devices, noting application to barrier layers and electron tunneling
03 p0408 A69-14107
- Advanced potentials method to determine electric field intensity tangential component on surface of cylindrical radiator
03 p0408 A69-14131
- Uniform external magnetic field effect on electric potential distribution within ion-electron beams near planar emitting surface
03 p0482 A69-14214
- Transient electro-osmosis of water in capillary tubes for pumping and generation modes, analyzing response to step change in pressure or voltage change under external loading
04 p0555 A69-14862
- Surface potential measurements for flat conductors or semiconductors using scanned electron beam probe
04 p0601 A69-15115
- Electric quadrupole parameters, discussing relationship between voltages at terminals
04 p0579 A69-15228
- N-type Si surface photopotential, conductivity and capacitance during anodic oxidation in absolute ethylene glycol
04 p0643 A69-15260
- Supply voltage limits for transistor amplifier circuit, examining processes during supply voltage variation
05 p0729 A69-16083
- Alkali metals thermoelectric power and energy dependence of Heine-Abarankov pseudopotential, taking into account anisotropy effects
05 p0809 A69-16507
- Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures
06 p0976 A69-16876
- Immobile space charge in MOS semiconductors as function of external voltage
06 p0979 A69-17153

Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 Mev Dynamitron electron accelerator recalibration
06 p0907 A69-17705

Current-voltage characteristic of tunnel diodes, with curve approximation by even degree polynomials of voltage, discussing quasi-linear analysis
06 p0898 A69-17802

Voltage dependence of depletion layer width, maximum electric field and capacitance of Gaussian diffused plane, cylindrical and spherical p-n junctions
07 p1196 A69-18242

Potential barrier curvature influence in aluminum trioxide tunnel junctions, noting ionic space-charge effect on shape
07 p1196 A69-18243

Oxide impurity effects causing potential shifts in Si covered by thick oxide layer studied with metal-oxide-Si electrical measurement and radiochemical analysis
07 p1072 A69-18272

Forward transient response characteristics of high resistivity, long base, low lifetime p-n-n silicon diodes doped with Au, noting voltage oscillations
07 p1101 A69-18652

Direct method determination of pinch-off voltage in depletion mode FET
07 p1102 A69-18861

Potential effect on wetting of platinum electrodes in acid electrolytes noting drainage role
08 p1268 A69-20362

LF electric potential oscillation of discharge plasma, describing oscillation behavior by theory of dissipative drift instability of weakly ionized plasma
08 p1370 A69-21020

Fluctuation voltage mean square value at polar dielectric capacitor terminals determined by applying stochastic properties of Poisson point processes to statistical model
08 p1295 A69-21151

Electron irradiation effect on surface potential of thermally grown silicon dioxide layers, noting conductivity and annealing effects
09 p1557 A69-21743

Cathode material effects on temperature coefficients for glow discharge tubes, noting running voltage pressure characteristics
09 p1468 A69-22602

Specifying electrical isolation and error signals suppression due to presence of common mode voltage in passive signal handling and conditioning equipment
10 p1654 A69-23272

Spherical and rod-plate spark gap response voltage as function of sawtooth wave, cosmic, gamma and UV radiation
11 p1851 A69-25086

Si IMPATT diode current and voltage waveforms of oscillation, noting small signal theory inapplicability
12 p2036 A69-25914

Differential capacitance, diffusion voltage and exponent alpha of hyperabrupt junction varactor
12 p2039 A69-26375

Multielectrode plasma probe with potential negative with respect to plasma, noting effect of microoptical features of probe on accuracy of I-V measurements
12 p2138 A69-26538

Collector supply voltage and base width effects on transistor amplification and frequency characteristics at microampere currents
12 p2042 A69-26879

Voltage characteristics in MHD generator with water cooled segmented electrodes using potential probes, considering forced convection heat transfer
12 p2017 A69-27178

CdS acoustoelectric oscillator steady state oscillation frequency dependence on voltage and conductivity compared with linear acoustoelectric amplification theory
13 p2227 A69-27244

Uninsulated in-core thermionic reactor design permitting diode series connections to build output voltage
14 p2398 A69-29186

Linear analog computing elements realizing voltage transfer function with poles and zeros independently controlled, basing method on dummy variable technique
14 p2422 A69-29551

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes
15 p2573 A69-30062

Complex load impedance determination by measuring maximum, minimum and load voltages in line, including error analysis
15 p2582 A69-30123

Three dimensional effects of potential minimum near cathode emitting axisymmetric beam, relating electric fields distribution to noise reduction coefficient
15 p2568 A69-30794

Solid electrolyte tantalum condensers reliability under repeated service voltage applications for calculating defective condenser probability
15 p2626 A69-30836

Flush electrostatic probe edge effect, considering Couette flow of weakly ionized compressible gas past discontinuous wall potential
15 p2653 A69-30912

Vibrational excess entropy in dilute solid solutions alloys calculated by changes in potential fields surrounding impurity atoms
16 p2798 A69-31706

Semiconductor impressed voltage preconditioning, considering problems involving surface properties
16 p2758 A69-31713

Hall effect and transverse voltages in type II superconductors in mixed state, considering cold rolled Nb-Zr alloys
16 p2827 A69-31827

Electron trap behavior on charged spacecraft, obtaining expressions for current to aperture and internal retarding electrodes for all apertures and spacecraft potentials
16 p2849 A69-31976

Radar control system based on load waveform monitoring by coupled control and modulating circuits
16 p2753 A69-32439

Stabilized DC to DC converter advantages in output voltage, overall dimensions and efficiency for battery driven mobile equipment
16 p2765 A69-32443

Surface state density determination as function of surface potential in MIS capacitors, discussing MIS capacitance method theory and computer programs
16 p2827 A69-32556

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential [AIAA PAPER 69-699]
17 p3011 A69-33475

Electrode potentials of pure metals, Ni-Cr and Ni base alloys in molten salts applied to corrosion studies
17 p2990 A69-33650

Bernoulli distribution and Monte Carlo method for electrical load analysis in designing electric power generation and distribution
17 p2905 A69-34090

Electrode potential measurements for corrosion study of metals and alloys in aqueous solutions, molten salts and gaseous atmospheres
18 p3150 A69-35412

IR detector limiting noise voltage /photon noise/ due to photon arrival fluctuations at responsive element determined using Planck radiation law
19 p3309 A69-36059

Current-voltage characteristics of umtron with metal-dielectric-semiconductor structure /MOSFET/ taking into account substrate potential effect
19 p3284 A69-36592

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
19 p3314 A69-36622

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields
19 p3256 A69-36717

Voltage variation frequency analysis for narrow-band sweep oscillators circuit design
20 p3486 A69-37010

Negative electric potential effect on deposition rate of Mo from molybdenum carbonyl and on deposit chemical composition during pyrolysis
20 p3559 A69-37016

Computerized design parameters for realizable over-driven bimode varactor frequency doubler based on charge-voltage relationship at break point
20 p3505 A69-37299

Josephson frequency-voltage relation at microwave and far IR frequencies compared, using radiation induced steps
20 p3583 A69-37418

Dielectric response of semiinfinite metal surface to external point charge in linearized Fermi-Thomas approximation, discussing potential in metal and vacuum
20 p3583 A69-37498

Metal insulator semiconductor volt-capacitance changes due to light flux, introducing surface recombination rate to improve model
20 p3585 A69-38273

- Steady state vertical distribution of small ions in ground layer assuming atmospheric dynamic and thermal sublayers, calculating air resistance and electric field potential
21 p3715 A69-38836
- Molecular hydrogen-CO fuel cells operation, studying internal voltage oscillations due to repeated electrode poisoning and reactivation
22 p3896 A69-40738
- Electric potential measuring device for frog isolated skeletal muscle fiber mounted on micromanipulator
23 p4111 A69-42058

ELECTRIC POWER

- VHF transistor power output capability, discussing limitation by RF saturation resistance and current crowding by large current densities and high frequencies
07 p1101 A69-18653
- MHD power plant research and development, discussing shock wave electric power generators and modulated systems
11 p1925 A69-24469
- Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle
13 p2206 A69-27491
- Thermionic electrical power generation - Conference, Stresa, Italy, May 1968
14 p2394 A69-29172
- Scientific satellite 1 solar cell panels power output dependence on temperature and spin calculated and compared with results for outdoor sunlight
15 p2552 A69-30072
- Electric power quality effects on aircraft electronic utilization equipment, discussing characteristics of variable speed constant frequency /VSCF/ generating system
17 p2905 A69-34091
- Optimum power allocation for RF carrier phase error and synchronization error in two channel system
19 p3274 A69-36283
- Sealed Ni-Cd battery with bipolar construction to reduce internal resistance and increase power bursts capacity, emphasizing electrical characteristics and economic considerations
23 p4072 A69-42283

ELECTRIC POWER PLANTS

- NT NUCLEAR POWER PLANTS**
- Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion
09 p1584 A69-21205
- Bernoulli distribution and Monte Carlo method for electrical load analysis in designing electric power generation and distribution
17 p2905 A69-34090
- Electrical power system synthesis for manned lunar base for surface explorations of increasing energy requirements and duration, discussing thermal control, reliability, etc
23 p4076 A69-42541

ELECTRIC POWER TRANSMISSION

- Surface structure effect on flux penetration and AC losses in superconductive niobium
02 p0298 A69-12031
- Electromagnetic radiation below 1 GHz from gap type electrical discharges on electric power distribution lines
23 p4126 A69-42218

ELECTRIC PROPULSION

- NT ELECTROMAGNETIC PROPULSION**
- NT ELECTROSTATIC PROPULSION**
- NT ION PROPULSION**
- NT PLASMA PROPULSION**
- NT RESISTOJET ENGINES**
- Book on electric propulsion systems for spacecraft covering thermoelectric, electromagnetic, electrostatic, plasmacore, thermonuclear and photon systems
02 p0305 A69-12233
- Electropropulsion by thruster using colloidal carbon particles charged by electron bombardment to provide thrust, noting specific impulse
03 p0495 A69-13396
- Electric propulsion for payload transfer from low to synchronous orbit of ELDO launch vehicles
03 p0496 A69-13994
- French research on electric propulsion dealing with plasma dynamics, discussing traveling wave accelerators, pulsed plasma guns, ion thrusters, etc
[AIAA PAPER 67-740] 03 p0496 A69-13995
- Electric space propulsion systems and auxiliary power sources development in West Germany, noting solar cells, isotope generators and reactors with conversion systems
03 p0496 A69-13996

- Electrical propulsion for space maneuvers, discussing interrelationship of orbital changes, payloads and time
06 p0998 A69-16858
- Multimission interplanetary probe using solar electric propulsion
06 p0984 A69-17593
- Advanced electrical and nuclear propulsion systems for European launchers, comparing performances with chemical propulsion
06 p0984 A69-17628
- Electric propulsion research in Japan, considering cesium ion thruster, plasma acceleration and thrust by electric explosion of fine wires
06 p0984 A69-17629
- Electric propulsion - AIAA Conference, William-sburg, March 1969
09 p1584 A69-21201
- Spacecraft electric propulsion parameters and launching vehicle characteristics in low thrust mission simulation, discussing spacecraft path
09 p1584 A69-21202
- Electric propulsion missions analysis for spacecraft design engineer, discussing out-of- ecliptic and Jupiter flyby probes
09 p1584 A69-21203
- Pre-design and mission analysis software capability for sizing, design, fabrication and developmental testing of flight hardware for electrically propelled interplanetary spacecraft
09 p1585 A69-21210
- Experimental program for tests to identify primary electric propulsion system integration problems and solutions, emphasizing design and initial testing
[AIAA PAPER 69-236] 09 p1560 A69-21213
- Pulsed MPD arc jet electric propulsion system requirements, examining physical constraints, pulse duration, duty cycle, power network structural details, etc
[AIAA PAPER 69-269] 09 p1560 A69-21215
- NASA program in electric propulsion, noting applications for spacecraft position control and for small automated interplanetary spacecraft
[AIAA PAPER 69-248] 09 p1561 A69-21216
- Cesium electron bombardment microthruster system, discussing ion engine, feed, discharge neutralizer, power conditioning and control electronics
[AIAA PAPER 69-293] 09 p1561 A69-21223
- Space charge sheath electric thruster principles, construction and performance using laboratory test model
[AIAA PAPER 69-282] 09 p1563 A69-21235
- British electric propulsion research, discussing electron bombardment ion engines, conical theta pinch and rail devices and test facilities
[AIAA PAPER 69-299] 09 p1564 A69-21241
- Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system
[AIAA PAPER 69-253] 09 p1585 A69-21244
- Solar electric propulsion mission simplification by staging concept, discussing thrust combination, weight tradeoffs, design and Jupiter flyby probe
[AIAA PAPER 69-251] 09 p1586 A69-21245
- Liquid mercury cathode thrusters characteristics satisfying constraints imposed by solar flux variations with distance from sun
[AIAA PAPER 69-237] 09 p1565 A69-21246
- Ion thrusters and various microthrusters /electron bombardment ion and pulsed plasma/ for proposed European missions
[AIAA PAPER 69-274] 09 p1565 A69-21250
- NASA long range planning of primary electric propulsion for automated space program
[AIAA PAPER 69-247] 09 p1565 A69-21251
- Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] 09 p1565 A69-21252
- Synchronous orbit attainment with continuous electric propulsion, noting payload ratio dependence on various parameters and changing orbit inclination
[AIAA PAPER 69-275] 09 p1586 A69-21265
- Scientific data acquisition and interpretation effects on electric spacecraft plasmas and field directions, noting electron interchange reactions effect
[AIAA PAPER 69-276] 09 p1568 A69-21727
- Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs
[AIAA PAPER 69-252] 09 p1568 A69-21729
- Liquid mercury cathode electron bombardment thrusters applicability to electric propulsion missions
[AIAA PAPER 69-302] 09 p1569 A69-21876
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation

- and operating point variations in formulating system mass and reliability
[AIAA PAPER 69-254] 09 p1569 A69-21879
- Book on theory and design of jet, rocket, nuclear, ion and electric propulsion systems noting combustion, detonation, fluid injection and space mission applications
11 p1943 A69-25582
- Electric and ion propulsion with solar array or nuclear reactor energy sources, discussing thermal thrusters, electrostatic thrusters and plasma thrusters
11 p1944 A69-25592
- Electric propulsion systems characteristics, examining sputtering of metallic targets as thrust augmentor
11 p1944 A69-25598
- Thermionic reactor design for electric propulsion with emphasis on reactor power and fuel energy and fast neutron flux
14 p2509 A69-29184
- Electrically propelled TV satellite control maneuvers to reach target position in synchronous circular orbit from spiral ascent trajectory
16 p2868 A69-31935
- Electric propulsion, discussing plasma research, MPD thruster and arcs, ion thruster research and spacecraft integration
[AIAA PAPER 69-497] 16 p2838 A69-32655
- Solar electric propulsion system performance consisting of thrusters with thrust vector aligning actuators, switching network and flight type power conditioner
[AIAA PAPER 69-498] 16 p2843 A69-32708
- Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] 16 p2741 A69-32709
- Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby
[AIAA PAPER 69-499] 16 p2844 A69-32714
- Charged colloids generation by electrostatic spraying for thruster concept, subjecting metal capillary needles to AC voltage
[AIAA PAPER 69-495] 16 p2846 A69-32773
- Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines
18 p3185 A69-35108
- Solar electric thrust system technology concerning performance, thruster control system stability and method for solution
19 p3394 A69-35941
- Soviet monograph on electrical rocket engines covering basics of nuclear, electrothermal, plasma and ion engines
20 p3586 A69-37236
- Trajectory requirements and performance comparisons of single stage electrically propelled space vehicles
[AAS PAPER 68-106] 21 p3819 A69-39204
- High voltage power supply electronic subsystem for electric propulsion of ATSD satellite, describing packaging, temperature control and performance in simulated space environment
22 p3999 A69-39948
- Spacecraft electric propulsion research in France, Great Britain and Germany
24 p4363 A69-42668

ELECTRIC PULSES

- Passive circuit to transform voltage of indefinitely repeated positive or negative pulses using transistors, diodes and magnetic cores
01 p0043 A69-10564
- High voltage controlled amplitude rectangular pulse generators having nanosecond buildup time
04 p0597 A69-14849
- Electric signals by shock and detonation waves, describing detection technique
[WSCJ PAPER 68-44] 07 p1240 A69-18360
- Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability
08 p1294 A69-21116
- Current controlled negative differential resistivity observed during current-voltage measurements made with p-type Te at 77 K
09 p1557 A69-21747
- Cesium ions decay time in thermionic converter operating in gas kinetic mode by pulse ionization, noting dependence on interelectrode potential distribution
14 p2403 A69-29252
- Plasma energy and energy replacement time dependent on discharge pulse shape and magnitude
14 p2499 A69-29848

Solid electrolyte tantalum condensers reliability under repeated service voltage applications for calculating defective condenser probability
15 p2626 A69-30836

Welding technique using pulsed current supply to achieve smooth metal transfer on thin sections in various positions
18 p3150 A69-35418

Pulses and sine waves coupling between parallel transmission lines obtained using Oliver elementary coupling theory
19 p3266 A69-35768

Stimulated emission at current pulse end ascribed to external resonator turn-on time delay effects with GaAs injection lasers at room temperature
21 p3734 A69-38408

Electric responses of anterior and posterior gyrus cinguli to stimuli of sciatic nerve in cats
22 p3886 A69-41175

Holographic storage of electric signals in wideband pulsed carrier radar communications, noting Fourier transform in ultrasonic light modulator
23 p4164 A69-41626

Luminescence, I-V and pulse characteristics of high resistivity Ni doped GaAs single crystals, noting injection conductivity
24 p4362 A69-43734

ELECTRIC RELAYS

Distance measurement by distance relay circuit composed of intermediate current transformers and rectifier bridges
05 p0765 A69-16746

Steady modes of operation analysis for optimal single channel differential relay system with inertial controlled plant, assuming constant rate varying plant input
12 p2052 A69-26278

Operational O factor of optimal differential relay system with inertial plant during tracking process, noting cadence pulses high repetition rate influence
12 p2052 A69-26279

Relay control systems limit cycle calculations, comparing classical differential equation, Laplace transformation and state and phase space analysis methods
13 p2238 A69-27396

Relays - Conference, Oklahoma State University, April 1969
13 p2230 A69-28042

Relay reliability cost vs failure cost in spacecraft applications
13 p2231 A69-28044

Electric relays reliability requirements, discussing specifications, minimum current, load and frequency effects, etc
13 p2231 A69-28045

Electric relays requirements for spacecraft with magnetic field constraints
13 p2231 A69-28046

Latching high-voltage reed relays in satellite instrumentation systems
13 p2231 A69-28047

Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
13 p2231 A69-28048

Microminiature latching relay design and manufacturing cost
13 p2232 A69-28049

Optimal control with computer prediction for inertial linear plants relay system containing time lag
24 p4295 A69-43706

ELECTRIC ROCKET ENGINES

NT ARC JET ENGINES
NT CESIUM ENGINES
NT ELECTROSTATIC ENGINES
NT ELECTROTHERMAL ENGINES
NT ION ENGINES
NT PLASMA ENGINES
NT RESISTOJET ENGINES

SERT 2 thruster hollow cathode durability tested in bell jar
[AIAA PAPER 69-304] 09 p1562 A69-21224

Power converter design for electrically propelled spacecraft, discussing weight, reliability, and thruster load requirements
[AIAA PAPER 69-240] 09 p1568 A69-21732

Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices
11 p1944 A69-25593

Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring
12 p2148 A69-26787

Electric and chemical rocket propulsion systems
13 p2325 A69-28255

Liquid, solid, hybrid propellant and nuclear, electric and air breathing rocket engines, discussing orbiting payload cost, controllability, operating environments, velocity, etc
19 p3395 A69-36321

Soviet monograph on electrical rocket engines covering basics of nuclear, electrothermal, plasma and ion engines
20 p3586 A69-37236

ELECTRIC SPARKS

Exploding wire discharges similarity with underwater sparks for understanding water breakdown and parallel discharges
01 p0117 A69-10657

Sparks from laser induced arc breakdown due to focusing of laser beam, noting evidence for initiation by self focusing
01 p0092 A69-11246

Sparks four meters long in atmospheric air, noting image converter photographs, electrical measurements, light output, spectra and energy balance
02 p0281 A69-12406

Spark ignition of liquid fuel droplets atomized in air analyzed by spark discharge visualization for two phase mixture
09 p1623 A69-22220

Dwell time of sample particles in plasma excitation zone, noting effect on spectral analysis of sample materials injected into spark discharge plasma
11 p1926 A69-24624

Vacuum spark light source for extreme UV noting mechanical trigger, compatibility with clean vacuum system and magnetic confinement of ions
11 p1885 A69-24839

Photoelectronic high speed image intensifier framing camera, showing single shot synchronized photography of electric spark in air
12 p2082 A69-26137

Nanosecond time variations in current-voltage characteristics of gas discharge in air, taking into account discharge circuit resistance and discharge space capacitance
12 p2137 A69-26534

Statistical analysis of operation of precision electric spark machine servosystems with RC generator based on working pulse peak voltage distribution
23 p4168 A69-41307

Automation of single pass electric spark machining of high alloy steels and hard alloys, including anodic-mechanical profiling, cutting and drilling
23 p4168 A69-41308

ELECTRIC STIMULI

Response rates of rats to periodic shocking for food reinforcement with added clock cue stimuli
10 p1644 A69-23304

Penile erection electrically evoked from Macaca mulatta forebrain, measuring density and distribution of responding points
12 p2018 A69-25775

Ventral posterolateral potentials in anesthetized immobilized cats in response to electric stimulation of mesenteric nerves and mechanoreceptors, studying thalamus nucleus role
12 p2020 A69-26562

Electrode stimulated hypothalamic drinking in rats compared with drinking induced by water deprivation, noting difference in consumption
17 p2910 A69-33750

Lateral hypothalamic stimulation bound eating motivation in animals, comparing electrical stimulation and hunger elicited eating
17 p2910 A69-33752

Electrical stimulation effect on drive specificity in lateral hypothalamus area of satiated rat, suggesting fallacy in previous conclusion concerning appetite
22 p3876 A69-40269

Anesthetized cats with electrodes in visual cerebral cortex, investigating stimulation of conditioned alimentary reflexes in response to light signals by electric signals
22 p3885 A69-41066

Functional relation between primary response in individual phases and neurons activity in cats cerebral cortex
22 p3886 A69-41067

Mapping of biological potentials evoked in primary somatosensory fields by electrical signals on dorso-lateral surface of brain cortex of cats
22 p3886 A69-41121

Electrical self stimulation adaptability of hypothalamus or instrumental self reinforcing reaction in rats using skinner box technique
23 p4091 A69-42052

Self rhythms of low audio frequencies in motor nerves under electric pulses influence at VLF related to viscosity changes of nerve substance
23 p4092 A69-42051

Sinusoidal pressure electric stimuli frequency effects in isolated carotid sinus on canine peripheral blood pressure, determining dynamic characteristics from observation data
23 p4092 A69-42051

Electrical stimulation effects of carotid sinus on sinoatrial and atrioventricular conduction for vagi and sympathetic nerves interruption to heart in dogs
24 p4257 A69-42625

ELECTRIC STRAIN GAGES

U STRAIN GAGES

ELECTRIC SWITCHES
NT CRYOTRONS
NT THERMOSTATS

Fast reversible switching between highly resistive and conductive states in various disordered semiconductor devices, using electric field
01 p0140 A69-11246

High power sinusoidal pulsed current generated using Si controlled rectifiers/thyristors/as switches
03 p0404 A69-13266

Hollow charge pyrotechnic circuit closer, noting on piece construction, transportability, safety, quick action and reproducible delay
10 p1635 A69-23033

Pyrotechnic circuit closer using jet to achieve conduction between hollow charge lining and coaxial electrode
10 p1635 A69-23033

Gallium arsenide Fe-doped diodes efficiency as high speed switches from measured current-voltage characteristics at various temperatures
13 p2319 A69-27899

Latching high-voltage reed relays in satellite instrumentation systems
13 p2231 A69-28044

ELECTRIC TERMINALS

Signal detection by four terminal receiver network optimal for background Gaussian noise
04 p0557 A69-14774

Flat cable terminating techniques for electric and electronic systems
04 p0578 A69-15217

Electric quadrupole parameters, discussing relationship between voltages at terminals
04 p0579 A69-15223

Coupled and uncoupled terminals series connection for reactive multiport network determined by transforming scattering matrix columns into coordinate vectors
07 p1100 A69-18522

Equivalent circuit synthesis with six reactances-two terminal network bridges
08 p1295 A69-21166

Computer program for generation of test patterns for multiterminal devices and networks
21 p3679 A69-39604

ELECTRIC WELDING

NT ARC WELDING
NT ELECTRON BEAM WELDING
NT ELECTROSLAG WELDING
NT GAS TUNGSTEN ARC WELDING
NT PLASMA ARC WELDING

Resistance welding monitoring systems including thermal expansion slow scan ultrasonic and electric energy monitor/limiter systems
02 p0253 A69-11866

Welding technique using pulsed current supply to achieve smooth metal transfer on thin sections in various positions
18 p3150 A69-35418

ELECTRIC WIRE

NT EXPLODING WIRES

Stability of compound superconducting cables under conditions of controlled heat transfer from cable surface to liquid He
[IEEE PAPER 13.5] 01 p0176 A69-10711

Very thin short metallic filament scattering and absorption cross sections for various values of filament conductivity
03 p0395 A69-13622

Mini trend hookup copper wire insulation performance evaluation
05 p0730 A69-16244

Flat conductor cable technology, discussing design manufacture, specifications, etc
[ASME PAPER 69-DE-8] 14 p2393 A69-28855

Pulsed ruby lasers for welding fine wires for electrical interconnections, considering laser energy and pulse duration effects
15 p2617 A69-30099

- Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents [AIAA PAPER 69-425] 16 p2832 A69-32653
- Radiated interference and susceptibility prediction for unshielded wires in near field of vertical rod antenna 23 p4141 A69-42225
- Stability criteria for electrical interconnection in parallel operating valve controlled hydraulic servomotors applied to gimbaled system 24 p4256 A69-43310
- ELECTRIC WIRING**
U WIRING
- ELECTRICAL CONDUCTIVITY METERS**
Electrical conductivity standards and eddy current measurements noting calibration facility 01 p0081 A69-10830
- Laboratory atmospheric electrical conductivity meter, discussing structural elements 04 p0600 A69-15106
- ELECTRICAL ENERGY**
U ELECTRIC POWER
- ELECTRICAL FAULTS**
NT SHORT CIRCUITS
- Planar transistor micromode operation during collector junction avalanche breakdown 01 p0047 A69-10884
- Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern 02 p0298 A69-12098
- RF voltage breakdown in solid state telemetry transmitters on sounding rocket, noting glow discharge initiated by energetic dissociated electrons 02 p0222 A69-12691
- Tunnel breakdown in p-n junctions used to generate microwave oscillations, discussing Si and Ge properties 03 p0492 A69-14163
- Conductivity in p-n junctions during avalanche breakdown at HF calculated, noting agreement with experiments 03 p0492 A69-14164
- Schottky barrier mixer diodes and point contact diodes failure, discussing criterion for degradation of noise figure, 1/f noise and reverse breakdown voltage 04 p0574 A69-14352
- P-n junction breakdown, discussing local regions of overheating and increased current density, differential resistance frequency dependence and breakdown region temperature 04 p0577 A69-14782
- Corona and breakdown voltage in helium-oxygen atmospheres, analyzing conditions for manned space flight vehicles 05 p0730 A69-16241
- Controlled factorial experiments on high voltage vacuum breakdown, using Yates algorithm analysis on computer 05 p0731 A69-16244
- Supersonic airplane high temperature wire tests, detecting corona onset voltage /COV/ or voltage breakdown 05 p0731 A69-16245
- Peripheral surface damage effects on epitaxial GaAs bulk diodes breakdown characteristics, noting measurements on mechanically and chemically prepared elements 05 p0733 A69-16561
- Threshold failure levels of semiconductor diodes and transistors due to pulse voltages 06 p0977 A69-16883
- Requirements for analysis and synthesis of diagnostic tests for detecting faults in combinational logic circuit 06 p0892 A69-17408
- Electric field growth directional effect on avalanche breakdown conditions in p-n junctions 06 p0981 A69-17828
- Destructive breakdown in Schottky barrier diodes by evaporating contact metal through mask onto silicon, showing local heating by thin wax layer 08 p1286 A69-20860
- Synthetic circuit equipment for semiconductor rectifier life testing with built-in fault analyzer for indicating shorted and broken diodes 08 p1293 A69-21113
- Second breakdown in semiconductors, studying thermal feedback connected with temperature time dependence of junction electrical properties 08 p1294 A69-21115
- Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability 08 p1294 A69-21116
- Failure mechanisms in semiconductors, discussing imperfections, fabrication errors and electrical, thermal and mechanical stresses 08 p1294 A69-21117
- Second breakdown mechanisms in transistors, describing electrical and physical characteristics and effects of design and structural defects on resistance to initiation 08 p1294 A69-21120
- Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator 09 p1441 A69-21840
- RF voltage breakdown in air for 50 ohm coaxial transmission line configuration [JPL-TR-32-1379] 09 p1470 A69-22790
- Breakdown voltage and avalanche drift instability factors in planar passivated p-n junctions as function of oxide thickness and mobile charge 10 p1743 A69-23174
- Transfer function parameters identification by fault isolation technique using white noise stimulus and processor matrix of orthogonal filters 11 p1865 A69-25077
- Plasma physics of electric arc transition from conducting plasma to insulating gas in electric circuit interruption, noting interrupter interaction with power system 12 p2133 A69-25905
- Electrical breakdown between cold electrodes in contact with flowing plasma produced by electromagnetic shock tube 12 p2134 A69-26098
- Computer programs for linear systems fault isolation, discussing technique theory and limitations 12 p2040 A69-26568
- Planar transistor micromode operation during collector junction avalanche breakdown 12 p2041 A69-26648
- Electrical breakdown mechanism in semiconductors determined by measuring Zener current in avalanche breakdown 13 p2317 A69-27660
- Dielectric constant, loss and breakdown of electrical insulation materials, discussing atomic and molecular models and effects of polarizations, environment and manufacturing procedures 13 p2230 A69-27983
- Prebreakdown and breakdown electrical properties of thin film capacitors with certain oxides, fluorides and Teflon dielectrics 13 p2322 A69-28012
- Electrical breakdown voltage and voltage-current characteristics of uncooled coplanar carbon electrodes in walls of supersonic conical and rectangular nozzles [AIAA PAPER 68-713] 13 p2249 A69-28231
- Optical maser induced electrical breakdown interaction with superhigh pressure ionized gases, using optical interferometry and holography 13 p2273 A69-28464
- Thermionic converters with matrix circuit connections, considering current flow patterns in matrices to evaluate electrical failure spreading 14 p2400 A69-29225
- Oscillation breakdown of varactor diodes in parametric amplifiers from studying I-V characteristics, noting resonant circuit retuning effect 15 p2574 A69-30127
- Tubes faults monitoring in three phase Graetz converter bridges by measuring voltage across DC smoothing inductor 15 p2575 A69-30180
- Third generation computer reliability including preparation and test of integrated logic circuits 15 p2626 A69-30832
- Solid electrolyte tantalum condensers reliability under repeated service voltage applications for calculating defective condenser probability 15 p2626 A69-30836
- Arbitrary single gate failures diagnosis in combinational logic circuits not requiring fault table construction 15 p2583 A69-31112
- Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents 16 p2758 A69-31618
- Prebreakdown and breakdown electrical properties and light emission during destructive breakdown in thin film capacitors 16 p2761 A69-32323
- InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K 19 p3389 A69-36546
- Electrical failures in aircraft due to static electrification of electrically heated windscreens, noting materials for reducing surface resistivity 19 p3256 A69-36769
- Gunn oscillators protection from catastrophic breakdown phenomena, using carrier velocity saturation in n-type Ge 21 p3682 A69-38777
- MOS arrays failure mechanisms, discussing oxide defects, contamination and metal migration due to mode of operation and fabrication techniques 21 p3684 A69-39605
- Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions 22 p3910 A69-39954
- Digital data systems fault detection and isolation, describing diagnostic programs and hardware [AIAA PAPER 69-967] 22 p3906 A69-40348
- RF voltage breakdown facility for studying spacecraft antenna characteristics in space and planetary atmosphere environments [AIAA PAPER 69-1028] 22 p3924 A69-40397
- Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes 24 p4359 A69-43693
- Anisotropic carrier distribution effect on polarization of spontaneous recombination radiation during GaAs breakdown in electric field 24 p4362 A69-43736
- ELECTRICAL IMPEDANCE**
NT CONTACT RESISTANCE
NT LC CIRCUITS
NT REACTANCE
- Modified admittance yielding Kubo admittance at nonzero frequencies, discussing transformation of correlations of Ising model 01 p0115 A69-10019
- Transistorized feedback amplifier for data transmission over high voltage lines in conveyed wave systems 01 p0038 A69-10074
- Small signal impedance of subcritically doped gallium arsenide Gunn diodes, using drift velocity vs electric field relationship 01 p0038 A69-10121
- Multistub filter for microstripline using shorted and open stubs 01 p0041 A69-10200
- Planar arrays of linear antennas above stratified medium, showing antenna impedance and current distribution expressed in terms of free space environment 01 p0042 A69-10343
- Fourier transformation method for current distribution and driving point admittance of coupled antennas in dissipative medium 02 p0215 A69-11946
- Reflection of plane electromagnetic wave from impedance cylinder in vacuum, using ray expansion method 02 p0217 A69-12262
- Admittance of parallel plate waveguide aperture with infinite flange illuminating metal sheet, using wedge diffraction theory and integral transform method 02 p0218 A69-12328
- C and S band waveguide impedance measurements taken in flight in reentry plasma, noting results for plasma 02 p0218 A69-12333
- End correction for input admittance of electrically thick monopole antenna with arbitrary radius driven from coaxial line 02 p0219 A69-12346
- Linear transistor models synthesis based on measured characteristics of four terminal admittance parameters 03 p0404 A69-13596
- Active and reactive impedance components of plane capacitor immersed in plasma and at LF noting dependence on plasma conductivity 03 p0477 A69-13713
- Electrodeless conductivity probe impedance in anisotropic plasma computed on basis of Maxwell equation 03 p0483 A69-14252
- Driving point admittance of radiating aperture in infinite periodic planar phased array, determining coefficients of waveguide modal expansion and Floquet series 04 p0571 A69-14315
- Surface impedance variation effect on surface wave propagation along rod waveguide 04 p0576 A69-14761

Input impedance of slot antenna in primary resonance region
04 p0577 A69-14784

Corrugated impedance antennas synthesized, using model in impedance surface form
04 p0577 A69-14786

Input admittance of cylindrical dipole antenna immersed in cold isotropic lossless plasma medium and insulated by ion sheath or unit permittivity dielectric
04 p0580 A69-15490

Equivalent circuit diagrams for impedance of plasma column in low current low pressure glow discharge
05 p0800 A69-15742

Input admittance of confocal Fabry-Perot resonator, with waveguide coupled infinitely long conic-section cylindrical reflectors, taking into account diffraction and resistive losses
05 p0731 A69-16295

Admittance between terminals measured for stabilizing single loop negative feedback transistor amplifier
05 p0739 A69-16341

Composite equivalent circuits method for complex waveguide-resonator couplings based on variational principle for admittance matrices of electromagnetic volume couplings
05 p0736 A69-16785

Solar flares, discussing transformation of magnetic energy into ion and electron kinetic energy by acceleration in high impedance region in current filaments
06 p0995 A69-17445

Residue contributions to integrals associated with admittance of plasma or dielectric covered circular aperture antenna used to calculate surface wave contribution to waveguides
06 p0896 A69-17477

Characteristic impedance of rectangular waveguide computation curve explained on basis of computer program for cascade of transmission line sections
06 p0897 A69-17490

Numerical values for cylindrical antenna admittance in uniaxial plasma, considering plasma compressibility and vacuum sheath
06 p0965 A69-17513

Plasma impedance effect on time variation of inverse pinch
06 p0967 A69-17716

Circular antenna array consisting of identical centered cylindrical dipoles placed tangential to and in plane of circle and with equal spacing
06 p0898 A69-17765

External impedance controlled nucleation of Gunn effect domains studied theoretically by Nyquist criterion
06 p0981 A69-18217

Electrical impedance of semiconductor supporting two waves contains entire complex transcendental function with complex parameter and infinity of zeros in left half z plane
07 p1196 A69-18268

Frequency dependence of input impedance of voltage controlled bootstrap amplifier stages
07 p1090 A69-18294

IMPATT diode microwave oscillator, discussing large signal characterization and model for efficiency dependence on load conductance and admittance plane characteristics
07 p1101 A69-18650

Antenna impedances in cold plasma with perpendicular static magnetic field
08 p1281 A69-20029

Cylindrical antenna input impedance in isotropic plasma, assuming weak three dimensional plasma diffusion
08 p1285 A69-20428

Converging solutions for imaginary admittance and current distribution in linear cylindrical antennas
08 p1295 A69-21165

Noise factor of two port in terms of various sets of noise parameters and source immittances, giving table for conversion formulas
09 p1455 A69-21897

Complex admittances and impedances of various networks determined by impedance bridge, describing frequency dependent limits of measurement parameters
09 p1501 A69-22578

Micromin alumina substrates design data, determining dielectric constant, impedance vs line width and wavelength vs frequency
09 p1460 A69-22792

Electromagnetic wave propagation over constant impedance flat earth, using electromagnetic compensation theorem
10 p1655 A69-23422

Current distribution and impedance of insulated cylindrical antenna embedded in dielectric cylinder immersed in compressible electron plasma
10 p1663 A69-23423

High gain proportional and bistable fluidic amplifier design, noting high impedance role in pressure sensing and computer circuits in aircraft engine control
10 p1638 A69-23555

Coupling coefficient and impedance for excitation of isotropic plasma column by ring of magnetic current outside plasma, noting surface wave resonance effect
10 p1659 A69-24064

Input admittance response characteristics and input susceptance and input conductance of resonant reactive modulator with varactors and nonlinear losses
10 p1665 A69-24066

Rectangular RC distributed circuits with shaped electrodes, analyzing short circuit admittance parameters
11 p1858 A69-24938

Load admittance effect on low pass voltage transfer characteristics of RC lines, analyzing shaped lines at open circuit under terminated conditions
11 p1859 A69-24939

Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
11 p1851 A69-24986

Induced EMF method for calculation of antenna impedance, discussing effects of approximations in calculation
11 p1851 A69-24997

Electromagnetic scattering from thin wire loops under various impedance loadings, considering positive and negative resistors effect combined with reactive networks
11 p1837 A69-25000

Resonant load impedance effects on Gunn diode oscillators output fluctuations, noting maximum power conditions
11 p1853 A69-25609

RF measurement techniques and interpretation of bonding impedance characteristics through VHF region
12 p2040 A69-26472

Power spectral analysis feasibility for data reduction for medical interpretation of changes in pulmonary impedance pneumograph in remote monitoring
12 p2024 A69-26558

Dielectric coated finite cylindrical antennas, using numerical and Wiener-Hopf methods to obtain input admittance and current distribution
12 p2041 A69-26604

Horseshoe electromagnet sensors above ferromagnetic plate, analyzing electromagnetic properties of plate and coil impedance
12 p2094 A69-26719

Steady state small signal input impedance of low power planar transistor as function of temperature and operation mode
12 p2042 A69-26878

Input impedance of quarter wavelength antenna in anisotropic plasma, discussing plasma parameters role and use of probe antenna in plasma diagnostics
12 p2044 A69-27071

High resistivity GaAs impedance with nonlinear I-V characteristics, showing appreciable reactive component
13 p2317 A69-27881

Low resistance Bi thin film complex electrical impedance in IR range, stating methods and equivalent circuits for determining impedance
13 p2322 A69-28011

Synthesis for asymmetrical branch guide directional coupler-impedance transformers, noting application in antenna design
13 p2233 A69-28069

Characteristic impedance determination for transmission lines cascades terminated by resistor using recurrent relations, discussing reflection coefficient
13 p2221 A69-28074

Admittance of radiating elements in circular array with longitudinal slots on conducting cylinder, taking into account element interactions
13 p2234 A69-28505

Radiation pattern of electric and magnetic dipole on flat semiinfinite impedance system edge found similar
13 p2236 A69-28546

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field
14 p2438 A69-29082

Transistors transfer admittances measured indirectly, evaluating mean square error for transfer parameters
14 p2420 A69-29396

Impedance eigenvalues for eigenmodes of multiconductor transmission lines, discussing transverse field distributions along conical line
14 p2423 A69-29756

Complex load impedance determination by measuring maximum, minimum and load voltages in line, including error analysis
15 p2582 A69-30123

Frequency effects on Gunn oscillator modulation sensitivity, discussing microwave-frequency deviation and diode impedance
15 p2577 A69-30614

Plane electromagnetic wave propagation normal and parallel to magnetic field in plasma analyzed by equivalent circuits and impedances
15 p2659 A69-30799

Approximate solution for coupled microstrip transmission lines in integrated circuits, discussing impedance, capacitance and testing
15 p2580 A69-31078

Linearly tapered transmission line equation and transfer matrix parameters, considering input impedances and microwave application
16 p2749 A69-31582

Diffraction of electromagnetic waves produced by vertical dipole on impedance sphere of large radius in isotropic medium, using moment method
16 p2751 A69-32028

Warm plasma probe, describing transit electrons interaction with electric field and generation of electroacoustic waves radiation
16 p2824 A69-32611

Thin metal antenna average current and effective impedance in randomly inhomogeneous medium, discussing cases of strong and weak permittivity fluctuations
17 p2927 A69-33858

Driving point admittance of radiating aperture in infinite periodic phased array, determining Floquet series and coefficients of waveguide modal expansion
17 p2938 A69-33876

Plane screen electrical shielding effectiveness calculation, using incident wave impedances associated with current loop and magnetic dipoles in transmission line equations
19 p3267 A69-35932

Current distribution and input impedance of cylindrical antenna enclosed in uniaxial crystal and oriented along optical axis from thin antenna theory
19 p3285 A69-36878

Active admittance, realized gain and linear polarization degradation vs scan angle for infinite periodic phased arrays of circular apertures
20 p3507 A69-37844

Admittance of infinite cylindrical antennas driven from coaxial line
20 p3507 A69-37846

Multiplexer network synthesis based on arbitrary divisibility of frequency range and obtainability of input impedance at all frequencies
21 p3681 A69-38530

Mutual impedances of radiators in periodic and doubly periodic rod antenna arrays with orthogonal harmonics current distribution, noting diffraction theory applications
21 p3682 A69-39126

High resistivity GaAs impedance with nonlinear I-V characteristics, showing appreciable reactive component
21 p3782 A69-39143

VHF cavity backed cylindrical gap antenna input tuning impedance and equatorial radiation patterns controlled by cavity adjustments
22 p3914 A69-40698

Radiation and impedance characteristics of spherically capped conical and monopole antennas protruding from spherical vehicle related to cone height, angle and vehicle diameter
22 p3908 A69-40699

Waveguide fed rectangular aperture antenna with dielectric plug load, describing admittance resonant perturbation due to excited TE mode
23 p4136 A69-41589

Impedance of inhomogeneous earth from magnetic and electric fields and geomagnetic potential measurements
23 p4157 A69-41867

Decoupling structures, deriving expressions for infinitely long grooves self and mutual impedance
23 p4138 A69-41938

Solid cylindrical antenna current and admittance calculation, considering reflection coefficient and multiple reflection phenomena at antenna ends
23 p4142 A69-42336

S-band pin-diode switch for high CW power satellite and deep space probe communication, using multiple quarter-wave transformers to stepdown diode impedance
23 p4143 A69-42518

Small signal amplitude/frequency response or transfer gain of volume-terminated pneumatic lines with circular and rectangular cross sections
24 p4301 A69-43288

ELECTRICAL INSULATION

Input admittance of cylindrical dipole antenna immersed in cold isotropic lossless plasma medium and insulated by ion sheath or unit permittivity dielectric
04 p0580 A69-15490

Electrical insulation - IEEE Conference, Los Angeles, December 1968
05 p0730 A69-16240

Mini trend hookup copper wire insulation performance evaluation
05 p0730 A69-16242

Solid insulator performance in vacuum, analyzing breakdown factors
05 p0731 A69-16243

Controlled factorial experiments on high voltage vacuum breakdown, using Yates algorithm analysis on computer
05 p0731 A69-16244

Design and tests of cable assemblies for F-111 aircraft
05 p0731 A69-16246

Insulated gate tetrode with high drain breakdown potential and low Miller feedback capacitance, noting V-I characteristics
05 p0733 A69-16556

Steady rotation of insulating body of revolution in unbounded electrically conducting fluid permeated by applied axial magnetic field
07 p1190 A69-18814

Power losses in MHD channel due to longitudinal end effects related to finite dimensions of electrodes and terminal insulators
07 p1193 A69-19030

Aircraft radomes lightning protection, discussing evaluation by experimental methods and simulation
07 p1142 A69-19535

Electroexplosive devices protection by nonconducting composition against premature ignition by RFI in spacecraft environment, noting Apollo Standard Initiators
10 p1751 A69-23018

Supplementary bibliography of papers on metal insulator semiconductor theory and technology
10 p1743 A69-23169

Specifying electrical isolation and error signals suppression due to presence of common mode voltage in passive signal handling and conditioning equipment
10 p1654 A69-23272

TWT heat pipe cooled depressed collector designed as compact heat transfer device and electrical insulator
11 p1847 A69-24746

Plastics for electrical insulation - Conference, New York, January 1967
13 p2285 A69-27982

Dielectric constant, loss and breakdown of electrical insulation materials, discussing atomic and molecular models and effects of polarizations, environment and manufacturing procedures
13 p2230 A69-27983

Dielectric properties measurement of plastics for electrical insulation, stressing techniques for complex dielectric constants in various frequency ranges
13 p2285 A69-27984

Polymeric insulation materials, discussing intrinsic properties dependence on temperature and atmosphere, stressing effect on aging
13 p2285 A69-27985

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials
13 p2285 A69-27986

Fabrication techniques for plastic insulation in electronics, discussing packaging, low pressure molding, casting, etc
13 p2285 A69-27987

Heat resistant polyamides and polyimides for electrical insulation, discussing properties and applications under extreme temperatures and basic reactions
13 p2286 A69-27988

Fiber polymer composite flexible insulating materials properties and applications stressing synthetic organic fibers
13 p2286 A69-27989

Silicone polymers and polymer formations for electrical applications including silicones for molded devices and components, potting resins, dielectric gel, RTV rubbers, etc
13 p2286 A69-27990

Uninsulated in-core thermionic reactor design permitting diode series connections to build output voltage
14 p2398 A69-29186

Ceramic and cermet materials insulating, physical and mechanical properties for use in thermionic converters
14 p2467 A69-29214

Harmonic analysis for computing diffusing matter with periodically varying surface concentration applied to electrical insulants degradation by atmospheric moisture
15 p2592 A69-31057

MHD flow of incompressible viscous fluid between rotating electrical insulator disks
24 p4354 A69-42599

ELECTRICAL LEADS
U ELECTRIC CONDUCTORS

ELECTRICAL MEASUREMENT
NT POLAROGRAPHY

Amplifier with logarithmic transfer function noting use as null detector
01 p0038 A69-10075

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics
02 p0251 A69-12773

Surface potential measurements for flat conductors or semiconductors using scanned electron beam probe
04 p0601 A69-15115

Differential thermistor gauge using Wheatstone bridge for use in free molecule pressure probe measurement of macroscopic velocity in rarefied gases
04 p0601 A69-15117

Cathode emission site analysis by measuring prebreakdown current under ultrahigh vacuum conditions
05 p0800 A69-15740

Simultaneous and independent measurement of thermal conductivity, thermoelectric power and electric resistivity, applying method to cadmium arsenide-zinc arsenide system
05 p0764 A69-16338

Si transistor I sub CE sub 0 characteristics measurement on curve tracer, discussing generation of loop by junction capacitances and emitter base diode
05 p0734 A69-16569

Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 Mev Dynamitron electron accelerator recalibration
06 p0907 A69-17705

Direct method determination of pinch-off voltage in depletion mode FET
07 p1102 A69-18861

GP zones study in aluminum alloys during fatigue process by electrical measurement, discussing resistivity, cyclic deformation, loading and unloading
07 p1166 A69-18962

Temperature effect on phase stability and electrical length of braided coaxial cables, considering dielectric constant and mechanical length
08 p1283 A69-20225

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods
[AIAA PAPER 69-244] 09 p1566 A69-21260

Moderately ionized plasma electrical conductivity calculated by generalized Ohm law and measured along with other plasma properties
[AIAA PAPER 69-277] 09 p1543 A69-21264

High time resolution electrical conductivity measurement of ionized plasma gas flow, using changes in Q of circuit
09 p1546 A69-21585

DC electrical resistance of magnetosphere between two satellites with sheaths and current voltage relation of satellite sheath
09 p1489 A69-21710

Electrical testing of six converter solar energy thermionic generator, discussing overheating and dual current mode anomalies
09 p1439 A69-21823

Y-circulators specified, measured and calculated values correlated as function of leakage matrix elements and terminating dipoles reflection
09 p1473 A69-22114

Capacitance methods for measuring adhesives mechanical properties in thin film bonded joints, noting results for tension, compression and shear loading
09 p1500 A69-22309

Current-voltage characteristics of combustion driven shock tube generated argon plasma
10 p1737 A69-23466

Voltage drop measurement across plasma anodized germanium film to determine anodization constant
10 p1742 A69-24004

Solar cell equation series resistance and junction recombination parameters determination, considering I-V characteristics
11 p1826 A69-25395

Mismatch correction in microwave power measurements based on directional coupler techniques
12 p2038 A69-26055

Electrical conductivity measurements combined with indentation hardness measurements for non-destructive evaluation of commercial precipitation hardenable aluminum alloys
12 p2114 A69-26307

Photoconductor open circuit voltage determination, calculating responsivity and sensitivity of actual and ideal cases
12 p2093 A69-26481

Barrier capacitance measurement in mm wavelength parametric and multiplication diodes eliminating socket capacitance influence, describing oscilloscope and indicator methods
12 p2043 A69-26885

Field distribution in HF flame discharges by measuring electrical and geometrical parameters of discharge channel
12 p2140 A69-27128

Electrical properties of p-type indium antimonide, noting effects of deep level compensation on ev values
13 p2318 A69-27895

Dielectric properties measurement of plastics for electrical insulation, stressing techniques for complex dielectric constants in various frequency ranges
13 p2285 A69-27984

Epitaxial layers impurity concentration and resistivity measurements by capacitive and three point probe methods
13 p2323 A69-28641

Point discharge measuring based on pulsed nature of discharge current, outlining field experiment results
15 p2610 A69-30698

Electrical parameters measurement for homogeneous batches of planar silicon transistors subjected to cobalt 60 gamma rays, considering isochronal and isothermal annealing
15 p2625 A69-30827

Diode burn-in dissipation measurement for reliability testing
15 p2579 A69-31043

Prebreakdown currents measurement in H and N for deducing ionization coefficients via Townsend and Lucas equations respectively, noting validity by digital computer technique
16 p2815 A69-32574

Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program
[AIAA PAPER 69-629] 17 p3073 A69-33299

Kinetic inductance measurements in linear circular and rectangular cylindrical superconductors, giving inductance temperature dependence for wires and both thick and thin films
17 p3016 A69-33783

Ta type I and II wire resistance in transverse magnetic field during superconducting to normal transition, discussing strain and impurity effects
17 p3016 A69-33791

Bessel functions new addition theorem suggested from mathematical investigation of ideal discriminator output voltage
19 p3266 A69-35767

Saturated liquid oxygen dielectric constant measurements to calculate polarizability
[NAS-NRC PAPER D-3] 22 p3998 A69-40620

Dependence of cochlear microphonics and summing potential on endocochlear potential
23 p4085 A69-41574

ELECTRICAL PROPERTIES

Lossy and lossless fluidic transmission line theory to estimate downstream conditions having known upstream system
 01 p0012 A69-10153

Integrated operational amplifiers for control systems, noting high stability and linearity through negative feedback
 01 p0039 A69-10169

Dielectric surface coatings effect on transmission and loss properties of silicon-microstrip microwave transmission lines
 01 p0041 A69-10201

Soviet book on semiconductor compounds, production and properties covering crystal structures, phase diagrams, etc
 01 p0137 A69-10353

Electrical properties of gold-gallium arsenide n-type junctions investigated for influence of crystallographic orientation of surface and charge carrier density
 01 p0138 A69-10432

Gunn effect application in fast logic circuit devices including comparators, adder and shift register circuits
 01 p0042 A69-10438

Electrical equation of state of metals determination from density, conductivity, energy and metal vapor velocity measurements in wire explosions
 01 p0117 A69-10659

Microscopic theory of superconductivity, considering quantitative physical properties of low temperature electric current flow
 02 p0293 A69-11432

Lunar electrical parameters range determination using models
 [AAS PAPER 68-199]
 02 p0312 A69-11477

Test procedure for obtaining large signal S characterization of nonlinear power transistors
 02 p0214 A69-11600

Electrical properties of p-n junctions of diffused Cd or Zn in indium phosphide
 02 p0294 A69-11628

Shockley theory of field effect transistors, calculating characteristics in miniaturization problems by removing geometric constraints with aid of electric analog
 02 p0215 A69-11781

Hot pressed boron nitride properties and fabrication, noting low moisture absorptivity and aerospace applications
 02 p0270 A69-11802

Electrical properties of vacuum deposited Bi, noting association of negative temperature coefficient of resistance in Bi thin films with grain-boundary effects
 02 p0296 A69-11878

Plastic material requirements for semiconductor device encapsulation noting electrical compatibility, mechanical and environmental protection and costs
 02 p0270 A69-12161

DC argon arc electrical and thermal parameters and optical properties at high pressure, using spherical anode
 02 p0291 A69-12482

Conduction mechanism in unstable range of Au doped double injection Ge diode at 77 K
 02 p0222 A69-12686

Carrier generation-recombination in space charge region of asymmetrical p-n junction, noting experimental results for InSb diodes
 03 p0487 A69-13641

MOST devices characteristics at cryogenic temperatures, studying variation in gain over audio frequency range
 03 p0405 A69-13642

Electrical properties of edge and screw type dislocations in germanium, using bilateral microscopy
 03 p0488 A69-13761

Surface and interface phenomena in engineering technology, determining mechanical or electronic properties
 03 p0434 A69-13868

Electrical, optical, magnetic and structural properties of titanium oxide, stressing transition difference with vanadium oxide
 03 p0490 A69-13923

Vapor grown GaP electrical and optical properties, considering undoped and Se or S doped samples on GaAs and GaP substrates
 04 p0640 A69-14438

Electrical properties of crystals relation to variations of electron or hole distributions, discussing inhomogeneities
 04 p0641 A69-14506

P-type GaSb crystals with various impurity concentrations noting conductivity, transverse magnetoresistance, Hall effect and acceptor band width and conductivity
 04 p0643 A69-15259

Semiinsulating GaAs mobile electric domains, determining electric field strength from electrooptical effect measurements
 04 p0643 A69-15261

Fe doped Ga-as p-i-n structure electrical conductivity, Hall effect, thermally induced currents, space charge bounded currents and current instability
 04 p0643 A69-15263

Temperature dependence of electrical properties of In and Cu doped CdSb single crystals prepared by zone refining
 04 p0643 A69-15264

Electrical properties of xenon pulse plasmas with high power dissipation, measuring discharge pressure and radiation distribution as function of voltage drop
 05 p0801 A69-15746

Five layer thin film band elimination filters amplitude and phase frequency characteristics
 05 p0729 A69-16088

Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes
 05 p0808 A69-16287

Pyrolusite samples high dielectric and ferroelectric properties value ascribed to parasitic effects occurring in commonly used contacts
 05 p0809 A69-16374

Si transistor I sub CE sub 0 characteristics measurement on curve tracer, discussing generation of loop by junction capacitances and emitter base diode
 05 p0734 A69-16569

Physical and physicochemical properties of anodic silica obtained by silicon oxidation in organic bath, discussing possible applications
 05 p0810 A69-16589

BiTeBr semiconductor band structure determined from electrical and optical properties
 05 p0810 A69-16609

Disordered regions in electron irradiated silicon noting defect clusters concentration effect on electrical properties
 06 p0974 A69-16866

Nearly abrupt X band Si avalanche IMPATT diodes irradiated by fast neutrons, noting effects on DC and microwave characteristics
 06 p0976 A69-16874

Intervalley scattering model for Gunn domain dynamics, noting effects comparable to diffusion
 06 p0893 A69-16937

Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness
 06 p0981 A69-17892

Periodic electrostatic focusing structures in microwave tubes, evaluating properties by action function method
 07 p1102 A69-18659

Longitudinal edge effect in primary circuit of open loop linear MHD induction machines, determining forward, reverse and zero sequence currents and voltages
 07 p1058 A69-19027

Radomes design and manufacture for high speed flight vehicles, discussing interactions between aerodynamic and electrical requirements with reference to mechanism of aberration
 07 p1141 A69-19510

Alumina radomes fabrication and control techniques to assure reproducibility of electrical and mechanical properties, detailing finished product inspection methods
 07 p1142 A69-19529

Spherical sandwich radomes designs, discussing aerodynamic loads, wind pressure effect, electrical properties and mountings
 07 p1112 A69-19538

Adaptor circuits for MOSFET electrical properties measurement
 07 p1113 A69-19780

Electrical characteristics of linear Faraday generator using binary mixture of noble gases with nonequilibrium ionization
 08 p1359 A69-19880

Linville model for describing elementary phenomena of electronic equipment in terms of physical data applied to irradiated semiconductor diode and transistor
 08 p1280 A69-19974

Controlled charge models for computer calculation of electronic circuits, discussing tunnel diode static characteristics and equivalent transistor circuits
 08 p1280 A69-19975

Passive circuit components electrical properties at HF using equivalent circuit
 08 p1283 A69-20131

High Q capacitance loaded coaxial cavity resonator for study of electric susceptibility of ionized gas
 08 p1313 A69-20214

Quasars optical and electrical properties, distance, nature and role in cosmology
 08 p1390 A69-20377

Second breakdown in semiconductors, studying thermal feedback connected with temperature time dependence of junction electrical properties
 08 p1294 A69-21115

Glass science and technology noting optical, electrical and mechanical properties, forming techniques, structure, ionic properties, high pressure effects and glass ceramics
 08 p1341 A69-21126

Transforming equivalent circuits, keeping electrical characteristics defined by network functions within prescribed limits
 09 p1472 A69-21784

Oxide coated thermionic cathodes, noting semiconducting properties of alkaline earth oxides, particularly barium oxide and adsorption and optical properties
 09 p1470 A69-22700

Pseudoexact bandpass filter response curves and electrical characteristics based on ripple Chebyshev responses
 09 p1470 A69-22794

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain
 10 p1727 A69-23101

Transient response of MOS capacitance caused by mechanisms dependent on electric field distribution between silicon and oxide
 10 p1744 A69-23176

Schottky barriers on n-type GaAs, measuring forward current characteristics for various electron concentrations and temperatures
 10 p1745 A69-23358

Effective Ohm law for inhomogeneous weakly ionized gas and Hartmann flow analysis, noting electron density fluctuation effect on conductivity
 10 p1735 A69-23462

Electronic properties of beryllium doped silicon studied with IR absorption spectroscopy and electrical measurements, describing Be thermal diffusion
 10 p1747 A69-23989

Maintenance free high rate sealed Ni-Cd battery power system compatible with existing aircraft electrical systems
 10 p1640 A69-23994

Forward and reverse current-voltage characteristics and reverse biased capacitance for nZnSe-pGe emitter base diodes of heterojunction transistors
 11 p1851 A69-25114

Electrical properties of tetracyanoquinodimethane (TCNQ) complexes representing unit segments of non-conjugated and conjugated polymers
 11 p1832 A69-25675

P-n-p planar epitaxial germanium microwave transistor used as amplifier in 1-4 GHz range and as high speed switch, summarizing design, fabrication and characterization
 12 p2037 A69-25940

Nanosecond time variations in current-voltage characteristics of gas discharge in air, taking into account discharge circuit resistance and discharge space capacitance
 12 p2137 A69-26534

UHF transistor small signal internal behavior, using computer simulation for deriving current gain alpha locus, current gain and f sub T
 13 p2227 A69-27241

Two dimensional flow of conducting gas dynamic and electrical parameters in MGD generator channel, considering magnetic field and plasma conductivity
 13 p2305 A69-27386

Inductive converters accuracy calculation by statistical method based on probability theory
 13 p2259 A69-27424

- Electrical, thermal and thermoelectronic properties of refractory oxide materials including lanthanum chromite and strontium zirconate, discussing Hall effect, IR absorption, mixtures, etc
13 p2316 A69-27470
- Nonconducting vanes end effects on electrical characteristics of MHD channels, analyzing current density, Joule losses and finite length vanes
13 p2306 A69-27497
- Organic semiconductors physical properties and intermolecular charge transfer between donor and acceptor
13 p2317 A69-27799
- Dielectric thin film electrical and mechanical properties and preparation for semiconductor devices, emphasizing Si compounds
13 p2286 A69-28004
- Electrical properties of electron beam evaporated Ti, Zr and Hf films as function of substrate temperature, material and film thickness
13 p2321 A69-28010
- Prebreakdown and breakdown electrical properties of thin film capacitors with certain oxides, fluorides and Teflon dielectrics
13 p2322 A69-28012
- Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function
13 p2314 A69-28445
- Ga phosphide p-n junctions formation from GaP- Ga solution, discussing electrical and luminescence properties
13 p2323 A69-28642
- Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance
14 p2402 A69-29236
- Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment
15 p2667 A69-30078
- Hall generator electrical characteristics, discussing plasma homogeneity, stability and shock tube priming
15 p2658 A69-30298
- Flexible aluminum elliptical waveguide design, discussing installation, economy and electrical characteristics
15 p2578 A69-30798
- Multicomponent semiconductor compounds of non-stoichiometric composition, studying structure, behavior and correlation between electrical properties and phase diagrams
15 p2670 A69-31243
- Ni-Cd and Ag-Cd storage batteries for space applications, discussing performance, life and reliability
16 p2740 A69-32422
- Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts
[AIAA PAPER 69-573] 16 p2840 A69-32677
- Test structure model for studying semiconductor-insulator interface related failure mechanisms in large scale integrated circuitry
17 p2936 A69-32894
- Atmospheric ion concentration increment by electrostatic lens to facilitate electrical properties measurements of charged particles in submicroscopic range
17 p2971 A69-32928
- Electrical characteristics of equilibrium plasma sheaths at stagnation point of blunt body in high speed air, considering current collection regimes
[AIAA PAPER 69-702] 17 p3011 A69-33473
- Materials fracture electrically induced including arc and spark discharges, dielectric breakdown, electrolysis, etc
17 p2989 A69-33558
- Monograph on GaAs injection laser electrical and optical properties during crystallization out of solution covering principle, p-n junction fabrication, I-V characteristics, doping effect, etc
17 p2982 A69-33571
- Thermoplastic polyarylsulfone thermal and electrical properties at over 500 F, noting resistance to thermal oxidative attack
19 p3355 A69-35527
- Manufacturing ultrahigh purity aluminum strip for cryogenic magnets, discussing ingot preparation, rolling, chemical milling and cleaning, arc welding, annealing and sampling
19 p3318 A69-35541
- Resistivity, layer thickness, postbarrier heat treatment and impurity effects on cadmium sulfide-copper sulfide solar cell
19 p3250 A69-35685
- Ion beam sputtering, evaporation and electrical degradation of Al contacted Si solar cells observed in high temperature cyclic tests
19 p3250 A69-35686
- Electrochemically passivated Ti/Pd/Ag contacts for Si solar cells tested in humidity stress and temperature cycling
19 p3250 A69-35687
- Bonded solderless solar cell panel prototype withstanding high annealing temperature and thermal shock without electrical or mechanical degradation
19 p3251 A69-35688
- InSb single crystals impurities incorporation and distribution, concluding electrical properties vary with homogeneity or heterogeneity of dopant microdistribution
19 p3389 A69-36547
- InSb-InAs, InSb-GaSb, InP-GaAs and InP-GaP quaternary systems solid solutions optical and electrical properties, determining energy gap change as function of composition
19 p3390 A69-36554
- Electronic properties changes in amorphous CdGeAs caused by long range order loss studied by measuring optical and transport properties
19 p3390 A69-36557
- Optical and electrical properties of thin amorphous films of glass-forming oxide, using X ray diffraction and electron microscopy for structural features
19 p3391 A69-36561
- Thin PbTe semiconductor films electrical properties measured in air and vacuum, showing dependence on thickness and conditions of preparation
21 p3782 A69-39242
- Electrical properties of passive line elements of hybrid integrated circuits on insulating substrates for radio systems
21 p3684 A69-39563
- Two dimensional analysis of junction transistor electrical behavior, analyzing DC and AC crowding effects, conduction and impedance of base and collector
22 p3911 A69-40011
- Photovoltaic cells electrical characteristics, discussing Cd sulfide, single crystal Si and dendritic type Si cells for spacecraft power
22 p3868 A69-40130
- Electrical properties of semiconductors in HF electromagnetic field, showing Debye type EMF dependence on carrier response to field inhomogeneity
22 p3993 A69-40605
- Piezoelectric transducer transient electrical response due to shock loaded stress using transform calculus
22 p3947 A69-40863
- Electric properties and domain structure changes of polycrystalline Ba titanate and other ferroelectrics characterized by high dielectric nonlinearity
22 p3996 A69-41166
- Sealed Ni-Cd battery with bipolar construction to reduce internal resistance and increase power bursts capacity, emphasizing electrical characteristics and economic considerations
23 p4072 A69-42283
- Boron tribromide-oxygen reaction kinetics effects on IC base diffusion uniformity, correlating uniformity with electrical properties
24 p4360 A69-42760
- Electrical and optical properties correlation of air in fog, discussing droplets distribution with regard to dimensions
24 p4347 A69-43506
- ELECTRICAL RESISTANCE**
NT CONTACT RESISTANCE
NT LC CIRCUITS
- Fatigue-damage evaluation system for transport aircraft, noting use of cumulative strain gauge that stores strain history
01 p0165 A69-10118
- Hall effect in ferrites, determining classical and spontaneous Hall coefficients, electrical resistance, temperature effects and current carrier properties
01 p0135 A69-10185
- Aluminum alloy with lithium and magnesium noting mechanical properties and electrical and corrosion resistance
03 p0443 A69-13026
- Electrical resistance temperature dependence below room temperature for polycrystalline epitaxially grown Au and Ag films, noting effects of alpha irradiation
03 p0486 A69-13582
- Low temperature conductance peaks observed in tunneling measurements on aluminum-phosphosilicate glass-degenerate silicon sandwich structures
03 p0493 A69-14183
- Voltage variable resistor MOST, noting channel resistance controllability
04 p0574 A69-14351
- Resistance change arising from transverse straining of single conductor derived in terms of measurable filament and adhesive parameters
04 p0603 A69-15433
- Finite conductivity or ohmic resistance effect on stationary axisymmetric self constricting MHD flow
06 p0966 A69-17548
- Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 Mev Dynamitron electron accelerator recalibration
06 p0907 A69-17705
- Harmonic oscillations in tunnel diode circuits for three intersection points of loadline with characteristic curve, discussing larger total positive circuit resistance case
06 p0898 A69-17801
- Electrical resistance and Hall coefficient measurement in InAs-GaAs solid solutions system, giving temperature dependence of electron mobility
07 p1199 A69-18689
- Thermal instability in power transistor structures, considering effects of design, emitter and base resistance at high currents
08 p1373 A69-20858
- DC electrical resistance of magnetosphere between two satellites with sheaths and current voltage relation of satellite sheath
09 p1489 A69-21710
- Forward volt-ampere characteristics and differential resistance peak of Schottky barrier diode on doped Si
09 p1557 A69-21744
- Very low temperature dependence of thin single crystal Al plates electrical resistance, noting Umklapp processes contribution
10 p1711 A69-23620
- Input admittance response characteristics and input susceptance and input conductance of resonant reactive modulator with varactors and nonlinear losses
10 p1665 A69-24066
- Tunnel diode test circuit, measuring differential resistances and bias voltages on loss resistance and of socket capacitance
10 p1665 A69-24215
- Solar cell equation series resistance and junction recombination parameters determination, considering I-V characteristics
11 p1826 A69-25395
- Emitter current density dependence on distance from center of drift transistor circular emitter, obtaining distributed base resistance in presence of arbitrary base current
11 p1853 A69-25565
- Current driven AGC effectiveness in selective amplifiers, including conductance variation effect on pass-band instability and frequency response
12 p2043 A69-26887
- Low resistance Bi thin film complex electrical impedance in IR range, stating methods and equivalent circuits for determining impedance
13 p2322 A69-28011
- Two dimensional inhomogeneous conductors resistance determined by interchanging equipotential and flow lines
14 p2422 A69-29554
- Electrical resistance and temperature coefficient dependence on phase composition of Ti, Zr and Nb carbides
15 p2641 A69-31047
- Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range
16 p2827 A69-32482
- Optimum ballast resistance of thin film heat transfer gage producing shock arrival time, thickness and structure data of low pressure shock tube
18 p3117 A69-34470
- Plasma thermionic diode figure of merit based on Hatsopoulos model altered to include thermal conduction and electrical resistance
22 p3869 A69-40134
- Seizing characteristics of metals using electrical resistance as measure of lattice imperfection density due to friction
22 p3957 A69-41111
- Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
22 p3917 A69-41228
- ELECTRICAL RESISTIVITY**
NT IONOSPHERIC CONDUCTIVITY
NT MAGNETORESISTIVITY
NT PHOTOCONDUCTIVITY
NT PLASMA CONDUCTIVITY
NT SUPERCONDUCTIVITY

Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity

01 p0137 A69-10260

Space charge limited operation of insulated gate field effect transistors, discussing maximum transconductance and minimum parasitic capacitances

01 p0042 A69-10322

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting exploding wires role

01 p0119 A69-10673

Fast reversible switching between highly resistive and conductive states in various disordered semiconductors, using electric field

01 p0140 A69-11248

Recombination effects in high resistivity Cu doped gallium arsenide single crystals determined by photoconductivity methods

02 p0294 A69-11627

Electron transfer through metal/semiconductor contact surfaces, measuring electrical conductivity on sintered cylinders with or without silver addition

02 p0296 A69-11790

Granite compressional wave velocity and electrical resistivity variations with depth, explaining discrepancy between in situ and laboratory measurements on dry samples

02 p0241 A69-11806

Electrical conductivity of sintered polycrystalline cubic and monoclinic europium sesquioxide from DC current-voltage characteristics obtained in air at various pressures

02 p0296 A69-11874

Solid solutions microstructure and electrical conductivity in InAs-CdS and InAs-CdS and InAs-CdSe systems

02 p0297 A69-11882

Chromium bronze blanks compacted from granules for hardness and electrical conductivity, noting improved high strength characteristics over conventional production methods

02 p0266 A69-12127

Surface layer effects on conductivity of vacuum deposited gold films, studying resistance variations with film thickness

02 p0300 A69-12625

Ti alloys anomalous variations in physical properties measuring electrical, thermal conductivity and thermal EMF

03 p0443 A69-13029

Electromagnetic induction theory for spherical earth model involving conducting core with radial conductivity variation and concentric nonconducting mantle

03 p0423 A69-13523

Electrical resistivity of sintered high melting point metal oxides, noting width of semiconductor forbidden band

03 p0445 A69-13570

Electrical resistivity, composition, and physical properties of titanium carbide, titanium oxide and titanium-oxygen-carbon alloys

03 p0446 A69-13575

Transport phenomena in semiconductors in strong DC field, emphasizing electrical conductivity as function of crystallographic orientation

03 p0491 A69-14097

Li and Cs electrical conductivity measured from 300-1200 K, obtaining interpolation formulas by least squares method

03 p0481 A69-14148

Conductivity in p-n junctions during avalanche breakdown at HF calculated, noting agreement with experiments

03 p0492 A69-14164

Resistivity and Hall mobility periodic change effect on probe measurements in semiconductors

04 p0642 A69-14534

Electrical conductivity of high resistance epitaxial semiconducting films measured by three probe method

04 p0597 A69-14538

Semiconductor resistivity, discussing resonator field structure and specimen position effects on measurement errors by contactless method

04 p0642 A69-14853

Direct reading instrument using four point probe and two analog computing circuits for Si and Ge resistivity measurements

04 p0599 A69-15019

Active RC low pass filters sensitivity to component changes, discussing effect of below minimum limit value

04 p0578 A69-15070

Weighting functions effect in calculating average scalar electrical conductivity in Lorentzian gas

04 p0638 A69-15317

Hall effect current influence on conductance of high current arcs

05 p0803 A69-15999

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion

05 p0808 A69-16216

Incremental conductance of heavily doped n-type Si semiconductor barrier tunneling as function of bias voltage, indicating Fermi level dependence on dopants

05 p0808 A69-16285

Simultaneous and independent measurement of thermal conductivity, thermoelectric power and electric resistivity, applying method to cadmium arsenide-zinc arsenide system

05 p0764 A69-16338

Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures

05 p0809 A69-16375

Approximate functions for tunnel diode dynamic conductance in three voltage ranges and Fourier conductance terms for tunnel diode frequency converters

05 p0735 A69-16647

Neutron irradiation produced defects in p-type Si at 76 K, measuring Hall effect and electrical conductivity

06 p0975 A69-16868

Barium, oxygen and BaO adsorption influence on Mo and Ti thin films conductivity and work functions

06 p0978 A69-16900

Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se

06 p0978 A69-16988

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown

06 p0978 A69-16990

Charge carrier lifetime measured in intrinsic conductivity range of Cd doped InAs to define recombination mechanism, relating temperature dependence to surface impurities recombination

06 p0979 A69-16997

Two section model of saturation drain conductance of MOS transistors

06 p0893 A69-17155

Chemiluminescence and chemionization in flames, considering electrically conducting properties and spectral analysis

06 p1032 A69-17423

Mathematical theory of electromagnetic induction for physical model of earth with conductivity distribution given by sine function

06 p0921 A69-17739

Combustion mixture composition dependence on electrical conductivity of products with potassium additive, discussing hydrocarbon fuels

06 p0870 A69-17908

Electrostatic field strength and conductivity dependence of expansion and contraction of space charge cloud in process of discharging during static electrification

06 p0959 A69-18219

Superconducting flux-flow resistivity minimum in Pb-Ti alloy, discussing thermal dissipation associated with temperature gradients across moving fluxoid

07 p1198 A69-18642

Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma

07 p1215 A69-18832

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity

07 p1199 A69-19009

Lunar depth profiles of conductivity, dielectric constant and magnetic permeability from radar, radiothermic and magnetic measurements, discussing lunar models

07 p1216 A69-19221

Soil resistivity survey at earth telecommunication installation site to determine optimal grounding or electrode system

07 p1117 A69-19348

Chemisorbed oxygen effect on electrical conductivity of zinc doped polycrystalline tin oxides

07 p1201 A69-19478

Electrical conductivity in interior of earth stressing electromagnetic induction method, discussing mantle conductivity distribution value

08 p1306 A69-19825

Electrical resistivity of commercial nickel base alloys containing iron, chromium and molybdenum, noting anomaly in 20 percent chromium alloy

08 p1329 A69-20003

Alkali metals electrical resistivity variation with temperature calculated in free electron approximation with the Kubel model for phonon spectrum

08 p1372 A69-20224

Flow rates characteristic of trapezoidal geometries encountered after schematization of noneylindrical ducts involving irrotational flow, leakage, heat exchanges and electrical conduction phenomena

08 p1303 A69-20270

Hydrogen-oxygen fuel cells with conducting and nonconducting hydrophobic electrode matrices

08 p1261 A69-21055

CdS single crystals excess conductivity observed at room temperature

08 p1374 A69-21083

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes

09 p1555 A69-21475

Thermal conductivity, electrical resistivity and degree of blackness of refractory metals at high temperatures measured by Bode and Eger-Disselhorst methods

09 p1522 A69-21589

Turbulent heat transfer in conducting fluid flow through circular tube in longitudinal magnetic field and constant wall heat flux, using Lyon relation

09 p1621 A69-21590

Electrical conductivity and Hall effect in thin evaporated bismuth films under vacuum using three point method in variable temperature cryostat

09 p1557 A69-21692

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration

09 p1523 A69-21740

Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient

09 p1579 A69-22175

Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity

09 p1559 A69-22653

Weak discontinuities in wave propagation, studying ionized gas nonsteady flow having electrical conductivity in magnetic field

10 p1727 A69-22916

Electrical resistivity of epitaxial CdTe films produced by vacuum sublimation on hot orienting mica and single crystal substrates

10 p1742 A69-23001

Three layer vacuum deposited silicon monoxide films current voltage and conduction current density temperature dependence

10 p1745 A69-23324

Pd-D resistivity variation with D concentration at room and liquid He temperatures, discussing structural resistivity

10 p1745 A69-23357

Moving conducting media velocity measurement using Reynolds number and electrical conductivity values, based on magnetic field distortion

10 p1731 A69-23435

Ar-K plasma studied as possible MHD generator working fluid by investigating influence of emission and external magnetic field on nonequilibrium electrical conductivity

10 p1732 A69-23441

Electrical conductivity, electron density and population temperature as functions of current density in Cs-He thermal plasma studied with nonequilibrium ionization model

10 p1732 A69-23443

Small signal HF conductivity of GaAs calculated for arbitrary frequency and DC field, considering subcritical Gunn devices

10 p1747 A69-23694

Viscosity and electrical conductivity effects on axisymmetric instabilities of current carrying annular cylinder of mercury

11 p1923 A69-24292

Electrical conductivity of partially ionized noble gases Ar, He, Xe and Kr, considering electron temperature and electron-electron interactions

11 p1923 A69-24295

Electrical resistivity and magnetization saturation in cobalt alloys during formation of modulated structures

11 p1904 A69-24707

Electrical conductivity of impurity semiconductors containing variable current carrier concentrations, discussing current-voltage characteristics
11 p1937 A69-24909

Electrical conductivity of space charge surface layer in semiconductors with many-valley energy spectra of current carriers, discussing scalar relaxation time
11 p1937 A69-24915

Electrical conductivity of air behind incident and reflected shock wave fronts as function of temperature and Mach numbers measured by electrode method
11 p1888 A69-25220

Electrical conductivity radial distribution in plasma flux from changes in Q factor and circuit inductance in presence and absence of skin effect
11 p1928 A69-25221

Sb addition effect on electrical conductivity and Hall effect in PbTe single crystals over temperature range
11 p1939 A69-25706

Electrical conductivity measurements combined with indentation hardness measurements for non-destructive evaluation of commercial precipitation hardenable aluminum alloys
12 p2114 A69-26307

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection
12 p2143 A69-26459

Gases effect on electrical conductivity of vacuum deposited thin films of Cr, Be, Ni, Au and Ge at different thickness and low pressure
12 p2143 A69-26460

Microminiature five point measuring head with linear point design for resistivity measurement of semiconductor films, noting four point head capabilities
12 p2099 A69-27104

CdS acoustoelectric oscillator steady state oscillation frequency dependence on voltage and conductivity compared with linear acoustoelectric amplification theory
13 p2227 A69-27244

Effective electrical conductivity of two phase vapor-potassium flow in flat duct at flow temperature 800 C, showing dependence on volumetric vapor content
13 p2306 A69-27480

Electrical end losses in liquid-metal MHD generators with variable conductivity, noting working fluids and aspect ratios
13 p2206 A69-27493

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam
13 p2318 A69-27886

Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream [AIAA PAPER 69-327]
13 p2313 A69-28264

Epitaxial layers impurity concentration and resistivity measurements by capacitive and three point probe methods
13 p2323 A69-28641

Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth
14 p2438 A69-29081

Electrical resistivity decrease in niobium-hydrogen alloys during isothermal aging at low temperature attributed to hydride precipitation, noting reaction rate and activation energy
14 p2463 A69-29288

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field
14 p2501 A69-29917

CoO complex defects indicated by negative enthalpy of formation, considering isobaric electrical conductivity measurements at various temperatures and oxygen pressures
14 p2508 A69-29925

Electrical conductivity ratio of weakly ionized turbulent gas to quiescent gas as function of electron temperature
14 p2502 A69-29991

Electrical conductivity and optical spectra changes of strontium titanate single crystals under constant electric field action
15 p2666 A69-30043

Indium arsenide electrical parameters analyzed by kinetic effects, considering conductivity, thermal and magnetothermal EMF and transverse Nerst-Ettingshausen effect
15 p2666 A69-30066

Cold worked high purity Mo wire recovery after plastic deformation at room temperature, considering electrical resistivity decrease as function of annealing temperature
15 p2636 A69-30082

P-type zinc-tin-antimonide crystals electric conductivity, Hall coefficient and thermal EMF found similar to p-type diamond-like semiconductors properties
15 p2667 A69-30197

Semiconductor resistivity, discussing resonator field structure and specimen position effects on measurement errors by contactless method
15 p2667 A69-30245

Nb and Ti carbides investigated for lattice parameters, microhardness and resistivity in homogeneity domain
15 p2638 A69-30282

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes
15 p2669 A69-30720

Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model
15 p2662 A69-30970

Induced high pressure HF discharge parameters computed for Ar, O and N by using electrical and thermal conductivity functions
15 p2662 A69-30976

Air plasma electrical and thermal conductivity coefficients measured in wall stabilized DC arc at atmospheric pressure and high temperatures
15 p2663 A69-30979

Nonuniform electrical resistivity distribution in InSb single crystals as function of growth direction
15 p2670 A69-31049

Electrical resistivity of aluminum oxide films deposited on tubular substrates by plasma and gas flame spraying, noting dependence on film thickness and substrate
15 p2630 A69-31179

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing
15 p2670 A69-31248

Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
15 p2700 A69-31442

Multiple repair welding effects on AL welds tensile strength, using conductivity measurements to monitor strength
15 p2631 A69-31509

Electrical conductivity, hardness, ultimate tensile strength and yield strength correlations of age hardenable Al alloys by eddy current methods
15 p2641 A69-31513

Electrical conductivity of cesium iodide single crystals with anion and cation impurities noting temperature dependence
16 p2824 A69-31573

Electrical and thermal conductivities of high pressure arc plasmas from I-V characteristics and radial temperature profile
16 p2817 A69-31644

Electrical switching in thin film arsenic selenium telluride semiconducting glass diodes, observing formation of liquid phase and conducting filaments
16 p2760 A69-32017

Wave front resistivity in laser produced plasma interacting with magnetic field enhanced by two stream instability
16 p2823 A69-32564

Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar
17 p3068 A69-32990

Ion density, electrical conductivity and weighted mean mobility deduced from Gordien capacitor I-V characteristics used in balloon sounding of stratosphere
18 p3130 A69-34970

Solid solutions microstructure and electrical conductivity in InAs-CdS, InAs-CdS and InAs-CdSe systems
18 p3182 A69-35042

Finite electrical conductivity effect on sun angular momentum loss due to solar wind
18 p3189 A69-35398

Adhesive bonding of Al sheets for honeycomb sandwich material, using electrical conductivity to measure sheets age hardening progress during high temperature curing
19 p3321 A69-35565

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values
19 p3383 A69-36447

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly
19 p3388 A69-36543

Transport properties of liquid semiconductors, using model for liquid mercury with minimum state density
19 p3391 A69-36560

Nb-Ti-C alloys electrical resistivity and thermal EMF noting nearly linear variations with temperature
20 p3558 A69-36976

Nonferrous metals and alloys conductivity standards development program resulting in fabrication, calibration and certification of 16 primary reference standards
20 p3537 A69-37008

Melting points, electrical conductivity, Hall constants, magnetic susceptibility, density, bending strength, microhardness and elastic modulus of zirconium nitride in homogeneity range
20 p3558 A69-37014

Terrestrial electrical conductivity measurement from electromagnetic field variations determination by geomagnetic sounding
20 p3522 A69-37058

Structure of isolated MHD shock wave in viscous heat-conducting radiating gas finite electrical conductivity and transverse magnetic field
20 p3581 A69-37189

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion
20 p3584 A69-37786

Hall coefficient and conductivity measured as function of temperature for liquid Au, Cu and Ag tellurides and liquid alloy systems Bi-Te and Ti-Te
20 p3584 A69-38024

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration
20 p3585 A69-38216

Conducting and insulating construction materials at high temperatures for MHD conversion nozzles, noting lifetimes
21 p3751 A69-38456

Semiconductor properties of indium telluride alloys, conductivity and Hall effect
21 p3779 A69-38580

Negative ion influence on electrical conductivity of partially ionized multicomponent gas mixtures, basing analysis on thermodynamic calculations of composition
21 p3774 A69-38867

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field
21 p3649 A69-39027

Electrical conductivity in wake neck measured using RF bridge on boom extending from reentry vehicle
21 p3724 A69-39030

S doped GaSb single crystals prepared by Crochral-ski method studied for temperature dependence of resistivity and Hall coefficient
21 p3781 A69-39048

Electrical conductivity of rare earth metals La, Ce, Pr and Nd in solid and liquid states by rotating magnetic field method
21 p3781 A69-39070

Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients
21 p3753 A69-39562

Thermoelectric power generator with variable thermal conductivity and electrical resistivity, obtaining steady state temperature distribution, power output and thermal efficiency
22 p3868 A69-40131

Metals conductivity under high pressure, giving theories for electrons scattering cross sections on ions and for Debye temperature
22 p3980 A69-40187

Electrical conductivity of uppermost lunar surface layers, indicating dry powdered rocks with frequency independent dielectric loss tangent
22 p4023 A69-40570

Engineering alloys electrical resistivities measurement at various temperatures, noting temperature and heat treatment effects [NAS-NRC PAPER D-5]
22 p3970 A69-40633

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mev and reactor fast neutrons
22 p3993 A69-40728

Microwave reflection technique for transient and quiescent electrical conductivity of Si, noting nonohmic contacts
22 p3997 A69-41226

Praseodymium germanides resistivity and thermal EMF temperature dependence determined, discussing Hall effect, thermal expansion coefficient, melting point microhardness, etc
23 p4199 A69-42467

Structural features and electrical resistivity of siliconated pyrolytic graphite, analyzing dependence on preparation conditions using X ray diffraction measurements
24 p4335 A69-42926

Stored energy of cold work and electrical resistivity of Ag-Mg solid solution alloys measured as functions of strain, Mg concentration and initial state of order
24 p4332 A69-43029

Air electrical conductivity reduction in fog ascribed to small ions concentration, increase in droplets capture efficiency and particle concentration
24 p4347 A69-43509

ELECTRICALLY SUSPENDED GYROSCOPES

U ELECTROSTATIC GYROSCOPES

ELECTRICITY

NT ALTERNATING CURRENT
NT ATMOSPHERIC ELECTRICITY
NT AURORAL ELECTROJETS
NT EQUATORIAL ELECTROJET
NT GEOELECTRICITY
NT IONOSPHERIC CURRENTS
NT STATIC ELECTRICITY
NT TELLURIC CURRENTS

Electricity from MHD - Conference, Warsaw, July 1968, Volume 6
21 p3777 A69-39477

ELECTRIFICATION

Electrostatic field strength and conductivity dependence of expansion and contraction of space charge cloud in process of discharging during static electrification
06 p0959 A69-18219

ELECTRO-OPTICAL EFFECT

Laser beam spectra for modulation by electrooptic Doppler shift, considering sawtooth and triangular functions for applied electric field
01 p0091 A69-10843

Transverse electro-optical effect in piezoelectric crystals, using light modulation
04 p0639 A69-14427

Gallium arsenide electro-optic switch measuring signal time response to radiation step of homogeneously broadened carbon dioxide, He and nitrogen laser amplifier
05 p0773 A69-16293

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs
06 p0934 A69-17466

Signal conversion by multiple modulation in optical communication system, discussing electrooptic modulators and modulation spectrum
07 p1075 A69-18472

Electro-optical and magneto-optical effects in solids, noting high sensitivity and resolution in application to spectroscopic investigation of absolute spectra
08 p1371 A69-20217

Laser radiation modulation at EHF by linear electro-optical effect of KDP and ADP crystals
19 p3334 A69-35884

Electro-optical effect in Cr-doped GaAs single crystals at room temperature, discussing carbon dioxide laser radiation modulation by GaAs
20 p3555 A69-37949

Electro-optical tuning effect on frequency of parametric laser with KDP crystal, noting Curie point
20 p3555 A69-38003

Metal insulator semiconductor volt-capacitance changes due to light flux, introducing surface recombination rate to improve model
20 p3585 A69-38273

ELECTRO-OPTICAL PHOTOGRAPHY

Automatic laser tracker system for close-up photographic coverage of rocket test
[SMPTE PREPRINT 101-91]
07 p1116 A69-18949

Electron-optical image converter camera for wide time intervals, considering nanosecond electronic control and high voltage stabilized power supply
12 p2083 A69-26140

Nanosecond electron-optical image converter multiframing camera designed for reducing frame exposure time
12 p2083 A69-26141

Image intensifier cascade tubes and slit type electronic cameras with high sensitivity multiple integral images, exemplifying projectile velocity measurements
12 p2083 A69-26143

Ultrahigh speed photographic cameras with exposure times between 5 and 500 nsec, using image tube and high voltage pulse generator
12 p2083 A69-26146

Q switched ruby laser stroboscope for high speed photography, using electro-optical crystals for Q switch
12 p2086 A69-26167

Generalized quantum yield for sensitivity of photoelectric devices, considering multistage image converter and photomultiplier
14 p2496 A69-29788

Computer graphics technique for reducing photographic data from optical device to replace time consuming visual methods
18 p3134 A69-34373

Solar image selection device based on statistical analysis of photospheric contrast, noting use for electronic photography and location impaired observatory
23 p4213 A69-41697

ELECTRO-OPTICS

Electro-optic Q switch using lithium niobate as electro-optic material, comparing performance to conventional device using potassium deuterium phosphate
01 p0089 A69-10184

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
02 p0230 A69-11979

Electro-optical device using KDP crystal for laser beam deflection at temperatures near Curie point
03 p0435 A69-12984

Q switched lasers powerful outputs obtainable at sum frequency, discussing frequency mixing in nonlinear dispersive media
03 p0438 A69-13047

Analog FM subcarrier modulation selected for real time TV picture transmission via electro-optic space communication system
04 p0562 A69-15474

Electro-optical tracking devices for displacement and/or dislocation measurement without physical contact
05 p0763 A69-15986

Electro-optic properties of tungsten-bronze niobate ferroelectric crystals
[IEEE PAPER F-7]
05 p0808 A69-16313

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection
[IEEE PAPER R-2]
05 p0775 A69-16326

Time stabilization method for lasing in electro-optically Q switched ruby laser with saturable absorber in cavity
07 p1147 A69-18531

Coherent emission from rare earth ions in electro-optic crystals, noting oscillations and electric field modulation occurrence
09 p1514 A69-21339

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission
09 p1515 A69-21354

Electro-optical shutter for Nd-glass laser with high peak power pulses, discussing switching time, contrast ratio and synchronizaton
09 p1493 A69-21422

Optical pulse compression experiment illustrating performance of electro-optical Doppler shifter as linearly time varying frequency shift production device
09 p1519 A69-22445

Optoelectronic spectrum analyzer with raster illuminator for producing two dimensional Fourier transform to analyze two dimensional functions
10 p1725 A69-22301

Electro-optical tracking device with pyramidal reflector for field of view dissection, determining dead zones and trajectories for pointing error correction
10 p1698 A69-24219

Lasers and opto-electronics - Conference, University of Southampton, England, March 1969
11 p1897 A69-25034

Electro-optic broadband laser light modulator designs and modulation characteristics, computing curve set for evaluation of various materials
11 p1897 A69-25039

Electro-optically Q switched Nd doped calcium tungstate laser for producing two controlled pulses, noting application to other solid state lasers
11 p1899 A69-25052

Kerr constant verification device to study electrooptic liquids properties
12 p2084 A69-26148

Electro-optical scanning device and electro-optical matrix for mechanization of difference measurements in automatic photointerpretation of surveillance maps
12 p2090 A69-26302

Optical alignment for lasers with electro-optical Q switching and mutually misaligned ruby rod, KDP crystal and polarizing prism
12 p2107 A69-26589

Giant pulses from laser with electro-optical quartz shutter, noting advantageous optical and mechanical properties of quartz
12 p2108 A69-26591

Electrooptical ADP modulator design for use with helium-neon laser, considering temperature stability and crystal faces parallelism
13 p2272 A69-28191

Optophotovoltaic pickup design for angular displacement measurements, considering application of moire pattern produced by radial diffraction gratings
14 p2447 A69-29327

Directional properties of electro-optical goniometric system based on known design parameters
14 p2420 A69-29332

Electro-optical Q switched lasers with prismatic reflectors and phase shifter studied using Johns matrices for polarizer, Kerr cell and Porro prism elements
14 p2459 A69-29390

Electro-optical automatic gain control system to reduce atmospheric turbulence produced fluctuations in received optical signal strength
14 p2459 A69-29491

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
15 p2561 A69-30264

Spontaneous self pulsing and cavity dumping in carbon dioxide laser Q switched by internal GaAs electro-optic cell without saturable absorber
16 p2797 A69-32014

Electronically tunable lithium niobate optical filter utilizing collinear acousto-optic diffraction in anisotropic medium
17 p2943 A69-34157

Electrooptical distance measurement based on laser pulse traveling time and phase measurements to determine satellite range
18 p3103 A69-35199

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies, describing application to multichannel TV transmission system
19 p3266 A69-35763

Ruby laser Q switching with electro-optical shutter based on Li metaniobate crystals by applying static, single pulse or periodic potential to Pockels cell
19 p3336 A69-36346

He-Ne laser subnanosecond intracavity coupler consisting of coaxial krytron pulse generator and electrooptic modulator
19 p3339 A69-36823

Single crystal line block electro-optical shutter reflector operation based on double reflection and birefringence in anisotropic media, noting application to Nd glass laser
20 p3554 A69-37611

Pointing vector and angular rate relationships for various optical elements, discussing analytical models development for precision electro-optical stabilization systems
23 p4131 A69-42544

ELECTROACOUSTIC TRANSDUCERS

NT HYDROPHONES

Electroacoustic transducers interaction effects in multibeam acoustical reflector type receiving antennas
13 p2227 A69-27536

Ultrasonic probe selection and standardization for nondestructive testing, discussing instrument sensitivity and probe losses
15 p2617 A69-31517

ELECTROACOUSTIC WAVES

Model for fast randomization of electron gas by trapped electroacoustical waves
02 p0289 A69-12236

Acoustoelectric domains in CdS, making time evolution visible by means of modified optical strain birefringence and stroboscopic illumination
02 p0258 A69-12618

- Electrostatic acoustic wave mode with plasma motion in magnetic surfaces perpendicular to field in toroidal systems with geodesic curvature
03 p0475 A69-13147
- Acoustoelectric domain propagation in N-type GaAs, noting flux influence on peak acoustic density
05 p0806 A69-15815
- Threshold velocities of acoustoelectric current oscillations in elemental piezo- and nonpiezoelectric semiconductors, taking into account amplification and losses of phonons
05 p0807 A69-15956
- Interacting carriers acoustoelectric waves in semiconductors with high dielectric constant, analyzing dispersion equation
13 p2317 A69-27878
- Current oscillations in n-type gallium arsenide related to electroacoustic domains motions, noting oscillation period dependence on voltage
13 p2318 A69-27892
- Warm plasma probe, describing transit electrons interaction with electric field and generation of electroacoustic waves radiation
16 p2824 A69-32611
- Plasma electroacoustic resonance in reentry sheath of Trailblazer 2 vehicle excited by nonradiating coaxial antenna, deducing electron density gradient at vehicle surface
17 p3010 A69-32915
- Electroacoustic-electromagnetic waves nonlinear coupling in compressible isotropic plasma, comparing slowly varying and resonant interaction approaches
17 p2928 A69-33870
- ELECTROCARDIOGRAMS**
U ELECTROCARDIOGRAPHY
ELECTROCARDIOGRAPHY
- Electrocardiographic tests to study changes in electropotentials of heart in flying personnel after flight, noting changes in myocardium
03 p0378 A69-14207
- Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
05 p0710 A69-16519
- Automatic processing of electrocardiograms recorded during space flight by computer
05 p0715 A69-16524
- Electrocardiographic T-wave changes related to bradycardia in healthy individuals, discussing T-wave inversion in people with vagotonia
09 p1445 A69-22557
- Electrocardiograms of homeothermic animal, hibernator, warm and cool climate poikilothermic animals compared for hypothermia, considering metabolic changes contributing to EKG changes
10 p1643 A69-23123
- Vectorometric EKG analysis of cardiac activity during hypokinesia with and without exercise and medication
18 p3096 A69-34738
- Automatic processing of electrocardiography recorded during space flight by computer
18 p3098 A69-34743
- EKG during electrical defibrillation of heart in immobilized dogs
19 p3257 A69-36168
- EKG signal transmission to hospital during cardiac patient transportation by emergency vehicle, noting prototype system construction and tests
19 p3262 A69-36271
- Automated computer network analyzing electrocardiograms, using telephone lines for bidirectional communications between cardiac data acquisition stations and computer center
19 p3262 A69-36273
- Recording instrument paper speed effect on pulse wave measurements precision, discussing multiple observer studies of left ventricular ejection time
19 p3258 A69-36449
- Electrocardiographic and heart rate data recording of crew members during transatlantic helicopter flight and normal daily routine
19 p3263 A69-36451
- Abnormalities of routine electrocardiograms in medical certification of pilots, indicating errors in screening
19 p3263 A69-36462
- Electrocardiographic changes during gravitational stress
21 p3660 A69-39178
- Low noise physiological recording with dry electrodes, discussing material, construction, preamplifier design and experimental data in electrocardiography
21 p3666 A69-39441
- QRS complex detection time error in noisy electrocardiograms
21 p3667 A69-39442
- Device producing step-like output representing amplitude of ECG R-wave on beat by beat basis
21 p3667 A69-39443
- Arrhythmia diagnosis instruction aided by cardiac pacemaker digital simulation, discussing clinical electrocardiograms generation mechanisms
21 p3667 A69-39606
- Algorithmic approach to nonlinear signal estimation problem useful in fetal electrocardiography
21 p3668 A69-39866
- Serial ECG change from normal conduction to right bundle branch block in 59 patients without overt cardiac disease
23 p4085 A69-41677
- Muscle function measurement in astronauts using electromyogram, electrocardiogram and isometric tension at fixed percentage of maximum voluntary contraction
23 p4103 A69-41684
- EKG data telemetry from personnel to receiver located within same closed metallic chamber, discussing FM/AM and FM/FM systems
23 p4103 A69-41766
- Computer assisted electrocardiography, discussing multipole analog simulation of heart electrical activity and vectorcardiogram recording
23 p4105 A69-41784
- Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025
- ELECTROCATALYSTS**
- Electrocatalysts for direct electrochemical oxidation on n-octane in fuel cells, discussing platinum consumption reduction
[ECS PAPER 8] 03 p0368 A69-13856
- Electrochemical oxidation of fuels in liquid ammonia, evaluating electrode surfaces as catalysts
[ECS PAPER 212] 03 p0382 A69-13857
- Oxidizer reducing and fuel oxidizing catalysts role in large current densities production at electrodes of low temperature carbon fuel cells
08 p1259 A69-21037
- Platinum based metal binary catalysts as anodes for hydrogen/carbon monoxide fuel mixtures oxidation, discussing alloy surface chemisorption of CO
12 p2026 A69-25937
- Thin film metallic oxide catalysts for oxidation in low temperature cells using hydrogen and hydrocarbons and for oxygen reduction in acid electrolyte
16 p2738 A69-32408

17 p2904 A69-33663
- Calorimetric methods for battery and cells testing, discussing heat generation data correlation
18 p3093 A69-34780
- ELECTROCHEMICAL CORROSION**
- Corrosive characteristics of jet fuels near condensing water studied by weight loss method, using copper alloy plates
01 p0142 A69-11099
- Nickel maraging steel polarization behavior in acidic solutions, noting corrosion potential dependence on pH
13 p2282 A69-28188
- Titanium alloys stress corrosion cracking in presence of chloride, bromide and iodide under potentiostatic conditions, postulating electrochemical kinetic and mass transport model
19 p3351 A69-36901
- Corrosion kinetics in metals using electrochemistry, stressing polarization techniques
21 p3749 A69-39494
- Molybdenum disulfide influence on electrochemical corrosion of metals
21 p3733 A69-39804
- ELECTROCHEMICAL MACHINING**
- Electrochemical grinding application to metal cutting of refractory alloys in aircraft jet engine overhaul
[SAE PAPER 680662] 03 p0433 A69-13453
- Electrochemical shaping of turbine blades under symmetric cycle conditions, showing role of experimental functions for optimum regime
04 p0605 A69-14560
- Electrode gap change in one dimensional steady state electrochemical machining
[ASME PAPER 68-WA/PROD-16] 05 p0768 A69-16193
- Kinematics of electrochemical machining defined as quasi-steady process
[ASME PAPER 68-WA/PROD-22] 05 p0769 A69-16194
- Book on electrochemical machining methods, theory, working gap, tool design and power supply
06 p0932 A69-17857
- Electrode gap calculations in intricate surfaces in electrochemical machining, discussing tool electrode
08 p1321 A69-20726
- Metal electrolyte system for electrochemical machining in sodium chloride solution for achieving dimensional control
13 p2268 A69-27521
- Tungsten surfaces with high work functions generated by electrochemical etching, discussing effects of heat treatment in vacuum
14 p2506 A69-29267
- Electrochemical dimensional machining of metals and alloys with rotating cathode in parts manufacture from mechanically intractable materials
23 p4168 A69-41309
- Metal removal mechanisms during electrochemical milling for moving electrodes, noting equations of motion of point for nonmoving electrodes
23 p4168 A69-41310
- Step cathodic flux cleaning of furnace brazed Al assemblies used in combination with ultrasonic and chemical conversion coating techniques
24 p4319 A69-42938

ELECTROCHEMICAL OXIDATION

Electrocatalysts for direct electrochemical oxidation on n-octane in fuel cells, discussing platinum consumption reduction
[ECS PAPER 8] 03 p0368 A69-13856

Electrochemical oxidation of fuels in liquid ammonia, evaluating electrode surfaces as catalysts
[ECS PAPER 212] 03 p0382 A69-13857

Electrochemical oxidation of n-octane based fuels containing aromatic, olefinic and naphthenic components
[ACS PAPER 93] 05 p0716 A69-16234

Long term electrochemical oxidation performance of n-octane based fuels containing aromatic, olefinic and naphthenic components
[ACS PAPER 94] 05 p0716 A69-16235

Physical and physicochemical properties of anodic silica obtained by silicon oxidation in organic bath, discussing possible applications
05 p0810 A69-16589

Zinc oxidation in weakly alkaline media, discussing basic properties of electrochemical cells containing zinc
08 p1268 A69-21050

Adsorption kinetics of hydrocarbon oxidation on platinum electrode
08 p1268 A69-21052

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells
11 p1825 A69-24523

Alloying effect on surface oxides determined from photoelectric polarization measurements for Ti-Nb and Ti-Ni
13 p2275 A69-27292

Electrochemical synthesis of chlorine pentafluoride formation from chlorine trifluoride-anhydrous hydrogen fluoride-sodium fluoride system
13 p2217 A69-28134

Chlorine pentafluoride formation from chlorine in anhydrous hydrogen fluoride in electrochemical cell, noting formation rate
13 p2217 A69-28135

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant
[ECS PAPER 330] 15 p2562 A69-31540

Electrochemical oxidation of hydrocarbons on platinum electrode, discussing adsorption kinetics
16 p2740 A69-32423

ELECTROCHEMISTRY

NT COULOMETRY

Ozonesonde based on modified Brewer electrochemical sonde
01 p0079 A69-10218

Galvanostatic transients of iron passive in 2N sulfuric acid, noting space charge effects and zero field current variation
[ECS PAPER 84] 03 p0382 A69-13858

Porous gas diffusion electrodes design for electrochemical energy converters, noting contribution of theory of electrode kinetics
04 p0551 A69-15309

Passive current maxima during anodic polarization of stainless steel in sulfuric acid, using electrochemical and electron microprobes
06 p0944 A69-17853

Electrochemical kinetic and mass transport model for studying stress corrosion crack propagation in Ti
[ECS PAPER 147] 08 p1332 A69-20359

Platinum electrode study of electrochemical oxygen reduction in nonaqueous media, including kinetic effects of different water concentration levels
[ECS PAPER 7] 08 p1268 A69-20361

Book on thermodynamics of charged and polarized layers covering matter in electric fields, general framework theory, applications, etc
10 p1724 A69-23159

Sandwich electrode for direction and magnitude measurement of velocity gradients at wall for flow around cylinder at high Reynolds numbers
11 p1872 A69-25132

Electrolytic hydrogen evolution reaction on Al covered by thin oxide in aqueous buffered acetate solutions
11 p1832 A69-25674

Electrochemical test predicting stress corrosion performance of 2219 aluminum alloy in T851 and T87 tempers
16 p2798 A69-31716

Medium temperature fuel cells advantages including improved electrochemical reaction kinetics, water and heat removal
16 p2739 A69-32417

Electrochemically passivated Ti/Pd/Ag contacts for Si solar cells tested in humidity stress and temperature cycling
19 p3250 A69-35687

Electrochemical analysis of stress corrosion cracking in Al-Zn-Mg alloy, noting oxide film growth at grain boundary
19 p3351 A69-36899

Austenitic stainless steels nonreproducible passivating tendencies, determining electrochemical and corrosion characteristics, discussing critical anodic current density role
20 p3562 A69-37750

C content and microstructure effect on electrochemical parameters of Fe and steels in dilute sulfuric acid, discussing Tafel constants and current density
20 p3563 A69-38002

Porous hydrophilic oxygen electrodes behavior, showing electrochemical reaction influence on shape of current density vs voltage curves
20 p3484 A69-38071

Titanium alloys hardness indirect measurement by determining electrochemical potential
23 p4177 A69-41598

ELECTRODE FILM BARRIERS

Collector efficiency limitation of surface barrier-limited photoconductors attributed to photogenerated carrier diffusion into electrode
20 p3583 A69-37732

ELECTRODELESS DISCHARGES

Spectroscopic investigation of emission of air plasma in HF electrodeless plasmatron, analyzing near IR, UV and visible spectra
07 p1191 A69-18995

Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H, noting electric field
08 p1361 A69-20230

RF ion thrusters using self sustaining electrodeless discharge
[AIAA PAPER 69-285] 09 p1565 A69-21247

Theta pinch plasma microwave emission from electrodeless inductive discharge at low pressures recorded at near plasma frequencies
09 p1549 A69-22017

Electron concentration at front of anisotropic plasma expanding in axial direction in electrodeless induction discharge from measurements of reflected microwaves
09 p1550 A69-22027

Electrodeless plasmatron coupled with oscillator operating at 5-30 kHz, discussing parameters effect on operation mode and performance
12 p2140 A69-27123

One dimensional theory for cylindrical low pressure electrodeless discharge, predicting electron number density and temperature as function of applied fields
[AIAA PAPER 69-703] 17 p3011 A69-33479

Volatile oxygen organic compounds subjected to RF electrodeless discharge, explaining product distribution in terms of reaction sequences
21 p3670 A69-39737

High temperature equilibria from hydrocarbon plasma sources subjected to 3000 W RF electrodeless discharge
21 p3670 A69-39738

ELECTRODEPOSITION

NT ELECTROPLATING

Electrolytic deposits of titanium, vanadium and alloys from molten salts, discussing formation conditions, velocity and properties
03 p0446 A69-13574

Absolute short term current efficiency of aluminum electrolytic cell, stressing aluminum amount determination in cathode
06 p0869 A69-17233

Electrodeposition of Te-containing Permalloy films with uniaxial magnetic anisotropy, noting electrolyte composition and film structure
11 p1935 A69-24332

Prototype system for continuous dielectrophoretic deposition and alignment of micron sized ultrahigh strength whisker reinforced composites
13 p2269 A69-28676

Electrodeposits on molybdenum alloys in high temperature oxidizing environments, noting performance of Cr-Ni-Cr composite coating
14 p2466 A69-29934

Molybdenum coatings electrodeposition from fused salt system
18 p3156 A69-35001

Electroforming of Al matrix composites by codeposition of short graphite fibers, obtaining increased strength and elastic modulus
19 p3318 A69-35510

Titanium diboride electrodeposition on Inconel from molten salt electrolyte at high temperatures noting electrolyte metabolites and coating thickness range
22 p3970 A69-40735

Soviet collection of papers on bright electrolytic coatings including physicochemical principles of deposition
22 p3958 A69-41261

Physicochemical principles of electrolysis and electrodeposition of metals for obtaining bright galvanic coatings
22 p3958 A69-41262

Bright chromium electrodeposition principles and properties of coatings
22 p3958 A69-41263

Bright nickel plating, examining brighteners and anti-tipping additions effect on deposition mechanism
22 p3959 A69-41264

Bright cobalt plating electrolytic processes, examining brighteners and formation mechanism of deposits
22 p3959 A69-41265

Bright cadmium plating by electrolysis, describing processes during electrodeposition from sulfate electrolytes
22 p3959 A69-41266

NT TUBE GRID

Electron density in arc discharge between carbon electrodes and in discharge with Na vapor, noting relation to temperature and current
01 p0128 A69-10433

Electrode indentation in resistance spot welds related to weld strength for titanium, steel and aluminum alloy
01 p0086 A69-10538

Neutral buoyancy microelectrode for prolonged recording from single nerve units
02 p0202 A69-11865

Gas flow model of coaxial electromagnetic plasma gun front profiles and speeds for operation with positive central electrode
02 p0288 A69-12032

Electrochemical oxidation of fuels in liquid ammonia, evaluating electrode surfaces as catalysts
[ECS PAPER 212] 03 p0382 A69-13857

Fully austenitic stainless steel welding electrodes for welds in cryogenic or high temperature applications, noting creep rupture test results
04 p0607 A69-15220

Porous gas diffusion electrodes design for electrochemical energy converters, noting contribution of theory of electrode kinetics
04 p0551 A69-15309

Design theory for electron guns using three high permeance electrodes demonstrated with gun model
05 p0730 A69-16211

Dual gas reference electrode system for molten carbonate cells with immobilized electrolyte
05 p0706 A69-16237

Platinum electrode study of electrochemical oxygen reduction in nonaqueous media, including kinetic effects of different water concentration levels
[ECS PAPER 7] 08 p1268 A69-20361

Potential effect on wetting of platinum electrodes in acid electrolytes noting drainage role
08 p1268 A69-20362

Electrode gap calculations in intricate surfaces in electrochemical machining, discussing tool electrode
08 p1321 A69-20726

Electrochemical characteristics of lateral diffusion gas electrodes for fuel cells, noting electrodes fabrication by pulverizing on nickel sheet
08 p1260 A69-21044

Fuel cell oxygen ionization on nickel, silver and nickel-silver disk electrodes

08 p1260 A69-21045

Thermodynamics and polarization of zinc electrode in alkaline media, discussing anodic dissolution and passivation

08 p1268 A69-21048

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs [AIAA PAPER 69-230]

09 p1563 A69-21231

Electron bombardment thrusters for low specific impulse operation, discussing electrode structures fabrication by bonding alumina disk to metal electrode [AIAA PAPER 69-301]

09 p1568 A69-21730

Gunn effect domains propagation calculated for nonuniform diodes of annular geometry, obtaining frequency variation

09 p1464 A69-22159

Signal electrode charge control of sealed Ni-Cd batteries, discussing signal voltage for overcharge control

10 p1640 A69-23993

Zinc electrode cycle life improvement by reducing change in electrode shape, noting effectiveness of teflonation

10 p1640 A69-23995

Highly resistant separator performance in Zn-Ag oxide battery, discussing zinc electrode limitations on battery performances

10 p1640 A69-23996

Linear MHD generator power characteristics at large magnetic Reynolds numbers, analyzing magnetic field distribution for sectioned and solid electrodes

11 p1824 A69-24224

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells

11 p1825 A69-24523

Image tube storage target mesh electrode structure and transmission data for electron beams of various velocities, noting secondary electron redistribution control

11 p1848 A69-24749

Rectangular RC distributed circuits with shaped electrodes, analyzing short circuit admittance parameters

11 p1858 A69-24938

Rare earths additives effects on arc instability and weld puddle fluidity of stainless steel bare wire electrodes

12 p2103 A69-26623

Oxide and carbide high-melting-point materials for MHD generator electrode walls

13 p2284 A69-27471

Oscillating electron ion discharge in magnetic field in system of alternating positive and negative electrodes to obtain fast neutral particle fluxes

13 p2311 A69-28109

Tangential drag measurements at electrodes of arc in plasma accelerator, ion current partitioning at cathode and electrode damage [AIAA PAPER 67-657]

13 p2312 A69-28219

Electrode surface bismuth coating selected for reducing electrostatic analyzers photocurrents

14 p2446 A69-29048

Cyclohexane and benzene anodic oxidation at fuel cell electrodes, noting cathodic desorption products as function of potential and reactant [ECS PAPER 330]

15 p2562 A69-31540

Electrodes for fuel cells with liquid electrolytes, discussing problems under weightless and high gravity situations

16 p2738 A69-32409

Fuel cell oxygen electrode problems, noting oxygen ionization reaction and disk electrodes role

16 p2739 A69-32416

Thermodynamics and polarization of Zn electrode in alkaline medium for electric generators

16 p2739 A69-32419

Electrochemical generators utilizing anodically polarized zinc associated with oxygen, mercuric oxide or silver oxide for space power sources

16 p2739 A69-32420

Electrochemical oxidation of hydrocarbons on platinum electrode, discussing adsorption kinetics

16 p2740 A69-32423

Hydrogen oxygen fuel batteries with hydrophobic porous film electrodes and alkaline electrolyte

16 p2740 A69-32426

Electrode potentials of pure metals, Ni-Cr and Ni base alloys in molten salts applied to corrosion studies

17 p2990 A69-33650

Structural parameters selection for thermocouples with butt-weld electrodes, developing mathematical

basis for thermoelectrode length to measure unstable gas temperatures

19 p3311 A69-36197

Porous hydrophilic oxygen electrodes behavior, showing electrochemical reaction influence on shape of current density vs voltage curves

20 p3484 A69-38071

Pt electrode as detector of red blood cell oxygenation, attempting Fc value dependence on flow velocity determination

20 p3480 A69-38283

Low noise physiological recording with dry electrodes, discussing material, construction, preamplifier design and experimental data in electrocardiography

21 p3666 A69-39441

Self consistent flow calculation in dense space charge beams, including electrode design for portions isolation

22 p3985 A69-40668

Metal removal mechanisms during electrochemical milling for moving electrodes, noting equations of motion of point for nonmoving electrodes

23 p4168 A69-41310

Clark oxygen electrode calibration by preparation of oxygen standard aqueous solutions, noting repair by ammonium hydroxide treatment

23 p4101 A69-41451

Capacitance sensor of vertical with flexible mobile electrode, describing diagram and operation

23 p4163 A69-41550

Ion sputtering method for making electrodes in thermionic energy converters, discussing alumina and W surface layers preparation

23 p4170 A69-42259

ELECTRODIALYSIS

Justi-Winsel extraction process by electrodialysis for removing product water from electrochemical reaction in H-O fuel cells

08 p1260 A69-21043

Optimization of electrolytic extraction process of water from H-O fuel cells through choice of current density as function of electrolyte concentration

16 p2738 A69-32414

Electrodialysis method for depleting positive Na, K, Ca and Mg ions from Anabaena flos-aquae A-37, noting algae survival rate

23 p4079 A69-41387

ELECTRODISSOLUTION

Stress corrosion cracking of metals related to surface phenomena involving surface reaction layer ruptures or selective electrochemical dissolution along defects

19 p3349 A69-36885

ELECTRODYNAMICS

NT ELECTROHYDRODYNAMICS

NT ELECTROMECHANICS

NT QUANTUM ELECTRODYNAMICS

Hydrodynamics-electrodynamics analogies for electromagnetic flight

01 p0121 A69-11134

Atomic electron spontaneous transition in theory of direct particle interaction, considering electrodynamic field zero-point oscillations role

03 p0468 A69-13773

Electrodynamics of turbulent conducting media based on nonrelativistic MHD

03 p0479 A69-13972

Total conserved momentum-energy of electromagnetic interaction of system of point charges in Wheeler-Feynman theory, noting mass defect of connected system

04 p0631 A69-15058

Interaction between point charges in Wheeler-Feynman electrodynamics, noting impossibility of deducing momentum and energy conservation from variational principle

04 p0631 A69-15059

Field theories and direct interparticle action theories of classical electrodynamics, establishing general correspondence between formalisms

04 p0631 A69-15189

Geometrical optics approximation of Maxwell equations for electrodynamics of inhomogeneous anisotropic media

07 p1076 A69-18519

Waveguide Y circulator electrodynamic parameters by design algorithm and computer programs

10 p1661 A69-23108

Inhomogeneous permittivity and boundary effects influence on electric fields of laser with open cavity containing inhomogeneous active medium

12 p2110 A69-26908

Theoretical model describing electrodynamic plasma properties of HF flame discharge in air, heating

discharge envelopes by heat diffusion from discharge channel surface

12 p2140 A69-27125

Electrodynamic model applicability to HF flame discharge for case of flame discharge stabilization by axial air injection

12 p2140 A69-27126

Electrodynamic law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control

14 p2485 A69-29320

Energy relations and conversion for electrodynamic plasma acceleration with allowance for mass transfer processes resulting from recombination, diffusion and electrode erosion

15 p2664 A69-31176

Reciprocity method for absolute calibration of piezoelectric accelerometer mounted on electrodynamic shaker table

15 p2615 A69-31283

Earth ionosphere and magnetosphere electrodynamic state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities

20 p3519 A69-37026

Approximate boundary conditions in electrodynamics of stratified tensor media estimated for ferrite layers

21 p3675 A69-39282

Time symmetric electrodynamics for various cosmological models, discussing position and negative space curvature

22 p4022 A69-40469

Intrinsic transport theorem for electrodynamics of continuous media, using Cartan method of exterior differential forms

24 p4350 A69-43368

ELECTRODYNAMOMETERS

U DYNAMOMETERS

ELECTROENCEPHALOGRAPH

U ELECTROENCEPHALOGRAPHY

ELECTROENCEPHALOGRAPHY

Human psychological factors involved in genesis of contingent or conative negative variation using EEG activity measurements

01 p0015 A69-10904

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc

01 p0022 A69-11346

Increasing hypoxia effects on rabbit EEG and light flash conditioned alimentary reflex for simulated altitude ascent, noting subcortical stimulation

02 p0197 A69-11492

Flexible printed circuitry electrode arrays fabrication for surface cortical potentials recording in animals

02 p0204 A69-12601

Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals

05 p0710 A69-16520

Standards for EEG in pilot flight examinations, analyzing effects of total flying hours

06 p0875 A69-18021

Resting EEG and parieto-occipital response changes evoked by slowly repeated flashes in case of severe hypothyroidism secondary to panhypopituitarism

07 p1064 A69-18634

High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences

07 p1065 A69-18976

EEG lead sensitivity to location and orientation of sources in brain by applying reciprocity theorem

10 p1648 A69-23186

EEG, heart beat, respiration rates, body temperature, motor activity, physical and mental efficiency of man during anechoic chamber confinement

10 p1646 A69-23510

EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system

12 p2023 A69-26553

Computer analysis of EEG recording, presenting model studies under rest and performance conditions

15 p2560 A69-31232

EEG and pilots flight performance relations, discussing in-flight telemetric measurements from ground station

15 p2560 A69-31233

EEG electrode stimulated simian mental activity in problem solving during simulated space flight, discussing skull implantation and EEG recordings of hippocampus activity

17 p2910 A69-33749

- Prolonged bed rest effect on brain bioelectrical activity from EEG reactions of subjects to acoustic signals followed by light signals
18 p3096 A69-34739
- EEG monitoring during decompression illness /bends/ treatment by hyperbaric procedure using small multichannel telemetry pack
19 p3261 A69-36268
- Electrical response of frog and human visual cortex neurons to thermal vestibular and light flash stimulation
20 p3469 A69-37242
- Human sleep during prolonged rotation, discussing electroencephalograms, acoustic signal frequency producing waking reaction, cutaneous galvanic reflex and deepness of sleep
20 p3472 A69-37261
- High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences
20 p3479 A69-38224
- Ultrasound-echo-encephalography in diagnosis of posttraumatic intracranial hemorrhage of skull and brain trauma, noting neuroradiological techniques
21 p3652 A69-38790
- EEG patterns evoked from left and right cerebral hemisphere by visual and verbal stimuli, showing asymmetrical role of hemispheres in governing cognitive behavior
21 p3656 A69-38976
- Hyperbaric oxygen convulsions origin and site, studying pressure effect on brain electrical activity in rabbit by EEG
21 p3656 A69-38977
- EEG with combined multichannel radiotelemetry and telephone for onward data transmission
21 p3664 A69-38978
- EEG patterns computerized spatio-temporal display technique using CRT and motion picture camera
21 p3668 A69-39864
- Radiotelemetric EEG recording variation possibility, examining dynamic behavior of human cerebral rhythms
22 p3889 A69-40158
- Image disappearance or reappearance time controlled by inducing changes in alpha occurrence probability, executing on-line closed loop program detecting alpha rhythm
22 p3871 A69-40159
- Age and carbon dioxide tension effects on EEG of adolescents and adults, discussing end-tidal carbon dioxide during routine hyperventilation
22 p3872 A69-40162
- Meaningful comparisons between single stimulus EEG records and average evoked potential
22 p3890 A69-40163
- EEG alpha activity relationship to laterality of reflective eye movements, indicating physiological correlates of hypnotizability
22 p3887 A69-41213
- Equal bandwidth multichannel FM/FM EEG telemetry system using subcarrier frequencies and HF modulation via varactor diodes
23 p4106 A69-41802
- EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter
23 p4093 A69-42063
- Occipital eeg activity slowing and physiological changes during prolonged immobilization plus perceptual deprivation of human beings
24 p4256 A69-42554
- Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025
- Lambda waves EEG recording for evaluating eye movements during pattern vision
24 p4268 A69-43401
- ELECTROEROSION**
U SPARK MACHINING
- ELECTROEXPLOSIVE DEVICES**
U INITIATORS [EXPLOSIVES]
- ELECTROFORMING**
Buckling of electroformed thin conical shells under hydrostatic pressure, proving theory for cones of large taper ratio
02 p0347 A69-12515
- Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites
11 p1890 A69-24337

- Electroforming methods in design and fabrication of liquid propellant rocket motor injectors and composite thrust chambers
[AIAA PAPER 69-583] 16 p2794 A69-32757
- Electroforming of Al matrix composites by codeposition of short graphite fibers, obtaining increased strength and elastic modulus
19 p3318 A69-35510

ELECTROGENERATORS

U ELECTRIC GENERATORS

ELECTROHYDRAULIC CONTROL

U ELECTRIC CONTROL

U HYDRAULIC CONTROL

ELECTROHYDRODYNAMICS

- Electrohydrodynamic analogies to known MHD effects studied by differential equations for hydrodynamic and electric field energy relations
01 p0131 A69-10775

- Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields
01 p0062 A69-11208

- Charge accumulation elimination on dielectric electrodynamic channel walls, comparing resistive wall channel to high internal impedance generator
02 p0291 A69-12506

- Dynamic properties of electrohydraulic servomechanisms having variable structure analyzed by analog computer
03 p0368 A69-13686

- Stationary, moving and pulsating electrohydrodynamic flow between parallel dielectric plates and Couette flow, noting reaction concentration near wall
03 p0419 A69-13919

- Electrodynamic generator for direct conversion of moving dielectric medium potential or thermal energy to electric power
03 p0369 A69-14153

- Electrostatics /EGD/ engineering, discussing generators and compressors
05 p0804 A69-16586

- Electrodynamic gas flow in one dimensional approximation for transition through speed of sound, discussing flow parameters profile and dynamic efficiency
06 p0964 A69-17326

- Flapper-nozzle type electrohydraulic amplifier design with emphasis on elements and subsystems
08 p1256 A69-20459

- Dynamic behavior of electrohydraulic servomotors over wide range of loads using differential equations of motion
08 p1256 A69-20718

- Electrohydrodynamics - Conference, Cambridge, Mass., March-April 1969
12 p2135 A69-26397

- One dimensional stationary flow of medium consisting of charged and neutral components within electrohydrodynamic limits in AC and DC electric fields
12 p2135 A69-26398

- Electrohydrodynamic equations and transfer coefficients for multicomponent plasma with volumetric charge in electric field, discussing Ohm law and equations for plasma motion
12 p2135 A69-26399

- Electrohydrodynamic channel flow using boundary problem and approximations corresponding to flow of unipolarly charged and polarized media
12 p2135 A69-26400

- Electrically driven thin fluid jet stability in longitudinal field between two plate electrodes, discussing role of Ohm law in calculating jet potential
12 p2136 A69-26402

- Electrohydrodynamic instability of incompressible conducting cylindrical viscous jet in external magnetic field, noting viscosity role in oscillation modes and growth rate
12 p2136 A69-26403

- Virtual power principles applied to solving force acting on fluid consisting of colloidal suspension of polarized particles in neutral vehicle
12 p2136 A69-26404

- Aerospace applications of electric discharge interaction with fluid motion including sonic boom reduction, high lift devices, reentry vehicle pitch control, etc
12 p2136 A69-26405

- Charged aerosols production for electrohydrodynamic processes by spraying liquids through capillary at high electric field strengths into high pressure air flows
12 p2138 A69-26631

- Electrohydrodynamic flows at large electric Reynolds numbers, obtaining Bernoulli and Cauchy-Lagrange integrals
13 p2305 A69-27379

- Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients
14 p2492 A69-29610

- Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results
15 p2553 A69-31294

- Small amplitude motions of plane interface between fluids stressed by initially perpendicular electric field, modeling fluids as ohmic conductors
16 p2811 A69-31667

- Electrohydrodynamics of fluids having uniform electrical properties, emphasizing shear effects for interfacially confined electromechanical coupling
18 p3123 A69-34919

- Conducting medium steady one dimensional motions determined by assuming space charge-electric field interaction, considering electrohydrodynamic behavior of medium
18 p3181 A69-35315

- Electrohydrodynamic subsonic flow of isothermal charged gas over wavy insulator wall by perturbation method, calculating surface pressure, streamlines and electric lines of force
19 p3297 A69-35837

- Electrohydrodynamic supersonic flow over wavy wall by oscillating piston model, calculating streamlines and density distributions
19 p3297 A69-35838

- Electrohydrodynamic Rayleigh-Taylor bulk instability in initially static stratified fluid under electric stress
20 p3578 A69-38235

- Dielectrophoretic zero gravity cryogenic liquid expulsion using lightweight high voltage ribbon electrode conduits and electrohydrodynamic bang-bang field effect
24 p4300 A69-43237

ELECTROJETS

U AURORAL ELECTROJETS

U EQUATORIAL ELECTROJET

ELECTROKINETICS

- Electrokinetic converter of biochemical parameters for diagnosis and control of organism behavior, noting biomechanical utility
14 p2409 A69-29471

- Fluctuation kinetics of electron system in nonequilibrium state arising in semiconductor in strong electric field, considering lattice and interelectron scattering
16 p2824 A69-31569

ELECTROLUMINESCENCE

- Display techniques, discussing cold cathode luminous gas discharge /plasmas/ tube, electroluminescence and cathode ray tube
04 p0600 A69-15029

- Homogeneous electroluminescence at 77 K in n-type GaAs single crystals without artificial p-n junctions, noting effects of electric field strength and Zn doping
04 p0644 A69-15271

- Electrical polarization effect on electroluminescence brightness waves in zinc sulfide films
05 p0807 A69-16213

- Polarization effect on electroluminescent properties of zinc sulfide films
05 p0807 A69-16214

- Diffused Si and GaAs diodes electroluminescence and current-voltage characteristics
06 p0893 A69-16898

- Impact ionization and tunneling effect during electroluminescence of zinc sulfides
06 p0980 A69-17261

- Optimal electroluminescent efficiencies for vapor grown gallium arsenide phosphide diodes, analyzing current spreading, absorption, impurity and composition effects
[ECS PAPER 103] 08 p1284 A69-20366

- Voltage dependence of red and green electroluminescence in GaP diodes prepared by growing n-type liquid epitaxial layer on p-type solution grown substrate
10 p1663 A69-23664

- Soviet book on electroluminescent devices covering panels, indicator contrast levels, control, multicolor indicators, image conversion and storage and optoelectrical systems
11 p1850 A69-24976

- Electroluminescence and electroluminescent devices, considering semiconductor lasers, radiation sources and image amplifiers
11 p1899 A69-25198

Negative resistance in GaP electroluminescent diodes with p-i-n structure at low temperatures, noting oxygen role
13 p2226 A69-27194

Electroluminescence of p-GaAs diodes analyzed over temperature range of linear dependence of lasing on injection current
13 p2230 A69-27887

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation
14 p2419 A69-29325

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes
15 p2573 A69-30062

Optical and electrical properties of electroluminescent diffused gallium arsenide phosphide diodes with low donor concentrations, analyzing spectral emission and fabrication effects
16 p2758 A69-31699

Continuous IR radiation source using electrically heated Mo ribbon, comparing emission from V shape and flat portions
19 p3313 A69-36491

Electroluminescence of p-GaAs diodes, analyzing temperature range of linear dependence of lasing on injection current
21 p3682 A69-39145

Ball lightning as positively charged region of electroluminescent air maintained in dynamic structure and molecular composition by atmospheric electric field
22 p3940 A69-40536

Hybrid display for data visual display using electroluminescent and thermochromic technologies for wide range of ambient illumination
24 p4313 A69-42899

Colors production on electroluminescent display using phosphors impressed-frequency/emission-color relationships together with chromatic biasing
24 p4286 A69-42900

Luminescence, I-V and pulse characteristics of high resistivity Ni doped GaAs single crystals, noting injection conductivity
24 p4362 A69-43734

Diagonal tunneling and radiation polarization in doped heterojunctions and p-n junctions of GaAs, using electroluminescence spectrum analysis
24 p4362 A69-43737

Electroluminescence in doped p-type GaAs single crystal diodes ascribed to double injection of nonequilibrium current carriers
24 p4288 A69-43739

ELECTROLUMINESCENT LAMPS
U ELECTROLUMINESCENCE

ELECTROLYSIS
NT COULOMETRY

Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
03 p0379 A69-12987

Charge and degree of ionization of nickel alloyed with molybdenum analyzed by electrolytic ion migration method
07 p1159 A69-18535

Electrochemical synthesis of chlorine pentafluoride formation from chlorine trifluoride- anhydrous hydrogen fluoride-sodium fluoride system
13 p2217 A69-28134

Physicochemical principles of electrolysis and electrodeposition of metals for obtaining bright galvanic coatings
22 p3958 A69-41262

ELECTROLYTES

NT ELECTRIC CONDUCTORS
NT ELECTRIC CONNECTORS
NT ELECTRIC WIRE
NT EXPLODING WIRES
NT ION EXCHANGE MEMBRANE ELECTROLYTES
NT MOLTEN SALT ELECTROLYTES
NT PHOTOCONDUCTORS
NT SUPERCONDUCTORS

Electrolytic marking process for aircraft component identification without use of stamping or engraving
02 p0253 A69-12065

Water removal unit design for electrolyte reaction accumulation in hydrogen oxygen fuel cell systems
04 p0552 A69-15316

Oxygen reclamation from carbon dioxide using solid oxide electrolyte, noting water vapor catalytic effect
07 p1071 A69-19423

Electrolytic bubble level during wind tunnel tests for aircraft model attitude
10 p1672 A69-23268

Metal fluoride compounds as cathodes for use with mixed fluoride electrolyte /LiF-NaF-KF eutectic/ in thermal batteries
10 p1640 A69-23997

Solid state battery utilizing high conductivity solid electrolytes /metal silver iodide/, demonstrating cell performance improvements
10 p1640 A69-23998

Solid electrolyte batteries development and current research, detailing Sprague cell and iodine complexes
10 p1640 A69-23999

Metal electrolyte system for electrochemical machining in sodium chloride solution for achieving dimensional control
13 p2268 A69-27521

Velocity distribution effect on electric field at walls for axisymmetric flow of electrolyte in circular channel in magnetic field of E shaped inductor
14 p2501 A69-29915

Solid electrolyte tantalum condensers reliability under repeated service voltage applications for calculating defective condenser probability
15 p2626 A69-30836

Removal rate of reaction water from fuel cells by diffusion-condensation procedure as function of temperature and electrolyte concentration
16 p2736 A69-32200

Electrodes for fuel cells with liquid electrolytes, discussing problems under weightless and high gravity situations
16 p2738 A69-32414

Optimization of electrolytic extraction process of water from H-O fuel cells through choice of current density as function of electrolyte concentration
16 p2740 A69-32421

Electrochemical couples of zinc-metallic oxides or O used in battery with water electrolyte
16 p2740 A69-32421

Hydrogen oxygen fuel batteries with hydrophobic porous film electrodes and alkaline electrolyte
16 p2740 A69-32426

Nonaqueous lithium anode high energy density electrochemical primary generators, considering energy factors and electrolytic couples
16 p2740 A69-32427

Titanium diboride electrodeposition on Inconel from molten salt electrolyte at high temperatures noting electrolyte metabolates and coating thickness range
22 p3970 A69-40735

Bright cadmium plating by electrolysis, describing processes during electrodeposition from sulfate electrolytes
22 p3959 A69-41266

ELECTROLYTIC CELLS

Secondary cells with liquid lithium anodes and immobilized fused salt electrolytes
04 p0552 A69-15330

Absolute short term current efficiency of aluminum electrolytic cell, stressing aluminum amount determination in cathode
06 p0869 A69-17233

Electrodes behavior for fuel cells with liquid electrolyte under high-g and weightlessness conditions, discussing spontaneous liquid motion
08 p1259 A69-21038

Cold hydrogen and basic electrolyte cells at CGE research center, discussing single cell batteries, reagent chambers and auxiliary control systems
08 p1259 A69-21039

Electrochemical characteristics of lateral diffusion gas electrodes for fuel cells, noting electrodes fabrication by pulverizing on nickel sheet
08 p1260 A69-21044

Proton electrolyte application to fuel cells, discussing proton diffusion in solids and materials with vacancies /proton conductors/ in structures
08 p1269 A69-21053

Polishing-etching cell permitting continuous sample surface observation for use with inverted stage microscopes
13 p2281 A69-28156

Electrolytic vertical indicators response errors, discussing nonlinear properties of transducer steady state characteristics
14 p2446 A69-28925

Oxygen isotope separation magnitude in zirconia electrolytic cells found proportional to mobility difference of isotopes
15 p2552 A69-30701

Hydrogen and basic electrolyte cold cells, studying control systems for reactants supply, current, reaction by-products, etc
16 p2738 A69-32410

ELECTROMAGNETIC ABSORPTION

Oxygenator for weightlessness operation, generating oxygen electrolytically and passing oxygen through membrane for animal experiments
17 p2903 A69-33039

Cathode materials role in high temperature zirconia electrolyte fuel cell performance, discussing metals, collector-embedded and electronically conducting oxides properties
22 p3869 A69-40734

High pressure hydrogen-oxygen reversible fuel cells using calcia stabilized porous zirconia as membrane and aqueous KOH as electrolyte
23 p4076 A69-42308

ELECTROLYTIC GRINDING

U ELECTROCHEMICAL MACHINING

ELECTROLYTIC POLARIZATION

Thermodynamics and polarization of Zn electrode in alkaline medium for electric generators
16 p2739 A69-32419

Electrochemical generators utilizing anodically polarized zinc associated with oxygen, mercuric oxide or silver oxide for space power sources
16 p2739 A69-32420

ELECTROLYTIC POLISHING

U ELECTROPOLISHING

ELECTROMAGNETIC ABSORPTION

NT AURORAL ABSORPTION
NT MOLECULAR ABSORPTION
NT PHOTOABSORPTION
NT POLAR CAP ABSORPTION
NT X RAY ABSORPTION

Absorption of linearly polarized light in reflecting surface layer of collisionless plasma, calculating layer lifetime for reflection of light
01 p0127 A69-10283

Radio wave abnormal absorption in auroral zone of ionosphere, investigating index of frequency dependence in absorption vs frequency relation
01 p0063 A69-10425

Signal absorption in negative ionospheric ions effect on maximal frequency for space radio communication [UN PAPER 68-95272]
01 p0029 A69-10529

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
01 p0030 A69-10592

Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature
01 p0139 A69-10895

Optical absorption coefficients for triphenylmethylarsonium tetracyanoquinodimethan complex single crystal, evaluating reflectance
01 p0140 A69-10934

Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
02 p0206 A69-11661

Sudden cosmic noise absorption in ionosphere confirms relationship with solar chromospheric flares
02 p0306 A69-11667

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
02 p0207 A69-11669

Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients
02 p0295 A69-11779

Performance characteristics of 300 GHz Dicke type superheterodyne radiometer receiver for measuring atmospheric attenuation of electromagnetic waves
02 p0209 A69-12336

Diffraction by rocket exhausts, discussing electromagnetic signal attenuation based on two dimensional straight edge diffraction model
02 p0209 A69-12352

Ruby laser output energy degradation due to pump light absorption by color centers of ruby rod
02 p0256 A69-12358

Linear absorption coefficient of seminsulating Cr doped GaAs for IR carbon dioxide laser radiation, discussing lattice absorption mechanism
02 p0258 A69-12619

Ionospheric absorption measurements using beacon satellite emission compared to Kazantsev results
02 p0246 A69-12742

Sunrise effects in lower D region by solar eclipse, discussing anomaly in ionospheric absorption due to negative ion factor or recombination coefficient
02 p0246 A69-12767

Narrowing of ionospheric absorption anomaly in D region during solar eclipses in long and medium wave ranges due to recombination equation variability
02 p0246 A69-12770

Two photon absorption and stimulated emission mechanism of CdS-CdSe mixed crystals investigated by ruby laser output
03 p0438 A69-13052

Q switched ruby laser nonlinear absorption in optically transparent organic liquids attributed to two quantum process with large cross section
03 p0439 A69-13055

Ionospheric midday radio wave absorption as function of geomagnetic latitude, season and solar activity from pulsed vertical radar sounding data
03 p0394 A69-13521

Radio wave absorption in ionosphere at five fixed frequencies for determining correlation with changes in sporadic E layer parameters
03 p0423 A69-13539

Very thin short metallic filament scattering and absorption cross sections for various values of filament conductivity
03 p0395 A69-13623

Pulsed electromagnetic signal reflection from plane boundary of absorbing medium
03 p0397 A69-13711

Temperature dependent far IR absorption of ferroelectric sodium nitrite, discussing single and multiphonon processes
03 p0490 A69-13940

Optical absorption of vacuum deposited thin rubidium films, noting similarity to sodium and potassium
03 p0491 A69-14114

Carrier scattering mechanisms in n-type GaP, measuring IR radiation absorptivity in Te doped GaP
03 p0492 A69-14168

Photoionization of donor impurities during absorption of IR radiation in n-type Te doped GaP at low temperatures
03 p0492 A69-14169

Quadratic and cubic response in photoelectric emission in potassium antimonide under laser irradiation observed with measurement of energy distribution of excited electrons
05 p0771 A69-15813

Conversion of emission from pulse tube using neodymium laser with luminophor solution filled active element, discussing pumping nonlinear absorption kinetics
05 p0777 A69-16373

Light absorption in semiconductors with electron hole pair formation noting conduction and valence band
06 p0978 A69-16901

Magnetobremstrahlung /synchrotron/ and Cerenkov radiation of ultrarelativistic particles, radiation reabsorption and magnetic field measurement
06 p0962 A69-17245

Ionospheric D layer electron concentration profile from radio wave absorption frequency dependence
06 p0920 A69-17729

Mechanism for laser surface damage of glasses working through optical absorption, fluorescence, chemical reaction by quenching and breakdown
06 p0935 A69-17771

Collisionally induced microwave absorption by non-polar gases, discussing dimer absorption
06 p0962 A69-17816

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals
07 p1197 A69-18454

Interstellar light absorption in Milky Way region of Cepheus analyzed by excess color technique
07 p1216 A69-18855

Laser beam absorption induced index changes associated with thermal blooming observed in iodine doped carbon tetrachloride, using Mach-Zehnder interferometer
07 p1149 A69-18899

Milky Way local spiral arm 10 MHz absorption, noting interstellar absorption effect and evidence for cool electron gas
08 p1383 A69-19900

Optical absorption index for molten beryllium oxide based on measurements of small beryllium/ solid propellant rocket motor exhaust plumes
08 p1351 A69-20149

Picosecond light pulse measurement by two photon excitation of photographic film
08 p1313 A69-20165

Atmospheric propagation properties of laser light, discussing particle absorption, gaseous absorption and refractive index disturbance effects
09 p1518 A69-22129

Ferromagnetic composite materials for microwave absorption and shielding over frequency band 0.3 to 10.0 GHz
09 p1510 A69-22352

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
10 p1653 A69-23106

Error analysis of Hubble galaxies count to resolve contradiction of values for average optical half thickness tau of galactic absorbing layer
10 p1779 A69-23609

Gas laser with nonlinear absorbing cell in resonator, discussing effective gain dependence on squared field amplitude, hysteresis phenomena and output power
10 p1704 A69-23625

Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement
10 p1684 A69-23782

Light absorption of In and Ga thin films in various gaseous media, noting displacement of irregular absorption band
10 p1747 A69-23792

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during May 26, 1967 storm
10 p1688 A69-23935

Xenon pulse discharge plasma temperature distribution, spectral brightness density and light absorption across quartz tube section, noting temperature drop near wall
10 p1742 A69-24081

Polarized Hartree-Fock model computing photoionization cross sections for Li isoelectronic sequence, listing phase shifts for partial waves of scattered electrons
11 p1922 A69-25260

Centrifugal instability of plasma column generated by cyclotron absorption of microwave power in magnetic mirror field
11 p1931 A69-25366

Reflection and absorption characteristics of two dimensional array of magnetic dipoles for microwaves, considering element orientation and distribution
12 p2035 A69-25901

Reabsorption effect of emitted quantum on lifetime of excited levels in gas laser, determining capture factor
12 p2104 A69-26028

Laser beam damage in glass blocks, noting high speed photographic study and absorption of light by inclusions
12 p2117 A69-26193

Elastoplastic stress wave generation by penetration of impulsive electromagnetic radiation through thin surface layer of solid
12 p2179 A69-26215

Pulsar distances estimated from neutral hydrogen absorption, using observations from 140 ft telescope
12 p2156 A69-26224

Optical constants of bulk diamonds compared with interstellar extinction, calculating extinction curves for diamond particles from Mie theory
12 p2157 A69-26230

Optical absorption cell with variable path length and temperature for measuring absorption coefficients of gases at low and high temperatures
12 p2093 A69-26482

Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
13 p2224 A69-28692

Sudden cosmic noise absorption in ionosphere confirming relationship with solar chromospheric flares
13 p2334 A69-28698

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
13 p2224 A69-28700

Seasonal variation in ionospheric radiation absorption related to time variation between sunrise and constant angle attainment of sun
14 p2437 A69-29072

Radio wave absorption coefficient in lower ionosphere related to total radiation absorption and electron concentration profile
14 p2411 A69-29075

UV radiation decreased transmittance through quartz exposed to plasma at high temperature and pressure, showing dependence on heated surface layer absorption
14 p2490 A69-29159

Ionospheric radio wave absorption at midlatitude, noting mesospheric zonal wind inversion
14 p2441 A69-29418

Neodymium laser having adjustable pulse duration and homogeneous spatial radiation structure developed by two photon absorption
14 p2460 A69-29670

Frequency dependence of light absorption by excitons obtained for allowed and forbidden zone transfers in semiconductors
15 p2632 A69-30057

Interstellar absorption and spatial distribution in northern Aquila with absence of early O-B2 stars, including luminosity function
15 p2683 A69-30513

CNA and geomagnetic pulsations observed by ground based instruments in southern auroral region occurring near geomagnetic noon, noting electron precipitation role
15 p2597 A69-30697

Two photon absorption excitation of luminescence in ruby crystals by neodymium laser radiation, determining luminous intensity dependence on pumping intensity
15 p2634 A69-30731

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 A, utilizing UV emission from crossed beam atomic collision
15 p2656 A69-31031

Nonresonant absorption and dispersion of microwaves by gases, studying gaseous mixtures, relaxation parameters, anomalous dispersion and temperature effects
15 p2654 A69-31219

Solar X rays intensity and spectrum effects on e layer critical frequency and D region ionospheric absorption
15 p2677 A69-31346

Laser radiation absorption by inhomogeneous overdense plasma, discussing effects of plasma expansion on energy coupling efficiency
16 p2818 A69-31679

Ruby laser output energy degradation due to pump light absorption by color centers, discussing roles of defects and impurities in center formation
16 p2795 A69-31697

Magnetotransport-electric effect, analyzing center motion of cyclotron orbit during photon and phonon absorption and current quantity
16 p2826 A69-31823

LF ground based absorption results compared with rocket measured D region electron density profiles
16 p2778 A69-32188

Increase or decrease in light absorption by plasma particles found dependent on laser intensity level
16 p2797 A69-32382

Spontaneous and stimulated aspects of light scattering by absorbing media, relating refraction index to temperature variations and external stresses
16 p2798 A69-32449

Ionospheric winter anomaly duration in height range of mesopause region based on zenith angle dependence of absorption at LF
16 p2782 A69-32456

Radio waves ionospheric absorption dependence on equivalent frequency, showing marked difference for summer and winter conditions
17 p2918 A69-32927

Cosmic radio emission absorption during IQSY at 24.6 MHz, relating diurnal variation of absorption and geomagnetic index F scatter occurrence
17 p2968 A69-33992

Ionospheric absorption and virtual heights relationships for electron density distribution in lower ionosphere, computing model profiles
18 p3125 A69-34248

Optical parametric oscillator output /signal/ frequency locked to absorbing atomic transition, discussing effective linewidth
18 p3133 A69-34263

Anomalous absorption of electromagnetic wave in collisionless dense cylindrical plasma beam in circular waveguide, noting electric field strength for energy transfer
18 p3101 A69-34621

Photodestruction rate of H molecules by absorption of Lyman or Weber band radiation in interstellar space calculated at various distances from early stars
18 p3204 A69-35351

Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethane, obtaining optical constants by Kramer-Kronig method
18 p3183 A69-35477

Plane electromagnetic wave diffraction on conducting sphere situated in absorbing nonuniform plasma layer
19 p3275 A69-36340

Electroabsorption oscillations in CdTe films compared with results of interband transitions theory
19 p3386 A69-36523

Hot electrons effect on Fe-doped CdTe optical absorption by measuring optical transmission vs photon wavelength at liquid helium temperatures
19 p3389 A69-36551

Optical and thermal attenuation of current induced by low energy electron bombardment in CdS crystal
19 p3392 A69-36727

Ruby laser-ultrahigh vacuum device for studying electron and ion emissions and light absorption of materials, noting influence of adsorbed gas layers
20 p3553 A69-37406

Lower ionosphere radiation absorption at 4.01 MHz determined using A-3 method in measuring radio wave field between radio transmitters
20 p3528 A69-37675

Cosmic radio emission absorption in D, E region and in F 2 layer above and below electron concentration maximum from vertical ionospheric sounding 1959 over Moscow
20 p3590 A69-37676

Ionospheric radio wave absorption seasonal and diurnal variations over Tiflis from pulsed ionospheric sounding at 2.2 MHz
20 p3491 A69-37677

Lower ionospheric effective electron collision number from cosmic noise recordings and radio wave absorption data obtained by vertical sounding rocket
20 p3528 A69-37679

Frequency dependence of radio wave absorption in ionosphere at 2.2-4 MHz by impulse method, noting effect of sporadic layer
20 p3491 A69-37680

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density
20 p3608 A69-38048

Emission kinetics of passive Q switched laser without constraints on relaxation time and switching characteristics of absorption centers and medium
21 p3740 A69-39550

Spectral dependence of optical absorption in InSb thin films under conditions of quantum dimensional effect, considering allowance for nonparabolic conduction zone
21 p3783 A69-39560

Spectrophotometric analysis of interstellar absorption in direction of IC 1805 cluster, noting anomalies
21 p3814 A69-39576

Absorption spectra from excited metastable states in tunable dye laser pumped atomic Ca, using fast flashlamp continuum
21 p3775 A69-39740

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption
22 p4008 A69-41104

Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data
23 p4174 A69-42192

Approximate expressions derived from Appleton-Hartree magnetoionics formula tested for validity in computation of radio wave absorption in model ionospheric layers
23 p4126 A69-42354

Ionospheric radio waves constant absorption term obtained from sunrise and sunset data
23 p4127 A69-42424

Ionospheric nondeviative radio wave absorption, noting roles of collisional and working frequencies and solar zenith angle
23 p4127 A69-42425

Laser hazard probability assessment in various applications, discussing power characteristics, attenuation by absorption and scattering and radiant energy spatial distribution
24 p4327 A69-42576

Ionospheric absorption relationship to major stratospheric sudden warmings, considering regional coincidence and interaction mechanism
24 p4306 A69-42680

Auroral vLF emission bursts simultaneous with sharp ionospheric absorption dip and SC deflections in geomagnetic H, noting corpuscular ionization
24 p4308 A69-43001

ELECTROMAGNETIC COMPATIBILITY

Pulse shape influence on electromagnetic compatibility and transmitter efficiency, discussing trapezoidal, raised-sine, sliced and complete error function shapes
01 p0030 A69-10631

Compatibility requirements and considerations of range telemetry tape crossplay operations, discussing major classes
07 p1133 A69-19117

Magnetic field susceptibility testing method as defined in DOD Electromagnetic Compatibility Control documents MIL-STD-461 and MIL-STD-462
17 p2947 A69-34133

Electromagnetic compatibility /EMC/ hardware design, discussing NDC 1060 computer configuration, requirements and service environment
17 p2947 A69-34136

Integrated systems testing for unmanned spacecraft electromagnetic compatibility, discussing identification and elimination of interference sources
21 p3683 A69-39438

High sensitivity communication system design consisting of radome enclosed steerable antenna, 500 kw transmitter and microwave configuration compatible with low noise receivers
23 p4149 A69-42131

Electromagnetic compatibility, - IEEE Conference, Asbury Park, New Jersey, June 1969
23 p4140 A69-42215

Natural and man-made radio noise measurements, including formula for calculating signal strength of coherent interference
23 p4126 A69-42217

Electromagnetic compatibility /EMC/ quantification in system effectiveness by decision analysis technique, constructing conceptual model
23 p4145 A69-42227

Colocated radio equipment time-sharing scheme for interference avoidance, describing switching method and sampling signal shape
23 p4142 A69-42228

Receivers EMC, discussing single parameter to evaluate susceptibility to desensitization, cross modulation and intermodulation
23 p4142 A69-42232

Electromagnetic compatibility /EMC/ filter design and test methods to achieve effectiveness and reliability, emphasizing transfer impedance characteristics
23 p4142 A69-42233

Airplane structure electromagnetic compatibility engineering problem including bonding, electrointerference suppression and static control considerations
23 p4063 A69-42234

ELECTROMAGNETIC CONTROL

U ELECTROMAGNETS

U REMOTE CONTROL

ELECTROMAGNETIC DEDUCTION

U MAGNETIC INDUCTION

ELECTROMAGNETIC FIELDS

NT FAR FIELDS

Einstein-Maxwell equations corresponding to superposed electric and magnetic fields stationary solutions, noting singularities in metric tensor
01 p0115 A69-10020

Multiphoton ionization cross section of atom via perturbed Green function, considering light wave electromagnetic field perturbing effects on atomic levels
02 p0283 A69-11539

Symmetric tensor of time averaged stresses for collisionless plasma in oscillating field derived by Maxwell equations
02 p0286 A69-11588

Electromagnetic fields in vacuum extended to fields in presence of matter, deriving field equations covariant under Lorentz proper and improper transformations
02 p0281 A69-12196

Light-light interaction in homogenous media ascribed to multilevel atomic system simultaneous excitation by both fields
02 p0258 A69-12637

Transverse radiation field distribution in CW laser found by geometrical optics approximation, assuming active two level medium and mode close to threshold
02 p0258 A69-12642

Electromagnetic oscillations in ionized plasma, assuming higher oscillation frequency than collision frequency
02 p0292 A69-12643

Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma conductivity and flow velocity for electron temperature and density
03 p0473 A69-12877

Electromagnetic diffraction theory for radar cross section of aircraft, missiles and satellites, discussing mathematical representation of electromagnetic field for extreme wavelengths
03 p0383 A69-12902

Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
03 p0474 A69-13114

Plasma equation of motion in external electromagnetic field analyzed as generalization of Bernoulli equation in relativistic MHD
03 p0476 A69-13385

Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors
03 p0467 A69-13755

Electromagnetic theory of gravitational forces unifying electromagnetic, meson and gravitational fields
03 p0469 A69-14096

Trouton-Noble experiment to detect motion of earth through ether by electromagnetic torque on charged suspended parallel plate capacitor, explaining null results
03 p0517 A69-14106

Driving point admittance of radiating aperture in infinite periodic planar phased array, determining coefficients of waveguide modal expansion and Floquet series
04 p0571 A69-14315

Electromotive force along magnetic field induced by liquid metal flow /alpha effect/, giving foundation for self excitation of electromagnetic field
04 p0635 A69-14547

Space-frequency correlation relationship of complex field fluctuations, amplitude and intensity to levels and phases of waves propagating in medium of random inhomogeneities
04 p0557 A69-14774

Noise stability of phase and amplitude information of regular interference pattern of electromagnetic field
04 p0557 A69-14775

Field theories and direct interparticle action theories of classical electrodynamics, establishing general correspondence between formalisms
04 p0631 A69-15189

Waveguide field of arbitrary cross section determined on models with quasi-static fields
05 p0717 A69-15635

Equations for frequency portions of electron-velocity distribution function in Lorentz plasma under influence of time periodic electromagnetic fields with two fundamental frequencies
05 p0800 A69-15743

Feynman rules for electromagnetic and Yang-Mills fields from gauge independent path dependent field formalism
05 p0794 A69-16363

Coupled waves in ferromagnetic and antiferromagnetic semiconductors in constant electric and magnetic fields, discussing spin, electromagnetic and plasma waves dispersion
05 p0809 A69-16548

Kinetic equation for plasma in external inhomogeneous nonstationary electromagnetic field, noting perturbation theory and Vlasov approximation
05 p0805 A69-16700

Electric and magnetic fields of narrow coherent polarized light beam in free space, noting longitudinal field components due to beam narrowness
05 p0777 A69-16789

Electromagnetic properties associated with presence of overlapping bands in pure superconductors, discussing temperature dependence
05 p0810 A69-16802

Mathematical description of electromagnetic field containing plasma, discussing energy transfer modes between plasma and containing field
06 p0965 A69-17517

Earth electromagnetic field micropulsations associated with proton flare, evaluating data from polar caps, auroral zones and midlatitudes
06 p0996 A69-17754

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric
06 p0968 A69-17763

Electromagnetic field induced energy and momentum changes effects on pressure, temperature and particle velocity of flows behind propagating gaseous detonation waves
06 p0970 A69-18084

Domain oscillations removal in n-type gallium arsenides by externally applied microwave field, noting doping effect on LSA conversion efficiency
07 p1196 A69-18446

Hydrogen arc in axially parallel magnetic field produces higher plasma temperatures by reduced thermal conductivity coefficient
07 p1189 A69-18489

Electromagnetic field strength of narrow polarized monochromatic light beam, noting spatial curvature and twisting in beam current line
07 p1147 A69-18524

Field diffraction at finite metallic surface represented in eigenfunctions of discrete spectrum, considering forced oscillations of open circuit
07 p1463 A69-19151

Electron anomalous magnetic moment effect on nonlinear Lagrangian of electromagnetic field, deriving additional nonlinear corrective term
08 p1353 A69-19781

Double diurnal oscillation of atmospheric pressure and vertical gradient of electromagnetic field, noting agreement between diagrams and role of atmospheric tides
08 p1306 A69-19866

Corrections to relativistic plasma thermodynamic functions associated with electromagnetic field effect, demonstrating inapplicability of Darwin Hamiltonian to problem
08 p1359 A69-19953

Electromagnetic fields and magnetic and dielectric constants in fiberglass reinforced polymers determined by treating polymers as ideal dielectrics
08 p1336 A69-20336

Electromagnetic field of infinite helical sheath, basing calculations on previous helical antenna studies
09 p1463 A69-21682

Temporal and spatial coherence effects of optical fields and relationship to multipole coherence effect
09 p1540 A69-22083

Magnetic field plane radiation patterns for tapered dielectric rod antennas computed by Schelkunoff principle, noting taper angle effect on lobes
09 p1464 A69-22097

Geometrized theory of combined gravitational and electromagnetic fields, using metric tensor of four dimensional Riemannian continuum to describe both fields
09 p1540 A69-22134

Maxwellian field and second order invariant system in vacuum in three dimensional Riemannian space with positive-definite metric, discussing Lorentz invariant equations
09 p1541 A69-22392

Cosmic charged particle acceleration in electromagnetic field described by vector and scalar potentials, constituting plane electromagnetic wave propagating along z axis
10 p1756 A69-22816

Solar activity effect on interplanetary electromagnetic field according to cosmic ray modulation data, noting ineffective correlation and solar wind effects
10 p1759 A69-22841

Relativistic energy momentum tensor of electromagnetic field in moving multicomponent dispersive media and instability of wave
10 p1653 A69-23193

Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659

Earth electromagnetic micropulsations in connection with July 7 1966 proton flare, discussing peculiarities in occurrence of pearls before and after flare
10 p1683 A69-23779

Matrix formulation of electromagnetic field equations and nonlinear conservation laws for measurable quantities
10 p1725 A69-24049

Weakly ionized gas in crossed electromagnetic fields, formulating Ohm law from Ginzburg equations
11 p1925 A69-24319

Coherence theory of electromagnetic field from classical/wave/ or quantum/particle/ standpoint, stressing information theory
11 p1915 A69-24455

Adiabatic theory of charged particle motion in electromagnetic field, applying asymptotic methods of nonlinear oscillations theory
11 p1948 A69-24857

External modulated currents induced electromagnetic field effect on density distribution of bounded plasma, discussing fluctuations in various configurations
11 p1927 A69-24910

Statistical properties of electromagnetic field diffracted by illuminated plane aperture studied in Fresnel zone on basis of partial coherence theory
11 p1836 A69-24978

Propagated ray paths plotted as functions of frequency and launch angle to predict signal dispersions
11 p1837 A69-25003

Charged particle motion in periodic electromagnetic field, constructing dynamic variables describing motion
11 p1927 A69-25100

Radiation emission by scalar particle in field of two plane linearly polarized electromagnetic waves propagating toward each other
11 p1900 A69-25568

Electromagnetic fields in cylindrically symmetrical microwave resonator filled with premagnetized ferrite along cylinder axis
11 p1855 A69-25625

Electromagnetic field penetration into plasma cylinder having electron mean free path comparable with plasma diameter, noting anomalous skin effect
12 p2133 A69-25833

Saddle point analysis of electromagnetic ground wave propagation in source excited field in waveguide formed by two parallel plate dielectrics
12 p2028 A69-25898

Steady equilibrium collisionless plasma in oscillating electromagnetic field, describing formalism for linear relation between perturbation and charges and currents induced in plasma
12 p2135 A69-26284

Laser active media polarization in strong electromagnetic fields, solving boundary value problems
12 p2110 A69-26907

Two photon and resonance parametric lasers nonlinear polarization theory, deriving equations for electromagnetic field oscillations
12 p2110 A69-26910

Electromagnetic field in idealized medium of uniformly curved gas lens for light beam waveguide, describing lens radius effects on incident beam spot
12 p2270 A69-27181

Radio wave propagation in anisotropic inhomogeneous medium, obtaining reflection and conversion coefficients and electromagnetic field distribution
13 p2218 A69-27182

Vlasov equations solved for electrons and ions in electromagnetic field, coupling electric field to density oscillation modes of plasma
13 p2306 A69-27461

Electromagnetic field induced plasma oscillation amplitude dependence on field frequency as function of field amplitude and discharge current at low N pressures
13 p2313 A69-28332

Variational method for time invariant states of collisionless plasma in oscillating electromagnetic field
13 p2314 A69-28365

Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant
13 p2300 A69-28450

Electric field distribution in TWT electron beam deflection system determined, accounting for current-voltage characteristics dependence on electromagnetic field distribution
13 p2237 A69-28582

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field
14 p2438 A69-29082

Time averaged stress tensor for ionized plasma in HF electromagnetic field, considering collisions
14 p2493 A69-29649

Si III and O II spectral lines distortion in pulse HF plasma in rotating electromagnetic field, showing particle rotational speed dependence on discharge chamber radius
14 p2497 A69-29791

Boundary problems solution for electromagnetic field two dimensional distributions in MHD channels at arbitrary magnetic Reynolds numbers, considering longitudinal terminal effects
14 p2500 A69-29906

Field equations for plane-parallel induction MHD machines with allowance for winding zone thickness and magnetic permeability of iron
14 p2405 A69-29914

Theory of field distribution in antenna aperture extended to scanning with desired shape beam
15 p2578 A69-30634

Integral equation for diffraction from infinitely extended grating as mixed boundary problem of electromagnetic field, discussing single anomaly
15 p2568 A69-30795

Plane monochromatic and pulsed electromagnetic waves penetration into metal cylindrical shells, deriving equations for electromagnetic field in interior
15 p2569 A69-30950

Weakly ionized plasma electron heating by interaction with HF electromagnetic field calculated using Boltzmann transport equation
15 p2665 A69-31480

Quasi-linear theory of waves in collisionless plasma in absence of external fields, relating wave energy growth and decay to plasma stability
16 p2817 A69-31646

Waveguide bends fields expressed in coupled local annular modes derived by evaluating differential scattering coefficients
16 p2760 A69-31943

Parametric interaction of electromagnetic field with spherical cavity having time variable radius, considering wave diffraction and TM oscillations
16 p2751 A69-32029

Electromagnetic fields in closed one dimensional resonators with oscillating boundary, analyzing amplitude buildup
16 p2751 A69-32030

Electromagnetic wave diffraction in plasma cylinder of small nonuniform radius, analyzing interior field and radio wave reflection
16 p2751 A69-32031

Waveguide field of arbitrary cross section determined on models with quasi-static fields
16 p2762 A69-32493

Electromagnetic field eigenvalues along conductive circular cylinder in magnetoionic medium, assuming lossless medium and field frequency not equal to cyclotron frequency
16 p2754 A69-32568

Laboratory plasma produced by electromagnetically generated shock front propagation through ionized hydrogen [AIAA PAPER 69-693]
17 p2945 A69-33447

Electromagnetic fields theory simultaneously determining vector electric and magnetic field aspects in terms of operator Green functions
17 p2924 A69-33833

Propagation in inhomogeneous and dispersive media, noting potential functions for vector electromagnetic field
17 p2924 A69-33838

Arbitrary electromagnetic field prediction based on spherical harmonics expansion method using field points measurement data, determining electromagnetic properties of environments
17 p2929 A69-33881

Electromagnetic field formulation of eigenvalue problem for optical coaxial dielectric waveguide, using computer root searching method
17 p2930 A69-33892

Polar ionosphere investigation based on vertical sounding and riometric observations, earth electromagnetic field and polar auroras spectrum intensity variations
17 p2963 A69-33950

Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations to charged particle motion in electromagnetic field, noting Onsager coefficients role
17 p3075 A69-34142

Electromagnetic induction in concentric thin shell-enclosed solid conducting sphere immersed in varying electromagnetic field [AFCRL-69-0082]
18 p3101 A69-34803

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis
18 p3180 A69-35017

Semiconductor plasma DC overheating instability in electric and magnetic fields, determining growth increments of oscillation amplitude
18 p3182 A69-35022

Radiation emission by molecules in electromagnetic field, considering cavity resonators and waveguides excitation
18 p3178 A69-35404

Hyperbolic EM microwave field used for contactless measurements of parabolic antenna surfaces
19 p3281 A69-35766

Ponderomotive forces and sudden irregularities in earth rotation, discussing core-mantle electromagnetic coupling and toroidal field induction effects
19 p3302 A69-35769

Parametric conversion kinetics of monochromatic light waves in nonlinear crystals, using quantized electromagnetic field to study amplification and generation
19 p3332 A69-35870

Wave equation of electromagnetic field of optical resonator with arbitrary mirrors, utilizing Schroedinger equation and equivalent mechanical system
19 p3333 A69-35880

Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution

19 p3315 A69-36824

Electromagnetic field of horizontal LF electric dipole formed by thin ionosphere layer between anisotropic planes

20 p3521 A69-37047

Terrestrial electrical conductivity measurement from electromagnetic field variations determination by geomagnetic sounding

20 p3522 A69-37058

Stationary electromagnetic wave fields LF behavior, discussing integral operators, incident and tangential fields, single valued solutions, etc

20 p3487 A69-37071

Singular electromagnetic field rectilinear and elliptical polarization in general relativity, calculating light plane rotation in Schwarzschild space

20 p3576 A69-37431

Vertically moving ionospheric disturbances altitude estimated from geomagnetic pulsations in earth electromagnetic field

20 p3528 A69-37686

Received electromagnetic fields fluctuations due to transhorizon propagation, emphasizing fading- tropospheric turbulence correlation and rapid fluctuations due to small scale index variations

20 p3494 A69-37810

Electromagnetic waves attenuation and field structure within gas filled dielectric waveguide tube, tube walls and waveguide surroundings

21 p3674 A69-39123

Synoptic study of worldwide VLF electromagnetic wave fields distribution above ionosphere from Ariel 3 observations

21 p3717 A69-39262

Constitutive equations for homogeneous viscous fluid and Kelvin-Voigt viscoelastic solid in electromagnetic field, using linear irreversible thermodynamics and continuum mechanics

21 p3851 A69-39289

Field equations for electromagnetic radiation propagation in accelerated systems including dispersive and nonisotropic media

21 p3772 A69-39466

Level shifts and spontaneous transitions in steady state of universe by path integral method of first quantization, considering time symmetric electromagnetic theory

22 p3980 A69-40169

Electrical properties of semiconductors in HF electromagnetic field, showing Dember type EMF dependence on carrier response to field inhomogeneity

22 p3993 A69-40605

Electron-positron pair formation in electromagnetic field created by coherent laser light focused into vacuum with ideal lens

22 p3965 A69-41116

Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point

22 p3996 A69-41164

Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport

23 p4190 A69-41357

Rumanian book on MHD covering electromagnetic field theory, motion equations, laminar flow, MHD generators, fluid motion past thin airfoils, shock waves, etc

23 p4195 A69-41363

Accelerated motion influence on onboard vertical gyro with design based on free astatic gyro with electromagnetic compensation

23 p4163 A69-41553

Ionosphere reflected radio waves field strength measurements, obtaining formula for ground wave discrimination

23 p4123 A69-41861

Ridge-slot-ridge slow-wave structures used in multibeam TWT/traveling wave tube/, analyzing E type electromagnetic dispersion as function of system parameters

23 p4140 A69-42049

High intensity electromagnetic fields generation equipment for calibrating field intensity monitors, discussing anechoic chamber, transmitting antenna, etc

24 p4312 A69-42577

ELECTROMAGNETIC INTERACTIONS

NT PLASMA-ELECTROMAGNETIC INTERACTION

Resonance energy transfer mechanism in Forster-Dexter theory of electron energy transfer by resonance

interaction in condensed media, using many particle treatment

01 p0121 A69-11257

Electromagnetic waves parametric interactions during unsteady Josephson effect as function of wavelength ratio, magnetic field penetration and contact dimensions

02 p0293 A69-11464

Electromagnetic field interaction with polarizable elastic medium in gravitation theory resolves definition of electromagnetic energy in matter

02 p0279 A69-11537

Weak signal interaction between electron beam and microwave resonators, obtaining electron conductance, gain and transfer admittance

02 p0208 A69-12265

Light-light interaction in homogenous media ascribed to multilevel atomic system simultaneous excitation by both fields

02 p0258 A69-12637

Unsteady phenomena during light pulses interaction in media with polarization, considering group delay, dispersion spreading and space-time analogy

02 p0259 A69-12646

Generation of UHF space charge waves by nonlinear interaction of two microwave signals in magnetoplasma, predicting optical mixing

03 p0475 A69-13146

Model for predicting characteristics of short duration intense microwave pulse propagating in heated high temperature air

04 p0634 A69-14453

Total conserved momentum-energy of electromagnetic interaction of system of point charges in Wheeler-Feynman theory, noting mass defect of connected system

04 p0631 A69-15058

Interaction between point charges in Wheeler-Feynman electrodynamics, noting impossibility of deducing momentum and energy conservation from variational principle

04 p0631 A69-15059

Field theories and direct interparticle action theories of classical electrodynamics, establishing general correspondence between formalisms

04 p0631 A69-15189

Multielement antenna array radiators interaction taking into account edge effects

05 p0727 A69-15638

Modulation of galactic cosmic rays due to electromagnetic conditions of interplanetary space, considering time variations and Parkers model

06 p0989 A69-17287

Small signal coupled mode analysis including relativistic effects for studying spiraling electron beam interaction with fast wave circuits

07 p1114 A69-18436

S matrix theory of electromagnetic interactions, obtaining equivalence of results with quantum electrodynamics by choice of subtraction constants

08 p1351 A69-20211

Collective interactions of electromagnetic waves in plasma, discussing light scattering from electron fluctuations, stimulated emission and anomalous absorption

08 p1361 A69-20220

Slow distribution function of magnetoactive plasma, deriving kinetic equation in quasi-linear approximation for analyzing particle-HF electromagnetic wave interactions

08 p1365 A69-20550

Plasma transport properties derived from Boltzmann equation using Debye shielded Lande potential to represent collisions, noting viscosity and thermal conductivity

09 p1553 A69-22539

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain

10 p1727 A69-23101

Total energy-momentum interaction of system with mass defect in Wheeler-Feynman theory of electromagnetic interaction, demonstrating existence of gauge invariance

11 p1915 A69-24326

Pulsed molecular nitrogen laser positive UV and IR systems interaction under varying gas pressure, applied voltage and tube diameters

11 p1893 A69-24346

Quantum oscillators interaction with two level molecules system in circular laser

11 p1899 A69-25325

Laser active media polarization in strong electromagnetic fields, solving boundary value problems

12 p2110 A69-26907

Two photon and resonance parametric lasers nonlinear polarization theory, deriving equations for electromagnetic field oscillations

12 p2110 A69-26910

Model for perturbations in earth rotation and geomagnetic core-mantle coupling, discussing electromagnetic restoring torque

12 p2077 A69-27110

Shear stress and velocity profile in MHD duct, examining turbulence damping by electromagnetic coupling

13 p2309 A69-28024

Optical maser induced electrical breakdown interaction with superhigh pressure ionized gases, using optical interferometry and holography

13 p2273 A69-28464

Weakly divergent intense light beam propagation in laminar optically inhomogeneous medium with self focusing possibility analyzed by perturbation theory

13 p2223 A69-28568

Current distribution along linear antenna array taking into account interaction between neighboring elements and effect on antenna radiation characteristics

13 p2236 A69-28572

Spatial harmonic spectrum and tangential field distributions in microwave devices showing separation of higher harmonics through delay structure

13 p2236 A69-28576

Equations describing interaction between HF and LF waves propagating in nonlinear dispersive medium, obtaining approximate solutions

15 p2568 A69-30733

Electromagnetic muon-nucleon interaction explanation for observed horizontal air showers, reexamining shower data in view of triplet particles

15 p2678 A69-31498

Injection semiconductor lasers emission characteristics, discussing gallium arsenide diodes, nonlinear losses in pulsed mode, laser interactions, etc

16 p2796 A69-31949

Electromagnetic vibration exciters based on permanent magnet and AC coil interaction

16 p2790 A69-32077

Spontaneous and stimulated aspects of light scattering by absorbing media, relating refraction index to temperature variations and external stresses

16 p2798 A69-32449

Multielement antenna array radiators interaction taking into account edge effects

16 p2762 A69-32496

Current distribution and scattering cross section of missile with plume/ionized trail/of tapered conductivity due to plane wave electromagnetic excitation

17 p2921 A69-33671

Nonresonance parametric phenomena in distributed systems, discussing interaction between signal and parameter wave at superlight velocity

17 p2928 A69-33868

Electromagnetic and cyclotron waves interaction across opaque boundary in moving plasma in one dimensional approximation

18 p3181 A69-35027

Mathematical methods for quantum mechanical problems caused by electromagnetic field interaction with matter

18 p3175 A69-35402

Plane electromagnetic wave interaction with moving conductive dielectric medium to obtain reflection and transmission coefficients, noting energy transfer

18 p3105 A69-35486

Coherent radiation generation using gas lasers, analyzing interaction between EM radiation and matter

19 p3335 A69-36067

Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena

19 p3376 A69-36174

Soviet book on quantum electronics covering electronic devices, nonrelativistic quantum mechanics, radiation field and matter interaction, black body radiation spectra, etc

20 p3556 A69-38210

Transverse wave-beam interaction propagation in fast wave structure in finite homogeneous magnetostatic field, deriving wave-beam equation for nonrelativistic beams

21 p3672 A69-38435

Interaction between modes of radiation field and active medium in laser with nonresonant feedback, discussing amplitude stabilization of total radiation

21 p3735 A69-38581

ELECTROMAGNETIC INTERFERENCE

Dimensionless coupling constants predicted from causal relationship among strong, electromagnetic, weak and gravitational interactions in fluid region of universe
22 p3981 A69-40416

Quantum optics or electronics, discussing electromagnetic waves control and interactions with matter, maser oscillators theory and characteristics, nonlinear optics, induced transparency, etc
23 p4174 A69-42315

Coil under alternating current interacting with laminated conducting structure, giving recurrence formula for calculating deflector voltage
24 p4296 A69-42653

ELECTROMAGNETIC INTERFERENCE

NT ATMOSPHERICS
NT BLACKOUT [PROPAGATION]
NT COSMIC NOISE
NT CROSSTALK
NT DAWN CHORUS
NT HISS
NT IONOSPHERIC CROSS MODULATION
NT IONOSPHERIC NOISE
NT IONOSPHERICS
NT JAMMING
NT POLAR RADIO BLACKOUT
NT RADIO FREQUENCY INTERFERENCE
NT SHOT NOISE
NT SUDDEN ENHANCEMENT OF ATMOSPHERICS
NT THERMAL NOISE
NT WHISTLERS
NT WHITE NOISE

Phase locked loop demodulators for binary PSK signals compared with and without decision directed feedback in presence of CW interference
03 p0409 A69-13201

Sunrise modal interference patterns for VLF propagation, analyzing variations with latitude
03 p0396 A69-13628

Uniform asymptotic expansion series for saddle point integrals applied to probability distribution in noise interference problems
03 p0398 A69-13832

Noise stability of phase and amplitude information of regular interference pattern of electromagnetic field
04 p0557 A69-14775

Decoupling techniques for antennas on aerospace vehicles, noting effects on far field radiation pattern and antenna gain
05 p0729 A69-15977

Nonpolarized single frequency gas laser radiation produced by interferential effects in complex resonator
07 p1149 A69-18936

Electromagnetic interference (EMI) created by noise coupling through conductive paths, discussing responsibility for control within systems management
07 p1079 A69-18944

Thermal noise and other disturbances from mismatched two port isolator in low power microwave transmission antenna noise between generators and leads
07 p1108 A69-19486

Signal interference criteria in considering frequency sharing between communication satellite systems and terrestrial radio services
09 p1449 A69-21273

Earth station antenna radiation patterns for studying mutual interference effects between radio relay stations and communication satellite earth stations
09 p1461 A69-21282

Constant amplitude in-band additive interference for analysis of PSK signals in Gaussian noise, discussing coherent and differential detection
09 p1455 A69-21848

Equal inclination interference fringes effects on laser beam reflection from plane parallel glass plates, evaluating angular distance between adjacent fringes
11 p1896 A69-24840

Graphs determining interference levels for optimum shielding, suppression, signal parameters and waveforms for pulses, step functions, CW signals and for military technology
12 p2030 A69-26471

Received signal phase angle error probability in coherent PSK system in Gaussian noise and interference
13 p2219 A69-27665

Limiting incoherent or coherent interference signals at frequency of biphasic or quadriphase digital signal
14 p2413 A69-29483

Calibration of interference measuring instruments, stressing input impedance calibration of field intensity meters
15 p2577 A69-30375

Electromagnetic interference correction for airborne telemetry, illustrating actual and simulated data for interfering source signatures identification
16 p2754 A69-32575

Active antenna impedance matching network constituting low noise device for electromagnetic interference measurements useful for automatic or manual scanning
17 p2943 A69-34131

Airborne communication receiver solid state interference blanker circuitry comprising black box insertable between antenna and RF input
17 p2943 A69-34132

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer
19 p3373 A69-36053

Integrated systems testing for unmanned spacecraft electromagnetic compatibility, discussing identification and elimination of interference sources
21 p3683 A69-39438

Electromagnetic waves emission intensity in one dimensional resonator, allowing for wave interference effects
22 p3966 A69-41172

Recursion formula for multilayer interferometer derived, with allowance for multiwave interference, to calculate resonant circuit maxima and minima
23 p4165 A69-41729

Linear filtering effects in channel with binary direct sequence antipodal biphasic modulation in presence of white noise and sinusoidal interference, noting variance
23 p4122 A69-41774

Electromagnetic interference (EMI) characteristics of various digital logic ICs
23 p4141 A69-42219

HF receiver interference blanker, discussing limiter-blanker system, integration, effectiveness and squelch circuit
23 p4141 A69-42221

Interference prediction models of equipment emissions and susceptibility thresholds based on limited spectrum signature data
23 p4126 A69-42223

Aircraft antenna-coupled electromagnetic interference analysis, describing mathematical model for frequency coincidence, power levels and receiver thresholds
23 p4141 A69-42224

Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference
23 p4145 A69-42230

ELECTROMAGNETIC MEASUREMENT

Continuous laser beam power output meter based on wire resistance thermometry method
01 p0081 A69-10822

Lunar electrical parameters range determination using models [AAS PAPER 68-199]
02 p0312 A69-11477

Wave measurements of normal electric field and tangential magnetic field over microwave disk antenna surfaces
02 p0219 A69-12342

Electromagnetic phase measurement for determining integrated air density near earth surface
04 p0598 A69-14910

Disturbing TM mode generation effect on attenuation measurement accuracy in TE mode attenuators
08 p1283 A69-20126

Large aperture satellite communication antenna gain measurement technique, using extraterrestrial radio wave source or satellite
09 p1456 A69-22116

One way measurement of dual inband frequency diversity improvement on HF ionospheric path with frequency division multiplexed FSK modulation
10 p1656 A69-23536

Red shift hypothesis postulated on perfect cosmological principle and uniqueness of electromagnetic wavelength measurements, showing agreement with astronomical data
11 p1961 A69-25108

Precision electromagnetic measurements - IEEE Conference, Boulder, June 1968
12 p2037 A69-26046

Microwave measurement methods, discussing uses of digital computers and sampling techniques
13 p2223 A69-28605

Varactor diode parameters measurements by microwave power reflection method
13 p2237 A69-28645

Incoming IR flux measurements at high altitude, noting flux increase due to water vapor condensation in troposphere
13 p2256 A69-28647

Line of sight atmospheric path measurements for atmospheric inhomogeneities, using phase quadrature, microwave and near IR techniques
14 p2415 A69-29516

Worldwide observation of atmosphere with occultation satellites, correcting orbit perturbations to obtain air pressure
14 p2447 A69-29517

Radio pulse sounding of ionospheric structure and motions, discussing digital ionosonde, data analysis methods, etc
14 p2415 A69-29519

FM measurements of angle distortion introduced by single pole bandpass filters compared to theoretical distortion
14 p2416 A69-29552

Design and electrical features of microwave measurement system for solid state spectroscopy, discussing waveguides, signal source, detector, etc
15 p2610 A69-30709

Electromagnetic accelerometer with symmetrically placed photocells detecting small steel ball position
17 p2971 A69-32897

Cosmic X rays diffused component absolute intensity measurement using rotating collimator borne on sounding rocket, noting flat spectrum and Sco X-1 intensity variation
17 p3023 A69-33068

Arbitrary electromagnetic field prediction based on spherical harmonics expansion method using field points measurement data, determining electromagnetic properties of environments
17 p2929 A69-33881

Active antenna impedance matching network constituting low noise device for electromagnetic interference measurements useful for automatic or manual scanning
17 p2943 A69-34131

Pulsar PSR 0833-45 polarization structure frequency dependence measurement leading to model implying radiation emanated from magnetic poles neighborhood
18 p3202 A69-35215

Tunnel diode coupling with spheroidal resonant cavity, describing method of measuring elements for interpretation
19 p3283 A69-35998

Telemetry transmitter-receiver RF links quality determination, emphasizing nonlinear effects measurement by notch noise tests
19 p3270 A69-36239

Radio measurement methods and standards including measurements of attenuation, phase shift, time delay, impedance, field strength, antenna characteristics, RF properties of materials, etc
19 p3276 A69-36426

OGO-F electric and electromagnetic fields measurement for ionosphere using dipole antenna, emphasizing broadband observation covering whistler mode waves
19 p3284 A69-36677

Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results [AIAA PAPER 69-840]
21 p3686 A69-39371

Electromagnetic catheter flowmeter with flexible sensor suitable for branch and artery application to minimize surgical intervention
22 p3889 A69-40058

Electromagnetic cascade showers transition effect in various materials, measuring energy deposition as function of position
22 p3987 A69-41003

Accuracy standards for diffraction measurements of electromagnetic waves incident on periodic arrays, using monochromatic field and plane phase wavefront
23 p4139 A69-42042

Near field effects on accuracy of LF shielded enclosure measurements compared to open field environment
23 p4141 A69-42226

Air density determination using transit time method involving microwave phase measurements
24 p4313 A69-42898

ELECTROMAGNETIC NOISE

NT ATMOSPHERICS
NT COSMIC NOISE
NT DAWN CHORUS
NT HISS
NT IONOSPHERIC NOISE
NT IONOSPHERICS
NT SHOT NOISE

NT SUDDEN ENHANCEMENT OF ATMOSPHERICS
NT THERMAL NOISE
NT WHISTLERS

Direct couplings of autonomous noisy quadrupoles used for noise matching

01 p0043 A69-10591

Digital matched filtering technique for RF interferometer employing carrier modulated by pseudonoise sequence, discussing applications to antenna arrays

01 p0048 A69-11003

VLF electric field measurements from 1 AU heliocentric orbit, noting field oscillations in solar wind and large amplitude HF noise bursts

01 p0035 A69-11224

RF feedback amplifier analytical design, deriving open and closed loop feedback noise figure expressions by use of equivalent noise model

02 p0217 A69-12150

Microwave transistor noise figure, power gain and noise measure as function of source admittance and source reflection coefficient in L and S bands

02 p0219 A69-12427

Noise performance of broadband traveling wave masers with longitudinal or transverse stagger tuned magnetic field

02 p0257 A69-12428

Simultaneous measurement of gain and noise of linear two port device using noise generators as signal sources

02 p0210 A69-12430

Radiometric measurement of attenuation, emission and noise fluctuations due to earth atmosphere in 4 cm to 8 mm range

02 p0210 A69-12432

Calibration of coaxial line noise sources in terms of rectangular waveguide standard, discussing use of adapter for comparison

02 p0210 A69-12436

X band radiometer to minimize errors in calibration of microwave noise sources

02 p0220 A69-12440

Matrix representation of linear active two port noise figures and charts in terms of power wave variables

02 p0211 A69-12444

AM and FM noise in mutually synchronized oscillators

02 p0220 A69-12449

Microwave oscillator AM and FM noise measurement using Schottky barrier diode detector, discriminator, storage oscilloscope and wave analyzer

02 p0220 A69-12453

AM/PM noise conversion in solid state FM microwave signal sources, relating baseband noise power contribution to PM baseband noise power

02 p0212 A69-12462

Clutter rejection using coded burst waveform for airborne early warning /AEW/ and airborne attack type radars

03 p0388 A69-13185

Noiseproof ionization manometer with ion current dual modulation for ultrahigh vacuum measurement in magnetic field with extraneous charged particles interference

03 p0429 A69-13263

Time dependent photoelectron multiplier with low noise for recording long wave laser light pulses

03 p0440 A69-13264

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception

03 p0394 A69-13376

Atmospheric noise amplitude distribution relation to rms phase errors in frequency components of VLF timing pulse

03 p0396 A69-13629

Sensitivity of radio receiver detecting weak sinusoidal and noise signals by counting zero crossings by envelope or phase of signal sum

03 p0405 A69-13717

Multiplication effects on noise in Si avalanche diodes, noting high resolution apparatus for measurement of spatial variations

04 p0573 A69-14332

Schottky barrier mixer diodes and point contact diodes failure, discussing criterion for degradation of noise figure, 1/f noise and reverse breakdown voltage

04 p0574 A69-14352

Onsager reciprocity relations applied to thermodynamics of nonlinearity and noise in diodes

04 p0574 A69-14435

Noise stability of phase and amplitude information of regular interference pattern of electromagnetic field

04 p0557 A69-14775

Etched manganin gauge for shock pressure measurement in high noise environments containing radiation and electromagnetic effects

04 p0603 A69-15431

Low noise shaped beam Cassegrain antenna design for space communications earth station service, noting gain/noise temperature figure and antenna construction

05 p0728 A69-15669

Traveling wave maser and cooled parametric amplifier for ultralow noise preamplification in satellite communication earth terminal installations

05 p0728 A69-15670

Expression derived for correlation function and power spectrum of bearing of set of point radiators, taking into account receiver internal noise

05 p0719 A69-16219

Noise sources representation in pumped nonlinear systems simplifies noise analysis and noise propagation

05 p0720 A69-16345

Measurement methods at IF and baseband sections of microwave links, calculating noise superimposed on each swept measurement curve

05 p0722 A69-16728

Noise measure formula for negative resistance amplifiers imbedded in lossy passive network

05 p0735 A69-16731

Noise description of linear n ports obtainable from spot noise parameters of two ports formed from n port

05 p0741 A69-16732

Noise generation mechanism of Read microwave avalanche diode under large signal conditions

06 p0895 A69-17472

Error and noise sources in analog differentiators, discussing signal distortion minimization techniques and augmentation with linear phase filter

06 p0897 A69-17702

Probe noise in quiescent plasmas investigated using back diffusion type discharge tubes producing low density plasmas and positive plasma columns

06 p0967 A69-17715

Cosmic radio noise absorption in ionosphere, discussing diurnal, seasonal and longer variations of integral absorption

06 p1008 A69-17727

Silicon double injection diode, discussing HF noise measurement, Nyquist noise equivalent circuit for double injection process and source of LF noise

06 p0898 A69-17762

Q factors dependence of IMPATT diode oscillator FM noise, noting excess noise temperature correlation with diode current

06 p0899 A69-17826

Fluctuation phenomena in electromagnetic field in optical spectral region and coherence characteristics of optical fields, analyzing quantum noise

06 p0937 A69-18011

Noise characteristics of transistorized feedback amplifier stages for application in amplifier design

07 p1090 A69-18284

Transistor HF noise factor measurement by semiautomatic device with saturated diode comparison noise source heater current automatically controlled

07 p1090 A69-18292

FM noise in two and three chamber klystron oscillators, discussing tubes to reduce noise and relative merits of active or passive stabilization circuits

07 p1096 A69-18438

Wideband uncooled two stage reflecting parametric amplifiers with low noise temperature, noting application to space stations for telecommunications by satellites

07 p1099 A69-18463

Statistical study of solar radio flux fluctuations incidence, observing absorption and polarization effects

07 p1215 A69-18819

Injection locking method for reducing FM noise in Gunn effect oscillators

07 p1102 A69-18862

Linear noisy two port preceded by nonreciprocal lossless network analyzed, showing existence of associated quantity invariant under lossless transformation

07 p1104 A69-18891

Q switched laser quasi-periodic short pulse emission pattern evolution from broadband noise source, using fluctuating dipole model

07 p1149 A69-18897

Electromagnetic interference /EMI/ created by noise coupling through conductive paths, discussing responsibility for control within systems management

07 p1079 A69-18944

Radio noise generation in topside ionosphere, noting Cerenkov radiation from intense soft fluxes of auroral electrons

07 p1127 A69-19257

Semiconductor diode noise experimental measurements indicating fluctuation-dissipation theorem /FDT/ inapplicability to all quasi-equilibrium systems

07 p1113 A69-19596

Spectral distribution of intermodulation noise of AM and FM transmission systems calculated by probability theory

08 p1271 A69-19916

Thermal feedback generation of 1/f-flicker noise in bipolar transistors, deriving formula for flicker noise voltage of emitter junction

08 p1283 A69-20129

Interference noise in communication satellite receivers and terrestrial radio relay receivers, noting interference reduction transfer factor

09 p1450 A69-21279

Microwave power and low noise transistors, noting continuous wave output and circuit design

09 p1462 A69-21407

Optical parametric noise in water by ruby laser beam for phase matched four photon process

09 p1539 A69-21751

Book on communication theory principles covering Fourier transformation, signal transmission, electromagnetic noise, amplitude, phase, frequency and pulse modulation, etc

09 p1454 A69-21801

Noise factor of two port in terms of various sets of noise parameters and source immittances, giving table for conversion formulas

09 p1455 A69-21897

Tunnel diode amplifier operation in presence of noise

09 p1469 A69-22630

Sporadic noise, false fronts and other noise effects on phase of output oscillations of resonance apparatus

09 p1460 A69-22641

Noise in instrumentation systems, considering coupling and current noise source and reduction by isolation and filtering

10 p1691 A69-23231

Zero crossing statistics measurements for 1/f noise, noting statistically stationary character of probability density distributions of interval spacings between zero crossings

10 p1656 A69-23657

Variance fluctuations of 1/f noise and relation to sample number and lower cut-off frequency, noting nonstationarity hypothesis

10 p1656 A69-23661

Output pulse duration calculation for compressing filter in presence of pulse or continuous FM noise, using parallelogram of arguments method

11 p1844 A69-24445

DC conversion amplifier commutation induced noise and signal ratio as function of shunt capacitance across vibrator load investigated for increased noise stability

11 p1845 A69-24555

Energy gain during diversity reception in presence of random noise calculated, considering signal and noise amplitudes Rayleigh fluctuations

11 p1835 A69-24968

Transmitter frequency increase effect on production of artificial stimulated VLF emissions in magnetosphere

11 p1878 A69-25156

Microwave amplifiers and receivers noise performance factors measurement noting thermal noise, definitions of noise temperatures and noise figure, noise generators, etc

11 p1840 A69-25301

Kalman equations of optimal recursive filter for linear discrete system extended to continuous system through limiting procedure

11 p1859 A69-25408

Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion

11 p1841 A69-25634

LF noise mechanism for forward biased semiconductor p-n junction, noting charge carrier capture in electron traps of carrier depleted region

11 p1857 A69-25705

Laser emission noise and voltage noise cross correlation coefficient for CW GaAs laser diodes at 77 K, noting strong dependence on bias current

12 p2038 A69-26328

Up-converter IR detector noise characteristics for pulse and CW signal detection compared with photoconductive detector

12 p2029 A69-26329

Noise sensitivity of space diversity reception system with narrow beam electrically switchable antennas for incomplete beam separation

12 p2030 A69-26485

LF generation-recombination noise in MOS transistors with depletion region impurity centers, analyzing noise resistance saturation and drain-voltage dependence
12 p2041 A69-26627

LF wave propagation and emission in magnetosphere, discussing steady noise and discrete emissions
12 p2072 A69-26745

Microwave radiometric brightness temperature relationship to soil moisture content for estimating bearing strength
12 p2099 A69-27008

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise
13 p2317 A69-27876

Nuclear explosions electromagnetic effects on electronic systems, considering signals emitted from fireball and signal attenuation by changed atmospheric propagation
13 p2234 A69-28344

Noise stability of nonoptimal radar detection system for noise and FM signals, deriving expressions for optimal spectral width
13 p2222 A69-28508

Algorithm for hypothesis optimal tests by series during signal detection in presence of noise
13 p2222 A69-28509

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
14 p2410 A69-28826

Radio noise of auroral origin analyzed from Northern and Southern Hemisphere reports indicating correlation with auroras, magnetic activity, sunspot cycles and synchrotron radiation
14 p2411 A69-29108

FM discriminator click widths probability distribution function, defining click widths duration from input noise considerations
14 p2422 A69-29553

Frequency distribution and statistical characteristics of high level RF noise produced by high pervance electron beam of magnetron injection gun (MIG)
14 p2449 A69-29558

Electromagnetic noise radiation structure during lightning flash by measuring time duration distribution between pulses
14 p2445 A69-29885

Noise fluctuations transport in convergent flow crossed field electron guns using Monte Carlo method for two dimensional computerized gun simulation
15 p2572 A69-30031

Potential noise stability of reception in binary communications system with active pause in channel for unknown signal arrival time
15 p2563 A69-30134

Pulsed noise sensitivity in radar receivers having noise limiter for simple and complex signals
15 p2563 A69-30137

Noise parameters at output of logarithmic detector separating two AM signals with overlapping spectra
15 p2564 A69-30148

Correlated noise effect on accuracy of suboptimal servosystem velocity measurements from recording Doppler frequencies
15 p2567 A69-30341

Three dimensional effects of potential minimum near cathode emitting axisymmetric beam, relating electric fields distribution to noise reduction coefficient
15 p2568 A69-30794

Noise signals in earth magnetosheath interpreted as electromagnetic waves propagating in whistler mode
16 p2774 A69-31985

Electromagnetic noise in current sheet in geomagnetic tail, discussing effects on distribution function [AFCLR-69-0395]
16 p2781 A69-32317

System noise parameters derivation, using standard IRE definition as foundation and amplifier noise measurement as example for error analysis
16 p2755 A69-32800

Geomagnetic field effects on microwave noise spectrum in earth-ionosphere resonator, calculating field energy spectrum near resonance maximum, discussing excitation by lightning
17 p2918 A69-33034

Noise levels due to long range tropospheric transmission calculated for microwave radio systems
17 p2919 A69-33146

VHF band surface incidental radio noise levels over metropolitan areas compared with airborne data
17 p2921 A69-33672

Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes
17 p2921 A69-33685

State space structure of model reference adaptive control and parameter tracking systems subject to noise
18 p3111 A69-34686

Terrestrial radio noise source aspects including atmospheric, propagation influence, lightning-generated noise and whistlers, radio interference, etc
19 p3276 A69-36434

He-Ne laser discharges noise and oscillations classified, investigating interaction between intrinsic oscillations
19 p3338 A69-36605

O stars spectrograms study for luminosity and temperature criteria
20 p3598 A69-37463

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections
20 p3608 A69-38050

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise
21 p3782 A69-39142

Transistorized low noise reception antennas with built-in amplifying elements, discussing radiation patterns and noise problems
21 p3683 A69-39264

Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results
21 p3686 A69-39371

Handbook of radar measurement covering noise measurement, error analysis, antenna performance, etc
21 p3678 A69-39668

Radio emission data from 20 May 1966 partial solar eclipse, giving radio noise and brightness distribution data
22 p4010 A69-39986

Discrete delay line measuring FM noise, discussing special case of narrow band cavity resonator method
23 p4137 A69-41606

Analyzing conditions for variable magnetic and electric noise occurrence at input of nuclear precession magnetometer used in field strengths measurements
23 p4165 A69-41852

Noise elimination by filtering in high power microwave transmitters, noting practical design tradeoffs
23 p4142 A69-42235

NT STELLAR LUMINOSITY
NT TRANSMISSIVITY
NT TRANSMITTANCE
NT TRANSPARENCY
NT TURBIDITY

Electromagnetic properties of bounded isotropic plasma in kinetic approximation
03 p0477 A69-13712

Two band model for determining linear and nonlinear electromagnetic responses of small band gap semiconductors in magnetic field
03 p0487 A69-13753

Electromagnetic field strength of narrow polarized monochromatic light beam, noting spatial curvature and twisting in beam current line
07 p1147 A69-18524

VLF wave electromagnetic properties in magnetosphere, noting whistler mode propagation and refractive index and electron density of medium
08 p1306 A69-20180

Intensity distribution in principal mode of TEM oscillations at various gain amplification levels, plotting intensity distribution generated by argon ion CW laser
09 p1520 A69-22685

Radiative heat transfer, discussing electromagnetic theory, transfer between surfaces and simultaneous conduction, convection and radiation
13 p2376 A69-28140

Electromagnetic wave scattering from conducting bodies of arbitrary shape and electromagnetic properties
17 p2918 A69-33002

Arbitrary electromagnetic field prediction based on spherical harmonics expansion method using field points measurement data, determining electromagnetic properties of environments
17 p2929 A69-33881

Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions
21 p3794 A69-38379

ELECTROMAGNETIC PROPULSION

Electromagnetic thrust equations for coaxial MPD accelerator, noting role of externally applied magnetic field [AIAA PAPER 69-108]
06 p0972 A69-18197

Electric rocket propulsion, discussing roles of plasma and gas discharge physics in development of electromagnetic, electrostatic and thermoelectric nuclear systems
13 p2325 A69-28253

Nuclear rocket propulsion operation, design, properties and performance of electrostatic, electrothermal and electromagnetic systems
13 p2297 A69-28254

Helicopter powering and positioning by CW microwave beam, describing antenna and sensor arrays, feasibility experiments, system applications, etc
23 p4063 A69-42534

ELECTROMAGNETIC PULSES

Plane monochromatic and pulsed electromagnetic waves penetration into metal cylindrical shells, deriving equations for electromagnetic field in interior
15 p2569 A69-30950

Atomic coherence and inhomogeneous broadening effects on laser amplifier ultrashort electromagnetic high peak power pulses
15 p2635 A69-31239

Electromagnetic echo generation in collisionless spatially homogeneous plasma dependence on velocity distribution and magnetic interaction
16 p2818 A69-31677

Laser amplifier nonlinear losses effect on light beam propagation, studying arbitrary waveform development into asymptotic steady state pulse /SSP/
16 p2797 A69-32043

Gravitational effect of electromagnetic radiation evaluated on test particle using Einstein field equations
16 p2812 A69-32049

Impulsive radio emission from CP 0950 by Mark I telescope, plotting mean and interpulse profiles
17 p3036 A69-33638

Observed and computed radio pulse profiles of white dwarfs, noting resemblance of emissivity variation with latitude to magnetic field distribution on sun
17 p3037 A69-33644

Distortion of electromagnetic pulse propagating through inhomogeneous plasma medium with linear electron density variation
20 p3496 A69-38030

Bloch wall motion along hard direction of Permalloy films due to fast rising hard-axis pulses
20 p3584 A69-38191

Multistable logic circuitry with 10 stability levels based on phased pulse principle, noting efficiency and complexity in man machine interface
21 p3686 A69-39065

Response of three level particles system with equidistant spectrum under resonant action of acoustic and electromagnetic pulses sequence with different frequencies
21 p3737 A69-39068

Holographic interferometry by single two wavelength laser pulse exposure, discussing variable sensitivity techniques
21 p3725 A69-39448

ELECTROMAGNETIC PUMPS

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc
13 p2209 A69-27926

Plane linear induction pump design optimization without short circuiting bus bars, allowing for MHD effects induced by traveling magnetic field
14 p2405 A69-29913

Electromagnetic field pumping effects in electrically conductive gas lubricants, producing gas film between surfaces without external pressurization
15 p2629 A69-31003

Approximate integrals of Einstein equations for dipole and quadrupole electromagnetic radiation
01 p0115 A69-10263

Waves in inhomogeneous warm magnetoplasmas with static pressure gradients, applying dyadic to planar stratified plasma case
01 p0129 A69-10561

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
01 p0031 A69-10880

Soviet investigations of solar and cosmic electromagnetic and charged particle radiations by balloon, rocket and satellite measurements
01 p0145 A69-10945

Electromagnetic waves trajectory distortion in moving plasma due to additional time delay noting propagation of pearl pulsations, whistling atmospherics and proton whistlers
01 p0068 A69-11114

Electromagnetic wave path emitted by artificial satellites across anisotropic ionosphere due to geomagnetic field determined by computer program
01 p0068 A69-11115

Charged particle motion caused by ELF electromagnetic waves in presence of constant magnetic field, noting earth ionosphere application
02 p0240 A69-11712

Electromagnetic wave propagation problems, using asymptotic solutions of differential and integral equations in domains containing transition points
02 p0208 A69-12130

Reflection of plane electromagnetic wave from impedance cylinder in vacuum, using ray expansion method
02 p0217 A69-12262

Iris satellite experiments in astrophysics including nuclear and solar induced electromagnetic radiation
03 p0427 A69-12849

Procedure and apparatus for integral microwave and X ray and spectral measurements of quasi-steady plasma radiation
03 p0473 A69-12897

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
03 p0506 A69-13083

Green functions associated with electromagnetic radiation in moving medium, finding time dependent and harmonic Green functions
03 p0466 A69-13352

Nonlinear interaction of steady state circularly polarized electromagnetic wave with cold plasma in constant longitudinal magnetic field
03 p0476 A69-13381

Electromagnetic wave diffraction at uniformly expanding sphere solved by Kirchhoff method
03 p0397 A69-13719

Plane reflector with variable reflection coefficient for electromagnetic centimeter waves, consisting of plane grating of semiconductor diodes mounted in waveguide
03 p0406 A69-13938

Emissivity and other radiative characteristics of stainless steel oxides heated to various temperatures in air
03 p0453 A69-14157

Viscoelasticity effect on tensile stress in absorption layer for free surface uniaxial motion
04 p0676 A69-14705

Artificial lunar satellite orbital motion calculated by numerical integration, including solar and lunar electromagnetic radiation pressure effects
04 p0662 A69-15251

Electromagnetic radiation from solar flares based on rocket and satellite observations of 10-100 kev X ray emission and ground observation of cm-wavelength bursts
05 p0813 A69-15603

Biological effects of VHF electromagnetic radiation from radar antennas
05 p0715 A69-16701

Diffraction of plane electromagnetic waves obliquely incident on conducting rotated periodically tapered grating structure formed of infinite metal strips
05 p0723 A69-16788

Electromagnetic waves transformation and scattering in plasma in electric field, showing abrupt increase at certain critical value
06 p0886 A69-16894

Spatial dispersion of electromagnetic waves reflection from moving plasma layer in magnetic field, determining transmission and energy absorption coefficients
06 p0886 A69-16895

Hydrodynamic and lattice vibrations equations for coupled waves in ion semiconductors in external electric and magnetic fields, observing sound amplification
06 p0978 A69-16897

Gunn effect verification using n-type semiconductor single crystals in DC field, noting microwave field polarization plane rotation
06 p0978 A69-16902

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude
06 p0887 A69-17450

Diffuse reflection of electromagnetic waves by rough random surface using probabilistic method and statistical distributions
07 p1075 A69-18280

Electromagnetic waves excitation during interaction between density modulated beam and plasma in magnetic field, analyzing instabilities
07 p1189 A69-18508

Focused electromagnetic beam interferometers and antenna parameters for measuring electron density in plasma diagnostics
07 p1132 A69-18865

Relaxation theory of highly ionized hydrogen plasma noting applications to stimulated emission, radiation source development and electromagnetic radiation amplification
07 p1191 A69-18996

Initial equations for plane wave diffraction at grids of squared beams, calculating transmission and reflection coefficients by reflection method and computer
07 p1084 A69-19149

Plane electromagnetic wave diffraction at oblique screen of circular cross section conducting wires solved, assuming smaller wire radius than grid spacing and wavelength
07 p1084 A69-19150

Thin electron flux interaction with electromagnetic wave in open waveguide, discussing nonlinear theory and performance of gyroresonance transverse wave tube
07 p1107 A69-19159

Radiation resistance of short dipole immersed in cold magnetoionic medium, using polarized wave modes
07 p1107 A69-19226

Hamilton-Jacobi equations of motion for classical electron in presence of traveling pulse of electromagnetic radiation, solving radiation pulse shape orbits
08 p1377 A69-19790

Rays associated Fokker-Planck relation for isotropic turbulence diffusion equation, discussing logarithmic refractive index, moments and path length
08 p1272 A69-20021

Horizontal electric dipole excitation of spherical guide waves between earth and ionosphere, discussing TM and TE modes and ELF and VLF range
08 p1273 A69-20023

Ultrashort optical pulses of coherent light, discussing propagation in inhomogeneously broadened medium of two level systems
08 p1324 A69-20083

Electromagnetic waves and photons coexistence, discussing wave mechanics and guidance of particles, photon guidance and corpuscular magnitudes, etc
08 p1351 A69-20117

Time-averaged value of forces of electromagnetic wave falling from vacuum and acting on magnetoactive plasma
08 p1361 A69-20200

Collective interactions of electromagnetic waves in plasma, discussing light scattering from electron fluctuations, stimulated emission and anomalous absorption
08 p1361 A69-20220

Radiation spectrum in nonrelativistic fully ionized gas in thermal equilibrium, obtaining dispersion relation for transverse electromagnetic waves and dielectric constant
08 p1357 A69-20748

MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster [AIAA PAPER 69-279]
09 p1564 A69-21238

Cylindrical electromagnetic waves diffraction at impedance wedge in anisotropic cold plasma, using Maxwell equation and double contour integral
09 p1545 A69-21505

Electromagnetic wave fluctuations and scattering in plasma in strong electric and magnetic fields at magnetoacoustic frequencies
09 p1453 A69-21569

Dispersion equation to describe spectrum of LF density perturbations by pumping plane electromagnetic wave in transparent homogeneous plasma or fluid media
09 p1453 A69-21570

Lower ionosphere effect on LF electromagnetic disturbances, comparing propagation and damping of clockwise and counterclockwise polarized waves
09 p1487 A69-21637

Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere
09 p1575 A69-21645

Electromagnetic wave reflection from subrefractive layers in inhomogeneous region
09 p1454 A69-21679

Coupling electromagnetic power to beam plasma amplifiers without use of helices and cavities, discussing modes of interaction, gap coupling and Cerenkov coupling
09 p1463 A69-21805

Electromagnetic diffraction for waves generated by electric quadrupole on perfectly conducting wedge, discussing finiteness and radiation emission
09 p1455 A69-22082

Electromagnetic wave diffraction on conducting sphere in inhomogeneous medium with given refractive index variation law, using asymptotic solution for boundary value problem
09 p1459 A69-22628

Second harmonic generation by electromagnetic wave incident on inhomogeneous plasma, determining power output
10 p1653 A69-23133

Reflection coefficient of electromagnetic wave reflected from thin ionization layer, using frequency dependence of amplitude to estimate ionospheric layer thickness
10 p1686 A69-23912

Plasma wave conversion into electromagnetic waves in strong magnetic field, studying nonlinear coalescence and scattering on thermal and epithermal ions
11 p1922 A69-24245

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars
11 p1957 A69-24402

Diffraction of plane electromagnetic wave incident on conducting sphere segment, deriving secondary electromagnetic field equations in geometrical optics approximation
11 p1846 A69-24613

Scattering of spherical electromagnetic wave emitted by electric and magnetic dipoles with equal moments at truncated infinitely thin ideally conducting paraboloid of revolution
11 p1846 A69-24614

High energy cosmic ray origin and acceleration by LF electromagnetic radiation produced by pulsars, noting maximum energy for protons
11 p1950 A69-24927

Magnetospheric plasma heating by magnetosheath generated electromagnetic waves
11 p1950 A69-25149

Multiple scattering in Kapitza-Dirac effect describing electron scattering by standing electromagnetic wave, noting transition probability less than unity
11 p1919 A69-25323

LF electromagnetic waves stability and propagation conditions in plasma confined in central-conductor configuration measured, noting agreement with wave equation solution
11 p1931 A69-25362

Critical condition for electromagnetic radiation generation by energetic electrons gyrating in dense magnetized plasma, proposing plasma instability mechanism
11 p1931 A69-25363

Directional coupler for TEM waves composed of two waveguides and having locally dependent coupling function
11 p1855 A69-25629

Transformation of longitudinal plasma wave into electromagnetic wave during collision with dielectric in plasma
11 p1934 A69-25708

Time harmonic electromagnetic waves diffraction by circular aperture in conducting plane screen between different media, using Hertz vector formulation
12 p2030 A69-26463

Surface waves effect on electromagnetic waves incoherent reflection from plasma-vacuum boundary, describing polarization and angular and spectral distributions
12 p2031 A69-26530

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
12 p2031 A69-26644

Plane transient electromagnetic wave from cold lossless plasma half space and slab
12 p2033 A69-26865

Field patterns for wave radiation from electric dipole immersed in anisotropic plasma column excited by longitudinal DC magnetic field
12 p2034 A69-27103

Electromagnetic step-function plane waves propagation in ionosphere using Fourier transform and Bessel functions
12 p2034 A69-27132

Electromagnetic flux from nonlinear self interaction of electron plasma waves in far field of perturbation under anisotropic electron pressures
12 p2141 A69-27147

Simultaneous Wiener-Hopf equations for electromagnetic wave diffraction, giving cyclic matrix solutions for Dirichlet and Neumann mixed boundary value problems
13 p2287 A69-27299

Electromagnetic and plasma waves scattering by space vehicle excited by ground source in isotropic warm plasma, obtaining radar cross sections
13 p2221 A69-27965

Finite difference solution to TEM mode transmission line cross section for defining continuous potential function leading to capacitance upper bound
13 p2221 A69-28064

TEM mode networks design for producing phase coherent pulse modulated microwave signals through spectrum S band
13 p2234 A69-28073

High energy electrons producing electromagnetic cascades in electron photon showers in lead measured by scintillation detectors
13 p2332 A69-28419

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency
13 p2314 A69-28443

Outer space electromagnetic radiation transfer in turbulent plasma with allowance for polarization effects, describing polarization induced changes in Stokes parameters
14 p2515 A69-28765

Reflection and absorption coefficients analyzed for obliquely incident electromagnetic wave from magnetoactive plasma in constant parallel magnetic field
14 p2411 A69-28997

Electromagnetic energy spectra of lightning expressed as function of electric field spectral density of atmospheric
14 p2437 A69-29076

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes
14 p2402 A69-29246

Subroutines for computing characteristics of electromagnetic radiation scattered by absorbing and homogeneous sphere employing logarithmic derivative method
14 p2412 A69-29283

Book on depolarization of electromagnetic waves covering interface reflection and diffraction, scattered waves, anisotropic media, random scattering, Fresnel coefficients, Brewster angle, etc
14 p2412 A69-29315

Asymptotic expansions for Einstein-Maxwell field representing gravitational and electromagnetic radiation from finite source of matter and charge
14 p2486 A69-29635

Reflection of electromagnetic wave from magnetoactive plasma at inclined incidence, finding reflection and absorption coefficients
14 p2417 A69-29661

Plasma density and conductivity radio interferometry during ultrarapid disturbances based on electromagnetic wave phase shift dependence on density
14 p2498 A69-29803

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators
14 p2498 A69-29807

Incident electromagnetic waves Raman scattering at turbulent plasma oscillations, obtaining plasma intrinsic radiation spectrum
15 p2659 A69-30728

Nonlinear mixing of Ar plasma ion wave and externally applied electromagnetic wave
16 p2820 A69-31769

Electromagnetic fields in closed one dimensional resonators with oscillating boundary, analyzing amplitude buildup
16 p2751 A69-32030

Gravitational effect of electromagnetic radiation evaluated on test particle using Einstein field equations
16 p2812 A69-32049

Diffraction of axisymmetric electromagnetic wave at surface discontinuity of impedance cylinder forming core of coaxial waveguide
16 p2761 A69-32479

Electromagnetic /ULF, VLF/ and light emissions development during magnetic substorms, discussing varied pulsations present in development phases
16 p2788 A69-32648

Electromagnetic waves - Conference, Stresa, Italy, June 1968
17 p2922 A69-33832

Deformation of amplitude and frequency envelopes of plane modulated electromagnetic waves with dispersion in isotropic dielectric with cubic nonlinearity
17 p2928 A69-33869

Electromagnetic wave scattering in two angled rectangular waveguides filled with isotropic homogeneous medium
17 p2930 A69-33887

HF electromagnetic waves penetration into slightly ionized plasma analyzed by Maxwell and kinetic equations, giving penetrating electric field by WKB formula
17 p2932 A69-34220

Macroscopic roughness effect on surface radiation characteristics for special cases
18 p3229 A69-34711

Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
18 p3108 A69-34802

Algebraic formulation of electromagnetic diffraction, discussing propagation of positive and negative time frequency components by dual operators
18 p3172 A69-35010

Electromagnetic wave effect on electron in homogeneous magnetic field, noting relativistic momenta of dragged electrons
18 p3181 A69-35497

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase
19 p3309 A69-36060

Stationary electromagnetic wave fields LF behavior, discussing integral operators, incident and tangential fields, single valued solutions, etc
20 p3487 A69-37071

Electromagnetic radiation in moving uniaxially anisotropic medium, obtaining time dependent solutions for oriented magnetic dipole current distribution density
20 p3576 A69-37578

Electromagnetic radiation detectors in nonphotographic sensing systems, describing performance as function of time constant, spectral response, cooling requirements and signal handling
20 p3540 A69-37736

Electromagnetic radiation from slot excited ground plane covered by inhomogeneous plasma layer, considering far field radiation pattern
20 p3495 A69-37852

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude
20 p3496 A69-37935

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar
20 p3607 A69-38035

Auroras and VLF emissions observations at ground stations to correlate emissions with auroral displays, noting low ionospheric absorption role
21 p3708 A69-38494

Simultaneous ground and Alouette 2 satellite measurements of enhanced electromagnetic band emission in 500-1000 Hz range
21 p3708 A69-38496

Interaction between modes of radiation field and active medium in laser with nonresonant feedback, discussing amplitude stabilization of total radiation
21 p3735 A69-38581

X ray sources and diffuse background radiation observed in gamma and X ray spectral regions, considering electromagnetic waves attenuation by interstellar matter
21 p3789 A69-38817

Electromagnetic wave diffraction in three dimensional space divided by dielectric orthogonal half planes/wedges/, using contact boundary value problem
21 p3673 A69-39012

Electromagnetic radiation measurements in shielded enclosures, describing equipment and effects of frequency
21 p3683 A69-39439

Absolute and convective instability criteria of interacting electromagnetic waves in waveguide systems involving parametric oscillators and amplifiers
21 p3677 A69-39555

Coupled acoustic and spiral EM waves drift instabilities in bounded plasma of solid body found to be convective
21 p3782 A69-39556

Electromagnetic radiation and scattering from conducting bodies of revolution, obtaining formulation in integrodifferential equation from potential integrals and boundary conditions
22 p3899 A69-40014

Transverse mode selection in rotating mirror neodymium doped calcium tungstate laser by inserting slit and edge into resonator
22 p3961 A69-40316

- Diffuse reflection of electromagnetic longitudinal wave from magnetoactive plasma in oblique incidence
22 p3990 A69-40788
- Aperture distortions and spectral line shapes of electromagnetic radiation diffused by plasma
22 p3982 A69-40799
- Reflection and transmission coefficients for harmonic electromagnetic wave incident at parabolic layer of stratified isotropic plasma
22 p3901 A69-41020
- Monte Carlo methods for electromagnetic showers simulation, noting electron track length distribution in Pb glass absorber
22 p4007 A69-41057
- Electromagnetic waves emission intensity in one dimensional resonator, allowing for wave interference effects
22 p3966 A69-41172
- Electromagnetic radiation characteristics from vibrating electrons or electric dipole moving in compressible isotropic plasma and from stationary dipole in moving medium, emphasizing Doppler effects
23 p4114 A69-41359
- Electromagnetic backscattering by perfectly conducting prolate spheroid, predicting echo signal in resonance region
23 p4115 A69-41584
- Radiation scattering by thick planetary atmosphere according to Rayleigh law, considering luminance variation and absorption ray polarization
23 p4213 A69-41698
- Electromagnetic wave diffraction normally incident on symmetrical five element metallic array
23 p4123 A69-42029
- Plane electromagnetic wave diffraction by screened periodic metallic strips array with real ferrite transversely magnetized to saturation
23 p4124 A69-42032
- Linear diffraction equations in electronics in self consistent formulation reduced to complex transcendental equations, using perturbation method
23 p4124 A69-42033
- Space charge wave propagation induced by electron beam moving in annular waveguide, considering radiated field and current redistribution
23 p4124 A69-42034
- Electromagnetic wave diffraction by multielement periodic metallic strips arrays positioned transversely in rectangular waveguide
23 p4124 A69-42035
- Time dependent natural oscillations of plane open resonators infinite periodic sequence, considering electromagnetic energy transfer into ambient medium
23 p4139 A69-42039
- Plane polarized electromagnetic wave diffraction incident on skewed metal ribbons array
23 p4125 A69-42043
- Diffraction characteristics of electromagnetic wave by periodic two element arrays, noting amplitude measurement of harmonics in millimeter wavelength range
23 p4139 A69-42044
- Electromagnetic radiation below 1 GHz from gap type electrical discharges on electric power distribution lines
23 p4126 A69-42218
- Radiated interference and susceptibility prediction for unshielded wires in near field of vertical rod antenna
23 p4141 A69-42225
- Quantum optics or electronics, discussing electromagnetic waves control and interactions with matter, maser oscillators theory and characteristics, nonlinear optics, induced transparency, etc
23 p4174 A69-42315
- Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars
24 p4391 A69-43792

ELECTROMAGNETIC SCATTERING

- NT HALOS
- NT IONOSPHERIC F-SCATTER PROPAGATION
- NT LIGHT SCATTERING
- NT MICROWAVE SCATTERING
- NT MIE SCATTERING
- NT RAMAN SPECTRA
- NT RAYLEIGH SCATTERING
- NT X RAY SCATTERING
- Geometric optics inverse scattering method for smooth conducting convex bodies of revolution, demonstrating bounds on size and shape
02 p0280 A69-11929
- Electromagnetic wave scattering by turbulent plasma pulsations in external magnetic field
02 p0289 A69-12174

- Reflection of plane electromagnetic wave from conducting plane covered with moving uniaxial sheath
02 p0209 A69-12334
- Scattering from coated absorbing conducting bodies, considering flat plane and curved surfaces in Rayleigh region
03 p0384 A69-12908
- Radar cross section enhancement effect of corner reflectors, multiple reflectors and dielectric lenses
03 p0384 A69-12909
- Missile radar cross section based on modeling from simple forms, noting computer program
03 p0384 A69-12910
- Plane electromagnetic wave scattering from slightly rough surface tilted away from reference plane, noting polarization effects
03 p0395 A69-13625
- Transport equation for electromagnetic waves multiple scattering by turbulent plasma
03 p0478 A69-13959
- Scattering data for optical diagnostic measurements on two component suspensions or gases, using random distributions of spheres
04 p0555 A69-14282
- Moment method used to determine pulsed radiation instability propagating in luminescent scattering medium
04 p0610 A69-14425
- Quasi-specular bistatic radar measurements of oblique scattering properties of lunar surface using telemetry carrier from Explorer 35 as lunar orbiting radar beacon
04 p0655 A69-14657
- Relativistic analysis of far zone electromagnetic scattering by conducting sphere moving through incident plane wave, calculating scattering cross section
04 p0559 A69-15212
- Scattering of electromagnetic waves from rough surface moving with uniform velocity
04 p0560 A69-15213
- Bounded and perfectly conducting object embedded in Euclidean 3-space, discussing electromagnetic inverse scattering problem
05 p0719 A69-15929
- Electromagnetic wave scattering in ferromagnetic crystals with anisotropy, discussing correlation functions of characteristics fluctuations and magnetoacoustic resonance
05 p0809 A69-16547
- Scattering and diffraction of plane electromagnetic wave incident on conducting cylinder coated with moving anisotropic medium
07 p1086 A69-19469
- Electromagnetic waves attenuation and scattering by rainfalls calculated using droplet distribution function
08 p1275 A69-20430
- HF electromagnetic wave scattering at small scale plasma turbulence in magnetic fields, discussing interactions in frequent collisions region
08 p1275 A69-20435
- Scattering and transformation of electromagnetic waves in plasma in crossed electric and magnetic fields showing radiation spectrum maxima due to ion-acoustic oscillations propagation
08 p1277 A69-21080
- Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
09 p1453 A69-21527
- Electromagnetic wave fluctuations and scattering in plasma in strong electric and magnetic fields at magnetoacoustic frequencies
09 p1453 A69-21569
- Dispersion equation to describe spectrum of LF density perturbations by pumping plane electromagnetic wave in transparent homogeneous plasma or fluid media
09 p1453 A69-21570
- Bose condensation and shock waves in photon spectrum during scattering for equilibrium state of ionized plasma and radiation
09 p1546 A69-21574
- Gamma ray scattering gauge design optimum parameters to measure Mars atmospheric density
09 p1495 A69-21842
- Electromagnetic wave diffraction on conducting sphere in inhomogeneous medium with given refractive index variation law, using asymptotic solution for boundary value problem
09 p1459 A69-22628
- Energy spectra and angular dependence characteristics of electromagnetic wave scattered on statistically uneven surface studied by vector form of Kirchhoff integral
09 p1459 A69-22635
- Solar Lyman alpha radiation scattering into antisolar geocorona, noting inaccessibility of region to solar wind
09 p1583 A69-22760
- Surface currents, scattered field and scattering cross section for perfectly conducting cylinder found by reducing two dimensional problem to solving coupled differential equations
10 p1657 A69-23860
- Scattering of spherical electromagnetic wave emitted by electric and magnetic dipoles with equal moments at truncated infinitely thin ideally conducting paraboloid of revolution
11 p1846 A69-24614
- Lunar surface pore water /or ice/ detection by active orbital or surface electromagnetic experiments, noting water effect on reflection coefficient
11 p1958 A69-24693
- Electromagnetic plane wave scattering from slender semiinfinite cone, obtaining contribution to tip return arising from direct diffraction
11 p1836 A69-24988
- Electromagnetic scattering from thin wire loops under various impedance loadings, considering positive and negative resistors effect combined with reactive networks
11 p1837 A69-25000
- Transformation of Q switched neodymium laser radiation into Stokes component during stimulated combination scattering in liquid nitrogen
11 p1900 A69-25751
- Atmospheric models for electromagnetic scattering of monochromatic IR and microwave radiation by natural suspensions as hazes clouds and precipitation
12 p2030 A69-26467
- Book on depolarization of electromagnetic waves covering interface reflection and diffraction, scattered waves, anisotropic media, random scattering, Fresnel coefficients, Brewster angle, etc
14 p2412 A69-29315
- Transistor scatter and admittance differential parameters measurements graphically correlated
14 p2420 A69-29397
- Multiple scattering of electromagnetic waves in underdense plasma, deriving transport equation for radar backscatter
14 p2412 A69-29453
- Electromagnetic scatter from perturbed continuous medium, expressing problem in terms of periodic functions instead of conventional power series
14 p2414 A69-29513
- Atmospheric multifrequency probing accuracy limitation imposed by irregularities based on scatter theory
14 p2449 A69-29535
- Monograph on wave propagation and multiple scattering in random continuum, emphasizing scalar wave equation solutions
15 p2564 A69-30150
- Electromagnetic field TM and TE modes uncoupling during oblique incidence scattering from radially inhomogeneous cylinders
15 p2565 A69-30170
- Plane electromagnetic wave refraction and scattering in solar corona during eclipsed observations of cosmic sources, calculating angular distribution of radiation intensity
15 p2688 A69-30555
- Incident electromagnetic waves Raman scattering at turbulent plasma oscillations, obtaining plasma intrinsic radiation spectrum
15 p2659 A69-30728
- Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations
15 p2569 A69-30938
- OGO 5 satellite measurements of intensity and width of Lyman alpha line scattered by hydrogen geocorona
15 p2699 A69-31412
- Scattering of line focused electromagnetic waves by infinite cylinders obtained by modification of plane wave theory
15 p2664 A69-31478
- Scattering by cylindrical pool of complex permittivity /plasma/ in rectangular waveguide, calculating reflection, transmission and absorption coefficients by computer
16 p2756 A69-31578
- Scattering of time harmonic linearly polarized plane electromagnetic wave by uniformly axially moving cylinder, analyzing first order velocity effects
16 p2748 A69-31579

Partially coherent radiation scattering determined using Heisenberg operator, noting radiation absorption dependence on interference band coherence
16 p2797 A69-32050

Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
16 p2754 A69-32522

Inverse scattering technique for electromagnetic bistatic scattering by expressing field produced by incident plane wave as sum of incident field and Fourier transform
16 p2754 A69-32569

Electromagnetic wave scattering from conducting bodies of arbitrary shape and electromagnetic properties
17 p2918 A69-33002

Holography of intensities, discussing recording of self luminous body by modulation of scattered radiation using optical Q switch
17 p2973 A69-33113

Wave diffraction problem solution method based on Rayleigh hypothesis equivalent to extended boundary condition method
17 p2920 A69-33422

Dyadic Green function technique extended to problems of electromagnetic scattering in inhomogeneous media with spherical symmetry
17 p2924 A69-33837

Electromagnetic scattering theory, defining areas of current importance and surveying recent papers
17 p2930 A69-33884

Diffraction of skew incident plane electromagnetic wave by perfectly conducting right angled wedge embedded in uniaxially anisotropic medium
17 p2930 A69-33889

Integral equation method for electromagnetic scattering by perfectly conducting obstacles modified for volume scattering regions involving disparities in dielectric constant, permeability or conductivity
17 p2930 A69-33890

Electromagnetic wave scattering and depolarization by horizontally weakly inhomogeneous medium, using small perturbation method
18 p3101 A69-34788

Scattering of electromagnetic waves obliquely incident on inhomogeneous plasma column of parabolic radial density distribution, noting applications to ionospheric irregularities
18 p3102 A69-34963

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Scattered field of linear array of center loaded cylindrical elements illuminated by plane electromagnetic wave
20 p3494 A69-37838

Electromagnetic wave scattering from rough layer with plane and rough interfaces, determining scattering cross sections from electrical field and power density
21 p3677 A69-39459

Computer simulation of radiation scattering of spherical nebula with central isotropic star, discussing proposed program and parameters
21 p3816 A69-39723

Electromagnetic radiation and scattering from conducting bodies of revolution, obtaining formulation in integrodifferential equation from potential integrals and boundary conditions
22 p3899 A69-40014

Spatiotemporal signal distortions for multiple scattering from unsteady radiant energy transfer equations
22 p3899 A69-40247

Plane electromagnetic wave scattering on turbulent fluctuations in electron density of finite volume ionized plasma, evaluating Booker-Gordon relation
23 p4116 A69-41587

Electromagnetic waves scatter propagation in isotropic plasma in plane waveguide, noting electron charge density fluctuations role
23 p4125 A69-42040

Fluctuations in 3K radiation, considering scattering effect on gravitational fields of galactic clusters and large coherence or wavelength scattering by gravitational radiation
23 p4222 A69-42401

Laser hazard probability assessment in various applications, discussing power characteristics, attenuation by absorption and scattering and radiant energy spatial distribution
24 p4327 A69-42576

Electromagnetic scattering by small plasma ellipsoid moving in vacuum through external steady magnetic field, analyzing resonance phenomena
24 p4282 A69-42979

ELECTROMAGNETIC SHIELDING NT RADIO FREQUENCY SHIELDING

Computer program for electromagnetic wave metal shielding evaluation
03 p0398 A69-13901

Corrosion problems associated with electromagnetic shielding gaskets noting galvanic corrosion, corrosion prevention and insulation of gasket from mating surface
05 p0779 A69-15979

Graphs determining interference levels for optimum shielding, suppression, signal parameters and waveforms for pulses, step functions, CW signals and for military technology
12 p2030 A69-26471

Shields frequency ranges analysis to determine frequencies and parameters for electrostatic and magnetostatic modes transition to electromagnetic and microwave modes
15 p2562 A69-30120

Shield facility and Helmholtz coil system used to investigate chronic effects on man of zero magnetic field regulated to cancel geomagnetic field variations
15 p2586 A69-30382

Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
15 p2652 A69-31522

Plane screen electrical shielding effectiveness calculation, using incident wave impedances associated with current loop and magnetic dipoles in transmission line equations
19 p3267 A69-35932

Electromagnetic radiation measurements in shielded enclosures, describing equipment and effects of frequency
21 p3683 A69-39439

Dispersion and resonant properties of electromagnetic waves propagating along plane metallic strip array with shield and dielectric
23 p4124 A69-42038

Diffusion times for saturated region in Hipernom tubes measured for various exciting magnetic fields and pulse duration
23 p4141 A69-42222

Beam wave propagation in conducting hollow circular cylinder applied to shielding cylinders design for aperture antenna transmission
24 p4282 A69-42987

ELECTROMAGNETIC SHOCK TUBES U SHOCK TUBES

ELECTROMAGNETIC SPECTRA

NT BALMER SERIES
NT D LINES
NT ELECTRONIC SPECTRA
NT FRAUNHOFER LINES
NT H ALPHA LINE
NT H BETA LINE
NT H GAMMA LINE
NT H LINES
NT INFRARED SPECTRA
NT K LINES
NT LINE SPECTRA
NT LYMAN SPECTRA
NT MICROWAVE SPECTRA
NT PASCHEN SERIES
NT RADIO SPECTRA
NT RAMAN SPECTRA
NT RYDBERG SERIES
NT SOLAR SPECTRA
NT STELLAR SPECTRA
NT TELLURIC LINES
NT UV SPECTRA
NT ULTRAVIOLET SPECTRA
NT VIBRATIONAL SPECTRA

Spectrum distortion of intermediate frequency signal in coherent Doppler navigation radar
01 p0034 A69-11013

Scattering and transformation of electromagnetic waves in plasma in crossed electric and magnetic fields showing radiation spectrum maxima due to ion-acoustic oscillations propagation
08 p1277 A69-21080

Lunar photon leakage spectrum due to photons from capture and inelastic scattering of neutrons by galactic cosmic rays
09 p1597 A69-22088

Earth resource satellites, discussing mapping, land evaluation, geological observation, agricultural and hydrological applications, electromagnetic spectrum information, sensors and photographs
16 p2881 A69-31763

Solar cells designed to survive exposure to fission/fusion neutrons and electromagnetic spectrum products of nuclear weapon detonation
19 p3251 A69-35689

N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose
20 p3582 A69-36969

Earth resources observation technology from satellites, reviewing sensors and methods, electromagnetic spectrum, atmospheric attenuation and windows, passive-active devices
21 p3720 A69-38624

Spectroscopic observations of optical pulsar NE 0532, using technique permitting phase resolution of spectra of main pulse and interpulse
21 p3799 A69-38646

ELECTROMAGNETIC WAVE FILTERS

NT INFRARED FILTERS
NT MICROWAVE FILTERS
NT OPTICAL FILTERS
NT RADAR FILTERS
NT ULTRAVIOLET FILTERS
NT WAVEGUIDE FILTERS

Transversal filters for equalization of data channels with pulse amplitude modulation, discussing pulse equalizability and convergence criteria for iterative search routine
01 p0027 A69-10251

Mean error rates in microwave PCM systems with wave distortion due to multipath propagation
02 p0208 A69-12307

Frequency locked loop /FLL/ to optimize loop filter and quantization of amplitude channel
03 p0390 A69-13202

Analysis and design of synchronous filter compatible with microelectronics requirements, switching N monolithic RC thin film devices to signal source of resistance
03 p0403 A69-13206

Fourier synthesis procedure optimized to design of large time bandwidth product dispersive filters employing nondispersive tapped delay lines
03 p0403 A69-13217

Waveform distortion resulting from adjacent channel crosstalk and from amplitude and phase nonlinearity in channel filters in DSB/SC telemetry link
07 p1083 A69-19130

Finite IF filter bandwidth degradation of SNR of receiver for biphasic modulated signals using integrate and dump filter
08 p1270 A69-19851

Filters for sampled signals sequences using design simplicity and signal to noise ratio for evaluation and comparison factors
08 p1274 A69-20127

Transfer function and frequency response of notch filters used to achieve notch filter dimensioning and design
08 p1284 A69-20379

Chebyshev filter design problems including minimum highest dissipation loss, bandwidth, resonators, etc
10 p1665 A69-23875

Self tuning in active filter for detection of weak LF signals in noisy background
11 p1845 A69-24548

Stochastic optimal control of continuous time systems with unknown gain, discussing filtering-control interaction and computer experiments
11 p1860 A69-25442

Narrow band LC 70 MHz IF filter design method
12 p2036 A69-25915

Mismatch between signal and filter effect on output response of matched filter for pseudorandom phase-manipulated signals in receiver
12 p2031 A69-26487

Transistorized LF-HF RC filters and current amplifiers design, exhibiting polynomial type characteristics
12 p2040 A69-26488

Optimized receivers synthesized for narrow band radio signal filtration, comparing noise rejection properties of various pulse modulation types during speech transmission
14 p2413 A69-29464

Notch filter construction by single operational amplifier, adjusting notch bandwidth by varying ratio of resistors and capacitors
14 p2421 A69-29550

Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position
14 p2493 A69-29673

- Instrumental accuracy of discrete filter during measurement of initial phase of signal dependent on phase structure
15 p2574 A69-30139
- Photoelectric comet observation techniques, tabulating narrow and wideband filter combinations for determining parameter Q for various cometary spectral emissions
15 p2684 A69-30522
- Channel dropping filter for millimeter wave in low loss circular waveguide for overland telecommunications in bandwith over 10 GHz
17 p2936 A69-33032
- Coupled Fabry-Perot interferometer for microwave spectra to improve selectivity of interference filter
22 p3947 A69-40800

ELECTROMAGNETIC WAVE TRANSMISSION

- NT AUTOMATIC PICTURE TRANSMISSION
NT DOUBLE SIDEBAND TRANSMISSION
NT HALOS
NT IONOSPHERIC F-SCATTER PROPAGATION
NT IONOSPHERIC PROPAGATION
NT LIGHT SCATTERING
NT LIGHT TRANSMISSION
NT MANDELSTAM REPRESENTATION
NT MICROWAVE ATTENUATION
NT MICROWAVE TRANSMISSION
NT MULTIPATH TRANSMISSION
NT RADAR ATTENUATION
NT RADAR TRANSMISSION
NT RADIO ATTENUATION
NT RADIO TRANSMISSION
NT SCATTER PROPAGATION
NT SHORT WAVE RADIO TRANSMISSION
NT SINGLE SIDEBAND TRANSMISSION
NT TELEVISION TRANSMISSION
NT TRANSEQUATORIAL PROPAGATION
- Electromagnetic wave propagation in superconductors, noting transmission line structure variation with magnetic fields and current and suitability for parametric amplifiers
01 p0135 A69-10176
- Pulsar radiation origin related to electromagnetic wave distortion during propagation through resonant media
01 p0149 A69-10272
- Coupled wave equations for propagation transverse to magnetostatic field in horizontally stratified and magnetized gyrotropic warm plasma
01 p0129 A69-10611
- Propagation in waveguides filled with moving media, discussing first order theory
01 p0030 A69-10630
- IR reflection and transmission properties of various semiconductor compounds, rubidium halides, strontium titanate, BN and Te
01 p0139 A69-10840
- Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
01 p0031 A69-10879
- Spectral lines source functions for formation in multilevel atom and radiative transfer in atmosphere of three level Na atoms and four level O atoms
01 p0124 A69-10962
- Multifrequency three layer sandwich radomes design for reflectionless sandwich at second frequency
01 p0034 A69-11037
- Moderately strong electromagnetic wave propagation in fully ionized plasma, noting nonlinear effects for frequency near plasma frequency
01 p0133 A69-11213
- Electromagnetic wave propagation across magnetic field under relative streaming motion, noting plasma frequency cut-off
01 p0134 A69-11247
- Normally incident linearly polarized electromagnetic wave reflection and transmission by semiinfinite longitudinally drifting magnetoplasma in static magnetic field
01 p0134 A69-11290
- Electromagnetic waves propagation in cylindrical waveguide containing plasma column along axis in absence of constant magnetic field
02 p0285 A69-11463
- Magnetoionic propagation of signals in magnetosphere using Maxwell equations and tensor quantities, linking to Hall, transverse and longitudinal conductivities
[ONERA-TP-593] 02 p0236 A69-11617
- Transhorizon UHF energy transmission via tropospheric scatter, using propagation path model
02 p0209 A69-12350
- Electromagnetic wave propagation in metals in magnetic field, noting helicon waves, magnetoplasma

- waves, waves with discrete spectrum or near cyclotron resonance and quantum phenomena
02 p0299 A69-12565
- Electromagnetic wave dispersion and damping in mixed molecular crystal, relating refractivity, wave absorption and concentration shift of bottom of exciton band to other parameters
03 p0484 A69-13279
- Cold plasma motion caused by electromagnetic wave pressure propagating along uniform magnetic field
03 p0477 A69-13413
- Electromagnetic wave propagation and amplification in periodic structures, including travel wave and parametric amplifiers, reactance diodes, lasers and quantum amplification
03 p0396 A69-13701
- Electromagnetic wave propagation in nonlinear media with permittivity dependent on modulus of magnetic field
03 p0396 A69-13707
- Electromagnetic wave passage through plane gyrotropic layer of magnetized plasma, analyzing polarization and energy transfer
03 p0397 A69-13709
- Dislocation effects on intensity jumps near K edge of absorption, using interferential transmission of X rays in Ge
03 p0490 A69-13944
- Plasma density spatial distribution determined from HF electromagnetic wave phase shifts without assuming axisymmetry
03 p0480 A69-14138
- Plasma waveguide properties during high intensity electromagnetic wave propagation, discussing microwave waveguide coupling
03 p0482 A69-14228
- Scattering from thin conducting sheet obstacle on cylindrical surface
03 p0399 A69-14253
- Moment method used to determine pulsed radiation instability propagating in luminescent scattering medium
04 p0610 A69-14425
- Dispersion relations for propagation of quasi-TEM mode and higher order symmetric modes in longitudinally magnetized ferrite filled coaxial waveguide
04 p0575 A69-14751
- Moving media influence on transient electromagnetic modal wave propagation in dispersive waveguides
04 p0557 A69-14752
- Electromagnetic wave propagation in moving isotropic refractive media, giving Maxwell-Minkowski and EM wave equations
04 p0557 A69-14760
- Dielectric waveguide propagation, impedance and attenuation characteristics and insertion loss and launching efficiency of mode transducer
04 p0577 A69-14971
- Nonlinear damping of circularly polarized electromagnetic wave propagating in plasma along magnetic field, noting particle motion in resonance region
04 p0558 A69-14982
- Electromagnetic wave propagation in uniform anisotropic plasma, considering wave vectors perpendicular to magnetic field
04 p0637 A69-15048
- Doubly infinite sets of simultaneous linear equations used in electromagnetic boundary value problems solved by Asymptotic Anticipation Method
04 p0560 A69-15214
- Electromagnetic wave propagation in spherically stratified isotropic media, presenting generalized refractive index profiles for electric type fields
04 p0563 A69-15492
- Dispersive properties of axial and annular longitudinally magnetized plasma waveguides
05 p0802 A69-15925
- Formulas describing reflection and transmission coefficients of plasma for plane electromagnetic wave, using Maxwell equations in variable medium
05 p0805 A69-16608
- Polarization tensor variation due to Faraday effect and differential absorption of ordinary and extraordinary waves for radiation propagating in magnetoactive cosmic plasma
05 p0805 A69-16650
- Characteristic waves in gas-dielectric beamguides, calculating attenuation dependence on frequency
05 p0736 A69-16783
- Propagation constant and radiation of center fed linear antenna with feed points displaced transverse to antenna axis and immersed in warm compressible plasma
06 p0896 A69-17476

- Controllability of deep space electromagnetic wave propagation in nonvacuum by calculating optimum values of control parametric functions
06 p0888 A69-17622
- Numerical methods for VLF electromagnetic wave propagation in earth-ionosphere waveguide, discussing boundary conditions assignment effect at ionosphere on eigenvalues
06 p0920 A69-17732
- Electromagnetic wave transmission and reflection at boundary of relativistic collisionless plasma, using Laplace transformation
06 p0968 A69-17783
- Transmission coefficient of plane electromagnetic wave obliquely incident on perforated metal screen in frequency range near primary resonance of structure
07 p1076 A69-18527
- Diffractional crosstalk in optical beam waveguide during simultaneous multibeam transmission arising from beam coupling by aperture diffraction
07 p1100 A69-18648
- Acoustic and electromagnetic energy propagation in lower ionosphere and atmosphere for energy pulse generation by chemical explosion
07 p1078 A69-18844
- Real and imaginary parts of homogeneous isotropic electron plasma complex refractive index, noting application to plane electromagnetic wave propagation
07 p1193 A69-19183
- Electromagnetic windows - Conference, University of Paris, September 1967
07 p1108 A69-19507
- Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
07 p1157 A69-19641
- Plane electromagnetic wave reflection and transmission by semiinfinite moving compressible plasma fluid, noting interaction of transmitted H wave
08 p1360 A69-20097
- Electromagnetic microinstabilities of plasmas associated with transverse waves propagating perpendicular to external uniform magnetic induction, noting allowable frequencies
08 p1368 A69-20804
- Loss cones effect of anisotropic Maxwellian velocity distribution on EM waves propagating perpendicular to magnetic field in infinite plasma
08 p1369 A69-20820
- Differential equations for normal propagation of plane electromagnetic waves in isotropic stratified inhomogeneous gyration medium, discussing boundary conditions and reflection properties
08 p1353 A69-21000
- Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles
08 p1277 A69-21077
- Transverse density nonuniformity effect on electromagnetic wave propagation in cylindrical plasma waveguide immersed in magnetic field, noting frequency increase
09 p1545 A69-21348
- Kinetic theory of electromagnetic wave passage through magnetoactive plasma, discussing dispersion and specular and diffuse reflection
09 p1550 A69-22022
- Kinetic theory of electromagnetic wave propagation in infinite laminated plasma with different dielectrics, determining attenuation
09 p1550 A69-22023
- Electromagnetic wave propagation direction in vacuum for reflection from semiinfinite plasma, noting effects of nonlinear transverse wave excitation
09 p1459 A69-22529
- Cosmic charged particle acceleration in electromagnetic field described by vector and scalar potentials, constituting plane electromagnetic wave propagating along z axis
10 p1756 A69-22816
- Electromagnetic wave transmission through anisotropic plasma, discussing incident wave field strength effects near cyclotron frequency
10 p1728 A69-23167
- Electromagnetic wave propagation over constant impedance flat earth, using electromagnetic compensation theorem
10 p1655 A69-23422
- Dynamic mode electromagnetic surface waves on axially magnetized single crystalline YIG and polycrystalline ferrite rods
10 p1746 A69-23513

Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659

Electromagnetic wave propagation along longitudinally magnetized plasma column surrounded by isotropic dielectric medium, without making quasi-static assumption
10 p1658 A69-24061

Radiation probability of transmission through intervening galaxy and screening of quasar emission in universes with positive cosmological constant
10 p1790 A69-24135

Anisotropic plasma density measurement by launching circularly polarized plane electromagnetic wave at small angles to magnetic field direction
11 p1930 A69-25286

Electromagnetic wave propagation in rectangular waveguide containing uniaxial anisotropic birefringent medium, deriving field equations
11 p1853 A69-25350

Radiation emission by scalar particle in field of two plane linearly polarized electromagnetic waves propagating toward each other
11 p1900 A69-25568

TEM-DUAL surface wave propagation in coaxial cable with stratified dielectric structure to reduce attenuation calculated by addition theorem to Bessel functions
11 p1856 A69-25659

Calculation method for electromagnetic wave supplementary attenuation due to auroral absorption for distances up to 4000 km
11 p1841 A69-25760

Saddle point analysis of electromagnetic ground wave propagation in source excited field in waveguide formed by two parallel plate dielectrics
12 p2028 A69-25898

Electromagnetic wave propagation cut-off in slightly noncompensated electron hole plasma, discussing wave evanescence above critical magnetic field value
12 p2133 A69-25926

Electromagnetic waves directional velocity, plasma temperature and particle density determined from analyzing electric field fluctuations amplification near body in plasma
12 p2137 A69-26531

Spectral transmission curves in near UV for optical glasses
12 p2130 A69-26599

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
12 p2031 A69-26642

Elliptical waveguide design dimensions for minimum attenuation in fundamental mode, giving formulas for attenuation constant and minor-major axis ratio
12 p2044 A69-27070

Guided waves in circular cylindrical radially inhomogeneous medium, using vector theory based on Maxwell equations
13 p2221 A69-28062

Interaction between shock tube gas discharge plasma and fast electrons ionized stationary gas, noting luminous discontinuities propagation
14 p2490 A69-28998

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization fluctuations
14 p2435 A69-29049

Monochromatic plane waves propagation in anisotropic homogeneous cold plasmas, treating dispersion surface, reflection, refraction and waveguide applications
14 p2492 A69-29399

Electromagnetic wave propagation through magnetolectric media in circular waveguide
14 p2416 A69-29540

Amplitude modulation of electromagnetic waves by modulated magnetic fields for communications through rocket exhausts and reentry plasma sheaths during blackout
14 p2417 A69-29591

Successive approximations method applied to system of independent equations describing electromagnetic wave propagation in space with gravitational wave metric
14 p2487 A69-29669

Dispersion of electromagnetic wave propagating along ferrite loaded wire, calculating tuning curves and three port waveguide circulator modes
14 p2417 A69-29755

Quasi-optical oversize waveguide directional coupler with two prisms interface matched by Brewster angle effect
14 p2424 A69-29764

Plasma electron density measurement from phase shifts of electromagnetic wave groups propagation
14 p2497 A69-29796

Monograph on wave propagation and multiple scattering in random continuum, emphasizing scalar wave equation solutions
15 p2564 A69-30150

Waveguide mode propagation theory for determining earth-ionosphere spherical waveguide upper boundary height diurnal variation for VLF waves
15 p2595 A69-30224

Electromagnetic waves as data carriers for earth resources and technology satellite sensors
15 p2607 A69-30231

Plane electromagnetic wave propagation normal and parallel to magnetic field in plasma analyzed by equivalent circuits and impedances
15 p2659 A69-30799

Te waves propagation along plasma sheet between conducting plates, determining vertical plasma density distribution
15 p2569 A69-30939

Electromagnetic wave propagation in anisotropic inhomogeneous media by geometric optics approximation, obtaining equations for beam trajectories in spherically symmetrical medium
15 p2569 A69-30949

Doppler geodetical measurements, emphasizing relative orientation between station and orbit influence on coordinates determination accuracy, presenting electromagnetic wave propagation theory
15 p2601 A69-31375

Scattering of line focused electromagnetic waves by infinite cylinders obtained by modification of plane wave theory
15 p2664 A69-31478

Coupled TEM lines arrays analysis in terms of odd and even modes, computing equivalent circuit elements, impedances and admittances
15 p2581 A69-31525

Electromagnetic wave propagation in transversely magnetized warm plasma filled rectangular waveguide, analyzing TE and TM modes
16 p2756 A69-31581

Atmospheric IR spectra determination from transmission functions overlapping effects of atmospheric gases
16 p2814 A69-31792

Noise signals in earth magnetosheath interpreted as electromagnetic waves propagating in whistler mode
16 p2774 A69-31985

Diffraction of electromagnetic waves produced by vertical dipole on impedance sphere of large radius in isotropic medium, using moment method
16 p2751 A69-32028

Electromagnetic cavity resonances in rotationally induced gravitational field by relativistic approach
16 p2812 A69-32048

Electromagnetic wave propagation in plasmas and plasma instabilities due to oscillations, deriving equations for frequency distributions in various plasma compositions
16 p2823 A69-32243

Numerical method based on thin film optics to determine ionospheric electromagnetic transmission and reflection coefficients for vertical incidence
16 p2752 A69-32392

Thin film optical method generalization accounting for intermode coupling and oblique incidence in plane stratified magnetoionic medium applied to ionospheric LF and hydromagnetic propagation
16 p2753 A69-32393

VLF and ULF whistler propagation in magnetosphere for remote sensing magnetospheric plasma parameters, exhibiting characteristic patterns and interaction with plasma
17 p2962 A69-33712

Slow electromagnetic wave propagation in superconducting thin film transmission lines, noting phase velocity dependence on film thickness and spacing
17 p2938 A69-33785

Electromagnetic waves radiation in general time invariant linear media with general boundary conditions, using Green function
17 p2924 A69-33834

Electromagnetic transient wave propagation and reflection in lossless isotropic stratified ionized media, discussing time variations of fields due to incident plane unit step wave
17 p2924 A69-33839

Ray methods application to partial differential equations for electromagnetic wave propagation in ionosphere, discussing strongly and weakly anisotropic inhomogeneous plasma
17 p2925 A69-33840

Electromagnetic beam propagation in anisotropic media, discussing quasi-optical beam divergence
17 p2925 A69-33845

Electromagnetic wave propagation in anisotropic media analyzed for wave packet behavior function stressing waveguide theories
17 p2926 A69-33847

Continuity conditions for drifting magnetoplasma without ionic effects, discussing eigenvalue equation refractive index and electromagnetic modes propagation
17 p2926 A69-33851

Horizontally stratified ionosphere radio wave reflection and transmission properties, calculating full wave by differential equations
17 p2927 A69-33862

Reflection and transmission coefficient matrices for stratified magnetoionic medium determined by thin film optical technique and iteration procedure
17 p2927 A69-33863

Complex refractive index profiles and wave polarizations calculated for electromagnetic waves transmission through ionosphere at micropulsation frequencies
17 p2927 A69-33864

Physical mechanisms for nonlinearities in electromagnetic wave propagation, analyzing plane wave instability, self focused beams propagation and laser oscillations
17 p2928 A69-33867

Electromagnetic wave diffraction in vacuum by equidistant conducting grating, deriving integrodifferential equations for calculating amplitudes
17 p2930 A69-33886

HF electromagnetic waves penetration into slightly ionized plasma analyzed by Maxwell and kinetic equations, giving penetrating electric field by WKB formula
17 p2932 A69-34220

Geomagnetic field latitudinal variation effect on cut-off frequencies of proton whistlers, discussing LF electromagnetic wave propagation in cold multicomponent plasma
18 p3100 A69-34253

Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density
18 p3179 A69-34261

ELF wave propagation in earth-ionosphere waveguide, considering ionospheric vertical inhomogeneity and models for ambient and disturbed /PCA/ conditions
18 p3101 A69-34949

Scattering of electromagnetic waves obliquely incident on inhomogeneous plasma column of parabolic radial density distribution, noting applications to ionospheric irregularities
18 p3102 A69-34963

Plane electromagnetic wave interaction with moving conductive dielectric medium to obtain reflection and transmission coefficients, noting energy transfer
18 p3105 A69-35486

Transverse electromagnetic wave propagation in cylindrically stratified axially magnetized plasma, obtaining plasma properties profiles from method for isotropic media
19 p3266 A69-35619

Interference filter design for IR devices on Fresnel equation basis, analyzing plane electromagnetic wave propagation through stratified dielectric multilayer
19 p3373 A69-36053

Soviet book on electromagnetic wave theory, discussing plane, cylindrical and spherical waves, complex media, wave damping in waveguides and transmission lines, etc
20 p3487 A69-37239

Distortion of electromagnetic pulse propagating through inhomogeneous plasma medium with linear electron density variation
20 p3496 A69-38030

Monochromatic electromagnetic field in resonant medium, examining linear, incoherent and coherent nonlinear propagations and resonant scattering
21 p3769 A69-38382

Atmospheric transmission determined in submillimeter solar radiation spectra using Bouguer law, identifying absorption lines in nocturnal and diurnal spectra
21 p3796 A69-38472

Electromagnetic wave reflection and transmission from boundary between semiinfinite plasma and air by applying static magnetic field
21 p3672 A69-38743

Plane electromagnetic waves penetration into ferromagnetic medium with permeability increasing with magnetic field, showing nonlinearity effect

21 p3771 A69-39109

Electromagnetic waves attenuation and field structure within gas filled dielectric waveguide tube, tube walls and waveguide surroundings

21 p3674 A69-39123

Nonlinear electromagnetic wave propagation by perturbation method previously employed to treat nonlinear boundary value problems involving partial differential equations

21 p3677 A69-39465

Field equations for electromagnetic radiation propagation in accelerated systems including dispersive and nonisotropic media

21 p3772 A69-39466

Electromagnetic wave propagation in nonlinear media, considering evolution and decay of electromagnetic shocks

21 p3697 A69-39670

Electromagnetic wave propagation in semiconductor plate under constant electric field, studying nonstandard carrier energy dispersion law effects on refractive index

22 p3994 A69-40751

Diffraction of plane polarized electromagnetic wave incident on dielectric wedge formulated as singular integral equation, discussing electric field amplitude

22 p3903 A69-41258

Plane EM wave transmission and reflection by semiinfinite isotropic plasma moving in arbitrary direction parallel to boundary, using Lorentz transformation

23 p4114 A69-41360

Electromagnetic propagation in infinite rectangular waveguide surrounded by dielectric medium described by Green dyadic

23 p4115 A69-41570

Earth sphericity and earth-ionosphere waveguide effects on terrestrial atmospherics, deriving form by computer

23 p4157 A69-41860

Dielectric materials permittivity determined by measuring amplitude ratios of reflected and transmitted plane electromagnetic waves

23 p4123 A69-41950

Electromagnetic oscillations emission by monochromatic electron beam in infinite waveguide formed by periodic diffracting array with energy losses, determining radiated power

23 p4124 A69-42031

Electromagnetic wave propagation in rectangular and plane parallel waveguides coupled by common wall with periodic transverse slots

23 p4124 A69-42037

Dispersion and resonant properties of electromagnetic waves propagating along plane metallic strip array with shield and dielectric

23 p4124 A69-42038

Accuracy standards for diffraction measurements of electromagnetic waves incident on periodic arrays, using monochromatic field and plane wavefront

23 p4139 A69-42042

IR radiation transmission in pulsed carbon dioxide discharge as function of time, proposing pumping and relaxation mechanism model

23 p4174 A69-42196

Terrain surface irregularities influencing electromagnetic wave propagation in inhomogeneous atmosphere, using perturbation calculation

24 p4281 A69-42611

Electromagnetic waves incident upon anisotropic plasma, determining transmission and power reflection coefficients

24 p4282 A69-42978

Electromagnetic waveguides direction-changing capability, deriving expressions for permitted bending radius with respect to mode conversion

24 p4288 A69-43331

Electromagnetic theory of surface radiation properties, analyzing specular reflectance of optically smooth surfaces

04 p0684 A69-14357

Monograph on classical electromagnetism via relativity, developing Maxwell equations from Coulomb law

07 p1180 A69-18404

Electromagnetic processes analysis in autonomous inverters simplified by linear graph method to derive characteristic equation

24 p4255 A69-42571

ELECTROMAGNETS

NT HIGH FIELD MAGNETS

NT SUPERCONDUCTING MAGNETS

Soviet collection of papers on electric circuits and electromagnetic systems

01 p0046 A69-10744

Horseshoe electromagnet sensors above ferromagnetic plate, analyzing electromagnetic properties of plate and coil impedance

12 p2094 A69-26719

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop

21 p3827 A69-39755

ELECTROMECHANICAL DEVICES

Electromechanical retracting pedestal for solid target injection into vacuum system and ionization by focused Q switched laser beam

03 p0439 A69-13105

Longitudinal edge effect in primary circuit of open loop linear MHD induction machines, determining forward, reverse and zero sequence currents and voltages

07 p1058 A69-19027

Electrical servopositioning of telemetry reception antenna for tracking satellites, considering weight, stability, etc

11 p1852 A69-25118

Failure engineering analysis of electromechanical switching devices, discussing preanalysis planning, open-ended data sheets, etc

13 p2231 A69-28043

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators

14 p2421 A69-29542

Business aircraft electrical power sources, discussing electromechanical constant speed drive /EMCSD/ and comparison with DC/inverter and hydraulic CSD [SAE PAPER 690346]

15 p2552 A69-30091

Dynamic parameters of full scale and equivalent structures of electromechanical transducer circuits determined experimentally

22 p3869 A69-40249

Electric dose variometer principles, emphasizing differential pressure meter, differential capacitor and capacitor meter

24 p4315 A69-43143

ELECTROMECHANICS

Instabilities for two highly conducting finite length streams in relative motion and coupled by transverse electric or longitudinal magnetic fields

01 p0062 A69-11208

Dynamics of conducting fluid stream coupled to elastic medium by transverse electric or parallel magnetic field, considering stability of system

11 p1923 A69-24289

Electrohydrodynamics of fluids having uniform electrical properties, emphasizing shear effects for interfacially confined electromechanical coupling

18 p3123 A69-34919

Photomechanical and electromechanical effects in semiconductors, considering indentation microhardness decrease caused by light irradiation or electric field

19 p3386 A69-36526

Electromechanical effect dependence on CdS semiconductor surface state, noting relationship between microhardness and discharge current

21 p3781 A69-39072

ELECTROMETERS

Logarithmic response electrometer for upper atmosphere satellite measurements using subminiature vacuum tube

12 p2092 A69-26476

ELECTROMIGRATION

Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation

17 p2935 A69-32889

Electromigration role in material accumulation and depletion forming regions in Au film conductors, discussing regions origin from and correlation with thermal gradients along conductor

17 p2936 A69-32896

ELECTROMOTIVE FORCES

NT PONDEROMOTIVE FORCES

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

03 p0489 A69-13889

Electromotive force along magnetic field induced by liquid metal flow /alpha effect/, giving foundation for self excitation of electromagnetic field

04 p0635 A69-14547

Photocells with p-n heterojunctions from sintered CdS, describing spectral sensitivity and temperature dependence of no-load photo EMF

08 p1374 A69-21084

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

09 p1555 A69-21473

Spontaneous reverse current due to Brillouin EMF observed in diode in thermal noise range

10 p1661 A69-22950

Weak magnetic field dynamics in bounded conducting medium having turbulent motion induced under zero boundary conditions

11 p1922 A69-24240

Induced EMF method for calculation of antenna impedance, discussing effects of approximations in calculation

11 p1851 A69-24997

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

11 p1939 A69-25690

Solar quiet currents in three dimensional ionosphere, considering ionospheric conductivity and horizontal layer equations

12 p2074 A69-26955

Indium arsenide electrical parameters analyzed by kinetic effects, considering conductivity, thermal and magnetothermal EMF and transverse Nerst-Ettingshausen effect

15 p2666 A69-30066

P-type zinc-tin-antimonide crystals electric conductivity, Hall coefficient and thermal EMF found similar to p-type diamond-like semiconductors properties

15 p2667 A69-30197

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

15 p2669 A69-30718

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing

15 p2670 A69-31248

Physical process providing EMF for maintaining electrical structure of stratosphere and mesosphere shown to center in lower ionospheric thermally driven tidal motions

18 p3130 A69-35103

Nb-Ti-C alloys electrical resistivity and thermal EMF noting nearly linear variations with temperature

20 p3558 A69-36976

Transverse thermomagnetic EMF and Nerst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers

21 p3783 A69-39558

Electrical properties of semiconductors in HF electromagnetic field, showing Dember type EMF dependence on carrier response to field inhomogeneity

22 p3993 A69-40605

Thermal EMF in cadmium arsenide specimens with various electron concentrations determined to verify parabolic subband structure of conduction band

22 p3993 A69-40607

Praseodymium germanides resistivity and thermal EMF temperature dependence determined, discussing Hall effect, thermal expansion coefficient, melting point microhardness, etc

23 p4199 A69-42467

ELECTROMYOGRAMS

U ELECTROMYOGRAPHY

ELECTROMYOGRAPHS

U ELECTROMYOGRAPHY

ELECTROMAGNETICS

U ELECTROMAGNETISM

ELECTROMAGNETISM

NT MAGNETOSTATICS

Solar, interplanetary and magnetospheric electromagnetic events before and during magnetic storm from ground observatory and earth satellite data

01 p0156 A69-11120

Electromagnetic forming principles and applications describing large capacitor bank facility design for multipurpose research

[ASTME PAPER MR68-418]

02 p0252 A69-11798

ELECTROMYOGRAPHY

ELECTROMYOGRAPHY

Miniaturized transmitter for single channel biotelemetric system to transmit electromyograms incorporating thin film components

08 p1265 A69-19836

Human operator as servo system element of subassemblies in tracking and equilibrium tasks, stressing results of electromyographic analysis

12 p2025 A69-27081

Surface electromyography/EMG/frequency analysis of normal and pathological muscle or nerve contraction as diagnostic tool for industrial physician

21 p3664 A69-38920

Muscle function measurement in astronauts using electromyogram, electrocardiogram and isometric tension at fixed percentage of maximum voluntary contraction

23 p4103 A69-41684

ELECTRON ACCELERATORS

NT BETATRONS

Sudden acceleration of electrons in magnetosphere and magnetic tail related to magnetic bays, noting acceleration occurrence first in magnetosphere during polar substorm

04 p0594 A69-15122

Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 Mev Dynamitron electron accelerator recalibration

06 p0907 A69-17705

Electron acceleration in microtron through injection from low pressure gas discharge plasma

08 p1279 A69-19803

Plasma wave excitation and dissipation in fast thetatron discharge, indicating electron nonadiabatic inductive acceleration without equilibrium orbit

09 p1552 A69-22046

Outer radiation zone electron intensities during magnetic storms for morphology of zone electron acceleration mechanisms

11 p1950 A69-25147

Auroral electrons intensity modulation by source at L equals 6 magnetic shell on geomagnetic equator, noting dispersion effects

12 p2065 A69-26108

Potential mechanisms of electron acceleration inside magnetosphere, measuring power spectrum of X rays by electron braking in upper atmosphere

12 p2066 A69-26295

Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring

12 p2148 A69-26787

Artificial aurora generated at 100 km altitude by electron beam fired downward from aerobee 350 rocket above 230 km along earth magnetic field lines

18 p3127 A69-34365

Nanosecond photography with superradiant light source, X rays or electrons using multipurpose electron accelerator, obtaining stop motion pictures

19 p3305 A69-35721

Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorelaxation effect and pitch angle anisotropy removal

19 p3424 A69-36336

Low energy electron accelerator to produce measurable small fluxes through photoelectric effect from Au cathode UV irradiation to achieve high flux stability

19 p3313 A69-36492

Continuous electron acceleration in astrophysics, discussing Crab Nebula X ray flux and galactic and extragalactic radio source power law spectra

24 p4355 A69-42696

ELECTRON ATTACHMENT

NT NUCLEOPHILES

Double probe characteristics in flame with electronegative gas injection interpreted in terms of conduction of ions in ionized medium

01 p0176 A69-10385

Chemical reaction fluctuations and oxygen electron attachment omission effects on density fluctuations in turbulent wakes, noting electron density fluctuation, bimodal model, etc

02 p0233 A69-12538

Negative ion-molecule reactions in nitrous oxide using mass spectrometer, noting negative ion concentration pressure dependence

06 p0960 A69-17106

Flame inhibition with electron attachment observed using halogenated hydrocarbons

06 p1034 A69-17926

Ionization and attachment coefficients in oxygen at low pressures, noting Paschen curves near minimum sparking potential and secondary ionization coefficient

08 p1354 A69-20099

Region of transition from laminar to turbulent flow in meteor trains, suggesting electron attachment processes to molecular oxygen in presence of third body

08 p1393 A69-20608

Radiative capture of electrons by chlorine, bromine and iodine atoms in shock heated plasma seeded with sodium halides from absolute intensities in continuous emission

08 p1355 A69-20735

Electron detachment cross sections for negative atomic and molecular O ions with incident energies between 3 and 100 ev

09 p1542 A69-21625

Oxygen and NO ions yields produced by dissociative attachment of electrons to nitrogen dioxide as function of electron energy, considering electron affinities lower limits

13 p2301 A69-27363

Ionization and attachment of thermal electrons in oxygen and airlike nitrogen-oxygen mixtures during electron irradiation

13 p2302 A69-27456

ELECTRON AVALANCHE

Avalanche multiplication in abrupt silicon p-n junctions analyzed using ionization coefficient measurements for holes and electrons

01 p0135 A69-10038

Silicon p-n junction avalanche current temperature dependence calculation by considering space charge current and multiplication factor as function of temperature

01 p0136 A69-10245

Planar transistor micromode operation during collector junction avalanche breakdown

01 p0047 A69-10884

Current-voltage characteristics of avalanche transistors, noting impact ionization

02 p0218 A69-12266

Conductivity in p-n junctions during avalanche breakdown at HF calculated, noting agreement with experiments

03 p0492 A69-14164

Electric field growth directional effect on avalanche breakdown conditions in p-n junctions

06 p0981 A69-17828

Microwave spectrum of n-InSb avalanche plasmas under magnetic field, considering dynamic current-voltage characteristics, hole wave instabilities and microwave emission processes

07 p1197 A69-18466

Breakdown voltage and avalanche drift instability factors in planar passivated p-n junctions as function of oxide thickness and mobile charge

10 p1743 A69-23174

Avalanche transistor pulse circuits temperature increase due to power dissipation, noting effects of external resistance grounding base and pinch in

11 p1845 A69-24570

Planar transistor micromode operation during collector junction avalanche breakdown

12 p2041 A69-26648

Angular distribution function calculations for avalanche electrons at various stages of cascade development, discussing electron energies and primary electron roles

13 p2303 A69-28414

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes

15 p2573 A69-30062

ELECTRON BEAM WELDING

High strength steel welding with physical properties equal to parent metal, discussing gas tungsten-arc, electron beam and plasma arc techniques

01 p0088 A69-11399

Electron beam welding of beryllium, discussing procedures, weld quality and tensile strength efficiencies

02 p0252 A69-11863

Electron beam welding procedure planning and production shop control parameters

04 p0605 A69-14529

Electron beam welding using glow discharge as source of electrons, noting hollow anode gun design and electrode geometry influence on beam shape

04 p0608 A69-15480

Electron beam process application to welding, machining and assembling in automobile mass production

04 p0608 A69-15484

Weldability of thermally stable titanium alloy, noting properties of electron beam and submerged arc welding

06 p0940 A69-17092

Welding methods used for Ti and Ti alloys and difficulties encountered

07 p1139 A69-18789

Energy consideration in electron beam welding, obtaining expression for penetration decrease in terms of thermal diffusivity

08 p1320 A69-20360

Metallic systems microbonding and joining reliability, noting electron and laser beam welding and deposited film connections

09 p1510 A69-22348

Electron beam welding of Lunar Module Descent Engine, emphasizing variable area injector element and manifold assembly problems and techniques

12 p2102 A69-26621

Electron beam welding characteristics for aircraft components and design noting limitations

15 p2617 A69-30089

Electron beam welding method for very thin foils, discussing welding of pinhole free Ni, Cu and stainless steel foils

17 p2977 A69-32854

Electron beam welds orientation effects on tensile and deformation properties of strengthened and welded austenitic stainless steels

18 p3151 A69-35432

Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications

19 p3320 A69-35555

Electron beam welding for repair and production, discussing application to Ti VHF antennas, Concorde switchgears and nuclear reactor loading tubes

20 p3550 A69-37451

Electron beam welding machine modifications for welded airframe components production, discussing work chamber, vacuum system and workpiece mounting

20 p3550 A69-37455

Electron beam welding for fabrication of aircraft structures, discussing fatigue strength of Ti and Al alloys and marring and low alloy steels

20 p3550 A69-37456

Fracture and tensile properties of electron beam welded Al alloy for pressure vessels compared to gas tungsten arc welding results

24 p4319 A69-42941

ELECTRON BEAMS

Weak signal interaction between electron beam and microwave resonators, obtaining electron conductance, gain and transfer admittance

02 p0208 A69-12265

Scanning electron beam display of space charge of defects and junction behavior of edge dislocation array in Ge and Si monocrystals

02 p0301 A69-12661

Temperature dependence of electron beam pumped GaAs laser threshold current density and emission spectra, noting doping effects

02 p0260 A69-12683

Electron beam meter application as lunar surface electric field detector, discussing breadboard model and performance characteristics

03 p0429 A69-13221

Modulated photocurrent in CdS crystal obtained by irradiation with intensity modulated electron beam, noting relaxation time and trap concentration

03 p0490 A69-13946

Experimental equipment and procedure to investigate defocusing of electron beam directly in cavity beam hole of TWT amplifier

03 p0407 A69-13975

Nonlinear cross sectional space charge density distribution in electron beam of traveling wave tube

03 p0407 A69-13984

Equations for self oscillating mode of operation for O-type backward wave generator with electrostatically focused electron beam and finite values of amplification parameter

03 p0407 A69-13986

Interaction between surface waves propagating along plane plasma boundary and parallel low density electron beam, noting wave amplification and excitation

03 p0480 A69-14135

Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation

04 p0640 A69-14449

Pulsations of relativistic and nonrelativistic narrow /paraxial/ electron beams with spatial axis curved ac-

cording to various laws, deriving approximate descriptive equations

04 p0632 A69-14981

Smear out electron beam generation for experiments on weak plasma turbulence by passing beam through aluminum foils

04 p0636 A69-15020

HF interaction of relativistic electron beam and plasma extended to include arbitrary variation of plasma density

04 p0637 A69-15046

Surface potential measurements for flat conductors or semiconductors using scanned electron beam probe

04 p0601 A69-15115

Electron cyclotron instability and HF ionization in beam-plasma experiment using electron beam guided by magnetic field through He gas

05 p0798 A69-15612

Focusing of relativistic cylindrical electron beam in static axial electric and magnetic fields, using least action principle to derive trajectory differential equation

05 p0796 A69-15715

Electron beam modulation of germanium reflectance

05 p0807 A69-15816

RF electron heating by beam-plasma interaction in uniform magnetic field

05 p0804 A69-16458

Velocity distribution of plasma electrons in electron beam generated He plasma using Boltzmann equation, neglecting electron-electron collisions

05 p0805 A69-16705

Wave dispersion analysis for amplification in cold plasma filled cylindrical waveguide penetrated by electron beam of same radius

05 p0736 A69-16790

Light valving techniques applied to large screen display of computer generated video information, noting electron beam control mechanism for transmitted light

06 p0928 A69-17922

Beam modulation resynchronization at large signal levels by TWT circuit wave to enhance efficiency

07 p1094 A69-18423

Traveling wave amplifiers beam defocusing by RF circuits and space charge fields under large signal operating conditions, discussing magnetic field strength

07 p1094 A69-18424

High power microwave interactions in pulsed electron beam plasma klystron

07 p1095 A69-18433

Small signal coupled mode analysis including relativistic effects for studying spiraling electron beam interaction with fast wave circuits

07 p1114 A69-18436

Microwave oscillations during interaction between electron beam and plasma in electron tube

07 p1189 A69-18504

Wave propagation on cylindrical electron beam in vacuum and in plasma background, including relativistic effects

07 p1189 A69-18657

Periodic electrostatic focusing structures in microwave tubes, evaluating properties by action function method

07 p1102 A69-18659

Thin electron flux interaction with electromagnetic wave in open waveguide, discussing nonlinear theory and performance of gyroresonance transverse wave tube

07 p1107 A69-19159

Cold plasma stability during traversing by electron beams in presence of external magnetic field, obtaining dispersion relations for longitudinal and transverse modes

07 p1195 A69-19465

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam

08 p1358 A69-19805

GaAs laser employing external resonator with thin film active substance, noting output power and emission thresholds during electron beam excitation

08 p1326 A69-20543

Analog study of periodic permanent magnet focusing, considering ray equation, beam radius dependence on distance, amplitude variations, etc

08 p1285 A69-20555

Contour of axisymmetric holes in dimensional electron-beam machining calculated from density distribution of transmitted energy

08 p1321 A69-20727

Finite ion mass effect on stability of space charge neutralized electron beam

09 p1545 A69-21342

Electrons resonant heating in beam plasma discharge, discussing ion cyclotron wave excitation in hot electron plasma produced by electron beam

09 p1549 A69-22016

Optimal working parameters and operational characteristics of laboratory electron gun, examining beam shape, convergence and current density distribution

09 p1464 A69-22243

High temperature electron component of plasma produced by strong electron beam in adiabatic magnetic trap, deriving turbulent diffusion coefficient dependence

09 p1553 A69-22657

Quasi-linear relaxation of electron beam in magnetoactive plasma, noting instability of plateau in velocity distribution function

09 p1553 A69-22659

Combined electron microprobe and ellipsometric study of thin silicon dioxide films on silicon, noting reliability and accuracy

10 p1742 A69-22946

Plasma electron beam nonlinear interaction, considering equations of motion of electron distribution function, plasma wave spectrum and mode coupling effects

10 p1729 A69-23407

Electron beam addressed electrooptic light valve used as spatial filter, discussing electronic control and optical processing in real time

10 p1697 A69-23870

Landau type interaction between electron beam and whistler/helicon wave electric field within semiconductor /InSb/

10 p1742 A69-24107

Collection of papers on electron beam and laser beam technology covering cold electron emitters, space charge flow, gas lasers, microelectronics, thin polycrystalline films

11 p1846 A69-24596

Unrippled space-charge flow in dense axially symmetric electron beams as basis for electron gun design

11 p1846 A69-24598

Thin polycrystalline film structure and formation, using electron beam instrument

11 p1936 A69-24601

Image tube storage target mesh electrode structure and transmission data for electron beams of various velocities, noting secondary electron redistribution control

11 p1848 A69-24749

Linear interaction of electron beam and plasma in magnetic field noting convective wave instability, wave dispersion and properties behavior

11 p1929 A69-25267

Synchrotron radiation amplification by monoenergetic electron stream helically gyrating in static magnetic field of cold plasma, discussing amplification rate frequency dependence

11 p1931 A69-25361

HF electrostatic waves propagation excited by electron beam in hot inhomogeneous plasma in magnetic field, studying wave transformation and absorption

11 p1931 A69-25364

Paraxial electron beams from Pierce gun and spreading due to thermal velocities and space charge in nonuniform potential

12 p2036 A69-25920

Direct electron beam shadowgraph photographic /betagraphy/ technique for recording small high speed objects with 3 nanosecond exposure time

12 p2086 A69-26164

Continuous polarized electron beam produced from spin conversion in ionizing reactions involving optically pumped metastable atoms in He discharge

12 p2130 A69-26312

Plasma-electron beam interaction induced HF oscillations, obtaining nearly noise free oscillations

12 p2137 A69-26529

DC to RF energy conversion in ungridded klystron gaps, calculating efficiency and optimum load conductance as function of gap dimensions

12 p2041 A69-26629

LF oscillations nonlinear excitation increment in plasma by electron beam found proportional to reciprocal of wave potential

12 p2138 A69-26709

Two beam electron flux instability in crossed magnetic and inhomogeneous electric fields using linearized hydrodynamic and Lagrangian formalism approximation

12 p2133 A69-26714

Instabilities related to particles transit time in system of two counterstreaming electron beams of finite length, noting wave dispersion

12 p2141 A69-27179

Metastable molecules and fragments produced by electron excitation of nitrogen, hydrogen, carbon dioxide and nitrous oxide, noting excitation functions, kinetic energy, etc

13 p2301 A69-27362

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current density measurement

13 p2271 A69-27467

Plasma lens device for focusing ion or plasma beams with closed electron drift

13 p2307 A69-27658

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam

13 p2318 A69-27886

Nonmagnetic ionization gage consisting of quadrupole lens systems excited at HF, discussing electron focusing during operation

13 p2263 A69-28084

Microwave and LF oscillations interactions in plasma beam system, showing oscillation amplitude dependence on frequency relationships

13 p2312 A69-28111

Waves propagating along rotating electron beam and interacting with magnetized plasma waveguide slow waves

13 p2312 A69-28118

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques

13 p2242 A69-28267

Spatial harmonics of harmonic frequency instabilities of cyclotron half frequency in system of two symmetrical electron beams confined by magnetic field

13 p2314 A69-28364

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency

13 p2314 A69-28443

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes

13 p2315 A69-28571

Double beam parametric electron amplifier with compensation of difference channel, noting beams noise removal

13 p2237 A69-28578

Electric field distribution in TWT electron beam deflection system determined, accounting for current-voltage characteristics dependence on electromagnetic field distribution

13 p2237 A69-28582

Frequency distribution and statistical characteristics of high level RF noise produced by high perveance electron beam of magnetron injection gun /MIG/

14 p2449 A69-29558

Energy resolution improvement in cylindrical electrostatic energy selector by focusing and limiting electron beam before entrance into monochromator

14 p2450 A69-29572

Small signal analysis of processes in klystron resonators involving beam-field interaction

15 p2573 A69-30117

Molecular benzene emission spectra excited by electron beams in RF modulated source, tabulating lifetime measurements

15 p2562 A69-30468

Ionization within intersecting alkali atomic and slow electron beams, observing ionization cross sections increment near ionization threshold

15 p2655 A69-30726

Three dimensional effects of potential minimum near cathode emitting axisymmetric beam, relating electric fields distribution to noise reduction coefficient

15 p2568 A69-30794

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability

15 p2662 A69-30964

Electron beam exposure system to photoetch integrated circuit patterns without photomasks, using electronic computer for automatic pattern generation and registration

15 p2579 A69-31039

Electronic-ultrasonic amplifiers with external electron stream and longitudinal or surface wave studied for damping influence, deriving dispersion equation

16 p2761 A69-32061

Electron beam rotational temperature, noting discrepancies between experimental values and iterative calculations due to secondary electron effects

16 p2814 A69-32175

Turbulent heating of ions and electrons by interaction between magnetically collimated electron beam and electron beam self generated plasma
17 p3014 A69-33827

Plasma generation and heating by electron beam-plasma interactions, discussing HF fields excitation and absorption
17 p3014 A69-33828

Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment
17 p3014 A69-33829

Plasma-cyclotron interaction wave coupling mechanism in symmetrical double beam system in uniform magnetic field leading to unstable wave excitation along beam
17 p3015 A69-33831

Artificial aurora generated at 100 km altitude by electron beam fired downward from aerobee 350 rocket above 230 km along earth magnetic field lines
18 p3127 A69-34365

Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure
19 p3291 A69-35722

Quantitative photographs of low density flowfields during shock tunnel tests using electron beam excitation with image intensifier tube detector
19 p3292 A69-35723

Axially symmetric magnetic fields for constant radius annular electron beams reflection, applying results to design of reflex klystron millimeter oscillator
19 p3267 A69-35930

TV camera tubes with electron beam scanning adapted to IR imaging, emphasizing vidicon
19 p3311 A69-36069

Jet and Mach disk density measured by fluorescence electron beam technique, calculating Mach disk thickness from density profiles
19 p3239 A69-36396

Vibrational temperature of low density nitrogen measured by electron beam method, discussing relationship to ratio of integrated vibrational band intensities
20 p3579 A69-37222

Solar bremsstrahlung intensity dependence on heliographic longitude, noting maximum intensity shift toward electron beam direction
20 p3589 A69-37552

Ambient atmospheric temperature and molecular nitrogen density measured simultaneously by rocket-borne electron beam luminescence method
20 p3543 A69-37799

Dynamic electron beam devices for refractory materials evaporation, discussing electron guns and vaporization film data
[ASM PAPER D8-22.2] 20 p3551 A69-38131

Luminous tenuous collimated electron beam from plume of MPD arc in fiberglass vacuum tank, examining beam trajectory in geomagnetic fields
20 p3582 A69-38236

Electron beam pumped semiconductor laser light beam amplitude and phase distribution, studying effects of inhomogeneous excitation by model
21 p3737 A69-39041

Changes in CdS crystals spontaneous and coherent emissions caused by electron beam radiation damage, determining intensity and spectral composition dependence
21 p3780 A69-39047

Electron beam pumped dislocation free GaAs lasers filamentary and nonuniform emission characteristics from X ray topographs before and after bombardment
22 p3963 A69-40565

Linear self consistent diffraction emission theory and relationship to electron beam propagation
22 p3899 A69-40615

Self consistent flow calculation in dense space charge beams, including electrode design for portions isolation
22 p3985 A69-40668

Electric field regions of p-n junctions using electron beam deflection measurement, noting application to Si specimens
22 p3994 A69-40752

Electron beam injection into magnetic trap, obtaining plasma by ionization of supersonic argon flow passing through system
22 p3990 A69-40791

Electronically controlled microwave phasers and time delay elements design and operation, discussing beam width, steering and effects, directivity and planar arrays
23 p4135 A69-41353

S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751

Electromagnetic oscillations emission by monochromatic electron beam in infinite waveguide formed by periodic diffracting array with energy losses, determining radiated power
23 p4124 A69-42031

Space charge wave propagation induced by electron beam moving in annular waveguide, considering radiated field and current redistribution
23 p4124 A69-42034

Atmospheric gases emission spectra excited by electron beam as function of pressure
24 p4353 A69-43698

ELECTRON BOMBARDMENT

High energy neutral molecule beam for gas-surface interaction studies generated in electron bombardment ion source
19 p3376 A69-36176

Effective Gaunt factors for threshold excitation of positive ions by electron collisions for 23 dipole transitions in 15 isoelectronic sequences
20 p3581 A69-38175

Cations desorption from O, H and N films adsorbed at graphite surface under electron bombardment, studying desorption cross sections discrepancies
22 p3972 A69-39957

Proton ejection as hydrogen ion clusters by low energy electron bombardment of solid hydrogen
24 p4389 A69-43747

ELECTRON BUNCHING

Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves
01 p0047 A69-10882

Klystron bunching analysis, adding electron overtaking formulation to existing nonlinear space-charge wave theory
02 p0215 A69-11939

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices
05 p0799 A69-15646

Relation between electric field strength and mean energy for electron swarms in oxygen determined, using Boltzmann transport equation
11 p1921 A69-24419

Power saturation in isochronal traveling wave tube explained by motion of electron bunches relative to waves
12 p2041 A69-26646

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices
16 p2823 A69-32503

ELECTRON CAPTURE

Trapping parameters of Fe doped GaAs-GaP, measuring thermally stimulated conductivity and space charge limited currents
02 p0296 A69-11789

Energy distribution and capture cross section ratio limiting factors in semiconductors with deep energy levels
02 p0299 A69-12562

Spectroscopy of fast atoms resulting from fast ion impact with gas targets and electron capture into excited state
03 p0471 A69-13162

Polar auroral region cosmic radio noise absorption bays diurnal variations attributed to drift of electrons captured in magnetosphere
03 p0423 A69-13520

Region of plasma electron capture during cyclotron electron resonance in magnetic trap with mirrors
03 p0478 A69-13849

Collection efficiency of continuous dynode electron multiplier arrays, discussing incident electron current
06 p0897 A69-17699

Thin semiconductor plates negative differential resistance associated with captures at surface, describing electron gas by electron temperature
08 p1374 A69-21081

Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential
09 p1593 A69-21655

Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping
10 p1744 A69-23179

High latitude capture region boundary for electrons in upper radiation belt determined relative to current electrojets in ionosphere from satellite observations
13 p2327 A69-27700

Capture levels at photosensitive CdS crystals surface determined by studying field effect mobility dependence on electric field
13 p2318 A69-27884

Electron reactivity of one equivalent oxidizing agents at ZnO surface by electrochemical reduction
19 p3392 A69-36731

Galactic X ray flux from H I region low energy cosmic ray nuclei, studying electron capture effects on line intensities
24 p4367 A69-43048

ELECTRON CLOUDS

Variable radio sources observation at 9.55 mm wavelength, discussing flux density and electron cloud expansion
13 p2334 A69-27309

ELECTRON COUNTERS

Low energy electrons on day side of magnetosphere observed with MIT electron detector on OGO 3 satellite
03 p0503 A69-14027

Photoelectron counting in extreme UV using windowless photomultiplier detectors as photon counters
04 p0595 A69-14277

Satellite-borne auroral particle spectrometer calibration to minimize uncertainty in measuring absolute particle flux of electrons and protons
04 p0599 A69-15022

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays [IEEE PAPER 3C-4]
07 p1135 A69-19198

Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability
19 p3284 A69-36676

Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition
20 p3544 A69-37878

ELECTRON DECAY RATE

Inhomogeneous distribution of nonequilibrium current carrier concentrations in semiconductors with electrons and holes of different lifetimes, noting instability
15 p2665 A69-30041

Air afterglows electron loss mechanisms, measuring electron densities decay rates after microwave ionization
22 p4006 A69-40527

ELECTRON DENSITY [CONCENTRATION]

NT IONOSPHERIC ELECTRON DENSITY

NT MAGNETOSPHERIC ELECTRON DENSITY

Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface
01 p0136 A69-10253

Generalized pair of space correlation and wave number spectrum functions applied to plasma electron density fluctuations and velocity fluctuations of background fluid
01 p0127 A69-10339

Dense plasmas produced by explosions of wires and mercury filaments, discussing plasma conductivities
01 p0128 A69-10391

Exosphere diurnal and latitudinal variations in electron and proton content, ion composition, and electron, proton and positive O ion densities
01 p0063 A69-10422

Electron density in arc discharge between carbon electrodes and in discharge with Na vapor, noting relation to temperature and current
01 p0128 A69-10433

Galactic H II regions morphology from high resolution radio observations, noting variation of electron density with region size
01 p0151 A69-10552

Spectroscopic investigation of high density plasma from Li exploded wires
01 p0129 A69-10662

End holes and glass tube effects in TM 010 mode measurements of average electron number density in cylindrical plasmas
01 p0131 A69-10812

Differential Faraday technique to determine electron content latitude dependence in Northern Hemisphere during magnetically disturbed periods in March 1966
01 p0146 A69-11128

Solar corona electron density, polarization, temperature and monochromatic emission during November 1966 eclipse
02 p0310 A69-11457

- Capillary arc source spectroscopy, determining plasma temperature and pressure dependence on capillary geometry and discharge current
02 p0286 A69-11573
- Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature
02 p0283 A69-11834
- Scaling laws for RF discharge experiments in ionized environments, considering proper limit variables for simulation of electron density
02 p0283 A69-12241
- Electron density measurement technique for dense thick steady state plasmas using swept microwave interferometer
02 p0290 A69-12349
- Chemical reaction fluctuations and oxygen electron attachment omission effects on density fluctuations in turbulent wakes, noting electron density fluctuation, bimodal model, etc
02 p0233 A69-12538
- Solar corona delay effects on pulsar signals due to inhomogeneities in coronal electron density
02 p0328 A69-12727
- Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma conductivity and flow velocity for electron temperature and density
[ONERA-TP-649]
03 p0473 A69-12877
- Emitted light and excited state populations resulting from two electron collisional radiative recombination related to free electron density
03 p0469 A69-12923
- Average plasma electron density measurement by feedback oscillator to determine dielectric constant
03 p0473 A69-13103
- Automatic recording of neutral atom temperature and free electron density of partially ionized gas by Fabry-Perot interferometer
03 p0428 A69-13111
- Nighttime sporadic E layer occurrence due to ionization redistribution established, noting concurrent F region electron concentration decrease
03 p0423 A69-13536
- Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons
03 p0489 A69-13889
- Low energy electrons on day side of magnetosphere observed with MIT electron detector onOGO 3 satellite
03 p0503 A69-14027
- Frequency of damped oscillations in plasma in DC field, noting variation with electron density and DC field
03 p0479 A69-14050
- Time resolved electron number density and electron temperature in decaying plasma using laser interferometer
03 p0432 A69-14187
- Discontinuities in plasma situated in magnetic field, noting drift of quasi-neutral inhomogeneities of electron and ion density
04 p0634 A69-14431
- Electron density variation in region of change of regime in gas discharge excited by HF capacitance and external electrode
04 p0637 A69-15060
- Ultrahigh speed holographic interferometry for studying plasmas produced by focused laser beam, noting electron density evolution in deuterium plasma
05 p0760 A69-15587
- Electron density measurement in rapidly varying plasma, using improved Mach-Zehnder interferometer
05 p0760 A69-15613
- Low dispersion spectrograph for temperature and electron density determination in plasma beam
05 p0803 A69-15997
- Electron concentration in pulsed plasma measured with Fabry-Perot interferometer and laser radiation source
06 p0963 A69-16911
- Ionization index, electron formation and effective recombination coefficient in E 2 layer, noting solar activity effect
06 p0920 A69-17725
- Theta pinch plasma electron density and temperature distributions measured using Thompson scattering of laser light and plasma bremsstrahlung
06 p0972 A69-18220
- Focused electromagnetic beam interferometers and antenna parameters for measuring electron density in plasma diagnostics
07 p1132 A69-18865
- Whistlers and VLF emissions from ground based and satellite measurements, applying results to electron density mapping and ion detection
07 p1127 A69-19354
- Three dimensional Fourier synthesis at low resolution for calculating ribosome electron density distribution in chromatoid bodies
07 p1074 A69-19394
- Free fall theory for afterglow decay of average electron density and temperature in pulsed cylindrical mercury vapor discharge plasma
08 p1358 A69-19811
- Plasma electron density and collision frequency determination, using CW maser interferometer
08 p1359 A69-19987
- Electron density measurement in solar flare spray using discrepancy between measured and theoretical polarization
08 p1378 A69-20244
- Population densities of UV bound resonance lines of neutral helium for 41-level model atom, discussing optical thickness and electron temperature and density
08 p1390 A69-20392
- Ambipolar diffusion in electron concentration inhomogeneities of weakly ionized plasma in magnetic field analyzed by linearized quasi-hydrodynamic equations
08 p1362 A69-20426
- Spectroscopic diagnostics for determining temperatures, electron densities and line shapes in optically thick plasmas
08 p1363 A69-20466
- White dwarfs transfer to superconducting state, using BCS theory for superconducting transition temperature dependence on electron density
08 p1391 A69-20546
- Dimensions, temperature and electron density of quiet solar corona from radio interferometer measurements, noting activity and temperature at solar maximum and minimum
08 p1393 A69-20573
- Pulsar distance estimates, discussing effect of interstellar electron and H densities and temperature dependence of H density-electron density ratio within disk
08 p1397 A69-20698
- Laser produced blast wave expansion measured by microwave technique, obtaining surface temperature and electron density
09 p1514 A69-21324
- Voltage dependence of mobility limited electron current density in gas filled diode for collision frequency proportional to electron speed
09 p1462 A69-21326
- Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity
09 p1453 A69-21525
- Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients
09 p1485 A69-21529
- Electron content of earth-Venus interplanetary medium measured by observing relative propagation time of radar pulses to Venus
09 p1594 A69-21697
- HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility
09 p1557 A69-21737
- Valence electrons mean density stability in Ti and V monoxides, describing mechanism for filling M vacancies with simultaneously forming O vacancies
09 p1523 A69-21738
- Spectroscopic measurements of electron density and temperature for quasi-saturation region of ignited mode plasma in planar thermionic converter
09 p1439 A69-21826
- Fission fragment generated plasma applicability to thermionic energy converters from electron density, temperature and transport studies
09 p1440 A69-21829
- Strongly doped n-type indium antimonide, determining dependence of limiting electron concentration on dopant impurity nature
09 p1558 A69-21869
- Electron density fluctuations in turbulent wakes of hypersonic projectiles in ballistic ranges, discussing use of cylindrical Langmuir probe for direct measurement
09 p1496 A69-21934
- Electron concentration at front of anisotropic plasma expanding in axial direction in electrodeless induction discharge from measurements of reflected microwaves
09 p1550 A69-22027
- Structure and properties of high heat resistant alloys based on high melting point metals with bcc lattice explained by electron theory
09 p1525 A69-22139
- Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface
09 p1559 A69-22646
- Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal
10 p1731 A69-23436
- Electrical conductivity, electron density and population temperature as functions of current density in Cs-He thermal plasma studied with nonequilibrium ionization model
10 p1732 A69-23443
- K coronameter observations used to construct electron density models of corona above proton flare region of July 1966
10 p1763 A69-23733
- Polarization measurements of July 1966 proton flare, considering electron scattering and density
10 p1764 A69-23740
- Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions
10 p1741 A69-23962
- Electron concentration and temperature dependence on gas temperature as factor determining He-Ne laser output at 6328 Å
10 p1706 A69-24078
- Thermodynamic stability of dense plasma consisting of electrons and charged ions, plotting ionization potential as function of electron density and temperature
11 p1922 A69-24232
- Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity
11 p1925 A69-24310
- Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
11 p1925 A69-24315
- Solar flare and magnetic storm signals from ATS 1 geostationary satellite on May 28, 1967, deriving total electron content
11 p1951 A69-25161
- Temperature and electron concentration in plasma spark obtained in air by focusing Q switched laser radiation
11 p1928 A69-25235
- Free electron density upper limits in plasma attributed to negative ion formation, noting effect on ionization equilibrium calculations for stellar atmospheres
11 p1928 A69-25255
- Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons
11 p1939 A69-25690
- Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations
11 p1935 A69-25757
- Electron concentrations in steady Ar and Ar-He plasma jets measured with microwave Fabry-Perot interferometer and Stark broadening of H beta line
12 p1237 A69-26537
- RF synchrotron radiation emitted by electrons trapped in geomagnetic fields above auroral zones, discussing electron flux and cosmic background
12 p1251 A69-26949
- Unified model for spatial distribution of transpolar exospheric electron density for polar plasma study
12 p1251 A69-26952
- NGC 4151 bright lines intensity, electron density, temperature and ions quantity evaluation from spectrograms with 140 Å/mm dispersion
12 p1264 A69-27021
- Rocket observations of visible and UV dayglow, using electron density and temperature measurements for emission rates of various excitation mechanisms
12 p2076 A69-27108
- Carbon dioxide laser as light source in Michelson interferometer for plasma electron density measurement
12 p2100 A69-27177
- Ultimate resolvable line dependence of Balmer series on electron density, considering line broadened by Stark and Doppler effects
13 p2351 A69-27865

Longitudinal magnetoresistance oscillations in n-type GaSb single crystals associated with electron concentrations minima

13 p2319 A69-27900

Dissipative drift instability due to electron density gradient and dissipative mechanism /neutral-electron and ion-electron collisions/ in plasma in constant magnetic field

13 p2308 A69-27979

Primary particle energy and extensive air shower electron density relationship derived from vertical spectral profiles

13 p2331 A69-28396

Proton initiated nuclear cascade in atmosphere calculated using Monte Carlo method, relating electron number to primary proton energy

13 p2331 A69-28397

Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time

14 p2510 A69-28938

Equatorial electrojet VHF radar observations indicating nontwo stream electron concentration irregularities related to electron drift velocity

14 p2511 A69-28953

Free electron model for electron work functions and number density distributions and surface potentials in metals

14 p2504 A69-29009

Low voltage arc in cesium thermionic converter, investigating current-voltage characteristics, electron temperature, electron density and plasma potentials in ignited mode

14 p2401 A69-29231

RF impedance method for electron density and collision frequency in plasma

14 p2492 A69-29352

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time

14 p2492 A69-29636

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line

14 p2494 A69-29767

Fabry-Perot interferometer employing gas laser for plasmoid electron concentrations measurement at 3.39 micron wavelength

14 p2451 A69-29778

Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons

14 p2496 A69-29780

Electron temperature and concentration in plasma determined by measuring diamagnetic signal and IR radiation intensity, emphasizing usefulness in plasmoid head portion

14 p2496 A69-29785

Plasma electron density measurement from phase shifts of electromagnetic wave groups propagation

14 p2497 A69-29796

Three channel microwave FM phase meter for studying plasma electron concentrations directional distribution without interferences between channels

14 p2497 A69-29799

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, giving block diagrams of meter, detector and oscillator

14 p2451 A69-29800

Amplitude and scale of microscopic fluctuations of electron density within M8 from brightness ratios of O II lines, using multiple shell model

14 p2514 A69-29949

Radiative instability problem of stream plasma system in kinetic regime, discussing Fung letter

14 p2502 A69-29960

Electron densities measurement in plasmas in magnetic fields from profiles of spectral lines, noting Stark and Zeeman effect

15 p2657 A69-30027

Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels

15 p2666 A69-30060

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field

15 p2666 A69-30061

Argon afterglow microwave and spectroscopic studies, monitoring time-varying electron density and temperature and extracting electron-ion recombination coefficients

15 p2658 A69-30173

Electronic density of collisional cesium plasma, comparing measurements made by Langmuir and HF spherical probes

15 p2659 A69-30300

Free electron concentrations and dispersion in H I regions noting ionized interstellar gas components role

15 p2681 A69-30420

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability

15 p2662 A69-30964

Electron concentration in low temperature nonequilibrium steady state plasma, including Saha equation applicability criterion

15 p2662 A69-30975

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges

15 p2593 A69-31161

Electron and ion density distributions in propagating current sheet in Z pinch discharge in argon obtained by microwave reflection interferometer

16 p2816 A69-31639

Steady state density profile dependence on electron density dependence of net volume ionization rate by analyzing ambipolar diffusion in RF excited magnetized plasmas

16 p2818 A69-31672

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power

16 p2749 A69-31703

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed

16 p2825 A69-31708

Density ratios of H ions to H atoms in ground state calculated as function of quasi-neutral plasma electron density

16 p2820 A69-31770

High temperature ionized turbulent argon jet gasdynamics noting electron density

16 p2770 A69-31889

Spectral density function derivation for energy scattered from underdense turbulent wake

16 p2732 A69-31893

Electron concentration and mass density behind reflected shock in ionizing argon, using time resolved two wavelength interferometry

16 p2771 A69-31918

Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation

16 p2822 A69-32041

Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity

16 p2754 A69-32520

Vertical transport rate of charged particles in F region, allowing for vertical velocity gradients

16 p2783 A69-32524

Electron density measurement method in plasma or vacuum based on refraction index in optical frequency range using laser interferometer mismatch as criterion

16 p2798 A69-32583

Hydrogen line profiles, equivalent widths and electron densities for peculiar alpha 2 CVn and gamma Lyr stars

16 p2864 A69-32594

Faraday effect and permittivity of hydrogen plasma measured simultaneously, determining electron density and collision frequency

17 p2919 A69-33394

Electron temperature and number density measured at atmospheric pressure in plasma thermal laminar boundary layer adjacent to cooled wall

17 p3011 A69-33446

Interferometric study of electron concentration and mass density profiles through ionized argon thermal end-wall layer formed in shock tube

17 p3074 A69-33477

One dimensional theory for cylindrical low pressure electrodeless discharge, predicting electron number density and temperature as function of applied fields

17 p3011 A69-33479

Energy dissipation in collisionless shock waves generated in plasmas with 1-500 trillion/cm electron density by theta pinch, measuring axial ionic energy spectrum

17 p3013 A69-33820

Coupling between electric dipoles in warm plasma, determining electron density and temperature from resonance peak of mutual impedance at electron plasma frequency

17 p2925 A69-33846

Microwave propagation inside hollow cylinder using model plasma as dielectric, deriving relationship between phase shift and free electron density

17 p2932 A69-34218

Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth

18 p3186 A69-34300

Heated Hg shock tube construction and operation, application to high electron density plasmas and problem of shock bifurcation in Hg monatomic gas

18 p3116 A69-34453

Dawn-dusk electric field in outer radiation zone associated with magnetospheric plasma convection, comparing electron densities for magnetically quiet periods

18 p3128 A69-34942

Electron intensities in Starfish belt /1963- 1965/, discussing radial diffusion loss mechanism and pitch-angle diffusion

18 p3187 A69-34945

Electron temperature, density and magnetic disturbances measurements at 1000 km compared with visual observations during 25-26 May 1967 magnetic storm and aurora

18 p3129 A69-34954

Low density plasma electrical conductivity determined by temperature and electron density measurements, using Ohm law

18 p3181 A69-35072

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements

18 p3153 A69-35307

White light solar corona brightness distribution observations /1964-1967/, considering solar radio flux relationship and equatorial electron densities

18 p3205 A69-35394

Solar radio emission during quiet sun years 1964-1965 mapped using Stanford spectroheliograph, attributing slowly varying component to electron density enhancement

18 p3188 A69-35395

Be 7 stability in galactic cosmic radiation, noting lifetime dependence on electron density around nucleus

18 p3189 A69-35482

Electron concentration in hypersonic nonequilibrium shock layer flow by two wavelength laser interferometry, noting wavelength dependence of refractivity

19 p3306 A69-35742

Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model

19 p3382 A69-36045

Electron density and electron temperatures determine in planetary nebulae, using maximum number of observed forbidden transitions

19 p3423 A69-36224

Electron temperatures and densities in interelectrode plasma of close spaced high current cesium plasma diode

19 p3380 A69-36415

Longitudinal electric field, electron density and temperature in positive column of low pressure Cs-Ar DC arc discharge, discussing Cs vapor depletion

19 p3380 A69-36441

Electron effective mass, density and mobility in /000, and /111/ conduction band minima in Te-doped degenerate GaSb-InSb single crystals

19 p3390 A69-36555

Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density

20 p3603 A69-37548

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities

20 p3589 A69-37557

Plasma ion and electron concentration perturbations in wake of body moving at high velocity in collisionless plasma under steady magnetic field

20 p3459 A69-37659

Cosmic radio emission absorption in D, E region and in F 2 layer above and below electron concentration maximum from vertical ionospheric sounding 1959 over Moscow

20 p3590 A69-37676

Flux magnitude and pitch angle distribution relationship for postsubstorm auroral electrons, noting particle precipitation and acceleration models

20 p3592 A69-38082

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility 20 p3584 A69-38215

Precursors ahead of pressure driven shock waves in Ar, considering electron diffusion, temperature a density 20 p3518 A69-38237

Precursor electrons due to photoionization ahead of pressure driven shock waves, presenting electron temperature and density theoretical analysis 20 p3511 A69-38238

Upper atmosphere particles, luminosity and electron concentration measurements documented in input, storage and energy radiation classes, determining recombination coefficients 21 p3707 A69-38491

Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands 21 p3737 A69-38998

Attachment coefficients for negative oxygen ion formation in low energy electron swarms over various voltage/pressure ratios 21 p3774 A69-39238

Radio wave reflection from irregularly ionized meteor trains, discussing decay time scatter and electron line density 22 p3899 A69-39969

Live retinal photoreceptors studied by low angle X ray reflection, proposing electron density model 22 p3871 A69-40057

Power per unit volume of UV and forbidden lines emitted by ionized C, N, O and Ne as function of electron temperature and density 22 p3984 A69-40157

Arc-heated plasma jet wind tunnel flow properties in plenum chamber by spectroscopic techniques, measuring electron excitation, temperature and densities 22 p3990 A69-40596

Stark broadening of H-gamma for electron density measurement in plasma, noting temperature range 22 p3985 A69-40664

Electron and ion Stark broadening of allowed and forbidden, triplet and singlet transitions in neutral He at low electron densities, noting Doppler broadening 22 p3985 A69-40665

Ionic excited states statistical equilibrium populations calculated for various electron densities and temperatures including effects of dielectronic, radiative and three body recombinations 22 p3985 A69-40666

High radial velocity matter of bright region near Trapezium in Orion Nebula, determining electron density lower limit and mean velocity 22 p4029 A69-40769

Laser radiation power and electron concentration in He-Ne plasma measured by microwave diagnostics 22 p3964 A69-40794

Mach-Zehnder laser interferometer for measurements of electron density in transient Hg vapor plasma, noting agreement with microwave measurements 22 p3965 A69-40924

Multifrequency dispersion interferometers applicability in plasma diagnostics, considering integral electron concentration measurements 22 p3947 A69-40959

Electron density decrease in F 2 layer ascribed to 9 July 1962 thermonuclear explosion, noting dissociative recombination role 22 p3942 A69-41098

Plane electromagnetic wave scattering on turbulent fluctuations in electron density of finite volume ionized plasma, evaluating Booker-Gordon relation 23 p4116 A69-41587

Integral electron concentration in column of space between earth satellite and ground determined by integral equation, assessing errors minimization methods 23 p4157 A69-41858

Blunt body stagnation point air ionization by chemical nonequilibrium thin viscous shock layer analysis, predicting electron density 23 p4060 A69-41917

Electron density in positive column of Cs vapor discharge related to current and gas pressure, discussing field strength effects on drift velocities 23 p4196 A69-42197

Electron density fluctuations in transition region of turbulent plasma jet, noting spiky waveform [AIAA PAPER 68-685] 24 p4360 A69-43697

Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations 24 p4353 A69-43700

ELECTRON DENSITY PROFILES

Vertical wind profiles and electron density profiles in E region, determining time dependence and ionization drift velocity 01 p0072 A69-11172

LF continuous wave rocket propagation in D region presented in terms of electron density profiles 01 p0076 A69-11232

Temperature and electron density distribution during late phase of wire explosion, analyzing optically thin plasma column by quantitative spectroscopy 02 p0286 A69-11711

Plasma column density profile measurement by means of two resonant cavity modes for low pressure discharge in small diameter tubes 02 p0290 A69-12403

Electron radial distribution determination in positive Hg plasma column using simultaneous measurements with two different microwave cavities 02 p0290 A69-12404

Electric potential for axisymmetric equilibrium electron density distribution, solving Poisson equation in closed form 03 p0476 A69-13159

Electron temperature and concentration and solar UV absorption data from sounding rockets, estimating ion exchange rate, recombination coefficient and heat flux 03 p0422 A69-13508

Nighttime variations of F region electron density profiles at Puerto Rico, discussing seasonal and solar cycle variations in temperature and vertical drift velocity 03 p0503 A69-14017

Transpolar exospheric electron concentration distributions along earth-sun line parallel path of Alouette 1 satellite 03 p0425 A69-14018

Error introduced into total electron content data by changes in ionospheric layer height 05 p0816 A69-16281

Rocket measured profiles of electron density and ion abundances in E region, discussing role of minor atmospheric constituents 05 p0757 A69-16408

Radial electron concentration profile determination by spectroscopic examination of continuous plasma radiation of pulsed discharge in capillary 06 p0964 A69-17253

Ionospheric D layer electron concentration profile from radio wave absorption frequency dependence 06 p0920 A69-17729

Electron density shock layer profiles measured by Langmuir probe in hypersonic tunnel on blunt body for air flows and gas densities [AIAA PAPER 69-81] 06 p0863 A69-18101

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion [AIAA PAPER 69-82] 06 p0915 A69-18190

Electron density distribution stationary with respect to sun determined by Alouette 1 measurements over winter pole, noting relation to high density plasma 06 p0922 A69-18224

Electron momentum density in diamond, graphite and carbon black from Compton profile measurement by X ray scattering vector 06 p0982 A69-18233

Single polynomial analysis of ionograms, determining electron density profiles from small number of measured heights 07 p1125 A69-18915

Faraday rotation measurements using incoherent scatter to obtain ionospheric electron density profiles 07 p1085 A69-19223

D region electron density vertical profiles measured using partially reflected echoes from lower ionosphere 08 p1307 A69-20189

Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H, noting electric field 08 p1361 A69-20230

Plasma column of free burning electric arc, deriving temperature, electron concentration and electric field radial distributions 09 p1545 A69-21431

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station 09 p1486 A69-21544

VLF emissions intensity and spectra variations compared with energetic electron fluxes variations during magnetosphere storm periods 09 p1488 A69-21698

Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field 09 p1548 A69-21919

Electron density profile from oblique ionogram calculated by iteration, assuming concentric spherically stratified ionosphere 10 p1684 A69-23826

Topside ionospheric electron density profiles compared for magnetically quiet and disturbed periods surrounding December 17, 1962 magnetic storm 10 p1685 A69-23835

VHF radar observations of electron density irregularity in nighttime equatorial electrojet, comparing day and night time electron drift rates and directions 10 p1769 A69-23837

Radio nebula NRAO 591/593, discussing thermal and nonthermal source and models based on electron density distribution 10 p1790 A69-24136

Seasonal variations of electron density profiles in lower ionosphere measured by differential absorption using partial reflections 14 p2438 A69-29109

Electron temperature and density distributions across cesium converter interelectrode gap determined spectroscopically, noting maxima toward emitter 14 p2491 A69-29259

Boltzmann equation for hot electron distribution functions in GaAs and threshold field in Gunn effect 15 p2665 A69-30025

Time resolved Stark broadened spectral profiles for Na I 5682-88 A and 4978-82 A lines of plasma, comparing electron densities 15 p2656 A69-31155

Magnetospheric equatorial electron density profile estimated from midlatitude whistler observations, determining paths from dispersion data 15 p2677 A69-31357

E region ionization redistribution by neutral winds, comparing calculated vertical drift velocities to observed electron density profiles 15 p2677 A69-31395

Ground based partial reflection and cross modulation or wave interaction techniques compared for studying D region electron densities 15 p2606 A69-31537

Nonlinear generation of sum and difference frequency components in magnetoplasma current density due to alternating electric fields, electron density and temperature gradients 16 p2821 A69-32036

Nighttime decreases in F 2 layer heights at near conjugate stations in low latitudes, using electron density profiles 16 p2778 A69-32186

Maximum ionization altitude, thickness, electron density profile and temperature mean variations in summer of IGY and IQSY at Moscow station 16 p2783 A69-32539

Plasma electroacoustic resonance in reentry sheath of Trailblazer 2 vehicle excited by nonradiating coaxial antenna, deducing electron density gradient at vehicle surface 17 p3010 A69-32915

Precursor plasma electron number densities calculations for blunt reentry vehicles, analyzing extreme UV radiation emanating from bow shock [AIAA PAPER 69-718] 17 p2893 A69-33487

Ionospheric absorption and virtual heights relationships for electron density distribution in lower ionosphere, computing model profiles 18 p3125 A69-34248

Radio meteor ionization profiles, discussing electron line density measurements by backscatter system 19 p3283 A69-35992

Solid state detector for electron spatial distribution measurements onOGO-F satellite, discussing design emphasizing reliability 19 p3284 A69-36676

Electron density distribution in laminar air boundary layer on sharp wedges and cones predicted by reducing chemical kinetic model to ordinary differential equations [AIAA PAPER 68-733] 20 p3458 A69-37181

Pulsar distance determined by electron content in line of sight to pulsar compared with neutral H amount integrated through galaxy in pulsar direction 20 p3597 A69-37409

Electron density distribution in northern and southern polar regions ionosphere based on 1958 and 1959 observations at high geomagnetic relatively low geographic latitudes 20 p3526 A69-37664

ELECTRON DIFFRACTION

Topside ionogram reduction for ionospheric electron density determination, using geomagnetic strength at all heights, iteration and change of variables
20 p3529 A69-37864

Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections
20 p3495 A69-37865

Computer aided data interpretation system converting ionograms to vertical electron density profiles
20 p3504 A69-37866

Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
20 p3530 A69-37867

High latitude limit of closed geomagnetic field lines indicated by high latitude electron boundary in outer radiation zone during Alouette satellite energy particle experiment
20 p3531 A69-37875

Birefringent element within Fabry-Perot cavity for identification of direction of electron density change in z-pinch discharge
22 p3946 A69-40438

Operational characteristics of multiple arcjet wind tunnel for time varying mass flow rate programs, calculating isentropic core densities and velocities [AIAA PAPER 68-229]
22 p3927 A69-40541

LF oscillations in electron number density of ionized deuterium, Ne and He identified from particle continuity equation
22 p3986 A69-40759

Midlatitude ionospheric electron density rocket data survey, including nighttime and daytime N/h profiles for specific solar activities
23 p4155 A69-41563

Ionospheric electron content and distribution at low altitudes from satellite S 66 data, describing seasonal variations of equatorial anomaly peak
24 p4367 A69-43010

Ionization rate limiting processes behind strong shock waves in pure N₂, plotting electron density profile diagrams
24 p4302 A69-43367

Near wake electron density distribution for reentry configuration models in shock tunnel with minimum flow interference [AIAA PAPER 68-161]
24 p4248 A69-43643

ELECTRON DIFFRACTION

Surface structures determination by energy analysis and low energy electron diffraction of scattered electrons
09 p1554 A69-21340

Back scattered electron inelastic LEED spectra of cesium plasma in W/100-Cs system, noting strong loss peak
12 p2132 A69-26116

Low energy electron diffraction oxygen adsorption kinetics on planes of tungsten at coverages below monolayer and work function measurements
18 p3183 A69-35106

Carbonaceous meteorites mineralogically identified by selected-area electron diffraction, suggesting formation from minerals mixtures
19 p3311 A69-36111

Linear self consistent diffraction emission theory and relationship to electron beam propagation
22 p3899 A69-40615

ELECTRON DIFFUSION

Electron drift velocity, diffusion coefficient and trapping time in GaAs, measuring variation with electric field
01 p0140 A69-11255

Diffusion process in dislocation-free doped and undoped GaAs single crystals
02 p0296 A69-11792

Radial diffusion coefficient for trapped electrons moving across field lines, obtaining time dependent solutions of Fokker-Planck equation
03 p0502 A69-14002

Transport diffusion cross sections of slow electrons during scattering at inert gas atoms by microwave method, calculating electron transfer coefficients
03 p0481 A69-14143

Nonlinear and second order thermal diffusion of electrons in ionized gas
04 p0636 A69-14878

Drift and diffusion of electron pulse advancing through gas, providing physical basis for Townsend ionization coefficient
04 p0633 A69-15443

Unique solution for radial diffusion coefficient applicable to equatorially trapped electrons in artificial radiation belt
05 p0816 A69-16279

Radial diffusion of high energy electrons in outer radiation belts, determining statistically delay time between electron intensity variations
06 p0919 A69-17720

Recombination coefficients for dense weakly ionized cesium plasma, treating recombination process as diffusion generated by electron collisions
08 p1359 A69-19844

Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
08 p1368 A69-20807

Bimodal diffusion mechanism for acceleration of trapped electrons and protons in earth radiation belts, noting particle intensity profiles and energy spectra
09 p1576 A69-21708

Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history
10 p1767 A69-23766

Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations
11 p1866 A69-25275

Nighttime maxima anomaly in electron concentration of ionospheric F layer at midlatitudes, considering diffusion and recombination
12 p2064 A69-26007

Ions and electrons in ionosphere diffusion tensor components and ambipolar diffusion coefficient expressions derived for nonisothermal plasma
12 p2071 A69-26700

Particle fluxes in outer radiation belt and unstable radiation zone of outer geomagnetic field, discussing electron diffusion into magnetosphere and magnetic disturbances
12 p2150 A69-26744

Pitch angle diffusion of trapped electrons in terrestrial radiation zones, discussing diffusion theory based on Fokker-Planck equation, atmospheric Coulomb scattering mechanism, etc
12 p2150 A69-26746

Electron and ion separation as function of plasma potential drop in Langmuir cathode layer in arc regime
14 p2490 A69-29237

Electron intensities in Starfish belt /1963- 1965/, discussing radial diffusion loss mechanism and pitch-angle diffusion
18 p3187 A69-34945

Radial motion of trapped electrons caused by pitch angle scattering in distorted geomagnetic field, noting diffusion coefficient
20 p3593 A69-38104

Precursors ahead of pressure driven shock waves in Ar, considering electron diffusion, temperature a density
20 p3518 A69-38237

Electron recombination and diffusion in afterglow following short pulsed DC discharge in CO₂, using microwave diagnostic techniques
22 p3984 A69-40478

Magnetospheric instabilities and whistler mode turbulence relationship to loss of high energy electrons from Van Allen belts
24 p4306 A69-42692

ELECTRON DISTRIBUTION

Electron impact ionization cross sections and rate coefficients from ground state given for free atoms and ions from hydrogen to calcium
01 p0125 A69-10992

Cosmos satellites monitoring electrons distribution in inner radiation belt suggest intensity stability for solar activity cycle
01 p0147 A69-11309

Nonlinear interaction between longitudinal Langmuir waves and parallel wave vectors in heated plasma study, based on Cauchy problem of kinetic equation for electron distribution
02 p0285 A69-11461

Electron distribution function of isotropic homogeneous Lorentzian plasma subjected to frequency modulated electric field calculated by successive approximation method
02 p0285 A69-11543

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
02 p0292 A69-12559

Surface layer effects on conductivity of vacuum deposited gold films, studying resistance variations with film thickness
02 p0300 A69-12625

Exciton distribution in semiconductors below Bose condensation temperature differing from diffusion distribution
03 p0486 A69-13415

Nighttime sporadic E layer occurrence due to ionization redistribution established, noting concurrent F region electron concentration decrease
03 p0423 A69-13536

Nonlinear effect of triggering pulse on electron distribution for triggering of VLF emissions
03 p0399 A69-14022

Ionized medium effect on polarization of synchrotron radiation from monoenergetic distribution of electrons
04 p0648 A69-14420

UHF discharge plasma, electron distribution over bound states and ionization stages
04 p0634 A69-14442

Electrical properties of crystals relation to variations of electron or hole distributions, discussing inhomogeneities
04 p0641 A69-14506

Distribution functions for fast electrons near anode calculated by kinetic theory, assuming weakly ionized plasma with smaller Debye length than collision mean free path
04 p0635 A69-14764

Electron distribution function effect on microwave emission and HF conductivity of weakly ionized discharge plasma
05 p0799 A69-15734

Charge carrier concentration determination by double probe in plasma with Druyvesteyn distribution of incident electron flow
05 p0800 A69-15737

Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period
05 p0816 A69-16275

Particles nonlinear motion in plasma in magnetic field with arbitrary electron velocity distribution, discussing wave discontinuity patterns
05 p0804 A69-16370

Electron distribution function for homogeneous weakly ionized gas in presence of alternating electric field, discussing solution of Boltzmann equations
05 p0797 A69-16604

Solar type 4 bursts characteristics accounted for by cyclotron mechanism, assuming models of spot magnetic field configuration and electron density distribution
07 p1205 A69-18959

Limiting speed for target tracking hypersonic vehicle due to electrons formation through aerodynamic heating, calculating allowable flow conditions, maximum speeds and electron distribution
07 p1086 A69-19509

Complex microwave transmission coefficient of nominal cut-off plasma for several different types of electron distribution, noting discharge characteristics for cut-off
08 p1366 A69-20759

Electron drainage currents from dilute streaming plasmas to positively biased silicon and cadmium sulfide solar cell arrays [AIAA PAPER 69-262]
09 p1436 A69-21726

Scientific data acquisition and interpretation effects on electric spacecraft plasmas and field directions, noting electron interchange reactions effect [AIAA PAPER 69-276]
09 p1568 A69-21727

Hard X ray event spectrum representation by thermal bremsstrahlung spectrum emitted by energetic electrons, determining various physical parameters of source
09 p1579 A69-22180

D-2 satellite radiation dose based on upper atmosphere electron and proton distribution model, simulating electron bombardment and aging of materials and subsystems
11 p1949 A69-24869

Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations
11 p1935 A69-25757

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics
13 p2315 A69-28451

- Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source
14 p2451 A69-29777
- Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
15 p2658 A69-30256
- Linearized kinetic equation for perturbed electron distribution function, detailing plasma oscillations along magnetic field by Landau collision term
16 p2818 A69-31674
- Electron distribution function for weakly ionized plasma under alternating electric and circularly polarized rotating magnetic field, noting cyclotron resonance
16 p2820 A69-31753
- Ion and electron distributions in chemical nonequilibrium boundary layer flow over hypersonic reentry vehicle, discussing plasma sheath and boundary layer thickness relations
16 p2769 A69-31874
- Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment
17 p3014 A69-33829
- Differential cross sections for secondary electron production in atomic ionization by charged particle impact, using classical binary encounter approximation
17 p3009 A69-34189
- Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas
18 p3179 A69-34438
- Metal-semiconductor contact current-voltage characteristic derived from modified diode theory taking into account electron distribution function
19 p3391 A69-36608
- Temperature effect on electron concentration steady distribution in F 2 layer
20 p3525 A69-37657
- Flux magnitude and pitch angle distribution relationship for poststorm auroral electrons, noting particle precipitation and acceleration models
20 p3592 A69-38083
- Drift shell splitting in nondipolar distorted magnetosphere tested with data from electron spectrometer on ATS 1 and OGO 3 satellites
22 p4005 A69-40508
- Strong doping criterion for Si with deep level impurity centers based on electron spectra of fast surface traps
22 p3992 A69-40604
- Pitch angle distribution of cosmic ray electrons in decreasing magnetic field for waves in ionized plasma, noting anisotropy due to synchrotron radiation
22 p4006 A69-40642
- Extensive air showers temporal distribution of electrons by diffusion equations in A approximation compared with experiments and Monte Carlo calculations
22 p4007 A69-41054
- Boltzmann equation for electron distribution function of Lorentzian plasma traversed by transverse traveling wave, showing existence and uniqueness of solution
24 p4354 A69-42675
- ELECTRON EMISSION**
NT FIELD EMISSION
NT PHOTOELECTRIC EMISSION
NT SECONDARY EMISSION
- Spherical and cylindrical probes emitting electrons and ions in unbounded plasma, deriving I-V characteristics equations
02 p0247 A69-11569
- Radiation and electrical precursor effects in expansion tube of electromagnetic shock tube, discussing primary causes
02 p0229 A69-11936
- Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
03 p0368 A69-13127
- Spectrum and yield of emitted electrons resulting from passage of heavy ions through metal films
03 p0471 A69-13164
- Electron production and loss rates in F region from measurements of Faraday rotation imposed on VHF telemetry transmissions from geostationary satellite
03 p0503 A69-14016
- Electron emission into vacuum from forward biased Schottky barrier consisting of cesiated thin layer of Pt on n-type ZnS
03 p0493 A69-14186
- Electron emission from metal foils used to study lifetime, concentration and mean ion energy of hot plasma
03 p0481 A69-14211
- Ion and electron contaminating currents removal in vacuum evaporating devices, using biased field plates
04 p0577 A69-14875
- Cathode emission site analysis by measuring prebreakdown current under ultrahigh vacuum conditions
05 p0800 A69-15740
- Thermionic electron emission from Mo and W targets irradiated by CW carbon dioxide laser beam
05 p0771 A69-15812
- Cosmic X rays, gamma rays and electron production under astrophysical conditions, noting potential use in supernova and quasar research
07 p1204 A69-18391
- Electron emission of probe caused by impinging ions and photons, discussing model for low plasma densities
08 p1361 A69-20232
- Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential
09 p1593 A69-21655
- Saturation electron emission characteristics from incompletely outgassed Ta wire emitters immersed in Cs vapor using plasma anode technique, noting oxygen effects
09 p1437 A69-21812
- Semiempirical relation for electron cooling modified by plasma heating of thermionic converters, including effects of plasma density, diode spacing and surface potential difference
09 p1440 A69-21831
- Peaked electron emission from nickel surface with large work function under laser radiation, discussing emission pulses, electron currents and surface temperature time variations
10 p1703 A69-23572
- Cold electron emitters and operational principles, discussing thin film tunnel emitter, Schottky barrier emitters, MgO type emitter, etc
11 p1846 A69-24597
- I-V characteristics of electron emitting satellite in ionosphere, analyzing spherical Langmuir probe in collisionless plasma in magnetic field
14 p2511 A69-28956
- Effects of cold electron and light emission centers from dispersed Au films in electric field, as universal qualities characterizing dispersed metal films
14 p2504 A69-28992
- Cs mixture effects with Ba and I on cathode electron emission in thermionic converter
14 p2402 A69-29239
- High energy electrons emission during alloy evaporation on hot metal filaments used for thin film deposition
16 p2827 A69-32016
- Ionospheric processes associated with changes in polar aurora height, noting glow in E layer and soft electron emission into earth atmosphere
17 p2964 A69-33957
- Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory
19 p3375 A69-35911
- Electron ejections from nuclei of radio galaxies and quasars explained on basis of plasma stability, discussing role of relativistic electrons and resulting unstable pinch
20 p3606 A69-38032
- Electron emitters tested for gas laser operations, discussing nonreactive and reactive gases cases, matrix structures containing BaSrO and barium zirconate cathodes
23 p4172 A69-41394
- ELECTRON ENERGY**
- Electron thermal relaxation length in positive column determined by plasma parameters variations in small amplitude moving striations
01 p0127 A69-10341
- Electron density and temperature, ion density, composition and temperature and plasma space potential relative to space vehicle potential measured by spherical probe assembly
01 p0065 A69-10549
- Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
01 p0144 A69-10586
- Spacecraft ionospheric probe for simultaneous measurement of electron temperature and density, plasma space potential, ion composition, etc
01 p0081 A69-10760
- Neutral gas temperature variations effect on electron-ion temperature height profile in tidally generated sporadic E layer with wind shear of gravity wave origin
01 p0073 A69-11176
- Electron flux intensities and energy spectra in inner radiation zone, noting decay constants
01 p0147 A69-11235
- Resonance energy transfer mechanism in Forster-Dexter theory of electron energy transfer by resonance interaction in condensed media, using many particle treatment
01 p0121 A69-11257
- Auroral emission rates and heating effects as function of altitudes
02 p0235 A69-11426
- Alkali metal quadrupole spectral doublets used as diagnostic for determining alkali-metal plasma electron temperature
02 p0286 A69-11584
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
02 p0237 A69-11664
- Electron measurements at 18 earth radii in Vela satellite program
02 p0307 A69-11735
- Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources
02 p0210 A69-12437
- Diffusion effect on particle buildup in deionizing steady plasma flux linked to plasma concentration in presence of electron temperature gradients
02 p0291 A69-12483
- Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
02 p0292 A69-12557
- Oxygen electron cooling effect on ionospheric electron temperatures, noting discrepancy removal throughout day at all altitudes
02 p0245 A69-12739
- Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma conductivity and flow velocity for electron temperature and density
03 p0473 A69-12877
- Electron temperature and concentration and solar UV absorption data from sounding rockets, estimating ion exchange rate, recombination coefficient and heat flux
03 p0422 A69-13508
- Fast type r moving striations in plasmas and dependence of ionization frequency on electron mean energy
03 p0477 A69-13801
- High latitude electrons boundary dependent on geomagnetic axis orientation, noting role of coupling between solar wind and magnetosphere
03 p0502 A69-14003
- Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F 1 region
03 p0502 A69-14008
- Time resolved electron number density and electron temperature in decaying plasma using laser interferometer
03 p0432 A69-14187
- Electron radiation temperature measurement in carbon dioxide laser with N and He additions by microwave technique, noting average electron energy and optical gain
04 p0611 A69-14445
- Effect of dipole/dipole resonance interaction between excited and nonexcited atoms on gas thermodynamic properties, showing unstable quasi-molecules formation
04 p0632 A69-14551
- Nonlinear electron oscillations in plasma, deriving asymptotic expression for plasma perturbation
04 p0635 A69-14552
- Electron, ion and neutral particle temperatures of upper atmosphere
04 p0592 A69-14975
- Inelastic collisions effect on electron energy distribution in low temperature diffusion dominated discharges
04 p0637 A69-15047
- Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
04 p0638 A69-15368
- Ionospheric electron temperature probe analysis based on Japanese Kappa rocket data
05 p0761 A69-15701

Field strength, electron temperature and ion concentration fluctuations in axial direction determined from measurements between homogeneous and stratified plasma columns
05 p0800 A69-15736

Equations for frequency portions of electron-velocity distribution function in Lorentz plasma under influence of time periodic electromagnetic fields with two fundamental frequencies
05 p0800 A69-15743

Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states
05 p0745 A69-15890

Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets
05 p0755 A69-16267

Auroral electron energy spectrum observed by sounding rocket reveals smooth continuum with peak to produce auroral arcs
05 p0756 A69-16274

Langmuir probe experiment measurement of upper region electron temperature on Explorer 32 conflict with Jicamarca Radar Observatory measurements
05 p0756 A69-16283

Langmuir probe to determine helium plasma density effect on electron temperature from relation between spectral line intensities
05 p0804 A69-16376

Electron temperature relation to population ratio in Gunn effect
05 p0810 A69-16576

Galactic magnetic field estimation obtained from cosmic ray electron spectrum and radio data
05 p0828 A69-16612

Velocity distribution of plasma electrons in electron beam generated He plasma using Boltzmann equation, neglecting electron-electron collisions
05 p0805 A69-16705

Relation between energy spectrum and potential drop in plasma expelled from hot cathode tube into vacuum derived by electrostatic analyzer
06 p0963 A69-16899

Primary electrons implications on cosmic ray confinement in Galaxy, astrophysical aspects and problems of energy spectrum
06 p0991 A69-17308

Electronic charge variations with cosmic time determined from geochronological data
06 p1003 A69-17323

Cosmic ray electron energy spectrum compared with galactic radio noise for estimating galactic magnetic field
06 p0992 A69-17377

Ground state energy of Anderson Hamiltonian calculated by cluster variation for cases of infinite d-d correlation energy
06 p0958 A69-17712

Electron temperatures and optical depths for planetary nebulae outer regions derived using radio spectra and Balmer line isophotes
06 p1009 A69-17962

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion [AIAA PAPER 69-82]
06 p0915 A69-18190

Nonequilibrium of electron and gas temperatures and reaction process for force-free plasma parallel beam produced in burner by expansion of argon plasma [DVL-875]
07 p1188 A69-18277

Surface UV irradiated MgO powder catalytic activity for hydrogen-deuterium exchange reaction
07 p1073 A69-18374

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum
07 p1199 A69-18686

Differential energy spectrum of protons and helium nuclei using lithium drifted silicon detectors and scintillator-Cerenkov counter
07 p1204 A69-18833

High electron-proton temperature ratios effect on solar wind double shock wave structure, using one dimensional and two fluid models
07 p1205 A69-18849

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects
07 p1206 A69-19269

Energy transfer through ionospheric electrons, discussing degradation of fast electrons and role of neutral gas motion in ionospheric currents
07 p1128 A69-19369

Low energy electrons in magnetosphere from OGO-1 and OGO-3 observations, discussing plasma sheet, magnetic bay activity, electron pressure, temperature and density gradient
07 p1209 A69-19373

Rosette Nebula structure from high resolution observations at 178 MHz of galactic plane, deriving 8600 K electron temperature for Nebula, discussing Monoceros Nebulosity
07 p1223 A69-19625

Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave
07 p1088 A69-19746

Electron energy distribution measurements in carbon dioxide laser discharges noting similarity of distribution for nitrogen
08 p1323 A69-19801

Free fall theory for afterglow decay of average electron density and temperature in pulsed cylindrical mercury vapor discharge plasma
08 p1358 A69-19811

Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H, noting electric field
08 p1361 A69-20230

Population densities of UV bound resonance lines of neutral helium for 41-level model atom, discussing optical thickness and electron temperature and density
08 p1390 A69-20392

Electron energy distribution function in plasma heated by electron-cyclotron resonance in adiabatic trap determined from bremsstrahlung spectrum
08 p1365 A69-20547

Electron temperatures and internal turbulence in H II regions of Sagittarius arm measured by high resolution interference method
08 p1392 A69-20566

Recombination rate of electrons in high pressure helium-like plasma with gas temperature fixed at 300 K and electron temperature varied between 300-2000 K
08 p1356 A69-20742

Electron temperature of Orion Nebula at 6750 K from intensities of hydrogen n alpha lines, discussing Stark broadening
08 p1398 A69-20776

Time harmonic, spherical harmonic and power series expansion of Boltzmann equation
08 p1353 A69-20793

Plasma stream behavior emerging from magnetic field, noting transverse velocity imparted to electrons by field
08 p1368 A69-20808

Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula
09 p1591 A69-21454

Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function
09 p1554 A69-21467

Type 3 solar radio noise bursts at hectometer wavelengths, deducing coronal electron temperatures from decay rates
09 p1594 A69-21665

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963
09 p1490 A69-21771

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse
09 p1490 A69-21772

Spectroscopic measurements of electron density and temperature for quasi-saturation region of ignited mode plasma in planar thermionic converter
09 p1439 A69-21826

Electrons resonant heating in beam plasma discharge, discussing ion cyclotron wave excitation in hot electron plasma produced by electron beam
09 p1549 A69-22016

Nonlinear longitudinal oscillations in nonisothermal electron plasma with Maxwellian distribution in velocity space and different temperatures of electrons and ions
09 p1550 A69-22025

Stochastic model of electron cyclotron heating, calculating energy gain during transit of magnetic mirror field in presence of microwave electric field
09 p1551 A69-22038

Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039

Electrons velocity-space instability in plasma column, analyzing unstable wave and dispersion characteristics
09 p1552 A69-22041

Solar moving type 4 burst emitting synchrotron radiation, noting electron acceleration in collisionless shock wave in corona
09 p1578 A69-22058

Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares
09 p1580 A69-22203

Energy distribution in electron gun with single crystal spherical cathode, noting work function, space charge cloud and beam overlapping effects
09 p1464 A69-22396

Cosmic ray electrons and gamma quanta at lower atmosphere recorded with balloon equipment, plotting vertical profiles of electron energy spectra
10 p1758 A69-22830

Electrical conductivity, electron energy balance, ionization equilibrium time and channel parameters in pulse discharge nonequilibrium Cs plasma containing inert gas addition
10 p1731 A69-23439

Nitrogen impurities effect on electron energy balance in DC arc burning in inert gas
10 p1732 A69-23442

Excitation and ionization relaxation of cesium seeded argon gas computed for stepwise increase of electron temperature
10 p1732 A69-23444

Electron temperature distributions in Ar-K plasma of simulated Faraday type MHD generator for current distributions, determining current density distribution experimentally
10 p1734 A69-23453

Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance
10 p1735 A69-23463

One dimensional analysis of stationary argon flow in linear Hall generator from continuity, momentum and energy equations, discussing electron heating and nonequilibrium ionization
10 p1736 A69-23465

Nonequilibrium electron heating effect on inert gas plasma conductivity during shock wave movement across magnetic field
10 p1737 A69-23470

MHD conversion experiments using rare gas, considering Typhee loop, electron heating and correction effects
10 p1738 A69-23475

Entrainment and acoustothermal effect in piezoelectric semiconductors having electrons with different energy
10 p1746 A69-23573

Bright emission nebula components and electron temperature determined by radio telescope observation
10 p1778 A69-23603

Fast electron energy distribution function and atom concentration in first excited level in weakly ionized plasma, considering transitions between excited levels
10 p1739 A69-23628

Energetic particles observed during proton flare noting relativistic electrons, protons to alpha particles ratio, low energy particles and bidirectional proton stream
10 p1768 A69-23785

Moving striations in plasmas, presenting measurements of relative phases of electron temperature, plasma potential and luminous intensity near Pupp current limit
10 p1741 A69-23859

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering
10 p1686 A69-23910

Auroral electron energy diurnal variation, noting ground observations of polar auroras, riometric absorption, vertical changes in ionization layer maximum position, etc
10 p1687 A69-23915

Electron concentration and temperature dependence on gas temperature as factor determining He-Ne laser output at 6328 Å
10 p1706 A69-24078

Nebular abundances allowing for temperature variations in nebula along line of sight, correcting changes in electron temperature along path of observation
10 p1787 A69-24116

- Electron-ion temperature relaxation near interface of two semiinfinite nonmagnetized different temperature plasmas brought into thermal contact
11 p1923 A69-24296
- Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity
11 p1925 A69-24310
- Resonances in cross sections for electron impact excitation of forbidden lines in oxygen molecular ion at near threshold energies for astrophysical applications
11 p1921 A69-24417
- Relation between electric field strength and mean energy for electron swarms in oxygen determined, using Boltzmann transport equation
11 p1921 A69-24419
- Cold electron emitters and operational principles, discussing thin film tunnel emitter, Schottky barrier emitters, MgO type emitter, etc
11 p1846 A69-24597
- Monograph on internal structure of sun corona covering variations in intensity and width of coronal lines, inhomogeneity, quasi-homogeneous and anisothermal coronas, etc
11 p1961 A69-25103
- Optical and radio measurements of electron temperature of H II regions obtained from brightness ratio of hydrogen line and continuum, considering isothermal model
11 p1950 A69-25110
- Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
11 p1951 A69-25162
- Ionization equilibrium for ions of solar abundant elements between C and Ni calculated as function of electron temperature
11 p1928 A69-25262
- Critical condition for electromagnetic radiation generation by energetic electrons gyrating in dense magnetized plasma, proposing plasma instability mechanism
11 p1931 A69-25363
- Recombination emission spectrum relation to plasma recombination coefficient, determining plasma electron temperature from continuous spectrum intensity
11 p1934 A69-25566
- Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
12 p2132 A69-26097
- Knudsen arcs in argon showing potential well presence with anode barrier and cathode potential drop, establishing slow electrons thermal equilibrium
12 p2137 A69-26536
- NGC 4151 bright lines intensity, electron density, temperature and ions quantity evaluation from spectrograms with 140 Å/mm dispersion
12 p2164 A69-27021
- Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization
12 p2141 A69-27146
- Plasma ion oscillations excited in plasma consisting of ion beam and thermal electrons produced by back diffusion sources
13 p2304 A69-27301
- Oxygen and NO ions yields produced by dissociative attachment of electrons to nitrogen dioxide as function of electron energy, considering electron affinities lower limits
13 p2301 A69-27363
- Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORAE mission of ESRO 1 satellite
13 p2253 A69-27753
- Electrical properties of p-type indium antimonide, noting effects of deep level compensation on cv values
13 p2318 A69-27895
- Collective scattering of light from ruby laser by cold dense deuterium plasma produced by electrical discharge, deducing density and electron temperature
13 p2273 A69-28366
- Primary particle energy and extensive air shower electron density relationship derived from vertical spectral profiles
13 p2331 A69-28396
- Angular distribution function calculations for avalanche electrons at various stages of cascade development, discussing electron energies and primary electron roles
13 p2303 A69-28414
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
13 p2257 A69-28695
- Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites
14 p2510 A69-28942
- Two fluid continuum theory of incoherent scattering extended to include unequal electron and ion temperatures, considering backscatter power dependency on collision frequencies
14 p2510 A69-28946
- Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
14 p2512 A69-28963
- Low energy electron precipitation data at northern high latitudes obtained from satellite low altitude polar orbit
14 p2512 A69-28964
- Electron and ion temperatures height variations in sporadic E layers, noting effects of neutral gas temperature changes
14 p2440 A69-29127
- Radiative and collisional ionization of H and He in planetary nebulae, discussing dielectronic recombination at high electron temperatures
14 p2518 A69-29133
- Plasma screening effect on energy spectra of electrons localized at surface charges in weakly doped unipolar n-type semiconductor
14 p2505 A69-29170
- Low voltage arc in cesium thermionic converter, investigating current-voltage characteristics, electron temperature, electron density and plasma potentials in ignited mode
14 p2401 A69-29231
- Low voltage arc discharge characteristics in cesium vapor, considering energy balance, electron temperature, energy losses, volt-ampere characteristics, ignition, cathode temperatures, etc
14 p2401 A69-29234
- Cesium plasma electron temperature in narrow electrode space of thermionic converter determined using electrode and changeable space diode
14 p2491 A69-29243
- Electron energy distribution function and nonequilibrium ionization rate in near cathode layer of thermionic converter
14 p2404 A69-29255
- Electron temperature and density distributions across cesium converter interelectrode gap determined spectroscopically, noting maxima toward emitter
14 p2491 A69-29259
- Energy resolution improvement in cylindrical electrostatic energy selector by focusing and limiting electron beam before entrance into monochromator
14 p2450 A69-29572
- Electron energy distribution functions and energy transfer rates to inelastic levels of carbon dioxide and nitrogen in laser
14 p2460 A69-29603
- Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time
14 p2492 A69-29636
- Linear approximation of electron temperature increment and electron mobility in nondegenerate polar semiconductor in crossed fields
14 p2508 A69-29662
- Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693
- Helium plasma electron temperature and concentration measured in arc in magnetic field by laser light scattering at electrons
14 p2496 A69-29780
- Plasma electron temperatures from electron bremsstrahlung spectra measurements in X ray region
14 p2496 A69-29783
- Electron temperature and concentration in plasma determined by measuring diamagnetic signal and IR radiation intensity, emphasizing usefulness in plasmoid head portion
14 p2496 A69-29785
- Plasma electron temperature determination by line intensity ratio of beryllium-like ions, noting excitation functions
14 p2496 A69-29789
- Three component fast neutral beam for hydrogen plasma ion density and electron temperature determination, improving accuracy and reliability
14 p2452 A69-29812
- Radio observations of emission nebulae for flux densities, deriving electron temperatures
[ASME PAPER 69-DE-46] 14 p2527 A69-29941
- Electrical conductivity ratio of weakly ionized turbulent gas to quiescent gas as function of electron temperature
14 p2502 A69-29991
- Fermi acceleration of energetic electrons trapped within dipole magnetic field analyzed to obtain quantitative results for wave-particle interaction within complex magnetospheric configuration
15 p2594 A69-30095
- Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening
15 p2657 A69-30104
- Argon afterglow microwave and spectroscopic studies, monitoring time-varying electron density and temperature and extracting electron-ion recombination coefficients
15 p2658 A69-30173
- Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
15 p2658 A69-30254
- Negative curvature electron energy spectrum of discrete radio source model, assuming acceleration by Fermi mechanism and energy loss by synchrotron radiation
15 p2687 A69-30540
- Electron energy distribution determination from electron synchrotron radiation spectrum for various magnetic field configurations within radio source
15 p2655 A69-30546
- Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function
15 p2669 A69-30712
- Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
15 p2675 A69-30756
- Electron temperature relaxation in shock heated Ar plasma, measuring plasma microwave radiation
15 p2663 A69-30995
- Resonances in elastic cross section for electron/hydrogen atom scattering noting wide structure
15 p2657 A69-31265
- Magnetic storm effects on electrons and protons in outer belt, using satellite data for intensity and differential energy spectra
15 p2676 A69-31314
- Electron temperature observation in daytime ionosphere, considering energy loss to ions and neutral particles
15 p2603 A69-31402
- Morning, daytime and nighttime rocket measurements of electron flux in upper atmosphere at 80-165 km altitudes, noting energy flux
15 p2677 A69-31413
- Simultaneous middle and low latitude Thomson scatter measurements, comparing electron density, temperature and exospheric temperature data on quiet and disturbed days
15 p2604 A69-31418
